The Coalition says its "new foreign and military policy * * * must be based on * * * the need to cooperate with nations of highly different political systems." But their demands and program show that what the CFNMP really wants is collaboration with Communist regimes and rejection and abandonment of our relations with non-Communist countries.

Current members of the Coalition for a New Foreign and Military Policy include:

American Friends Service Committee (AFSC)—formed by a group of fourteen pro-socialist Quaker pacifists in 1917 to aid draft resisters, has cooperated with Communists virtually throughout its career. For example, in 1922 AFSC sent Jessica Smith to Russia ostensibly to organize relief for a famine brought about by Bolshevik forced collectivism, but where she instead attended Comintern meetings. (After serving as leaders of a Soviet espionage ring in Washington, D.C., Jessica Smith and her husband, CPUSA political committee member and general counsel John Abt continued to work in support of the USSR to the present day).

Although AFSC describes itself as "a corporate expression of Quaker faith," its far-left stance has caused a number of sections of the Religious Society of Friends (Quaker Church) to sever connections with AFSC. AFSC works with the USSR-run World Peace Council and repeatedly denounced the United States as "the major obstacle to a peaceful settlement of the war" in Vietnam.

In 1972 AFSC published a pamphlet, "Nonviolence: Not First For Export," justifying the use of "violent revolution" by Communist-backed "national liberation movements." It asserted:

> "The revolutionary goal is a human society where the worth of the individual will be recognized and each person treated with respect. * * * Land reform measures will be enacted * * *. Education will be provided for every member of the society; * * * There will be employment for all. Discrimination because of race, colour or creed will end. Universal medical care will be provided * * *.

AFSC continues:

> "Any sensitive recollection of the imperialistic rise of the western nations during the past five centuries compels us to see the central role played by violence in their assumption of power over the people of Africa, Asia, and Latin America. This has been apparent not only in the military structures of control, but in the political, economic and cultural forms of coercion and domination. At the heart of western hegemony has been its ultimate power to overwhelm with physical force the colonized people who have thus been pushed against the wall by the keepers of repressive law and oppressive order. They have seen no recourse other than to take up the same arms which were used to exploit them. They have been taught by the West that force and violence are the ultimate arbiters of human destiny, and reluctantly they have been moved to action based on those suppositions.
>
> "Violence has become most apparent when the dispossessed have demanded the right to control their own land and destiny. In response to such insistent demands, every weapon in the western arsenal, from subversion and napalm to the threat of atomic destruction, has been used to maintain the unjust and oppressive power of the ruling forces. We can now see that violence permeates the status quo as, for example, in South Africa: (1) in the suffering created by lack of decent living standards, resulting in poverty, malnutrition, starvation; and (2) in the brutal practices and behavior of the police and penal system and the injustice of the courts and legal system. The U.S. has allied itself economically with the violence of this status quo, and we ourselves are a part of it.
>
> "It should surprise no one, therefore, that

Third World forces have turned to counter-violence as a means of winning their freedom.

* * * * *

"Often overlooked and simply taken for granted, frequently described as the 'community of law and order', is the violence of the status quo in America, the violence of many generations that still exists in massive fashion today. This violence is expressed in the agony of millions of men, women and children who in varying degrees suffer hunger, poverty, ill-health, lack of education, non-acceptance by their fellowmen. it is compounded of slights and insults, of rampant injustice, of exploitation, of police brutality, of a thousand indignities from dawn to dusk and through the night.

We hear so much in today's world about 'terrorism'. Repeatedly it is used to signify violent action on the part of oppressed peoples in Asia, Africa, Latin America, or within the black ghettos of America, as they take up the weapons of violence in a desperate effort to wrest for themselves the freedom and justice denied them by the systems that presently control their lives. What is so easily (one suspects, often deliberately) overlooked is the fact that the very regimes rebelled against the incarnation of a greater violence and terrorism than any used in the struggle against them. Long before the first freedom fighter laid hold upon a gun, or club, long before the first brick was thrown in Watts or Newark, racist societies were already guilty of a ruthless reign or terror where freedom was suppressed and human dignity denied.

* * * * *

". . . before we deplore terrorism it is essential for us to recognize fully and clearly whose 'terrorism' came first, so that we can assess what is cause and what is effect. It is easy to recognize the violence of the revolutionary when he strikes out against the inequities and cruelties of the established order. What millions of middle-class people and other non-poor fail to recognize is that they are themselves accomplices each day in meting our inhuman, all-pervading violence upon their fellows.

* * * * *

"Instead of trying to devise nonviolent strategy and tactics for revolutionaries in other lands, we will bend every effort to defuse militarism in our own land and to secure the withdrawal of American econonic investment in oppressive regimes in other parts of the world.

* * * * *

"Revolution then is needed first and foremost in the United States, thoroughgoing revolution, not a mild palliative. Specific and far-reaching changes are needed in American foreign policy, with equally specific and thoroughgoing changes in the U.S. domestic scene."

* * * * *

Americans for Democratic Action (ADA)—formed in November 1941 as the Union for Democratic Action which had top Comintern agent Louis Fraina as its first director of research and which was designed to promote U.S. aid for the Soviet Union, no longer Hitler's ally after the June invasion. UDA's identification with the Soviet made a name change politic in 1947.

ADA has always been staunchly anti-anti-communist and campaigned for abolition of the House Internal Security Committee and the Senate Sub-committee on Internal Security. It favors recognition of Communist regimes and its domestic goals call for implementation of huge federal government programs in health, housing, education—in a nutshell, socialism. It is noted that among the current ADA board members is Sylvia Crane, vice-chairman of the Communist Party front, the National Committee Against Repressive Legislation and an adviser to the Organizing Committee for a Fifth Estate, named by former CIA Director William Colby as responsible in part for the murder of the CIA Athens station chief.

Business Executives Move for New National Priorities (BEM)—formerly Business Executives Move for Peace in Vietnam, was formed in February 1967 by Henry E. Niles, chairman of the board of the Baltimore Life Insurance Company and father-in-law of New Left theorist Staughton Lynd. Niles, who has been associated with a number of socialist-pacifist organizations including the Peace Research Institute which merged with the Institute for Policy Studies (IPS) in 1963, changed BEM's name and program after the Communist victory in Vietnam.

Campaign for a Democratic Foreign Policy (CDFP)—formerly the Indochina Peace Campaign, Jane Fonda's public relations support group for the Vietnamese Communists.

Chile Legislative Center—supports the deposed Marxist Unidad Popular government of Salvador Allende and opposes the present military government of Chile.

Church of the Brethren, Washington office.

Christian Church (Disciples of Christ), Department of Church in Society.

Clergy and Laity Concerned (CALC)—formed in 1965 by the National Council of Churches, but first became widely known for its 1967 White House Demonstration in conjunction with the Communist-influenced Mobilization Committee to End the War in Vietnam. CALC continued to play an important role in New Mobe and its successors, meeting with the Vietnamese Communists repeatedly in Paris and Hanoi. In January 1970, CALC described its goals:

"* * * what we're about today is not simply an end to the war in Vietnam, but a struggle against American imperialism and economic exploitation in just about every corner of the world. * * * Our task is to join those who are angry and who hate the corporate power which the United States presently represents, and to attempt, in our struggle, to liberate not only black, brown and yellow men in every corner of the world, but more importantly, to help liberate our own nation from its reactionary and exploitative policies."

CALC and the AFSC for some four years have been coordinating the "Stop the B-1 Bomber: National Peace Conversion Campaign."

Episcopal Peace Fellowship (EPF)—formerly associated with the anti-Vietnam coalitions.

Friends Committee on National Legislation (FCNL)—an official lobbying organization.

FRIENDSHIPMENT, organized by Cora Weiss and other anti-Vietnam activists to raise money and supplies for the Vietnamese communist regime, Mrs. Weiss, who has traveled on a number of occasions to Hanoi, has been a highly active organizer and financial angel for the coalitions supporting the Vietnamese Communists. She is a leader of CALC and Women Strike for Peace; during 1976 she worked for the July 4 Coalition (J4C), set up by the Castroite communist Puerto Rican Socialist Party (PSP) and the Weather Underground's Prairie Fire Organizing Committee (PFOC) to organize anti-Bicentennial demonstrations in Philadelphia. Her husband, National Lawyers Guild member Peter Weiss, attempted to join the defense team for the Baader-Mainhof terrorists in West Germany; has been a leader of the American Committee on Africa, a support group for African Marxist terrorists for many years; and is a trustee of the Institute for Policy Studies (IPS).

Friendshipment contributions are routed through the Bach Mai Hospital Fund, a project of the Communist Party's youth group, the Young Workers Liberation League (YWLL).

Friends of Indochina Organizing Committee (FIOC)—associated with the Indochina Resource Center and funded as "a project of the Regional Young Adult Project" with offices at 120 Maryland Avenue, N.E., Washington, D.C. 20002.

Friends of the Filipino People—a support group for guerrilla insurgents in the Philippines which includes Marxist-Leninists of several factions.

Indochina Resources Center (IRC)—an outlet for propaganda hailing the Communists in Vietnam, Cambodia and Laos.

International Longshoremen's and Warehousemen's Union (ILWU)—one of the strongest Communist Party-controlled labor

National Council of Churches—a bureau-

Inter-University Committee to Stop Funding War and Militarism.

Jesuit Conference, Office of Social Ministries.

Mennonite Central Committee.

National Association of Social Workers.

National Council of Churches—a bureaucracy funded by several major religious denominations which has supported with funds and agitation. Soviet-backed Marxist-Leninist terrorist movements as the Vietcong, and the Rhodesian Zimbabwe African People's Union (ZAPU), one of whose captured guerrillas has admitted murdering three West German Roman Catholic missionaries on December 5, 1976. The NCC founded and provided funding for Clergy and Laity Concerned, and provides office space for a number of other radical Marxist and anti-capitalist groups. NCC is currently waging a campaign to pressure U.S. businesses to withdraw all investments in southern Africa to encourage economic collapse and a Marxist takeover. In this country, NCC has funded the violence-prone American Indian Movement (AIM), and raised bail money for convicted AIM members.

Network, Washington, D.C.

SANE, formed with the assistance of the AFSC, and which played a leading role in the National Conference to Slash Military Spending, organized by Communist Party, U.S.A. stalwart Pauline Royce Rosen, head of the U.S. section of the Soviet front, World Peace Council, in 1975.

Tapol.

Union of American Hebrew Congregations—one of whose leaders, Rabbi Balfour Brickner, was active in New Mobe and other anti-Vietnam projects.

Unitarian Universalist Association—which had representatives serving in the leadership of New Mobe and PCPJ; but as with other "religious" organizations in this radical coalition, has never indicated that its sponsorship was the result of a vote of all Unitarians.

United Church of Christ, Board for Homeland Ministries—various bureaucratic subsidiaries of the UCC have been listed as members of the anti-Vietnam, Communist Party influence PCPJ and its predecessors. UCC official Rev. Allen Fisher played a leading organizational role in the founding of the Communist Party's 1973 front, the National Alliance Against Racist and Political Repression. However, despite the use of denominational names, there is no indication that the members of the UCC congregations were asked to debate the issues and vote on membership in the CFNMP.

United Presbyterian Church, U.S.A., Washington office.

United Methodist Church, Board of Church and Society and the Board of Global Ministries, Women's Division.

Washington Office on Africa (WOA)—the official lobbying arm of the American Committee on Africa (ACOA), which has for years paid for African Marxist terrorists to come to the U.S. and publicize their causes, and which provides testimony before Congress in support of such organizations.

Washington Office on Latin America (WOLA)—another group which supports the deposed Marxist government of Chile.

Women's International League for Peace and Freedom (WILPF)—an internationally active socialist and pacifist group thoroughly penetrated by the Communist Party, U.S.A. to the extent that some chapters have CPUSA members of the CPUSA as their leaders.

Women Strike for Peace (WSP)—an organization formed in the early 1960s and from its inception thoroughly penetrated by the CPUSA. WSP and WILPF in some areas are virtually identical. WSP works closely with the World Peace Council and another parallel Soviet front, the Women's International Democratic Federation (WIDF).

The groups are calling for local demonstrations across the country on January 22 to press for disarmament and new social programs. They state that they will lobby congressional offices beginning on that date.

HOUSE CONCURRENT RESOLUTION 23—CONCURRENT RESOLUTION ON AMNESTY

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. KOCH. Mr. Speaker, I am today reintroducing my concurrent resolution on amnesty, House Concurrent Resolution 23, with additional cosponsors. At this opportunity I would like to add that it was my intention that under section 2(c) amnesty be granted to each member and former member of the Armed Forces who during the Vietnam era was absent without leave in violation of article 87 of the Uniform Code of Military Justice. That article covers servicemen or veterans who committed so-called missing movement offenses; that is, those who failed to show up for transport. Thousands of servicemen, in fact, the majority of those who deserted from the military during the Vietnam era, failed to report to their vehicle of transport in the States when their unit was to be sent to Vietnam. As the question of an amnesty or pardon is so soon to be decided upon by President-elect Carter, I have decided not to amend the text of my resolution to include such offenses, but I would emphasize that the spirit of the resolution does cover offenses of that nature.

I have set forth the text of the resolution below with the thought that it would be of interest to our colleagues:

CONCURRENT RESOLUTION

Endorsing the publically declared Vietnam-era reconciliation program of the President-elect and urging the President-elect to extend that program to include all Vietnam-era selective service offenders and all Vietnam-era veterans who received less than honorable discharges or who deserted or were absent without leave during such era.

Whereas American participation in the war in Vietnam ended nearly four years ago; and

Whereas it is in the best interest of this Nation and of its people to heal the wounds caused by the divisiveness of that war; and

Whereas such healing can only be accomplished by restoring to the rights and benefits of full citizenship the large number of Americans whose lives were unfairly and adversely affected as a result of their violation during the war of the selective service laws and regulations their desertion or absence without leave during the war, or military discharge procedures and standards which, during the reduction in the strength of the Armed Forces toward the end of the war, frequently resulted in less than honorable discharges where no military offense was alleged or proved; and

Whereas a less than honorable discharge, though not intended to be punitive, imposes a severe stigma on a young person entering the job market and is especially burdensome and unfair in a time of high unemployment: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress endorses the program publically announced by the President-elect to, upon taking office, pardon each person who, during the Vietnam era, failed to report for induction into, or refused induction into, the Armed Forces of the United States in violation of the Military Selective Service Act and who has not been prosecuted for such violation, and the Congress commends the President-elect for having publically committed himself to such a program.

SEC. 2. The Congress urges and requests the President-elect to extend his Vietnam-era reconciliation program and complete the reconciliation process by, upon taking office—

(1) granting amnesty to all persons convicted under the Military Selective Service Act of offenses committed during the Vietnam-era or against whom charges arising from failure to register in accordance with such Act during the Vietnam-era are outstanding; and

(2)(A) upgrading all general and undesirable discharges issued to former members of the Armed Forces who served in the Armed Forces during the Vietnam era to honorable discharges;

(B) reviewing on a case-by-case basis each bad conduct and dishonorable discharge issued to a former member of the Armed Forces during the Vietnam era to determine in each instance whether such discharge should be upgraded; and

(C) granting amnesty to each member and former member of the Armed Forces who—

(i) during the Vietnam era deserted in violation of article 85 of the Uniform Code of Military Justice (10 U.S.C. 885) and has not been tried by a court-martial for such violation;

(ii) during the Vietnam era deserted in violation of such article 85 and has been tried and convicted by a court-martial for such violation; or

(iii) during the Vietnam era was absent without leave in violation of article 86 of the Uniform Code of Military Justice (10 U.S.C. 886) and has been tried and convicted by a court-martial for such violation.

A FOURTH AMENDMENT VICTORY FOR AMERICA

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. HANSEN. Mr. Speaker, more and more Americans are becoming aware of the fact that they do not have to waive their basic rights to a Government inspector. There is a rapidly growing concern in this Nation over the erosion of individual rights and it is most gratifying to see this concern is being shared by the Federal judicial system as well. The recent Barlow ruling in Idaho striking down the inspection provisions of OSHA declaring them unconstitutional and void was a landmark decision in the endless battle for maintaining our constitutional rights.

The following is a reprint of an editorial which appeared in the January 11, 1977, issue of the Washington Star. I highly recommend this article by syndicated columnist James J. Kilpatrick to my colleagues and all citizens concerned for the preservation of our traditional freedoms:

A FOURTH AMENDMENT VICTORY

(By James J. Kilpatrick)

In the continuing war between a free people and the omnipotent state, the free people seldom win major battles. But they do win a few—and they won a big one the other day in Pocatello, Idaho. Brothers and sisters, let us rejoice.

With the decision of a three-judge federal court in the case of Barlow's, Inc., a key provision of the Occupational Safety and Health Act is reduced to so much rubble. Coming on top of similar decisions in other judicial circuits, the Idaho decision means that no businessman needs to submit any longer to the nitpicking, maddening, helter-skelter harassments of the OSHA inspectors. Subject only to the laws of assault, battery and mayhem, an employer can throw the inspectors out.

The issue in Barlow's was a straightforward question of constitutional law. The case arose last September when an OSHA inspector, Daniel T. Sanger, presented himself at the door of the plumbing, heating an air conditioning company. He demanded entry under a provision of the 1970 OSHA act authorizing inspectors "to enter without delay and at reasonable times any factory, plant, establishment, construction site, or other area, workplace, or environment where work is performed by an employee or an employer.

F. G. "Bill" Barlow, president of the company, might have saved thousands of dollars in legal fees if he had let Inspector Sanger in. So far as he knew his shop was in good shape; no employe had complained of unsafe conditions. But Barlow feels strongly on these things. He stood squarely on his Fourth Amendment rights: No warrant, no admission.

The disputants went promptly into court. On December 30, a three-judge panel upheld Barlow's position in an emphatic decree. Following the Supreme Court's reasoning in what are known as the Camara and See cases, the panel held OSHA's entry provision flatly incompatible with the Fourth Amendment. Discarding a couple of other precedents as not relevant, the panel noted that Barlow's was not engaged in selling liquor or trafficking in firearms, both heavily regulated industries that stand in a different class. Barlow's was simply one of six million work places.

The three judges in this case are among the heavyweights of the Western bar. M. Oliver Koelsch, senior judge of the Ninth Circuit, has been on the bench since 1951; Ray McNichols, chief district judge, went on the bench in 1964; J. Blaine Anderson of Boise has served since 1971. Their names on an order carry clout.

And it was some order: Section 8(a) is "unconstitutional and void in that it directly offends against . . . the Fourth Amendment." The secretary of Labor and the OSHA people "are hereby forever and permanently restrained and enjoined from acting or attempting to act pursuant to or in furtherance of Section 8(a) . . . and from conducting or attempting to conduct any general

searches or inspections of the non-public portions of the premises of the plaintiff. . . ."

The language went far beyond the order entered in Texas a year ago in the Gibson's Products case. There the federal court agreed to OSHA inspections if the inspectors obtained proper warrants. The Barlow's judges refused to make even that concession. "We decline the invitation to judicially redraft an enactment of Congress."

"We cannot accept the proposition," said Circuit Judge Anderson, "that the language of the OSHA inspection provisions envisions the requirement that a warrant be obtained before any inspection is undertaken. Certainly Congress was able, had it wished to do so, to employ language declaring that a warrant must first be obtained, the procedures under which it is to be obtained, and other necessary regulations. Congress did not do so and we refuse to accept that duty."

Hallelujah! But let me add this: No rational critic of OSHA can oppose the general purpose—to promote safe working conditions in American industry. The purpose is fine. But on the record, OSHA's costly programs have accomplished little. The inspectors function as police, prosecutors, juries and judges. To this arrogant outfit, such constitutional protections as due process, jury trial, and Fourth Amendment rights are meaningless. The agency's inspections are so haphazard that a company could go 10 or 20 years without seeing an inspector. Injuries ordinarily are to be deplored, but in crippling this outfit, the Western judges have performed a splendid service.

GOLDEN JUBILEE OF STS. PETER AND PAUL CHURCH, WARREN, OHIO, AND HONORING THE RT. REV. MSGR. SYLVESTER HLADKY, V.F., ON THE OCCASION OF HIS 40TH ANNIVERSARY TO THE HOLY PRIESTHOOD

HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. CARNEY. Mr. Speaker, on Sunday, October 17, 1976, Sts. Peter and Paul Church of Warren, Ohio, celebrated its golden jubilee together with the 40th anniversary to the holy priesthood of the Right Reverend Monsignor Sylvester Hladky, V.F.

The Sts. Peter and Paul Parish was founded through the zealous efforts of a young seminarian, Rev. John Rommack on January 7, 1925. On this day, the first divine liturgy in the Byzantine rite was celebrated in Warren, Ohio, at St. Mary's Roman Catholic hall by Rev. Father Ernest Shuba, pastor at St. George Byzantine Catholic Church in Youngstown, Ohio.

On August 26, 1945, the Reverend Father Sylvester Hladky arrived in Warren, Ohio and succeeded the Reverend Father John Stim, who was transferred to St. Nicholas Orphanage as chaplain. Msgr. Sylvester Hladky was born in Brooklyn, N.Y., in October 13 ,1909. After serving 3 years in the U.S. Navy, he entered St. Joseph Seminary in Canada, and was ordained to the holy priesthood on October 14, 1936.

During the postwar era, the parish continued to enjoy a rapid growth, expanding from the original 25 families in 1909 to more than 300 families. The need for a new church was more evident now than ever before. After a successful building fund campaign, the parish proceeded with the purchase of land upon which the new Sts. Peter and Paul Church was erected in 1950.

In the fall of 1955, classes began with a total enrollment of 72 pupils. With a building fund drive in the spring of 1956, the parish was able to construct a new school building in 1957 and expand its enrollment to 232 pupils. An additional 16 classroom building was constructed to accommodate the growing number of students; the new building was dedicated and blessed on November 20, 1969.

In 1961, Father Hladky celebrated his 25th anniversary to the priesthood and was elevated as dean of the Youngstown Deanery—an honor to the entire parish. On February 28, 1965, the Papal Honor was bestowed to the pastor, now Msgr. Sylvester Hladky. An additional honor was given to Sts. Peter and Paul Parish with Pastor being honored as papal prelate, giving him the title "the Right Reverend" on April 2, 1975.

It is indeed a privilege to extend my sincere congratulations to the parishioners of Sts. Peter and Paul Parish on this the golden jubilee of their church, and to the Right Reverend Monsignor Slyvester Hladky, V.F., on the occasion of his 40th anniversary to the holy priesthood.

Mr. Speaker, I insert the golden jubilee program of Sts. Peter and Paul Church in the RECORD at this time:

PROGRAM

3:45 p.m.: Procession and blessing of stained glass mosaic cross.

4:00 p.m.: Divine liturgy; pontificated by Metropolitan Archbishop Stephen J. Kocisko; concelebrated by pastor, Rt. Rev. Msgr. Sylvester Hladky, past assistants and vocations from parish.

5:45 p.m.: Recession and blessing of historical murals in school corridor.

6:00 p.m.: Audio visual presentation of parish history by children of parish.

Invocation: Rev. Michael Moran.

Master of ceremonies: Rev. Albert Klein.

Greetings from city of Warren: Mayor Arthur Richards.

Remarks: In the name of the parishioners, Dr. George Sudimack; in behalf of the Benedictine Sisters and parish school, Sister Margaret Mary OSB; in behalf of the clergy, Rev. Bruno Asturi.

Introductions: Paul Barran, cantor.

Address: Archbishop Stephen J. Kocisko, D.D.

Acknowledgment: Pastor, Rt. Rev. Msgr. Sylvester Hladky.

Benediction: Rev. Raymond Balta.

May we extend our thanks today to:

The Infant of Prague for all the Blessings showered upon our Parish. Everything we have, we attribute to the Infant Jesus.

All of our friends and benefactors of this parish.

All of the living founders of this parish, and ask that prayers be offered for the departed founders.

The Benedictine Sisters who have complemented the Parish by teaching at our school and molding our children after the heart of Christ.

Our Parochial school teachers and Sunday Religion teachers and the staff who conscientiously work for our school and church.

The parents of our children, past and present, who cooperated with their Church in educating their children in the faith, morals, and rite of their Church.

All of the organizations—Altar and Rosary Society, Ladies Guild, St. Benedict's Auxiliary, 400 Club, Home and School Association.

The Greek Catholic Union who financed our Parish projects.

Our faithful and dedicated Cantor for thirty-five years of service.

All of the parishioners who made this day possible because of their generosity, sincerity, cooperation and love of their Rite and their Church.

Our Metropolitan Archbishop Stephen Kocisko and all of the visiting clergy and past assistants for gracing this occasion today.

EDUCATIONAL ASSISTANCE FOR DISADVANTAGED STUDENTS IN HEALTH FIELDS

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. ROYBAL. Mr. Speaker, Representative CLAUDE PEPPER, Representative ANDREW YOUNG, and myself intend to reintroduce our legislation providing for special health education programs for disadvantaged students on Tuesday, February 7. The purpose of this bill is to increase the number of students entering medical, dental, and health professions from disadvantaged communities.

Our legislation would authorize a research and demonstration program in which secondary students from deprived backgrounds can develop their reading, writing, math, cognitive, and communication skills. In this way, promising youths will be effectively encouraged and assisted in their pursuit of health careers.

This country has an obligation to fully develop our scientific and health resources among our entire population. That obligation must include the active recruitment of all talented and promising individuals. I am confident that the program contained in this legislation will promote the recruitment and training of students who would be most likely to return to their communities to provide health services.

At this point I would like to submit the text of a speech I delivered before the annual meeting of the American Association for the Advancement of Science in Boston, Mass., February 20, 1976. This conference addressed the absence of opportunity for minorities and women to enter the sciences and medical professions. The entire proceedings of the meeting are being published by Plenum Press, New York, N.Y.

My statement to the conference documents the great need for the legislation which my colleagues and myself will introduce next month:

AFFIRMATIVE ACTION: A CONGRESSIONAL PERSPECTIVE

(By Congressman EDWARD R. ROYBAL)

The essence of good government lies in its humanity—in its commitment to help the oppressed and the poor find economic well-being and equality.

Affirmative action is a manifestation of that commitment. Its justification derives from the history of exclusion and discrimination suffered by millions of Americans who have sought, and been denied, equal access to

employment and educational opportunity in this country.

Affirmative action seeks to correct past and present discriminatory patterns, and their effects. The concept dates back to the Wagner Act which forty years ago required "affirmative action" against employers whose anti-union activities violated the law. Title VII of the Civil Rights Act of 1964 has applied this concept to racial, national origin, and sex discrimination in employment.

Executive Order 11246, issued in 1965, barred employment discrimination in the federal government and by federal contractors and subcontractors.

In addition, title VI of the Civil Rights Act prohibited racial and national origin discrimination in the participation and enjoyment of benefits in federally assisted programs. In 1971 the Public Health Service Act barred sex discrimination in admissions to health-related training activities and schools of nursing. In 1972 title IX of the Education Amendments prohibited sex discrimination in most education programs.

EQUAL PROTECTION

The foundation for all of these laws emanates from the spirit and language of the Constitution. The fourteenth amendment, for example, guarantees "equal protection of the laws", and is designed to end the oppression of inequality and class privilege.

Under the aegis of the fourteenth amendment, affirmative action goes far beyond the simple condemnation of discriminatory and unequal policies. It is not enough for our instituitons to advertise as "equal opportunity employers" or promise an end to discrimination in hiring." By themselves these expressions are but paper assurances.

If "equal protection of the law" is to have meaning, it must include affirmative step to revere the status quo—to overcome the exclusion of minorities and women from the full enjoyment of health and medical opportunities.

Affirmative action also calls for a deep and lasting commitment on the part of our educational leaders to provide academic opportunity in all areas. But our institutions have yet to move in that direction. In fact, very little if any civil rights enforcement has been occurring at our campuses.

FEDERAL FINDINGS

1. In a 1975 report, the General Accounting Office (GAO) concluded that the Department of Health, Education, and Welfare "has made minimal progress in making sure that colleges and universities have acceptable affirmative action programs." It cited HEW's failure to send "show cause" notices to noncomplying institutions; failure to conduct pre-award reviews; overly prolonged negotiations; and failure to adequately enforce the program at the Berkeley campus.

2. In 1975, the House Subcommittee on Equal Opportunities held extensive hearings on affirmative action at higher educational institutions. The subcommittee found "no evidence to indicate that academic institutions are so unique as to warrant equal employment regulations different from other Federal contractors and insisted that there be no 'special cases' in the enforcement of the Executive Order." The subcommittee noted also that the enforcement of equal opportunity at institutions of higher education has been ineffective and Federal contract compliance deficient.

3. The U.S. Commission on Civil Rights found, that same year, that "the inadequacy of HEW's enforcement effort . . . permits the continuation of practices which result in the denial of equal education and employment opportunities to women and minorities."

It noted that HEW had failed to carry out "indepth and regular" compliance reviews of higher institutions receiving federal funds. Over a 10-year period, HEW had reviewed less than 30 percent of all campuses covered under title VI. Further, the Commission found that during fiscal year 1974, HEW conducted compliance reviews of only 6 percent of campuses covered under the Executive Order.

Like GAO, the Commission expressed concern over HEW's consistent failure to issue show cause notices to non-complying institutions. For instance, from 1971 through 1974, HEW issued only two articles despite the uncovering of numerous violations.

The Commission was critical of HEW's willingness to accept only the assurances of institutions to develop affirmative action plan, although the standard of compliance has always been the actual existence of the plan. HEW's retreat displayed a kind of convoluted logic involving a plan to have a plan, which was given classic expression in the belabored Berkeley agreement.

4. There has been very little evidence of a federal or institutional commitment to equal opportunity in the health area. Most educational institutions lack any formal and effective mechanism to ensure that federally funded training and research activities on campus actively involve minorities and women.

The National Institutes of Health spend well over $2 billion for health research and training; $123.5 million will go directly for training activities this year alone. Despite this sizeable infusion of federal funds each year, NIH has yet to conduct pre-award checks or to monitor grantee institutions to determine the adequacy of their equal opportunity efforts.

The National Cancer Institute controls 15 percent of NIH's training budget; and yet it conducts no monitoring, only "public relations" which it has assigned to its equal employment office.

The same pattern of indifference exists among other health related agencies. The Office of Human Development spends $22 million a year for the training of 9,000 rehabilitation workers in such areas as mental illness, medicine, nursing, counseling, and speech pathology and audiology. And yet agency officials admit that they conduct no pre-award checks.

ABSENCE OF OPPORTUNITY

What we clearly have is an absence of substantial opportunity for minorities and women to enter the sciences and medical professions.

1. An analysis of data furnished by the National Academy of Sciences shows that minorities are severely under-represented in federally funded graduate training programs. Although minorities comprise nearly 20 percent of the total population they represent only 5 percent of graduate recipients. (Black Americans constitute 2.7 percent; Mexican Americans and Puerto Ricans, 0.8 percent; American Indians, 0.6 percent; and Asian Americans, 0.9 percent.)

Further, the data reveal only a slight increase in science and engineering Ph.d.'s for minority citizens. Over a 40-year period minority representation in this area has moved from an imperceptible 0.6 percent for Blacks and Latinos to a marginal 1.4 percent.

2. Despite the fact that the federal government provides nearly $1 billion in medical financial support, minority enrollment in the health professions remains deficient. For academic year 1974–1975, Black and Latino enrollment in medical schools represented 7.8 percent, with 1.5 percent Latino. Further, Black and Latino first year enrollments showed a decline from 9.5 to 8.8 percent for 1975–1976.

3. And Black and Latino enrollment in public health schools comprised only 7 percent of total enrollment for 1974–75.

4. In the field of physician assistants the level of Black and Latino graduates is expected to decline from 7.3 to 4.6 percent in 1976.

5. In the employment area, we find a similar pattern of under-representation. Equal employment data (1974) for nearly 4,200 employers in the area of health services show that Blacks and Latinos are severely underrepresented in the health professions. Blacks comprise only 4.4 percent and Latinos 1.8 of health professional staff. While their employment picture improves for white-collar and office manager positions, they remain relegated to the lower occupational categories.

Similarly, recent figures on federal employment show that Blacks & Latinos represent only 5.4 percent of the 8,300 medical and dental officers employed governmentwide. Further, Latinos comprise only 1.4 percent of the Health Services staff and less than 1 percent in Health Resources and in Alcohol, Drug Abuse & Mental Health. Further, Latinos represent 0.6 percent in the entire National Institutes of Health.

ACADEMIC STANDARDS

It has been argued that facts and figures do not justify changes in admission standards and the pursuit of academic excellence, that these ideals must be preserved at all cost. But such an argument suffers from some basic flaws.

First, the argument implies that changes in standards are detrimental. This position reflects a status quo mentality—one which lacks critical self-analysis which is a prerequisite of a scientific approach. What are these standards? They are highly subjective impressions that lack validation, and are based on judgments of who shows greatest intellectual or creative promise, or who would be the most effective health practitioner. But the danger is that such standards of merit are likely to reflect the particular biases of the white-dominant educational elite that selects the students and faculty.

The argument also ignores a basic educational ideal to which we have already committed billions of federal dollars—and that is, to fully develop our scientific and health resources among our entire population. That includes the active recruitment of talented and promising minority individuals. If it means the establishment of special recruitment and outreach efforts, or of extended educational and entry programs, then it must be done and can be without jeopardizing standards. For the consequence would be a return to white-only medicine and the inestimable loss of talent, resources and excellence of those with minority backgrounds.

The argument overlooks the recent findings presented in the Journal of the American Medical Association (December 1975). The Journal reports that the retention rate among minority students in medical schools was "at a high level of most groups". For minority students enrolled in Medical Schools in the past three years, the retention rate was 94%.

A 1975 study of Chicago medical students showed that 85 per cent came from the top third of their high school classes, which compared favorably with figures on non-minority students.

The point that needs to be hammered over and over again is: How can we continue to justify such a tremendous loss of talent and potential by ignoring the 20 percent minority and 50 percent female population in this country? How can we continue to deny equal access and opportunity to a large segment of our taxpaying population who support the administrators, the researchers, the health practitioners and teaching professions at our educational and medical institutions?

FINANCIAL AID

The fact is that minority students are doubly faced with the economics of obtaining an education, especially in the medical professions. Minority families do not have the financial resources to help cover tuition

and other related expenses. The data shows that these families represented only 3.5 percent of the total reported family contributions to student assistance during 1973–74.

In a study of midwestern colleges, one researcher found that 80 percent of minority students needed financial support; and that over three times as many minority freshmen, as compared to other freshmen, needed full financial assistance.

A recent sampling of Los Angeles city high school graduates revealed that only 60 percent of low-income area students who were eligible to enroll at the University of California or similar institutions were able to do so; 27 percent went to work. By contrast, 80 percent of eligible students from high-income areas entered four year colleges; only 9 percent went to work.

It is very likely that this negative economic pattern will continue, especially during periods of high unemployment which have a disproportionate effect on minority families.

As devastating as this situation may be, President Ford proposes to add insult to injury by cutting student assistance in the health professions by 50 percent. The President's budget would—

Abolish supplemental opportunity grants and direct loans for students;

Reduce work-study funds by 50 percent while raising the institutional matching share from 20 to 50 percent; and

Cut back on special programs for the disadvantaged and eliminate university community services.

In addition, the President's budget seeks a 37 percent reduction in health services to our communities. In line for cuts are programs for maternal and child health, emergency medical services and community health centers.

The executive budget calls for a 36 percent slash for community mental health and alcoholism services, and completely eliminates health grants to the state.

If implemented, these proposals will cause a drastic retreat in student assistance and health services for the disadvantaged. They spell disaster for those students and families already crippled by lack of economic and health resources. As long as health and other living expenses skyrocket, and student financial assistance dwindles, the level of minority enrollment and graduation, particularly in the health professions, will decline.

RECOMMENDATIONS

This is, indeed, a pessimistic reflection on the current state of affirmative action and equal opoprtunity in this country. It is for this reason that our colleges and universities must be firmly committed to actively involve minorities and women at all institutional levels, including the positions of leadership and decision-making.

I recommend that educational and health institutions be willing to—

Conduct a self-analysis of the minority and female composition of the student body, faculty, and administration, to identify areas of deficiency and their causes;

Evaluate admission standards and employment prerequisites such as degree attainment, publication achievements and tenure;

Develop goals and timetables for overcoming under-representation;

Develop a plan of affirmative action in the area of educational services, financial assistance, and research and training opportunities;

Provide for the involvement of minorities and women in the development and assessment of all affirmative goals and studies;

In the case of publicly supported systems of higher education, develop a statewide plan of educational opportunity for all students;

Develop year-long cooperative educational programs with local school districts to encourage and train minorities and females to enter the health and scientific fields;

Develop close working arrangements with community organizations in fostering recruitment and outreach programs for disadvantaged students; and

Require an annual self-evaluation to determine areas of success and failure in meeting affirmative action and equal opportunity objectives.

It is clear that these recommendations, if fully realized, would cause changes in institutional leadership and decision-making. This is, to a great extent, the reason for current reluctance and resistance to affirmative action. And yet the pursuit of excellence requires us to bring new perspectives and ideas into our institutions of higher education. The pursuit of excellence demands that we actively recruit and seek out new talent and creative minds from the untapped and disadvantaged communities of this nation. This is the significance and necessity of affirmative action.

HOUSE OF REPRESENTATIVES—*Thursday, January 13, 1977*

The House met at 11 o'clock a.m.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

God is spirit, and they that worship Him must worship Him in spirit and in truth.—John 4: 24.

"God of the strong, God of the weak,
Lord of all lands and our own land,
Light of all souls: from Thee we seek
Light from Thy light, strength from Thy hand."

Renew in us the spirit that makes us fit to live with ourselves, ready to live with those we love, and willing to live graciously with those about us.

Make us equal to our tasks, just in our exercise of power, generous in our ministry to the needy, and good in our relationship with all people.

Guide the Members of this House of Representatives with Thy wisdom this day and all days; through Jesus Christ our Lord. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Marks, one of his secretaries.

STATEHOOD FOR EXXON

(Mr. WEAVER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEAVER. Mr. Speaker, some have suggested rather than Puerto Rico, that Exxon be granted statehood. If it were a State at least the American people would have something to say about the election of its officers and its policies that so deeply affect the lives of all of us. As I oppose nationalization, this idea may have some merit.

Then there are those who feel it and other giant corporations should have full sovereignty. They resemble foreign nations in almost all things except full control of a specific landmass.

If Exxon were a foreign nation we could at least have treaties of alliance with it, and so protect it from other foreign nations, such as Saudi Arabia, which is now invading its corporate boundaries by ordering it to set prices to other foreign countries, including the United States. We cannot allow Exxon to be pushed around. Are we faced with another Munich?

CUT REDTAPE AND PAPERWORK

(Mr. STEED asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEED. Mr. Speaker, as I mentioned in my first in a series of short speeches, on reducing Federal paperwork, I shall be discussing specific paperwork problems and how the Commission on Federal Paperwork is working to solve them.

However, I should first like to discuss how the Congress can and must cooperate if we are to significantly reduce the paperwork burdens now being borne by the American people.

Congress, over the years, has become increasingly aware of the need for paperwork reductions on a significant scale. This awareness for reform has increased as the blizzard of Government forms and reports has intensified.

In 1934, Congress created the National Archives. However, its job was mainly concerned with storage and disposal of paperwork. In 1942 Congress passed the Federal Reports Act. This was an attempt to coordinate Federal statistical reporting and programs. The Bureau of the Budget was given clearance authority over Government reports. In 1950 Congress passed the Federal Records Act, which created the National Archives and Records Service—a service which became the initiator of improvements in records management.

On the face of it, this seems to be an adequate effort to manage and control paperwork proliferation. However, the Records Act did not control proliferation. From 1950 to 1968 the amount of paperwork grew from 3 to 4.5 million cubic feet a year. By 1972, files contained nearly 7 million cubic feet of new records. The Second Hoover Commission tried in 1952 to identify and make recommendations to solve paperwork problems. Since that time, Federal paperwork has more than doubled. In 1973 Congress brought the General Accounting Office into the paperwork management act. Unfortu-

nately, the problem continues to get worse instead of better.

In 1974 Congress established the Commission on Federal Paperwork, a special body whose mandate was to identify and rectify specific paperwork proliferation problems, plus design improved paperwork management systems. However, in order to achieve any lasting reduction in the rate of paperwork growth, the Congress must become not only an active partner in legislating reforms in the executive, but must also become an active partner in reducing paperwork created by the Congress itself.

Pension reform legislation—ERISA—is a good example of how Congress, guided by the highest motives, has created a paperwork jungle which has actually stifled the growth of new pension programs, and been the direct cause of the death of many others.

The Commission on Federal Paperwork has studied this program and made significant paperwork reduction recommendations. I shall treat of that effort in separate remarks. However, I do want to use that program to make my point—and that point is the Congress is at the source of a great deal of the needless paperwork proliferation we are fighting today.

The Congress, throughout the entire legislative process, from introduction of a bill, through hearings, through markup, through debate and through conference, must continually be aware of what magnitude of paperwork might be created by proposals and amendments under consideration.

A number of colleagues and myself are preparing legislation which will require that a paperwork impact statement accompany each proposal and amendment as they go into report format. It is my understanding that a companion bill will also be introduced. At the appropriate time, I shall alert the membership for purposes of cosponsorship.

I do not submit to my colleagues that inclusion of an impact statement will solve all our problems. I realize there will be some initial problems in determining what the costs and burdens of certain programs and paperwork requirements will be. However, we must make a start—a start in reducing paperwork proliferation stemming from congressional inadvertence—a start in increasing our "paperwork awareness" both as an institution and as individual lawmakers.

Congress, as a significant part of the paperwork proliferation problem, must increasingly become a great part of the solution.

DEFENSE PRODUCTION ACT AMENDMENT

(Mr. MOORHEAD of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I am today introducing legislation to amend the Defense Production Act of 1950 to include synthetic fuels which may be used as fuels under title III of that act. This bill also does something very important in addition. It gives all U.S. industries, large or small, the confidence—security if you will—they need to invest the vast amounts of money required to produce and develop synthetic fuels.

Each year across this country, the shortage of natural gas worsens. In 1974, our shortfall in supply was 14 percent. In 1975, it rose to 18 percent. This year it was predicted to rise to 22 percent. In the past, we have been able to shield ourselves from the impact of this annual shortfall because we have had the good fortune of mild winter seasons. It now appears that if our shield has not been penetrated, it is being sorely tested. News accounts in recent days warn of potential severe curtailment of gas for several Midwestern State areas, and the forecast of more frigid weather the remaining winter months is undiminished and unlike oil, we cannot erase the shortfall by increasing our imports.

Mr. Speaker, we need, and need desperately, a good synthetic fuels program. We need some kind of synthetic fuels made from nonpetroleum feedstocks. We have the technology and know-how to produce such fuel. We should be well on the way toward establishment of such a capability, and yet, we are not moving in that direction.

Why is this so? Simply stated, what is lacking is some assurance the synthetic fuels industry would not go under if import prices were to drop. Time and again, companies with strong interest in this energy field have indicated their willingness to take reasonable risks, but so much investment is required their entire future might be jeopardized if the Nation does not stand behind them.

Mr. Speaker, this amendment to the Defense Production Act would establish a type of insurance program for synthetic fuels. It would be called into force only if prices were to drop below current import quotations. It would, nevertheless, assure the producer, and the users, of a dependable, uninterruptible source of energy.

Mr. Speaker, let us consider what events might have been had we the capacity to turn to a synfuels plant production system today. Such a system could effectively service a large portion of our industrial natural gas users. I am talking about companies producing steel, chemicals, glass, and the like. Many of them are labor-intensive. They face the prospect of curtailment of supply on an almost day-to-day basis. The prospect of interruption makes it difficult to plan for increasing plant capacity. A synthetic fuels system could eliminate that frustration and replace it with confident expectations of energy supply. But beyond meeting industrial user needs, this same synthetic fuels system would permit natural gas to be diverted for increased use in the home; homes, incidentally, not scheduled to be built this year, or next year, unless adequate new supplies of natural gas are developed.

Mr. Speaker, I am hopeful the legislation I have introduced today will increase the awareness of the Members of Congress concerning our national need for adequate and sustaining sources of synthetic fuels. A severe natural gas shortage will continue to plague our industries and threaten our commerce until effective substitute fuels are developed.

Mr. Speaker, these are problems we can overcome, but to do so, we must be persistent in our efforts. Unless we are, we will only continue to further spill our demand for energy into an already overtaxed petroleum market. Until we do, we will continue to rely more and more upon imports.

The text of the bill follows:

H.R. 1880

A bill to amend the Defense Production Act of 1950 to include synthetic fuels which may be used as fuels under title III.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title III of the Defense Production Act of 1950 (50 U.S.C. App. 2060 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 305. (a) To assist in carrying out the objectives of this Act, the President, upon the recommendation of the Secretary of Commerce, may make provision (1) for purchases of or commitments to purchase synthetic fuels which may be used as fuels for Government use or resale; and (2) for the encouragement of development and production of such fuels. For purposes of this section synthetic fuels shall mean fuel produced by the conversion of renewable and nonrenewable resources, including, but not limited to, products produced from coal gasification, coal liquefaction, shale, lignite and other mineral gasification, liquefaction or other conversion, and the conversion of any organic material into fuel.

"(b) Purchases and commitments to purchase and sales under subsection (a) may be made without regard to the limitations of existing law, for such quantities, and on such terms and conditions, including advance payments, and for such periods, but not extending beyond June 30, 1990, as the President deems necessary, except that purchases or commitments to purchase involving higher than established ceiling prices (or if there be no established ceiling prices, currently prevailing market prices) or anticipated loss on resale shall not be made unless it is determined that supply of the products could not be effectively increased at lower prices or on terms more favorable to the Government, or that such purchases are necessary to assure the availability to the United States of overseas supplies.

"(c) If the President finds—

"(1) that under generally fair and equitable ceiling prices for any raw or nonprocessed material, there will result a decrease in supplies from high-cost sources of such product, and that the continuation of such supplies is necessary to carry out the objectives of the Act; or

"(2) that an increase in cost of transportation is temporary in character and threatens to impair maximum production or supply in any area at stable prices of any products;

he may make provision for subsidy payments on any such domestically produced product in such amounts and in such manner (including purchases of such material and its resale at a loss without regard to the limitations of existing law), and on such terms and conditions, as he determines to be necessary to insure that supplies from such high-cost sources are continued, or that maximum production or supply in such area at stable prices of such products is maintained as the case may be.

"(d) The procurement power granted to

the President by this section shall include the power to transport and store and have processed and refined any products procured under this section.

"(e) When in his judgment it will aid the national defense, the President is authorized to install additional equipment, facilities, processes, or improvements to plants, factories, and other industrial facilities owned by the United States Government, and to install Government-owned equipment in plants, factories, and other industrial facilities owned by private persons.

"(f)(1) Notwithstanding any other provision of law to the contrary, products acquired pursuant to the provisions of this section which, in the judgment of the President, are excess to the needs of programs under this Act, shall be transferred to the national stockpile established pursuant to the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98–98h), when the President deems such action to be in the public interest.

"(2) Transfers made pursuant to this subsection shall be made without charge against or reimbursement from funds available under the Strategic and Critical Materials Stock Piling Act, except that costs incident to such transfer other than acquisition costs shall be paid or reimbursed from such funds, and the acquisition costs of such metals, minerals, and materials transferred shall be deemed to be net losses incurred by the transferring agency and the notes payable issued to the Secretary of the Treasury representing the amounts thereof shall be canceled. Upon the cancellation of any such notes the aggregate amount of borrowing which may be outstanding at any one time under section 304(b) of this Act, as amended, shall be reduced in an amount equal to the amount of any notes so canceled.

"(g) Except with the approval of the Congress, the total obligation of all agencies under contracts, discounts, advances, or commitments in connection therewith, entered into under this section shall not exceed $2,000,000,000.".

SEC. 2. (a) Section 304(a) of the Defense Production Act of 1950 is amended by striking out "and 303" and inserting in lieu thereof ", 303, and 305".

(b) Section 304(c) of the Defense Production Act of 1950 is amended by striking out "and 303" and inserting in lieu thereof ", 303, and 305".

SPEECH ON HUMAN RIGHTS BY JIMMY CARTER, UNIVERSITY OF NOTRE DAME, OCTOBER 10, 1976

(Mr. BRADEMAS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. BRADEMAS. Mr. Speaker, one of the most significant speeches delivered during the 1976 campaign for the Presidency of the United States was that of Gov. Jimmy Carter on October 10, 1976, at the Center for Civil Rights and the Law School of the University of Notre Dame.

On this occasion, for which I was privileged to be present as it was in the congressional district I have the honor to represent, Governor Carter spoke eloquently of the need to consider human rights not only in our own country but in the conduct of our foreign policy.

Of course, Mr. Speaker, what Governor Carter had to say during the campaign takes on greater importance as he is next week to become the 39th President of the United States.

Because Governor Carter did not speak from a prepared text, I ask unanimous consent to insert in the RECORD the transcript of his remarks of October 10, 1976, and I also include the introduction of Jimmy Carter by the distinguished president of the University of Notre Dame, the Reverend Theodore M. Hesburgh, C.S.C.

The text to which I refer follows:

SPEECH ON HUMAN RIGHTS BY JIMMY CARTER, WITH INTRODUCTION BY REV. THEODORE M. HESBURGH, C.S.C., OCTOBER 10, 1976

(Sponsored by the Center for Civil Rights and the Law School of the University of Notre Dame, Center for Continuing Education University of Notre Dame, Notre Dame, Ind.)

INTRODUCTION OF JIMMY CARTER

(By Rev. Theodore M. Hesburgh, C.S.C.)

Ladies and gentlemen, I would first of all like to welcome Governor Carter to this University. As all of you know, each time that we have a presidential election, I invite the two presidential and vice-presidential candidates to come to the University, hopefully to tell us something of where they stand on some moral issue of their choice. We had Senator Mondale earlier who spoke about the plight of human rights in international affairs, and today we are happy to have Governor Carter. I'm sure he will say something—this being Sunday morning—of his own moral concern, and I welcome him to do that on your behalf and on mine, too.

I've already told Governor Carter this, that once the emotion of the campaign is over, I'm going to ask Dean David T. Link of the Law School to plan a national conference on abortion, bringing in people who want to discuss that subject fully and completely. I think that in the kind of rational and civil atmosphere that the University represents, we can bring some wisdom to bear upon this problem and improve it from what it is today to what it might be in America.

Both candidates say that this campaign offers a choice on real issues as never before in this century. However, most campaign rhetoric tends to be negative and does not always get to the heart of the problem. No one likes to look at the heart of darkness. The real solutions are painful and even speaking about them is not the best way to make friends and win votes. But the issues do remain.

I think today, ladies and gentlemen, the domestic problems of four years ago are still with us. There are some more international problems with us as well. All of these domestic problems in a very real sense are interlocking, part of the total organic structure and reality of what we call the quality of American life, or the lack of it. To the extent that they are unresolved and continue to exacerbate millions of Americans daily and mar their lives, America lives in contradiction of its highest expressed ideals of liberty and justice for all. I think today, four years later, these problems are not just still with us, many of them are much worse.

I am happy today that one of the candidates for President of the United States, perhaps the most awesome and powerful office in all the world, wants to speak to us about his concern in this particular area. I can promise you, Governor, that here you will have an audience who will listen and listen very hard. We are delighted to have you with us.

HUMAN RIGHTS

(By Jimmy Carter)

First of all, I want to say how proud I am to be at Notre Dame, particularly because of what this University has always been, what it's meant to the consciousness of our country—its constant probing for a better means to tap the innate goodness of America, especially as it has been personified in the last 25 years by the great leadership of Father Ted Hesburgh. He is a man who has been an inspiration to many of us. Those of us who lived in the South during the early part of the civil rights struggle that is still going on have a great admiration for him. I know about his concern for the less fortunate, the weaker, for those who are the underdogs, and I hope he will carry this same concern into the Notre Dame-Georgia Tech football game that is going to take place next week.

Our country has come a long way in the last 200 years. We are still a young country, and a lot of us look back on the history of our nation with a great deal of appreciation for the wisdom and the deep commitment of our founding fathers. We tend to think that George Washington, Thomas Jefferson, Benjamin Franklin, and John Adams were all perfect. The concept we have of our country is one that is without blemish, with a deep commitment and, perhaps for the first time, a real concern about human rights, liberty, and freedom on the one hand and equality of opportunity on the other.

Liberty and equality

Down through the ages, though, those two have quite often been incompatible. When you had complete liberty, the strong overpowered the weak. When you guaranteed equality, the government had to take away the freedom that accrues in a competitive society. We laid the groundwork, but our country was not perfect. It was founded on the concept of slavery for black people, and it was 100 years before we cast off that milestone around our neck. Women didn't have the right to vote, young people didn't have the right to vote, and the people didn't have a chance to choose their own United States Senators directly.

But down through the years we have tried to change to make this a better society for our sons. We have had times of success and times of failure, times of legitimate pride and times of legitimate embarrassment and shame. In the last few years we have suffered as a country, and I think all of us realize that the question of supporting human rights throughout the world is a very difficult one. It requires a balancing of tough realism on the one hand and idealism on the other, of our understanding of the world as it is and the world as it ought to be.

The question, I think, is whether in recent years we haven't been too pragmatic, too cynical, and as a consequence have ignored those moral values that have always distinguished the United States of America from other countries. Over the years our greatest source of strength has come from our basic, priceless values which are embodied in our Declaration of Independence, the Constitution of the United States, our Bill of Rights, and which involve freedom of religion, freedom of speech, freedom of expression, movement, and an unchanging commitment to basic human dignity.

Living up to our ideals

Recently, however, we have not lived up to our ideals. I know of no great nation in history that has more often conducted itself in a moral, unselfish, generous manner abroad, and provided more freedom and opportunity to its own citizens at home. Still, in recent years, we have had reason to be troubled. We stumbled into the quagmires of Vietnam, Cambodia, Chile, and Cyprus, and we responded inadequately to the human suffering that we recognized in places like Bangladesh, areas of Northern Africa, and in other underdeveloped, struggling, and sometimes starving nations. We have allowed virtually unlimited sales of American weapons overseas. As I said in the debate the other night, we have become the arms merchant of the world.

This is a policy that is both cynical and dangerous. We have in effect condoned the efforts of some Arab countries to circumvent the commitment of our Bill of Rights and boycott American businesses who trade with

Israel or who have Jewish owners or managers within the businesses themselves. This is an unprecedented thing that we have accepted. We have failed to oppose the denial of human freedom in Eastern Europe and in the Soviet Union. Now I don't say that these things are simple issues, but there are practical and effective ways in which our own power can be used to alleviate human suffering around the world. We should begin by letting it be known that if any nation, whatever its political system, deprives its people of basic human rights, that fact will help to shape our own people's attitudes toward that country. If other nations want our friendship and support, they must understand that we want to see basic human rights respected.

We must, at the same time, be realistic. As John Kennedy said, and I quote, "We must keep the world safe for diversity." We should not insist on identical governments in all nations of the world who accept our standards exactly, but we cannot look away when a government tortures its own people or jails them for their beliefs, or denies minorities fair treatment or the right to immigrate or the right to worship.

Father Hesburgh served, as you know, on the Commission on Civil Rights at the time when the South was struggling to grant equality of opportunity, the right to vote, the right to hold a job, and the right to buy homes, to black people.

As I said recently in Salt Lake City and as I have said many times in Alabama, Mississippi, Louisiana, the Carolinas, Tennessee, Florida, and Georgia, the best things that ever happened to the South in my lifetime were the passage of the Civil Rights Acts and the guarantee to black people of the chance for equality. We still have a long way to go in our own country, but we are making progress, and now I think it's time for us to reassert those basic commitments at home and also to let them be an undeviating guiding light for us abroad.

The world looks for leadership

The world looks for leadership, and when there is a vacuum of leadership it's going to be filled somehow. I'm a nuclear engineer, a physicist, and also a politician, and the vacuum is going to be filled. It's going to be filled either with freedom or slavery, with hope or with despair, with democracy and liberty or with dictatorships. I would like to see the world's vacuum filled without domination but with inspiration by my own country. We must reassess our own foreign aid program to make sure that when money does leave our nation it goes to those who need it most. As Richard Gardner, one of the great analysts of the United Nations, said, "I'm not in favor of taxing the poor people in a rich country and continuing to send the money to the rich people in the poor country." But there are many needs that can be met with sound management and with an undeviating commitment to alleviating suffering. Not only food, but the quality of our environment and the health of people around the world can be aided to a substantial degree by leadership and direct aid from our own country. We now spend three tenths of one percent of our gross national product on foreign aid. Other countries spend much more—5 or 7 tenths of one percent. The Soviet Union spends only 1 tenth of one percent. So all the nations in the multinational commitment, if provided proper leadership, could be successful in alleviating a great deal of the suffering and deprivation that exists. We ought to speak out forcefully whenever there is human torture in the world. And I believe that this would restore not only the faith of our own people in our own government but also help to alleviate that torture, even in the most totalitarian nations of all.

We should insist on majority rule

We should insist on the concept of majority rule. In Africa we have come in late. For a long time we were committed under National Security Memorandum No. 39 to supporting minority white governments. Only during this election year has our nation moved in any degree toward supporting the long-standing effort to guarantee majority rule in Africa, and there are many other places of deprivation in the world which haven't yet experienced the concept of majority rule.

Cyprus is another situation that we need to address in a humanitarian way and with a well-balanced commitment to the preservation of peace, which would help stamp out religious persecution. While many people understand this, there are still Jews who want to leave the Soviet Union, and there are 5 million Baptists in the Soviet Union who have felt oppression because of their religious commitments.

We ought to stand staunchly against the deliberate violation of law. In the last few years we have seen the disgraceful spectacle of our own government condoning—sometimes even encouraging—multinational corporations engaging in bribery of foreign officials. This is a disgrace to our country that should not be permitted to continue.

The United Nations passed a Genocide Convention 25 years ago; we still have not ratified that convention. It also passed a basic convention on the protection of human rights—civil rights; we still have not ratified that convention. And we ought to move the best we can to stamp out international terrorism as well. There are many things that we can do, and I suggest that this Center here, as it shifts its goals from strictly domestic civil rights—which are still very important—to a broader concept of all human rights—and I hope this will be done expeditiously and I will help you if I am elected President—can be a beacon to our own country and to the world for a constant assessment of what can be done in a world that we acknowledge to be imperfect.

A new era of voluntarism

There is one other area that I would like to mention this morning. We can tap the great resources of our country in the defense of human rights, yes. But that's only one aspect of an area where voluntarism can come in. I would just like to take a few minutes to talk to you about that subject. It's a subject I think that has always been of particular interest to young people whose idealism has not been dampened by long years of frustration. If I am elected President, I hope to bring a new spirit of optimism, patriotism, and self-sacrifice to America. That happened in 1933 when Franklin Roosevelt became President, and it happened again in 1961 under John Kennedy. I believe it can happen again under a Carter administration, if we can succeed in restoring public trust in our own government.

I hope that one manifestation of this renewed national spirit would be a new era of voluntarism with Americans working to help others on an unprecedented scale. We saw an example of this when John Kennedy began the Peace Corps. We all remember the excitement of that era. My mother, at the age of 68, joined the Peace Corps and went to India to serve for two years, coming back after she was 70 years old. I know what it meant to our community and our family and to her life just to feel that she was doing something worthwhile, even at that advanced age. I would like to see that concept revitalized along whatever grounds are most pertinent and appropriate in today's international realities.

But even more importantly, I would like to see an outpouring of volunteer effort within our own country. We all know that there are needs, very deep needs. I worshipped this morning at the Retardation Center at the edge of your campus.

I noted that many students from Notre Dame participate in that volunter effort to take care of retarded children who are severely afflicted. And there is an outpouring that needs to be made too in schools, particularly our poor schools, in hospitals of all kinds, in day care centers, in mental institutions and prisons and law enforcement agencies, in parole and probation efforts, on Indian reservations, in local, state, and federal government agencies, and in many other places.

The potential volunteers are there

The potential volunteers are there, too. People of all ages. Students, housewives, business people, retired people, and many others. What has been lacking in the past is motivation. It is not enough for a President to call for voluntarism, he must create a climate in which our people want to help others and are proud to help their country in the process. We don't need a new federal bureaucracy to do this. We must use the structure of existing agencies and we will also stress the support of existing private, volunteer programs. What is needed is Presidential leadership that will encourage and honor volunteer service. I think that retired people and young people in particular are a vast untapped resource. We now spend countless hours in idleness and on personal diversion of many kinds. I would like to see us divert some of our time and some of our energy to helping others. I believe that Americans will do this gladly if volunteer work is given proper respect and proper recognition.

There is much that needs to be done in our society. More than government itself can ever hope to accomplish. But there is little that cannot be done if the American people roll up their sleeves and set out to do these things. If I become President, I will make every effort to channel the idealism, the compassion, and the energies of our people into good works of which we can all be proud.

Father Hesburgh: America, once again a beacon light of hope for all humankind

We Americans pride ourselves on self-reliance. We pride ourselves on the adherence to unchanging principles. We pride ourselves on the ability to achieve unity within a concept of diversity. America is not a melting pot. We don't come here and lose our identity as we live among one another. It's more like a beautiful mosaic where every person is an individual and where we can harness the common efforts of those who have the inspiration and through this mechanism make our lives more meaningful. We must tap this tremendous strength in the two areas that I have covered briefly with you today: First, we must renew our commitment to civil rights-human rights domestic and around the world, so that our country may once again, as Father Hesburgh said at lunchtime, be a beacon light of hope for all human kind. And, secondly, we must tap the tremendous resources of the 250 million Americans who don't serve in government, who may not even get paid but who will make our own lives more meaningful in the service of others. That's a tremendous resource of strength waiting to be used.

Again, I want to thank you for letting me come to Notre Dame. This campaign has been a very good educational process for me. It has been going on now for 21 months and I've received an excellent education. I've made mistakes and I've learned how to correct them. But the constant inspiration to me has been the quiet strength of the American people who don't want anything selfish out of government, but just want to be treated fairly, who want to be legitimately proud once again of the greatest nation on earth, and who want to be part of the process of making the world a better place in which to live, particularly for those who have been deprived, who have been cheated, who have been forgotten, and who have been deeply hurt. A sense of brotherhood, a sense of sisterhood is there in the hearts and minds of the American people. I want to make sure that our government itself and

our nation as a whole tap that sense that exists in the minds and hearts of so many American people. Thank you very much.

RULES GOVERNING GALLERY SEATING SHOULD BE FOLLOWED

(Mr. O'BRIEN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and to include extraneous matter.)

Mr. O'BRIEN. Mr. Speaker, on the heels of a fading administration's "Vale's" and on the threshold new administration's "Ave's I would like to direct the attention of the Members to some of the procedures which surrounded last night's rather touching, emotional event, the farewell state of the Union speech by the President.

Another Member and I with our wives and other members of our families came to the floor, well aware that the rules would permit only one ticket per Member, entitling each of us to one seat for a gust in the gallery overlooking the ceremony. The House was packed with non-Members, most of whom I had never seen before. I yielded my seat to a member of the diplomatic corps because I felt obliged to do so since they were guests of the House Members, and were also being crowded out.

Before the new President comes in, I suggest that the one who was responsible for that alien fire drill be dressed down, that the usual rules be followed, or that exceptions thereto be carefully reviewed and made known to all Members, not to just a few, before put into effect.

COMPREHENSIVE HEALTH CARE INSURANCE ACT

(Mr. CARTER asked and was given permission to address the House for 1 minute to revise and extend his remarks and include extraneous matter.)

Mr. CARTER. Mr. Speaker, I am introducing today the Comprehensive Health Care Insurance Act—a proposal to extend health care insurance to all Americans.

As a member of the House Subcommittee on Health and Environment for 12 years, I have devoted much of my legislative effort to issues concerning our country's health care system. And as a physician, I have made a personal commitment to do what I can to help improve the health care of our people.

While we can be proud of the outstanding technological advances and high quality of American medicine, we also know that not every American now has access to that system of care. Moreover, the onset of major illness or accident can bring the threat of financial disaster to virtually any family. These are very real concerns which merit our careful consideration.

As a cosponsor of the Comprehensive Health Care Insurance Act of 1977, I believe this measure offers a workable approach to addressing these problems. In large measure, this proposal retains the expertise and experience of our existing private health care sector in both the administration and financing of the program. It is these proven skills and resources of the private sector which I believe we should build upon in developing a national health insurance program, and which should be supplemented only when necessary by Government.

This proposal embodies certain fundamental principles which I believe should govern our approach in the development of national health financing legislation. These principles, which I have supported in the past and will continue to promote in the future include:

First, the belief that every American should have an opportunity to obtain health care regardless of ability to pay;

Second, the belief that any reform of our present health system should be built on the strength and diversity of our existing pluralistic system;

Third, provision for comprehensive and uniform benefits;

Fourth, provision for a preventive approach to health care; and

Fifth, provisions or incentives to control costs and encourage more efficient use of our health resources.

I believe these principles are essential to the development and effective operation of a national health insurance plan, and I hope we will give them careful consideration when we examine various NHI proposals.

The Comprehensive Health Care Insurance Act would provide coverage to the great bulk of the American population through employer-employee financial arrangements by which not less than 65 percent of the premium would be paid by the employer. For any employers experiencing substantial increases in payroll cost as a result of offering qualified health care insurance to their employees, provision is made in the bill for a 5-year subsidy to these groups.

For those who are self-employed or unemployed, health insurance would be provided through an income tax credit or Federal certificate-of-entitlement system. Thus, this plan would correct one of the major weaknesses of our present system by removing financial barriers that in the past have denied some Americans access to high quality care.

Under this NHI proposal, with general revenues, the Federal Government would purchase care for the poor and unemployed who would receive the same benefit package as everyone else. While participation for employers would be mandatory, the system would remain essentially private. The employee is not required to accept his employer's insurance plan. He retains the right to choose the type of health insurance he believes best.

Now, let us take a look at the benefits of this proposed program:

First, the plan provides catastrophic protection for the entire population. It would remove—once and for all—that gnawing fear of bankrupting illness.

Second, it provides, during any 12-month period, for the following:

A total of 365 days of hospital inpatient care; 100 days of inpatient care in a skilled nursing facility; emergency or outpatient services customarily provided by a hospital; all medical care—diagnostic, therapeutic, or preventive—regardless of where such services are rendered.

Also, full dental care for children and emergency dental care for everyone; home health benefits; and many other services, including psychiatric treatment, well-baby care, X-ray and lab tests, and family planning.

The cost control mechanism of "coinsurance"—except for the poor—is incorporated into this plan. There is incontestable evidence that any health care system without some regulatory control is soon bogged down by the "worried well."

But the coinsurance factor will deprive no one needed care. The absolute maximum that any individual would have to pay would be $1,500; the absolute maximum for any family would be $2,000 in any given year.

Mr. Speaker, for any national health insurance plan to be viable. I am convinced we must depend heavily on the private sector for its financing, administration, and expertise. In particular, it is the pluralism of our private sector which has fostered the creativity and initiative characteristic of, and essential to, our free enterprise system. I believe that principle of pluralism must be maintained.

The Federal Government should limit itself to the purchase of health care for only those who need assistance, as the bill defines. We cannot afford to squander our National Treasury and taxpayers' dollars on those who can afford to purchase their own care. I support this approach of limited Federal financing because I feel we must not let the funding of a national health insurance program jeopardize our financial ability to deal with other urgent problems. We need to be prudent and fiscally responsible in whatever action we may take.

With that preamble, Mr. Speaker, I will now summarize the National Health Care Insurance Act of 1977:

SUMMARY OF COMPREHENSIVE HEALTH INSURANCE ACT OF 1977

FULL HEALTH CARE FOR ALL

The basic concept of this proposal is full health care for all persons through private health insurance. For many who are now employed and have some insurance protection, it will mean a substantial increase in allowable benefits that will assure that their health care needs will be met. Equally comprehensive benefits will be available to the poor and the indigent, through federal participation in the cost of insurance. A special program of supplemental insurance will provide like protection for the Medicare population.

EMPLOYER AND EMPLOYEE COVERAGE

Most persons will receive their health care protection under employer insurance programs fully financed by premium paid by employers and their employees. Employers will be required to offer the coverage, and participation will be optional for the employee. 65% of the premium will be payable by the employer (who could, if individually agreed upon, pay more than 65%) for the benefit of the employee (and family); the employee will pay the balance.

Individuals regularly working at least 20 hours per week, as well as full-time employees, will be entitled to this coverage.

For those employers, particularly any small employers, who will incur a substantial increase in payroll costs as a result of the new requirement to provide insurance for employees, federal assistance, over a period of 5 years, will largely alleviate the added

burden. Moreover, a government study ordered by the bill wil determine any need for continuing assistance.

SELF-EMPLOYED, NON-EMPLOYED, AND THE ELDERLY

Needs of the poor and the medically indigent will be met through a system of insurance premium subsidies providing either credits against income tax, or "certificates of entitlement" acceptable by carriers toward payment of premium. Such subsidies will be scaled according to income, and will pay all of the premium for some and a part of the premium for others.

A non-employed person or a self-employed person would buy health care insurance which is "qualified", that is, meets federally established standards and conditions of coverage affording a person (and family) full care—diagnostic, therapeutic, and preventive, in and out of the hospital. A person could choose to pay the premium, in which case, when computing income tax return at year-end, the individual would simply reduce the amount of income tax by the amount of credit to which the person is entitled. On the other hand, a person might choose, instead, to make an application for a certificate of entitlement. An individual's insurance company could provide assistance (if so desired), and even put the insurance in force pending receipt of the certificate (with the government guaranteeing payment of the premium during the interval between application and receipt of the certificate).

The amount of the federal contribution will be based on individual or family income, measured by income tax liability for the year preceding the year for which the purchase is made. A table incorporated in the bill will show for each level of income tax liability (in $10 intervals) the percentage of the insurance premiums which the government will contribute. Low income individuals and families having no income tax liability will be entitled to income tax credit (or a certificate) for the full amount of the premium; for other eligible persons, the entitlement will change gradually (within a range of 99% to 10% of the premium).

Since Medicare benefits fall short of the standard benefits provided in "qualified" insurance, special provision is made to offer "supplemental" insurance for the elderly. This will make available to them the full range of benefits provided for the under-65 population. The supplemental insurance premium will be supported by the federal government, in full for the aged poor, in part for the others, according to income.

CONTINUITY OF INSURANCE FOR THE UNEMPLOYED

Persons between jobs will be covered under a special program. All employer-sponsored insurance will provide coverage of employees and their families for 30 days following termination of employment. In addition, however, an individual will, during the period for which a person is entitled to unemployment compensation, be eligible for continuation of the same insurance held at the time of termination of employment, and such continuing insurance will be fully paid for by the federal government.

BENEFITS

Health benefits under the program are comprehensive and afford the basic needs as well as the catastrophic expenses that a family might encounter. Any person covered under the program will be entitled to all the hospital inpatient care a person might need, as many as 100 days of inpatient care in a skilled nursing facility, and all home health services. Each member of the family will also be entitled to full physician services, providing all surgical needs as well as general care, and a full range of preventive services, including physical examinations, immunizations and inoculations, and outpatient psychiatric care. Children under 7 will be fully covered for dental care, and this age limit will be raised each year so as ultimately to include all persons under 18. Adults will be covered for emergency dental care. But the plan will not pay for items normally excluded, such as comfort items or cosmetic surgery.

COINSURANCE REQUIREMENTS

To keep costs down, and as a curb against over-utilization, individuals will be subject to a payment of 20% (called "coinsurance") of health benefits derived. However, the total coinsurance which a family will have to pay in any year will be limited according to its income. The poor will pay no coinsurance, others will pay a maximum in any year of 10% of income reduced by a "coinsurance deduction" that will assure that the obligation for coinsurance will increase only gradually as income rises. In effect, a family of four with a total income of $4,200, with no income tax liability, will be exempt from coinsurance. At $4,300 of income, the coinsurance limit would be 10% of the additional $100 of income, or $10; at $10,000 the limit would be $580. In no case could the annual coinsurance limit be more than $1,500 for an individual or $2,000 for a family. The limitation on coinsurance triggers the catastrophic expense protection, for health services are free of coinsurance when the limit is reached.

INSURANCE AVAILABILITY

Insurance will be available to all persons, regardless of prior medical history and on a guaranteed renewable basis. All carriers will offer the insurance, and will participate in an assigned-risk pool, if the state believes such pool is necessary to assure the availability of the coverage. In addition, premium for individuals or small groups within a state will be not more than 125% of the cost of insurance for members of large employee groups (over 50 persons) in a state.

ADMINISTRATION

State governments will regulate insurance within the state, subject to federal guidelines established under the program by a 15-member Health Insurance Board. The Secretary of HEW and the Commissioner of Internal Revenue will be members of this Board, and the additional members will include 7 practicing doctors of medicine, a doctor of osteopathy, a doctor of dentistry, and members of the general public. The new Board will also consult with carriers, providers and consumers in planning and developing programs for quality medical care, and will make annual progress reports to the President and to the Congress.

APPOINTMENT AS MEMBERS OF THE JOINT ECONOMIC COMMITTEE

The SPEAKER. Pursuant to the provisions of 15 U.S.C. 1024(a), the Chair appoints as members of the Joint Economic Committee the following Members on the part of the House: The gentleman from Missouri (Mr. BOLLING), the gentleman from Wisconsin (Mr. REUSS), the gentleman from Pennsylvania (Mr. MOORHEAD), the gentleman from Indiana (Mr. HAMILTON), the gentleman from Louisiana (Mr. LONG), the gentleman from New York (Mr. PIKE), the gentleman from Ohio (Mr. BROWN), the gentleman from Michigan (Mr. BROWN), the gentlewoman from Massachusetts (Mrs. HECKLER), and the gentleman from California (Mr. ROUSSELOT).

AVIATION ACT OF 1977—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95-45)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Public Works and Transportation and ordered to be printed:

To the Congress of the United States:

In October of 1975, I sent to the Congress a bill, the Aviation Act of 1975, that would have fundamentally reformed the manner in which the Civil Aeronautics Board regulates the airline industry. The bill was designed to make that industry more competitive and responsive to the needs of the American consumer. At the same time, the bill would have permitted efficient, well-managed companies to earn a fair return on investment and to attract the large amounts of capital needed for long-term growth, thus helping to make the industry healthier.

Many events have taken place since late 1975. Although my proposed aviation regulatory reform bill was not enacted, major and thorough hearings were held in both houses of the Congress on the many proposals to reform the economic regulation of the airlines. These hearings attracted wide public participation and discussion. They built an impressive record of detailed economic study and practical airline industry experience.

We have carefully reviewed testimony presented in these hearings and debates. The record is clear: The present regulatory system is costly to the consumer and is also sapping the financial health of the industry. Reform of airline economic regulation is needed, as soon as possible, and it must be thorough and substantial—even beyond my original proposal. Accordingly, I am submitting today the Aviation Act of 1977.

This new proposal is based on the same concepts as the 1975 bill and, like it, would reform aviation regulation in three key areas: Pricing, entry and exit, and antitrust exemptions. In each of these areas the Aviation Act of 1977 provides meaningful reform of the current, archaic regulatory system to allow this naturally competitive industry to reach its full potential. This proposed legislation is an improvement over the Aviation Act of 1975 since it builds upon the experience and information developed during the Congressional hearings and incorporates constructive concepts contained in other aviation reform proposals considered last year. The result is a simpler bill which provides a more appropriate approach to pricing and entry reform than was originally proposed. Furthermore, the bill contains other improvements, including a provision which would assure the continuation of essential air service to small communities.

The case for reform has been made. It is now time to act. My firm hope is that the Aviation Act of 1977 will receive prompt consideration and action by the Congress.

REPORTS OF THE SECRETARY OF DEFENSE AND THE SECRETARY OF TRANSPORTATION ON AWARDS MADE DURING FISCAL YEAR 1976 TO MEMBERS OF THE ARMED FORCES—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Armed Services:

To the Congress of the United States:

Forwarded herewith in accordance with the provisions of 10 U.S.C. 1124 are reports of the Secretary of Defense and the Secretary of Transportation on awards made during Fiscal Year 1976 to members of the Armed Forces for suggestions, inventions and scientific achievements.

Participation by military personnel in the cash awards program was authorized by the Congress in 1965. More than 1.89 million suggestion submissions since that time attest to the success which the program has had as a means of motivating military personnel to seek ways of reducing costs and improving efficiency. Of those suggestions submitted, more than 296,000 have been adopted with resultant tangible first-year benefits in excess of $929,000,000.

Of the 119,256 suggestions which were submitted by military personnel (including Coast Guard military personnel) during Fiscal Year 1976, 19,375 were adopted. Cash awards totaling $1,343,224 were paid for these adopted suggestions, based not only on the tangible first-year benefits of $52,983,753 which were realized therefrom, but also on many additional benefits and improvements of an intangible nature. Enlisted personnel received $1,104,328 in awards, which represents 82 percent of the total cash awards paid. The remaining 18 percent was received by officer personnel and amounted to $238,896.

Attached are reports of the Secretary of Defense and the Secretary of Transportation containing statistical information on the military awards program and brief descriptions of some of the more noteworthy contributions made by military personnel during Fiscal Year 1976.

REPORTS OF THE SECRETARY OF DEFENSE AND THE SECRETARY OF TRANSPORTATION ON AWARDS MADE DURING FISCAL YEAR 1975 TO MEMBERS OF THE ARMED FORCES—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Armed Services:

To the Congress of the United States:

Forwarded herewith in accordance with the provisions of 10 U.S.C. 1124 are reports of the Secretary of Defense and the Secretary of Transportation on awards made during Fiscal Year 1975 to members of the Armed Forces for suggestions, inventions and scientific achievements.

Participation by military personnel in the cash awards program was authorized by the Congress in 1965. More than 1.76 million suggestion submissions since that time attest to the success which the program has had as a means of motivating military personnel to seek ways of reducing costs and improving efficiency. Of those suggestions submitted, more than 275,000 have been adopted with resultant tangible first-year benefits in excess of $873,000,000.

Of the 125,777 suggestions which were submitted by military personnel (including Coast Guard military personnel) during Fiscal Year 1975, 20,760 were adopted. Cash awards totaling $1,442,536 were paid for these adopted suggestions, based not only on the tangible first-year benefits of $74,347,607.94 which were realized therefrom, but also on many additional benefits and improvements of an intangible nature. Enlisted personnel received $1,175,908.50 in awards, which represents 81 percent of the total cash awards paid. The remaining 19 percent was received by officer personnel and amounted to $266.627.50.

Attached are reports of the Secretary of the Defense and the Secretary of Transportation containing statistical information on the military awards program and brief descriptions of some of the more noteworthy contributions made by military personnel during Fiscal Year 1975.

CONSTITUTIONAL AMENDMENT WOULD REPLACE ELECTORAL COLLEGE

(Mr. EDWARDS of Alabama asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDWARDS of Alabama. Mr. Speaker, I am today introducing legislation to provide for a kind of election reform we have been talking about for years, a resolution calling for a constitutional amendment replacing our archaic electoral college system with a direct popular vote.

The electoral college was established in an era when, with no means of mass communication or easy transportation, it was impossible for the voters to know their candidates and elect their leaders directly. Today, with our electronic and computerized systems of communication, it not only is unnecessary to retain this system, it is a real anachronism. In the early days of our country, the people in each State would elect people in whom they had great confidence to go to the State capitol to decide and cast their votes. But over the years, these electors were not legally bound to vote for the nominees of their political parties, and numbers of them betrayed the confidence of the people they represented when finally casting votes in the electoral college. We saw this happen again in this most recent Presidential election.

Even more disturbing is the fact that today the Presidential candidate receiving the most votes in a State is entitled to all that State's electoral votes. Thus a candidate who gets only 51 percent of the people's vote in a State gets all the electoral vote, with the other 49 percent of the people casting a silent vote. This is simply unfair—it is no wonder that we often hear the complaint that "Washington is not listening."

My resolution would change this system. In simple terms, it would provide, through constitutional amendment, a direct popular vote of the people. If no candidate won 40 percent of the vote, there would be a runoff between the top two competitors.

It is ridiculous to work on campaign finance reform, committee reorganization, and budget process changes without acting on this most basic reform. We must insure that the voice of the people is heard on this, the most important vote cast; and I urge my colleagues to join me in working on this effort early in the 95th Congress.

LEGISLATIVE PROGRAM

(Mr. BAUMAN asked and was given permission to address the House for 1 minute.)

Mr. BAUMAN. Mr. Speaker, I have taken this time to ask the distinguished majority leader if he will give us the program for the House of Representatives for the coming historic and momentous week ahead of us.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. I yield to the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, the program for the following week is as follows:

On Monday the House will meet at noon. There are no bills scheduled.

On Tuesday we would expect that the House would not be in session.

The House will be meeting at noon on Wednesday in order that we might handle the resolutions on committee assignments.

On Thursday, which is Inauguration Day, we will ask that the House come in at 10 a.m. so that we might adjourn from here to go out to the steps and participate in the inaugural ceremony.

It is not anticipated that there will be any session on next Friday.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday of next week.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

ADJOURNMENT FROM MONDAY, JANUARY 17, TO WEDNESDAY, JANUARY 19, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns on Monday next, it adjourn to meet at noon on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

HOUR OF MEETING ON THURSDAY, JANUARY 20, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns on Wednesday next, it adjourn to meet at 10 o'clock a.m. on Thursday, January 20, 1977.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

ADJOURNMENT TO MONDAY, JANUARY 17, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PUBLIC WORKS EMPLOYMENT ACT OF 1976

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. CONABLE) is recognized for 60 minutes.

Mr. CONABLE. Mr. Speaker, I have reserved this time so that the Members may have ample opportunity to discuss the Public Works Employment Act of 1976. This act, as it has come to fruition shortly before Christmas, has been a matter of considerable concern to individual Members of Congress, and there has been a great deal of misunderstanding about it.

It is, of course, a provision that is likely to be extended in one form or another; and I think it important, before we automatically extend it and fund it to a greater degree, that we have some understanding and some discussion of how it has worked out in practice. I think we can avoid the pitfalls that were apparent in the distribution of funds, 100 percent Federal grants, to the localities, as announced by the Economic Development Administration in December.

Mr. Speaker, I would like to discuss, first of all, for the review of the Members and for the record, the manner in which this act has been administered. I have asked some members of my staff to talk with a program specialist and the Public Works Information Officer in the Economic Development Administration to get the details that many of us are vague about.

As we will recall, $2 billion was appropriated under the local Public Works Capital Development and Investment Act of 1976 for grants to various State and local public works projects. Of the $2 billion EDA withdrew $10 million of the appropriation to cover the costs of administering the title I program. This $10 million withdrawal was provided for in the act.

The first administrative problem faced by the EDA was devising a State allocation formula. The only guideline in the act for determining each State's allocation of the $2 billion in public works funds was that no State would receive less than 0.5 percent, or $10 million, nor more than 12.5 percent, or $250 million, of the appropriation. If the allocation formula had been based solely on the number of unemployed in each State, Colorado would have received more than Rhode Island. Colorado has relatively low unemployment, and most of this is concentrated in urban areas. Rhode Island has severe unemployment all over the State. It was clear that some provision had to be made to include the rate of unemployment as well as the number of unemployed persons in any State allocation formula.

After trial of several formulas, EDA determined that a 35/65 division of funds would provide the best balance in distribution. The 35/65 allocation can be described as follows: 35 percent of the $2 billion was distributed among those States with unemployment rates above the national average, according to the State unemployment rates; 65 percent was distributed to each State's relative share of the total number of unemployed in the Nation.

After applying this formula, several States were apportioned only $2 to $3 million. Funds had to be redistributed somewhat, then, to provide each State with at least the minimum $10 million allocation per State. Twenty-one States out of the fifty-three—that is including the territories which were also considered—received $10 million; in other words, received the minimum. Only California received the maximum, $250 million. New York received $230 million.

There were no objections, to my knowledge, raised with the EDA against this 35/65 formula and how it worked out. It seems to have been a fair resolution of the apportionment problem as between the States, at least in the view of the Congressmen from whom we may hear further if they participate in this special order.

Mr. Speaker, now let us look at the substate distribution and see how that worked out. The directives in the act for substate distribution are as follows:

Rules, regulations, and procedures shall assure that adequate consideration is given to the relative needs of various sections of the country.

The Secretary shall consider, among other things, (1) the severity and duration of unemployment in proposed project areas; (2) income levels and the extent of underemployment in proposed project area; and (3) the extent to which proposed projects will contribute to the reduction of unemployment.

The Secretary shall give priority and preference to public works projects of local governments.

The act also provided for a 70–30 split of funds allocated to the States based on unemployment data for the three most recent consecutive months for which data is available. This meant that 70 percent of each State's funds was to go to those project areas with unemployment rates above the national average, while 30 percent was to go to those project areas with unemployment rates between 6.5 percent and the national average.

The Secretary was also advised that in determining the unemployment rate of a local government, unemployment in those adjoining areas from which labor force for such project may be drawn, shall, upon request of the applicant, be taken into consideration. This was one of the factors that resulted in what, to many people, appeared to be an aberrant distribution pattern.

A further instruction was that applicants shall relate the request to existing approved plans and shall make requests which will permit or advance longer range plans and programs.

This last point, if I may interject, was probably the only criterion relating to the actual need for the project. Actually the criterion we laid down related entirely to the creation of jobs and not necessarily to the needs of the community. However, we did say that applications should make requests which would permit or advance longer range plans and programs. If we were to characterize the amount in the scoring that went toward community needs, it would be probably 10 percent or less.

The EDA had to develop scoring procedures in response to the above directives. Before describing the scoring formula, a few of the inherent problems of the above directives should be discussed.

No mention is made of the needs of the community other than unemployment. This concern was reflected, as I will mention later on, where the applicant was advised to relate requests to existing approved plans.

Unemployment statistics are drawn from the three most recent consecutive months for which data is available and scored by comparing these to national statistics for the same period. Many projects used CETA statistics which were uniform for April, May, and June of 1976. However, in project areas not having CETA figures, the act had to be followed, which meant that data submitted may have been from differing time periods. I believe CETA has nearly completed updated unemployment statistics for virtually every county in the country. This new data could be used in the future to insure uniform statistics. But, quite frankly, the statistics used in the $2 billion distribution is somewhat suspect in some cases.

The directive we gave the EDA relating to the 70–30 split can be defined as follows:

Seventy percent of each State's allocation was used for projects having a local unemployment rate above the national average.

Thirty percent of the State's allocation was used for projects in areas where the unemployment rate was below the national average, but 6.5 percent.

This 70–30 split was proposed when the national unemployment rate was much closer to 9 percent. Therefore 30 percent of the funds would have been for areas

with unemployment under 8.56 percent but greater than 6.5 percent. Because the national rate dropped substantially during 1976, at least during the months used to obtain statistics, 30 percent of the funds were directed toward areas with a very narrow range of unemployment: 6.5 percent to about 7.5 percent.

This meant that areas with 8 to 9 percent unemployment were ranked very low on the 70 percent scoring scale, and may not have been funded, while a project area with 7.3 to 7.5 percent unemployment would rank quite high on the 30 percent scoring scale and might very well have been funded.

The intent of the 70–30 split was to prevent concentration of funds in a few areas. However, if this is continued, EDA suggests that an escalator clause be provided for in any new public works legislation to compensate for changes in the national unemployment rate. We did not take that into account. I will tell the Members quite frankly that this was the major factor in some of the aberrant results under the act.

Any project coming from an area which had between 6.5 and 7.5 percent unemployment under the 70–30 split had a much better chance of being funded than those projects that came from areas with higher than the national average. The intent of the law was certainly beneficent. The results, however, were quite erratic.

The directive that we gave EDA permitting unemployment data to be computed for the immediate project area as well as adjoining areas from which the labor force would be drawn presents further difficulty in obtaining uniform unemployment data. This is section 108(f) of the act which tended to obscure accurate statistics and could have been used to inflate unemployment data. As the unemployment data had the highest impact on the project score, it is felt by EDA that this section should be tempered, if not eliminated

To understand the scoring, let me go through that briefly.

The EDA devised two 4-factor scoring formulas to process applications in response to the above discussed directives. The first 4-factor formula was used to compute the basic score and is largely based on the unemployment statistics. Up to 30 points were permitted for the number of unemployed in the project area; up to 25 points for the rate of unemployed in the project area; up to 30 points for the labor intensity factor of the project.

EDA established a minimum-maximum labor intensity of 10 percent and 80 percent respectively. If a project had over 35 percent labor intensity, it automatically received all 30 points under this scoring formula, and up to 15 points were permitted for per capita income of the project area. This is the kind of complicated formula they felt they had to set up if they were going to score appropriately.

A second 4-factor formula was used to compute the supplementary score, that is, this score was computed and multiplied as a percentage times the basic score, and the product was then added to the basic score for the final score. These four factors are based on the other directives in the act. There are up to 10 points for a long range benefit project, looked at again in the case of scoring ties. This could be construed as a test of community need. There are five points if the application was submitted by a unit of local government or a school district; three points if the application was submitted by a special-purpose district of local governments; and up to five points for the project's relationship to existing plans.

This appears to be another test of the community need, although I am not sure exactly what the need is. The scoring formula followed the act rather closely. The most severe problems seemed to stem from the act itself or from the points allocated to each of the eight scoring factors by EDA.

EDA predicted that States having large population centers could monopolize most of a State's allocation. To compensate for this, EDA devised a formula for adjustments after final scoring, to avoid "undue concentration" of public works funds. This formula was used only when more than one project from a specific project area scored within the funding range. The formula is not considered to be an entitlement for any area. An application had to score within the funding range to be affected by final adjustment.

In making determinations of undue concentration the ratio of area unemployment to State unemployment was determined. This percentage was applied to the State planning allocation of public works funds to establish a project area funding "benchmark." Projects were then selected according to score until the selections from an area exceeded the benchmark. After that point, no projects from that area were selected. For example, New York City has about 45 percent of the State's unemployment. Projects were funded from New York City according to score until 45 percent of the State's allocation was used, and then no more projects were funded.

Now let us just look very briefly and with rounded figures at the public works applications nationwide under this act. The amount available for the awards was $1,990 million. Members will remember that $10 million was taken out for administration. The total number of applications was 22,275. The amount requested in these applications was $20,308 million. The number in the 70-percent category was 17,085 of the 22,275 applications. The total amount requested was $16,231 million.

There were only 3,882 applications requesting $3,119 million in the 30-percent category, which was set aside for project areas with unemployment rates above 6.5 percent but below the national average. The number of applications with unemployment rates less than 6.5 percent was only 788, and there was an aggregate of $563 million under those applications. There may be discrepancies in the statistics which come from EDA on these figures. Some people may have come up with different figures than I have, but EDA may have accepted some late applications after determining the above statistics for technical reasons.

The breakdown of the types of projects selected is: 24.5 percent for public buildings; 20.7 percent for water/sewer/drainage projects; 19.1 percent for schools; and 9.1 percent for streets, roads, and bridges. The breakdown of types of project scored, but not selected were somewhat similar. There is: 19.3 percent for water/sewer/drainage projects; 16.5 percent for schools; 14.9 percent for public buildings, 14.9 percent for miscellaneous; and 10 percent for streets, roads, and bridges.

Of the projects funded, the 1,988 awarded, using all funds available, 65 percent were in urban areas and 35 percent, in rural areas. The actual rural/urban split in the United States is about 30/70, but some of the provisions in the act favored rural areas.

I will not go through the figures for New York State. They are available for those who are interested.

I must say, Mr. Speaker, that there was a good deal of unhappiness about this act as it finally emerged. I find some of my colleagues perfectly satisfied. My own district, the 35th in New York, received a substantial amount of money, $13 million. It was concentrated in two of five counties. For technical reasons, one small rural county received very substantial grants. Three other rural counties received none at all.

There was, of course, the usual suspicion that the Congressman had in some way affected the distribution of this money. I suspect many of my colleagues may have had a similar experience to the one I had, that they could not claim any credit for this great beneficence, for some blame would also attach from those areas that did not receive funding.

I think it is clear from the way the Economic Development Administration administered the act that they tried to live up to the spirit of the act and distribute the money according to a formula which, after all, was set down with some rigidity in the act itself. I think it is also clear that political pressure had very little to do with this distribution of money.

I would hope that if we extend this act in any way and fund it as part of a job creation or economic stimulus program, such as that proposed by the President-elect, that this nonpolitical distribution of money would be reflected in any extension of the act.

Mr. RUPPE. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Michigan.

Mr. RUPPE. Mr. Speaker, the gentleman from New York (Mr. CONABLE) indicated a moment ago that rural areas in some situations did rather well or fared well under the bill.

I can only point to our own case in Michigan where those rural areas that had high unemployment and where they were eligible for that 70-percent funding did very poorly, because under either the law or the regulations the numbers of unemployed were a key factor in where the moneys were distributed; so basic-

ally in Michigan, Detroit walked off with all the money, which went really to those areas of high unemployment, because they had the actual overall numbers of unemployed and the rural counties upstate with higher percentages of unemployment and lower numbers than the aggregate simply received very little or nothing. Wayne County, oddly enough, took it both ways. Detroit is also in Wayne County and took a large chunk of the money on the basis of large numbers of unemployed. Several other areas within the county went under the funds, under the 30 percent available to those communities or areas with less than the average number of employed and, in effect, they got it both ways.
the manner in which the application was made out, the area for which the crea-

In Michigan, I would say the rural areas fared very badly and the large urban areas, mainly Detroit and Wayne County, walked off with most of the money.

Mr. CONABLE. Mr. Speaker, that was not true with regard to the statistics I have quoted; but I find there were a number of rural areas in the 70-percent category that were able to claim the jobs would be created in adjoining areas when there was not enough employment available in rural areas, thus raising the question of the rural impact.

That raises a question about the desirability of having a law which requires an application of law for a very limited period of time. I realize the purpose in back of that was designed to create jobs quickly. EDA did not build this up over a long period of time or check up on the validity of the applications. I think tion of jobs was claimed seems to have had quite a bit of impact. And the EDA had no way to check up whether or not there was uniformity in the applications made across the country in this respect. The result was that some places were able to claim job creation beyond their local area and these seemed to have fared very well as a whole.

Mr. RUPPE. Mr. Speaker, if the gentleman will yield further, it appears to me that the rural areas did very well at times in relation to the funding available. Other communities that have less than the national average, those in big cities, at least in my State, got eligibility under the area of having more than the national average, but some of the small communities having a lot of unemployment, but less than the national average, did fairly well.

They do pretty well under the lesser amounts of money, but the high unemployment small communities in Michigan did extremely poorly because Detroit walked off with the dollars on the basis of the numbers of unemployed in that high unemployment county or city.

Mr. CONABLE. I do want to point out to the gentleman that EDA, in administering this money, had a formula to prevent the concentration of all funds in one area. I doubt that Detroit walked off with everything. There may have been, however, what appeared to be from the gentleman's point of view to be an undue concentration in Detroit relative to the total State of Michigan.

Mr. YOUNG of Florida. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. I thank the gentleman for yielding to me.

Mr. Speaker, the gentleman from Michigan has raised a point which has created real problems in my district. The city of Clearwater applied as a higher unemployment rate of the entire county, and fell into that category of the 70 percent money; whereas, had they used their own unemployment rate, which was lower than the national average, they would have fallen into the 30-percent category.

From the information provided by EDA, it appears they would have been totally funded where, in fact, they did not get a penny. I am happy that the gentleman raised that issue, and I compliment the gentleman from New York for taking this time to call this problem to the attention of the House.

Mr. CONABLE. I thank the gentleman. I think it is clear that the 70–30 split, as it is worked out, is an effort to insure that there would be a broader distribution of these projects into areas, some of which had unemployment below the national average, and did result in those within the 1-percent band below 7.5 percent having a much better chance of being funded than those over the national average. That certainly was not only an untoward but an unfair result of the law.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I thank the gentleman from New York for yielding to me.

We ran into an entirely different problem, a whole area of the formula that has not yet been mentioned. In my district there was a great disappointment because a project which had been selected for further processing was turned down on the grounds that it did not fit one of the two criteria: First, that the unemployment figures in the Department of Labor area—which has not been mentioned here—the Department of Labor has areas which they consider that divide up the Nation, State by State. There are these areas, and they were counting the unemployment rate in that particular area.

The second was a requirement that it be contiguous; in other words, that although the project in this particular town would have drawn heavily on two cities where there is tremendous unemployment because that is where the work force comes from, that was not allowed to be counted because those two cities, although nearby, were not exactly contiguous.

So, those are two areas I have been waiting to hear about from the gentleman. The 70 to 30 did not seem to interfere with my district; neither did the 65 to 35. Is the gentleman going to comment on that?

Mr. CONABLE. I thank the gentlewoman for her contribution. I was not aware that was a serious problem; of course the fact that it was a problem reflects the need to have some standards.

Mrs. FENWICK. Some formula.

Mr. CONABLE. And the standards worked against the gentlewoman in this case.

Mrs. FENWICK. Because, you see, what happened was that the unfortunate thing is, it seems to me, that in one place one kind of formula is applied and in another case another kind of formula is applied. The public is not satisfied that the gentleman and I are not pulling strings or something. I think we could make our formula simpler and achieve some kind of result where it would be better than having these various things.

I spoke to the Regional Director, and the criteria of the Department of Labor area and, being contiguous, those were the only two mentioned to me.

Mr. CONABLE. I thank the gentlewoman again.

One of the reasons we are having this special order is so that we can get inputs from the various Members about what happened in their districts. Quite frankly, the implication that we are simply going to extend this act, fund it with an additional $4 billion—$2 billion per year—I think would be a serious mistake. It would result in lower priority projects, at least under these criteria, being funded. We would still have, in disappointed applicants, roughly $14 billion of applications after the whole program had been funded.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. I appreciate the gentleman's yielding.

Mr. Speaker, I want to join other Members in complimenting the gentleman for bringing this issue to the floor of the House and for the obviously detailed study the gentleman has made of the program. I do not know whether the gentleman found these details out after the gentleman's area bombarded him, as mine has done and, probably, most areas have done, with complaints as to why certain projects were not selected, or whether the gentleman was aware of these details in advance. But I think most of us were not familiar with the detailed formula that was going to be used, and we have later learned, to our sorrow, some of the problems the gentleman has referred to so very effectively.

Mr. Speaker, I might just add to that chamber of horrors and point out one other that I discovered in my own district. The capital city of Albany, which I represent in New York, although it has a rather substantial amount of unemployment, received not a single project, while some suburban communities in other counties received projects.

I went through the computer printout when it was sent to our offices here the other day, and discovered, in looking at all the projects that had been submitted by communities in Albany County, that some of them had a higher priority rating within the 30-percent cate-

gory than several projects in neighboring communities that had been selected. And then I looked at the computer printout to find out what the reason was, and the symbol was 61. That symbol means that the area had already received enough projects.

The gentleman mentioned earlier that when the amount of money allocated to match the number of unemployed in a particular area, no further projects were approved. But Albany County had not received a single project. So how could it already have enough? So I looked more carefully, and found three projects listed as attributed to Albany County and to the city of Albany. But when we checked into what they were, it turned out they were applications submitted in one case by the State University of New York and in another case by the New York State Department of Parks and Recreation, both located physically in the city of Albany, of course, but for work to be done on Long Island. Yet these three projects, totaling over $4 million, had exhausted the Albany County share of the funds. How ridiculous can you get? When I brought this error to the attention of the officials of EDA, they said, "Yes, that is a mistake. We are sorry."

Mr. Speaker, this is one of the reasons why we simply cannot do this selection process exclusively by computer. The money has already been allocated. I do not know whether these errors can now be corrected. But, clearly, the impartial, almost mechanical, attitude that EDA took, without listening to any Members of Congress for fear we might corrupt them, has plainly backfired in a number of cases.

I would like to make two other points, if the gentleman will permit me, because we both come from the same State and we have some of the same problems. I think we have to realize, as the gentleman has alluded, that, after all, the basic purpose of this public works program was to get some construction going fast, not to solve all of the problems of the cities and not necessarily to take care of every particular project. And, therefore, the action on it had to be fast and, as the gentleman indicated, sometimes superficial, if we were going to get the full prompt benefit of the program.

The gentleman, being much younger than I, does not probably recall that we had a similar program in the Kennedy administration under the title APW, Accelerated Public Works.

Mr. CONABLE. Mr. Speaker, I am glad to defer to the great age of my friend, the gentleman from New York.

Mr. STRATTON. This is an era when seniority does not do much good around here. I am just facing the facts.

The complaint in those Kennedy days, as today, was that if you went in for a HUD project or an urban renewal project, you spent 15 or 20 months going back and forth from your community to Washington with endless reviews of your application, and you simply never got the money in time.

So in the Kennedy APW program when those projects were allocated they were not done by computer. I think we can agree that Congressmen had some input; we got the projects underway and we relieved the unemployment problem.

I suppose we are never going to find a formula which will satisfy everybody, and if all 535 Members of Congress debate this matter, the country's economy will probably go down the drain before we get the additional stimulus that President-elect Carter wants to give it.

Mr. Speaker, I think we have to recognize that to some extent this program was like a lottery. There were 25,000 applications, and only 2,000 could win. That is pretty much like putting down $2 at the track and hoping for the best.

I think the important thing, as the gentleman has already said, is that Congress should look these criteria over more carefully when we renew the program, and in that respect I would like to suggest two things.

First of all, it seems to me that every area of substantial unemployment ought to have at least one project; and, second, in the case of these various errors that have been referred to—the computer error that I mentioned, as well as some of the others—communities that missed out the other day because of this kind of an error should have first priority in the next go-around.

Mr. CONABLE. Mr. Speaker, I thank the gentleman for his extensive contribution.

Our informant is the EDA for the most part. My fine staff has talked to them at some length. The EDA may be a biased source, but they claim there is serious doubt as to whether allowing longer periods of time would have affected the administration of the progarm or not. Anyway, the consensus that is reported is that they should have credit for just following the law.

If the results are capricious, they seem to be based on the law as we drew it rather than on superficial checks, although there seems to be little doubt that there were different criteria used by different areas that did affect the outcome to some extent.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Speaker, I want to thank the gentleman for yielding. I think the gentleman is making a good record, one that might possibly be read by somebody. That is the reason I want to bring out a couple of points.

The first point is that they only funded those projects for which 100 percent funding was being requested. There were some projects where a contribution of perhaps only 25 or 50 percent of Federal money would have resulted in a project being let, and if they could have or would have funded those kinds of projects, then the money would have gone further. In other words, we would get more jobs for the amount of money being spent.

So I believe it is a bad mistake to require that there must be 100 percent Federal funding. That is my first point, and perhaps the gentleman wants to comment on that.

Mr. CONABLE. No, I believe not at this point.

Mr. SMITH of Iowa. Mr. Speaker, the second point is that we do not really have any statistics that tell us how many people want a job compared to the number of people who get a job. Perhaps I am not getting that stated just right.

Anyway, the statistics we are using as a triggering mechanism are faulty. For example, about 3 years ago or 2 years ago in Detroit everyone who wanted a job had a chance to get a job. In Iowa perhaps a third of the people who would like to have a job never had the opportunity to get a job.

So it would appear by the statistics that more people are unemployed in Detroit than are unemployed in Iowa. Yet, as a matter of fact there are more jobs available for the unemployed in Detroit than there are in Iowa. The result is that tens of thousands of women, for instance, never had a chance to get a job.

Therefore, I think that these kinds of statistics that we have used as a triggering mechanism really are faulty to start with.

Mr. CONABLE. Mr. Speaker, it seems to me that is a problem with all of our unemployment statistics generally. We are using patterns of unemployment in our unemployment statistics that go back over many years, and I think that they are not always as illuminating as they should be to reflect the actual structure of unemployment. That is a problem not only with this act, but with many other programs as well.

Mr. GOODLING. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman fom Pennsylvania.

Mr. GOODLING. Mr. Speaker, I would like to point out, first of all, that the gentleman who ran this program is from my district. He needed my approval to get the job that he got, and I did not get a project in my entire district; but I did get a lot of attention since they have been handed out asking me why we did not get a project.

As I see it, there are several problems. First of all, I was under the impression when we were proposing this program that it was unemployment in the construction area that we were really going to dig into.

Mr. CONABLE. Those figures simply were not available.

Mr. GOODLING. According to them, that is true; the Labor Department said they were not. They would not use State figures, nor would they use State figures in the other situation.

Second, in my area, places like York city did not get anything because they used York County unemployment figures. They tell me the reason they did that was because there was some tieup as regards the city. The figure for York city is 11-something percent, but they used the county figures.

Third, they said that, of course, the 70/30 formula really fouled them up because they had lots of projects for 70 percent, but not many for 30 percent.

The reverse of that was also true in another area of Pennsylvania. Mount Lebanon, not in my district, got a project. They used Allegheny figures for Mount Lebanon. That has nothing to do with Mount Lebanon's unemployment, nor with Mount Lebanon's per capita situation. Those were all areas that were cranked into this formula. I am not saying that they did anything wrong in relationship to jiggling the formula. The formula was wrong, and the figures they had to put in were wrong if we were going to get the construction industry off its back.

Those were the problems which were pointed out.

Mr. CONABLE. Mr. Speaker, the gentleman from Pennsylvania (Mr. GOODLING) raises some good technical points.

I think perhaps we could summarize some of these technical problems that arose in the administration of the act. There does not seem to have been any pattern in the types of program funded except for a bias in favor of labor-intensive projects and those which would lead to permanent employment.

The duration of employment was one of the criteria in the act, but it was not used. Perhaps, once again, it was too difficult for the Labor Department to come up with accurate statistics, and that is why it was not used.

The use of unemployment figures in the construction industry was mentioned in the act, but was not used since there are no accurate and timely figures available, according to the Labor Department.

Mr. GOODLING. According to the Labor Department; that is correct.

Mr. CONABLE. Yes. Seasonably adjusted rates of unemployment were not used because the Department of Labor could not supply them. This works against States in the North where it is an important factor.

Some critics insist that the public employment figures understate the rate of unemployment—such as was pointed out by the gentleman from Iowa—because of the nature of the unemployment statistics. This is a more basic statistical problem than that which is affected just by this act. However, this act does help underscore the point that we should bring our statistical-gathering techniques up to date. We have not done it; and it, of course, is apparent when we look at the results of the distribution under this act.

Mr. Speaker, let me say further that the gentleman from Pennsylvania (Mr. GOODLING) has mentioned the fact that the man who was making the distribution was from his district. This district did not get a project. That was one of the saving graces in the final result as far as this individual Congressman is concerned. As I mentioned, my district did very well in the aggregate, but substantial pieces of my district were completely left out. It must have been apparent to anyone that if the money had been distributed politically, it would have been distributed in a more evenhanded way to avoid the criticisms that result from capriciousness as a result of the application of the formula we imposed on EDA.

Consequently, Mr. Speaker, very frankly, I am grateful that it was apparent, from the end result, that it was a formula distribution. Otherwise I think I could have been much more effectively criticized by constituents who felt that I might not have looked out for their interest in the distribution of this money.

Mr. GOODLING. Mr. Speaker, if the gentleman will yield further, I think there was nothing political at all about it. I think it was what was cranked in, and that was the way in which it fell. It was just that what was cranked in was not the right thing to crank into the formula.

Mr. CONABLE. Mr. Speaker, I would hope that if there is any extension of this program that it would not be political to any degree again. But I would also hope that the formula would be sufficiently overhauled so that we could avoid the appearance of capriciousness which was certainly one of the net results in my area, in any event.

Mr. RUPPE. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Michigan.

Mr. RUPPE. Mr. Speaker, the gentleman from Iowa (Mr. SMITH), a few minutes ago, made an interesting observation and that was that the EDA people did not fund any of the projects where less than 100 percent of funding was requested. I suspect in the future that the legislation may be somewhat more effective if the State or local communities are required to put up some small portion of the moneys rather than the Federal Government footing the entire bill.

I think that we got out of that $20,000 request—and, remember, a lot of the projects were probably not necessarily that desirable but were in there because it was free and, second, a lot of the projects turned out to be much greater or larger in dollar volume again because of the Federal Government paying the entire bill.

So, as I say, Mr. Speaker, I believe that if a portion of the money would be paid at the State and local levels, we would probably see a number of projects weeded out and a number also put in at a far lesser cost than in this last go-round where there was 100 percent Federal funding. This leads to a myriad of proposals and also leads to these proposals being put in that are much more extravagant in dollar size than they would be if the local unit paid some small portion of the total funding.

Mr. CONABLE. Mr. Speaker, I could not agree with the gentleman from Michigan more. It seems to me that anyone will put in for a Federal gift and it may or may not bear any relationship to the needs of the community. If we were to require some modest local community contribution, this would help weed out a great many of the projects that may have had only incidental effect on the needs of the community.

Mr. RUPPE. Or would reduce down somewhat the size of a project that probably does not have too much merit in its overall application.

Mr. CONABLE. I must say there was inevitably some capriciousness in the applications that were put in. People were dreaming up applications for anything they could think of because it involved no local sacrifice at all. I am concerned about that because, given the short time frame in which this set of applications was presented, there were many public works projects already in the works for very large sums of money involving local contributions which were of a higher priority than the applications that were put in under the 100 percent short time frame.

If once again we go the route of simply extending the existing act, or funding it to a greater degree then we will not have dealt with the problem of priority in a way that I think makes any sense for the Nation or the localities.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Speaker, I thank the gentleman from New York for yielding to me and I commend the gentleman for taking this special order so that we might discuss these projects and these problems.

Mr. Speaker, I believe that this is a very complicated situation and one in which, as the gentleman pointed out, if we had been permitted more time in order to better review these applications, and so on, that then it would not have had the desired effect of putting people to work immediately, but, on the other hand, I think what we ended up with was very much of a lottery.

Taking a look at the projects in my own district, I find that the number that was granted was far below what it should have been on any kind of a percentage analysis, and was not nearly as meritorious as many others that were turned down in higher unemployment areas, and it did not make much sense.

One of the things that has not been mentioned is, however, even though the total amount of the allocation was $1 billion something, is that correct?

Mr. CONABLE. One billion nine hundred and ninety million dollars.

Mr. LAGOMARSINO. One billion nine hundred and ninety million dollars, that the work rate potential of this program went far beyond because many of the applicants spent considerable thousands and thousands of dollars in applying. We have now come to the conclusion, I think, that that was all money wasted, because it did not apparently make that much difference how well these applications were prepared. So we will have to change many facets of the administration of the program before I will support it.

Mr. Speaker, again I would like to commend my esteemed colleague from New York (Mr. CONABLE) for calling this special order to discuss the Public Works Employment Act (Public Law 9–369).

Frankly, I was dismayed at the way this program was administered by the Economic Development Administration.

Unemployment in the 19th District of California is right at the national average, yet the district received only one grant, totaling $426,000. This represents two-hundredths of 1 percent of the $2 billion allotted nationwide, or about one-tenth of what we should have received. Under an equitable division of the funds, we should have received almost $4.6 million.

To take but one example Ventura County has 15,667 unemployed, or about 2 percent of the California total. Since California was allocated $250 million under the program, the county should have received grants totaling almost $5 million. Yet there was only one grant awarded in the county, in the amount of $860,000. This despite the fact the county had "ready-to-go" projects for such vital and labor intensive projects as new fire stations and flood protection works.

The worst part about the program is the effect which it has had on the public's perception of the Federal Government and its ability to deal effectively and efficiently with serious problems such as unemployment. Typical of the reaction is a letter I have received from the Oxnard school district, which I would like to read into the RECORD:

JANUARY 6, 1977.

HON. ROBERT J. LAGOMARSINO,
House of Representatives,
Longworth House Office Building,
Washington, D.C.

DEAR BOB: The Board and the administrative staff of the Oxnard School District enthusiastically supports your call for a congressional probe into the award of grants from the 1976 Public Works Emergency Employment Act.

While we were genuinely disappointed that our request for funds to construct a badly needed elementary school was not approved, we would like to share with you our dismay relating to the apparent slipshod review process employed by the Economic Development Administration in Seattle.

Our district's application, requiring hundreds of man-hours of preparation time, was submitted well before the designated deadline. Shortly after submission, our application was returned with an indication that certain information was not adequately supplied. We phoned an EDA official in Seattle who apologized profusely stating that an inexperienced, novice review team had not adequately evaluated our application. He further indicated that other applications from school districts had been similarly returned and suggested that they be resubmitted to the Seattle office for consideration.

It is estimated that the Oxnard School District spent about $10,000 in staff and consultant time for the submission of what we considered a very thorough and well-justified application for a $2,600,000 elementary school facility. At the very least, we would like to believe our efforts received some semblance of competent review which we believe may not have occurred.

NORMAN R. BREKKE,
District Superintendent.

Mr. Speaker, I feel that in view of the evident inequities and questions which have arisen with regard to this program, a full scale inquiry should be undertaken. Like many of my colleagues, I have written to the Secretary of Commerce asking for an explanation, and have joined in requesting a General Accounting Office probe of the affair. Until we can be assured that another such fiasco will not occur, and until we can assure our constituents of better legislation and administration, I do not see how we can even think of passing another such program.

Mr. CONTE. Mr. Speaker, I want to commend the gentleman from New York (Mr. CONABLE) for arranging this special order to discuss the Public Works Employment Act (Public Law 94-369). As one of the original cosponsors of this act, and one who fought hard to get it enacted and provide the appropriations for its implementation, I am especially pleased to participate in this discussion.

Many of us who worked hard on this piece of legislation have been less than pleased with the resulting program. It appears that some areas received grants while others which seemed comparable got nothing. Projects of lesser priority received funding while those of greater need received nothing. In short, there have been a lot of problems with the program.

So far in this Congress there have been a number of proposals to expand and extend the public works employment program. I believe that this program is a good way of solving local unemployment, and because of that belief I have introduced legislation to expand the existing public works employment program to a $15 billion authorization.

But before we do any serious expansion of this program, we should give some serious consideration to the lessons of the present program. We should take a close look at the way the program is administered, and consider how we might improve upon that administration.

Most of us would agree that the program did not turn out quite as we had hoped. The thing to examine at this point is whether the problems which arose were strictly administrative, or whether they arose from the legislation itself.

There is no question that some appalling incidents have taken place. As we are finding out from seeing printouts from the Economic Development Administration, some entire project applications were simply "lost"—those applications never made it into the computers, were never ranked, and so, of course, were never considered for funding. Since the allocation of funds is apparently complete, it appears that the projects which never made it into the computer are simply gone—prey to bureaucratic bungling.

I do not know where the fault lies, and this discussion would probably be best served without any attempt to levy blame. It may be that in our zeal to get the program going as soon as possible, we allowed insufficient time for the EDA to do a proper job. For the future, I recommend that the EDA devise some method of double checking to make sure that the applications which are received actually make it into the computer and are considered for funding. And in order to permit such a system to operate effectively, we should provide the EDA with sufficient time to make it work.

Another problem with the program arose out of the division of available funds into two categories. In order to target available funds to those areas which were hardest hit by unemployment, we designated that 70 percent of the funds should go to areas with unemployment rates above the national average. The remaining 30 percent was reserved for communities with unemployment rates lower than the national average but above 6.5 percent.

As it turned out, applications under the 70-percent category had a 1-in-10 chance of being funded, while applications submitted under the 30-percent category had a 1-in-5 chance. This discrepancy appears to be a contradiction of the intent of the legislation to help the areas with highest unemployment. I think we should probably give serious consideration to increasing the percentage of funds given to areas of highest unemployment, I would eliminate the 30-percent category completely.

There also appears to be a problem with the definition of "project area." The authorizing legislation allowed two different project area definitions. For the purposes of level of income, the community could only use its area of jurisdiction. But for the purposes of unemployment rate and number of unemployed, it could draw its own project area taking into consideration neighboring communities whose unemployed could be hired for the project. This seems to have resulted in a great deal of "gerrymandering" as each applicant tried to construct an area with the highest possible unemployment rate.

Certainly there should be some consideration of the rates of unemployment surrounding an applicant. Funding for a community's project should be reasonably expected to benefit not only that single community, but also the surrounding jurisdictions. But perhaps we should establish some uniformity in drawing the permissible project areas. Possibilities might include such standard recognized boundaries as CETA areas or labor market areas. And there should be one project area for all application purposes—not separate ones for the accumulation of application statistics.

There also seems to be a problem with uniformity of unemployment statistics. In this last round, many applications used figures for April–June, while others used June–August or July–September data. The applications should specify the months to be used, and there should be uniformity.

There should also be some allowance made for the differences in the ways different States calculate their unemployment statistics. Some States include people who have exhausted unemployment benefits while others do not. Some State figures take into the account the so-called "discouraged" job seeker, while others do not. And some State unemployment statistics, including those of Massachusetts, dramatically underestimate the number of long-term, chronically unemployed—the very people a measure like this should be helping.

In essence, before the next round it is important for the Bureau of Labor Sta-

tistics to examine its unemployment figures toward an analysis of whether these figures are actually comparable from State to State. And those figures which are not comparable should be adjusted or the formulae shifted to take differences into account.

In examining the rating criteria, it appears that insufficient weight was given to the long-term employment creating effects of a proposed project. Such things as water and sewer lines, industrial park development, and urban renewal will have an impact on the economic viability of a community or region much longer than the actual duration of the project. If we are going to genuinely beat unemployment in this country—and I believe that should be our top priority—then we must provide funds for projects which will have an enduring economic impact.

In legislation which I introduced earlier this session, I proposed placing more emphasis on the long-term employment impact of proposed projects, and I believe this should be included in any new public works employment program.

Mr. Speaker, although I have outlined some significant problem areas, I believe the public works employment program is essentially sound. The premise of targeting funds to areas with highest unemployment is a good one. It directs funds to areas which really need them, while avoiding the risk of fueling the fires of inflation.

I hope that the Congress will act promptly in extending the public works employment program, and I urge serious consideration of the suggestions which have been made on the floor today. This is a good program, but like all programs it can be made better.

Mr. Speaker, I also agree that we ought to eliminate that 30 percent part of the bill.

Mr. CONABLE. I thank the gentleman from Massachusetts for his contribution.

I would like to ask those who are seeking recognition now to withhold for 1 minute. The gentleman from Minnesota has taken an hour following this special order to continue this discussion.

I would like to say a few things in summing up my own view.

Mr. Speaker, this is a well-intentioned piece of legislation. It has I think caused quite a stir, particularly among those submitting those $18 billion worth of applications who were disappointed. I do not think it is within the capacity of this country to meet everyone's desires in public works. I think it is very important, however, that if we are passing out Federal largess we do it according to the needs of the country and particularly according to the needs of the localities which receive this largess.

It seems to me, Mr. Speaker, that one of the best ways to achieve this is through having some modest participation by the locality in the financing of the public works projects that are involved. This is better assurance, in my view, of the actual need of the community than any rigid formula establishing some type of project which will have preference.

I would like to see the community have its input. I think that input should not be simply in the form of a race to get an application, regardless of community needs, into the hands of those distributing the Federal largesse but in the approach that says to the members of that community: "What are you willing to finance in this community to the extent of 10 percent or 15 percent or 25 percent if we are to qualify for a Federal financing for the balance?"

I realize that involves a time factor and will slow down the creation of jobs. It seems to me, however, that in the long run it will be better for the country if we move with some caution on this type of program, permitting the communities to have their input and permitting the administrators to work out the details in ways that make sense not only to them, but also to the Congress as well. There are at the present time about eight bills, I understand, that are floating around, apparantly all of them are pretty much the same as the last one. I also understand there is a great deal of talk about eliminating the 70-to-30 split.

I think the whole concept of this measure should be tested and challenged. We have some time. The issue of the economy is one we are going to be talking about here between now and the time for implementing any economic stimulus package, and it seems to me also the manner in which we move to create jobs is a very important responsibility of the Congress. I hope other Members will come forward with their own experiences. I hope the committees charged with the responsibility will hold hearings, as we are in effect holding an informal hearing during this special order today.

Mr. KEMP. Mr. Speaker, while I was encouraged to learn that several worthwhile projects will be implemented under the auspices of the public works program, I share the sense of injustice which has been expressed here today with regard to the selection process used by the EDA.

It has become apparent to me that the formula, which was devised to rank the proposals according to the stated criteria, has not been successful or even consistently applied in practice. Many of the most labor-intensive projects in areas of extremely high unemployment were eliminated from competition, even though many of these projects are vital to maintaining minimum health and safety standards in parts of my district.

More disturbing is the less than responsible manner in which applications were handled in the EDA regional office. Many of my constituents have contacted me in total frustration, relaying situations in which their applications were rejected wrongfully. In most cases, they were never given a chance to correct deficiencies where they truly existed, for the EDA notified them of those deficiencies several weeks after the deadline for submission, even though the applicants had originally submitted their proposals weeks before.

I would be loathe to approve an expansion of this program unless substantial improvements are made in the organization and administration of the program, as well as in the formula which is responsible for the selection of projects for funding. I feel that many of the problems could have been avoided, for instance, had there been more than one man to address concerns, disseminate information, and give advice to all New York State residents with regard to the program.

Western New York is experiencing a severe economic depression, and there are certainly many ways in which Federal funds can be used to redress this situation. However, when funds are appropriated to create jobs whose end products are not given proper consideration, this is an irresponsible, unproductive, and wasteful expenditure. Such was the case of the infamous wall built around the Millard Fillmore monument in downtown Buffalo with EDA funds, and I refuse to support this type of misdirected solution to our economic problems.

I have advised Assistant Secretary Eden of my displeasure with the overall results of the public works program, and I would strongly suggest that a thorough review and revision is conducted before we begin to consider any type of expansion of the program.

I want to call your attention to an editorial which was published in the Buffalo Evening News on January 8, expressing deep concern over the effectiveness of the formula used in the public works program. This article calls for an adjustment in that formula which would permit a greater percentage of funds to flow into areas with unemployment rates above the national average. In light of the nature and purpose of the public works program, I commend this suggestion to you as worthy of your serious consideration:

FLAWS IN JOBS AID

Many city officials around the country, including Mayor Makowski and others here in Buffalo, are complaining about the way Washington is allocating emergency public-works funds designed to create jobs in high-unemployment areas. Their protests are both understandable and justified.

Unfortunately, they were also predictable, because the distribution formulas written into the law by Congress last fall were seriously defective.

The burden of the grumbles from local officials is that high-unemployment areas like Buffalo are receiving inadequate help while other areas of the country in far better shape economically are receiving more money than they need.

Part of the allocation problem may rest with the Commerce Department in handling the applications. But Commerce must follow mandates put in the law by Congress, and Congress required that a full 30 per cent of the total $2 billion available in emergency funds must go to localities with jobless rates below the national average, now about 8 per cent. Why so? It seems clear that a major reason was to win a majority of votes on Capitol Hill for the program in an election year.

The incoming Democratic majority leader of the House, Rep. Jim Wright (who comes from the booming sunbelt state of Texas, by the way), now talks of doubling to $4 billion the funds for this program. Presumably, that would give added money to cities like Buffalo.

But a more equitable approach—both in terms of the taxpaying public and the impact of the aid—would be to modify the allocation formulas so that all of whatever emergency jobs money becomes available would at least go to localities with jobless rates above the national average.

There has been much talk about the desirability of adjusting federal formulas to help economically depressed areas, particularly in the northeast. This is one specific

formula that could and should be improved to promote that goal.

Mr. WHALEN. Mr. Speaker, I am pleased to join over 200 of my colleagues in introducing legislation to increase appropriations for the Public Works Capital Development and Investment Act from $2 billion to $6 billion. Permit me to share with you my reasons for doing so.

First, one of the major priorities of the new Congress must be to put Americans back to work. Unemployment now has soared to 7.9 percent. The Nation last year spent $19 billion on unemployment compensation, and every month 200,000 more workers are exhausting their entitlements. This bill, H.R. 59, authorizes less than one-third of the amount now spent on unemployment compensation for the creation of 600,000 new jobs. While this measure alone will not completely remedy the prospect of continued high unemployment, it can serve as the linchpin of a comprehensive effort to deal with this problem. This opportunity must not be missed.

Second, H.R. 59 will benefit both the public and private sectors of our economy. Approximately 80 percent of the jobs generated will be in the private realm. About 150,000 jobs will be created in the construction industry, which, nationwide, is now experiencing a 20- to 40-percent unemployment rate. Studies show that each on-site job will create an additional, related, off-site job. The net stimulative impact will not end here, but will extend to industries ranging across the entire economy. Also, these construction projects include roads, courthouses, schools, libraries, and parks. Thus, taxpayers will realize a substantial public service return on their tax dollars.

Third, response to the initial jobs program has been overwhelming, which indicates a great need for additional funding. Within 60 days of enactment of the legislation authorizing $2 billion for this program, applications totaling some $24 billion for local projects had been received. These applications—12 times the number which could be accommodated—ran the gamut from schools, playgrounds, libraries, and recreational facilities to sewer and waterlines and plants. Prompt enactment of H.R. 59 will permit the Economic Development Administration immediately to release additional funds to begin work on hundreds of local construction projects for which applications already are on file.

The House leadership and many members of the Public Works Committee have pledged to secure early enactment of this legislation and are already moving decisively in this direction. I commend these efforts and join my colleagues in urging rapid advancement of this bill in order to reduce unemployment as quickly as possible.

Mr. MOFFETT. Mr. Speaker, probably the most valuable lesson of this first round of Public Works Act funding is this: Our towns, our cities, our school districts are overflowing with vital and important public works ideas.

Thousands of major, worthwhile community service projects are on the drawing boards of our country—at the very same time 8 million skilled and employable men and women are begging for meaningful jobs.

Our communities need an equitable refunding of this important legislation.

In my own district, towns of brutally high and chronic unemployment—Enfield, New Britain, Winsted, and Southington, to name just a few—received no money at all under the first funding of this act. I intend to work hard with them and with Mr. ROBERT ROE's distinguished subcommittee to give these towns' projects a second chance.

Our unemployed need these jobs. Our communities need these resources.

Mr. HAMMERSCHMIDT. Mr. Speaker, during the 94th Congress in direct response to the high national unemployment rate, the Public Works Employment Act was enacted. The first title of this act authorized $2 billion for the construction of public works facilities in local communities. The Economic Development Administration within the Department of Commerce was delegated the responsibility of accepting and selecting projects for the $2 billion. The response to this program was phenomenal. More than 25,000 applications were received from throughout the country totaling more than $24 billion. Last December 23 the EDA announced its final screening which eliminated all but 2,000 applications; those, when final grants are made, will deplete the authorized funds.

I know that since that time Members of Congress have been bombarded with calls from their constituents. I sense interest among my colleagues is extremely high in both the allocation process and the possibility of extending and continuing the Local Public Works Capital Development and Investment Act. In view of this interest, I thought it might be helpful to review some of the basic tenets of the legislation and to expound on the selection process used by EDA.

The clearly expressed intent of Congress was that this legislation should provide jobs, stimulate the construction industry where unemployment was twice that of the national unemployment rate, and provide funds to local communities to build needed facilities. To insure that funds were targeted to areas with the greatest need, the law stipulated that 70 percent of all funds must go to the areas having unemployment in excess of the national average and 30 percent of the funds would go to areas having unemployment rates in excess of 6.5 percent but less than the national areas. In addition, such provisions were to insure that no areas of the country were totally excluded from the benefits. Based on this legislation, EDA regulations outlined a project ranking procedure in an effort to see that all applications were treated equitably and reviewed as thoroughly and quickly as possible.

All projects were ranked within each State and priority category. Projects were evaluated as follows:

Thirty percent on the number of unemployed people in the project area;

Thirty percent on the labor intensity of the project—this being the relation of the labor costs or man-months of employment to the total project cost;

Twenty-five percent on the overall unemployment rate in the area; and

Fifteen percent on the level of per capita income.

In addition, bonus points were given to projects providing long-term benefits, projects of local government, and projects relating to overall existing plans or programs. The number of unemployed persons and the rate of unemployment were obtained from the most recent 3 months for which unemployment data was available. In this round of funding State and local statistics, which were supplied by the Bureau of Labor Statistics, were for the months of April, May, and June. In cases where State or local governments supplied their own unemployment data, more recent figures were available in some cases. Using this criteria, projects receiving the highest score in each State and priority category were selected.

My inquiries of EDA officials and my conversations with local officials have indicated that the projects on the final screening list were worthwhile projects. Many of these projects will be constructed in areas having unemployment percentage rates in the teens. As a result of these funds, hospitals, schools, streets, water systems, and industrial parks will be constructed in communities throughout the country. Thousands of jobs will be created.

On the other hand, a large number of worthwhile projects will not receive funds. This certainly does not imply that these projects do not have merit and are not sorely needed in the communities. The fact is simply that there were $24 billion worth of applications bidding for $2 billion in available funds.

I want to commend the officials of the EDA on their outstanding handling of this tough assignment. The law required that they develop rules and guidelines within 30 days of enactment. It required that a decision on applications be made within 60 days. Against nearly insurmountable odds, they did this. I believe that the guidelines and procedures followed by EDA were a sincere and honest interpretation of the law. I do not mean to imply that the legislation is without fault. There may be need for certain legislative refinements.

We now have an opportunity to look at this program in operation and to examine the projects selected in the first round of funding. I feel it is essential that we take advantage of this opportunity to assess the program and to examine the factors used in the selection process. Certainly it is important that we evaluate the relationship of the factors to the legislative intent of this program. It is important we assess whether there is a need to alter the legislation because in practice the selection process resulted in different choices than we anticipated when the legislation was developed.

I am certain you, my colleagues, are aware that legislation has been introduced to provide additional funds for

this program. It already has a large number of sponsors in the House and interest in continuing this program is high. I support the continuation of this program because I feel there are a number of worthwhile projects which vitally need these funds. Unemployment is still too high and I believe the concept of public works employment is an important economic stimulus. However, I feel it is equally important that we not become so enthralled with providing funds immediately that we fail to take the thorough look at this program which it deserves.

As the ranking minority member of the Economic Development Subcommittee of the Public Works and Transportation Committee, which has jurisdiction over this program, I am committed to examining this program in hearings which the subcommittee anticipates holding later this month. Certainly I would welcome any comments and observations from my colleagues on this matter. I am also including other summary data developed from the public works program that might also be of interest to my colleagues:

SUMMARY DATA FOR LPW

Project volume	Number of projects	LPW dollars
Selected projects	1,988	$1,955,406,642
(Average dollar size)		(983,605)
Nonselected projects which were scored	19,768	17,958,879,793
Total	21,756	19,914,286,435

Project volume	Number of projects	LPW dollars
Economic distress factors for the selected projects:	Average	Median
Unemployment rate (percent)[1]	12.29	9.30
Number of unemployed in project area	38,239	6,810
Per capita income	$3,232	$3,379
Labor intensity (percent)	41.89	40.35
Estimated total number of jobs on selected projects as estimated by the applicants	141,882	

	Number of projects (percent)	LPW dollars (percent)
SMSA/non-SMSA breakdown of selected projects:		
SMSA[2]	54	65
Non-SMSA	46	35

[1] Average unemployment rate for 70-percent areas is 14.9 percent and 7.27 percent for the 30 percent areas.
[2] 67 percent of LPW dollars placed in SMSAs are the projects for which cities were applicants.

SCORED SELECTED LPW PROJECTS

Project type	Number of projects	Percent of total	LPW funds	Percent of total
Public safety	133	6.7	97,691,176	5.0
Hospitals	49	2.5	62,365,658	3.2
Schools	268	13.5	372,846,575	19.1
Recreational buildings and parks	94	4.7	78,771,824	4.0
Other public buildings	469	23.6	481,112,645	24.6
Industrial development	47	2.3	50,225,560	2.6
Miscellaneous or multiple buildings	88	4.4	91,378,624	4.7
Water/sewer/drainage	475	23.9	405,664,549	20.7
Streets/roads/bridges	224	11.3	179,228,619	9.2
Miscellaneous or multiple civil works	123	6.2	119,354,303	6.1
Miscellaneous or multiple facilities not elsewhere classified	18	.9	16,767,109	.8
Total	1,988	100.0	1,955,406,642	100.0

SCORED NONSELECTED LPW PROJECTS

Project type	Number of projects	Percent of total	LPW funds	Percent of total
Public safety	896	4.5	697,824,309	3.9
Hospitals	400	2.2	471,491,081	2.6
Schools	2,650	13.4	3,397,781,068	18.9
Recreational buildings and parks	1,930	9.8	1,515,343,082	8.4
Other public buildings	3,446	17.4	3,113,115,999	17.3
Industrial development	398	2.0	414,789,476	2,3
Miscellaneous and multiple buildings	792	4.0	658,881,512	3.6
Water/sewer/drainage	4,522	22.9	3,963,692,655	22.0
Streets/roads/bridges	2,825	14.3	2,044,356,976	11.4
Miscellaneous or multiple civil works	1,312	6.6	1,194,981,557	6.6
Miscellaneous or multiple facilities not elsewhere classified	597	3.0	486,612,178	2.7
Total	19,768	100.0	17,958,879,793	100.0

LPW PROJECT CLASSIFICATIONS

Public safety facility: Includes police stations, fire stations, rescue stations, jails, prisons, and detention facilities.

Hospitals: Includes hospitals, clinics, nursing homes, health centers, sanatoria, etc.

Schools: Includes schools and other learning and/or training facilities.

Recreational buildings and parks: Includes arenas, stadiums, auditoriums, gymnasia, swimming pools, other recreational buildings, park development, etc.

Other public buildings: Includes municipal office buildings, town halls, courthouses, multifunction municipal office buildings, community centers, social service centers, libraries, museums, cultural centers, terminal buildings (air, water, or rail), garages, parking structures, historic buildings, etc.

Industrial development: Includes factories, canneries, processing plants, shell buildings, warehouses, marketing facilities, port or harbor facilities, aquaculture facilities, industrial or commercial site development, etc.

Miscellaneous or multiple buildings: Includes projects involving more than one type of structure and buildings not classified above, e.g., electric power plants, dwelling units (houses and apartments), etc.

Water/sewer/drainage: Includes water and sewer lines and systems, water source development (excluding dams), storm drains, drainage ditches, canals, aquaducts etc.

Streets/roads/bridges: Includes streets, roads, highways, sidewalks, curbs, gutters, bridges, parking lots, etc.

Multiple or miscellaneous civil works facilities: Includes projects involving more than one type of civil works facility and facilities not classifiable under one of the preceding two categories, e.g., dams, fences, etc.

Multiple or miscellaneous projects not elsewhere classified: Includes projects involving more than one class of activity, e.g., buildings and utilities and projects not classifiable into one of the above categories, e.g., right-of-way clearance, landscaping, Indian Action Teams, etc.

Mr. MINISH. Mr. Speaker, I want to commend the gentleman from New York (Mr. CONABLE) for scheduling this special order today to discuss the Public Works Employment Act.

I share, with the gentleman and others who have spoken, serious misgivings about the manner in which this most important program has been administered by the Economic Development Administration.

First, however, let me make it clear that I support the basic goals of the program as passed by Congress last year: to reduce our tragically high jobless rate by putting people to work in useful public works positions. In fact, I cosponsored that legislation and have also joined in sponsorship of the bill introduced last week to increase the funding available for this program. However, EDA's handling of the program clearly leaves much to be desired.

While a small number of worthwhile projects were funded by EDA in the northern New Jersey metropolitan area, many more well-qualified and deserving applications were rejected in apparent disregard of the selection criteria specified by the Congress.

The law directs the Economic Development Administration to give priority to areas of high unemployment. Essex County, N.J., and the surrounding counties have a jobless rate in excess of 10 percent even excluding the very high rate of the city of Newark. Furthermore this grave situation has prevailed for a great number of years.

It is therefore incredible to me that so few applications from suburban Essex and other nearby counties were approved. If the bureaucrats in EDA were really living within the intent of the law as written by Congress, it is apparent that a great deal more money would have been accorded to this area.

I urge the House Public Works Committee, which shortly will be examining this program and the legislation to increase its funding, to give the highest priority to a thorough reexamination of the language of the statute in order to remove any flexibility which presently exists for EDA to interpret the law to the detriment of deserving communities.

Mr. McCLORY. Mr. Speaker, I am pleased to take part in this discussion initiated by the distinguished gentleman from New York (Mr. CONABLE).

Mr. Speaker, I take these few moments to express the view that the Economic Development Administration—EDA—did an excellent job of administering the public works employment program funding. They followed the letter of the law and the intent of Congress by using a well-considered formula of criteria in scoring and making their selections. I worked closely with EDA in supporting projects for my district and was amazed at the remarkable courtesy and efficiency

they continually displayed considering the tremendous time pressure under which they were working. In fact, would that all agencies of the bureaucracy did half as well.

I will try to explain some of the problems they faced.

It was the intent of Congress to show that a Government agency can act quickly and that it does not take 2 or 3 years from the date of application for funded projects to get underway. For that reason Congress mandated that the projects be selected within 60 days and be underway within 90 days, giving a time period of approximately 5 months between submission of applications and the beginning of actual work on the projects—an unprecedented feat.

The EDA, with only approximately 750 employees, has proved that projects can be selected in a short period of time. However, given this time pressure they were forced to use a point system rather than judgmental evaluation in selection of projects to be funded. I have been assured by EDA officials that had they had more time in which to make selections they could have done an even better job.

Other problems were caused by the 70–30 ratio. I understand that with the best of intentions Congress mandated that 70 percent of the money go to areas with unemployment rates above the national average and 30 percent go to areas at or below the national average of unemployment. However, this meant that some projects in the 70-percent areas which scored higher could not be funded because a certain amount had to be reserved for the 30 percent areas.

Also, according to the intent of Congress EDA had to be careful not to have undue concentration of funds. For instance, if there had been no restrictions all of the available money could have gone to a single city or one area within a State. In order to prevent this and to insure that some money went to rural areas, EDA compared projects within a geographical area of a State and selected the top scoring projects until the percentage of money allowed for that area had been exhausted. The result was that a number of excellent projects were not selected simply because they may have scored one or two points lower than the few projects which could be funded in that area.

I hope this brief description of the magnitude of the problems faced by EDA, a very small agency, will convince you, as it does me, that the Economic Development Administration did a magnificent job in administering this program according to the mandate of Congress.

With this in mind, and considering that if there is any fault with this program it lies in the difference between the demand for the money and the supply of money as well as the excessive speed with which the EDA was required to carry out the program, I urge that at least some additional funding may be set aside for a continuation of the public works employment program. This is one way in which a Federal program may help overcome unemployment and give a boost to the economy.

Mr. Speaker, within the limits of its authority and resources the Assistant Secretary of Commerce for Economic Development, John W. Eden, and his associates at EDA have performed an urgent and demanding task in a most commendable manner.

Mr. MOTTL. Mr. Speaker, I wish to join with the gentleman from New York (Mr. CONABLE) in expressing my distress over the grant announcements made by the Economic Development Administration under the Public Works Employment Act of 1976.

Title I of the Public Works Employment Act was clearly intended to provide assistance to State and local governments in alleviating high unemployment. Yet, the areas of highest unemployment in the State of Ohio, and the most populous areas, received only a small fraction of the grants announced by the EDA. The Northeast Ohio Areawide Coordinating Agency and numerous public officials have publicly protested the pattern of distribution of these funds.

Forty-eight Members of Congress, including myself, have requested an immediate investigation of the entire process of allocating these funds by the Comptroller General. I feel it would appropriate to fully review the present program before plunging ahead with an extension of the Public Works Employment Act.

Mr. MITCHELL of New York. Mr. Speaker, I welcome the opportunity to participate in this special order because I share your interest in the important subject under discussion. I have devoted a considerable amount of time to a study of this matter and have put together a special report which I am making available to local government officials, the media and other interested parties in an effort to bring the people I represent up to date on developments.

PUBLIC WORKS EMPLOYMENT ACT OF 1976: FUNDING UNDER TITLE I, A SPECIAL REPORT BY REPRESENTATIVE DONALD J. MITCHELL

The widespread dissatisfaction with the designation of projects for funding under title I of the Public Works Employment Act of 1976 prompts this special report. I thought you might want a status report on where we are and where we are likely to be going with this program as it relates to our area.

Here is the situation as I see it.

A majority of Congressmen are unhappy. As soon as the December 23d Federal Register containing the Economic Development Administration's list of "proposed projects selected for funding" was published there was what could best be described as a national uproar.

Colleagues from across the country—senior members and freshmen, Republican and Democrat alike—joined me in complaining about the unfair and inequitable distribution of funds. The National League of Cities put out a strong statement of disapproval. Mayors from cities of high unemployment, including Jersey City, 11.04 percent; Miami, 12.1 percent; San Juan, 13.9 percent; Sacramento, 10.3 percent; and Pittsburgh, 9.1 percent, protested and with good reason. They got nothing.

Closer to home, our fate was similar. Not a penny of the millions reserved for areas with an unemployment rate above the national average was approved for the depressed Mohawk Valley area.[1] Our neighbors to the east and west, Albany and Syracuse, also drew a blank. They got nothing.

Under provisions of the act reserving funds for areas with an unemployment rate between 6.5 percent and the national average, we came out in better shape. Four separate projects totaling nearly $2 million were approved for a new Herkimer County Jail, an addition to the Otsego County Jail, a new fire hall for the town of Dukanesburg in Schenectady County and an addition to the Worcester Central School in Otsego County.

But of the 70 percent of the act's allocation for areas with an unemployment rate higher than the national average, we did not get one project.[1]

A lot of questions are being asked in an effort to determine the "why?" After all, the legislation was designed to pump dollars for worthy public works projects into areas of high unemployment—like ours—to create jobs immediately. How could there be so many voids all across the country? In Rome, Utica and Johnstown-Gloversville? In Jersey City and Pittsburgh? Even in the President's home town, Grand Rapids, Mich.? All with unemployment rates above the national average.

My immediate reaction on December 23d was to call for a halt to the further processing of all applications until we could get some answers. I took several actions on that date. A telegram was dispatched—after repeated telephone calls got a busy signal—to Assistant Secretary of Commerce John Eden requesting the processing halt pending the completion of an immediate investigation by the House and Senate committees having jurisdiction over the program's authorization. I asked for that investigation in telegrams sent to the chairmen of the committees.

I then contacted the General Accounting Office, the investigative arm of Congress, to request an independent audit of the procedures used by EDA to select projects for funding.

The next day I sent a letter to every Member of the House and Senate outlining my dissatisfaction with the program, reporting on the steps I had taken and enlisting additional support for the cause. I received a number of favorable responses and quickly learned the dissatisfaction was widespread, prompting many of my colleagues to respond exactly as I did—calling for a halt in the program pending an investigation.

Additionally I called the White House to register my complaints. I talked with

[1] Little Falls project not in original announcement. Our investigation uncovered error in EDA computation. EDA has acknowledged error and is taking corrective action.

the President's principal legislative liaison person and the Deputy Director of the Domestic Council—the Director was out of town attending a funeral.

At this point, grant announcements are being made daily. It looks like the House and Senate Public Works Committees will be conducting hearings shortly and the GAO is trying to determine the direction it should take with the requested investigation. EDA, mandated by Congress to move within 60 days on project applications—our goal, you will remember, was to get this money working as soon as possible so there would not be any delays in the fight to reduce unemployment—is taking a lot of "heat" from the protestors but is nevertheless continuing on course.

My candid assessment is we—Congress, National League of Cities, mayors, et cetera—would not be able to alter the course significantly on what now looks like the first round of funding under this program. However, I am hopeful that if there is an extension of the act, with more money for more projects, the ground rules will be changed to guarantee a fairer, more equitable distribution of projects and dollars.

Though the intent of the act is noble, it is necessarily one of those Government programs that overpromises and underdelivers. In our district alone, it is estimated that applications totaling more than $300 million were submitted. The entire State received an allocation of $232.9 million, so in our area we applied for more funds than were available for the entire State. Our per capita share, 1/39th of New York State, would total nearly $6 million. If we had been awarded grants totaling $6 million—even $10 million—97 percent of our congressional district applicants would have been unsuccessful and disappointed Even with a $2 billion extension of the program and even if we got $10 million the vast majority of our applications would still be unfunded.

There should be a better method for early screening so false hopes are not raised.

The House majority leader has already announced his plan to push for an extension of the act and he claims President-elect Carter will be supportive. The majority leader, Representative JIM WRIGHT of Texas, is also dissatisfied with the first round distribution but he had what appears to be the majority of House Members are concentrating on a distribution formula for future funds rather than a redistribution of existing funds under the 70-percent allocation reserved for projects in areas with unemployment above the national average.

I have already advised Majority Leader WRIGHT of my willingness to help in the development of an extended program providing we can guarantee a fair and equitable distribution formula. I have also indicated my strong support for closing the door on any new applications. It is my view that any second round of funding should be reserved for those unfunded applications now on file, and there are plenty of them from our 31st District.

My further belief is that 100 percent of the funding—not just 70 percent as in the current bill—should be devoted to projects in areas with an unemployment rate above the national average.

Right now it looks like committee hearings will commence later this month with every expectation we will have a bill on the floor for a vote in February. If all goes according to some predictions, from the majority leader and others who are in a position to influence the flow of legislation, there is a possibility a second round of funding could come as early as March.

Some people are wondering why so many Congressmen are complaining about a program they voted for.

It is not unheard of to complain about the administration of a bill. On occasion agencies fail to live up to our expectations, as is the case with the Public Works Employment Act. With grant programs, Congress outlines its goals, establishes its intent and then gives to the agency having jurisdiction for the program the authority to establish the guidelines for implementing the program. In this instance, the agency did a very poor job. It happens. The formula proposed for implementing the legislation and ranking the project applications appeared sound. It included the following factors: unemployment in numbers, unemployment rate, per capita income in project area, labor intensity of the project, long range value of the project, whether or not the proposed project was included in an area's overall economic development plan and the nature of the applicant—general purpose unit of Government or special purpose unit of Government.

EDA was given one other important tool to build a sensible program: discretionary authority. The Assistant Secretary was given this authority to prevent what Congress termed "an undue concentration of grants" in any one area. In short, we told the Secretary to use sound judgment and here is where I feel the letdown came.

I do not want to perpetuate the old upstate versus New York City battle because I think that is counterproductive as far as the entire State is concerned. Nevertheless, I must say there is no way a program can be termed fair and equitable that grants 51 separate projects costing more than $102 million to New York City and none to the depressed Mohawk Valley.[1] The Secretary should have made better use of his discretionary authority.

Of course New York City has a monumental problem with unemployment and needs help. But we also have a serious problem. We need help too. It seems to me the proper use of discretion would have resulted in a fairer distribution of projects for New York City and the upstate area.

In summary, although the first round of funding found us on the outside looking in with the 70-percent funds, there is still hope for a few of the projects from our district. It is an almost certainty there will be another round, one that will assure a fairer, more equitable distribution of funds.

A summary follows:

SUMMARY

Title I Public Works Employment Act of 1976

$2 billion allocated nationally . . . $10 million for administration, $1,990 million for grants.

$232.9 million allocated to New York State.

New York has 8.9 percent of the nation's population.

New York has 9.9 percent of the nation's unemployed.

New York got 11.7 percent of the nation's funds under Title I.

70 percent of New York's allocation ($163 million) mandated by law to go to areas with an unemployment rate above the national average for April–May–June '76 (7.5 percent).

30 percent of New York's allocation ($69.9 million) mandated by law to go to areas with an unemployment rate between 6.5 percent and the national average.

1,379 applications from New York ranked under the 70 percent category.

106 of these applications were approved.

7.7 percent approval rate.

Average project cost: $1,537,100.

31st District got one project: Little Falls (downtown development) $885,000.

261 applications from New York ranked under the 30 percent category.

75 of these applications were approved.

28.7 percent approval rate.

Average project cost: $931,600.

31st District got four projects:

Herkimer County (new jail)	$1,082,305
Duanesburg, Schenectady County (new fire hall)	387,000
Otsego County (additions and improvements to jail)	247,640
Worcester Central School, Otsego County (addition)	236,990
	$1,953,935
Total District (5 projects)	$2,838,935

From our 31st District we had: 86 ranked applications ($90,311,231 in projects) in 70 percent category; 4 ranked applications ($7,953,935 in projects) in 30 percent category.

Many more applications were submitted but were rejected for one reason or another and therefore were not ranked.

Ranking Formula (120 points maximum)

30 points—Number of unemployed (absolute numbers).

25 points—Rate of Unemployed (percentage).

30 points—Labor intensity (relation of total labor costs to total project costs, high labor costs got higher points).

15 points—Per capita income in project area.

10 points—Long term benefit of project.

5 points—Inclusion in approved Overall Economic Development Plan.

5 points—If applicant general purpose unit of government (city, county, etc.).

3 points—If applicant special purpose unit of government (agencies, etc.).

Mr. SHUSTER. Mr. Speaker, as a member of the Public Works and Transportation Committee's Economic Development Subcommittee, and author of one of the key provisions of the subcommittee's Public Works Employment Act of 1976, I was hopeful, if not optimistic, that title I could accomplish some of the goals set forth in the legislation and contribute in a measurable way to alleviating one of our Nation's major problems—unemployment in the construction industry. I supported this House initiative—even though I could not support the two Senate-originated titles that ultimately made the entire bill a political football—while expressing serious concern about insuring an equitable distribution of funds between urban and rural areas.

During the hearing conducted last fall following publication of the guidelines and regulations for implementation of title I, I voiced this concern to John W. Eden, Assistant Secretary for Economic Development. I later wrote to Mr. Eden asking for a detailed explanation of the formula that would guarantee an equitable allocation of the $2 billion in title I money. My concern grew out of the portion of the formula that counted raw numbers of unemployed as 30 percent of the basic ranking score, regardless of the

relative unemployment rate. I envisioned major urban areas, with high density unemployment, ranking consistently higher than rural areas where, while the density of unemployment may not be as great, the rates in many cases are higher and the absolute number of unemployed over a larger area may be as great or greater than the urban areas.

In each case—during the hearing, in private conversation with Mr. Eden and his staff, and in response to my letter—I was assured that the logarithmic formula designed by EDA would make possible equitable competition among project areas of all sizes and compositions. I was told that the logarithmic computation of absolute unemployment numbers would enable rural areas to compete for funding on an equal footing with high density areas.

I was skeptical, and continued my assault on the likelihood that the EDA formula would insure equitable competition between rural and urban areas. The assurances I received from EDA were persistent and intense. Then, the final selection list that appeared in the December 23, 1976, Federal Register proved conclusively that my concerns were well founded, and the constant assurances I received from EDA were hollow.

In the Commonwealth of Pennsylvania, for example, where nearly $83 million was allocated to 68 project applicants, over $60 million went to 49 applicants in areas that are urban in socioeconomic characteristics, while only 19 applicants in rural areas reecived $22.7 million in title I designations.

While defenders of the logarithmic formula might argue that the major urban areas received their fair share in terms of the proportion of absolute numbers of unemployed in those areas to State totals, I contend that the inequity lies not in what the urban areas received, but in what the rural areas, with comparable unemployment, rate, and labor force figures, did not receive. In many cases, projects in the peripheral areas around urban centers received grant approvals because, by nature of their political distinction, they were not construed to be part of the urban center to which they are inextricably married by socioeconomic factors.

To illustrate this point, I selected 12 nonurban—rural and small town/city—political subdivisions in Pennsylvania as identified in the Department of Commerce's October 18, 1976, CETA unemployment listing. For purposes of this illustration, I shall refer to this grouping as the "rural sample," but it should be understood that the sample includes such urban areas as the cities of Altoona and York, and the portion of Cumberland County comprising suburban Harrisburg. The unemployment rate, absolute members of unemployed, and labor force totals for the rural sample are in every way comparable to the cities of Pittsburgh and Philadelphia, but that comparability ends there. It does not extend to equal treatment in the allocation of funds under the so-called jobs bill, as the following table clearly illustrates:

Area	Unemployment rate	Number of unemployed	Labor force	Number of selected projects	Total project cost
Philadelphia	9.29	65,424	704,169	7	$12,942,923
Percent of State		16.5	13.8	10.3	15.6
Pittsburgh (including Allegheny County)	7.16	45,532	635,645	14	11,017,055
Percent of State		11.5	12.5	20.6	13.3
Rural sample	7.39	51,079	690,482	4	5,779,940
Percent of State		12.9	13.6	5.9	6.9
State	7.77	394,527	5,075,366	68	82,879,610
Rural (27 percent)				19	22,735,369
Urban (73 percent)				49	60,144,241

Despite the fact that the rural sample resembles Pittsburgh and Philadelphia in every economic factor, it will receive roughly half the title I benefits. Why? Because the area is primarily a low-density area that, when viewed in terms of individual political subdivisions, cannot compete with the high-density absolute unemployment figures of Pittsburgh and Philadelphia. The formula so highly touted by EDA failed miserably in living up to its advance billing as the great balancer between rural and urban areas—just as I predicted it would.

Sure, it is easy to rationalize the formula. It is easy to say that it is the best that could be had under the circumstances and with the severe time constraints imposed by the Congress. But that just does not cut it!

This program, as clearly stated in hearings and floor debate, was established to put people back to work, particularly in the construction trades where the unemployment rates have been consistently double the national average. But it was not created as a panacea for our Nation's urban ills at the expense of the jobless in rural America, as it turned out. Mr. Speaker, the hard working taxpayers of rural Americe have to eat, too—and most of them do not have the benefit of fat welfare programs that are so prevalent in our Nation's big cities.

Title I has clearly not met the objectives established by Congress; it is a blatant injustice to rural Americans and must be corrected. I do not have a magic formula, Mr. Speaker, but neither do I go around professing to have one. Instead of going ahead with a program destined for failure—and, indeed, considering expanding it—we should take a deep breath, look long and hard at the formula, and come up with a plan that will keep faith with the congressional mandate and serve in the best interests of all Americans, not just those who choose to live in big cities.

Mr. LUNDINE. Mr. Speaker, I have real concerns about the present implementation of the 1976 local public works and capital investment program. In my own congressional district, the program has been administered in such a way as to discriminate against the areas with the highest degree of unemployment. Three of the four projects which received approval were in areas in which unemployment is lower than the national average. These communities were able to compete successfully for the 30 percent of funds allocated for such situations. No grant was made to any community in which unemployment is higher than the national average, although many such communities applied. The remaining grant was to the Seneca Indian Nation, which is a special situation.

My congressional district, in the southwestern corner of New York State, is located in the Appalachian region. We have many small towns and cities with severe economic problems. These communities badly need economic and technical assistance from the Federal Government, but they were unable to compete for public works grants with more densely populated areas of New York State under the Economic Development Administration's criteria, which gave additional weighting to absolute numbers of unemployed.

I know it was not the intent of the 94th Congress to discriminate against rural areas and small cities with high unemployment. I understand the need to employ as soon as possible large numbers of people, particularly in the depressed construction industry. But I have serious reservations about a public works program which has the effect of discriminating against districts like the one I represent.

I include in the RECORD at this point a letter to Secretary Elliot Richardson expressing my disappointment with the implementation by the Department of Commerce of the local capital public works and investment program:

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 29, 1976.

Hon. ELLIOT L. RICHARDSON,
Secretary of Commerce, U.S. Department of Commerce, Wassington, D.C.

DEAR SECRETARY RICHARDSON: I was very disappointed in the proposed allocation of the Local Capital Public Works and Investment Program funds announced by the Department of Commerce last week. The formula used to determine value of specific projects became grossly unfair when applied to smaller communities in areas of high unemployment.

The outcome of the selection process published by the Economic Development Administration on December 23 creates a clear anomaly. It could not have been anyone's intention, least of all that of the program's Congressional authors, that it should be easier to get approval for job-creating projects in areas of lower unemployment than in areas with more severe employment problems. The program as it is now being implemented discriminates against those areas which have the greatest need.

My Congressional District is essentially a five county area in upstate New York located in the Appalachia region. Using my own Congressional District as an example, we find that the program has in fact given areas of low unemployment a better chance to receive aid than the areas of high unemployment. Three of the four projects in my district which received approval on December 23 qualified under the 30 per cent funding for

areas of unemployment lower than the national average. The renovation of the railroad shops in Hornell, New York will create industrial space in a community which is severely depressed and the construction of a new high school in Elmira, New York will help to absorb some of the accelerated unemployment caused by the closing of the Westinghouse plant in that community. While the few projects approved in the 39th Congressional District were of significant merit, there are many equally worthy projects in areas with high unemployment.

Unemployment rates in the labor markets during periods defined for application purposes were *below* national unemployment rates for three successful applicants in my district. At the same time, the remaining basic labor markets which showed unemployment significantly *higher* than the national average were left without a single approved project, the only exception being the extraordinary circumstances of the Seneca Indian Nation with an unemployment rate of 60 per cent.

It is apparent that low unemployment rates led to approval for my district's few successful applicants and high unemployment led to rejection for nearly 200 funding requests submitted under the 70 per cent program. It is clear that the rural areas of high unemployment could not compete with the highly urbanized, metropolitan areas of New York State. I can only conclude that the EDA criteria, which gave undue weight to absolute numbers of unemployed, have effectively precluded any rural area of high unemployment from qualifying for this public works program.

This is an absurd result. To discriminate, in effect, against those rural areas with the greatest unemployment is contrary to the purpose of the program.

I urge that you correct this inequity prior to the termination of the existing program and make correction your first priority. Uncommitted allocations and second-approvals should give special emphasis to needy rural communities where no project was approved. It is within your authority as Secretary of Commerce to rectify this imbalance. I urge you to do so.

Sincerely,

STANLEY N. LUNDINE,
Member of Congress.

Mr. Speaker, I earnestly hope that the inequities in allocations under the current program can be rectified and that the Congress will take steps to assure that such a situation does not recur in the future.

Mr. LAFALCE. Mr. Speaker, I am joining today with a number of my colleagues to discuss the implementation of the Local Public Works Employment Act of 1976 because I firmly believe we can and should do better than we did last year in dealing with the Nation's serious unemployment problems.

Any program which has $2 billion to distribute and applicants seeking $24 billion is bound to cause disappointment. But this one was exceptional in that regard, for reasons which I attribute to the selection process used by the Economic Development Administration.

Yesterday I learned that the General Accounting Office will be looking into that process, seeking to determine exactly what EDA did, what it did not do, and why decisions were made in the way they were. Perhaps the result will help to explain some of the apparent inequities which took place in the distribution of the funds.

I also understand that the Economic Development Subcommittee of the Public Works and Transportation Committee will be holding hearings on possible extensions of this program in the near future, and I hope that the kind of questions which the GAO will be looking into will also be a major focus of the hearings.

These remarks are not intended, however, simply to criticize the past. I feel very strongly that the problems we have seen in the implementation of the program we created last year are ones from which we can learn. It is essential that we do so and that any public works legislation we enact this year seek to eliminate, or at least reduce significantly, those problems.

The goal of the program was to create jobs, particularly in the construction industry where unemployment in many areas, including my district in western New York, is far greater than in the work force as a whole. Jobs can come through a specific public works program like the one we enacted last year, but they could also come through a supplemental community development program, aimed at high unemployment areas, which is oriented toward physical development activities. Indeed, the leverage from that approach might be quite a bit higher than through a program like last year's, thus creating more jobs.

The program could be on a project-by-project basis, like last year's was. But it does not have to be. It could, instead, be on a formula basis, assuring every community with a given rate of unemployment that it would get at least some of the funds. We would have to stipulate that projects undertaken with funds allocated according to a formula would start quickly, would be labor intensive, and would be for physical development activities rather than public service jobs. But that can be handled, among other ways by making each community's plans subject to executive approval and monitoring. This approach would resolve the inequity problem and could be designed to provide proportionately more funds to those communities which have borne more than their fair share of the unemployment burden. It could recognize that local governments which have high rates of unemployment suffer themselves and deserve consideration in the allocation of the funds. Last year's program, whether or not intended, made no such recognition.

We are not limited to a choice among Federal agencies to administer a program of this kind. Last year, of course, we entrusted the implementation of the program exclusively to the Department of Commerce's Economic Development Administration. Perhaps we should give consideration to charging the President with administering the jobs program, permitting him to draw upon the expertise in all parts of the Government in distributing the funds in the most equitable and efficient way.

None of these options and ideas are necessarily the only way to proceed, nor the best way to proceed. All have good and bad points. But the main point, Mr. Speaker, is that they all warrant detailed consideration before we proceed to authorize large public works program. We owe that to ourselves, but much more than that, we owe it to our local governments, to the millions of unemployed Americans, and to the taxpayers.

This week I prepared a column, which appears in 12 of the newspapers in my congressional district, giving my reaction to this very subject. At this time, Mr. Speaker, I would like to submit that column for the RECORD:

CONTROVERSY OVER PUBLIC WORKS

On January 4th the 95th Congress was sworn in, and on January 20th President-elect Carter will assume office. Our nation's well being and the hoped-for revival of our economy will depend, in part, on the quality of the decisions made by the Congress and the Administration, but perhaps more importantly, on the manner in which those decisions are implemented.

A recent example reflects this vividly. I refer to the allocation of funds under the $2 billion local public works program. Here was a program which was created with excellent intentions, but which was not adequately thought through when enacted by Congress, and was then implemented sloppily, to put it in the most charitable terms.

Since serious consideration is being given to extending this program (or something similar) in the coming months, I'd like to review what transpired and reflect on options for the future.

The 1976 public works program was enacted in order to put construction workers back on the job—a laudable goal which I wholeheartedly support, inasmuch as that industry has borne far more than its fair share of the unemployment burdens.

But inadequate attention was paid to the way in which the funds would be distributed. In effect, Congress gave the Department of Commerce's Economic Development Administration a blank check for $2 billion and told EDA to distribute the funds, something the EDA did under very vague guidelines, and with the assistance of an "all-knowing" computer.

The EDA is an undermanned agency which has suffered from a number of attempts by the Nixon and Ford Administrations to eliminate it. It was hardly in a position to make detailed judgements about proposed public works projects throughout the country, priority decisions which are far better left to local governments in any event. This was a point I raised on the floor of the House during debate on the bill. And as I recall, I was alone in worrying about the ability of EDA to handle the distribution equitably.

From the perspective of unemployed construction workers in Western New York, the system worked reasonably well. The State's total allocation of $232 million, if divided equally into the 39 congressional districts in New York, would have resulted in an average of under $6 million per district. That is what we could have reasonably expected to receive. In fact, our congressional district received nearly double that.

But our success was overshadowed by the implementation of the program. The needs, as expressed in the volume of applications, far exceeded the available funds. Nationally, it was 12 times greater; in Western New York, the ratio was even higher.

In short, the dynamics of the program resulted in a situation where 1 out of every 12 applicants was pleased, and 11 out of every 12 applicants were guaranteed to be disappointed.

I pointed this out to the applicants in our district prior to the announcement of the projects selected for funding. And previously, I had written and called the EDA urging a change in the regulations in favor of a

more equitable distribution system. But still, the public works program was in trouble, for overly-optimistic. Despite my effort to warn the applicants, I have heard from many of them and their messages have ranged from disappointment (which I understand and share) to irresponsible accusation of neglect and punishment.

From the perspective of our total district, we did quite well. But naturally, given the 1 out of 12 ratio, most applicants were disappointed and they are expressing it loudly. Interestingly, my conversations with Congressmen from all over the country indicate that almost none did as well as we. For example, over one-half of those cities in the entire United States with populations over 100,000 received no money.

It's also interesting to note the various charges that are being leveled. Small communities are claiming that big cities got all the money; and the League of Cities is claiming that small communities got the bulk of the funds.

While no Congressmen were involved in the EDA's selection of projects to be assisted under this program, I fully understand and sympathize with the expressions of disappointment from communities which were not on the list of those selected. But it does little good to yell or shout about our disappointment willy-nilly; it does little good to ignorantly and falsely assess blame especially when there is no merit whatsoever to such accusations. It does great good, however, to ask questions about the EDA formula and decisionmaking process, for this allocation process must be rectified if additional economic stimulation through public works is going to be considered. We are seeking answers in this area. Along with a number of other Congressmen I am requesting that the General Accounting Office conduct an investigation of the methods which EDA used in the allocation process.

In addition, last year I sponsored an alternative to the public works program—one which would have directed the funds on a formula basis to each and every community with unemployment at a rate of 8 percent or more, the very communities that need assistance the most. They would have all received a fair share of the funding, and spending decisions and priorities would have been made by local officials.

That proposal passed the House of Representatives in 1976 and was dropped by a margin of only one vote in the Conference Committee with the Senate. In my judgment, it remains a far better approach. I intend to revise it and reintroduce it this year, in hopes that the concepts of formula funding and local decisionmaking will be incorporated in any new public works or community development jobs program.

With those concepts, the kind of rancor and disappointment we have seen in the past few weeks could have been avoided. We should learn from the mistakes of the past and I intend to do all I can to point out those mistakes—both legislative and administrative—and help find better, wiser methods for our economic future.

Mr. BAFALIS. Mr. Speaker, my colleagues in the Congress know me as a strong fiscal conservative. I am an advocate of a balanced Federal budget and have consistently opposed massive Federal spending programs that only further add to the debt we are now carrying.

Usually, I would have opposed a program with a price tag of the public works jobs bill without a second thought. However, after careful study, I determined that the purpose of the bill—to put people in areas of high unemployment back to work in building projects that are direly needed by local governments—justified the price tag. I joined in support of this spending bill because I felt its purpose was a good one and that the tax dollars involved would be well spent for needed public projects.

So now, after the implementation of this legislation, where are we? A quick survey of some facts as they relate to Florida might help us get a better view of how far the implementation of this legislation has strayed from its original intent.

The State of Florida was allocated $135 million under this program. Applications were made by over 1,000 local and county government units for participation in the program knowing full well that the main criteria was the unemployment level in the areas involved.

So let's look at the final determinations of the Economic Development Administration to see how our legislation was handled.

We see that Leon County-Tallahassee was given a $3.2 million grant to build a civic center.

We see that the city of Gainesville was approved for three separate projects totaling $3.9 million.

And we see that of the 13 full counties in my congressional district, only two received moneys—Lee and Osceola. With over 10 percent of the State's population, we received less than 4 percent of the moneys involved.

All well and good, you might say, since each application was considered on the same scale with the unemployment in the area being the overriding consideration.

Not so if one takes the time to research the facts in the matter.

In applying for this program, the local governments were to use their unemployment figures for the months of May, June, and July of 1976. The figures I will cite are not seasonally adjusted.

Upon checking with the Department of Labor, I found that the unemployment statistics for Leon County were as follows: May, 4.4 percent; June, 5.5 percent; July, 5.3 percent.

The Department of Labor gave me the following statistics for Alachua County, where Gainesville is located: May, 6.9 percent; June, 7 percent; July, 6.7 percent.

Now let us see how these compare with some of the counties in my district which applied for funds and were turned down since their applications apparently did not exhibit as strong a need as Leon and Allachua.

St. Lucie County reported statistics as follows: May, 11.4 percent; June, 13 percent; July, 12.9 percent.

Collier County figures according to the Department of Labor were: May, 11.4 percent; June, 13.2 percent; July, 13.3 percent.

Indian River County figures as recorded at Labor were as follows: May, 9 percent; June, 12.4 percent; July, 13.4 percent.

Now let us compare all these to the national figures for the same three months: May, 6.7 percent; June, 8 percent; July, 7.8 percent.

Ones does not have to be a mathematician to see that something is terribly wrong.

For example, at no time did the unemployment rate in Leon County exceed the national average—in fact, it was at least 2 percent lower or 30 percent under the national average.

Only 1 month found Allachua County exceeding the national average and then by only 2 percent. The other months found Allachua far below the national averages.

On the other hand, several of the figures from my district were twice the national average. Obviously there was severe unemployment in these areas and a dire need to get people back to work. But their applications were not approved.

However, the fine formula used by EDA to implement our emergency public works jobs program apparently overlooked this major factor.

Please do not feel that this is sour grapes. If we had enacted a program that gave each county in the Nation a chance to compete for Federal moneys for much needed public works projects, I would say more power to Leon and Allachua.

But that was not the program we enacted and I can guarantee you that a vast number of the Congressmen and women who supported this employment legislation would not have supported a massive Federal giveaway. We simply do not have the moneys available to justify it. But if it was getting people back to work, that is another story.

I am sure that other Congressmen can tell similar stories. Something has to be done. I, for one, cannot support any type of extension of this program if this is the way the agency is going to overlook congressional intent.

And, I, for one, think that a thorough investigation of the procedures and final determinations by the EDA must be conducted before any of these moneys are allocated to the governments involved.

We must act now to protect the congressional intent of this major spending program.

Mr. YOUNG of Florida. Mr. Speaker, I am pleased to join my colleague from New York (Mr. CONABLE) in suggesting to you that the Public Works Capital Development and Investment Act appears to have created an extremely inequitable situation for communities such as those in my district of Florida. Communities in Florida with high unemployment rates did not receive adequate relief, while communities in other parts of Florida, with unemployment rates below the national average seem to have done very well.

The injustice was caused by legislation enacted by the Congress, which provided that 70 percent of the money available would go to areas where unemployment was above the national average, while 30 percent would be reserved for those areas with unemployment rates below the national average. More communities applied for funds in the first category, and according to Economic Development Administration figures, only 9 percent of the Florida projects in this category were approved. The applications for funds in the second category were far lighter, and 66 percent of those applications won approval.

The situation was so inequitable that

it appears that one of the communities in my county would have been better off by exercising the option of using its own unemployment rate, which is below the national average, rather than the county rate which is above. The city of Clearwater received none of the money that it applied for using the higher rate. However, had Clearwater used its city unemployment rate, it would have fallen into the 30 percent category, and according to information provided by EDA, probably would have received enough money for all or most of its projects.

I have been informed today, by the distinguished Speaker, Mr. O'NEILL, that he has been in contact with the members of the Public Works Committee, and that he has been assured that that committee, in any program to disburse additional funds under the Public Works Capital Development and Investment Act, will rewrite the formula so as to assure greater distribution to areas of higher unemployment.

Mr. BENJAMIN. Mr. Speaker, I wish to commend my colleague from New York for bringing the problem of nullification of congressional intent by agency creation of rules and regulations to the House's attention.

It appears, from the discussion I have had with the officials of the communities I represent, along with the remarks made in this Chamber today, that the rules and regulations promulgated by the Economic Development Administration for the implementation of the Local Public Works Capital Development and Investment Act of 1976, have failed in several respects to carry out the intent of the Congress in passing that act. These failures are:

First, the definition of project areas and the time continuum for obtaining funds under the act are overly broad and have led to the manipulation of statistics by certain communities in order to obtain grants even though others may be in greater need. This has caused a situation to develop in which one community will make multiple applications using different data in each, depending on which set of figures seems to be of greatest use to them at the moment.

Second, the criterion for State allocations also allowed for wide discretion in the funding levels per State.

Third, the Administration appeared to pay little heed to the order of priorities set by local officials.

Fourth, because of the ability to manipulate project areas, municipalities which I would term "intermediate in size" were caught in trying to decide whether to concentrate on obtaining a 70- or 30-percent fund.

Fifth, local officials were embittered because of the lack of uniform standards and were distressed by regulations which were overly broad and vague.

In considering any new spending proposals under the act, the Congress must examine, in detail, the rules and regulations promulgated by the Economic Development Administration. It must make the necessary changes in order that the problems I and others have described, are not repeated in the future.

Too often, Congress has abdicated its legislative function to a particular agency, only to have the intent of its action later nullified.

We must not allow this to happen again, especially when we are addressing ourselves to the matter of unemployment.

We must insure that the purpose behind the act, the creation of needed employment coupled with the improvement of the capital facilities of our various communities is carried out pursuant to the intent of Congress without modification by the Economic Development Administration.

I have indicated to the distinguished majority leader that I will cosponsor one of the bills increasing the authorization of the 1976 act to $6 billion. I have determined that the increased authorization and subsequent appropriation is not only vital to the Nation's economy, but is crucial to the State of Indiana and my district. The unemployed and underemployed citizens of the First District and I call upon my colleagues to consider the foregoing instructional views along with the concerns expressed by others today to make the Local Public Works Capital Development and Investment Act of 1976, a viable economic tool for its immediate favorable economic impact as well as for the needed capital improvements indispensable to the future of our great country. I, for one, stand ready to assist in this important effort.

Mr. RINALDO. Mr. Speaker, public works funding has proved its worth as a fast and effective way to stimulate the Nation's economy. The allocation last month of $2 billion in grants under the Public Works Employment Act of 1976 will be translated within a matter of months into hundreds of thousands of new jobs. Americans in high unemployment areas will be taken off the jobless rolls and put to work as tax-producing citizens. In turn, the whole economy, locally and nationally, will benefit.

But we have seen, Mr. Speaker, that there are a great many more valid public works programs on the books than could be funded through the $2 billion authorization. In fact, 25,000 applications for a total of $24 billion were submitted.

Many badly needed programs that would be of lasting value narrowly missed qualifying for grants. By making an additional $4 billion available, as proposed in a bill sponsored by my colleague from New Jersey, Congress would provide one of the swiftest economic stimulants possible. As a cosponsor of this bill, I urge its early enactment into law.

Any extension or expansion of the public works program must recognize from our recent experience the evident need for revision in the manner and regulations governing these grants.

In particular, too little time was provided for the application and award process. Many local governmental units submitted applications as soon as applications were being accepted in the hope that any technical deficiencies could be corrected, and applications could be resubmitted within the deadline. I know of several instances in which communities did resubmit applications, with deficiencies corrected, only to be rejected on or near the deadline—and too late for resubmission—for deficiencies which were not noted earlier.

Also, in the application process the use of unemployment figures by applicants was not consistent, and the regulations themselves contributed to this inconsistency. Other than for CETA areas, local governments could state the rate of unemployment in an area "without regard to political or other subdivisions or boundaries," and use unemployment figures from adjoining areas from which the labor force might be drawn. In many instances, this created unrealistic unemployment figures and made it seemingly impossible to rate fairly the true priority of an application. Any reauthorization of the public works program demands that program regulations clearly specify the area from which unemployment figures may be drawn.

These problems are correctable and should neither detract us from the intent of the program to provide jobs, nor deter us from extending the program. However, these and other problems must be corrected if we are to distribute public works funds fairly and equitably.

Mr. DON H. CLAUSEN. Mr. Speaker, one of the first priorities of the 95th Congress will be to study the Public Works Employment Act and in all likelihood legislation will be enacted to provide additional funds for title I of the Local Public Works Capital Development and Investment Act.

I supported this program making $2 billion available to States and local communities for the construction of public facilities. I have cosponsored legislation to provide additional funds for public works projects. However, I believe it is important in considering new legislation to apply the lessons which are now apparent from the selection process and make legislative changes to strengthen this program.

Certainly we are all concerned about the high rate of unemployment and the fact that the Economic Development Administration received applications totaling more than 12 times the funds which were available. This indicates that there is sufficient needs for funds to construct facilities within local communities. I firmly believe that the $2 billion which was initially made available for this program can have a positive impact on creating jobs since in the private sector many outside private construction and building firms will be contracted to do the actual building. In addition, facilities will be placed in the community that can be of benefit for years to come.

However, I am genuinely concerned about some of the problems which were exhibited in the first round of funding. First of all, the statutory limit of a 70/30 funding split resulted in a number of inequities in actual practice. In the 70-percent category, those areas having unemployment in excess of the national average, more than 17,000 applications were received. This meant that only a small percentage of projects could be selected, regardless of the merit of the facility. Because of this competition, most of the

projects that were selected were above the 10-percent unemployment level.

In the second category, those areas with unemployment below the national average, a much smaller number of applications was received although still four times as many applications as could be funded. Most of the projects selected from this category have unemployment rates of around 7 percent. This left a wide area having high unemployment between 7 percent and 10 percent that were virtually excluded.

I am also concerned about the labor intensity requirement which was one of the factors considered by EDA in its selection process. EDA has an outstanding record of providing economic development and stimulus—economic growth through inducing private industry to locate in a particular area. I think we can take some pride in the fact it has not been simply a leaf-raking agency. I want to make certain that this remains the case, and I feel it is questionable to place too much value simply on whether a project is labor intensive. There are other factors which must be examined.

Of most concern to me was the fact that both long term and short term unemployment in rural areas was not sufficiently covered by the provisions and criteria of the LPW program. I would hope that we could find a way to insure that our unemployment rural areas receive an adequate funding level to offset their unemployment problems.

In addition, there is a need to look at the time restraints imposed on EDA in making the project selection. Realistically we must deal with the complaint that public works projects sometimes have a time lag in creating jobs. It is necessary that we create jobs as quickly as possible but we should not become so consumed with meeting deadlines that we are unable to examine each project for its merits and the job creation impact.

I want to make clear that I mean these criticisms in no way to reflect unfavorably on EDA. I think they are to be commended for doing an exceptional job under the most difficult of circumstances. They have a comparatively small staff and were given the responsibility of selecting $2 billion worth of applications from more than $24 billion worth of applications. They had to develop guidelines and select projects within 30 days and 60 days respectively. This is no easy job. But, they did so and in so doing, EDA demonstrated the greatest possible attention to the law and applying it as fairly as possible to all parts of the country.

I am pleased that as a member of the Economic Development Subcommittee of the Public Works and Transportation Committee I will have a chance to participate in hearings on this subject, hopefully later this month. At that time I want to take a careful look at the law and the allocation process. I think there are some real improvements which can be made given the first run of this program. I think it is important that we enter these hearings with an open mind and certainly look beyond the obvious problem in that there is a large backlog of worthwhile projects waiting to be funded. I feel that I have an important obligation to the people of my district and to those of the State of California and the Nation to make an honest and diligent effort to improve this program. The need is still there. But, it is essential that we look at the solution to make certain that it gets to the root of the problem.

Mr. DICKS. Mr. Speaker, I would like to thank my colleague, Mr. CONABLE for the opportunity to join him in addressing the inadequacies of the local public works program.

In evaluating the impact of the local public works program on my district and Washington State, I have been in frequent contact with the Regional Director of the Economic Development Administration, Mark Smith, and I have received telegrams and letters from elected and appointed officials at all levels of government from people affected by the projects that were proposed. In reviewing these comments, I have concluded that changes to the local public works program are required in three areas. The first is to increase the potential for funding of projects in urban areas. The second is to increase the resources for administering the program in order to maintain a strong overall economic development program. And the third is to allow more local input and require matching funds in selected areas.

The intent of title I of the Public Works Employment Act of 1976 is to boost the economy through funding ready-to-go public works projects in areas of high unemployment. Yet 8 of 10 counties with the highest unemployment rates in Washington State received no funds; only one grant was made to a major city in Washington State, and neither of the two major population centers nor entire sections of the State received grants. While I do not dispute the need for economic improvement in rural areas and am gratified that some very worthwhile projects have been funded, I do not believe that the intent of the act was to disregard the high unemployment in urban areas. The intent of title I was not to provide projects in areas of highest unemployment, but to fund projects in areas of higher than average unemployment.

In retrospect, it appears there were three major factors which reduced the potential of urban projects for funding. These are the definition of project area; the use of benchmarks based on unemployment numbers; and the effect of unemployment rates on scores within a State. The following changes are suggested:

First. Change project area to "labor source area." A major difficulty with the current local public works program is the high degree of flexibility allowed an applicant in the determination of the "project area." "Labor source area" in most cases should be defined as the county in which the project is located. If income levels are used, then the areas used for income should coincide with the labor source area.

Second. Eliminate the need for bench marks based on unemployment numbers by developing a system of "set-asides" for specific user groups.

The final project selection procedure in the current program involved comparing the high scoring projects to bench marks for each county within a State. The bench mark is the number of unemployed in a county multiplied by the total allocation for a State, divided by the number of unemployed in the State.

Instead of the county bench mark, specific amounts should be set aside for user groups. This concept is consistent with EDA's "entity" program. The set-asides could be divided in any number of ways. However, the comments I have received to date indicate that urban and nonurban areas should not compete with each other, nor should general and special purpose units of Government compete. Additional categories could be established by Congress for school districts and Indian tribes, even for State projects or central city areas, if appropriate. Congress should determine what percentage of the appropriated funds should be allocated to each of the categories selected and direct EDA to work closely with the Public Works Committees in the House and the Senate to develop guidelines to administer the program. The fact that most of the criticism of the local public works program concerns the inequities in the distribution of funds among user groups, suggests that an equitable distribution was an assumed, yet unspoken criterion in the minds of program developers, administrators, and applicants.

To increase the potential of urban projects for funding several changes in the use of the unemployment rates in evaluating applications have been proposed.

First. Develop a common criteria for employment data. Unemployment data for Indians is collected by the Bureau of Indian Affairs in one way and data for non-Indians is developed by the Bureau of Labor Statistics in another. This difference tended to give reservation Indians an advantage, while discriminating against Indians and others living in urban areas. Although the use of set-asides would solve this problem for the local public works program, the difference in unemployment data is a problem for other social Governmental programs, too.

Second. Average unemployment rates over a longer period of time.

Annual data are now available for the first time from the Bureau of Labor Statistics and are only a few months old. Using annual data would eliminate seasonal unemployment.

Third. Eliminate the 70/30 split.

The use of set-asides for specific user groups would eliminate the need for the 70/30 split, used to allocate funds to areas with varying rates of unemployment.

Fourth. Consider the number of unemployed as well as the rate of unemployment. The logarithm designed to reduce the importance of urban areas should be eliminated and a simple ordinate ranking used instead. The score relating to unemployment number will then be in direct proportion to the number of unemployed.

Fifth. Eliminate the use of unemployment rates in the construction industry. This data is inadequate and should not be a part of the scoring system.

The second change recommended for the local public works program is to maintain a strong ongoing EDA program. The congressional goal of improving the economy is defeated if the local public works program is simply substituted for an effective overall economic development program.

The Regional Director advised me that the regular EDA programs—public works, business loans, planning and technical assistance—have suffered greatly since the beginning of fiscal year 1977 on October 1. At best, most regional offices have been able to pay only minimal attention to these regular programs because of the press of local public works business. Regional offices find themselves desperately trying to catch up with one-third of the fiscal year gone and a new local public works program just over the horizon. The following changes are suggested:

First. Allow ample time for EDA to hire and train an additional work force for the local public works program.

If the Agency is to maintain its regular ongoing programs, additional personnel must be hired to assist them during an extended local public works program. Under the current program, virtually all regular EDA staff members were assigned to the local public works program. If they are to remain on their regular assignments during any new program, EDA will have to be able to hire and train temporary staff at the necessary skill levels.

Second. Allow ample time for the development and dissemination of any new local public works guidelines.

EDA published program guidelines piecemeal because of the very tight time frames imposed on the agency by the legislation. Some guidelines were not published in time to be generally understood by applicants.

Third. Reduce the potential for half-completed projects.

Under the current program, projects were funded which did not have complete plans, specifications, and cost estimates. I understand that there is a good possibility that many projects will not be finished when their grant award is exhausted. The current legislation could be modified by assigning a greater number of points in the scoring system to projects wih completed plans and specifications, or by accepting applications projects with completed plans and specications and a current cost estimate. The potential for completed projects could also be increased by considering rehabilitation projects as well as new construction. Rehabilitation projects are often more labor-intensive than new construction, and reduce the advantage of rural areas over developed urban areas.

In addition to improving the funding potential of urban projects and maintaining a strong EDA program, I recommend that the following changes be considered:

First. Allow more local input and review by affected jurisdictions.

Local elected officials have advised both the Regional Director and myself that they did not have enough time to review and/or set local priorities. Many local mayors and county commissioners, not to mention economic development districts felt that they should have the right to set local priorities. A–95 agencies were swamped with project applications as were jurisdictions which wished to comment on projects but did not have adequate staff time.

Second. Reduce local public works grants from 100 to 80 percent except in areas where the community does not have the ability to provide the 20-percent match.

Reducing local public works grants to 80 percent has the obvious advantage of funding more projects. It also increases the local community's "stake" in the project and helps local officials set priorities. The number of applications from communities may be reduced, at least in those areas where projects could be funded by other means; 100-percent grants would be available to communities which could not provide the 20-percent match. The ability of a community to pay could be determined by the ratio of per capita tax to per capita income in the labor source area or some other measure.

Third. Increase the percentage of score given for long-range economic development benefit.

Although long-term economic development was not mandated in the legislation, many felt that it should carry greater weight in any new program. Although school districts would benefit by this change in the scoring system, they could be removed from competition with other special purpose governments by a special set-aside.

Mr. CONABLE. Mr. Speaker, I yield back the balance of my time, and I believe the gentleman from Minnesota will take over from here.

GENERAL LEAVE

Mr. CONABLE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

PUBLIC WORKS EMPLOYMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRENZEL) is recognized for 60 minutes.

Mr. FRENZEL. Mr. Speaker, it is my intention to continue the discussion which the gentleman from New York (Mr. CONABLE) has begun here. I would like to begin with a short statement.

Last July Congress passed the Public Works Employment Act, which provided for $2 billion in Federal funding for local public works projects through September 1977. We are just now beginning to get an idea of the public works projects which will be funded under this act, but we will have to wait until late in 1977 or even 1978 to experience the real impact of the program. Already, however, sufficient criticism of the public works employment program has been voiced to warrant prompt and careful examination of the program, particularly before any further expansion is even contemplated.

In formulating the Public Works Employment Act, Congress established an extensive, yet sufficiently vague, set of criteria which had to be considered in processing grant applications. The result has been that the implementation of the act is an administrative nightmare. Not only was the Economic Development Administration faced with the problem of establishing fair and comprehensive guidelines for processing grant applications to meet all the dictates of Congress, but the individual applicants were confronted with a lengthy and extremely complex form to complete. This tended to put smaller communities at a distinct disadvantage because of their lack of expertise in completing such a sophisticated application.

Another very serious problem was posed by the very unemployment statistics upon which the actual funding decision was made. According to the people who actually provided the unemployment figures for specified projects areas—in most cases the State Employment Services Department—these figures were, at best, unreliable and, not infrequently, totally inaccurate.

Since no method exists for developing reliable estimates for small political divisions or geographic areas, the employment services office often had to rely upon census data from April of 1970. In addition, the use of the unemployment rate from the most recent 2-month period put those areas with highly seasonal employment at a definite disadvantage.

To a great extent, the employment service was forced into a time-consuming exercise in frustration and futility in trying to develop reasonable unemployment estimates for the hundreds of proposed project areas. In Minnesota alone, there were approximately 400 written requests and 100 telephone requests for such information. Furthermore, many of these requests had to be processed several times over, as the applicants gerrymandered the project areas boundaries in order to attain the highest possible unemployment rate.

Congress was made aware of this statistical problem back when the Emergency Employment Act of 1971 was passed, yet it has failed to make any attempt to correct the situation. If public works grants are to be awarded on a reasonable and equitable basis, there must be developed a new methodology for allocating these funds.

It is important to emphasize here that while we hasten to blame the bureaucracy, much of the blame must be laid squarely at the feet of Congress. We are very anxious to legislate results, but apparently do not really care whether the programs work.

At the same time, Congress needs to

evaluate the effectiveness of public works projects in reducing unemployment and stimulating the economy. I believe that public works "pork-barreling" has been about the most ineffective and fiscally irresponsible attempt to pump up our economy. Faced with a serious economic situation, Congress has responded by carelessly throwing money at the problems in hopes that they will go away. Public works programs which produce temporary jobs costing the taxpayers $25,000 to $40,000—$35,000 according to CBO in 1975—each can hardly be considered a sound or responsible way to try to improve our economy. Since public works projects often require extensive materials and higher skilled, and therefore higher paid, workers, there is a very low employment value per dollar spent. Furthermore, public works projects usually provide few opportunities for employment and/or training for those people most severely affected by unemployment; that is, for the unskilled, minorities, and youth.

Finally, it has also been shown that the impact of public works spending does not come for a year or two after the program has been initiated, often just when the economy is regaining its footing. For example, since the act was passed in July, the construction industry has shown a steady improvement, with the unemployment rate in that sector having dropped nearly 4 percentage points. Public works spending at this time will surely contribute to inflation by increasing the demand for scarce materials and skilled labor.

I suppose it is inevitable that some good has come from this program. But the sheer weight of evidence would seem to indicate clearly that in terms of jobs produced, public good, or equity to people or areas, it is a dismal failure.

It is time for Congress to stop pretending its responsibility ends with good intentions. We must assume our responsibility to examine thoroughly the public works program, rather than continuing to pour billions of dollars into such an expensive, ineffective, and perhaps unnecessary program.

Mr. COCHRAN. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. Mr. Speaker, at this time I yield to the distinguished gentleman from Mississippi (Mr. COCHRAN).

Mr. COCHRAN. I thank the gentleman for yielding to me. I want to compliment the gentleman for the quality of his remarks and his analysis of this $2 billion jobs program that we are now learning more about. I was very active in trying to gain passage of this bill, both in the Committee on Public Works and Transportation and here on the floor, even voting to override the President's veto, thinking that it was going to be a good program and that it would help in areas of high unemployment.

But, I want to share with the gentleman an experience we have had in Mississippi with respect to this program. Our State was very fortunate in having a relatively low rate of unemployment among the States of this great Nation. Therefore, we were not given a great amount of money. Only $10 million was allocated to our State under this program.

The absurdity, though, Mr. Speaker, is that of this $10 million, $4.9 million was allocated to one small town with a population of 2,100 people. We had many, many towns and communities and counties throughout our State making application for these funds and it is not, Mr. Speaker, just because this small town is not in my congressional district that I am complaining.

The fact is that we were trying to spread the money around, encouraging through the local EDA representative communities to keep their requests down to about $250,000 or $300,000 so that more areas of the State would benefit. But, irrespective of that suggestion, this one town did put in a very large application, and it was approved in toto by the Assistant Secretary of Commerce through the procedures and formulas for allocations that they devised spreading this money around.

This is an example, I think, which is probably not unusual in the administration of this program. I think that the Committee on Public Works and Transportation has a duty, immediately upon being organized, to commence hearings, as the gentleman from Minnesota suggests, to find out exactly where the money has been going and how many jobs, in fact, were being created and whether or not we ought to make some drastic changes in this type of program if we do enact a jobs program through the Public Works and Transportation Committee again this year.

Again, Mr. Speaker, I want to compliment the gentlemen from Minnesota and New York.

Mr. FRENZEL. Mr. Speaker, I thank the distinguished gentleman from Mississippi for his important contribution.

I now yield to the distinguished gentleman from Michigan (Mr. PURSELL).

Mr. PURSELL. Mr. Speaker, I just want to thank the gentleman from Minnesota and the gentleman from New York for outlining some of the technical and political problems of the public works employment legislation. My only personal comment, having served in a State senate for a 4-year term, is that Congress should address itself to the evaluation, testing, and challenging of this type legislation vis-a-vis long-range goals. It seems that we are operating in an emergency, temporary vacuum, and that the committee in a crisis situation developed legislation that is not necessarily in the long-range interest of minorities or in jobs for particular cities or rural communities.

I would just hope that when we look over this in the evaluation process, that we consider the long-range planning aspects of this type legislation, which are very important to me. Congress ought to be working with the various political subdivisions in developing long-range rehabilitation, particularly of the urban communities, so that we are making a rational or logical plan of 5 to 10 years in development, rather than operating on a crisis basis and trying to fill a void at any given time.

Mr. FRENZEL. I thank the gentleman from Michigan for his comments, and I think they are very important.

When the bill was passed I wrote to each mayor and to each council and to legislators, county commissioners in my district, and indicated briefly what the criteria would be. Then I settled back to wait for their comments, which were, "For heaven's sake, now what have you done to us? We don't understand this at all."

The larger cities in the State, of course, understood it well enough to apply their usual grantsmanship techniques and some of them may be successful.

I would add, parenthetically, that my own district has had no application accepted and through February it looks like there will be none. So we have had no experience with the program except to say that our people have been thoroughly confused.

What has happened is, as I indicated before, Congress has simply passed a bill so that it can say that if they have done something about the problem of unemployment. Congress has cared not a fig whether it worked, whether anybody else was employed, whether it did any public good out in the provinces, whether the provincial managers, the mayors and councils, county commissioners were involved, or whether they thought it was doing them any good. Congress simply wanted to tell the newspapers that we were concerned about jobs. As a result, having legislated results instead of programs, we are again seeing yet another multi-billion-dollar program turn out to be—not worthless, because in the expenditure of Federal funds there is always some value to be derived—falling well short of the potential and of the promise.

Mr. Speaker, again I thank the gentleman from Michigan.

JOSEPH McCAFFREY: 20 YEARS ON THE AIR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. MICHEL) is recognized for 5 minutes.

Mr. MICHEL. Mr Speaker, a few days ago I came across a complaint about Congress It seems that Congress has not yet caught up with the communications revolution. The Office of the President has learned to live with radio and television, but the Conrgess has not. Therefore the public, which depends on television for much of its information, learns quite a lot about the programs and personalities of the Presidents but little or nothing about the programs and personalities of the Congress. Or, at least, so goes the argument.

I am sure an argument can be made that the public is better off under the current banning of live television cameras on the floor of the House. Perhaps a live television debate over one or more obscure pieces of legislation would cause an epidemic of yawning and sleeping across the country. But, at any rate, one thing is certain: Congress certainly does not get the quantity and the quality of electronic reporting as the executive branch. Radio, while it does a better job of covering certain congressional actions also fails to adequately cover Congress on a regular basis.

To this rule there is one exception, and his name is Joe McCaffey. This year marks the 20th consecutive year that his radio program, "Today in Congress" has informed the people of Washington about the business of the Congress. Amazingly enough it is the only program to offer, on a regular basis, a recap of House and Senate action both on the floor and in committee.

Mr. Speaker, I want to take this opportunity to extend my warmest congratulations to Joe McCaffrey on the occasion of his 20th anniversary of reporting on the activities of the Congress. Certainly Joe has become a fixture around these parts and over the years he has attracted a large listening audience, not only among Members and staff people on Capitol Hill, but throughout the executive agencies and bureaus. In addition to "Today in Congress" he hosts the weekly, "McCaffrey's Washington," a half-hour interview program featuring Senate and House Members.

While extending best wishes to Joe McCaffrey for many more years of reporting on the activities of the Congress, I cannot help but point out that the world of broadcast journalism needs improvement if it can boast of only one regular program dealing with a branch of government that is responsible for allocating billions of taxpayers dollars and has the power to declare war as well. I know that some of the more sensational and titillating events that now and then occur on the Hill are covered with evident glee and gusto by the electronic media. But what about the admittedly dull, but profoundly important, work that goes on day by day in this institution? How many citizens can say that they get an adequate, let alone informed, view of Congress from the electronic media? Yes, perhaps the Congress should reevaluate its own attitude toward the electronic media. But I think it is fair to say that with few exceptions, the business of Congress is a nonevent so far as radio and television are concerned.

I think both the Nation and the Congress would be better served if the quality and quantity of electronic reporting increases. For the present, however, it is Joseph McCaffrey on WMAL Radio 63 in Washington if you want to find out what happened in Congress today.

REFORM IS ESSENTIAL TO RESTORING PUBLIC TRUST AND CONFIDENCE IN CONGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 15 minutes.

Mr. KEMP. Mr. Speaker, I have introduced today two pieces of important legislation, the Congressional Reform Act and the congressional reform resolution. Their provisions address a fundamental issue—failing public trust in public institutions, especially those which govern.

Government is the most pervasive instrument of change or stagnation in our society today, and Congress is the fountainhead of all statutory authority exercised by that Government. The President has little authority except that given to him by the Congress over the years, and this is true of his department and agency heads as well. The courts have little power, except that granted by the Congress. As the fount of these authorities, Congress has not always lived up to the reasonable expectations of the people.

There is a broadly held impression among the people today that "the more things change, the more they stay the same." That impression arises from two of their observations. First, that no matter whom they vote for, no matter which party is "in power," no matter which philosophy or program is espoused by a candidate before he's elected, things in Washington seldom change. Second, that there are some Members who may be here more for what they can do for themselves, than for their constituents and the country.

The genesis of my action here today is my concern over the erosion of confidence and trust in Congress as an institution and the impact that erosion might be having.

Let us look for a moment at this role as an institution in our society of Congress on our national spirit.

THE INSTITUTIONAL ROLE OF CONGRESS

Institutions serve as the backbone of the "body politick." They are the mechanisms through which a culture transmits its values and establishes the norms of human interaction and conduct. They bring cohesion of process and purpose to extensions of time, serving as the threads which weave together our past and our future. Upon their continuity rests the stability of society and government, and they are the foundation stones upon which common consent rests. Institutions may be practices, relationships, processes, organizations, or structures, and Congress is all of these, but the common denominator is that they serve as the dispassionate devices through which people and groups, in agreement or in disagreement, act and react with one another.

Institutions do not arise simply and solely from the genius of man. They are, through the endless learning processes of a people and nation, molded out of human experience. They are tried. They are tested. They are proved. And through all of this, adjustments are made, carefully here, prudently there. In the long run, they provide the procedural mechanisms through which human conduct can be self-regulating by common agreement and perception, and, when necessary, by force of law. This is my framework for looking at Congress, this body in which we serve, as an institution in our society. It serves also to remind us of the grave responsibility we shoulder to preserve its purposes inviolate from individual or concerted abuse.

THE IMPORTANCE OF PRESERVING PUBLIC TRUST IN CONGRESS

Few things are more important in a society, especially a free society, than preserving trust in the institutions which act in behalf of the people's interests. Trust is the basis for optimism about the future.

To the degree the majority of Members let misconduct on the part of some undercut that trust, we—all of us—are rendered less capable of solving the very problems we were sent here to tackle. When this happens Congress stops making sense in most the people's minds, and when institutions cease to make sense in this way, all the familiar criteria for success or failure become utterly irrelevant. Then, if Congress does something right, it is either overlooked or a source of further confusion.

When Members themselves acquiesce in wrongdoing, they undercut our ability to assure that good does triumph.

And, frankly, when the people, the constituents, acquiesce in wrongdoing, they undercut the effectiveness of those who do conduct themselves properly.

WHEN REFORM REALLY IS NOT REFORM

Let us be candid with one another. We know the so-called congressional reforms we have seen passed in the past year have been very little real, substantive reform. The first definition of "reform" in Webster's dictionary is "to remove faults or abuses * * *." Simply amending something, rewriting it, moving a section from here to there—these are not susbtantive reforms. Amendment is not synonymous with reform. Reform, to me, means we take the abuses we have seen in recent years, particularly last year, and address them, through an overall, comprehensive effort, and put onto the books those clarifications, proscriptions and prohibitions, and penalties needed. It doesn't fool the people for one moment for Congress to say to its Members, "Thou shalt not," and then not include a penalty setting forth what happens if you do. Yet our laws, rules, and ethics with respect to Congress are replete with instances of "Thou shalt nots" without penalties.

The attitude that Congress can take care of a basic, fundamental problem by dealing only with a specific instance of wrongdoing is wrong too. You do not address a basic, fundamental problem by stripping a single wrongdoer of his powers and doing nothing else, although that might frighten some into walking the narrow line at least until the furor dies down.

Another thing that is wrong is the attitude that a problem can be glossed over by simply ignoring it. Maybe that was true at one time, when disclosures of misconduct were few and far between, but it is not true now. Look at the disclosures and allegations over the past several years. Abuses of congressional staff positions and salaries. Converting campaign funds to personal uses. Accepting political contributions from foreigners with immense financial interests in the decisions of Congress. Traveling abroad at the expense of foreign governments which depend upon the economic and military assistance we vote them. And the list goes on. These cannot be glossed over.

My points here today are not partisan. The need for genuine congressional reform transcends both political party and philosophical persuasion. That is why I was particularly disappointed in the minimal debate during the first day of this Congress over adopting the rules

of the House for the next 2 years, a consideration which once again saw the defenders of the status quo first lined up to stop us from passing badly needed reforms and then lined up to push through some changes to their own which go in the opposite direction of real reform.

We did not even have a thorough debate on reform, either in general or with respect to many proposals which would have been offered. That is a bad sign. The stifling of debate is antithetical to every liberal principle in our society, for debate is essential to the free movement of ideas.

WE NEED A BALANCED PERSPECTIVE ON WHAT IS WRONG IN CONGRESS

Let me say one thing about how bad the situation may or may not be. I know the situation is not as bad as some would want us to believe. For every instance of corruption or misconduct or simply bad judgment, there are hundreds of instances of honesty and good judgment. It is like everything else in life—only the abberations make the news.

Probably the most obvious and tangible evidence of this disparity between perceptions of Congress in general and of most Congressmen in particular is the fact that, while we have polls showing only 19 percent of the people have confidence in Congress as an institution, individual Members who run for reelection are returned by majority votes in their respective districts at the rate of 90 to 92 percent.

The people seem to be saying, "Congress is not worth too much, but we think highly of our own Congressman." And, when you add those sentiments together, its shows the strong support for individual Members, which when added together, should show more confidence in Congress as an institution than the 19 percent indicates.

WHAT NEEDS TO BE DONE

A number of things—substantive ones—need to be done by the House, here at the outset of this new Congress. Reform now is essential to restoring public trust and confidence in Congress. We have a new Speaker, a new majority leader, new faces in the leadership of the committees and their subcommittees, many new Members, and even a new President who made trust in government one of his most successful campaign themes, as did the outgoing President, who also made it a hallmark of his administration. We have an opportunity, therefore, to carry out meaningful reforms, and I am firmly pledged to pushing for them.

The two pieces of legislation which I introduced today are among the most far-reaching congressional reform packages to have been introduced in years. The legislation consists of two measures—a bill and a resolution. The bill, the proposed Congressional Reform Act of 1977, incorporates all reforms not directly affecting the rules of the House. The resolution, the proposed congressional reform resolution of 1977, covers all the reforms to the House rules. These reforms cannot be put into one piece because of the constitutional requirement that only the House can set the rules of the House, and a bill has to be considered by the Senate and then signed by the President.

THE CONGRESSIONAL REFORM ACT

The Congressional Reform Act has 19 provisions. One through ten are reforms affecting salary, allowance, benefits, personnel, disclosure and audit procedures. Eleven through 18 are designed to improve communications and increased understanding between Members and constituents. The 19th establishes an Office of the General Counsel of the House and sets forth its policies and purposes, structure, et cetera.

The act has provisions which—

First, prohibit the diversion of excess campaign contributions to personal uses;

Second, prohibit payment of Congressional travel expenses by a foreign government or an organization funded or controlled by a foreign government;

Third, stop salary increases for Members from taking effect until the Congress after the one which Presidential and commission recommendations for increases were not disapproved or amended;

Fourth, permit House allowances to be set or adjusted only by a vote of the full House;

Fifth, prohibit travel at Government expense outside the United States by Members who have been defeated or who have resigned or retired;

Sixth, mandate a study of the personnel policies and practices of Members and committees by an independent management consulting firm;

Seventh, prohibit reimbursement for first-class air fare for Members and employees of committees;

Eighth, require mandatory audits of all income tax returns made by Members;

Ninth, require the House restaurant, cafeterias, and other food services of the House to be operated on a self-sustaining basis;

Tenth, require the itemization and disclosure of travel funds;

Eleventh, require estimates of the costs and savings in total and to each average taxpaying family of legislative proposals to be printed on the first page of bills and resolutions;

Twelfth, require additional information on reports and forms mandated by legislation to be incorporated in committee reports;

Thirteenth, require information to be made available in post offices on how and where to communicate with Members and Senators;

Fourteenth, require postal patron mailings by Members and Senators to include communications information;

Fifteenth, prohibit certain franked mailings by Members and certain officers of the Government;

Sixteenth, require reports by executive departments and agencies to persons elected to the House of Representatives on activities within their respective districts;

Seventeenth, authorize seminars for freshmen Members to be conducted before the beginning of each new Congress;

Eighteenth, allow a Member of Congress to direct what would otherwise be an honorarium to him to a qualified charity without it counting against his personal income or the ceiling on honorariums; and

Nineteenth, establish an Office of the General Counsel to the Congress.

THE CONGRESSIONAL REFORM RESOLUTION

The congressional reform resolution has provisions which—

First, make committee and subcommittee records available for public inspection and require committee and subcommittee rollcall votes to be published in the CONGRESSIONAL RECORD;

Second, prohibit proxy votes in committees and subcommittees;

Third, allow any member of a committee or a subcommittee to demand a rollcall vote on a question;

Fourth, require a rollcall vote on every motion to report a bill or resolution to the full House;

Fifth, establish conditions for the admission of ex-Members and certain other persons—we are talking principally here of those who are now lobbyists—to the Hall of the House and rooms leading thereto;

Sixth, remove limitations on the number of Members who may introduce jointly any bill, memorial, or resolution;

Seventh, prohibit party caucuses or conferences from binding a Member to a vote against his conscience;

Eighth, require full disclosure of expenditure accounts;

Ninth, require committee travel funds to be approved by rollcall vote in open session;

Tenth, require honorariums and gifts to be disclosed;

Eleventh, permit the House to move within 30 days to expel a Member convicted of a felony;

Twelfth, make the Committee on Standards of Official Conduct—our ethics committee—accountable to the full House;

Thirteenth, apply the rules of the House governing committees to the special legislative committees;

Fourteenth, make the committee reports under the Budget Act formal committee actions, with the filing of minority, additional, or separate views allowed;

Fifteenth, prohibit closed rules;

Sixteenth, place additional limitations on the consideration of a bill or joint resolution under suspension of the rules;

Seventeenth, permit inclusion of minority, additional, or separate views in conference reports;

Eighteenth, require majority and minority Members to discuss oversight plans and to coordinate all oversight activities;

Nineteenth, require a 2-day period before a bill or joint resolution reported from a subcommittee can be acted upon by the full committee;

Twentieth, authorize television and radio coverage of House proceedings;

Twenty-first, prohibit the chairman of the Committee on House Administration and subcommittees thereof from serving simultaneously as officers of either the Democratic National Congressional Com-

mittee or the National Republican Congressional Committee—a provision directed at the abuses of power which arise from one man serving in two such powerful positions; and

Twenty-second, require the disclosure of the hiring by Members of relatives of other Members.

A CALL FOR ACTION

I can think of few things more important than passing these reforms. It is essential to the country and the Congress.

I hope the committees to which the bill and resolution have been referred will act on them as soon as those committees are formally constituted this month.

There are no reasons to wait.

PROTECTING OLDER AMERICANS FROM OVERPAYMENT OF INCOME TAXES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTEN) is recognized for 5 minutes.

Mr. KASTEN. Mr. Speaker, every year thousands of our older Americans needlessly overpay their Federal income taxes.

One reason is that many senior citizens are unaware of the special deductions and tax relief measures which can save them precious dollars.

Another reason is that, like most Americans, they are overwhelmed by the complexity of the tax law and tax forms.

The Senate Committee on Aging has published a convenient checklist to help older Americans prepare their tax returns this year if they itemize deductions.

This checklist can be particularly helpful this year as a safeguard for taxpayers who may not be completely current on recent changes in the tax law. For example, a new, expanded and simplified credit for senior citizens has replaced the former more complex retirement income credit.

The summary can also be useful for taxpayers who may subsequently discover that they forgot to claim an allowable deduction on a prior tax return.

These individuals can still obtain a refund for these expenditures by filing an amended return—form 1040X—for the year in question. Form 1040X, however, must be filed within 3 years after the original return was due or filed or within 2 years from the time the tax was paid, whichever is later.

Mr. Speaker, this checklist can be useful not only to senior citizens but to taxpayers of all ages. In order that people may have a convenient checklist for determining tax deductions, I include the following material in the RECORD:

PROTECTING OLDER AMERICANS AGAINST OVERPAYMENT OF INCOME TAXES

(A revised checklist of itemized deductions for use in taxable year 1976)

CHECKLIST OF ITEMIZED DEDUCTIONS FOR SCHEDULE A (FORM 1040)

Medical and dental expenses

Medical and dental expenses (unreimbursed by insurance or otherwise (are deductible to the extent that they exceed 3% of a taxpayer's adjusted gross income (line 15c, Form 1040).

Insurance premiums

One-half of medical, hospital or health insurance premiums are deductible (up to $150) without regard to the 3% limitations for other medical expenses. The remainder of these premiums can be deducted, but is subject to the 3% rule.

Drugs and medicines

Included in medical expenses (subject to 3% rule) but only to extent exceeding 1% of adjusted gross income (line 15c, Form 1040).

Other medical expenses

Other allowable medical and dental expenses (subject to 3% limitation):

Abdominal supports (prescribed by a doctor).
Acupuncture services.
Ambulance hire.
Anesthetist.
Arch supports (prescribed by a doctor).
Artificial limbs and teeth.
Back supports (prescribed by a doctor).
Braces.
Capital expenditures for medical purposes (e.g., elevator for persons with a heart ailment)—deductible to the extent that the cost of the capital expenditure exceeds the increase in value to your home because of the capital expenditure. Taxpayer should have an independent appraisal made to reflect clearly the increase in value.
Cardiographs.
Chiropodist.
Chiropractor.
Christian Science practitioner, authorized.
Convalescent home (for medical treatment only).
Crutches.
Dental services (e.g., cleaning, X-ray, filling teeth).
Dentures.
Dermatologist.
Eyeglasses.
Food or beverages specially prescribed by a physician (for treatment of illness, and in addition to, not as substitute for, regular diet; physician's statement needed).
Gynecologist.
Hearing aids and batteries.
Home health services.
Hospital expenses.
Insulin treatment.
Invalid chair.
Lab tests.
Lipreading lessons (designed to overcome a handicap).
Neurologist.
Nursing services (for medical care, including nurse's board paid by you).
Occupational therapist.
Ophthalmologist.
Optician.
Optometrist.
Oral surgery.
Osteopath, licensed.
Pediatrician.
Physical examinations.
Physical therapist.
Physician.
Podiatrist.
Psychiatrist.
Psychoanalyst.
Psychologist.
Psychotherapy.
Radium therapy.
Sacroiliac belt (prescribed by a doctor).
Seeing-eye dog and maintenance.
Speech therapist.
Splints.
Supplementary medical insurance (Part B) under Medicare.
Surgeon.
Telephone/teletype special communications equipment for the deaf.
Transportation expenses for medical purposes (7c per mile plus parking and tolls or actual fares for taxi, buses, etc.)
Vaccines.
Vitamins prescribed by a doctor (but not taken as a food supplement or to preserve general health).
Wheelchairs.
Whirlpool baths for medical purposes.
X-rays.

Taxes

Real estate.
State and local gasoline.
General sales.
State and local income.
Personal property.

If sales tax tables are used in arriving at your deduction, you may add to the amount shown in the tax tables only the sales tax paid on the purchase of five classes of items: automobiles, airplanes, boats, mobile homes, and materials used to build a new home when you are your own contractor.

When using the sales tax tables, add to your adjusted gross income any nontaxable income (e.g., Social Security, Veterans' pensions or compensation payments, Railroad Retirement annuities, workmen's compensation, untaxed portion of long-term capital gains, recovery of pension costs, dividends untaxed under the dividend exclusion, interest on municipal bonds, unemployment compensation and public assistance payments).

Contributions

In general, contributions may be deducted up to 50 percent of your adjusted gross income (line 15c, Form 1040). However, contributions to certain private nonprofit foundations, veterans organizations, or fraternal societies are limited to 20% of adjusted gross income.

Cash contributions to qualified organizations for (1) religious, charitable, scientific, literary or educational purposes, (2) prevention of cruelty to children or animals, or (3) Federal, State or local governmental units (tuition for children attending parochial schools is not deductible). Fair market value of property (e.g., clothing, books, equipment, furniture) for charitable purposes. (For gifts of appreciated property, special rules apply. Contact local IRS office.)

Travel expenses (actual or 7 cents per mile plus parking and tolls) for charitable purposes (may not deduct insurance or depreciation in either case).

Cost and upkeep of uniforms used to charitable activities (e.g., scoutmaster).

Purchase of goods or tickets from charitable organizations (excess of amount paid over the fair market value of the goods or services).

Out-of-pocket expenses (e.g., postage, stationery, phone calls) while rendering services for charitable organizations.

Care of unrelated student in taxpayer's home under a written agreement with a qualifying organization (deduction is limited to $50 per month).

Interest

Home mortgage.
Auto loan.
Installment purchases (television, washer, dryer, etc.).
Bank credit card—can deduct the finance charge as interest if no part is for service charges, loan fees, credit investigation fees, or similar charges.
Points—deductible as interest by buyer where financing agreement provides that they are to be paid for use of lender's money. Not deductible if points represent charges for services rendered by the lending institution (e.g., VA loan points are service charges and are not deductible as interest). Not deductible if paid by seller (are treated as selling expenses and represent a reduction of amount realized).
Penalty for prepayment of a mortgage—deductible as interest.

Revolving charge accounts—may deduct the "finance charge" if the charges are based on your unpaid balance and computed monthly.

Other charge accounts for installment purchases—may deduct the lesser of (1) 6% of the average monthly balance (average monthly balance equals the total of the unpaid balances for all 12 months, divided by 12) or (2) the portion of the total fee or service charge allocable to the year.

Casualty or theft losses

Casualty (e.g., tornado, flood, storm, fire or auto accident provided not caused by a willful act or willful negligence) or theft losses to nonbusiness property—the amount of your casualty loss deduction is generally the lesser of (1) the decrease in fair market value of the property as a result of the casualty, or (2) your adjusted basis in the property. This amount must be further reduced by any insurance or other recovery, and, in the case of property held for personal use, by the $100 limitation. You may use Form 4684 for computing your personal casualty loss.

Credit for child and dependent care expenses

Certain payments made for child and dependent care may now be claimed as a credit against tax instead of as an itemized deduction.

If a taxpayer maintained a household that included a child under age 15 or a dependent or spouse incapable of self-care, a taxpayer may be allowed a 20% credit for employment related expenses. These expenses must have been paid during the taxable year in order to enable the taxpayer to work either full or part time.

For detailed information, see the instructions for Form 2441 on page 17.

Miscellaneous

Alimony and separate maintenance (periodic payments).

Appraisal fees for casualty loss or to determine the fair market value of charitable contributions.

Union dues.

Cost of preparation of income tax return. Cost of tools for employee (depreciated over the useful life of the tools).

Dues for Chamber of Commerce (if as a business expense).

Rental cost of a safe-deposit box for income-producing property.

Fees paid to investment counselors.

Subscriptions to business publications.

Telephone and postage in connection with investments.

Uniforms required for employment and not generally wearable off the job.

Maintenance of uniforms required for employment.

Special safety apparel (e.g., steel toe safety shoes or helmets worn by construction workers; special masks worn by welders).

Business entertainment expenses.

Business gift expenses not exceeding $25 per recipient.

Employment agency fees under certain circumstances.

Cost of a periodic physical examination if required by employer.

Cost of installation and maintenance of a telephone required by a taxpayer's employment (deduction based on business use).

Cost of bond if required for employment.

Expenses of an office in your home if employment requires it.

Payments made by a teacher to a substitute.

Educational expenses required by your employer to maintain your position or for maintaining or sharpening your skills for your employment.

Political Campaign Contributions.—Taxpayers may now claim either a deduction (line 32, Schedule A, Form 1040) or a credit (line 52, Form 1040), for campaign contributions to an individual who is a candidate for nomination or election to any Federal, State, or local office in any primary, general or special election. The deduction or credit is also applicable for any (1) committee supporting a candidate for Federal, State, or local elective public office, (2) national committee of a national political party, (3) State committee of a national political party, or (4) local committee of a national political party. The maximum deduction is $100 ($200 for couples filing jointly). The amount of the tax credit with a $25 ceiling ($50 for couples filing jointly).

Presidential Election Campaign Fund.—Additionally, taxpayers may voluntarily earmark $1 of their taxes ($2 on joint returns) for the Presidential Election Campaign Fund.

For any questions concerning any of these items, contact your local IRS office. You may also obtain helpful publications and additional forms by contacting your local IRS office.

Other tax relief measures

Filing status:	Required to file a tax return if gross income is at least—
Single (under age 65)	$2,450
Single (age 65 or older)	3,200
Qualifying widow(er) under 65 with dependent child	2,850
Qualifying widow(er) 65 or older with dependent child	3,600
Married couple (both spouses under 65) filing jointly	3,600
Married couple (1 spouse 65 or older) filing jointly	4,350
Married couple (both spouses 65 or older) filing jointly	5,100
Married filing separately	750

Additional Personal Exemption for Age.—Besides the regular $750 exemption allowed a taxpayer, a husband and wife who are 65 or older on the last day of the taxable year are each entitled to an additional exemption of $750 because of age. You are considered 65 on the day before your 65th birthday. Thus, if your 65th birthday is on January 1, 1977, you will be entitled to the additional $750 personal exemption because of age for your 1976 Federal income tax return.

General Tax Credit.—A new general tax credit is available. For this credit, the taxpayer may claim the greater of (1) $35 per exemption shown on line 6d, Form 1040A or Form 1040, or (2) 2 percent of taxable income (line 15, Form 1040A or line 47, Form 1040) but not more than $180 ($90, if married, filing separately).

Multiple Support Agreements.—In general, a person may be claimed as a dependent of another taxpayer, provided five tests are met: (1) Support, (2) gross income, (3) member of household or relationship, (4) citizenship, and (5) separate return. But in some cases, two or more individuals provide support for an individual, and no one has contributed more than half the person's support. However, it still may be possible for one of the individuals to be entitled to a $750 dependency deduction if the following requirements are met for multiple support:

1. Two or more persons—any one of whom could claim the person as a dependent if it were not for the support test—together contribute more than half of the dependent's support.

2. Any one of those who individually contribute more than 10 percent of the mutual dependent's support, *but only one of them,* may claim the dependency deduction.

3. Each of the others must file a written statement that he will not claim the dependency deduction for that year. The statement must be filed with the income tax return of the person who claims the dependency deduction. Form 2120 (Multiple Support Declaration) may be used for this purpose.

Sale of Personal Residence by Elderly Taxpayers.—A taxpayer may elect to exclude from gross income part or, under certain circumstances, all of the gain from the sale of his personal residence, provided:

1. He was 65 or older before the date of the sale, and

2. He owned and occupied the property as his personal residence for a period totaling at least 5 years within the 8-year period ending on the date of the sale.

Taxpayers meeting these two requirements may elect to exclude the entire gain from gross income if the adjusted sales price of their residence is $20,000 (this amount will increase to $35,000 for taxable years beginning after December 31, 1976) or less. (This election can only be made once during a taxpayer's lifetime.) If the adjusted sales price exceeds $20,000 (this amount will increase to $35,000 for taxable years beginning after December 31, 1976), an election may be made to exclude part of the gain based on a ratio of $20,000 (this amount will increase to $35,000 for taxable years beginning after December 31, 1976) over the adjusted sales price of the residence. Form 2119 (Sale or Exchange of Personal Residence) is helpful in determining what gain, if any, may be excluded by an elderly taxpayer when he sells his home.

Additionally, a taxpayer may elect to defer reporting the gain on the sale of his personal residence if within 18 months before or 18 months after the sale he buys and occupies another residence, the cost of which equals or exceeds the adjusted sales price of the old residence. Additional time is allowed if (1) you construct the new residence or (2) you were on active duty in the U.S. Armed Forces. Publication 523 (Tax Information on Selling Your Home) may also be helpful.

Credit for the Elderly.—A new, expanded, and simplified credit for the elderly has replaced the former more complex retirement income credit.

A taxpayer may be able to claim this credit and reduce taxes by as much as $375 (if single), or $562.50 (if married filing jointly), if the taxpayer is:

(1) Age 65 or older, or

(2) Under age 65 and retired under a public retirement system.

To be eligible for this credit, taxpayers no longer have to meet the income requirement of having received over $600 of earned income during each of any 10 years before this year.

For more information, see instructions for Schedules R and RP.

Earned Income Credit.—A taxpayer who maintains a household for a child who is under age 19, or is a student, or is a disabled dependent, may be entitled to a special payment or credit of up to $400. This is called the earned income credit. It may come as a refund check or be applied against any taxes owed. Generally, if a taxpayer reported earned income and had adjusted gross income (line 15c, Form 1040) of less than $8,000, the taxpayer may be able to claim the credit.

Earned income means wages, salaries, tips, other employee compensation, and net earnings from self-employment (generally amount shown on Schedule SE (Form 1040) line 13). A married couple must file a joint return to be eligible for the credit. Certain married persons living apart with a dependent child may also be eligible to claim the credit.

For more information, see instructions for Form 1040 or 1040A.

ASSASSINATION INVESTIGATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 15 minutes.

Mr. GONZALEZ. Mr. Speaker, the 94th Congress on September 17, 1976, debated, deliberated and decided that there should be an investigation into the assassinations of President John F. Kennedy and Dr. Martin Luther King, Jr. It seems to me unconscionable to the American people, this House and the professional staff who have already begun this investigation now to redebate a policy which has previously been decided.

Legitimate questions have been raised by my colleague, Chairman DONALD EDWARDS, about the conduct of the investigation. To keep the Members of this House fully apprised of those issues as well as my response I have inserted all of that correspondence in the RECORD of this House. Other inquiries have been raised about the proposed budget and the size of the staff. Personal attacks have been leveled in the media against Richard Sprague, the committee's chief counsel.

The inquiries do not raise an issue as to whether we should continue these vital investigations but how. Certainly there should be no question as to the will or desire of the American people to carry on these investigations. The primary issue now facing the House is simply to reestablish the select committee.

There are very compelling reasons for the immediate reestablishment of the select committee. For example, subpenas which have been issued in both the Kennedy and King investigations are no longer enforceable. Thus, the evidence which was previously under the control of the House is no longer effectively under its control. Similarly, evidence which should be immediately brought under the control of the House cannot because there is no committee and no subpena power. The select committee is literally in a legal limbo.

The committee has assembled a staff of professionals who are continuing to proceed. Yesterday, members of the Kennedy subcommittee and I received a briefing from the staff outlining areas of investigation which require sustained effort. I know that if it were possible to divulge at this stage of the investigation the facts and evidence adduced, every reasonable-minded Member of the House would say: "By all means proceed." I believe that if the American people were to know these same facts and developments, they would never forgive us for not going on.

The staff is continuing to proceed with the acquisition and analysis of documents from all agencies of Federal, State, and local government. Unfortunately, where there is no legal authority, even the acquisition of documents has been seriously hampered.

Today, I received a letter from Attorney General Levi, properly advising me that until the committee is reestablished we are "unauthorized persons," and thus prevented from further examination and analysis of records. The Attorney General has assured me of his cooperation once the committee is reestablished and I am also advised that he has directed the Federal Bureau of Investigation to continue to process requests so it can be examined and analyzed as soon as the select committee is reestablished.

Finally, Mr. Speaker, I cannot too strongly stress that it is imperative that the select committee be established immediately. Unwarranted delay will permanently cripple the efforts of our investigations.

REMARKS UPON INTRODUCTION OF HOUSE RESOLUTION CONDEMNING FRENCH RELEASE OF TERRORIST ABU DAOUD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. TSONGAS) is recognized for 5 minutes.

Mr. TSONGAS. Mr. Speaker, I stand today to offer a House resolution the purpose of which is to express strong protest at the actions of the Government of France in releasing the terrorist accused of planning the Munich Olympic massacre of 1972.

The Munich massacre, of course, resulted in the murder of Israeli athletes. It was an event which focused world attention on terrorism and the product of such acts. The product then was the death of 11 innocent hostages. An event which occurred 2 days ago in France is also the focus of world attention. The product of this unfortunate event can only be a world held hostage by the threat of terrorism.

The hasty release of Abu Daoud by the Government of France is an unconscionable breach of international law and justice. The release took place despite the fact that the nations of Germany and Israel had requested extradition of Daoud, despite the fact that these nations had bilateral extradition agreements with France, despite the fact that France had recently signed a Council of Europe antiterrorism treaty, and despite the fact that this release is in direct contradiction to the laws protecting citizens of all countries.

Therefore, I am asking my colleagues to support a resolution which expresses the sense of the House that the release of Abu Daoud by the Government of the Republic of France was both premature and unjustified and that such action should be strongly protested and condemned.

I believe that this action will inform the world of this body's and this Nation's sense of outrage over the release of an alleged terrorist and mass murderer. And I believe that this action will discourage capitulation to terrorism in the future:

TSONGAS RESOLUTION

Expressing the sense of the House of Representatives with respect to the release of Abu Daoud, the alleged planner of the 1972 Munich massacre of 11 Israeli athletes, by the French Government.

Whereas the Government of the Republic of France has released Abu Daoud, the alleged planner of the 1972 Munich Massacre which resulted in the murder of 11 Israeli athletes;

Whereas Abu Daoud was accused of abhorrent crimes of terrorism that demand judicial pursuit when the opportunity arises;

Whereas the Government of France failed to hold Abu Daoud in consideration of requests for extradition by the governments of Germany and Israel;

Whereas the Government of France, a signee of the 1976 Anti-Terrorism Treaty, the purpose of which was to curtail world terrorism, has by this action ignored this treaty; and

Whereas this action of the Government of France violates the spirit of international law and morality and encourages terrorism and a disregard for the laws protecting citizens of all countries; Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that the release of Abu Daoud by the Government of the Republic of France was both premature and unjustified and that such action should be strongly protested and condemned.

CONGRESSMAN JOE MINISH HONORED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 5 minutes.

Mr. REUSS. Mr. Speaker, as chairman of the House Banking, Finance and Urban Affairs Committee, I am aware of the outstanding work of Congressman JOSEPH G. MINISH in the field of renegotiation. Since assuming the chairmanship of the Subcommittee on General Oversight and Renegotiation in early 1975, Congressman MINISH has led the way in exposing deficiencies in both the Renegotiation Act and in its administration by the Renegotiation Board. In 1976, he developed and pushed through the House legislation to provide for comprehensive reform of the renegotiation process.

I was pleased, therefore, to learn of the much-deserved praise Congressman MINISH received recently from that steadfast guardian of the taxpayer, Adm. Hyman G. Rickover. I want to share with my colleagues, remarks made earlier this month by Admiral Rickover, with regard to the gentleman from New Jersey:

REMARKS BY ADMIRAL H. G. RICKOVER, U.S. NAVY, CONCERNING CONGRESSMAN JOSEPH G. MINISH, JANUARY 4, 1977

I would like to say a few words about my good friend, Congressman Joseph Minish.

He is a man who knows where he stands on every question of life and affairs to an unusual degree. He has a warm heart and gift for friendship. He is one of those beings whose pace of life is faster and more intense than the ordinary. He is a sincere patriot; a wise, grave, sober-minded statesman; and a gay brilliant, loyal lovable being.

He remains inflexibly attached to first principles. He rarely traduces men's motives; he sometimes regards their decisions as foolish or founded on inadequate information.

His chief virtue is courage: and to brave men most things can be forgiven. Another virtue of importance is "honor". When presented before the bar of history men will

have to answer the question whether in crisis they acted honorably.

The single, central, organizing principle of his moral and intellectual universe is a strong and comprehensive and historical imagination.

He knows a great deal about the Renegotiation Board, and far more than most of the so-called experts in this field. He has been in the vanguard of those farsighted members of Congress dedicated to protecting the public interest in this field.

I am particularly grateful to him for the unfailing support he has given to our efforts to protect the Government's interests. For this, the United States owes him a debt of gratitude.

It was his committee which held special hearings in 1975 to bring into focus the need for strengthening the Renegotiation Board.

He permits nothing to deter him from doing his duty to the United States.

In the business of government, any movement from hideous to bad is progress, from hideous to fair is spectacular. And Congressman Minish has done more than his share to achieve the spectacular for us.

He does not agree with many of our pseudo-intellectuals who are drowning in their own words and suffocating in their own documents.

He thinks that knowledge is preferable to ignorance; human sympathy more valuable than ideology. That in spite of the recent triumphs of science, men have not changed much, and in consequence we must still try to learn from history.

Future generations will, I am sure, remember him above all for what he has done to preserve our heritage than for anything else.

INTERNATIONAL TERRORISM PRESENTS A THREAT TO ALL NATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WOLFF) is recognized for 5 minutes.

Mr. WOLFF. Mr. Speaker, the recent release of Black September terrorist Abu Daoud by the French Government is an affront to American citizens, as well as to Israelis and West Germans. What has been overlooked in the quite understandable focus on the Munich Olympic massacre is that the American people, too, have a legitimate interest in Abu Daoud—he was the spark for the murder of two of our diplomats in Khartoum, Sudan, in 1973.

As such, France's action, taken despite the expressed intentions of both Israel and West Germany to request his extradition, serves to emphasize the lack of a comprehensive international framework within which to combat terrorism.

On January 4, 1977—several days before the release of Abu Daoud—I reintroduced House Concurrent Resolution 46, "urging that the President actively seek an international convention which has as its goal a multilateral treaty to deny sanctuary to international terrorists." But the cynical and craven action of the French Government has provided my bill an impetus it hardly needed. I hope that Congress and the White House will act swiftly so that France or any other country presently content to appease terrorists' interests will in the future be forced to act in concert with all nations to interdict terrorism and promote world peace.

The problem of international terrorism represents a serious and continuing threat to the safety and welfare of citizens of all nations. It represents an equally serious and continuing threat to orderly governmental and political processes, international transportation, communications, commerce, and diplomatic relations.

During the past decade, terrorism has become a major international phenomenon yet has been met with only minor international attempts to deal with it.

Clearly, solutions to this problem are difficult at best. Certain states have demonstrated a willingness to harbor, train, and arm terrorists; the sophistication of today's news media serves as a double-edged sword, giving terrorists the broadest possible forum for their statements and actions; and weapons, including not only conventional arms but chemical, biological, and radiological agents as well, will become increasingly available during the next several years. The fear many people now share concerning the inevitability of a terrorist takeover of a nuclear facility can only be viewed as harshly realistic.

The spread of such terrorist activity must be halted. In 1976 alone, there were over 30 acts of terrorism—bombings, hijackings, kidnapings, and assassinations—in which hundreds of people were victimized, at least 75 were killed and many more injured. Yet collective international response has been reactive in nature and limited almost exclusively to marginally tightening internal security precautions and establishing several narrow treaties concerning hijacking and the protection of diplomats.

A far broader, more effective treaty is necessary if we are to prevent the further escalation of a dangerous and destructive political tactic, one which many experts assert will be increasingly directed against Americans and American territory. My resolution would encourage the President to seek such a treaty, and I urge my colleagues to join me by cosponsoring this resolution.

PROPOSING AN AMENDMENT TO CONSTITUTION TO PROVIDE DIRECT POPULAR ELECTION OF PRESIDENT AND VICE PRESIDENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 10 minutes.

Mr. RODINO. Mr. Speaker, Senator BAYH and 41 cosponsors have introduced in the Senate, Senate Joint Resolution 1, proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States. The Bayh amendment would abolish the electoral college system.

In the past I have been supportive of these efforts and I joined 338 of my colleagues in recommending a nearly identical constitutional amendment when it passed this House in 1969. I believe, however, that it is time for a new look, a closer look perhaps, in 1977. The electoral college system has served this Nation since its inception; it has elected each of our Presidents and has permitted an orderly constitutional mechanism for choosing executive leadership in every one of our 48 Presidential elections.

There are, it seems to me, important constitutional policy arguments that can be made in favor of retaining the existing structure. But at the same time we must recognize that under the present system it is possible for a candidate to receive a minority of the popular vote, but a majority of the electoral college vote, and thus to defeat the winner of a popular majority. This has happened only twice since 1824—and once in the dark and singular experience of 1876 which may in fact not be a relevant exception. But it remains a real possibility, an unhappy possibility, and consideration of the Bayh amendment raises a very fundamental question: Does the elimination of that possibility come at the expense of other values equally dear to our constitutional system?

At this time, I am not prepared to resolve that issue. A full and scholarly constitutional inquiry by the Judiciary Committee should precede that judgment. But Senator BAYH is to be saluted for the enormous energy and leadership he has demonstrated in championing this issue. There is none closer to the heart of our democracy.

I am proud to join Senator BAYH, therefore, in the introduction of this proposal. I look forward to working with the Senator, and with the Members of this House in addressing this critical issue. If a constitutional change is in order, we must not hesitate to act. If it is not in order, that too is important for us to understand.

Mr. Speaker, I am attaching to these remarks a copy of the Bayh amendment which I have introduced in the House today:

H.J. RES. 144

Joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"ARTICLE—

"SECTION 1. The people of the several States and the District constituting the seat of government of the United Staes shall elect the President and Vice President. Each elector shall cast a single vote for two persons who shall have consented to the joining of their names as candidates for the offices of President and Vice President. No candidate shall consent to the joinder of his name with that of more than one other person.

"SEC. 2. The electors of President and Vice President in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature, except that for electors of President and Vice President the legislature of any State may prescribe less restrictive residence qualifications and for electors of President and Vice President the Congress may establish uniform residence qualifications.

"SEC. 3. The persons joined as candidates for President and Vice President having the greatest number of votes shall be elected President and Vice President, if such number be at least 40 per centum of the whole number of votes cast.

"If, after any such election, none of the persons joined as candidates for President and Vice President is elected pursuant to the preceding paragraph, a runoff election shall be held in which the choice of President and Vice President shall be made from the two pairs of persons joined as candidates for President and Vice President who received the highest numbers of votes cast in the election. The pair of persons joined as candidates for President and Vice President receiving the greater number of votes in such runoff election shall be elected President and Vice President.

"SEC. 4. The times, places, and manner of holding such elections and entitlement to inclusion on the ballot shall be prescribed in each State by the legislature thereof; but the Congress may at any time by law make or alter such regulations. The days for such elections shall be determined by Congress and shall be uniform throughout the United States. The Congress shall prescribe by law the times, places and manner in which the results of such elections shall be ascertained and declared. No such election, other than a runoff election, shall be held later than the first Tuesday after the first Monday in November, and the results thereof shall be declared no later than the thirtieth day after the date on which the election occurs.

"SEC. 5. The Congress may by law provide for the case of the death, inability, or withdrawal of any candidate for President or Vice President before a President and Vice President have been elected, and for the death of both the President-elect and Vice President-elect.

"SEC. 6. Sections 1 through 4 of this article shall take effect one year after the ratification of this article.

"SEC. 7. The Congress shall have power to enforce this article by appropriate legislation."

PITTSBURGH PUBLIC WORKS EXPERIENCE—A SOUR ONE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. MOORHEAD) is recognized for 5 minutes.

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, based on my personal experience and that of the largest community in my district, the city of Pittsburgh, I expect that most comments on the recent distribution of public works funds will be sour ones. I know mine will.

I still believe in the program. I am sure that once implemented these projects will improve local unemployment rates, with the ancillary benefit that many local governments will have much needed public facilities. Yet, there must be a more equitable method of distributing the money.

The city of Pittsburgh, with an unemployment rate of 9.4 percent, much higher than the national average, received not one penny in the recent allocation of funds.

Yet smaller communities contiguous to the city with lower actual jobless rates, did very well.

In fact, the entire western Pennsylvania area did abysmally when compared with our brothers in the eastern part of the State.

Yet this very possibility of funds concentrated in one geographic area to the detriment of another—which I warned EDA about weeks before any funds were sent out—did indeed occur.

As I said earlier, I very much support the public works program as a viable antirecession tool. I have joined with the House leadership in introducing legislation to make more public works funds available for local units of government, but there must be changes in the distribution methods if needy governments truly are to be served by this program.

First off, any new funds must go first to those communities with legitimate needs that were denied on the first allocation. This is simple equity.

Second, smaller units of government cannot be permitted to use the unemployment statistics—always much higher—of a larger, parent unit of government.

Third, there must be some priority put on the types of projects to be undertaken. Tennis courts and recreation parks—while important—cannot have the same relevance as public safety facilities, needed utility work, and urgent bridge and road repairs.

While the Congress approved the 70–30 distribution method, we must either alter the formula to guarantee that deserving local government requests are funded or insure that maldistribution within the 70-percent category does not occur. Pittsburgh's needs were ignored, overlooked, because of a computer error. Hogwash, as I told the Assistant Secretary of Commerce, computers do not make errors, it is the people who program them that make the errors. I do not want that to happen again.

I believe that changes such as I have suggested, plus a new administration, which I believe is more attuned than current officeholders to the needs of metropolitan areas and cities, will result in a more fair and judicious parceling out of public works funds.

To further amplify the Pittsburgh experience, I would like to include in the RECORD at this time, a Pittsburgh Press article, detailing a meeting Mayor Peter Flaherty and I had with senior EDA officials, and an editorial from the Pittsburgh Post-Gazette:

[From the Pittsburgh Press, Dec. 31, 1976]

PETE'S FEDERAL FUNDS PLEA FAILS

(By William Wisser)

Mayor Pete Flaherty returned empty-handed from Washington after pleading with federal officials who ignored Pittsburgh in their $2 billion Christmas Eve giveaway.

Uncle Sam forgot America's 24th most populous city when he gave out the goodies—even though Pittsburgh had submitted a gift list requesting $29.4 million for 31 public works projects.

"They just never got to Pittsburgh," said Flaherty yesterday upon his return. "They got to about 100 cities and quit."

Congress created the $2 billion program to stimulate employment.

Seventy per cent of the money was to go to areas where unemployment exceeded the national average of 8.1 per cent.

Pittsburgh—with an unemployment rate of 9.7 per cent—seemed like a sure recipient.

A bridge over Murray Avenue, the reconstruction of 12 streets, new sewers and water lines and repairs to the city water plant, parking garages and Phipps Conservatory were among the projects on the city's grant applications.

But Steel City didn't finish in the money, while Philadelphia and southeastern Pennsylvania took 34 percent of the cash allocated to the state.

Flaherty and U.S. Rep. William S. Moorhead, D-Shadyside, met yesterday with John Eden, U.S. assistant secretary of commerce, who supervised the giveaway.

According to Moorhead, Eden said he was sorry.

"He was really kind of shocked when he found only 1 percent (of the state allocation for high unemployment areas) went to this area of the state," Flaherty added.

Moorhead reported that Eden said computers made the allocations.

"Don't blame the computers," Moorhead says he retorted. "You program the computers, they do what you want."

Though Pittsburgh didn't get a penny, 15 of 16 Allegheny County suburban communities which were given funds have unemployment rates below the national average.

Monroeville, for example, where unemployment is 5.5 percent, will get $891,000 to build a new garage.

And Bridgeville, with unemployment at 4.4 per cent, is to receive $225,000 for sewers and repaving New York Avenue.

The suburban towns were given money out of the 30 percent share allocated nationally for communities with lower than average unemployment.

The struggle, Flaherty indicated, is not between Pittsburgh and its suburbs—but between East and West. And Eastern Pennsylvania won.

The U.S. Commerce Department has the power to correct inequities, but Flaherty held out little hope.

"The problem," he said, "is that the allocations have already been published in the Federal Register."

Meanwhile, House Democrats yesterday proposed doubling the funds. The program was established over President Ford's veto in August to ease unemployment in the building trades.

Rep. James Wright, D-Tex, said legislation to add another $2 billion to the program will be introduced when Congress reconvenes Tuesday.

President-elect Jimmy Carter favors enlarging the fund, according to Wright. Carter is to consult with congressional leaders next week.

And U.S. Rep. Robert A. Roe, D-N.J. chairman of a House public works subcommittee, sided with big city mayors who blasted the federal funding formula.

Kenneth A. Gibson, mayor of Newark, N.J. and president of the U.S. Conference of Mayors, has asked Congress to investigate allocation of grants in which "smaller local government jurisdictions received a disproportionate share of the money in relation to their population."

Gibson rapped the Ford administration for quietly announcing the grants Christmas Eve and allegedly favoring suburban towns over big cities that are in deep fiscal trouble.

Phoenix, Seattle, Tojedo, Chattanooga, Oklahoma City, Pittsburgh, * * * Palm Desert, Calif. got $2 million.

Flaherty, asked about the proposal to give away an additional $2 billion, said:

"I want my share now (of the first grants). Plus my share of any further ones."

Armstrong, Butler, Clarion, Clearfield, Indiana, Lawrence and Somerset counties also were ignored in the gift-giving.

The Armstrong commissioners demanded that President Ford investigate.

THE CROSS-EYED ELVES

[From the Pittsburgh Post-Gazette, Jan. 3, 1977]

If God didn't love Glenfield Borough in Allegheny County, he would not have in-

vented the U.S. Department of Commerce. It gifted Glenfield's population of 406 with nearly a half-million dollars in public-works money. To Pittsburgh's half-million population—8.8 per cent of whom are unemployed—it gave nothing.

But then the cross-eyed elves who pose as planners and computer programmers at Commerce apparently made a list and, checking it twice, saw big-city dwellers as naughty and suburbanites as nice.

Which is apparently why they chose to give population runts like Upper St. Clair and Palm Desert, California, over a half-million dollars and $2 million respectively, while to Phoenix, Seattle, Chattanooga, Oklahoma City, Toledo and Pittsburgh the elves awarded only the hole in the $2-billion public-works doughnut.

The elves, however, didn't consistently equate bigness with unworthiness. Philadelphia and southeastern Pennsylvania got 34 per cent of the $58 million programmed for Pennsylvania, compared to the laughable 1 per cent to be sprinkled over all of southwestern Pennsylvania.

To be objective about Commerce's zaniness, however, we should note that public-works contracts let by suburban communities will draw on unemployed building-and-construction tradesmen from the snubbed cities. Still, that a high-unemployment city like Pittsburgh, which submitted proposals for $30 million in needed construction projects, got not a cent is indefensible—except, perhaps by elf logic.

If the silly grinners at Commerce can't come up with sensible answers, then, Mayor Flaherty and other mayors should instruct their solicitors to make a federal case out of it.

The best way to fight unemployment in Pittsburgh, meanwhile, may be to fire the elves at Commerce.

PANAMA CANAL AND THE MONROE DOCTRINE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 5 minutes.

Mr. FLOOD. Mr. Speaker, one of the major developments relating to the security of the United States that I have stressed on various occasions in connection with the Panama Canal is the Soviet threat in the Caribbean and its violation of the Monroe Doctrine. These dangers were dramatized in the aggression in Angola by the Soviet-Cuban axis.

Among current writings on this subject is a 1976 booklet by Isaac Don Levine, distinguished authority on Soviet history and policies entitled "Hands Off the Panama Canal," published by Monticello Books, Suite 500, 1735 De Sales Street NW., Washington, D.C. 20036.

A recent perceptive review of this book by Allan C. Brownfeld, an able Washington political analyst, stresses some of the main points in the volume and calls for the rediscovery by the United States of the Monroe Doctrine.

The indicated book review follows:

PANAMA CANAL AND THE MONROE DOCTRINE

(By Allan C. Brownfeld)

Ever since 1823, the Monroe Doctrine has been a basic element in American foreign policy. That Doctrine states clearly and precisely that the United States will not tolerate the interference of any European power in the Western Hemisphere.

Few remember that the Doctrine owes its birth to Russia's imperialist thrust from Alaska south. In 1819, the St. Louis *Enquirer* spelled it out in these terms: "Americans have failed to notice the advantage of the Russians on the Pacific Coast until they have succeeded in pushing their settlements as far south as Bodega. Their policy is merely the extension of the policy of Peter the Great and Catherine. Alexander is occupied with a scheme worthy of his vast ambitions . . . the acquisition of the gulf and peninsula of California and the Spanish claim to North America."

The matter finally came to a head on July 17, 1823, when Secretary of State John Quincy Adams conveyed his views to the Russian minister in Washington.

"I told him specially," Adams recorded in his diary, "that we should contest the right to *any* territorial establishment on this continent, and that we should assume distinctly the principle that the American continents are no longer subject to *any* new European colonial establishments."

In this message, Adams laid the keystone to the forthcoming Monroe Doctrine. "It is indeed the most important principle connected with the Monroe Doctrine," according to Dexter Perkins. The declaration of the Monroe Doctrine was a daring thing for a new nation of 10 million to embark upon. President Monroe, however, managed to prevail.

Today, however, very little is heard about the Monroe Doctrine. The Soviet Union *does* have a colony in the Western Hemisphere—Cuba. The effort by the Cuban-supported radical government of Panama to remove the U.S. from the Panama Canal Zone and take over that U.S. territory is part of a larger effort of the Soviet Union to expand its own power and authority in the Western Hemisphere—something we have been pledged to oppose ever since 1823.

In an important new study, *Hands Off the Panama Canal* published by the American Council for World Freedom, the distinguished journalist and author Isaac Don Levine has placed the Panama Canal dispute in its proper historical perspective.

"What is at stake in the controversy over the Panama Canal," Mr. Levin writes, "is the existing Soviet armed footing in Cuba—a springboard for a leap to the canal—and not the question of replacing the outmoded 1903 treaty with a new pact. That is a matter which can be solved by agreements providing enhanced emoluments and benefits for the great majority of the Panamanian people. The real challenge in the combustible issue is to the vital national interests of the U.S. in a critical strategic area—the Caribbean."

The fact is that Fidel Castro has continued to defy the basic safeguards of the Monroe Doctrine and its inter-American extensions. These safeguards are embodied in a series of accords supplementing the Good Neighbor policy, the crowning point of which is the declaration adopted in Caracas in March 1954 by the 10th Inter-American Conference. There all of the republics in this hemisphere bound themselves to act collectively against "the domination or control of the political institutions of any American state by the international Communist movement, extending to this hemisphere the political system of extra-continental power, which would constitute a threat to the sovereignty and political independence of the American states."

Isaac Don Levine has been a careful observer of the Soviet Union ever since he covered the Russian Revolution as a reporter and was stationed in the USSR as a correspondent for the Chicago *Daily News*. He was the first biographer of both Lenin and Stalin and it was he who first persuaded Whittaker Chambers to speak publicly. He has done all Americans an important service by turning his attention to the question of the Panama Canal—and our much forgotten Monroe Doctrine.

Concerning the notion that the Panama Canal is somehow not sovereign U.S. territory, Mr. Levine declares that ". . . nowhere in all the 26 Articles of the Convention . . . is there any clause reserving our sovereignty or affirming it for the Republic of Panama over the areas granted by it to the U.S. On the contrary, the stipulations of the Convention on the point are crystal clear."

The Monroe Doctrine, Mr. Levine points out, "was fashioned by leaders who were convinced that appeasement invites aggression, that a bully cannot be stopped with diplomatic syrup. . . .

"The Soviet leap to Angola with the aid of a Caribbean expeditionary force marks a new departure in the strategy of the Kremlin. It sets a precedent of aggression by proxy which cannot be allowed to stand. It must be reversed, and it can be done without firing a shot. Unless that is achieved, the Soviet-Cuban dagger threatening the Panama Canal portends the coming of a catastrophe. . . . The real choice before the U.S. in Panama is between unimpaired American control of the canal and a threatening takeover by the Soviet imperialists. . . ."

It is high time that the U.S. rediscovered the Monroe Doctrine. The Soviet takeover of Cuba is a violation of that Doctrine which we have somehow permitted. If the Panama Canal follows, the Doctrine will be truly dead. A reaffirmation of the Doctrine, Mr. Levine states, "would proclaim to the world the time-honored right of this nation, in the interest of its security, to demand that Castro sever his military ties with the Soviet Union. These ties are in violation of the Monroe Doctrine. . . ."

LEGISLATION TO COMBINE IN ONE BILL PROPOSALS OF NATIONAL WILDLIFE REFUGE SYSTEM AND PRIMITIVE AREAS IN NATIONAL FOREST SYSTEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona (Mr. UDALL) is recognized for 5 minutes.

Mr. UDALL. Mr. Speaker, when the Wilderness Act was enacted in 1964, a new and innovative process of citizen participation in the formulation of Federal land management policy was set in motion. For, while the Wilderness Act required the three Federal land management agencies covered by the act—U.S. Forest Service, National Park Service, and U.S. Fish and Wildlife Service—to review certain qualified lands for possible inclusion in the National Wilderness Preservation System, the act also required public hearings on the results of agency field investigations. Thus, for the first time in the history of public land law, citizen involvement was a required step in agency decisionmaking.

Since 1964 a consistent pattern of citizen participation has emerged. All across the country individuals and groups have conducted their own field investigations of areas which the Agency was then in process of reviewing and have presented their findings at public hearings on the proposed wilderness area. These findings of citizen study teams often have concurred with the Agency proposal, but just as often they have not, differing mainly on boundary locations. Similarly, these boundary differences—usually based on differing opinions on how the entrance criteria contained in section 2(c) of the Wilderness Act should be applied to a

wilderness proposal—have been accepted on occasion by the Agency, but often have been lacking in recommendations later transmitted by the President to the Congress.

In any case, it is the function of the Congress to draw final wilderness boundaries, utilizing all available and pertinent information on each wilderness proposal, when enacting legislation incorporating a wilderness in the National Wilderness Preservation System.

The Wilderness Act required the wilderness review agencies to finish their reviews and the President to make his recommendations to the Congress within 10 years, or by September 3, 1974. While the Forest Service completed its reviews of primitive areas in a planned, systematic manner. Department of the Interior agencies dawdled along creating a situation where field reviews on most areas were not completed until late 1973 and early 1974. Recommendations by the President on the last of these areas were not sent to the Congress until several months after the 10-year deadline, thus creating a backlog of areas awaiting congressional consideration. As a matter of fact, when combined with other wilderness proposals remaining from previous session, a considerable backlog was created. This backlog was reduced somewhat by the 94th Congress when 32 areas were designated as wilderness. Still remaining are 39 national wildlife refuge proposals, 15 national forest primitive areas, and 40 national park units.

Mr. Speaker, the bill I am introducing today combines in one bill all National Wildlife Refuge System proposals and primitive areas in the National Forest System now pending before the Congress for consideration as wilderness. These proposed wilderness areas constitute the entire backlog of these two land conservation systems which have been reviewed by the administering agency pursuant to the review requirements of the Wilderness Act. In all cases the proposed wilderness boundaries are those recommended by local citizen sponsors although, I might point out, many of them are identical to those recommended by the agency, including certain boundary adjustments which are proposed for some areas so that adjoining Federal lands containing wilderness characteristics will be administered as wilderness.

Mr. Speaker, wilderness is our country's highest form of land dedication. Values of wilderness to the American people are multiple in nature, not just primitive recreation alone since wilderness is an ecological condition where all values and uses are administered to maintain a natural condition. Wildlife, plant communities, watershed, scenic, and similar values are maintained, oftimes to the benefit of people far removed from an individual area. I ask my colleagues to join with me in assuring that these wilderness proposals are added to the Wilderness System as part of a continuing effort to fulfill the promise of the Wilderness Act of 1964 "To secure for the American people of present and future generations the benefits of an enduring resource of wilderness."

THE RELEASE OF PALESTINIAN TERRORIST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. DODD) is recognized for 5 minutes.

Mr. DODD. Mr. Speaker, I would like to express my deep sense of outrage at the French Government's shameless release of Palestinian terrorist Abu Daoud, the suspected mastermind of the 1972 massacre of 11 Israeli athletes at the Munich Olympic games.

France's cursory review of the Israel and West German requests for the extradition of Abu Daoud, and their dismissal on a technicality followed by the sudden release of Daoud constitute one of the worst offenses to justice that we have ever witnessed on the part of the French Government.

In freeing Daoud and providing him safe voyage to Algeria, France has blatantly disregarded its moral obligation to international justice for the sake of the most expedient of political purposes. Clearly, France's priority in this matter appears to be the economic benefits that it stands to gain through the maintenance of close relations with the Arab States.

An assured supply of oil, and continued sales of Mirage fighter jets to Middle Eastern buyers are among the stated goals of French foreign policy, and as of 2 days ago, they seemingly have become its No. 1 consideration.

Today, my priority is to express to the French Government my personal indignation in the face of this act of moral cowardice. With a number of my colleagues, I am sending French President Valery Giscard d'Estaing a telegram in which we convey to him directly our immense disappointment in France's action.

Also, to do more than verbally protest, I am making a personal commitment to engage in a boycott of all French products imported into this country.

I know that millions of Americans share in the horror and grief that much of the world feels in the face of this action by France, and that they would like to show their anger in a personal but concrete way. Thus, I ask all my colleagues, my constituents, and all concerned members of the American public to join me in this voluntary boycott of French products.

It does not by any means entail large sacrifices on our part, but may well succeed in getting the powerful message across to the French Government that it will face our united moral outrage, and perhaps economic hardships, if it continues to act in such a disgraceful manner.

RELEASE OF ARAB TERRORIST IN PARIS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 5 minutes.

Mr. BINGHAM, Mr. Speaker, it is difficult finding words strong enough to condemn the French decision to release the architect of the Munich Olympic massacre, Abu Daoud. Recent years have seen many instances of international pusillanimity in dealing with terrorists but this action truly marks a new low. In previous instances various nations have yielded to the demands of terrorists who were holding their nationals hostage in the air or on a desert tarmac. They were able to claim—sometimes justifiably—that they yielded only to spare the lives of innocents and that they had no choice but to surrender. Negotiations were at gunpoint and the terrorists held every advantage.

The French authorities can make no such claim today. French intelligence agents arrested Abu Daoud in Paris. It was a clean arrest. No civilians of any nationality were being held by Daoud's gang. The French held all the cards. There was every reason to expect that the French Government would have honored its extradition treaty with Israel or West Germany and would have dispatched Daoud to some form of justice. Instead Daoud was released, given first class air passage and flown to Algiers, the destination of his choice. The French have thus devised a new strategy in dealing with terrorists—preemptive surrender.

Whether the action was in fear of future terrorist activities or in fear of jeopardizing arms sales to Arab countries, the release presents an appalling spectacle. French authorities might object to our words of reproval and condemnation. Nevertheless they must be made to understand that terrorism is an international problem that must be dealt with in an international forum. It is well within our province to object and to object strenuously.

In Israel today, the widows and children of the 11 slain athletes stand helpless. The murderer of their husbands and fathers is free to murder again. The French Government is free to sell 200 F–1 bombers to Egypt. The franc and the French balance of trade are, for the moment, saved. But what of French honor? The release of Abu Daoud is a blot on the French nation. I have joined with Senator HASKELL and others in both bodies in a strong letter of protest to the French Ambassador to the United States. I only hope that we can begin to convey our sense of outrage.

THE STAMPEDE TOWARD MILITARY RETIREMENT CHANGES

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, each year as the dollar amount of the Defense budget grows, there is increased focus on the personnel portion of the budget. Inflation is forcing an upsurge in all defense costs. If the budget remains approximately constant, personnel will require a greater share of the available dollars than before. Personnel cannot be fully effective without modern weapons. This produces a quandary about military budget policies.

As a result, there have been many rec-

ommendations for change to the military personnel management and compensation systems, with the focus on reduction in personnel costs. One of the principal targets for change is the retirement system. The proposals range in scope from minute adjustments to sweeping overhaul, and they have emanated from widespread sources including the Congress, GAO, private research groups, and the press. Most of the proposals are offered in good faith and some of them provide needed insights into how we may be able to improve the efficiency of defense spending. Many, however, fail to recognize that the military compensation system must be designed to help the services achieve an in-being manpower force of the proper size, age, training, and experience to meet defense requirements. These ideal forces do not just happen.

Retention of trained personnel is essential. To attract and retain the professional cadre, the services have built career management plans that provide visible and stable career progression structures. Unfortunately, many proponents of change have developed their proposals out of context with the personnel management system.

The personnel plans of the services have been constructed after years of reasoned thought, and I am convinced that the retirement system requires the same judicious consideration before changes can be made.

I want to touch on some of the misconceptions evident in the various retirement proposals. For example, advocates of drastic revisions to the military retirement system often base their rationale on the contention that military pay rose 134.5 percent from 1964 through 1975 while the Consumer Price Index rose only 73.4 percent. If viewed in a strictly statistical sense and taken out of context with the significant events which took place from 1964 through the inception of the All-Volunteer Force in late 1971, these statistics seem to lend credence to the critic's claim. One sees an entirely different picture, however, if the period is split into two segments with January 1, 1972, as the dividing point. This date is chosen as a benchmark since it was identified in an annual OSD report to Congress as a point at which military compensation had for the first time attained reasonable competitiveness with the private sector.

Conscious, positive steps were taken to improve the military standard of living, and the competitiveness of military pay. Between October 1966, and January 1972, basic pay was raised 50 percent for careerists and 77 percent for first-term personnel while the cost of living rose only 25 percent. Do not forget the low pay levels of prior years.

The reputed competitiveness of military pay attained in 1972 has not been maintained over the 4 intervening years. Between January 1, 1972, and the recent October 1, 1976, raise, the cost of living has risen by 41 percent while military basic pay has been raised only 30 percent.

To an E–7 with over 18 years of service, this means that his current $10,800 annual basic pay buys $590 less than the $8,300 a comparable E–7 received in 1972. The problem is that the loss of purchasing power is the only experience of the nearly 60 percent of current active duty personnel who have entered the services since January 1972. These personnel have not experienced any of the quantum increases in compensation which occurred in the mid-to-late 1960's. In addition, they have seen a wide range of their benefits reduced under the guise that adjustments were necessary to compensate for the pre-1972 raises provided to move military personnel out of poverty income levels—50,000 families in 1969—and transition to the All-Volunteer Force. These members of the All-Volunteer Force reject the logic that retired reform is necessary because they are overpaid.

Frankly, even with the current compensation and retirement system which critics view as being overly generous, the services are having a hard time meeting their personnel requirements. For example, about 79 percent of enlisted entrants separate prior to attaining 5 years of service. Obviously the conditions of military service which many critics are willing to blithely write off as inconsequential in compensation comparisons are actually considered unattractive as a way of life by a large majortiy of the civilian labor force.

Critics of the military retirement system usually find it convenient to make such sensational statements as "military retirement costs will be $35 billion in the year 2000." However, such statements fail to point out that by using the same economic assumptions:

Today's average family income of $10,000 would be $36,000;

Today's social security wage base of $15,300 would be $55,000;

Today's congressional salary of $44,600 would be $160,000.

A more in-depth examination would reveal that the average annual cost of the military retirement system without inflation or pay increase by the year 2000 would actually be only 10 percent greater than it is today. This increase in cost would be attributable solely to increases in the military retired population. The size of the retired population is of course a direct result of public national policy decisions on the size of the military forces required for national defense, to include World War II, and the Korean and Vietnam conflicts. It would be inequitable to allow today's active duty members to be victimized by costs associated with previous national policy decisions.

The sense of urgency for retirement reform is quite often heightened by the common misconception that the size of the military retiree population will continue to increase forever. Contrary to this belief, projections show that the retiree population will peak in approximately the year 2005, after which it will decline slightly and stabilize. Of course, as the population stabilizes so will retirement costs.

Critics who contend that military pensions are too high in relation to desired levels often base their conclusions on comparisons with the private and public sectors. A benchmark often used is pensions as a percent of final salary after 30 years of service which results in percentages of 59 and 62 for enlisted and officers respectively. This type of comparison does not recognize the real world, that is, that because of the selective retention feature of the personnel management system the vast majortiy of military personnel are forced to retire short of a 30-year career. A more realistic display of military pensions as a percent of final salary is as follows. The table treats total military compensation, not just basic pay, as a comparison with total civilian compensation:

Years of service and percent of salary

	Years	Percent
04	20	40
05	23	46
06	29	59
E–4	20	34
E–5	20	35
E–6	23	41
E–7	25	46

*NOTE.—Regular military compensation (RMC) is basic pay, basic allowance for quarters, basic allowance for subsistence, and tax advantage and is considered to be the military equivalent of civilian salary.

Incidentally, these percentages are pretty much in line with those found in paramilitary civilian organizations—police and fire departments—organizations which must maintain a vigorous, youthful work force.

The limited room at the top of the military organization structure coupled with the objective of a young force, vigorous enough to serve and survive in the field and at sea, requires large numbers of careerists to retire before they reach 30 years service. Accordingly, we need to deal equitably with individuals who have devoted prime earning years to military service and are no longer needed. Members who are forced out to meet personnel management needs of the services are severely disadvantaged by having to enter the civilian labor market—middle aged with limited civilian experience and skills. In this regard, a 1967 DOD study showed that members who enter a "second career" receive income which is on the average smaller than their active duty income just prior to military retirement. Therefore, reducing retired pay on the basis of outside earnings would unfairly single out the military community.

In summary, any change to the military retired pay system must be designed to meet the force management objectives of an armed force, not the practices of civilian employment. The Defense Department has twice submitted a retirement modernization proposal to Congress—one which would complement its personnel management objectives and at the same time provide a savings of near $12 billion by the year 2000. This proposal will no doubt be submitted again. At this juncture, it is difficult to predict whether or not higher priorities will permit congressional consideration of retirement legislation this year. However, if they should, I can assure you

that I intend to play an active role in the development of a retirement modernization proposal which will insure equity to both military personnel and taxpayers.

DR. MARTIN LUTHER KING

(Mr. WHALEN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. WHALEN. Mr. Speaker, January 15 is the 48th anniversary of the birth of Dr. Martin Luther King, Jr.

More than any other single person, Dr. King helped put our Nation on the road to racial equality and justice for all. He began his long struggle for freedom in 1955, when a tired black woman in Montgomery, Ala., refused to relinquish her bus seat to a white person, and a 382-day Negro boycott of buses ensued. Thus, Dr. King's courageous attempt to advance humanity through the means of passive resistance and respect for all fellow humans had begun.

More than a man of eloquent words, Martin Luther King, Jr. practiced what he preached. "Civilization and violence are antithetical concepts," he said as he accepted the 1964 Nobel Peace Prize. And throughout his campaign for human freedom and equality, he never once resorted to violence. He said:

> I have the audacity to believe that peoples everywhere can have three meals a day for their bodies, education and culture for their minds, and dignity, equality and freedom for their spirits.

Let us remember these principles by which Dr. King conducted his life, and let us honor his commitment to the advancement of civilization.

A resolution has been introduced to authorize the commissioning of a statute or bust of Dr. Martin Luther King, Jr. for placement in the Nation's Capitol. At present, there is not a single statue or portrait of a black American in the Capitol. We can begin to remedy this omission by establishing such a memorial.

Today I have joined a number of colleagues in introducing a resolution which would achieve this goal. This commemoration will do more than honor a great American. It will be a symbol of the dream Dr. King shared with America and with the world. It will be a symbol of the principles for which he sacrificed his life.

Finally, as we honor Dr. King this weekend, let us remember what he said in response to a critic who once asked him when he would ever end his crusade. "We will not be satisfied until justice rolls down like water and righteousness like a mighty stream."

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BAUMAN) to revise and extend their remarks and include extraneous matter:)

Mr. MICHEL, for 5 minutes, today.
Mr. KEMP, for 15 minutes, today.
Mr. KASTEN, for 5 minutes, today.

(The following Members (at the request of Mr. SKELTON) to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 15 minutes, today.
Mr. TSONGAS, for 5 minutes, today.
Mr. REUSS, for 5 minutes, today.
Mr. WOLFF, for 5 minutes, today.
Mr. RODINO, for 10 minutes, today.
Mr. MOORHEAD of Pennsylvania, for 5 minutes, today.
Mr. FLOOD, for 5 minutes, today.
Mr. UDALL, for 5 minutes, today.
Mr. DODD, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. BAUMAN) and to include extraneous matter:)

Mr. GILMAN in two instances.
Mr. MCCLORY in two instances.
Mr. LENT.
Mr. CEDERBERG.
Mr. BAUMAN in 10 instances.
Mr. CORCORAN in two instances.
Mr. RUPPE.
Mr. FORSYTHE.
Mr. HANSEN in two instances.
Mr. MICHEL.

(The following Members (at the request of Mr. SKELTON) and to include extraneous material:)

Mr. BREAUX.
Mr. VANIK.
Mr. RICHMOND.
Mr. GAYDOS.
Mr. DRINAN.
Mr. DOWNEY.
Mrs. KEYS.
Mr. CONYERS.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. MINISH.
Mr. FISHER in three instances.
Mr. BINGHAM in five instances.

ADJOURNMENT

Mr. SKELTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 29 minutes p.m.), under its previous order, the House adjourned until Monday, January 17, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

394. A letter from the Acting Secretary of Agriculture, transmitting the report on the activities of the Rural Electrification Administration for fiscal year 1976 and the transition period ending September 30, 1976, pursuant to 49 Stat. 1366; to the Committee on Agriculture.

395. A letter from the Deputy Under Secretary of State for Management, transmitting a report on plans for improving and simplifying the personnel systems of the Department and the U.S. Information Agency, pursuant to section 117 of Public Law 94–350; to the Committee on International Relations.

396. A letter from the Acting Executive Director, Federal Communications Commission, transmitting the report on backlog of pending applications and hearing cases in the Commission as of October 31, 1976, pursuant to section 5(e) of the Communications Act, as amended (47 U.S.C. 156e)); to the Committee on Interstate and Foreign Commerce.

397. A letter from the Secretaries of Interior and Agriculture, transmitting the second report on the administration of the act to protect, manage, and control wild free-roaming horses and burros on public lands, for the 24-month period since June 1974, pursuant to section 10 of Public Law 92–195; jointly, to the Committees on Interior and Insular Affairs, and Merchant Marine and Fisheries.

398. A letter from the Director, U.S. Arms Control and Disarmament Agency, transmitting a report on professional and scientific positions established in the Agency During the calendar year 1976, pursuant to 5 U.S.C. 3104(c); to the Committee on Post Office and Civil Service.

399. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a report on recruitment and retention of federally employed physicians and dentists, pursuant to section 4(a) of Public Law 94–123; jointly, to the Committees on Veterans' Affairs, Armed Services, Interstate and Foreign Commerce, and Post Office and Civil Service.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON of California (for himself, Mr. ANDERSON of Illinois, Mr. BEARD of Rhode Island, Mrs. COLLINS of Illinois, Mr. CONTE, Mr. EMERY, Mr. ENGLISH, Mr. GIAIMO, Mr. GONZALEZ, Mr. HORTON, Mr. HOWARD, Mr. HUGHES, Mr. JACOBS, Mr. MCKINNEY, Mr. MITCHELL of New York, Mr. MURPHY of New York, Mr. NATCHER, Mr. PRICE, Mr. ROYBAL, Mr. SIKES, Mr. SIMON, Mr. STEED, Mr. STEERS, Mr. WAMPLER, and Mr. CHARLES WILSON of Texas):

H.R. 1808. A bill to amend title 38, United States Code, to provide for the payment of service pensions to veterans of World War I and the surviving spouses and children of such veterans; to the Committee on Veterans' Affairs.

By Mr. ARCHER:

H.R. 1809. A bill to amend title 5, United States Code, to exclude individuals who are not citizens of the United States from appointment in the competitive service, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. JOHN L. BURTON:

H.R. 1810. A bill to amend the Internal Revenue Code of 1954 to provide that proceeds from wagers placed on horseraces will not be subject to withholding; to the Committee on Ways and Means.

By Mr. CARNEY (for himself, Mr. BROWN of Ohio, Mr. BYRON, Mr. DEVINE, Mr. HARSHA, and Mr. LATTA):

H.R. 1811. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign

commerce; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange services; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. DON H. CLAUSEN:

H.R. 1812. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

By Mr. COCHRAN:

H.R. 1813. A bill to authorize the Secretary of the Army to study and recommend to the Congress remedial measures which may be undertaken to eliminate any problem relating to certain major tributaries which drain into the Mississippi River between Bayou Peirre and the Buffalo River in the State of Mississippi; to the Committee on Public Works and Transportation.

By Mr. COCHRAN (for himself, Mr. BEVILL, Mr. DUNCAN of Tennessee, Mr. EILBERG, Mr. HALL, Mr. KETCHUM, Mr. LOTT, Mr. MONTGOMERY, Mr. MURPHY of Pennsylvania, and Mr. WALSH):

H.R. 1814. A bill to amend the Internal Revenue Code of 1954 to exempt from taxation the pay received by members of the National Guard or of Reserve components of the Armed Forces to the extent that such pay does not exceed $5,000; to the Committee on Ways and Means.

By Mr. CORCORAN:

H.R. 1815. A bill to repeal the provisions of law allowing automatic cost-of-living adjustments in the salaries of Members of Congress; to the Committee on Post Office and Civil Service.

By Mr. CRANE:

H.R. 1816. A bill to provide for the confidentiality of medical and/or dental records of patients not receiving assistance from the Federal Government, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. CRANE (for himself, Mr. GRASSLEY, Mr. BROWN of Ohio, Mr. MOORHEAD of California, Mr. MCDONALD, Mr. ARCHER, Mr. LOTT, Mr. MATHIS, Mr. DERWINSKI, Mr. ANDREWS of North Dakota, Mr. COLLINS of Texas, Mr. LAFALCE, Mr. DAN DANIEL, Mr. KETCHUM, Mr. LAGOMARSINO, Mr. LENT, Mr. HYDE, Mr. BURGENER, Mr. TREEN, Mr. DEVINE, Mr. MARTIN, Mr. KINDNESS, Mr. FRENZEL, Mr. CLEVELAND, and Mr. SIMON):

H.R. 1817. A bill to provide that in civil actions where the United States is a plaintiff, a prevailing defendant may recover a reasonable attorney's fee and other reasonable litigation costs; to the Committee on the Judiciary.

By Mr. CARTER (for himself, Mr. DUNCAN of Tennessee, and Mr. MURPHY of New York):

H.R. 1818. A bill to establish a program of comprehensive medical, hospital, and dental care as protection against the cost of ordinary and catastrophic illness by requiring employers to make insurance available to each employee and his family, by Federal financing of insurance for persons of low income, in whole or in part according to ability to pay, and by assuring the availability of insurance to all persons regardless of medical history, and on a guaranteed renewable basis; jointly to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. CRANE (for himself, Mr. DICKINSON, Mr. NEAL, Mr. ENGLISH, Mr. MCKINNEY, Mr. MURPHY of Pennsylvania, Mr. RUNNELS, Mr. ROBINSON, Mr. EDWARDS of Alabama, Mr. ICHORD, Mr. COUGHLIN, Mr. STEERS, Mr. WHITEHURST, Mr. MCCORMACK, Mr. BADHAM, Mr. DUNCAN of Tennessee, Mr. NIX, Mr. HAGEDORN, Mr. COCHRAN, Mr. SCHEUER, Mr. TAYLOR, Mr. BUCHANAN, Mr. LUJAN, Mr. WAGGONNER, and Mr. SIKES):

H.R. 1819. A bill to provide that in civil actions where the United States is a plaintiff, a prevailing defendant may recover a reasonable attorney's fee and other reasonable litigation costs; to the Committee on the Judiciary.

By Mr. DE LUGO:

H.R. 1820. A bill to amend the Tariff Schedules of the United States to increase the personal exemption of miscellaneous articles imported by a resident returning from American Samoa, Guam, or the Virgin Islands to $400 and to increase the personal exemption of alcoholic beverages imported by a resident returning from American Samoa, Guam, or the Virgin Islands to 1⅕ wine gallons; to the Committee on Ways and Means.

By Mr. DOWNEY:

H.R. 1821. A bill to amend the Internal Revenue Code of 1954 to allow the deductions of the portion of certain taxes which is allocable to the construction of sewage treatment works; to the Committee on Ways and Means.

By Mr. ECKHARDT (for himself, Mr. ARCHER, and Ms. JORDAN):

H.R. 1822. A bill to modify the project for navigation at Houston Ship Channel (Greens Bayou), Texas, to maintain a 40-foot project depth in Greens Bayou; to the Committee on Public Works and Transportation.

By Mr. FAUNTROY:

H.R. 1823. A bill to provide for the issuance of a commemorative postage stamp in honor of Dr. Martin Luther King, Jr.; to the Committee on Post Office and Civil Service.

H.R. 1824. A bill to designate the birthday of Martin Luther King, Jr., as a legal public holiday; to the Committee on Post Office and Civil Service.

By Mr. FISHER:

H.R. 1825. A bill to amend the Internal Revenue Code to provide renters with a credit against income tax; to the Committee on Ways and Means.

H.R. 1826. A bill to provide that individuals who retired on disability before October 1, 1976, shall be entitled to the exclusion for disability payments under section 105(d) of the Internal Revenue Code of 1954 without regard to the income limitation in such section, and for other purposes; to the Committee on Ways and Means.

By Mr. FORSYTHE:

H.R. 1827. A bill to provide a comprehensive system of liability and compensation for oilspill damage and removal costs, and for other purposes; jointly to the Committees on Merchant Marine and Fisheries and Public Works and Transportation.

By Mr. JACOBS:

H.R. 1828. A bill to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only apply to taxable years beginning after December 31, 1976; to the Committee on Ways and Means.

H.R. 1829. A bill to provide a 2-year extension of time for the payment of so much of any income tax as is attributable to the application to 1976 of the change made by the Tax Reform Act of 1976 in the exclusion for sick pay; to the Committee on Ways and Means.

By Ms. JORDAN:

H.R. 1830. A bill to authorize in certain cases the appointment of a special judicial prosecutor and investigators to assist grand juries in the exercise of their powers; to the Committee on the Judiciary.

By Mr. KEMP:

H.R. 1831. A bill to restore public trust and confidence in the Congress of the United States and the conduct of its Members; jointly to the Committees on Government Operations, House Administration, the Judiciary, Post Office and Civil Service, Rules, and Ways and Means.

By Mr. LAFALCE:

H.R. 1832. A bill to amend the act of August 16, 1973 (Public Law 93-100) to extend the moratorium on State taxation of federally insured depository institutions; to the Committee on Banking, Finance and Urban Affairs.

By Mr. LEGGETT (for himself, Mr. FORSYTHE, Mr. BREAUX, Mr. MURPHY of New York, Mr. TREEN, Mr. ANDERSON of California, Mr. DE LUGO, Mr. BAUMAN, Mr. STUDDS, Mr. OBERSTAR, Mr. PRITCHARD, Mr. ROGERS, Mr. GINN, Mr. EMERY, Mr. BONKER, Mr. CHAPPELL, Mr. LEHMAN, Mr. PEPPER, and Mr. ROE):

H.R. 1833. A bill to provide for the development of aquaculture in the United States, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. MATHIS:

H.R. 1834. A bill to authorize the lease and transfer of tobacco from marketing quotas to farms in contiguous counties within the same State; to the Committee on Agriculture.

H.R. 1835. A bill to require that imported palm oil and palm oil products made in whole or in part of imported palm oil be labeled, to provide for the inspection of imported palm oil and palm oil products, to require that imported palm oil and palm oil products comply with certain minimum standards of sanitation, and for other purposes; to the Committee on Agriculture.

H.R. 1836. A bill to authorize equalization of the retired or retainer pay of certain members and former members of the uniformed services; to the Committee on Armed Services.

H.R. 1837. A bill to authorize and direct the General Accounting Office to audit the Federal Reserve Board, the Federal Advisory Council, the Federal Open Market Committee, and Federal Reserve banks and their branches; to the Committee on Banking, Finance, and Urban Affairs.

H.R. 1838. A bill to require annual appropriations for all obligations and expenditures of the Federal Government; to the Committee on Government Operations.

H.R. 1839. A bill to amend the Federal Property and Administrative Services Act of 1949, as amended, to provide for the disposal of surplus real property to States and their political subdivisions, agencies, and instrumentalities for economic development purposes; to the Committee on Government Operations.

H.R. 1840. A bill to direct the Administrator of General Services to convey certain land and all improvements thereon to the city of Albany, Ga., for no more than 25 percent of the fair market value of such land; to the Committee on Government Operations.

H.R. 1841. A bill to authorize the establishment of the Chattahoochee River National Recreation Area in the State of Georgia, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 1842. A bill relating to the settlement of debts owed the United States by foreign countries; to the Committee on International Relations.

H.R. 1843. A bill to amend the Federal Trade Commission Act (15 U.S.C. 45) to provide that under certain circumstances

exclusive territorial arrangements shall not be deemed unlawful; to the Committee on Interstate and Foreign Commerce.

H.R. 1844. A bill to amend the Communications Act of 1934 with respect to the renewal of licenses for the operation of broadcasting stations; to the Committee on Interstate and Foreign Commerce.

H.R. 1845. A bill to require manufactures of farm tractors for sale in interstate commerce to mark the engine blocks of such tractors with permanent identification numbers; to the Committee on Interstate and Foreign Commerce.

H.R. 1846. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 1847. A bill to amend title 18, United States Code, to provide that any parent who kidnaps his minor child shall be fined not more than $1,000, or imprisoned for not more than 1 year, or both; to the Committee on the Judiciary.

H.R. 1848. A bill to amend chapter 44 of title 18 of the United States Code (respecting firearms) to penalize the use of firearms in the commission of any felony and to increase the penalties in certain related existing provisions; to the Committee on the Judiciary.

H.R. 1849. A bill to strengthen the penalty provisions of the Gun Control Act of 1968; to the Committee on the Judiciary.

H.R. 1850. A bill to establish a Council on Judicial Tenure in the judicial branch of the Government, to establish a procedure in addition to impeachment for the retirement of disabled justices and judges of the United States, and the removal of justices and judges whose conduct is or has been inconsistent with the good behavior required by article III, section 1, of the Constitution, and for other purposes; to the Committee on the Judiciary.

H.R. 1851. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to require as a condition of assistance under such act that law enforcement agencies have in effect a binding law enforcement officers' bill of rights; to the Committee on the Judiciary.

H.R. 1852. A bill to deny Members of Congress any increase in pay under any law passed, or plan or recommendation received, during a Congress unless such increase is to take effect not earlier than the first day of the next Congress; to the Committee on Post Office and Civil Service.

H.R. 1853. A bill to provide for the elimination of inactive and overlapping Federal programs, to require authorizations of new budget authority for Government programs and activities at least every 4 years, to establish a procedure for zero-base review and evaluation of Government programs and activities every 4 years, and for other purposes; to the Committee on Rules.

H.R. 1854. A bill to accelerate the formation of the investment capital required to expand both job opportunities and productivity in the private sector of the economy; to the Committee on Ways and Means.

H.R. 1855. A bill to repeal the earnings limitations of the Social Security Act; to the Committee on Ways and Means.

H.R. 1856. A bill to amend the Tariff Schedules of the United States with respect to the rates of duty for palm oil; to the Committee on Ways and Means.

H.R. 1857. A bill to create a National Power Resources Authority for the development of nuclear power facilities, and for other purposes; jointly to the Committees on Interior and Insular Affairs and Interstate and Foreign Commerce.

H.R. 1858. A bill to permit either House of Congress to disapprove certain rules proposed by executive agencies; jointly to the Committees on the Judiciary and Rules.

By Mr. MCKINNEY:

H.R. 1859. A bill to decrease to 16 the minimum age at which a person may file on his own behalf a naturalization petition; to the Committee on the Judiciary.

H.R. 1860. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income amounts won in State lotteries; to the Committee on Ways and Means.

H.R. 1861. A bill to amend the Internal Revenue Code of 1954 to provide an income tax credit for any individual who performs voluntary service for any organization engaged in the treatment, care, or rehabilitation of the physically handicapped or the mentally ill; to the Committee on Ways and Means.

By Mr. MONTGOMERY (for himself, Mr. ROBERTS, Mr. TEAGUE, Mr. BRINKLEY, Mr. HEFNER, Mr. MOTTL, Mr. Hall, Mr. WYLIE, Mr. HAMMERSCHMIDT, and Mr. GUYER):

H.R. 1862. A bill to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans, to increase the rates of dependency and indemnity compensation for their survivors, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 1863. A bill to amend title 38 of the United States Code to increase the rates of disability and death pension, to increase the rates of dependency and indemnity compensation for parents, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. MONTGOMERY (for himself and Mr. ROBERTS):

H.R. 1864. A bill to amend title 38 of the United States Code to provide an automobile assistance allowance and to provide automotive adaptive equipment to certain veterans not now qualifying for such benefits; to the Committee on Veterans' Affairs.

H.R. 1865. A bill to amend title 38, United States Code, to increase the rate of a surviving spouse's pension by 25 percent upon attaining age 78; to the Committee on Veterans' Affairs.

H.R. 1866. A bill to amend section 360 of title 38, United States Code, to provide increased awards of service-connected compensation to certain veterans who have suffered the loss or loss of use of paired extremities; to the Committee on Veterans' Affairs.

H.R. 1867. A bill to amend title 38, United States Code, to permit election of current law pension benefits by the suviving spouses of Civil War and Indian War veterans; to the Committee on Veterans' Affairs.

By Mr. MONTGOMERY (by request):

H.R. 1868. A bill to amend title 38, United States Code, to extend the 20-year protection to ratings for children permanently incapable of self-support; to the Committee on Veterans' Affairs.

H.R. 1869. A bill to amend section 3012 of title 38, United States Code, to extend to 120 days the period between notice of, and the effective date for, the reduction or discontinuance of compensation, dependency and indemnity compensation, or pension; to the Committee on Veterans' Affairs.

H.R. 1870. A bill to amend title 38 of the United States Code to assist veterans with a permanent and total service-connected disability due to the loss or loss of use of one upper and one lower extremity to acquire specially adapted housing; to the Committee on Veterans' Affairs.

H.R. 1871. A bill to amend section 312 of title 38, United States Code, by providing a 2-year presumptive period of service connection for the psychoses which develop within 2 years from the date of separation from active service; to the Committee on Veterans' Affairs.

H.R. 1872. A bill to amend section 315 of title 38, United States Code, to provide an additional compensation benefit to a veteran rated not less than 50 percent disabled on account of a child requiring regular aid and attendance; to the Committee on Veterans' Affairs.

H.R. 1873. A bill to amend title 38, United States Code, to permit certain eligible veterans to purchase up to $20,000 of national service life insurance; to the Committee on Veterans' Affairs.

H.R. 1874. A bill to amend section 362 of title 38, United States Code, to extend the annual clothing allowance to veterans with service-connected blindness and those who are required to wear hearing aids as a result of service-connected disability; to the Committee on Veterans' Affairs.

H.R. 1875. A bill to amend section 312 of title 38, United States Code, by providing that malignant tumors (cancer) which develop within 5 years from the date of separation from wartime service shall be presumed to have been incurred in, or aggravated, by such service; to the Committee on Veterans' Affairs.

H.R. 1876. A bill to amend title 38, United States Code, to extend eligibility for automobile adaptive equipment to certain additional veterans; to the Committee on Veterans' Affairs.

By Mr. MONTGOMERY:

H.R. 1877. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Commitee on Interstate and Foreign Commerce.

By Mr. MICHEL:

H.R. 1878. A bill to prohibit travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned, or retired; to the Committee on House Administration.

By Mr. MOAKLEY:

H.R. 1879. A bill to authorize the Secretary of the Interior to study the feasibility and desirability of a Boston Harbor National Recreation Area in the Commonwealth of Massachusetts; to the Committee on Interior and Insular Affairs.

By Mr. MOORHEAD of Pennsylvania:

H.R. 1880. A bill to amend the Defense Production Act of 1950 to include synthetic fuels which may be used as fuels under title III; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MURPHY of New York:

H.R. 1881. A bill to add the Sailor's Snug Harbor National Register District to the Gateway National Recreation Area and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 1882. A bill to regulate commerce and to prohibit unfair or deceptive acts or practices in commerce, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. PATTISON of New York (for himself and Mr. FISH):

H.R. 1883. A bill to amend title 28, United States Code, to provide that Columbia, Greene, and Ulster Counties, N.Y., shall be included in the northern judicial district of New York; to the Committee on the Judiciary.

By Mr. PERKINS (for himself and Mr. JEFFORDS):

H.R. 1884. A bill to authorize a career education program for elementary and secondary schools, and for other purposes; to the Committee on Education and Labor.

By Mr. PERKINS:

H.R. 1885. A bill to reorganize the executive branch of the Federal Government to eliminate excessive, duplicative, inflationary, anticompetitive, and unnecessary regulation; jointly, to the Committees on Government Operations and Rules.

By Mr. QUIE:

H.R. 1886. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

By Mr. ROBERTS:

H.R. 1887. A bill to amend title 38, United States Code, to liberalize the provisions for special emphasis in employment of disabled veterans; to the Committee on Veterans' Affairs.

By Mr. ROBERTS (for himself and Mr. TEAGUE) (by request):

H.R. 1888. A bill to amend title 38 of the United States Code with respect to the computation of the 10-year period in which wives and widows may pursue programs of education; to the Committee on Veterans' Affairs.

By Mr. ROBERTS (by request):

H.R. 1889. A bill to amend section 3104 of title 38, United States Code, to permit certain service-connected disabled veterans who are retired members of the uniformed services to receive compensation concurrently with retired pay, without deduction from either; to the Committee on Veterans' Affairs.

H.R. 1890. A bill to amend title 38 of the United States Code to provide that certain persons with a service-connected disability of 30 percent or more, will have 2 years in which to apply for service Disabled Veterans Insurance (RH); to the Committee on Veterans' Affairs.

H.R. 1891. A bill to amend chapter 35 of title 38 of the United States Code in order to provide educational benefits, on a prorated basis, to children of veterans having permanent service-connected disabilities rated at not less than 50 percent but less than total; to the Committee on Veterans' Affairs.

H.R. 1892. A bill to amend section 110 of title 38, United States Code, to liberalize the standard for preservation of disability evaluations for compensation purposes; to the Committee on Veterans' Affairs.

H.R. 1893. A bill to amend the Comprehensive Employment and Training Act of 1973 to provide for preferential enrollment of disabled veterans in programs under that act; to the Committee on Education and Labor.

H.R. 1894. A bill to amend title 38 of the United States Code to authorize a presumption of service connection for cause of death in certain cases involving veterans who had been rated permanently and totally disabled due to service-connected disability for at least 1 year immediately preceeding death; to the Committee on Veterans' Affairs.

H.R. 1895. A bill to amend title 38 of the United States Code to provide that certain veterans who were prisoners of war shall be deemed to have a service-connected disability of 50 percent; to deem certain prisoners of war to be permanently and totally disabled for the purposes of receiving wartime disability compensation; to provide hospital care and medical treatment for certain non-service-connected disabilities of former prisoners of war; to provide a 10-year presumptive period of service connection for chronic diseases of certain prisoners of war, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 1896. A bill to amend title 38 of the United States Code to authorize adaptive equipment for a second automobile or conveyance owned by veterans eligible for assistance under chapter 39 of such title; to the Committee on Veterans' Affairs.

H.R. 1897. A bill to amend section 1903 of title 38, United States Code, to provide a direct long term, low interest loan for the replacement of an automobile or other conveyance previously provided under chapter 39 of this title; to the Committee on Veterans' Affairs.

H.R. 1898. A bill to amend the Internal Revenue Code of 1954 to provide for the repayment of the Federal excise tax on gasoline which is used for personal purposes by certain disabled veterans who are entitled to grants for automobiles with special equipment; to the Committee on Ways and Means.

By Mr. RODINO:

H.R. 1899. A bill to authorize additional judgeships for the U.S. courts of appeals; to the Committee on the Judiciary.

By Mr. RUPPE:

H.R. 1900. A bill to provide a comprehensive system of liability and compensation for oilspill damage and removal costs, and for other purposes; jointly to the Committees on Merchant Marine and Fisheries, and Public Works and Transportation.

By Mr. ST GERMAIN (for himself and Mr. REUSS):

H.R. 1901. A bill to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, and for other purposes; to the Committee on Banking, Finance and Urban Affairs:

By Mr. SARASIN:

H.R. 1902. A bill to amend the Occupational Safety and Health Act of 1970 to further encourage industrial safety, and for other purposes; to the Committee on Education and Labor.

By Mr. SEIBERLING:

H.R. 1903. A bill to amend the Internal Revenue Code of 1954 to encourage the modernization of manufacturing plants by providing an additional investment credit for machinery placed in service in existing manufacturing plants or in nearby plants; to the Committee on Ways and Means.

By Mr. STARK:

H.R. 1904. A bill to provide duty-free treatment for intravenous fat emulsions; to the Committee on Ways and Means.

By Mr. TEAGUE:

H.R. 1905. A bill to amend section 8332 of title 5, United States Code, to allow certain military service to be included in determining the aggregate period of service on which an annuity under such title is based; to the Committee on Post Office and Civil Service.

H.R. 1906. A bill to amend the Internal Revenue Code of 1954 to provide that any trust established for the payment of medical or dental malpractice claims and related expenses shall be tax exempt, and that a deduction shall be allowed for contributions to such a trust; to the Committee on Ways and Means.

By Mr. UDALL:

H.R. 1907. A bill to designate certain lands as wilderness; to the Committee on Interior and Insular Affairs.

By Mr. WAGGONNER:

H.R. 1908. A bill to amend the Occupational Safety and Health Act of 1970 to require the Secretary of Labor to recognize the difference in hazards to employees between the heavy construction industry and the light residential construction industry; to the Committee on Education and Labor.

H.R. 1909. A bill to amend the Occupational Safety and Health Act of 1970 to provide that where violations are corrected within the prescribed abatement period no penalty shall be assessed; to the Committee on Education and Labor.

H.R. 1910. A bill to limit U.S. contributions to the United Nations; to the Committee on International Relations.

H.R. 1911. A bill to authorize the provision of assistance to foreign countries in exchange for strategic or critical raw materials; to the Committee on International Relations.

H.R. 1912. A bill to prohibit the Federal Trade Commission from promulgating trade regulation rules which repeal or limit use of holder in due course defenses in connection with the sale or lease of goods or services to consumers; to the Committee on Interstate and Foreign Commerce.

H.R. 1913. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 1914. A bill to limit the jurisdiction of the Supreme Court and of the district courts in certain cases; to the Committee on the Judiciary.

H.R. 1915. A bill to increase the penalty with respect to certain offenses involving the commission of a felony while armed with a firearm; to the Committee on the Judiciary.

H.R. 1916. A bill to amend section 98 of title 28, United States Code, to eliminate the divisions in the Western District of Louisiana; to the Committee on the Judiciary.

H.R. 1917. A bill to amend the Migratory Bird Treaty Act to permit the possession by taxidermists of certain migratory birds, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H.R. 1918. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

H.R. 1919. A bill to amend sections 170, 2055, and 2522 of the Internal Revenue Code of 1954 to provide a deduction for income, estate, and gift tax purposes for contributions to a section 501(c)(10) organization for the purpose of building or maintaining a building; to the Committee on Ways and Means.

H.R. 1920. A bill to amend certain provisions of the Internal Revenue Code of 1954 to authorize refund of tax on distilled spirits, wines, rectified products, and beer lost or rendered unmarketable due to fire, flood, casualty, or other disaster, or breakage, destruction, or other damage (excluding theft) resulting from vandalism or malicious mischief while held for sale; to the Committee on Ways and Means.

H.R. 1921. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

H.R. 1922. A bill to amend title XVIII of the Social Security Act to provide coverage for services which may be performed by a dentist on the same basis as presently allowed for physicians under the medicare program, and to authorize payment under such program for all inpatient hospital services furnished in connection with dental procedures requiring hospitalization; jointly,

to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. WAGGONNER (for himself and Mr. CHARLES WILSON of Texas):

H.R. 1923. A bill to recognize the joint development by the State of Louisiana and the State of Texas of a recurring and environmentally sound source of energy represented by the Toledo Bend Dam and Reservoir and exempt Sabine River Authority, State of Louisiana, and Sabine River Authority of Texas, from charges for the use, occupancy, and enjoyment of certain lands of the United States within the Sabine National Forest, Tex.; to the Committee on Agriculture.

By Mr. WHALEN (for himself, Mr. DUNCAN of Tennessee, Mr. EMERY, Mrs. FENWICK, Mr. FRASER, Mr. KETCHUM, Ms. KEYS, Mr. LAGOMARSINO, Mr. MOFFETT, Mr. OTTINGER, Mr. THONE, and Mr. WON PAT):

H.R. 1924. A bill to provide that any increase in the rate of pay for Members of Congress proposed during any Congress shall not take effect earlier than the beginning of the next Congress; to the Committee on Post Office and Civil Service.

By Mr. YOUNG of Florida:

H.R. 1925. A bill to amend title XVIII of the Social Security Act to provide coverage of enterostomal therapy services on the same basis as physical therapy services under medicare; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. ASPIN:

H.J. Res. 136. Joint resolution to restore the Congressional Medal of Honor to Dr. Mary Edwards Walker; to the Committee on Armed Services.

By Mr. BRODHEAD:

H.J. Res. 137. Joint resolution providing for the designation of the week beginning October 9, 1977, and ending October 15, 1977, as "National Gifted Children Week"; to the Committee on Post Office and Civil Service.

By Mr. EDWARDS of Alabama:

H.J. Res. 138. Joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States; to the Committee on the Judiciary.

By Mr. FAUNTROY:

H.J. Res. 139. Joint resolution to amend the Constitution to provide for representation of the District of Columbia in the Congress; to the Committee on the Judiciary.

By Mr. MATHIS:

H.J. Res. 140. Joint resolution proposing an amendment to the Constitution of the United States relative to the balancing of the budget; to the Committee on the Judiciary.

H.J. Res. 141. Joint resolution to establish a National Commission on Social Security; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. McKINNEY (for himself and Mr. STEERS):

H.J. Res. 142. Joint resolution to amend the Constitution to provide for representation of the District of Columbia in the Congress; to the Committee on the Judiciary.

By Mr. MITCHELL of New York:

H.J. Res. 143. Joint resolution proposing an amendment to the Constitution of the United States with respect to public prayer and religious instruction; to the Committee on the Judiciary.

By Mr. RODINO:

H.J. Res. 144. Joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States; to the Committee on the Judiciary.

By Mr. WAGGONNER:

H.J. Res. 145. Joint resolution proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

H.J. Res. 146. Joint resolution proposing an amendment to the Constitution of the United States providing that no public school student shall, because of his race, creed, or color, be assigned to or required to attend a particular school; to the Committee on the Judiciary.

H.R. Res. 147. Joint resolution proposing an amendment to the Constitution of the United States with respect to participation in voluntary prayer or meditation in public buildings; to the Committee on the Judiciary.

H.J. Res. 148. Joint resolution proposing an amendment to the Constitution of the United States relating to the busing or involuntary assignment of students; to the Committee on the Judiciary.

By Mr. FAUNTROY:

H. Con. Res. 58. Concurrent resolution authorizing a bust or statue of Martin Luther King, Jr., to be placed in the Capitol; to the Committee on House Administration.

By Mr. WHALEN:

H. Con. Res. 59. Concurrent resolution authorizing a bust or statue of Martin Luther King., Jr., to be placed in the Capitol; to the Committee on House Administration.

By Mr. JOHN L. BURTON (for himself, Mr. JENKINS, Mr. COTTER, Mr. HEFTEL, Mr. CAVANAUGH, Mr. MANN, Mr. EVANS of Georgia, Ms. MIKULSKI, Mr. TONRY, Mr. DELLUMS, Mr. MURPHY of Pennsylvania, Mr. CORNELL, Mr. GILMAN, Mr. COCHRAN, Mr. SCHEUER, Mr. PANETTA, Mr. BAUCUS, Mr. BRECKINRIDGE, Mr. MURPHY of New York, Mr. BADILLO, Mr. FOUNTAIN, Mrs. SCHROEDER, Mr. BINGHAM, Mr. FORD of Tennessee, and Mr. CORMAN):

H. Res. 102. Resolution amending rule XXII of the Rules of the House of Representatives to remove the limitation on the number of Members who may introduce jointly any bill, memorial, or resolution, and to provide for the addition and deletion of names of Members as sponsors after the introduction of a bill, memorial, or resolution; to the Committee on Rules.

By Mr. COCHRAN:

H. Res. 103. Resolution expressing the sense of the House of Representatives that the United States should not establish diplomatic or economic relations with Cuba; to the Committee on International Relations.

H. Res. 104. Resolution amending rule XLIV of the Rules of the House of Representatives, relating to financial disclosure; to the Committee on Rules.

Mr. EDGAR (for himself, Mr. TSONGAS, Mr. ROSENTHAL, Mr. BLANCHARD, Mr. SOLARZ, Mr. FISH, Mr. LONG of Maryland, Mr. KREBS, Mr. WINN, Mr. MCHUGH, Ms. HOLTZMAN, Mr. BRODHEAD, Mr. BURKE of Florida, Mr. PHILLIP BURTON, Mr. KOCH, Mr. MAGUIRE, Ms. HECKLER of Massachusetts, and Mr. MINETA):

H. Res. 105. Resolution condemning terrorist activities and the premature release of Abu Daoud; to the Committee on International Relations.

By Ms. JORDAN:

H. Res. 106. Resolution providing for the creation of congressional senior citizen internships; to the Committee on House Administration.

By Mr. KEMP:

H. Res. 107. Resolution to reform the Rules of the House of Representatives in order to restore public trust and confidence in the Congress of the United States and the conduct of its Members; to the Committee on Rules.

By Mr. MATHIS:

H. Res. 108. Resolution in support of continued undiluted U.S. sovereignty and jurisdiction over the U.S.-owned Canal Zone on the Isthmus of Panama; to the Committee on International Relations.

H. Res. 109. Resolution expressing the sense of the House relative to a study by the Secretary of Agriculture on palm oil imports; jointly to the Committees on Agriculture and International Relations.

By Mr. MITCHELL of New York:

H. Res. 110. Resolution concerning the safety and freedom of Valentyn Moroz, Ukrainian historian; to the Committee on International Relations.

By Mr. SISK (for himself, Mr. DON H. CLAUSEN, Mr. CONTE, Mr. DERWINSKI, Mr. FISHER, Mr. HORTON, Mr. LONG of Louisiana, Mr. MOTTL, Mr. ROONEY, Mr. PRICE, Mr. WYDLER, and Mr. ZEFERETTI):

H. Res. 111. Resolution creating a Select Committee on Professional Sports; to the Committee on Rules.

By Mr. TSONGAS:

H. Res. 112. Resolution expressing the sense of the House of Representatives with respect to the release of Abu Daoud, the alleged planner of the 1972 Munich massacre of 11 Israeli athletes, by the French Government; to the Committee on International Relations.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANDREWS of North Dakota:

H.R. 1926. A bill for the relief of Dr. Timothy Kam-Hung Chung; to the Committee on the Judiciary.

By Mr. FISHER:

H.R. 1927. A bill for the relief of Cooley Berry; to the Committee on the Judiciary.

H.R. 1928. A bill for the relief of Antanas Zigmas Butkus, Danute Ione Butkus, Loreta Butkus, Raimonda Butkus, and Rimvydas Butkus; to the Committee on the Judiciary.

H.R. 1929. A bill for the relief of Vera Jovancevic; to the Committee on the Judiciary.

H.R. 1930. A bill for the relief of Arlene S. Miller; to the Committee on the Judiciary.

By Mr. HARRINGTON:

H.R. 1931. A bill for the relief of Juana Todd Atherley; to the Committee on the Judiciary.

H.R. 1932. A bill for the relief of Philip Thacker; to the Committee on the Judiciary.

H.R. 1933. A bill for the relief of Valmi Thacker; to the Committee on the Judiciary.

By Ms. JORDAN:

H.R. 1934. A bill for the relief of Dr. Lawrence C. B. Chan; to the Committee on the Judiciary.

By Mr. McFALL:

H.R. 1935. A bill for the relief of Stockton Townhouse, Inc.; to the Committee on the Judiciary.

By Mr. McKINNEY:

H.R. 1936. A bill for the relief of Joseph Lee Soryung; to the Committee on the Judiciary.

By Mr. MITCHELL of New York:

H.R. 1937. A bill for the relief of GFM Co.; to the Committee on the Judiciary.

By Mr. SISK:

H.R. 1938. A bill for the relief of Santos Marquez Arellano; to the Committee on the Judiciary.

H.R. 1939. A bill for the relief of Meda Abilay Florin; to the Committee on the Judiciary.

H.R. 1940. A bill for the relief of Dimitrios Panoutsopoulos, Angeliki Panoutsopoulos, and Georgios Panoutsopoulos; to the Committee on the Judiciary.

H.R. 1941. A bill to permit O. J. Shaw and Haroldine L. Shaw, his wife, and O.J. Shaw, Jr., a married man, and Richard A. Shaw, a single man to name the United States as a defendant in a suit to determine title to certain parcels of real property herein described; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

REMOVING THE EARNINGS LIMITATION ON SOCIAL SECURITY

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 12, 1977

Mr. GILMAN. Mr. Speaker, today I am introducing legislation eliminating the earnings limitation on social security benefits paid to individuals age 65 and over.

Under the present social security system, individuals between age 65 and 71 receive a reduced social security benefit of $1 for every $2 earned above $3,000 a year—or $250 per month. Individuals who are age 72 and over are exempt from this earnings limitation and may receive their entitled social security benefits regardless of the amount of their earned income.

Mr. Speaker, according to a Social Security Administration publication entitled "Monthly Benefit Statistics"—December 28, 1976—20.5 million retired workers and their dependents were eligible in 1976 for social security benefits amounting to nearly $4.2 billion. Francis J. Crowley of the Congressional Record Service, in a paper entitled "The Social Security Retirement Test," stated:

> The Social Security Administration actuaries intimate that in 1976 the cost [of repealing the retirement test] would be about $6–$7 billion. If the test were eliminated for people age 65 and over . . . the average cost would be about . . . $2.7 billion.

Some authorities claim that at least 2.5 million retired workers between age 65 and 71 are directly affected by the earnings ceiling, and other authorities are not certain as to the amount of revenue that would be returned to the Treasury through income taxes if the earnings ceiling was lifted. Fortunately, some aspects of the retirement test are clear and I would like to share the following thoughts with my colleagues:

First, many senior citizens cannot retire on the combined social security benefits and the low earnings limitation. In the current, highly inflated economy, these individuals must work in order to support themselves. But if they work and their earnings exceed $3,000 a year—or $250 per month—then they are denied their full social security benefits—benefits that they and their employers contributed through payroll deductions and benefits that morally, if not legally, belong to the retiree.

To argue that the social security program was created to insure against loss of income "following withdrawal from employment and not, like private insurance, to provide annuities at a prescribed fixed age" is a broken promise to every individual who contributes hard earned wages to the social security program and who expects, upon retirement, to receive the full benefits without any conditions attached to the promise. Citing his own situation as typical of many senior citizens, Richard L. Tobin, executive director of the Saturday Review, recently stated in the New York Times:

> If your income derives from stocks or bonds and not from a paycheck, you can collect the whole Social Security check each month. But for those of us who live from paycheck to paycheck, and whose income comes directly from the sweat of our aging brow, there is little or no chance of our beginning to collect on the Social Security benefits we've been entitled to ever since we hit 65.

For senior citizens who must live "from paycheck to paycheck," the earnings limitation attached to social security benefits, robs these citizens, as Mr. Tobin further stated, "of a chance to retire, at least partially."

Second, the earnings ceiling promotes the wrong set of values. It encourages some elderly individuals who are willing and able to work, not to work out of fear of suffering reduced social security benefits—or no benefits at all. Senior citizens who are able to continue their occupational endeavors do not fully receive their benefits from the social security program, but they inequitably continue to pay into the program, supporting their able contemporaries who elect not to work, and pay income taxes on their earnings.

Historically, this Nation has valued self-reliance and the work ethic. Penalizing elderly citizens who are willing and able to work by reducing their social security benefits is detrimental to this precept and discourages able senior citizens from working. It robs our older Americans of their self-esteem, personal dignity, and self-reliance, promoting their institutionalization. Productive senior citizens become premature candidates for nursing homes or park bench pigeon feeders.

Finally, the argument that able senior citizens deprive younger individuals of employment has not been thoroughly studied or demonstrated, especially since many elderly citizens reduce their occupational activity or become semi-retired—but, for many of these citizens, at the expense of their entitled social security benefits. However, even if the argument has some merit, this would be a high price for this Nation to pay. An earnings limitation and other policies that promote forced retirement of elderly individuals deprive this Nation of valuable skills and talents. With unemployment at unacceptably high levels, let us not perpetuate this economic condition by discouraging elderly citizens from working by reducing their hard earned benefits.

I support repeal of the retirement test, but in the alternative, I support increasing the earnings ceiling on social security benefits paid to senior citizens.

Mr. Speaker, in the interest of encouraging our older Americans who are willing and able to work without being penalized by reduced social security benefits, I am inserting at this point in the RECORD the complete text of my bill, and I urge my colleagues to fully support this legislation.

H.R. 1768

A bill to amend title II of the Social Security Act to reduce from seventy-two to sixty-five the age beyond which deductions on account of an individual's outside earnings will no longer be made from such individual's benefits

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsections (c)(1), (d)(1), (f)(1)(B), and (j) of section 203 of the Social Security Act are each amended by striking out "seventy-two" and inserting in lieu thereof "sixty-five".

(b) Subsection (f)(3) of such section 203 is amended by striking out "age 72" and inserting in lieu thereof "age 65".

(c) Subsection (h)(1)(A) of such section 203 is amended by striking out "the age of 72" and "age 72" and inserting in lieu thereof in each instance "age 65".

(d) The heading of subsection (j) of such section 203 is amended by striking out "Seventy-two" and inserting in lieu thereof "Sixty-five".

SEC. 2. (a) The last sentence of section 203(c) of the Social Security Act is amended by striking out "nor shall any deduction" and all that follows and inserting in lieu thereof "nor shall any deduction be made under this subsection from any widow's or widower's insurance benefit if the widow, surviving divorced wife, or widower involved became entitled to such benefit prior to attaining age 60.".

(b) Clause (D) of section 203(f)(1) of such Act is amended to read as follows: "(D) for which such individual is entitled to widow's or widower's insurance benefits if she or he became so entitled prior to attaining age 60, or".

(c) Section 203(f)(5)(D) of such Act is repealed.

SEC. 3. The amendments made by this Act shall apply only with respect to monthly insurance benefits payable under title II of the Social Security Act for months in taxable years ending after the date of the enactment of this Act.

BILL TO PERMIT INDIVIDUALS WHO HAVE RETIRED ON DISABILITY OR WERE ENTITLED TO RETIRE ON DISABILITY TO CONTINUE TO BE COVERED BY THE SICK-PAY EXCLUSION AS IT EXISTED PRIOR TO THE TAX REFORM ACT OF 1976

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. FISHER. Mr. Speaker, today I am reintroduing a bill I offered last fall to enable those individuals who had retired on disability or were entitled to retire on disability as of October 1, 1976, to continue to claim the so-called "sick-pay" exclusion of $5,200 per year for disability payments received.

Although I voted for the Tax Reform Act of 1976 and strongly supported many

of its reform measures, I did so despite my strenuous objection to particular sections of the bill.

One of those sections which I strongly opposed was the change made under the bill to the so-called sick-pay exclusion from income for disability payments received. After an initial waiting period, the sick-pay exclusion as it existed prior to passage of the Tax Reform Act permitted an employee to exclude from income up to $100 per week received under wage continuation plans when he is absent from work on account of injury or sickness.

The tax reform bill retains the maximum annual exclusion of $5,200 for disability payments but establishes new requirements which a taxpayer must meet in order to qualify for the exclusion. First, beginning with this taxable year, the sick-pay exclusion will be available only to taxpayers under 65 years of age who are permanently and totally disabled. Permanent and total disability is defined in the conference report to require that a person be unable to engage in any substantial gainful activity by reason of a medically determinable physical or mental impairment which can be reasonably expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. In addition, the conference report indicates that proof of disability must be substantiated by the taxpayer's employer who must certify that the disability status assigned to the individual was approved under procedures acceptable to the Internal Revenue Service.

Of perhaps even greater importance to residents of northern Virginia is a second additional requirement that reduces the amount of the $5,200 annual exclusion on a dollar-for-dollar basis for each dollar of the taxpayer's adjusted gross income in excess of $15,000. Thus, a disabled retiree would no longer be entitled to any portion of the $5,200 exclusion when his adjusted gross income reaches $20,200. This provision blatantly discriminates against married couples by requiring that the disabled retiree's income be combined with that of his spouse in determining whether the taxpayer's adjusted gross income exceeds $15,000.

Although abuses of current law occurred when certain individuals were improperly classified as disabled on retirement simply to obtain the benefits of the exclusion from income, nonetheless, I feel that Congress has overreacted to this situation by penalizing those who had legitimately retired on disability in reliance on the current income tax treatment of "sick-pay." Instead of urging that the standards to be met in order to qualify for disability status be tightened at the employer's level, the approach adopted in the bill fixes a rigid standard in the tax laws which has the effect of changing the conditions under which a substantial number of disabled people had previously retired.

Moreover, the income ceiling of $15,000 deals a particularly cruel blow to residents of a high cost-of-living area, such as northern Virginia. Worse still is the effective date of the new provision, which applies to this taxable year and all subsequent years. Thus, individuals who relied upon current law in preparing their estimated tax return may find that they owe a whopping tax bill at the end of the year because of this retroactive change in the law.

To remedy this harsh result, Mr. Speaker, today I am introducing a bill that will enable those who have retired on disability on or before October 1 of this year or who were entitled to retire on disability as of that date to continue to receive the $5,200 annual exclusion for disability payments or sick-pay received. The income ceiling would not apply to those covered by this rule.

Furthermore, my bill will promote equity under the tax laws by placing civil service and private disabled retirees under roughly the same standards as military retirees. Under the Tax Reform Act as passed, all those who had joined the Armed Forces as of September 24, 1975, will continue to be protected under the law as it existed prior to enactment of the Tax Reform Act. I sponsored the move to protect all servicemen and would like to extend this principle of fairness to include retirees from civil service and private employment, who retired on disability partially in reliance on the income tax treatment of sick-pay and disability as it was prior to the Tax Reform Act. I believe that fairness and equity dictate that they not be penalized because of a change in the tax laws, but instead that they be permitted to receive the benefit of the "sick-pay" exclusion from income without regard to the new standards or the income ceiling, if they were retired or entitled to retire as of October 1 of last year.

JUDGE MILLER RETIRES

HON. JOHN B. BREAUX

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. BREAUX. Mr. Speaker, the long and outstanding career of one of the leading members of the Louisiana judiciary has come to a close with the retirement of Third Circuit Court of Appeals Judge Minos D. Miller, Jr.

The honorable judge began his service in 1953 as the sole 31st judicial district judge, a post he held for 15 years and held well, having been cited by the Judicial Administrator of Louisiana for maintaining a current docket with no backlog of cases.

In 1968 he was elected to the appelate court and has served many times on the State supreme court by special appointment. Judge Miller has also chaired or served on numerous special committees appointed by the supreme court dealing with the administration of justice, a vital concern to us all.

It is a record you would expect from a man so willing to serve his country. Miller served in the U.S. Navy for 4½ years and was awarded the Purple Heart when his plane was shot down over the island of Formosa. A combat pilot on the USS *Wasp*, he was captured by the Japanese and held until the end of World War II as an unregistered prisoner in various Japanese prison camps. At the end of hostilities he was found in a prison camp in Omori, Japan and returned to the United States for rehabilitation, where he was personally greeted by President Harry Truman.

His life back in the States since that time has been equally impressive. Judge Millers' untiring activities in church, charitable, and civic organizations over the last 30 years are too numerous to detail here, but those of us who have been privileged to work with him—or merit his friendship—have reaped professional and personal rewards from his counsel, his wisdom, his work and his goodness. I am glad to have had that opportunity—and know that the man will be sorely missed.

JAMES A. PAVLICEK, SYMBOLIC OF SCOUTING

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. GAYDOS. Mr. Speaker, the achievement of Eagle Scout in the Boy Scouts of America is an honor shared by relatively few Americans. It is an award which requires considerable time, effort and talent on the part of the Scout and a great deal of sacrifice and dedication on the part of those who advise him.

Consequently, when a young American attains this honor, I feel privileged to call it to the attention of my colleagues in the Congress of the United States. In this particular instance, I am speaking about a young man from North Braddock, Pa., James A. Pavlicek.

Jim is an active member of Troop 344 at St. Helen's Roman Catholic Church in east Pittsburgh, and his attainment of the Eagle Scout rank tops a long list of accomplishments: Holder of various offices in the troop, 26 merit badges, 11 skill awards, 2 historical trail awards, and the Ad Altari Dei Medal. He also holds membership in the Braddock General Hospital Explorer Post and the Brotherhood of the Order of Arrow.

Jim now is working to attain certification as a junior scoutmaster as well as striving for the Pope Pius religious emblem and an Eagle palm.

Quite frankly, I believe Jim Pavlicek could serve as an example of what the Boy Scouts of America represents. One of six children, he is a hardworking youth who contributes to the family's financial responsibilities by holding down three paper routes and a part-time job at a local restaurant.

According to his scoutmaster, Mr. Joseph F. Venturella, Jim is an excellent student at St. Thomas' High School in Braddock. His interest in photography has led to his serving as the official photographer for Troop 344. And, following graduation, Jim has his eyes set for a career in medicine.

Mr. Venturella is understandably proud of his young charges. He points out the troop is relatively young, having organized in 1964, but in a short period of time three of its members have attained the coveted rank of Eagle Scout. The troop, he reports, is an active one; camping from Pittsburgh to Canada and participating in various community projects; tree plantings, litter cleanup campaigns and pageants.

Mr. Speaker, on behalf of the Congress, I extend our official congratulations to James A. Pavlicek, who, in the words of Mr. Venturella, is a "citizen, Scout, and student who has proven to be a credit to his family and his community."

TONY PIET CELEBRATES 70TH BIRTHDAY

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. RUSSO. Mr. Speaker, last month a remarkable gentleman in Illinois celebrated his birthday and today I want to extend a belated congratulations to Mr. Tony Piet, 70 years young.

I also want to tell my colleagues about Tony Piet. It is a pleasure to know him and I feel my colleagues would share in my admiration and respect for him if they were fortunate enough to know him personally.

Anthony F. Piet, Sr. was born December 7, 1906 in Berwick, Pa., to John Stanley and Mary Danczuga Stanley. For 44 years he and wife Panina have shared a beautiful marriage and they raised a fine family of four: Natalie Jean, Letitia Joyce, Antoinette Celeste, Anthony F. Piet, Jr.

In 1929, in the little town of Corsicana, Tex., Tony Piet entered professional baseball. It was a career that would last nearly 10 years and find him wearing the uniform of the Pittsburgh Pirates, the Cincinnati Reds, the Chicago White Sox, and the Detroit Tigers.

Tony's skills and talents extended well beyond the baseball field and after his retirement from the game he became founder and then chairman of the board of Tony Piet Motor Sales in Chicago. He also demonstrated his compassion and his willingness to share his talents by organizing Baseball Anonymous—to provide aid to former baseball players—and organizing the Little League baseball club on Chicago's south side as well as organizing and serving as president of the Marquette Little League Baseball Club.

Tony has an extensive list of honors and awards, such as the Chicago Park District "Man of the Year Award" as an Adult Youth Leader, the Outstanding Service Award from the Chicago Lawn Moose, WTZO Radio's Man of the Year Award, the Regional Ben Franklin Quality Dealer Award, and the Brand Name Retailer of the Year Certificate of Distinction.

This energetic gentleman is, as you might imagine, an active member of many community, business and service groups, such as the Marquette Manor Chamber of Commerce, the Professional Baseball Player Association, Knights of Columbus, and the Chicago Automobile Trade Association, to cite just a few.

Perhaps nothing says more about the nature and character of a human being than the way in which those who know him best feel about him. At the birthday party in his honor last month, it was clear that Tony has the love and respect of those who know him. He is a person who cares about and gives of himself to others. He surely deserves, and I wish for him, many days of continuued sunshine and joy—just the kind of day you experience at White Sox Park with the Sox seven up in the ninth on a balmy June afternoon.

WOODSTOCK, ILL., RESTORES HISTORIC OPERA HOUSE

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. McCLORY. Mr. Speaker, we talk a great deal about grave problems in this House, about issues of economics and national defense, unemployment and human justice. Today, I wish to relate a story of a community proud of its historic past, its prosperous present, and its promising future.

Woodstock, Ill., in my 13th Congressional District, became aware in 1974 that a glorious structure it calls its opera house was not a relic of the past but was as essential to the city's well-being as good air, good water, and good government.

Those of us who know and love Woodstock, the county seat of McHenry County, cannot imagine its town square without the old opera house which began its career both as the city hall and opera house. It is to Woodstock as the U.S. Capitol is to Washington, D.C.—its scepter and its crown.

On Saturday, February 5, Woodstock will dedicate its restored opera house. I look forward eagerly to being there, because as we as a nation learned so vividly during our Bicentennial last year, only those who recognize the cultural, historic, and political roots that produced them can fully grasp the present or seek to mold the future.

Mr. Speaker, it is with pleasure and pride that I share with my colleagues some of the history of this building generously sent me by Mrs. Lillian Strohm, a dedicated and highly motivated constituent who is president of the Woodstock Opera House Community Center.

Woodstock, which now has a population of 15,000, became a city in 1873. By 1889, work had begun on this extraordinary building with an exterior in the "Romanesque revival" style and an interior called "Steamboat Gothic" and "carpenter style"—a jewel of that period we call Victorian.

It was dedicated in style in 1890 befitting the dream it represented. The Patti Rosa Players, then billed as the leading opera troupe in the Midwest, performed "Margery Daw" for the grand opening.

In 1934, a notable series of performances was held. A young man from Kenosha, Wis. named Orson Welles, was attending the Todd School, an executive boys' school then located in Woodstock. The summer festival series that year included such classics as "Hamlet" and "Macbeth" and was attended by luminaries such as the distinguished author and playwright Thornton Wilder, who then was teaching in Chicago. When the festival ended, Mr. Welles left Woodstock to join Katharine Cornell for the winter season.

In 1948, several seasons of winter stock played the Opera House. Their casts included Geraldine Page, Paul Newman, Shelley Berman, Tom Bosley, Betsy Palmer, and Lois Nettleton. Days they worked in local stores or offices and nights they trod the boards at the Opera House as members of the Woodstock Players.

But by 1974, city offices had been moved elsewhere. Should Woodstock destroy or restore the Opera House building? The community rallied. Local citizens headed by Marjorie Sharpe, president of the Woodstock Fine Arts Association, got the Opera House placed on the National Register of Historic Places.

The Woodstock Opera House Community Center, Inc., came into being to restore it. Don Still of the Woodstock State Bank served as treasurer; Ray Pensinger, a local doctor, was president, and Mrs. Strohm became executive secretary.

People responded. Of the approximately half million dollars the final restoration will cost, two-thirds came from individuals in amounts from a dollar to $50,000, and one-third will come from the city itself. The largest private donation came from Alice and the late Dave Joslyn, lifetime Woodstock people whom I have known for years.

Dave's grandfather, Mayor Merritt Joslyn, signed the bill to erect the Opera House in 1888. The auditorium, where I have been a guest many times, will be named the Alice and David Joslyn Auditorium.

Mr. Speaker, unfortunately there is neither time nor space to list all the names of those responsible for this great civic outpouring. But I do want to cite the current elected Woodstock officials: Mayor H. Joseph Gitlin, and council members Richard Hahn, James Shoemaker, Frances Kuhn, and Ralph Stork.

Mr. Speaker, in the jargon of the bureaucracy what Woodstock has done might be called urban renewal. I see it as much more. To preserve what mattered yesterday for today and tomorrow requires far more than brick and stone and plaster. I call it spiritual renewal.

DEDICATING A NEW ARK

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. WOLFF. Mr. Speaker, in the Jewish faith, the ark is the traditional house for the Torah—"the tree of life for those who take hold of it." The ark is the first thing that the Hebrews built and carried with them for 40 years across the

Sinai, once out of Egypt. It is therefore understandable that the ark is one of the most important objects that a synagogue will own, for it is the birth of Jewish law.

On December 19, 1976, the Great Neck Synagogue, of Great Neck, Long Island, dedicated a new ark. The ark was dedicated in the honor of Rabbi Dr. Ephraim R. Wolf "in recognition of his 20 years of devoted service" to his congregation. For a congregation to dedicate an ark is perhaps the greatest honor that they can bestow on their rabbi. I had the great pleasure and honor to participate in this special service on behalf of the Great Neck community. I was more than pleased to share this great day with Rabbi Wolf, his family, and his congregation. Sharing with me in this celebration of their new ark and devoted rabbi were Mac Mender, chairman, board of trusees; Godfrey Dallek, master of ceremonies; David Yagoda, president, Great Neck Synagogue, and Rabbi Dr. Israel Miller, vice president of Yeshiva University.

HAPPY 92D BIRTHDAY

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. FORSYTHE. Mr. Speaker, January 11 marked the 92d birthday of a woman, whom I am proud to say is a member of my constituency, who was a champion of equal rights for the woman's movement, Miss Alice Paul.

Miss Paul never subscribed to the notion that women were second-class citizens. Educated at Swarthmore in 1905, she earned her Ph. D. at the University of Pennsylvania in 1912 at a time when women rarely were permitted to enter college. Immediately she became active in the suffragette movement.

Organizing the National Woman's Party, which had a membership of 50,000, she battled for passage of the 19th amendment. Finally, after many years of being beaten and jailed for her causes, the 19th amendment was ratified by the States.

Although the women's party distintegrated into confusion as to its future role after the amendment's passage, Miss Paul's efforts for total equality for women continued on. She worked diligently to gain complete equality for women through the passage of an equal rights amendment to the Constitution. This struggle began in 1923. While it is not widely known, Miss Paul wrote and had introduced into the U.S. Congress the first equal rights amendment. The spirit of that first amendment was constantly introduced from that point on until its passage by this body in 1972.

My fellow Members, we all owe a debt of gratitude to Miss Paul for her tireless efforts on behalf of freedom and equality. Her motto, "equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex" is still a worthwhile goal. I am sure that my colleagues will join with me in wishing her a happy birthday.

THE SOBERING STORY OF AUSTRALIA'S BIG SPENDING

HON. ELFORD A. CEDERBERG

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. CEDERBERG. Mr. Speaker, as President Ford stated last night, we have come a long way under his stewardship. We have a ways to go yet, and it will be the challenge of this Congress and the new President to strive for the goals which all Americans seek.

We must, however, keep the lessons of history in mind. Our own recent economic difficulties can be instructive. We can also, however, learn from the experiences of our friends around the world. We are all familiar with the impact which the unrestrained growth of social programing has had on governments such as Britain and Sweden. Great Britain is today struggling under something close to economic chaos.

In this connection I bring to the attention of my colleagues an article from the January 1977 issue of Reader's Digest outlining the experience of Australia. The article states graphically and starkly the result of leaping before we take a good hard look at the cost of Government programs. We can and must meet the legitimate needs of our citizens. The experience of the Australians, however, reminds us of the need for prudence and caution. I commend the article to my colleagues' careful consideration:

THE SOBERING STORY OF AUSTRALIA'S BIG SPENDING

(By Anthony Paul)

In April 1975, the Australian economy was in its worst shape since the Great Depression. The country's socialist Labor government was running a $3-billion deficit, five percent of the gross national product. Business confidence had all but vanished, unemployment had soared to the highest level in 30 years and inflation had accelerated to an annual rate of 13.4 percent. In Canberra, Australia's federal capital, a wry joke went the rounds: "The only Australian factory working day and night is the government mint."

Eight months later, the Australian people, in their most decisive vote in recent history, threw the Labor government out of office. But the story of Labor's three-year rule makes a sobering case study of what can happen to even such an economically advantaged country as Australia when high-spending proponents of big government are voted into power.

Australia, the "Lucky Country," as Australians began calling it in the 1960s, has one of the world's highest living standards. With a population of 13.5 million, it produces much of the West's wool, wheat and sugar. Minerals abound: 70 percent of the world's zircon; a near-monopoly of titanium ore; one quarter of the non-communist bloc's uranium; plentiful supplies of coal, iron, copper, bauxite, silver, lead and zinc.

According to World Bank figures, Australia also has the West's most egalitarian economy, with the smallest gap between rich and poor. When Labor came into office in late 1972, unemployment was just 2.4 percent and inflation 4.5 percent—an economic performance matched only by West Germany. And with 70 percent of Australia's oil coming from local wells, she should have been relatively insulated from the world inflation that the oil-producing countries' sudden price increases in 1973 would bring. Nevertheless, by 1974 Australia's economy was in a frightening mess. Inflation had soared as high as 28 percent in a single month. Why? A July 1975 International Monetary Fund survey stated it bluntly: "The origins of the Australian recession are to be found in domestic development."

MONEY MILL

Those developments began in mid-1972. A conservative coalition of the Liberal Party (representing the urban middle class) and the National Country Party (representing rural interests) had been governing without interruption since 1949. Despite a good record in managing Australia's postwar development, the senior coalition member, the Liberal Party, appeared to have stagnated after so long in office. And in the 1972 election it was not able to counter the appeal of a dynamic Labor leader, 56-year-old Sydney lawyer Gough Whitlam. For the first time in nearly a quarter-century, normally conservative Australians elected a socialist government.

Within days of taking office, the Whitlam government plunged into a socialist-minded restructuring of the Australian economy. New expenditures were voted for free college education, increased aid to schools, higher unemployment compensation and old-age pensions, and subsidies for sports and the arts. "Few of us bothered to count the cost in those early days," Fred Daly, one of Whitlam's ministers, later confessed. "We spent money as if it were going out of fashion."

Almost immediately, inflation accelerated: the consumer price index jumped 8.2 percent in the first six months of Labor rule. Increased unemployment benefits and relaxed eligibility regulations began to foster a welfare mentality. One economist estimated that 10,000 persons stopped working. Handouts for young unemployed workers in particular more than quadrupled, and the number of "surfies" (beach bums) increased substantially. A new life-style known as "dole bludging" (government-subsidized loafing) proliferated.

PADDED PROGRAMS

As Labor prepared its first budget (1973–74), senior civil servants warned that the economy could absorb a government spending increase of only $1.8 billion. Determined to have its new programs, however, Labor lifted outlays by $2.3 billion. Judicious taxing might have dampened the resultant inflation, but Labor had pledged not to increase taxes. Instead, it announced an across-the-board 25-percent cut in tariffs. By exposing Australia's tariff-protected industries to foreign competition, Labor reasoned, prices would be forced down. For the same reason, the government also formed a Prices Justification Tribunal, charged with limiting company profits.

The policies backfired. Many factories, unprepared for the invasion of cheaper imports, closed down. As a direct result of the cuts, at least 23,000 workers lost their jobs. And inflation reached 13 percent.

The Labor government also set out to boost wages and benefits. It pushed through a 17.5-percent pay increase and a fourth week's annual vacation for the 245,000 federal civil servants, and supported a trade-union plan to extend the longer vacation to private industry. In three years, Australian wages rose 70 percent, while industrial productivity increased less than one percent.

During the election campaign, the Labor Party had argued that its trade-union links would enable it to negotiate more effectively with militant unions. But in Whitlam's first year, strikes proliferated and 2,634,000 working days were lost (a 31-percent increase over the previous year).

Civil servants warned the Labor government of the need for 1974–75 budgetary restraint to curb inflation. Labor hesitated as its factions fought; contradictory budgets were put forward month by month. Business

confidence further slumped and unemployment rose. Finally Whitlam fired his treasurer, Frank Crean, and replaced him with Deputy Prime Minister Dr. Jim Cairns of the party's left wing.

The new treasurer's inability to say "no" to socialist colleagues' pet programs earned him the nickname "Dr. Yes." Soon Canberra buzzed with alarming stories of what the Sydney *Bulletin* called the government's "handout industry, the fastest growth area in the Australian economy." Concerned that local governments were not spending all the money available to them, the Department of Urban and Regional Development published a 57-page book, *Sources of Funds and How To Apply for Them*. Members of Parliament voted themselves a 37-percent salary increase. Cairns presided over a cabinet meeting that listed the ceiling on public-service hirings, and in Labor's three years in office the number of public servants increased 12.6 percent.

SKYROCKETING STAFFS

In a development familiar to Americans, these soaring administrative overheads tragically negated many of the well-meaning programs which Labor introduced. Perhaps the most poignant example was welfare for the sadly disadvantaged remnants of the Aborigines, Australia's native race. Determined to do something about their misery, Whitlam sponsored a threefold spending increase on Aboriginal programs. In response, the Department for Aboriginal Affairs promptly doubled its staff and poured much of the new funds into 89 largely fruitless research projects, including an attempt to farm turtles and crocodiles. Aboriginal welfare became a self-sustaining bureaucracy, with a huge share of the government money going to social workers, administrators, researchers and consultants. Observed Canberra political commentator Peter Samuel, "If the Department's whole budget was simply paid to the Aborigines, each man, woman and child would get $1800. Instead, each Aborginee received an average of $96."

As the recession deepened and inflation continued, the government launched its single most expensive program yet—Medibank, a system of free universal health care which added some $1.8 billion yearly to the taxpayer's burden. Medical costs now began to climb at a rate outstripping even inflation. Physicians' fees increased 20 percent in the first year of operation. General practitioners would order unnecessarily full pathological tests for their patients, then pass on the entire charge to the government. Some doctors reportedly were seeing up to 20 nursing-home patients an hour and billing Medibank. Medibank, said the editor of *The Medical Letter*, had become "a multimillion-dollar, money-eating machine."

All told, Australian federal spending reached an estimated $26.3 billion in 1975–76, up a staggering 80 percent in just two years.

THE KHEMLANI AFFAIR

It was appropriate, perhaps, that a government so careless of money should pass from the scene over a money scandal—the all-but-incredible brouhaha called the Khemlani Affair.

This was an attempt by the Labor government to borrow $4 billion in Middle Eastern petrodollars by going outside normal governmental fund-raising channels. Without notifying Parliament, a group of high-ranking cabinet members, including Whitlam, authorized Minerals and Energy Minister Rex Connor to borrow funds for unspecified "temporary purposes" (believed to have been the nationalizing of large segments of the mining industry). Their intermediary was to have been, not one of the large New York or London banks traditionally used by the Australian Treasury, but, instead, a Pakistani money merchant named Tirath Hassaram Khemlani, who claimed to be in touch with rich Arab sheiks.

Details of the proposed borrowing underscored the Labor government's consistent lack of sympathy for the Australian taxpayer. The loan was to have been repaid at compound interest—but with no payments for 20 years. Thus, for the $4 billion, the next generation of Australians would have had to repay an astonishing $17.6 billion. Moreover, Khemlani was to have received a 2½-percent "finder's commission"—$100 million!

When these details leaked to Parliament and the press, the uproar was such that Whitlam was forced to withdraw Connor's permission to raise the loan. When the minister quietly continued his negotiations with Khemlani, the press uncovered this, too, and Connor was obliged to resign. Within two months, the Labor government had been swept away. A landslide anti-Labor vote returned the conservative coalition to power.

Last May, in his first televised address to the nation, the new Prime Minister, Malcolm Fraser, referred to some political truisms which many countries besides Australia have recently neglected.

"Over the past year or so," he said, "the view had begun to develop that we could have it all without really having to pay for it. But one of the things we've got to understand is that when politicians promise things, they are not promising anything of their own, because they have nothing of their own to give. They are promising something which is *yours*, and the more politicians promise, the less there is for you to meet your own needs or your family's needs. The less there is for industry, for investment, and to create jobs needed to improve the real wealth of Australia."

HOW TERRORISTS OBTAIN U.S. WEAPONS ON THE BLACK MARKET

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. DOWNEY. Mr. Speaker, headlines concerning the activities of terrorists have alarmingly increased both in this country and throughout the world in recent years. Terrorist use of U.S. military weapons has too often been the real story behind these headlines. A report on this issue, written by Jonathan Kwitny, appeared in the January 11 edition of the Wall Street Journal. I urge my colleagues to consider his article on this pressing problem:

[From the Wall Street Journal, Jan. 11, 1977]

THE TERRORISTS—THRIVING BLACK MARKET PUTS MILITARY WEAPONS INTO AMATEURS' HANDS

(By Jonathan Kwitny)

The M–11 might be called the perfect assassination weapon. A U.S.-made hand machine gun that fires bullets by gas propulsion without sound, flash or smoke, it can empty its 32-round clip in approximately 1.7 seconds. It comes in two pieces, each nine inches long, and weighs about seven pounds. With it, one U.S. arms dealer says, "I could kill a hundred people in the next room and you'd never hear it."

The world is glutted with arms like the M–11: lightweight, lethal, low-cost and easy to use. They are being produced in such quantity and with so few controls that getting them poses no problems for any group of revolutionaries, vigilantes, terrorists or just plain crazies who are willing to spend a little time looking.

The U.S. and the Soviet Union bear about equal responsibility for allowing the illicit traffic in military weapons to get out of control. Small, sophisticated arms designed to put more firepower into the hands of individual soldiers are rolling off assembly lines in both countries, and are being shipped to other countries around the globe. Suppliers don't keep track of what happens to them after that.

Often, the arms land on the black market, where they are readily available to anyone with the patience to develop the right connections. An estimated $5 billion in arms that the U.S. abandoned in Vietnam hasn't even hit the black market yet, knowledgeable U.S. authorities say. If the Vietnamese begin dispersing that arsenal, it should be even easier for amateurs to arm themselves in the years ahead.

From a shelf in almost any library, you can pull down the military reference text, "Jane's Infantry Weapons," and find a grim catalog of destruction. An antipersonnel grenade maker's ad guarantees "uniform dispersion of fragments in every case." A firm called Euromissile boasts that its product enables "a mere infantry soldier" to destroy enemy tanks within a 6,500-foot range ("minimum training required") and lists write-away addresses in France and Germany. Jane's also features detailed, illustrated instructions on how to assemble and operate almost every known small arm, from the Thompson submachine gun to the M–11 and the Strela missile.

Some 14,000 of the M–11 and a similar M–10 have been made. They list for $80 each, although when a Marietta, Ga., manufacturer of the guns went out of business recently, M–10s were sold at auction for $5 to licensed dealers and representatives of foreign governments. "They're all over the world now," mostly in Third World countries, says Geoffrey WerBell of Powder Springs, Ga., whose father helped design the guns.

EASY TARGET: JETLINERS

The Strela is a Soviet-made, heat-seeking, precision guided missile. It can be toted comfortably on your back. Launched from the ground, it will knock a jetliner out of the sky at altitudes of up to 6,560 feet. According to Jane's, Third World countries that have taken delivery of Strelas include the People's Democratic Republic of Yemen (which has proclaimed an alliance with revolutionary movements elsewhere), Egypt, North Korea, and India. U.S. intelligence sources say Strelas also have shown up in almost all Arab countries and some African nations, including Mozambique.

In 1973, Italian police burst in on five Arab terrorists setting up Strelas in a rented apartment four miles from Leonardo da Vinci Airport near Rome, directly under the traffic pattern for the north-south runway. Intelligence sources suspect that those Strelas were shipped originally from the U.S.S.R. to Egypt, which in turn sold them to Libya. Libya's head of state, Moammar Khadafy, is said to distribute arms to almost anyone who will use them against a government he opposes.

Libya has obtained from the U.S.S.R. large quantities of RPG–7 rockets, which weigh under 10 pounds and can destroy a tank, let alone a limousine or speaker's platform. In turn, Libya is believed to have supplied the Provisional Wing of the Irish Republican Army with RPG–7s and other weapons. A boatload of arms that intelligence sources had tracked all the way from Libya was intercepted off the coast of Northern Ireland in 1973. The IRA has used RPG–7s against armored British military vehicles and police installations.

PENTAGON IS MIDDLEMAN

U.S.-made weapons also find their way into the hands of revolutionaries and terrorists, though usually not directly through the government. Most are siphoned off into

the black market after lawful sales to foreign governments or private individuals.

Most shipments of U.S. arms to foreign countries are commercial transactions, as opposed to the military-aid programs common in the 1950s. Many such sales, especially of big-ticket items like fighter-bombers, are made with the Defense Department acting as middleman. (Foreign governments and U.S. manufacturers often prefer title to the goods and payment to flow through the Pentagon.) Other sales, especially of small arms suitable for guerrilla use, are made directly by manufacturers to foreign buyers. All sales must be approved by the State Department, which keeps a list of hundreds of U.S. concerns that have registered to obtain arms-export licenses from the government on a sale-by-sale basis.

Among the most popular IRA weapons are the AR–15 rifle, made by Colt Industries Inc. in New York, and the AR–180, made by Armalite Inc., a privately held company in Costa Mesa, Calif. Both weapons can be bought legally in the U.S. by almost anyone. (They are considered civilian "sporting" weapons.) Both are versions of the M–16, the principal U.S. military rifle, which was developed by Armalite and is manufactured by Colt and its licensees. Jane's lists the price of an M–16 at $85; the AR–15 and AR–180 commonly retail for about twice that.

Federal law prohibits the sale to civilians of fully automatic weapons—those that fire repeatedly like a machine gun. For the civilian market, the manufacturers doctored the fully-automatic M–16 slightly and came up with the semiautomatic AR–15 and AR–180, which fire one shot for each pull of the trigger. With just a few hours of tinkering, however, the AR–15 and AR–180 can be made fully automatic. Many IRA weapons recovered by the British have been reconverted in this way.

Guns found on IRA members have been traced by their serial numbers to American buyers, but this hasn't provided sufficient evidence to convict the Americans. A federal court in Philadelphia recently reversed the convictions of five men for illegally shipping more than 100 AR-180s to the IRA. Though the serial numbers showed that the Americans had purchased the guns in the U.S., the court noted that the serial numbers of guns sold overseas aren't registered. It might be proved, the court said, that the original buyers didn't simply sell the guns through a licensed exporter to an approved foreign buyer, who then transferred them to the IRA. The court did uphold the group's conviction for conspiring to sell the guns illegally, but only because the men unwittingly disclosed their plans to a government undercover agent who testified against them.

David Hopkins, who prosecuted the case for the Justice Department, thinks the government should record the serial number, place of origin and destination of every weapon leaving the country legally. However, he acknowledges that the number of weapons involved is "awe-inspiring."

Indeed, the defense in the Philadelphia case, arguing that the AR-180s could have entered Ireland from almost anywhere, presented a State Department report showing that 2.5 million firearms were legally exported from the U.S. in the five years ending last June 30. That figure didn't include the three firearms that anyone leaving the U.S. is allowed to take with him unlicensed. Nor did it include the many U.S. firearms—including M-16s and AR-180s—that are manufactured overseas under licensing agreements, or firearms sent abroad for use by U.S. troops that are "lost," siphoned off or stolen.

85 MILLION RIFLES

In a 1970 study designed to show the abundance of military rifles in circulation, Priscilla Clapp, then with a private research firm and now with the U.S. Arms Control and Disarmament Agency, calculated that more than 85 million such weapons are scattered around the world. She counted only the dozen or so most popular rifles, excluding the M-16. (Although Colt won't disclose production figures for the M-16, Miss Clapp estimated that 25,000 were being manufactured each month, a figure that agrees with Pentagon reports.)

The immense stockpiles held by private arms dealers also suggest that there are far more guns being made than there are soldiers to use them. Probably the largest such dealer is Samuel Cummings, whose firm, Interarms, is based on Monaco and has agents with pipelines into virtually every country in the world. Mr. Cummings says—and others have verified—that his warehouses contain more than 500,000 light arms and more than 100 million rounds of ammunition. That is enough to equip 40 military divisions, more than twice as many as the U.S. has in active service.

Mr. Cummings says he pays $5 to $25 for surplus submachine guns for example, and sells them for $25 to $60 after rebuilding them. Arms experts say that the Costa Rican civil war of the 1950s, the 1961 Bay of Pigs invasion in Cuba and possibly other wars were fought with weapons that both sides had bought from Mr. Cummings.

CIA CONNECTIONS

The American taxpayer helped establish Mr. Cummings in this lucrative business. He served as a weapons expert in the Army in the 1940s, then went to work for the Central Intelligence Agency. In the early 1950s he set up a private international concern that sold arms for the CIA. Some observers think it was an arms-laundering operation controlled by the agency. Interarms, a successor firm, now seems largely independent of U.S. control—except, of course, when it ships arms into or out of this country. However, it's doubtful that Mr. Cummings could operate so successfully were it not for the contacts he made while with the CIA.

Mr. Cummings and many other private arms dealers say they sell only to governments, and there's no indication that they do otherwise. But Washington sources say these arms often end up on the black market through official corruption, theft, or a government's collusion with nongovernment groups. And, the sources add, some private arms dealers don't have scruples about whom they sell to.

When it comes to guns, Communist governments have a reputation for being as profit-minded as any private trader in the West. According to many reports, Soviet arms often hit the black market through a Czech trading company that operates through a purportedly independent arms dealer in Amsterdam.

Persons who are aligned with revolutionary causes but are unwilling to pay black-market prices can get free or cut-rate arms at Libyan embassies in Europe, according to French sources. The method isn't guaranteed, but with a few months of waiting it has been productive, the sources say.

Another ploy, of course, is theft. One haul taken from a well-stocked arms depot can keep a violent group and even its allies in other countries supplied for years. Grenades stolen in 1972 from a U.S. military depot in West Germany by anarchists known as the Baader-Meinhof gang are believed to have been used two years later in other parts of Europe by Venezuelan and Palestinian terrorists.

MISPLACED MUNITIONS

In April 1976, a House Armed Services subcommittee reported that uncounted tens of thousands of U.S. military weapons have been lost or stolen from storage. The subcommittee found that records were "haphazard" and that "losses of sizable quantities of weapons and munitions were frequently written off as inventory errors without any investigation."

Weapons purchased from U.S. companies by South American governments for use by their internal police forces often wind up in the hands of right- and left-wing terrorist groups there, according to several sources, including Michael T. Klare, visiting fellow at the Center for International Studies at Princeton University. Mr. Klare, a specialist in international arms traffic, says right-wing groups often obtain weapons directly from the police, who covertly encourage vigilante-style terror that they can't carry out officially. Left-wing groups, he says, steal the same weapons by raiding police depots.

The State Department's decisions on overseas arms transfers are made after consultation with the Department of Defense and the Arms Control and Disarmament Agency. Recipients must pledge not to transfer the arms to third parties without American permission. But a system for enforcing such promises doesn't exist.

State Department officials refuse to discuss on the record whether violations of the no-transfer agreement have occurred. Gen. Howard Fish, who directs the Pentagon's review of foreign arms sales, says U.S. embassies keep "very very good control" of American arms sent overseas. He says he is unaware that the IRA has been using American-made weapons.

SMALL ARMS GO UNNOTICED

Officials of the CIA, the Army and the arms control agency all acknowledge that they don't keep close tabs on U.S. weapons shipped overseas. It was ascertained in other interviews that nobody else does either. Government officials say that the transfer of major weapons systems, such as military aircraft, probably would be noted in the ordinary course of intelligence. But the transfer of small arms probably would not, they add.

As for the amount of investigation that precedes the granting of arms-export licenses by the State Department, a recent case involving an attempt to put 10,000 U.S. submachine guns on the black market is hardly reassuring. Seven men, including the former military chief of staff of El Salvador, were convicted in federal court in New York for conspiracy to violate the arms-export laws. As part of the conspiracy, the El Salvador military chief was charged with taking a $75,000 bribe to provide phony export documents. The documents were submitted to the State Department as evidence that the guns were needed by his country's armed forces.

Apparently unaware that El Salvador's armed forces number only about 5,000 men, the State Department began routine processing of the export request for the 10,000 guns. Before a decision could be reached, however, the conspirators made the mistake of bringing an undercover Treasury Department agent into their plan, and he turned them in.

SOUTH AFRICAN SHIPMENTS

The State Department did approve a series of arms sales over the past few years in which the end purchaser was South Africa, a country under a U.S. arms embargo. The Justice Department is investigating the sales, made by Colt, the Winchester Group of Olin Corp. and possibly other arms manufacturers to third-party countries that transferred the weapons to South Africa under prearranged plans. Colt and Olin say the sales were engineered without their knowledge by employes who were fired after the sales were discovered. But when a former Colt employe pleaded guilty to an illegal sale last July, U.S. District Judge Robert C. Zampano in Connecticut said he doubted that the deals could have been made without the knowledge of "higher ups" at Colt.

Brando Alvy of the Justice Department says, "The cases we have found have left tracks. I'm sure there are scores of cases we don't know anything about."

Some authorities still hope that an effective international agreement can be made controlling the spread of the sophisticated new weapons. The U.S., for its part, has forbidden Third-World sales of its Redeye missile, similar to the Soviet Strela. Iran, for example, has been denied Redeyes despite repeated requests for them.

A SOVIET LIMITATION?

Brian Jenkins, a Rand Corp. researcher who has written extensively on terrorism, believes that the Soviets might agree to some such limitation. "When a couple of airliners get knocked down and one of them is an Aeroflot," he says, the Soviets may begin to limit sales of Strelas to Third World countries. He adds: "In whose interest is it to have hundreds of these things loose in the world?"

But the battle to control more conventional weapons is clearly lost. An American doctoral student, just back from Bangkok, reports that M–16s were selling in stores there for $50 to $100, even though such sales are illegal in Thailand. A French journalist who is writing a book on illegal arms sales says he has accompanied arms dealers on regular runs to Africa. He says that just before being interviewed by this newspaper, he talked to a French dealer who was trying to black-market a shipment of 3,000 World War II American submachine guns for $20 each.

One arms-control authority says he's "frankly not that concerned" over reports of illegal machine-gun trades because "they're already out of control."

"Cut off the flow of munitions?" asks another rhetorically. "How are you going to cut off the flow of arms to terrorists when you can't even cut off the flow of arms to teen-agers who hold up stores right here in Washington?"

REPEAL OF THE CONGRESSIONAL PAY RAISE

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. CORCORAN of Illinois. Mr. Speaker, in 1975, the Congress, by a one-vote margin, enacted into law an amendment which provided for annual automatic cost-of-living raises for top executives of the legislative, executive, and judicial branches of the Government. The law provides that Members of Congress and others named in the law should receive the same annual raise as is given to civil service employees under the Pay Comparability Act.

I believe this was a mistake. The Pay Comparability Act was set up to provide annual raises for civil service employees, not political officials, whether elected or appointed. Nor was the law written to include the top executives of Government in the survey on which the recommended pay raises are based.

More importantly, I am strongly opposed to the concept of automatic cost-of-living raises for Members of Congress. Cost-of-living is, after all, directly tied to inflation, and Congress, through unwise spending policies, is one of the primary causes of higher inflation. We are thus in the position of rewarding ourselves for causing a problem rather than solving it. We appear to be more concerned with our own welfare than with the good of the Nation.

We cannot ask the American people to have faith in their Government unless and until the Government, and Congress in particular, sheds its image of self-aggrandizement and is seen by Americans as being concerned with the well-being of the ordinary citizen.

I hope, Mr. Speaker, that by repealing the cost-of-living escalator for ourselves, we can take a positive step toward restoring the confidence of the people in their Government.

COMPREHENSIVE OIL POLLUTION LIABILITY AND COMPENSATION ACT OF 1977

HON. PHILIP E. RUPPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. RUPPE. Mr. Speaker, today I am introducing legislation designed to revise our laws dealing with the difficult problems resulting from oil spills. The need for such legislation has once again surfaced in connection with recent oilspills off the coast of the United States. My bill will provide a comprehensive system of liability and compensation for oilspill damage and removal costs.

The people of northern Michigan, surrounded by the beauty of the Great Lakes, are especially sensitive to the impact of water pollution on our natural resources and our economic livelihood. The dumping of taconite tailings into Lake Superior of Reserve Mining and the introduction of PCB's into the Great Lakes environment have further demonstrated to the people of northern Michigan the need to protect important marine resources.

Oil pollution represents a threat to the Great Lakes as well as other coastal regions and important waterways. My bill, speaking directly to this issue, would establish a single compensation fund for the protection of injured persons, including those who might suffer irreparable harm from discharges into waters of the Great Lakes.

The size of the fund would be $200 million, and would be financed, in large measure, by a fee of 3 cents per barrel of oil. The fee is to be assessed against refineries receiving crude oil and owners of terminals receiving any oil for export or import into the country. I believe the fee is low enough to avoid unnecessary cost burdens on the consumer of oil products.

The key provisions of the bill are those that would subject owners and operators of vessels to strict liability for damages caused by oil pollution. The limit of liability for tankers would be $300 per gross ton with a ceiling of $30 million per incident. Of course, the operator of a tanker cannot limit his liability when the incident triggering the oil pollution is caused by his willful misconduct. The bill also contains an expedited claims settlement process and a procedure for the Government to recover the costs of removing oil pollutants, a most essential guarantee of speedy action when a critical and controllable spill occurs.

This legislation breaks new ground in numerous ways, not the least of which are the claimant's right to recover for economic losses, such as the loss of profits or the impairment of earning capacity, and the Attorney General's authority to bring an action for loss of tax revenue due to injury to real or personal property. Moreover, the bill contains enhanced incentives for a polluter to undertake immediate cleanup or restorative action by providing for compensation for the cost of cleanup in excess of his limit of liability.

The legislation stands to relieve real human suffering in a most cost-effective manner, and to improve the quality of life by a fair system of burdens, obligations, and benefits. We can wait no longer. The time is ripe for action now, and I welcome the support of my colleagues in an effort to secure swift enactment of this important measure.

THE CRISIS OF THE CITIES

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. CONYERS. Mr. Speaker, the crisis facing our cities is, in fact, a crisis of our entire Nation. The cities are the cutting edge of the economic problem that is crippling America, an analysis of which is ably presented by Mayor Coleman Young of Detroit in a recent article in Freedomways. His understanding of the urban problem has been honed and refined through years of involvement and struggle.

Too often the urban problem is conceived merely in terms of crime and violence, and the solution advanced is to expand the resources alloted to ever more sophisticated equipment, support staff, and patrolmen. But no amount of resources going into the police sector can be effective so long as the economic depression existing in most American cities continues to deprive citizens of the basic means of survival, let alone decent livelihood. For crime, outandish as it may seem, is not primariy caused by criminals. Crime in the aggregate is more fundamentally the product of desperation that issues from joblessness, poverty, and community disintegration. It emerges when a neighborhood, a city, a nation has so degenerated in its capability and commitment to provide for the well-being of people that individuals feel that stealing, mugging, or selling dope is not an unacceptable means of survival. When neighborhoods are starved of jobs, social services, and supportive local institutions—and once neighborhoods become defined as high crime areas, their services disappear at an alarming rate;

when citizens are so desperate and isolated they must fend for themselves; then that community loses the prospect of marshaling enough political strength to fight for the larger interests necessary for recovery.

There is also the notion that urban decay is the direct outcome of changing racial and demographic patterns, in particular, the emergence of black-majority cities. This notion simply reflects upon the racism that has immobilized the Nation for so long. And as Mayor Young observes, the trend toward "regionalization," whatever its other merits, would wrest power from black-led cities to white suburbs, and from low-skilled and marginal groups to middle-class professionals.

The real crisis that predicates urban decay is economic, not one of crime, race, or administrative process. Cities are the product of massive, longstanding unemployment and economic debility—of the flight of capital and jobs from central cities to the suburbs as well as overseas, the relocation of industry in the relatively union-free "sun belt," and of the irresponsibility of Federal policy in failing to give a fair break to the young, the elderly, and the urban working class, black and white. These factors have combined to strip cities of their economic base, leaving behind a virtual wasteland in which the generational cycle of poverty acts itself out.

Economic depressions, unconscionable interest rates, pervasive poverty, and wrecked neighborhoods are not matters, in the final analysis, which city halls and community organizations can readily address, certainly not by themselves. And therein lies the challenge to the new administration and Congress. Unless the Federal Government undertakes a thoroughgoing economic reorganization that ceases to waste human resources—the young and old who are eager to work and produce, but who cannot find jobs—and commits the Nation to full employment and rational economic management, we have little prospect of breathing economic life back into, and revitalizing our cities. With this in mind, I commend to the attention of my colleagues Mayor Coleman Young's perceptive article, "Crisis of the Cities: A National Crisis," which appeared in the third quarter 1976, issue of Freedomways:

CRISIS OF THE CITIES—A NATIONAL CRISIS

(By Coleman A. Young)

This has been a warm evening—warm in the sense that the music and the spirit of FREEDOMWAYS are apparent. I have been a subscriber since 1961, when the publication first began and probably have most of the issues published from the beginning. I've always found it to be a faithful chronicle of an ongoing struggle. Of course, that struggle is with us today to a greater degree perhaps than any time in the past. I think it's been a long, hard struggle during my lifetime—the early struggle to organize the labor movement, which was a critical one in the '30's, early '40's and beyond that, the struggle within labor, the emergence of the freedom movement in the South which has transformed itself in the recent period into, as far as the Black people are concerned in this nation, a struggle for political power, based on the recognition that freedom could only be achieved within a political system by sharing in the levers of power of that system.

So, the freedom struggle, as I have known it, led me first to organize, to be a part of the organization of labor. The lesson I learned there was the necessity of unity between Black and white workers. Strains were put on that unity, even then, and they have been constant. The polarization between the suburbs and the cities—polarization within the city itself—the misconception that there is an antagonism of interests between the Black and white poor, I think, lies at the root of our inability to deal effectively with our problems. I think it is a significant and positive thing in the last ten years that Black people working in the political system have been able to achieve a greater degree of political representation. Although that degree of political representation today probably approximates a previous height—and it is not new; we've been there before—it approximates the level that the newly freed slaves achieved during the period of Reconstruction. I think if we look at history, we know the bitter lesson that progress can be wiped out in blood and repression. The price of freedom is not only eternal vigilance, but eternally to have the necessary manpower in terms of your alliances to maintain your position. I think that the freedom movement that has expressed itself through Black political leadership today is challenged, but more than Blacks are challenged. The existence of the cities is challenged, but much more than the cities are challenged. Today, to a greater degree than we've had in a long time, the future of this nation, as we know it, is challenged.

CRISIS OF CITIES IS NATIONAL CRISIS

When I was here in 1974—I think it was in conjunction with Martin Luther King's birthday celebration at a cathedral in New York City—I said at that time that the crisis of the cities was a national crisis; that if the cities were allowed to die, the suburbs would surely die, and if the suburbs went down, then the cities in our nation would die. I know that at that time Detroit was in the forefront. Detroit is a bellwether, economically, in this nation, being the center of the automobile industry, an early warning of economic trouble. It's been said that when the automobile industry catches a cold, Detroit catches pneumonia, and we were in pretty bad shape already in the latter part of 1974. But you here in New York had not yet felt the impact of that economic crisis that was known as the energy crunch. So when I came here, I was beset by newsmen who looked at me as if I came from Mars, who could not understand the economic difficulties we were having in Detroit. And I couldn't understand why they couldn't understand our economic problems but could understand the crime problems that we were having in Detroit. As I was standing in Times Square talking to them, I had a feeling of not being too safe—based on reports in the Detroit newspapers. I said to them at that time, "Detroit today, New York tomorrow." Our problems are an early warning. I had no idea of the depth of that prophecy. I could not foresee—I guess none of us could have—the fact that the impact of the economic crisis would hit New York so hard that literally several months later this great city, greatest city in this nation, one of the greatest cities in the world, would be literally on its knees, at the point of bankruptcy. New York City's problems have become a national problem.

To one degree or another, every city in America faces an exodus by middle-class, largely white citizens, but there is a Black middle class flight also. Blacks are a part of the middle class to the degree that they can find some place to flee beyond the perimeter of the central city. The cities have become more and more the repository of the poor, the aged and the Blacks. And there are those who subscribe to a new theory, a new social and political theory that I describe as a "doughnut" theory—that suburbia can exist independent of the vacuum in the center. Well, that's a new theory of history, of economics. I think no nation in the history of this world, no civilization has existed beyond the collapse of its cities. And America is no exception. Part of the problem of our cities today is that America is blinded by racism and cannot really understand that the crisis threatening the cities threatens America, because the crisis of the cities is too often looked upon through *race* colored glasses.

The President was tempted to let New York City fall, which is an indication of his full ignorance of the significance and importance of the great city of New York. One of the reasons that New York was allowed to nearly go under is because New York is looked upon across the nation as a city of Jews—the Mayor is a Jew, Blacks—everybody knows most of them are on welfare, and Puerto Ricans—who are half Black and also on welfare. And this is the national perception of New York! And many people beyond the Hudson, including some in Detroit and Chicago and other cities who should have known better, blinded by their racial concept of what New York is, were prepared to see this great city go down. As it was, New York City's crisis damn near bankrupted the State of New York which had no choice at that point but to come to the rescue of the city. It imperiled the credit and stability of every city in this state, and its shockwaves spread across the nation.

MANY CITIES BECOMING INCREASINGLY BLACK

My city was approaching the bond market to build a new hospital, and using New York as an excuse, an extortionate rate of 9.8 percent interest was charged the city of Detroit on bonds which previously had paid 5¼ percent. This is true in every city across this nation. And so part of the threat in the perception of cities collapsing is the bonanza, a big profit bonus to Wall Street and to those who control the money markets. Most cities in this nation, or let us say, many cities, are becoming increasingly Black. Detroit is the largest city, the only city of over one million that has a majority Black population and at the same time a Black mayor. But many other cities are heading in this direction. Chicago is at about 40 percent Black and running. Cleveland is very, very close to 50 percent. Washington, Philadelphia, major cities across the nation because of the Black immigration and, of course, the birth rate is a little higher in the Black population. As a whole within the cities there is a younger population. All these factors are combined to create a new situation in the cities. And so, Blacks have struggled to gain some degree, some handle in the levers of power. Now that has been achieved to a small degree, because whereas Blacks comprise 11 percent to 12 percent of the population of this country, we are still less than 1 percent of the elected officials. Progress is relative. Obviously there's a long way to go. But even that progress is begrudged by some, and you find a move on now toward metropolitan government.

I just left Buffalo, and they're talking about regionalizing Buffalo. They're talking about regionalizing Detroit. They're talking about regionalizing practically every city, and many Black people look upon this as changing the rules in the middle of the game, as we reach for power. And this is the threat that is being held over the cities across this nation which refuse to surrender their autonomy—and that includes New York City, because after New York City got in trouble, it had to be virtually surrendered to a receivership which was composed primarily of the state and the bankers and the finan-

cial interests. So as Black folks gain political power, as poor folks gain political power, the cities are taken over in a joint receivership by the state, the high level of government and the monied interests.

Now, in many, many areas like Miami where this regional government concept was first experimented on in the United States—Jacksonville was another area in Florida and Toronto was another example—there were some semi-valid excuses. As in most cities, middle-class people had run from the central city to suburbia, but in these particular instances, Toronto, Jacksonville and Miami, they had run faster than the water and the sewer lines could follow them. So they established these fancy middle-class homes out in the suburbs dealing with wells and septic tanks. The urge then on the part of the middle-class people who had run from the cities was to seize control of the cities and thus avail themselves of the water, the sewers and other economic facilities that they had left behind. But even that excuse doesn't exist in a city like Detroit. The State of Michigan has literally fed from the wealth of our city for 50 years, the same as the State of New York has fed from the wealth of New York City. The city of Detroit historically has received less than a half dollar back in the form of services from the state government than the taxes we send in. And that's certainly true of New York City's relationship to New York State. Any big city performs that function, and there is nothing wrong with that. Cities historically are the centers of culture, of commerce, of education. They play essential roles. They are the jewels, the showplaces of any civilization, and most nations understand that. During New York's early crisis, the French Ambassador came to Detroit. We happened to be talking and he apologized for interfering—giving his opinion on American politics—but he said to me that he just could not understand how President Ford for one moment could consider allowing New York City to go bankrupt. He talked about what Paris meant to the French nation. Long ago, European nations recognized the essential role of the city, and cities are literally subsidized in practically every nation but this one. This nation, which rose to greatness as a result of the development of the cities, whose rural and suburban areas fed on the wealth of the cities, now because of racially distorted approaches believes it can survive without the cities, and that, in my opinion, is what's happening.

When they talk about regionalism in Detroit, the facts are that we have a fine water system in Detroit, and it's entirely owned by the City of Detroit. It's a combination water and sewage system. We furnish water to half the population in the State of Michigan. The water system is owned and controlled by the City of Detroit. Imagine how that sets at this particular moment in history when Detroit has a majority of Blacks and is controlled by a Black mayor. We, literally, are in a position to cut their water off! And so, the demand that is now in Detroit—as they talk about regionalism, and nobody complains when Detroit puts its credit on the market in order to get bonds to expand their water system, to expand that sewage system—is one man, one vote. Let's take over that water system. Well, my answer to that revolutionary slogan of one man, one vote is one man, one gallon, and how much water have you got. The same with transportation. Detroit is the only city in Michigan which has a municipally subsidized transportation system. The other communities had private enterprise as their bus systems. And, of course, when the system became unprofitable, private industry went out of business. The citizens of Detroit have long subsidized our bus system. And so now, a regional system is set up. I can understand regional cooperation. I've been for that for a long time. But they want, again, to take our bus system, and the question is, one man, one vote. And again, it's one man, one bus. And maybe I wouldn't be so suspicious of my suburban neighbors who talk about regionalizing everything, except that I cannot understand their spite and demands for our water and our buses and their vigorous rejection of the regionalization of our children. There's a contradiction there. The same region that cries for control of the Detroit Police Department, Detroit water system and the Detroit bus system, is up in arms at the prospect of one Black child being bussed to a suburban school across Eight Mile Road.

COME TO CROSSROADS

So, what I'm really saying is that suburbia, obviously, cannot exist without the city and vice versa. There's obviously a commonality of interest here. But racial and political considerations, misconceptions of self-interest have caused divisions. I think that the impact of the last recession—and as far as Detroit and many other cities are concerned, that was a depression, not a recession—has revealed an underlying and endemic weakness in the American social and economic fabric that if not corrected is going to call for some violent changes in our form of government. I believe we've come to a crossroads that can lead to repression as a first step toward some type of fascist repression, or a break in the right direction which would lead to a democratization, to an opening up of our government. I believe that we are approaching that critical point in 1976, and that the issue—the main issue—around which this is expressed is the crisis of American cities. It is a universal crisis. It's not restricted to Detroit or to New York. It's endemic across the nation. Its major manifestation is chronic unemployment. The new and misquoted high of some 15 percent to 16 percent nationally that we reached in the current recession—and I do say current, because it is not over—the 16 percent is dramatically understated, as everyone in this room must know. The real percentage has got to be closer to 20 percent or 25 percent, and most economists say that when 25 percent of the work force of any society is unemployed, that society is suffering a depression and not a recession. Most of our cities, even before the economic crisis, suffered depression. When the official unemployment rate in this nation was 5 percent and 6 percent, that's considered prosperity in America, only in America. The unemployment rate in West Germany is 1 percent, and sometimes one wonders who won the war. And when that unemployment rate approached 2 percent people nearly overthrew the government in Germany; yet we can regard 5 percent and 6 percent official, which means 10 percent actual, as prosperity. What does 5 percent and 6 percent mean? What did it mean before this recession in Detroit? It meant the real unemployment rate was 10 percent and 12 percent. It meant in the central city among Blacks, Latinos, poor whites, unemployment exceeded 30 percent. That's before there was a recession. And among young people in these same groups, it was in excess of 50 percent for males, and for females, in excess of 60 percent. Now this condition existed in central cities, in ghettos, in barrios across this nation, even before the so-called recession. The recession exacerbated, obviously, this serious condition. Already, there have been all types of warning signals—of alienation, frustration and desperation by our unemployed, our dispossessed—crime, dope, prostitution, social unrest.

An answer from our federal government has been to ignore the problems of the cities, to ignore the unemployment which threatens to destroy America and to concentrate on inflation, to control inflation even if it meant encouraging an increase of unemployment. You're undoubtedly reading in the headlines today, and I can assure you the reports are exaggerated, of the crime situation in Detroit. I gather the *New York Times* has literally had a ball, running stories about how bad it was in Detroit, that Detroit was dying. Well, we have a rough gang situation. But it is little different from that of New York. I think that there's also some racism behind the sensational manner in which the situation in Detroit is treated, with its majority Black population and its Black mayor compared to similar situations in Chicago or New York. I think that you know that you had two very serious invasions by gangs in downtown Manhattan recently, either one of which was more serious than the incident we had in downtown Detroit. I don't see any headlines that New York is dying. It's not dying, but I'll tell you one thing—it's damn sick. And so is Detroit. And so is Philadelphia. And so is Boston. So is Los Angeles. And so is America. The unemployment which threatens this nation today has produced a social reaction which is predictable. Direct relationship between unemployment, lack of educational opportunity, lack of adequate housing, etc., and crime, has seen no addressment from the present administration and from most state administrations and most city administrations except repression.

As Mayor of the City of Detroit, I have an immediate responsibility to maintain the peace; the conserver of the peace is the official description of the responsibility of mayor under the charter. And I intend to conserve the peace. I recognize that there are many who would like to see the city go down. There are many who would like to seize upon the serious problems in our cities to increase the heavy hand of repression. The only answer we've had from the federal government in the last several years to the problems in our cities is millions and billions of dollars of aid to the police force. That's Law Enforcement Assistance money to buy bigger machine guns and more sophisticated radio equipment, weapons of repression. And the same administration in Washington that pumps out billions in LEA aid, vetoes bills to provide jobs, bills to provide assistance to beleaguered cities. So I believe that we come to real crisis in this nation. I am convinced that Watergate revealed this country shrinking back from the precipice, on the edge of going over into a fascist repression. Let me indicate to you that not too much is changed in Washington. The top two faces changed but the basic cast below them is still the same, and the basic line and direction of march are still the same. With cynicism, the Ford administration could veto bill after bill dealing with jobs and the welfare of people; and the cavalier fashion in which the revelations of the repressive, investigatory measures of the CIA, the FBI, the Internal Revenue could be dismissed, is an indication that it is later than we think.

So the answer that I have, to the degree that I have an answer, is that I have the greatest confidence in the people of the City of Detroit, who, I think are representative of the American people. I can tell you that for the Black people in my city, who are a majority, and for a great section of the white people in Detroit and around it, there are a strength and a belief that have not been destroyed. The people in the City of Detroit have always had a tough fiber. I think that has been demonstrated in the type of cooperation that we've had. We're attempting, in Detroit, to deal with young criminals in a different manner. I'm not saying that we're going to let young criminals take over the city. I understand what poverty and lack of jobs, lack of education and lack of housing can do. But just because I understand doesn't mean I'm going to accept the hooliganism and destruction of civilization and the city as an excuse. At the same time, it is my belief that this type of crime, social mis-

conduct, can be controlled by a police department without brutality, if it's firmly under civilian control, if it can be made into a people's police department. The Detroit Police Department is not that. You know, every move I make, I'm in court, I move for affirmative action; I move for more Black police officers. The point is that we are moving and handling our situation without brutality.

I think that we are honored here tonight to have just such an example: We have here, sitting in the audience, the family of the late Rev. William Paris, a Black minister from New Rochelle who organized the Detroit Police Chaplain's Corps. Bill Paris had an idea that if ministers would establish themselves as chaplains in the police department they could guarantee—they could give a message to the police—that people have some concern for what happens, but at the same time, help the people, Bill Paris became the first Chaplain in the United States, I believe, to lose his life in the course of duty in attempting to apprehend a sniper. Police surrounded this sniper rather than chopping the building down, as has been done so many times. There was an attempt made to talk the sniper out. He was a disturbed Black man in the Black community. Chaplain Paris asked if he could talk to the young man and was told to go upstairs; and as he entered the stairs, he was shot and killed. A white police officer was blinded and almost killed trying to rescue him. We are thankful for New Rochelle's contribution to the City of Detroit, Bill Paris.

I think that we have to have an approach in our cities—certainly, we cannot condone lawlessness. We have to protect society because each of us must walk the streets. But at the same time, we have to insist on a professional approach by our police department and, more importantly, we have to insist that our law enforcement agencies are representative of the people among whom they enforce the law. Now, in Detroit, as in every city in this nation, Blacks and other minorities are underrepresented. We have a high percentage of Blacks in the police department of Detroit right now, about 18 percent, but the city has a Black population of about 52 percent. In no city in America is the percentage of minorities in the population equal in the police department. We're attempting to do that in Detroit. I believe that what is happening in our cities is a threat to the nation itself, and I believe that we must fight for the type of administration which sees this as the answer. I think there's an apathy and a disbelief among the people. There's an alienation, a disgust, as a result of Watergate. I can tell you that as Mayor of the City of Detroit, I cannot mobilize enough policemen, I cannot mobilize enough good will and unity and all these other good things to meet the growing demand for jobs, for education, for equality of young people, Black and white, who exist in unemployment at rates of better than 50 percent. It is my contention that America's greatest enemy lies in the poverty and degradation of its people. We must get our priorities straight. We must elect somebody who can recognize that if the main enemy and danger are within, then the main money should be spent within rather than in armaments and in foreign policy.

There's a struggle going on out there. It's a struggle for survival. We have no guarantees. We have never been guaranteed anything but struggle. If we don't do that, I'm afraid that things are going to get worse before they get better. I have said that I have the greatest confidence in the people of this nation. Well, I think the people of this nation must be given leadership. One reason I'm here is because I think that Freedomways is one of the ways, one of the informational way, of giving that leadership.

I wish that I could indicate to you that the forces of freedom are marching triumphant throughout our land, but that isn't true. And that isn't true in Africa. But I think they're going to win in Africa because I think they recognize the enemy a whole lot better than we do. This we must learn from the African liberation movement.

ONE MAN'S FILES

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. DRINAN. Mr. Speaker, it is now well known that the FBI and the CIA maintain a large number of files on American citizens, many of whom have done nothing more than express their opposition to Government policies. With the exposure of such improper conduct coming as a nearly daily occurrence, it is easy to ignore the precise contours of those activities.

Prof. Gordon C. Zahn, of the University of Massachusetts, recently discussed the contents of his files in the December 18 edition of America. The age and insignificance, from the standpoint of any legitimate governmental interest, of the data contained in them remind us once again that measures must be taken to stop this information collection system and prevent its recurrence.

I am inserting Professor Zahn's monograph in the RECORD so that each Member may appreciate the folly of certain surveillance practices of the FBI and the CIA:

ONE MAN'S FILES

(By Gordon C. Zahn)

(Availing himself of provisions in the Freedom of Information Act, a Catholic peace activist asked to see what the F.B.I. and C.I.A. 'had on him'; it took a while to find out.)

Not long ago, Art Buchwald compiled a list of recommended conversation-stoppers for use at Washington cocktail parties. Included was a well-timed announcement that one has just received his or her file from the F.B.I.

Well, I have—and my C.I.A. file, as well. Although I have not had the opportunity to put the Buchwald thesis to a test, I must confess that, all things considered, the whole affair has proved to be a rather disappointing letdown.

Not a total loss, of course. There is gratification in discovering that, as far as the C.I.A. is concerned, I am too "controversial" a figure to be allowed to speak under that agency's auspices or to wander unescorted through its corridors. But the gratification pales when the inconsequential evidence upon which that judgment was based is taken into account. In fact, there is so little of substance in the files that one is almost inclined to credit both agencies with being overly cautious out of concern for my rights as a private citizen. On the other hand, given their record over the years, a more likely explanation may be simple carelessness and general inefficiency of operation.

This admittedly cynical judgment is based, not on what the files contain, but rather on what is missing. I would be the first to grant that my pacifist activities before and during the Vietnam years were comparatively routine and, with at most one or two exceptions, eminently legal. A preference for logical persuasion over more inflammatory or revolutionary rhetoric might have kept me from qualifying as a Movement "heavy," but the consistency of my involvement, the multitude of petitions and advertisements signed, the many demonstrations I attended (often enough listed as a sponsor)—all of these should have merited more concern or at least notice than these files reveal. Conducive though this may be to a spiritually beneficial state of humility, I must confess that it also presents a serious temptation to give in to more uncharitable thoughts and suspicions.

For one thing, there was the time it took to get even these meager files. Fully eight months passed between my original request for copies of my files under the provisions of the Freedom of Information Act and their arrival. Interestingly, both agencies took about the same amount of time, the mailings from each arriving within a week of the other. Part of the delay was due to the need to obtain "additional identifying data"—date and place of birth, past addresses and occupational history, notarized signature, etc.—to make certain, as the requests explained, "that we have a positive match between records we may have and a person making a request." That this was a thoroughly reasonable and circumspect procedure no one will deny, though one might question whether it was necessary or appropriate for the C.I.A. to ask for "other names which you may have used."

Apologies for the delay because of the heavy volume of requests and the shortage of personnel available to deal with them seemed reasonable, too; but, here again, the C.I.A. added a troubling note by suggesting that a possible alternative to the "thorough search" and "thoughtful review" of whatever material they might have, would be for them to "issue a formal denial" and leave it for me to appeal. I had not complained about the lapse of time, so it seemed gratuitous to suggest that less than full compliance with the obvious intent of the law was even a conceivable option.

It was not entirely clear whether such a "denial" would take the form of claiming there was no file to send or refusing to copy and send whatever material could be found. In my case, at least, the former could not have applied. My letters of request set forth my reasons for certainty on that score. The F.B.I., I knew, had conducted a full-scale investigation of my claim to conscientious objector status during World War II as was required under the conscription program at the time. I was able not only to remind them of this fact but also to furnish them with the name of the agent who had been in charge of the investigation. This may account for the rather surprising result that of the 23 pages of photocopied material furnished in response to my original request all but one were related to that 1942 report.

My confidence that the C.I.A. had a file on me calls for a more detailed explanation, lest my credentials as a member of the peace movement in good standing be summarily revoked. In 1972, at the agency's invitation, I took part in one of its senior officers' training seminars. My "assignment" was to present an adverse critique of American foreign policy. For obvious reasons, this was not an easy invitation to accept: whatever contribution I made, however inspired my denunciation, could only serve C.I.A. purposes and objectives in some fashion or other. At the same time—and, rationalization or not, this was the consideration that finally carried the day—the invitation did provide a rare opportunity to "speak truth to power." I have no way of knowing what impact, if any, my words may have had. But I could be certain that my appearance had to be cleared in advance, which meant there had to be some kind of file in existence. Not only was I proved correct in that assumption, but its

contents included the ego-gratifying evidence that I had been rejected, not once, but twice, before my appearance was finally approved.

This is getting too far ahead of the story, however. Before the issue was closed, I got two separate mailings from both the F.B.I. and the C.I.A., and all four, taken together, served to increase rather than dispel the suspicions that led me to write in the first place.

Certainly, there was little satisfaction or information to be gained from the F.B.I.'s first batch of documents. Apart from that complete record of the 1942 investigation, the single remaining page (dated March, 1967) consisted of a summary listing of six minor items. One noted that I "claimed" to be a conscientious objector to World War II—a strange way of referring to something supposedly established by the other 22 pages of evidence. In the second item, "a source who has furnished valuable information in the past" had informed the bureau that I had been a member of something called the "Pax Vobis Workers' Circle of German Catholics," an organization reportedly identified by West German authorities as having been established by "pro-Communist forces." A third item reported my listing in a New York *Times* advertisement as a sponsor of a Washington march for peace in Vietnam, while the fourth noted that a reproduction of that same ad had been published in the *Worker*, "an East Coast Communist newspaper." In September, 1963, according to the fifth, another (or possibly the same?) "source who has furnished reliable information in the past" identified me as one of the sponsors of the Universities' Committee on the Problems of War and Peace. The final item, which takes on added importance when considered in connection with the C.I.A. file, made it a matter of record that I was listed as an associate editor of *Ramparts* magazine.

The C.I.A. report, if nothing else, was more impressively organized: seven items were furnished in their entirety; 11 others had been subjected to some deletions; nine others were listed in the cover letter but withheld *in toto*. The first group contained nothing particularly startling. Two were standard bibliographical entries taken from *American Men of Science* and *Contemporary Authors*. Then there was a copy of the program for the 1968 Liturgical Week (on the theme "Revolution: Christian Response") listing me as a speaker. There was a photocopy of a *Times* ad in which I, along with a long list of other signers, protested the *Soviet* invasion of Czechoslovakia. The remaining three items all were concerned with my *Ramparts* "connection," one being nothing more than a compilation of the dates of 13 issues in which my name was included on the masthead.

It is probably best to pause at this point and comment on these various disclosures. Except for the "Pax Vobis" reference, I can enter the proud plea of "guilty as charged." Even with respect to that item, I do have a vague recollection of correspondence with a German group of that name; but I do not recall the "Workers' Circle" part, and I certainly know that my contact with them carried no "membership" implications. That the Ramparts editorship should receive so much attention borders on the comic. Some time after that magazine published an article of mine, the publisher or editor (I don't remember which) wrote to say he had taken the liberty of adding my name to the list of editors. He also assured me that if I had any objections, it would be removed at once. Needless to say, I had none. The title turned out to be strictly honorific, however. I never received an article to review or any other editorial task to perform.

It is amusing, therefore, to find this association, remote as it was to the point of being practically nonexistent, assuming sinister implications in the files of the C.I.A. That such was the case can be inferred from one of the 11 partially censored items. A June, 1971 request for intra-agency approval of 19 prospective participants in the senior training seminar program received favorable action on all but one—me. The only hint of explanation was a handwritten notation to the effect that I was "connected" with Ramparts. It might be well to note in this context the point to be developed later in more detail: at this stage of the game I had no idea my name had been submitted; I was not to be asked if I would be willing to appear until the following February, after my name had been submitted—and rejected—again.

The Ramparts connection, such as it was, did not represent the full range of C.I.A. attention to my activities. The file included several 1967 entries concerning talks given or articles published dealing with such things as opposition to nuclear tests, the war in Vietnam, war taxes and the like. A copy of a long letter describing the newly formed Catholic Peace Fellowship was included, even though the only reference to me was a statement including my name as one of the sponsors. Also noted were a couple of advertisements I had signed and the fact that I had participated in a 1966 "town hall" meeting under the auspices of the Chicago Peace Council. Why any of these required censorship is not indicated; I can only assume the parts deleted had to do with names or other identification of the sources from which the information was obtained. As far as the items withheld in their entirety are concerned, they seem to be internal memos having to do more with procedures and operation than with substance. At least I am prepared to give the agency the benefit of that doubt.

The obvious question, and one to which we shall return at a later point, is why any of these items were in the C.I.A. file at all. Even if one were to view them as proof conclusive of subversive acts or intent, they were all "domestic" in nature and, consequently, not within the agency's proper jurisdiction. Only the "Pax Vobis" item had to do with foreign contacts, and that was in the F.B.I. file, not in that of the C.I.A.

Even more striking—and this applies to both files—is the fact that the materials, except for the 1971 entries about my projected appearance (and the 1942 record), do not relate to my period of most intense and organized opposition to war—that is, the war in Vietnam. It is almost as if I had bowed out of the peace movement in 1967 when in fact I was escalating my involvement. Along with Dr. Spock and the others selected for prosecution in the famous "show trial," I was one of the original signers of the "Call to Resist" with its declarations of shared culpability with those draft-eligible men who responded to the "Call." Like many others I operated as a volunteer draft-counselor and succeeded in helping a goodly number of young men obtain their classifications as conscientious objectors. This was the period, too, when I was elected to the governing boards of national peace organizations (SANE, the Fellowship of Reconciliation) and served as chairman of the American Pax Society, the predecessor of the American section of Pax Christi International.

The point of all this is not to recite a litany of service to the cause of peace in the hope of adding stars to my heavenly crown. There were others who achieved greater prominence—some would say notoriety—in the resistance movements and deserve the greater share of whatever praise is due. Though it is true that I stretched or bent the law by accepting draft cards turned in at a public protest ceremony or withholding the telephone tax, I invaded no draft board offices and vandalized no files. Still, I did maintain close personal contact with some of the priests and others who did such things and contributed to their defense efforts (once journeying to Baltimore in an unsuccessful attempt to serve as an "expert witness" at the first of the Berrigan trials). So it is surprising, to say the least, that none of the teams of agents unleashed by J. Edgar Hoover to crush that Catholic "peace conspiracy" made note of by guilty association with the conspirators.

That none of these activities were caught by the C.I.A. is equally surprising despite the fact that these activities were domestic in nature and not that agency's responsibility. After all, the items they did record in their file fell into the same category. But there were other activities of a clearly foreign nature that might have stirred more legitimate interest. When my study of German Catholic support for the Hitler war effort was published in 1962, it was met by a storm of indignation and denunciation. One recurrent charge was that my findings could only serve the interests of "the enemies of the church" (meaning Communists) and encourage the forces in Germany seeking to undermine the Adenauer Government. Regardless of whether such charges were valid, it is passing strange that the whole controversy and its implications for NATO and American foreign policy interests did not merit any notice on the part of the agency most responsible for checking such potential threats. And it was true that my book and its findings were most enthusiastically received by the intellectual *linkskatholiken* (Catholic left) critics of *Der Alte*, including prominent figures and organizations that must have been on the agency's list of candidates for observation.

Perhaps it is too much to expect a literary/theological tempest in a teapot to be given a position of priority, but there are two other omissions deserving mention. Even I, who know how innocent they were, would agree that they should have stirred some official attention, even concern. I am not sure when it began—perhaps it was an outgrowth of that "Pax Vobis" exchange of hazy memory—but for some time now I have been engaged in a very occasional correspondence with organizers and leaders of the *Berliner Konferenz*, an East Germany-based organization of Catholics from 20 or so "Iron Curtain" countries with a program for promoting international peace and friendship. I have never been under the illusion that this organization, or, for that matters, its members share my own pacifist commitment, but I nonetheless welcomed the opportunity to establish some measure of contact with them. Over the past several years this has dwindled to an annual exchange of Christmas cards, but, back in 1967, I accepted an invitation to participate in a meeting held in Potsdam as a guest observer. Not only were my expenses while there assumed by my hosts (I assume the East German Government, ultimately), but special arrangements were made to drive me to East Berlin and back for a lavish and lengthy morning conference with leaders of the Christian party in the official Government political coalition.

Is it possible, I must ask, that the meeting and my attendance at it did not merit a brief item for my file? My hosts apparently thought otherwise, for the generously offered to dispense with stamping my passport to spare me any embarrassment or inconvenience—an offer, incidentally, I did not accept. If, as we have learned, overseas mail from East Germany and other Eastern nations was regularly monitored or if, as everyone assumed, my efforts to reach my prospective hosts by telephone from West Berlin were carefully recorded, there is no logical reason why there should be no reference to that visit in my file.

The other omitted item was similar, though admittedly far less dramatic. In 1973 I visited the U.S.S.R. as a member of a "Toward Enduring Peace" tour. However commonplace such international tour arrangements have become, the specific focus of this particular tour and the personal back-

ground of some of its members would have justified some show of interest on the part of our national security organizations. Or, if such interest would not really have been justified, it also would not have been unexpected.

I have gone into considerable detail on these omissions because I consider them extremely significant, for reasons to be explained. In any event, they seemed to justify further correspondence with both agencies to challenge the adequacy of their response to my request for the files. Though I honestly did not expect much satisfaction, I could at least take some enjoyment from imagining the consternation my letters, describing in some detail what my file "ought" to have contained, would cause when they arrived. But that pessimistic assessment was only partly confirmed. A few weeks later I was to receive a mailing of 15 additional items from the F.B.I., the product of a second search "based on additional details provided by you in your recent letter." It took the C.I.A. about a month longer before they, too, came up with copies of 17 additional items from their files.

Not all this additional material was new; none of it, despite references to my letter, touched upon the omissions I had requested. The 10 "new" items in the F.B.I. dossier—all relating to talks I had given, ads I had signed and certain of my peace affiliations—duplicated material previously furnished by the C.I.A. It was interesting to note that while some of the entries now extended to 1971 and 1972 activities, there was still no reference at all to my contacts or connections with the Berrigan brothers and others involved in their draft board actions.

In like manner the additional C.I.A. material studiously ignored the specific points I had raised concerning my overseas relationships. Nevertheless, it did furnish two "revelations" of some significance. The first had to do with the rather thorough accounts of talks I had given at two universities. It was clear from these accounts that they represented the kind of on-campus surveillance of anti-war activities that had brought the agency such well-earned criticism and condemnation for unwarranted intrusion upon the rights of individual citizens.

Of more immediate personal interest, however, were the new documents and internal memoranda bearing upon the objections that had been raised to my 1972 appearance as part of the agency's own training seminar program. The earlier mailing had shown that a July, 1971 request had been disapproved; now there was information as to the reason for that negative action. A September, 1972 memo referred to "current National Agency checks" and provided a list, or description, headed "subject's activities"—which, alas, was completely blacked out. But whatever that section contained, it was enough to lead to the conclusion: "The subject has been associated with numerous questionable activities in direct opposition to major U.S. foreign policy and has counseled others to oppose [the] Selective Service System." The decision to deny clearance carried no less than five handwritten and initialled concurrences.

Until now I had assumed it was this decision that had been appealed and reversed. The new material revealed that a second and separate application was submitted the following January and that this one, too, was denied "in view of the unfavorable information." It was this second rejection that was then appealed on the grounds that 1) "Subject is no worse than some of the other approved speakers who are quite 'controversial' "; 2) I had maintained a consistent record of conscientious objection since 1941; and 3) I had been selected precisely for the purpose of presenting my dissident views to an audience described as consisting of "20 senior agency officers who can hold their own in heavy discussions on the world situation."

For good or ill, the appeal was approved—but only on condition that, because of my "highly controversial background," all participants in the seminar were to be cautioned that any discussions with me had to be conducted on an "unclassified" basis and, a real surprise, that I "be escorted at all times while on agency premises." All the time I thought that was standard procedure!

It was at this point that "subject" was finally brought into the picture. Requests, rejections and successful appeals were all played out without anycne contacting me to see if I would be willing to take part, and, needless to say, none of what had gone on before was made known to me when the invitation was finaliy extended.

It should be obvious by now that what has been described here has crucial implications reaching far beyond one individual's unsatisfactory experience. Some of the questions raised by this account require no elaboration. Given the kind of material included in all four mailings—two each from the two agencies—was there anything to justify gathering such minor items in the first place or, allowing for the possibility that they came to the agencies unsolicited, entering or keeping them on file? Next, by what stretch of the imagination could one justify the judgment that the material so accumulated constituted a "highly controversial background"? Finally, once we have carried it to this point how could one ever justify going the additional step of basing any kind of a decision on so insubstantial a judgement without the "subject" being made aware of the consequences of that decision and given some opportunity to counteract it? In this particular instance, fortunately enough, there was little at stake. If, however, such procedures had been applied to someone under consideration for a Government appointment or in some other area of personal importance, the outcome might have been as tragic as it was unjust.

These considerations are premised, of course, on the assumption that both agencies knew what they were doing. There is a second and somewhat unsettling set of possibilities that might apply. For all we know these may be other items of information—even other files?—that have not been made available to me. In one of Director Clarence Kelly's letters, he refers to a search of the "central files." Are there perhaps "peripheral" files or "branch" files left unsearched? One cannot help but be troubled by the fact that a lengthy search of the files produced a single page of six relatively recent entries while a later, and much briefer, search of the same (?) files came up with more than twice that number. Is it possible that a third request, then a fourth and fifth and more, would each produce additional and more recent items? If so, how many such searches would it take before the F.B.I. discovered that Daniel Berrigan had once honored a book of mine as having had a major influence in the formation of his and his brother's "will to resist the legitimized murder of 20th-century war"? And, even more important, what conclusions might be drawn from that?

These are not frivolous questions. If a citizen's request for his file brings such careless or incomplete responses, the purpose of the Freedom of Information Act is being circumvented in effect, if not in intent. It is possible, I suppose, that our security agencies are so inept in their operations and their files in so chaotic a state of disarray that the pattern described here in such detail could be dismissed as a simple matter of bureaucratic breakdown. Possible, yes; but unlikely. If tomorrow the F.B.I. or the C.I.A. were to receive word from a "source who has furnished reliable information in the past" that I was engaged in some subversive activity, I am more than confident that all the material they have on me could be assembled and in hand in much less than eight months.

Carelessness, incompetence or inefficiency are not sufficiently compelling explanations. I find it most plausible that the fault lies in the processes and procedures employed than in the sincerity and intent with which the agencies approach requests for copies of their files. To put it bluntly, I am not convinced that these agencies are prepared to comply with either the spirit or the letter of the law. There is, of course, no way definitely to confirm or refute this suspicion, short of being given full and unrestricted access to the files themselves. But the suspicion persists, nontheless. If it is unfair to give voice to the suspicion without proof, it is surely no more so than for these agencies to pass an adverse judgment on the basis of such thin evidence as has been presented here. On the other hand, if more substantial evidence is at hand, the failure to make it available would constitute an evasion of the law as charged.

One final point. I would not want this account of my experience to dissuade anyone from exercising the rights established under the Freedom of Information Act. Quite the contrary. It was most gratifying to learn that the C.I.A. has been "virtually inundated" by requests for files and to find the F.B.I. justifying its plea for patience on the same grounds. If nothing else, this testifies to an upsurge of citizen concern over the actual or potential intrusions on the rights and privileges provided under the Constitution. Such requests, I would hope, will be increased rather than diminished by this account. It is a matter of record now that anyone who signed a petition or an ad, who may have written a letter to a newspaper or expressed an opinion that some "source who has furnished reliable information in the past" found subversive enough to report, might learn to his discomfiture that even these minor things have been carefully recorded and may at some future time be enough to classify him as a "very controversial" figure. It is certainly worth the effort to know where one stands in the eyes of Big Brother.

One should not expect too much, of course. Patience is advised, and a goodly measure of stubborn persistence may be required. Operating as Government-subsidized "clipping services," these agencies, I fear, are—to borrow Ron Ziegler's classification of the Watergate affair—"third rate" at best. Even so, let no one be deterred. If nothing else, the day may come when the opportunity will present itself at some cocktail party or other social affair to bring the idle chatter to a halt simply by saying: "You know, I have just received my file from the F.B.I. . . ."

HEW-SOCIAL SECURITY ADMINISTRATION REPORT ON MEDICARE COST-SAVING EXPERIMENTS AVAILABLE FROM WAYS AND MEANS COMMITTEE

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. VANIK. Mr. Speaker, in May 1976, the Ways and Means Oversight Subcommittee, which I chair, held 2 days of hearings on the subject of medicare cost-saving experiments. At that time, we requested periodic reports from HEW on the progress of the various experiments mandated under the Social Security Act.

I have received detailed reports from HEW and Social Security on the status

of the various projects underway and planned. I believe that these reports are valuable and interesting documents for all of those interested in health care delivery, medicare, and the control of health costs.

Copies of the reports are available, without charge, from the Ways and Means Oversight Subcommittee, 1539 Longworth House Office Building, Washington, D.C. 20515.

THE HIDDEN COSTS OF REGULATIONS

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. SHUSTER. Mr. Speaker, I commend to my distinguished colleagues the following article by Mr. Irving Kristol which appeared in the Wednesday, January 12, 1977, Wall Street Journal.

Mr. Kristol's brainy article brings to clear light the effects that the costs of regulations have on the corporation in terms of capital spending versus capital investment and on the public as stockholders, employees, and consumers:

THE HIDDEN COSTS OF REGULATION

(By Irving Kristol)

In all of the recent discussion of our economic condition, there has been controversy over whether a tax cut is really necessary and, if so, what kind of tax cut would be most beneficial. To the best of my knowledge, no one—not even John Kenneth Galbraith—has dreamed of proposing a tax increase. Yet that is what we shall get this year—specifically an increased tax on corporate income. Indeed, we got such an increase last year too, only no one noticed.

It is not really as surprising as one might think that our economists, our accountants, even our business executives should be oblivious to the steady increase in corporate taxation that has been taking place. Habitual modes of perception and conventional modes of reckoning are likely to impose themselves on a changing reality rather than go through a painful process of adaptation. And the learned economist or alert executive can fail to observe an important feature of a situation, simply because he wasn't looking for it.

Here is an example of what I mean. Corporation "X," in order to meet water pollution standards set by the Environmental Protection Agency, has to install new filtering equipment that costs $2 million. How is this expenditure to be accounted for? Well, at present, it is counted as a "capital investment" and is carried on the books as an "asset" of the corporation. But does this make any sense?

After all, a "capital investment" is supposed to promise an increase in production or productivity, or both. An "asset," similarly, is supposed to represent earning power, actual or potential. But that new filtering equipment may do none of these things. Indeed, it may actually decrease productive capacity and productivity. In short, the $2 million ought properly to be counted as a government-imposed cost—in effect a surtax; an effluent tax, if you wish—and the company's stated after-tax income should be reduced accordingly.

The government, instead of imposing an actual tax and using the proceeds to purchase and install the equipment, mandates that the firm do so. The end result, however, is the same.

A SOCIAL GOOD

Mind you, I am not saying that the new filtering equipment is just money down the drain. It does buy cleaner water, after all. But that cleaner water is a free "social good" and a "social asset" to the population in the neighborhood (and for the fish, too); it represents no economic gain to the corporation, which has only economic assets and knows nothing of "social assets." It also buys governmental "good will"—but so do bribes to foreign officials, and I am not aware that anyone has yet thought to capitalize them. On the other hand, the new equipment is unquestionably an economic cost to the corporation—and, of course, to the economy as a whole.

As things now stand, we render those economic costs invisible. That is both silly and undesirable. Silly, because they are real costs. Undesirable, because we shall never persuade the American people to take the problem of regulation seriously until they appreciate, in the clearest possible way, what it is costing them—as stockholders, consumers, employes.

The costs we are talking about are by no means small, and their impact by no means marginal. In fact, they are far, far larger and more serious than most people realize. Unfortunately, there are no comprehensive, precise estimates available. But one can get a sense of the magnitude of such costs from the following bits and pieces of information:

U.S. Steel has just signed a seven-year agreement with federal, state, and local environmental agencies that will require it to spend $600 million over that period to eliminate air pollution from its Clairton Coke Works in Pittsburgh.

The steel industry as a whole will be spending well over $1 billion annually on pollution controls—and that is a conservative estimate. This expenditure amounts to over one-quarter of the industry's total annual capital investment.

Meeting EPA's 1983 water pollution standards will cost all of American industry, over the next seven years, about $60 billion for capital equipment and another $12 billion annually in operating and maintenance costs.

Meeting noise pollution standards, as mandated by Congress and enforced by the Occupational Safety and Health Administration (OSHA), will involve expenditures of over $15 billion in capital costs and $2 billion to $3 billion in operating costs in the years immediately ahead. If these noise standards are raised to the level recommended by the U.S. National Institute for Occupational Safety and Health—a recommendation endorsed by EPA—the capital costs will climb over $30 billion.

The Wall Street Journal recently reported that new health regulations in the cotton industry will cost some $3 billion over the next seven years. It has been estimated by Professor Murray Weidenbaum that American industry's costs to meet OSHA safety standards *this year* will be over $4 billion.

EPA is on record—for what that is worth—as calculating that industry's total capital investment requirements for all kinds of pollution control equipment will, in the decade 1972–81, add up to $112 billion.

None of the above figures is particularly reliable, and they may even not be entirely consistent with one another. But they do suffice to give a pretty fair indication of what is going on. Even so, important costs are omitted—those costs, for example, which involve product redesign or the design of the work place. Thus, the increased cost of housing over these past years results, to a significant degree, from various environmental regulations. And Ewan Clague, former U.S. Commissioner of Labor Statistics, points out that productivity in bituminous mining has decreased 30% since 1970, largely as a result of the passage in that year of the Coal Mine Health and Safety Act. These indirect costs are not capitalized, of course, and technically are not "hidden." On the other hand, who would claim that the public appreciates their dimensions?

As one contemplates those numbers, various inferences suggest themselves. One is that a clear distinction ought to be made between "capital spending" and "capital investment." We are told that capital investment last year amounted to $121 billion, and economists were somewhat disappointed that this represented only a 7.5% increase over 1975. But if, as seems likely, as much as 10% of that figure should not be counted as "capital investment" at all, since it consisted of economically unproductive *expenditures* of capital to meet governmental regulations—where does that leave us? It leaves us, I would suggest, with a net reduction in true capital investment in 1976, the economic effects of which will be with us for years ahead. One such probable effect, a decline in the rate of growth of the American worker's productivity, has already been noticed—though never accounted for.

It may be argued that these economically unproductive expenditures do, after all, create jobs (temporarily) and do contribute to the Gross National Product. But so would the corporate construction of beautiful pyramids, at governmental behest. That would create jobs (temporarily), inflate the GNP, and provide us with a "social good" (a great spectacle). But it would be a cost to the economy, and if our conventional statistics are incapable of showing it as such, then it is those statistics that need revision.

COSTS PASSED ALONG

It is also true that, in many cases, corporations are able to maintain their profit margins by passing on their increased costs—directly to the consumer, indirectly to their stockholders (by holding down dividends) or to their employees (by granting lower wages than they otherwise might). But that is what usually happens to corporate taxes—they get passed on to *someone* since the corporation itself is only an economic mechanism, not an economic person (except, fictitiously, in law). In the world market of today, however, not all corporations can pass on those costs. In those instances, we get declining businesses, declining industries, a sagging economy. In any case, those costs—passed on or not—should be visible, instead of hidden as they now are. The Federal Reserve's index of plant capacity, for example, apparently makes no effort to distinguish between capital expenditures and capital investments, and is to that degree misleading.

It is true, too, that firms can depreciate their uneconomic, mandated capital expenditures. But that equipment will have to be replaced as it depreciates with age—we are not talking about a one-time expense.

The situation we have gotten ourselves into would be ridiculous if it were not so serious. We are much exercised—and quite rightly—by the fact that the OPEC monopoly has cost this country some $30 billion in increased oil prices since 1972. But in that time we have inflicted upon ourselves much larger economic costs through environmental and other regulations—and will continue to do so, perhaps at an increasing rate.

Yes, these economic costs do buy real "social goods." But may the price not be too high? Is the resulting inflation of prices, constriction of productive capacity and increase in unemployment worth it? Would it not be appropriate for us to ask ourselves this question openly, instead of going along with the environmentalists' pretense—so pleasing to our politicians—that our "social goods" cost us nothing at all? Isn't it time that business stopped bleating in a general way about those costs and showed us what they really mean, all the way down to the bottom line?

A LETTER TO PRESIDENT-ELECT JIMMY CARTER

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. FISHER. Mr. Speaker, I am inserting into the CONGRESSIONAL RECORD a letter from Matthew J. Kerbec, president of Output Systems Corp., to the President-elect on the subject of the economy.

Mr. Kerbec's remarks do not necessarily reflect my own point of view; however, I did want to share his opinions with my colleagues:

DECEMBER 22, 1976.

President-elect JIMMY CARTER,
Atlanta, Ga.

DEAR MR. CARTER: There is little hope for prosperity in the next four years. Present energy and economic policies will guarantee a sick economy. How sick, will depend on whether the Government will return enough money to consumers to compensate for increasing prices and how much energy and economic policies will change.

It is frightening to find that at the end of 1976, the Nation is again in a recession after spending over $100 billion in 1975 and 1976 to stimulate the economy. This was $11 billion more than the entire Defense budget for FY76. If another $20 billion is spent for economic stimulus in 1977, the National Debt will increase by another $97 billion and there is another whopping increase already programmed for FY78. The U.S. is following the borrowing patterns of Italy, Great Britain and other countries which have been hit with triple digit energy price hikes.

The real shocker is that the National Debt will increase by 69% in the 1973–77 years. It required 196 years and four major wars to accumulate a debt of $437 billion by 1972. From 1973–77 the National Debt will go up another $303 billion. Piling up debt at this rate can set the stage for hyperinflation as the Treasury Department keeps printing and selling more and more securities to pay its bills. Little publicized is the fact that there is a significant difference between the yearly "budget deficit" and the increase in the debt. It would be much more meaningful for the Government's financial goal to be "zero increase" in National Debt than a "balanced budget" which does not include off-budget deficits which will amount to over $90 billion in the 1973–77 years (see Table I).

THE 1976 RECESSION WAS NO SURPRISE

To understand the reason for the 1976 recession, it is necessary to go back to 1973 when the first massive price increases for energy started to switch the economy from a demand-pull (too much money chasing too few goods) to a virulent cost-push inflation (skyrocketing basic product prices). Many specialists wrongly treated the huge energy price increases as a one-time price bulge which would be quickly absorbed. The real economic damage only becomes apparent when the 1973–76 years are examined as a block. From July 1973 to December 1976 it is estimated that final prices for natural gas, coal and refined oil products will have increased over $186 billion.

But this is only the start of the economic damage assesment. The $186 billion caused a self feeding series of economic ripple effects resulting in massive inflation, millions of lost jobs and ever growing budget deficits. It is estimated that higher prices will siphon over $587 billion in purchasing power out of the economy in the 1973–77 years. Industries recycle part of this back into the economy as wage increases, taxes, dividend payments and investments. But, more was taken out than returned. The $100 billion in stimulative spending in 1975 and 1976 went like water through a sieve. Even with this spending unemployment rose to 8.1% in November 1976. The evidence shows that higher prices drained away purchasing power faster than wage increases and Government spending replaced it and this was the primary reason for the 1976 recession. With an estimated 6% cost-push inflation for 1977, another $113 billion will be taken away as higher prices. Under the assumption that $20 billion is programmed for economic stimulus in 1977 there is little reason to believe the economy will improve unless something is done to reduce prices.

LITTLE HOPE FOR ECONOMIC IMPROVEMENT 1977–1980

It is logical to assume that the Organization of Petroleum Exporting Countries (OPEC) will periodically increase oil prices to the level that will keep its customers solvent but not overly prosperous. From OPEC's standpoint, a justifiable pricing schedule could be one that mandated price increases (all the traffic will bear) until OPEC members felt that the standard of living of their people was equal to that of their customers. Ripple effects are of little concern to OPEC or domestic energy producers.

This is another way of saying that the U.S. and other oil importing countries will not have to worry about overheating their economies by too much fiscal or monetary stimulus. Both OPEC and most governments now know that one quick way to reduce the demand for goods and services is by increasing energy prices. Actually, the OPEC cartel would be remiss in its responsibilities if it did not increase prices when the demand for goods exceeded supply in the oil importing countries. Under these conditions, prosperity may only become a dream to oil importing Nations.

As U.S. energy pricing policies are aimed at getting domestic energy prices up to OPEC levels in the shortest possible time, the "windfall" profits that accrue for each price increase will mostly go to U.S. energy producers rather than OPEC but the economic ripple effects in terms of inflation, lost sales, unemployment and spiraling National Debt will be the same.

The following are a few of the pressures that will force up prices in 1977: (1) U.S. energy companies will be under pressure to increase domestic crude oil prices in accordance with the 1975 Energy Policy and Conservation Act and also at the refinery level to compensate for loss of revenues caused by nationalization of their foreign income producing assets. If President Ford's current attempt to decontrol gasoline prices is successful, it will mean the end of price controls on almost all refined oil products. Thus, the Nation will be subjected to still more periodic energy price increases, in addition to OPEC's increases, which will siphon away more purchasing power. The direct and ripple effects of each one cent per gallon increase in refinery products will drain approximately $6.5 billion out of the economy. This could be cumulative if wholesalers and retailers added a cent; (2) another inflationary factor is that many companies have adopted the practice of hiking prices regardless of whether sales go up or down. Many believe that companies are doing this because they fear price controls. In 1974 President Ford absolutely guaranteed there would be no price controls; yet, from December 1973 to December 1974 steel prices increased by 38%, industrial chemicals 83%, plastic resins 97% and agricultural chemicals jumped 71%. No industrialized, profit oriented economic system can endure without massive disruptions under these pricing pressures. Since then, these prices have continued to increase even in the face of falling demand; and (3) multiyear wage contracts in the basic industries have provided relatively large wage increases in the heavily unionized basic industries which will contribute to inflation and create additional ripple effects.

Guaranteeing there will be no price or wage actions is like a cancer specialist saying he would never use surgery to treat breast cancer. Price and wage policies are a necessary part of a complete set of economic tools which should also include fiscal, monetary and antitrust policies.

Based on new economic theories I developed, it was possible in 1973, to predict the coming unprecedented inflation/recession in the 1974–5 years and the recession in 1976. Most of these economic illnesses could have been avoided and presently there are actions that can be taken to minimize the Nation's economic and financial deterioration. I will be happy to meet with your representatives to discuss how this can best be done.

Sincerely,

MATTHEW J. KERBEC,
President.

P.S. Some of my comments in notes A and B have been quoted in the December 27, 1976 edition of Newsweek Magazine, p. 30.

TABLE I.—SELECTED STATISTICS FOR THE YEARS 1973–77

Year	GNP current (trillions) (1)	Inflation CPI year to year (percent) (2)	Purchasing power lost through inflation col. 1×col. 2 (billions) (3)	U.S. budget deficits, (billions) surplus or deficit (−) (4)	Off-budget deficits (billions) (5)	Total national debt (billions) cumulative (6)
1973	$1.306	6.2	$80.9	$14.3	$16.8	$468.4
1974	1.406	11.0	154.6	−3.5	14.3	486.2
1975	1.499	9.1	136.4	−43.6	14.3	544.1
1976 estimated	1.708	6.0	102.5	−65.6	21.6	631.3
Transition quarter				−12.7	1.5	645.5
1977 estimated	1.890	6.0	113.4	−75.4	22.0	742.5
Total	78.09	38.3	587.8	−214.7	90.5	3,518.0

DISCUSSION

Column 5 (Off Budget Deficits) represents money spent by the government that does not go-through the Congressional budget process. These deficits come from Government owned activities and Government sponsored Credit Systems. The debt from these entities is part of the Gross Federal Debt but is not subject to the statutory debt limit. Budget authority and outlays for these off budget entities completely escape the new Congressional budget process (Ref: Off Budget Activity of the Federal Government, House of Representatives Report No. 94–1740.) President Ford's Budget for 1977 observed that, "In many cases there is little or no justification for off-budget treatment."

In Table I above, this hidden debt is estimated at $90.5 billion (1973–77) and was in addition to the $214.7 billion which is widely reported in the news media. In the 1973–77 years the Treasury Department's printing presses will have to print and the Treasury will have to sell a total of $305.2 billion worth of securities to pay its debt for these five years. Assuming a 6.5% interest rate, in FY78 interest alone will cost $19.7 billion. This is more than the total budgets of the Department of Commerce, Interior, HUD, Justice. and State plus the combined budgets for the Legislative and Judicial branches of Government in FY76.

As there is no reason to believe that we will pay back any of the principle, starting with FY78 the Treasury will have to print and sell $303.7 billion in new securities and pay interest on the interest. It required 196 years to accumulate a National Debt of $437.2 billion by 1972. From 1973 through 1977 the U.S. will have increased its National Debt by over 69%. The projected deficit for the FY78 budget is approximately $44 billion with an estimated $20 billion for off-budget deficits which are beyond Congressional control. Primarily responsibility for the deteriorating economy and financial structure of the U.S. can be traced to the huge price increases for energy and energy intensive basic products that occurred in 1973 and 1974. As these prices keep ever rising the economic and financial condition of the U.S. will get worse.

NOTE A

Energy as a percentage of total material costs for the following products are: steel 23%; fertilizer 43%; chemicals 30 to 60% and aluminum 18%. It takes 22% of all U.S. energy to farm, process and distribute food. Oil and coal costs amount to about 45% of all electric bills. When energy prices increase over 75% in one year (July 1973 to June 1974), they automatically create Economic Ripple Effects that cause massive inflation, unemployment and budget deficits.

The U.S. from now on will be in a perpetual series of economic and financial crises as present U.S. energy price policies are aimed at getting all U.S energy prices up to OPEC levels regardless of the economic damage.

Kerbec predicted the economic disruptions of 1974–76 in 1973 and states that most of the disruptions could have been avoided.

NOTE B

From 1973 through 1974, coal, natural gas and refined petroleum product prices increased an estimated $62 billion or a total of $186 billion from 1973 through 1976. About $50 billion of this went to OPEC. The rest represented an approximate loss of purchasing power of $136 billion.

In 1976 the total cost for all forms of energy in the U.S. is estimated at $165 billion. This is greater than the total food cost.

From Dec. 1973 to Dec. 1974 energy, steel, chemical and other energy intensive basic product prices increased over 60% and were the primary causes for the 12% inflation in 1974. These price increases caused economic ripple effects which caused massive unemployment and record budget deficits. This chain reaction is still in motion as energy and other basic prices continue to increase regardless of whether sales go up or down. There is no relief in sight in 1977 or 1978.

THE MIDDLE-AGED AND OLDER WORKER EMPLOYMENT ACT OF 1977

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. RICHMOND. Mr. Speaker, on January 4, 1977, I introduced the Middle-Aged and Older Worker Employment Act of 1977 as a means of easing the unemployment crisis and stimulating greater opportunities for the worker over the age of 40.

The legislation which I have introduced would establish a midcareer development service within the Department of Labor through which the Secretary would be authorized to make training loans and grants for programs to improve the skills and abilities of older and middle-aged workers, and would provide recruitment, placement, and counseling services in the case of a mass layoff in a given area. The bill provides for research to improve and stimulate opportunities for middle-aged people, and enables the President to appoint a Commission on Lifelong Adult Education.

All the elements of the bill are intended to alleviate the stages of crisis that the employed person encounters once he reaches the age of 40, and to keep the person over 40 as a productive member of society.

According to several key studies conducted over the past several years, when an employed individual reaches his 40's or 50's he begins to face some very serious difficulties—"joblessness begins to rise, duration of unemployment increases sharply, occupational mobility is seriously limited, and the incidence of poverty increases."

From August 1969 to November 1976, the number of unemployed increased from 2,856,000 to 7,769,000, representing a percentage increase of 272 percent. While the increased unemployment was difficult for the entire Nation, the increase had very serious consequences for that group of workers over the age of 40.

In August of 1969, there were 596,000 unemployed Americans over the age of 40. Today there are 1.4 million Americans over that age out of work. According to Department of Labor statistics, this represents 26.7 percent of the total unemployed. While the national unemployment rate as of November was 7.8 percent, it is fast approaching 9 percent for individuals between the ages of 55 and 64.

According to a report by the National Council on Senior Citizens, the above figures only represent the "tip of the iceberg." Because of the limited possibilities for employment, it was estimated in 1972 that more than 2.5 million older men had "withdrawn" from the labor force. Assuming that just 25 percent of these individuals wanted and needed employment, then 600,000 people would have to be added to the number of unemployed. The figures are even worse for women. The NCSC study noted that in 1972, 11.6 million older women were out of the labor force. If just 5 percent of these women wanted and needed employment, then another 600,000 people would have to be added to the unemployment figures. The conclusion by the NCSC was that if the present trend continues, in a few years 1 out of 6 men between the ages of 55 and 59 will no longer be in the labor force.

One of the major problems facing older workers who have been laid off and seeking employment is the duration of unemployment.

The Senate Special Committee on Aging reported that older workers can expect to be unemployed 30 to 70 percent longer than other groups. Currently, 1 out of 3 has been unemployed longer than 15 weeks, 39 percent are in the category long-term unemployment or unemployed longer than 27 weeks, and 40 percent are in the category of very long-term unemployment or unemployed for longer than 6 months.

These figures become more significant when one takes into consideration that, though, in some States, such as New York, it is possible to collect unemployment benefits for as long as 65 weeks, the average duration of unemployment benefits is 20 to 25 weeks.

The options once unemployment compensation is exhausted are limited. For many the only recourse is welfare. For others, if they are at the Social Security ages, 62 or 65, it is possible to begin collecting social security benefits. However, many of those who begin receiving social security benefits hope to find some income to supplement the benefits, but not so much income that it would decrease the benefits.

For those below social security age there is a possibility of taking part-time employment but very often it is with drastic reductions in pay and requirements in skill. For these individuals, aside from the difficulty in paying mortgages and supporting families, long-term unemployment may possibly have the damaging effect of reducing future retirement income.

The saddest element of all the figures concerning older people is the increasing level of poverty. According to the Bureau of Census, there are 25,877,000 people now living in poverty. Of that figure 5,450,000 represent heads of households. Of these 5 million family heads, well over 1 million are between the ages of 45 and 64, and 728,000 are over the age of 65.

One of the problems of older employment legislation is convincing people that older people want and need to work. The 1 million heads of household are obvious evidence of the need. It can certainly be assumed that a good percentage of them are able and willing to work. Though, the Age Discrimination Act was a positive step, it is not positive enough. Though, title IX, community service jobs are an

excellent step, officials have testified that the serious problem rests with those people below the social security age seeking full-time employment. Though, CETA was supposed to assist older workers, title III mentions the elderly as a target group, it is up to the discretion of the prime sponsor whether or not it intends to make use of elderly workers.

Obviously, a more affirmative step is needed to provide jobs, uplift the skills and capabilities of older workers, provide seriously needed training and counseling services to prevent future despair, and to research and develop more opportunities for middle-aged and older Americans.

CURRENT TECHNIQUES IN CHILDBIRTH

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. BINGHAM. Mr. Speaker, one of my constituents, Mrs. Estelle Cohen, of Co-op City in the Bronx, has made a special study of current techniques in childbirth which she is convinced are dangerous and responsible for many grievously handicapped children. The following letter, which appeared in the New York Post on February 23, 1976, summarizes her position:

[From the New York Post, Feb. 23, 1976]

BARBARIC CHILDBIRTH?

Let's continue to manage childbirth in our hospitals in the worst interests of babies; let's continue to use hazardous drugs and flat delivery tables; let's continue to start labor at our convenience and hurry it along; let's remove newborns from their mothers to be fed from a bottle by a stranger in a nursery.

Let's pour millions of nonlearning and disturbed children into our population and let's continue to ignore the relationship between their impaired nervous systems and the assaults on them at their births. When the barbarism of childbirth, American style, is finally recognized, let's wonder why so many were silent long after the warning signals went up.

I also include herewith a letter Mrs. Cohen wrote to the New York Times published on April 20, 1976, in response to a letter from a Vermont doctor who criticized the movement toward births at home:

[From the New York Times, Apr. 20, 1976]

To the Editor:

In decrying the movement toward births at home, Dr. Landrum B. Shettles wrote [letter April 10] that "a single loss of a baby or mother under such inadequate circumstances is simply unacceptable."

The sad fact is that for the healthy woman capable of bearing children without the intervention of less-than-omniscient obstetricians the odds in favor of a neurologically intact baby are probably better in the home birth than in most of our hospitals.

A Congressional inquiry is long overdue on the continued ignoring of research warnings about potentially hazardous obstetrical drugs and techniques because the presence of such great numbers of brain-impaired children in our population should be "simply unacceptable." There has been a disastrous failure to appreciate the folly of unnecessary meddling in the normal birth process, a meddling which is still to be publicly decried by the American College of Obstetricians and Gynecologists and the American Academy of Pediatrics.

Mrs. Cohen has also furnished me with the following items of interest in the same connection: an article from the New York Daily News of November 16, 1976, and excerpts from a Jack Anderson column of February 23, 1976.

[From the New York Daily News, Nov. 16, 1976]

HOME BIRTHS SAFER, SAY SOME DOCS

(By Gus Dallas)

Women should give birth at home instead of in hospitals because the risk of damage to the baby is greater in the hospital, according to some doctors who attended an obstetrical management conference at the Statler Hilton Hotel yesterday.

Dr. Robert S. Mendelson, pediatrician and associate professor of preventive medicine at the University of Illinois, predicted that 10% to 15% of the babies born in hospitals in the next 12 months will be needlessly damaged during labor and birth. He advised greater use of midwives.

HOW DAMAGE OCCURS

"Doctors intervene too much in what is a natural process; they act as if pregnancy is a nine-month disease that needs their help to be resolved," he said at the conference of the American Foundation for Maternal and Child Health.

He said birth damage is brought about when doctors rely too much on drugs, anesthesia, analgesics, inducing birth, discouraging breast feeding and ignoring psychological needs of the patient. Risk of infection and accidents in a hospital is greater than in the home, he said.

A comparison matching women who had babies at home with women who had them in a hospital indicated greater damage instances in hospitals, according to a study reported by Dr. Lewis E. Mehl of the Infant Development Center of the University of Wisconsin.

There were 1,064 women in each group when the study commenced, but 8% of those who had planned to have their babies at home had their delivery in the hospital because of complications, he said.

He said the study showed that there was no difference in deaths but that there were 30 birth injuries in hospitals compared to none at home; 52 hospital infants needed resuscitation, to 14 at home; six suffered neurological damage in hospitals, to one at home, and eight had infections in the hospital, to two at home.

"I believe that a hospital environment leads the hospital practitioner to expect pathology and intervention is started that may not be necessary," he said.

He did not advise that all women should have their babies at home, but said women should be informed of risks and options so that they can make their own decisions. Malpractice suits also would decrease drastically, he said, since many suits are brought by patients who contend that they were not told about side effects and other risks, he said.

JACK ANDERSON (WITH LES WHITTEN)

We recently reported that the stodgy administrators of the National Institutes of Health were stifling research which they considered "unconventional." This has caused the U.S. to drop behind other nations in certain fields.

In response to our column, several scientists have contacted us about other vital research that NIH is neglecting. Here are a few examples:

Dr. Robert Reisinger has claimed for years that sudden infant death syndrome is more likely to occur among bottle-fed than breast-fed babies. This was supported last year by a New Zealand study which claimed 10 bottle-fed infants die of the syndrome to every breast-fed infant.

THE FRENCH CAPITULATION: A BLOW TO PEACE IN THE MIDDLE EAST

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. SOLARZ. Mr. Speaker, I am outraged, as I suspect most Americans are, at the cowardly capitulation of the French Government in releasing the Palestinian terrorist known as Abu Daoud. This man has publicly boasted of his role in the murder of 11 Israeli athletes and 6 other people at the 1972 Munich Olympics. But it was not only some innocent Israelis who were the victims of the murderous machinations of the terrorist organizations with which he is associated. Our own Ambassador to the Sudan was murdered in an attempt to obtain his release from an earlier imprisonment.

In hastily releasing a leading terrorist whose extradition was sought by both Israel and West Germany, France belies its recent threats to crack down on the plague of terrorism of which its own agents have been the victims. How would the French Government react if another nation were to casually release the terrorist Carlos who has murdered French citizens? The battle against terrorism cannot be effective unless all nations cooperate.

Beyond this, the French action is reprehensible because it diminishes the prospects for peace in the Middle East. If Israel is to withdraw from occupied territories as part of a peace agreement, thereby rendering itself more vulnerable to another Arab attack, it must have believable assurances from the nations of the world that they will guarantee the inviolability of whatever borders are agreed to within the framework of such a settlement. When France violates its own treaty with Israel as well as accepted standards of international justice and morality, it is hardly likely to reassure Israel that it can rely on the kind of subsequent commitments that will necessarily have to be part of any future agreement between Israel and the Arabs.

Unfortunately, France appears to care more about its blatant campaign to curry favor with the Arabs than its international reputation for independence and integrity. The French now have bids on several enormous projects in Egypt and Saudi Arabia. The irony is that France does not appear to have been any more successful in obtaining such contracts than West Germany and other European nations which have not found it necessary to abuse themselves before the Arabs.

What is at stake here is not merely the interest of Israel in bringing to justice those responsible for the murder

of its citizens but also the ability of the entire international community effectively to curb the scourge of terrorism. Without the cooperation of all nations, no nation can assure its citizens of their safety. France, by its craven capitulation to the terrorists, has not only forfeited its claim to national respect, but has also dealt a severe blow to the cause of international tranquility. .

The ancient shibboleth of the French Revolution which has inspired thousands may have to be amended to read liberty–equality–fraternity–terrorism.

STREAMLINING WELFARE PROGRAMS

HON. MARTHA KEYS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mrs. KEYS. Mr. Speaker, my colleague, Mr. FRASER, has written a superb article for the Washington Post on the streamlining of our welfare system. With the Congress facing the problem of sorting out the many issues involved in welfare reform, I highly recommend Mr. FRASER'S concise analysis of the present problems and some proposed solutions:

STREAMLINING WELFARE PROGRAMS

(By Donald M. Fraser)

Mr. H. was angry.

"Uncle Sam, keep your lousy raise," he wrote. "I am much better off without it!"

The irate constituent, a 56-year-old disabled construction worker, explained that his problems started in July when his social security disability benefits increased by $14 a month. "First, they took away my Medicaid, then the price of food stamps went up, and also my rent in the high-rise. The final blow came when my veteran's pension was cut.

"They took away the increase and much more!"

Mrs. S., a 67-year-old widow, used less harsh terms when she wrote to complain about the same problem. "I had to get recertified for food stamps in May," she explained. "I was told: 'You'll be getting an increase in your social security in July, so we will have to raise the cost of the food stamps by $5.' Then a letter came to reduce my [state welfare] supplement by $2.10. Then a letter from the housing authority raising my rent by $2."

"So after a social security raise of $12.20, I came out with a $3.10 'profit.' Sometimes you wonder just who is getting the increase!"

Mr. H. and Mrs. S. are two of the millions of Americans caught up in the complex interactions of a vast array of federal programs providing cash payments and "in-kind" services for those with special needs. Because they receive assistance from multiple sources, these people often find that an increase in benefits from one program triggers reductions and/or loss of aid from other sources. Mr. H. and Mrs. S. receive their main source of income from social security. Their other benefits are "income tested," meaning that eligibility is contingent on limited income and assets. As their income rises, these benefits are reduced and eventually eliminated.

The lives of these two recipients are not as complicated as some. The Federal Council on the Aging in its 1975 report determined that the federal government funds 34 separate programs that directly aid older people. These programs, the council reported, are characterized by "administrative complexity and expense; inequalities in the distribution of benefits and requirements for eligibility, and confusion among potential recipients."

"The situation has been made even more complicated and confusing," the council added, "by the tangled mix of benefits which include cash, food, housing and medical care as well as a long list of services."

A SPRAWL OF PROGRAMS

The study was limited to aid for the elderly, but the same fragmentation affects benefits for all age groups. A recent Library of Congress report listed 55 separate programs providing government payments of cash or services to various groups of people with limited incomes.

These 55 programs have grown haphazardly over the years. Programs have been piled on top of programs with little regard for uniformity or equity.

A landmark congressional study of the welfare system, directed by former Rep. Martha Griffiths, looked at the causes of this chaotic development and found:

"Our income security programs are shaped by at least 21 committees of the Congress and by 50 state legislatures, by six Cabinet departments and three federal agencies, by 54 state and territorial welfare agencies and by more than 1,500 county welfare departments, by the U.S. Supreme Court and by many lesser courts.

"Each of the congressional committees typically deals only with its own subject area, although changes in one benefit program, such as cash welfare or social security, commonly affect another, such as food stamps or veterans' pensions. Because of the categorical nature of the 'system' and the restricted viewpoint of the executive agencies and congressional committees, attempts to remedy one program tend to create another."

In an effort to cut through the "tangled mix" of federal programs, Martha Griffiths and others have proposed building a national welfare system around a uniform, federally administered program that provides a minimum income for those who cannot support themselves for one reason or another. Under this approach, the state-administered Aid to Families with Dependent Children (AFDC) program would be eliminated. Certain non-cash benefits such as food stamps, housing assistance and social services would be "cashed out." Recipients would get the full or partial cash value of these various "in-kind" benefits.

This approach brings uniformity and administrative simplicity to the current fragmented welfare system, but it also raises some difficult fiscal and political problems.

VARYING STATE STANDARDS

To begin with, current benefit levels vary greatly from one state to another. In Minnesota, for example, a family of four can receive the cash equivalent of roughly $7,000 a year in various welfare benefits, while the same family in Alabama or Mississippi can receive only about half as much in benefits.

If Minnesota's standard is adopted for the entire country on a cash basis, the cost to the federal government would be in excess of $120 billion a year.

Some will argue, of course, that Minnesota's standard is too generous. They will maintain that the federal government should set a lower standard and permit states like Minnesota to supplement the federal benefit with state funds if they choose to do so. But that would require a complicated two-tier system of federal and state benefits.

"Cashing out," moreover, poses some broad policy questions: How do we determine what the federal benefit level should be? Do we merely calculate the average benefit now being paid by the various states and set the national benefit at that level? What about regional variations in the cost of living? And, finally, how much more federal money can we afford to devote to income maintenance?

When we start looking for the answers, we run into the realities of congressional politics. Welfare reform is a relatively simple political issue for representatives from the smaller states with low benefit levels. Any new federal program which replaces AFDC is likely to mean a reduction in state spending and at least a slight increase in benefits for recipients. But House and Senate members from the larger states, particularly those in the Northeast, will find that welfare reform does little to help their recipients or to lighten their states' financial load unless substantial new federal money is injected into the system.

How can we ease the fiscal pressures facing the high-benefit states at a time when voters are clamoring for a cleanup of the welfare "mess" and a tight federal budget permits little in the way of new initiatives? Obviously, this central question will not be answered easily or quickly by political decision-makers.

NEEDED: A POLICY

While we are looking at the "tangled mix" of federal benefits, we need to keep in mind that federalizing AFDC and "cashing out" the "in-kind" benefits represent only one approach to the issue of welfare reform.

Some have proposed that we leave the current programs in place and concentrate instead on helping the needy by giving them jobs and tax credits. Many welfare experts advocate a "three-track" system which deals in different ways with those who can work but are unemployed, those who are working but at low-paying jobs, and those who are unable to work outside the home. Under this plan, public jobs would be found for the able-bodied in the public sector if no jobs could be found for them in the private sector. These people could obtain benefits at least temporarily through the unemployment compensation system if they could find work in neither the public nor the private sectors. The working poor would be aided through the tax system by expanding the earned income credit now providing a kind of negative income tax for those earning less than $8,000 a year. Welfare would be retained for the eldery, the disabled and single parents with small children at home.

Congress and the Carter administration will have to explore the various approaches to welfare reform and develop a plan that is humane, cost-effective, administratively efficient and politically stable. Obviously, this is not a task that can be completed in the first hundred days of any new administration or Congress.

Our first task will be to develop a framework within which the work of welfare reform can go forward. We will have to look at the broad policy questions: What are we trying to accomplish through the welfare system? How do we deal with the needs of the working poor? How do we divide our resources between this group and the unemployed? What kinds of work requirements and work incentives do we build into the system? Which "in-kind" programs should be "cashed out?"

A ROLE FOR CONGRESS

As we look for the answers, we many find that the solution to the welfare "problem" does not lie in major new federal initiatives. Rather, we may find that current programs can be adjusted to function more adequately within a coherent, integrated framework.

Congress has contribued in large part to the fragmented development of existing programs, as the Griffiths study notes. With 21 committees in the House and Senate each

shaping its own legislation, it's understandable that a more integrated welfare policy has not emerged from Congress.

Clearly, any major welfare reorganization effort will need the active support of the administration if it is to succeed. President-elect Carter has indicated strong support for the goal of welfare reform and is likely to send a legislative package to Capitol Hill sometime this year.

But Congress need not wait for the administration to prepare the legislative blueprints. There are steps the legislative branch can take early in the new session to overcome structural roadblocks to comprehensive policy-making. New rules in the House, for example, enable the Speaker to establish temporary committees to handle those issues that cut across existing committee jurisdictions. This procedure might be used to deal with the question of welfare reform. Members of a Temporary Committee on Welfare Reorganization could come from Ways and Means, Agriculture, Veterans' Affairs and other House units with jurisdiction over the various cash and "in-kind" benefit programs.

This committee, working together with the administration, could begin the task of national goal-setting that must proceed before we can start overhauling programmatic machinery. The committee could spend the early months of the new session examining the current programs and formulating an approach to those broad issues that Congress has not been able to address because of jurisdictional fragmentation. The new House unit could then begin developing reorganization proposals that the 95th Congress could consider and act upon during its second session. Given the timetable required by the Congressional Budget Act, these proposals, if adopted, probably could not take effect until the fiscal year beginning Oct. 1, 1978.

SOME INTERIM STEPS

Major welfare reorganization may be at least two years away, but there are interim steps that Congress can and should take. In the short run, the new House Welfare Committee could deal with certain program interaction issues that cause such problems for recipients and administrators.

For example, the Committee could examine the impact of the automatic cost-of-living increases built into the social security and supplemental security income (SSI) programs for the elderly, blind and disabled. These yearly increases have caused many recipients to lose other benefits, since eligibility standards for food stamps, Medicaid and other "in-kind" benefits have not been adjusted at the same time that social security and SSI payments have risen. More standardized eligibility limits, adjusted for increases in the cost of living, could help resolve this interaction problem.

The committee might also examine the automatic linkage between certain cash and "in-kind" benefits. Currently, an AFDC recipient is automatically eligible to receive Medicaid while his or her nextdoor neighbor, who is not a recipient but whose income is the same, may not be eligible for this "in-kind" benefit. The same linkage exists between the cash grant programs and food stamps. These arrangements clearly discriminate against those of the working poor who do not receive cash benefits. The automatic linkages could be eliminated by making all people at the same income level eligible for the same benefits, regardless of income source.

Streamlining the fragmented welfare system will not be an easy task, but it is a task that should not be put off. By developing a coherent policy framework within which the federal programs can operate and by helping to make these programs mesh more smoothly, we can lay the groundwork for a more integrated national income maintenance system. In doing so, moreover, we can deal in a tangible way with the very real problems that confront Mr. H., Mrs. S., and millions like them.

THE COMMUNITY SALUTES CHARLES F. CRAWFORD

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. ANDERSON of California. Mr. Speaker, the winner of the combined San Pedro Lions Clubs' Annual Community Recognition Award must be a very special person. Mr. Charles F. Crawford, who will receive this honor on January 27, 1977, certainly qualifies under that description.

Born in Iowa in 1904, Charles Crawford moved to Tustin, Calif., at the age of 2. Married in 1924 to his lovely bride, Grace, he moved to San Pedro in October of 1936.

Charles Crawford—or Charlie, as he is known to his many friends in the Los Angeles Harbor area—worked for a time as a waterfront reporter for the Long Beach Press Telegram. On December 8, 1941, the day that the United States entered World War II, Charlie joined the staff of the Los Angeles Times. From his original position as a waterfront reporter, Mr. Crawford later became marine editor for that paper until his retirement in 1969.

During World War II, Charles Crawford took over Boy Scout Troop 207 at Leland Street School in San Pedro, and held all troop meetings in his home. In addition, during this period he served as official photographer for the Standard Shipbuilding Co., ran a weekly newspaper in Newport Beach, and tried to care for an orange ranch he owned in Tustin—quite a busy schedule for any man.

In early 1942 Charles Crawford became district chairman of camping activities for the Boy Scouts in the South Bay area. He and his son, Richard, were the first harbor area residents to receive the "Order of the Arrow," a national campaign group whose membership is open by invitation only. He demonstrated his considerable expertise in camping by taking a group of Boy Scouts for a week in the mountains that year, returning with three cracked ribs to prove it.

An avid outdoorsman and conservationist, Charlie joined the Izaac Walton League in 1950 and has been an active member ever since. He took part in the first fish plants in California's Salton Sea by helping the California Department of Fish and Game capture fish in the Gulf of California and transporting them to the desert salt lake. These efforts have resulted in a unique, inland saltwater sportfishing paradise located in the middle of a desert.

Charles Crawford's activities as a journalist, Scout leader, Parent-Teacher Association member, and conservationist alone would qualify him for an award from a grateful community. However, in 1957 he began a drive that resulted in a unique gift to his area.

After speaking to osteopathic doctors Crawford was told that it would be "impossible" to get the Hill-Burton Fund to give financial backing to a hospital in the South Bay area since San Pedro was campaigning for a new hospital at the same time. Drawing on his vast experience as a journalist, Charles began a 3-year publicity blitz in order to fill the need he saw in his community.

Thirty-one newspapers published his articles and photographs during that time, documenting the need for a new medical facility. Working up to 18 hours a day, Charles Crawford raised funds for the facility. Finally, as a result of his monumental efforts, Hill-Burton granted $594,000 to establish the Bay Harbor Hospital. Besides the resources needed for property and furnishings, an additional $350,000 still had to be raised—a task that Crawford worked on with typical gusto. Today, he still sits on the hospital's board of directors, heading up public relations for the facility.

Mr. Speaker, the South Bay and harbor areas seem to be the kind of community that fosters involvement and outstanding citizens. Charles Crawford is a perfect example. At the age of 72, he keeps up a pace that makes his retired status a joke among his many friends. National director of the Izaac Walton League of America, he donates his efforts and services to the Bay Harbor Hospital, the Boys' Club, the Retarded Children's Foundation—whose publicity campaigns he developed—and other local community activities too numerous to list here. In addition, he developed the harbor area hunter safety program with instructors from the Izaac Walton League, which has helped make hunting safer and more enjoyable for many. As a member of the national executive board of the Izaac Walton League of America, he is one of nine elected officials of the 60,000 member organization.

I can think of few people who deserve the combined San Pedro Lions Club Community Recognition Award as richly as does Charles F. Crawford, and I would like to take this opportunity to commend him for his many outstanding achievements and good deeds. His lovely wife, Grace, and their son, Richard, must be very proud of the honor he will soon receive.

CAPITULATION TO INTERNATIONAL TERRORISM

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. EILBERG. Mr. Speaker, today I sent the following telegram to the President of the United States:

DEAR MR. PRESIDENT: The release of Abu Daoud by the French Government was a cowardly capitulation to international terrorism.

The United States must make it clear through its statements and action that it condemns France's decision without any reservation.

Unless the free countries of the world make it clear to all terrorists that they will not give in to their demands nor retreat in the face of their threats these international

criminals will eventually control all of our actions.

For these reasons I ask that you recall our Ambassador to Paris as a sign of our total disagreement with action of the French Government.

PROHIBIT LAMEDUCK TRAVEL

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. MICHEL. Mr. Speaker, there can be no doubt that many citizens look upon the Congress with something less than admiration. A recent poll taken by Potomac Associates, shows that in a list of 18 public and private institutions, the "Federal Legislature" ranks 11th insofar as public confidence and trust are concerned. I hasten to add that even this ranking should give no comfort to us. Among Government officials generally we ranked 14th. We did just manage to edge out the CIA and labor unions for rock bottom but not by much.

Taxpayers are, quite bluntly, fed up with the pomp and circumstance and, quite often, nonsense, that passes for efficient government in Washington. They are particularly angry—and quite correctly in my view—over those little comforts and "perks" and psychic rewards with which we console ourselves from time to time. Among such, none appears to rankle more than the time-honored custom of defeated or retiring Congressmen traveling overseas at taxpayers expense after their defeat or retirement announcement.

While I have no doubt that these trips can be solemnly defended as being absolutely necessary to the safety of the Republic and that ingenious arguments can be constructed demonstrating that the fate of the Western World depends upon defeated Congressman Smith or Jones flying first class to Paris or Tokyo, the taxpayers are simply not listening to those arguments any longer. They want nothing less than lasting results for their hard-earned tax dollars. They most certainly do not see any lasting results emerging from lameduck overseas travels except perhaps to provide at great public expense, a store of happy memories for the defeated official.

I am, therefore, today reintroducing my bill to "prohibit travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned or retired."

It is my hope that this bill will be looked upon by the Members not as a blanket condemnation of foreign travel on the part of Congressmen. I support the right and, indeed, the duty of Congressmen, at the proper time, traveling abroad at taxpayers expense for purposes relevant to public business. What I am attempting to do here is simply ratify what I believe is the consensus here and in the Nation. We have the duty to put our own House in order. Let us put an end to lameduck overseas journeys at taxpayers expense. It is sensible and desirable reform, long overdue.

The text of my bill follows:

H.R. —

A bill to prohibit travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned, or retired

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, no part of any appropriation and no local currency owned by the United States shall be available for payment of any expenses, nor shall transportation be provided by the United States, in connection with travel outside the fifty States (including the District of Columbia) of the United States of—

(1) any Delegate, Resident Commissioner, or Member of either House of Congress after he has been defeated as a candidate for nomination, or election, to a seat in the House of Representatives or Senate of the United States in any primary or regular election until such time as he shall thereafter again become a Member of Congress; or

(2) any Delegate, Resident Commissioner, or Member of either House of Congress after the adjournment sine die of the last session of a Congress if he is not a candidate for reelection in the next Congress.

SEC. 2. The first section of this Act shall not apply with respect to any Delegate, Resident Commissioner, or Member of Congress where a concurrent resolution passed by Congress so exempts that individual, or, with respect to utilization of Federal funds provided by law for round trip travel of such Delegate or Resident Commissioner between the District of Columbia and the district which he represents.

AMERICANS SHOULD BE THANKFUL

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. McCLORY. Mr. Speaker, although the 94th Congress adjourned before last Thanksgiving Day, I wish to recall one meaningful Thanksgiving statement which appeared in the November 29, 1976, issue of U.S. News & World Report composed by Howard Flieger.

His Thanksgiving message is an appropriate reminder to all Americans which is applicable every day of the year.

Mr. Speaker, as we open this new Congress it would seem most appropriate to recall the strengths and virtues which characterize our great country—to give thanks for those—and to honor and respect the characteristics of our American system which have led us to our important position in the world today and upon which we must rely as we move forward toward even greater heights in the years ahead.

Mr. Speaker, Howard Flieger's editorial, "Thanks, Thanksgiving," follows:

THANKS, THANKSGIVING

(By Howard Flieger)

A friend complained the other day that, with the passage of time, it is more and more difficult for him to find anything about this country for which to be thankful.

The trouble with him, as with many others, is that he has stopped looking.

There is so much in this country to merit thanksgiving that some people can't see the forest for the trees.

The American economic system—basically free enterprise—has its faults, of course. But it still is the best and strongest in the world, all things considered.

Our profit-motivated way of doing things won out over the various forms of socialism long ago. It never was much of a contest. When it comes to efficiency in producing and distributing goods and services for people, there just is no comparison.

Things are available to Americans in an abundance and variety undreamed of in other parts of the world.

True, prices are high by past standards, but remember that personal incomes continue to keep ahead of the rate of inflation.

True, unemployment is a serious and unsolved problem, but don't forget there are more Americans with jobs than ever before.

There are more than ever, too, living in comfortable retirement; and more who are able to retire early if they choose.

Ability and talent are so commonplace in this country that most of us take them for granted. It didn't create much of a splash when Americans made a clean sweep of the Nobel Prizes this year. Still, it was the first time ever that one country won all the awards.

Poll after poll shows much criticism of U.S. capitalism, but only a vague understanding of how it really works.

Most Americans are capitalists—they are buying homes, investing in insurance or other savings, devoting time, energy and enterprise directly or indirectly to making a personal profit—though they don't think of themselves as capitalists, and they are suspicious of the profits of business.

Yet, profit is what makes the system work. And the system fills the wants and needs of people better than any other anywhere. Communism, for example, has been trying to catch up with the American standard of living for more than half a century, and it hasn't even come close.

Ask yourself this:

If the United States is such a bad bet for the future, why did foreigners invest nearly 27 billion dollars of their own money in American enterprises last year? That is three times more than they sent over here a decade ago.

Sometimes it takes the observations of visitors from abroad to remind people what an impressive place this is.

A European banker, for example, remarked to an American acquaintance the other day:

"American children are better brought up than the well-to-do in Europe. Here they learn to do things with their hands. They aren't ashamed to get them dirty taking cars apart, building a cabin in the woods or laying out a vegetable garden."

The wife of a foreign diplomat:

"Americans are so law-abiding. Driving to the airport at five in the morning recently I noticed cars stopped at red lights waiting for the signal to change even though there was no cross traffic. At home, we'd never do that with no cars coming."

And from another visitor:

"You people are so friendly, ready to smile and help. There aren't many places around the world where this is true."

Such remarks deserve the attention of those who despair of Thanksgiving. They explain why so many Americans return from a thoroughly enjoyed trip abroad, recount their travels with enthusiasm, they say:

"It's good to be back home."

BIRTHDAY OF DR. MARTIN LUTHER KING

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. GILMAN. Mr. Speaker, I welcome this opportunity for commemorating the

birthday of Dr. Martin Luther King, a man whose courage and conviction remain with us today, even 9 years after his untimely and tragic death in April of 1968.

Dr. King is a national hero in no commonsense of the word. While the concept of a hero as the man of bravery and valor has been with Americans since the conception of our Nation hundreds of years ago, there is a distinct difference between the traditional American hero and Dr. King. Americans have had to use force throughout their history, and oftentimes bravery has been equated with some form of violence. And those who were considered heroic have been those who were best equipped to kill—the pioneers who struggled against the rugged elements of the frontiers, and who managed to overcome threats posed by Indians, natural disasters, and the wilderness. Our soldiers have been held up as paradigms of bravery for all Americans; their battlefield sacrifices having been lauded and recorded throughout our history.

Dr. King is a hero in the true sense, but his heroism is of a distinct and different kind. Martin Luther King struggled against all of the violent instincts of man. He lived his life with the knowledge and certainty that nonviolence is a superior force, that nonviolence in all aspects of one's life insures a humanity which transcends the ordinary man and which summons up our finest qualities. Dr. King, in all that he sought and accomplished, maintained, as did Ghandi and the American, Henry David Thoreau, before him, that passivity and pacificism are not to be equated with cowardice and ineffectiveness, but rather, that these qualities are to be developed and utilized with the knowledge that nonviolence is far stronger and far more human than brutality and unrestricted force.

For his beliefs, Dr. King was jailed and he was ridiculed for the concern and compassion that made him a leader not only of black people, but of all Americans on the long road to equality. His dreams and ambitions parallel the American dream, and indeed, have become part of the American dream: That all men and women, regardless of color or creed, regardless of sex or economic background, have the privilege and right to aspire to all that America is capable of giving: spiritually, humanistically, and materially.

Dr. King is not only an American hero, he is an American martyr who gave his life so that others might benefit from his beliefs and actions. Our gratitude to our Nation's heroes is great, but our debt to our martyrs is far greater. Martin Luther King reawakened in all Americans the compassion for the less fortunate, the downtrodden, for those to whom life proved, not a blessing, but a burden. Our debt to him demands more than a simple reawakening, but a firm, staunch course of action, complemented by a spirituality which has for too long a period been secondary.

If Dr. King were still alive today, I believe he would remind, in his gentle, nonviolent, and magnetic way, that we, the Members of the 95th Congress, rededicate ourselves to the basic tenets of the Bill of Rights, to the sentiments set forth so eloquently in the Declaration of Independence. He would prod the legislators of this Nation to be constantly aware of the children who go to bed each night cold and hungry, of the thousands of old Americans who waste away in neglect, of the millions of the poor and jobless who view life with a sense of despondency and hopelessness. And he would pray that we would act in their behalf to provide all of our people with the opportunities which belong to all Americans.

I urge my colleagues to join with me in offering our respects and tributes to Dr. Martin Luther King on this anniversary of his birth.

TAX CREDIT FOR TENANTS

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 13, 1977

Mr. FISHER. Mr. Speaker, today I am reintroducing a bill I offered during the last session to provide a tax credit for renters, who under current law are not permitted to deduct on their Federal income tax the amount of local real estate taxes they pay as part of their rent.

My bill would provide a credit against Federal income tax of 5 percent of annual rent, up to $75 for a married couple filing jointly—$37.50 each if they file separately—and $50 for single taxpayers. This would apply to persons who rent their principal residence for 8 months out of any year under a genuine rental agreement.

A large and growing segment of our population rents its residence. In 1970, 37 percent of all Americans rented their residences, 42 percent in the Northeast. In Arlington County in my district more than 65 percent of all occupied residential units are rental dwellings.

Under present law a homeowner may deduct on his Federal income tax the amount of real estate taxes paid to his county or city of residence. No such tax deduction is available to the renter even though the taxes are paid as a part of the monthly rent check. My bill seeks to correct this inequity.

The way it would operate is simple. Once the total amount of Federal income tax has been computed, the amount owed would be reduced by up to $75 for a married couple who file jointly or $50 for a single taxpayer—$37.50 for married taxpayers filing separately—providing a direct savings to the renter. The proposal is intended to be simple and understandable to insure its wide use. It does not require the calculation of actual real estate taxes paid as a part of the rent but establishes a uniform dollar figure and gives the taxpayer a direct credit. A plan similar in form is now in effect in the State of California. The use of the device of a tax credit rather than the more customary tax deduction insures that those renters who take the standard deduction on their Federal tax returns rather than itemizing their deductions will still benefit under my bill. For example, a renter earning $15,000 per year and filing as a single taxpayer would remain eligible for the full $2,400 standard deduction and would be eligible for the $50 tax credit as well. This combination of tax credit and standard deduction is an effort to place renters in roughly the same position as homeowners under our Federal tax laws. The use of a tax credit rather than a tax deduction has the further advantage of providing a larger relative tax benefit to lower income families and individuals.

I recognize the fact that this proposal is a major change in Federal tax laws which have historically put renters at a disadvantage. A measure of the impact of this change is that the staff of the Joint Committee on Internal Revenue Taxation estimates the revenue loss from my proposal to be $1.7 billion. With increasing numbers of Americans choosing the efficiency and relative convenience of apartment living I believe we must reexamine the policies of our tax laws. I hope my bill will serve as a basis for that reexamination.

I shall make every effort to urge the Ways and Means Committee, on which I serve, to begin deliberations as soon as possible.

SENATE—*Friday, January 14, 1977*

The Senate met at 12 o'clock meridian and was called to order by Hon. DENNIS DECONCINI, a Senator from the State of Arizona.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Almighty God, whose glory is revealed in the Earth, the sky, the sea, and in the works of man, we praise Thee for Thy goodness to us and to the Nation we serve. In these days of transition help us with discretion to forget some things and with appreciation to remember other things. Give us grace to shed the destructive debris of the past and to grasp the affirmations which give strength for the future. Grant us grace to forget some failures, some mistakes, some moments of bad judgment or unwise decision. Help us to remember the wise action, the sound judgment, the hour of selfless service, the generous deed and the kindly act. Spare us from harboring memories of what cannot be corrected but help us to remember the things rightly done. Keep us from lugging into the future any lingering resentment, unforgiven hostility, or chronic ill will. As Thou dost forgive, help us to be forgiving. Endow us with the strength, the wisdom, and the grace which comes from above, that we may reflect that faith, hope, and charity which endures forever.

We pray in the Redeemer's name. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., January 14, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. DENNIS DECONCINI, a Senator from the State of Arizona, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. DECONCINI thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Wednesday, January 12, 1977, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DRAW THE LINE NOW

Mr. ROBERT C. BYRD. Mr. President, I was chagrined, as were millions of thoughtful people around the world, that the French authorities this week released a suspected international terrorist after only a perfunctory hearing. Regardless of one's position concerning the Middle East conflict, the nonchalance exhibited by the police officials in Paris is disturbing. Even if Western nations are unwilling to jeopardize their relations with certain oil-producing countries, acquiescence to terrorism by any country is an invitation for terrorists to strike at any place and for any cause.

In the last 5 years alone, scores of people have been murdered through blind terrorist activity. Tourists, diplomats, hotel guests, and businessmen have lost their lives. Hundreds have been subjected to kidnapings while traveling on planes and trains. Letter bombs have permanently maimed secretaries, and grenades have blinded, crippled, and killed children.

It is now conceivable that some insane terrorist organization could make and detonate a nuclear device with little difficulty even in the heart of New York City. The plans and material for such a weapon are readily available; all that remains to be assembled is the audacity.

Any nation that deals lightly with terrorists is itself flirting with tragedy. The events that occurred with obvious impunity in Munich in 1972 can just as easily happen in Chicago today and even in Paris tomorrow.

Unfortunately, we are living in an era in which savage ideologies are being romanticized beyond the point of logic. Many countries have just claims against their neighbors; some nations have bandaged radically different groups of people into unwilling political unions. In the name of fanatical devotion to some self-conceived higher principle, dozens of groups with a warped sense of mission have launched deadly attacks on innocent human beings.

For centuries, men of good will in the East and West have sought to inspire men and nations to exercise self-control and patience in resolving conflicts. Technology and the times have now united, however, to make whole populations vulnerable to the attacks of zealots and outlaw nations.

Civilized governments must find the courage to act decisively against terrorists, whatever their motivation. Even those governments that might sympathize with individual terrorists would do well to consider that their own populations are just as open to senseless attack as any other.

In the late 1960's and early 1970's, the United States experienced a rash of airplane highjackings. In 1972, this country introduced extensive security measures at U.S. airports to curb such behavior. In the 4 subsequent years, there has been only one successful act of air piracy in this country. Diligence and determination have probably saved many lives and have definitely prevented hours of mental torture for millions of air passengers.

Mr. President, the time has come for a like determination to take hold in other nations with regard to terrorism and terrorists. I suggest that our own Government continue to press for far-reaching and inclusive international agreements that will render terrorism less likely to go unpunished. I hope that each nation will mete out swift, severe, and certain justice to those who threaten or commit acts of terrorism. Moreover, I hope that all temptations by journalists and other writers to lend glamour to terrorists will cease. In such ways, possibly we can stifle the atmosphere that has made terrorism an appealing tactic for a few, and made heroes out of terrorists in some quarters.

The ACTING PRESIDENT pro tempore. Does the Senator from Tennessee seek recognition?

LEADERSHIP MEETING AT THE WHITE HOUSE

Mr. BAKER. Mr. President, briefly, I must report to the Senate this morning that it was my privilege to attend a White House meeting of the joint leadership of the House and Senate, at a breakfast with the President of the United States.

The President asked us to be his guests on that occasion as it was probably the last leadership meeting at the White House with this President, at least for this term of office.

May I report to the Senate that the meeting was a cordial and friendly one in which all Members present from the leadership on both sides of the aisle expressed their appreciation to the President for his devoted service to the country and his diligent effort on its behalf in the course of his tenure in office.

May I now, Mr. President, express my appreciation to him for giving us the opportunity to be with him on this occasion.

If I may have the attention of the majority leader for a moment, I would hope that we might arrange a time, say on Tuesday, when those of us on both sides of the aisle who wish to make further remarks about the President and his administration might be allocated time to do so.

I wonder if the majority leader could give some consideration to such a proposal.

Mr. ROBERT C. BYRD. Certainly. How much time does the Republican leader have in mind?

Mr. BAKER. Mr. President, I would hope that we might allocate 2 hours, possibly 1 hour under the control of the majority leader and 1 hour under the control of the minority leader for that purpose.

Mr. ROBERT C. BYRD. Certainly.

ORDER DESIGNATING PERIOD FOR TRIBUTES TO THE PRESIDENT ON TUESDAY, JANUARY 18, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following the remarks by Vice President ROCKEFELLER on Tuesday next, and any comments in response to the Vice President's remarks, which should not exceed more than 30 minutes, that there then ensue a period of not to exceed 2 hours to be equally divided between the distinguished Republican leader and myself for the purpose outlined by the distinguished Republican leader.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the majority leader for his consideration in that respect.

ORDER OF PROCEDURE ON TUESDAY NEXT

Mr. BAKER. I have one other request, Mr. President, that I would like to suggest to the majority leader, if I may. I have a request from the distinguished senior Senator from Oregon for 15 minutes for a special order presentation to the Senate on Tuesday next. I wonder if that can be worked into the majority leader's schedule on that day.

Mr. ROBERT C. BYRD. Would the Republican leader feel that this is a 15-minute order that should precede the 2 hours that have been referred to?

Mr. BAKER. Yes; I would hope for, say, 1:45 to 2 o'clock for this time slot for the Senator from Oregon, 15 minutes before the remarks of the Vice President.

Mr. ROBERT C. BYRD. I do not believe we are coming in until 2 o'clock.

Mr. BAKER. That is right. Well, let us see what the schedule on Tuesday is.

Mr. ROBERT C. BYRD. After the two leaders, Mr. TALMADGE has 15 minutes. Then the Vice President has not to exceed 30 minutes. At the moment, the 2 hours then ensue.

Mr. BAKER. I wonder if the majority leader might consider convening the Senate, say, at 1:45 instead of 2 o'clock so we can accommodate this purpose.

Mr. ROBERT C. BYRD. It would be perfectly agreeable with me.

Mr. BAKER. I thank the majority leader.

I ask unanimous consent, then, that the Senate convene on Tuesday next at 1:45 instead of 2 o'clock and, in keeping with the previous orders, that the senior Senator from Oregon be recognized for not to exceed 15 minutes.

Mr. ROBERT C. BYRD. Will the distinguished Republican leader allow me to make that request, in view of the fact that it concerns the convening of the Senate?

Mr. BAKER. Yes.

ORDER FOR ADJOURNMENT UNTIL 1:45 P.M., ON TUESDAY, JANUARY 18, 1977, AND FOR RECOGNITION OF SENATOR HATFIELD ON TUESDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, when the Senate completes its business on Friday, it stand in adjournment until the hour of 1:45 p.m. on Tuesday next and that, after the order for the recognition of Mr. TALMADGE, which has previously been entered, and prior to the order for the recognition of the Vice President (Mr. ROCKEFELLER), Mr. HATFIELD be recognized for not to exceed 15 minutes.

Mr. HELMS. Mr. President, reserving the right to object, and I hope it will not be necessary to object, would the distinguished Senator just add to his request that this will have no effect on the resolution of the Senator from North Carolina and consideration thereof?

Mr. ROBERT C. BYRD. Well, under the Senate rules, the request for the 2 hours which we have already entered would, indeed, have an impact on the resolution, on any resolutions coming over under the rules, because more than 2 hours would have been consumed by that time. We are talking about Tuesday. It would not have any effect on today or on Wednesday, thus far. We have said nothing about Wednesday that would have any effect on any resolution coming over.

Mr. HELMS. So the standing of the resolution referred to would not be affected as of the day that it would normally come up?

Mr. ROBERT C. BYRD. It would be affected on Tuesday, because, in order for a resolution to come over under the rules, it must come over during the first 2 hours of the session.

Mr. HELMS. I understand.

Mr. ROBERT C. BYRD. More than the first 2 hours will have been consumed by the order already entered into today as far as Tuesday is concerned.

Mr. HELMS. But it would not prejudice the resolution's consideration as to Wednesday?

Mr. ROBERT C. BYRD. Oh, no.

Mr. HELMS. Very well, I have no objection.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the majority leader for that accommodation, and I thank the Senator from North Carolina for his forbearance in that respect.

Mr. President, I reserve the remainder of my time under the standing order.

AUTHORIZATION FOR COMMITTEE ON RULES AND ADMINISTRATION TO MEET DURING SENATE SESSION

Mr. ROBERT C. BYRD. Mr. President, we have two standing orders that have been entered into. I do not want to impose on Mr. SPARKMAN who, I believe, has the first of those orders. I would, however, like to yield very briefly to Mr. CANNON for a unanimous consent request, after which I yield the floor to Mr. SPARKMAN.

Mr. CANNON. Mr. President, I ask unanimous consent, notwithstanding the provisions of Senate Rule 40 and provisions of Senate Resolution 9 of the 94th Congress, that the Committee on Rules and Administration be authorized to meet in closed session for the drafting of Senate Resolution 4, to reorganize the Senate Comimttee System, if so determined by a vote of the committee.

I make this request for two reasons: First, this is strictly a housekeeping proposal: and second, the Rules Committee is under a deadline to report back to the Senate no later than next Wednesday, January 19.

The ACTING PRESIDENT pro tempore. Is there objection?

If there is no objection, it is so ordered.

APPOINTMENT BY THE PRESIDENT PRO TEMPORE

The ACTING PRESIDENT pro tempore. The Chair, on behalf of the President pro tempore, pursuant to the provisions of Senate Resolution 400, appoints the Senator from Maryland (Mr. MATHIAS) to the Senate Select Committee on Intelligence, in lieu of the Senator from Tennessee (Mr. BAKER).

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Alabama (Mr. SPARKMAN) is recognized for not to exceed 15 minutes.

PRIVILEGE OF THE FLOOR

Mr. SPARKMAN. Mr. President, I ask unanimous consent that, during this 15 minutes, when we are going to pay our respects to Carl A. Coan, the following staff members of that subcommittee be admitted: Bob Malakoff, Jerry Buckley, Tony Brooks, Bill Weber, Jo Ann Barefoot, Jim Schuyler, and Carolyn Jordan.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CARL A. COAN

Mr. SPARKMAN. Mr. President, on December 21, 1976, Carl A. S. Coan, staff director of the Subcommittee on Housing and Urban Affairs over the past 15 years, unexpectedly passed away.

Many of you knew Carl as the Senate's housing expert. He was that. His knowledge of housing law and housing programs was encyclopedic. And he was always ready to help Members and staff of this body, regardless of their partisan position, with legislative problems.

Carl had the ability to make even the most complex issue understandable. And he had an extraordinary talent for bringing opposing viewpoints into agreement.

He was, to pay him that highest of compliments, a real "pro," a professional who was respected by other professionals. This was made apparent most recently during the brief period he was hospitalized. During those few days, the Housing Subcommittee office was flooded with calls of concern from all over the country—from public officials, from housing and banking executives, from university teachers and public interest leaders who work in the housing field.

But Carl was more than a "pro" with superb technical skills. He was a professional with a profound compassion for people, particularly those whose incomes are insufficient to meet their daily needs. He believed in the Housing Act of 1949, which declares that the general welfare and security of the Nation requires that every American have a decent home in a suitable living environment. He felt strongly that his job was to help make that goal a reality. And for almost two decades, he worked with unflagging enthusiasm to do that. And he made things happen.

He made them happen, I believe, because he was not simply a professional, nor even a professional with compassion for people, but because he was, in addition, a man of deep faith. It was faith—in God and in man—that drove and sustained his determination to improve life around him. It was this determination and faith that led him to push himself, but not to judge others. It was his faith that made him, and those who worked with him, always optimistic that solutions can be found if you work at it.

I cannot remember how many markups and conferences I have participated in with Carl at my side. I do not recall how many times his suggestions broke an impasse and paved the way for new legislation. But I know for certain that I will miss his wise counsel during the markups and conferences to come. And I know, without any question, that his legislative skills will be missed, not only by Members of the Senate, but by Members of the House as well.

Carl Coan was a doer as well as a dreamer. He was an expert on housing who saw the home and the family, and not the house, as the end goal. His contributions are many and lasting. He served the Congress and the people of this Nation well.

Mr. President, during the funeral service for Carl, the Reverend Charles Henry delivered a very moving homily about Carl. I ask unanimous consent that the homily be printed at this point in the RECORD.

There being no objection, the homily was ordered to be printed in the RECORD, as follows:

HOMILY: CARL COAN

(Given by the Reverend Charles Henry of Georgetown University Hospital)

St. Matthew describes Jesus on one occasion as going up a hill, addressing the crowd, and saying, "Blessed are those who mourn; they shall be comforted." We mourn the passing of Carl Coan today, but we are also comforted because Christ has promised that He will be that comfort. Even as we welcome the birth of Christ in this festive season, our usual joy is clouded by sorrow in the death

of our dear friend. And, as Jesus once again enters the world as a child—a symbol of hope—another departs this world and finds his hopes consummated in an eternal reward. In Carl's echelon of values, his faith was uppermost. If he believed that his passing could instill greater faith in God in those he loved, he would not hesitate to choose that course.

It was impossible to know Carl and not love and admire him at the same time. Yet, compliments like this embarrassed him. He was a kind of perfectionist, in a good sense. He wanted always to do his best in any serious undertaking. This was demonstrated so well at the University of Pennsylvania, which he attended in undergraduate years. He took up track and went on to earn high awards both as an individual—establishing records in the mile event—and as a member of a nationally renowned relay team. Carl had a profound, natural modesty. The cheers of sports enthusiasts rang hollow to him, and he early saw through the emptiness of public acclaim. In later years, engaged in the work of his calling, he was to serve, by choice, in relative obscurity. He gave the limelight to others who were more comfortable with it.

Carl won many sports awards at Pennsylvania, but his richest prize was not in sports at all. It was there that he met his dear wife, Flora, and married her. She has been his constant inspiration since that time and perhaps his most valuable personal, no less than professional, advisor.

Carl, for many years, was involved in government housing and urban development—both on a national and international level. Since 1961, Carl was Staff Director of the Senate Subcommittee on Housing and Urban Affairs, where he earned a great reputation as a leader in the field of housing and urban development. On March 5, 1973, the National Housing Conference paid tribute to Carl in awarding him its distinguished honors citation which describes Carl as "a wise counselor, a superb technician, a brilliant tactician, and a constant friend of American families with critical housing needs." In particular, Carl's interest and efforts were directed to providing low-cost housing for low- and moderate-income families. Many of the most forthright and imaginative bills and statements by Senate leaders on the subject of housing came from their lips, but were the ideas of Carl. He was a doer, rather than a talker. He was accustomed to rolling up his sleeves and doing the hard-core, nitty-gritty work.

On the international level, in an official capacity, he visited, observed, and helped housing planners in some 40 foreign countries.

Politics and government business have a habit of placing family life in jeopardy, but Carl Coan put his family first. He was a dedicated husband, father and grandfather. As a father, he is survived by five sons and three daughters. He took pride in having 31 grandchildren. The family knew him best and loved him for what he meant to them and what he gave them. And what he left them and what they still possess and treasure is a value system communicated more by the way he lived than by what he said. Disciplined, yet not stern; religious, but not narrowly bigoted; responsible in work; a lover of justice for all; considerate of others, he was a man of integrity. He was, as I heard someone remark about him, "a man for all seasons." Four sons paid Carl the compliment of entering work areas closely akin to that of their father, so important did he make the work appear to them.

How many times did I hear his beloved wife express her prayerful thanks to God for the 43 years of married life granted them. I spoke of the many trips taken by Carl. On almost every one of them, his wife accompanied him at his own, not at government, expense. Neither he nor his wife believed that long separations created a strong marriage.

I mentioned Carl's faith, and perhaps it is a good place to end our consideration of this good man. He was a devout Catholic and attended Mass daily. Truthfully, I met him and his wife in the context of the hospital chapel, where they participated frequently in the Eucharistic celebrations, since it was conveniently close to their home. On several occasions, Carl came back to the sacristy after Mass, and pointed out how interested he was in some point raised in my diminutive homily. It was evident that religion was not a mere convenience to him. He understood the close relation between understanding one's faith and living it. The highest, although not strictly denominational, values of his faith shone through in his work accomplishments. A man also of prayer, he was involved in a charismatic prayer group together with his wife, and both were "baptized in the Spirit", as they say, early this year.

I spoke before about the comfort which Christ at this season gives to assuage the pain of loss suffered by his family especially. Knowing the family, I realize that it is surely a sorrow coming from loss of Carl's presence. One family member spoke of the peaceful and almost satisfied look on Carl's face just after his death. How fitting it was. For one who thirsted after the living God, he now at length sees God as he really is. And Carl, could he speak today, would look at his family and friends and say to God what Christ spoke about His friends: "I wish that where I am, they also may be with me." God willing, that wish will somehow be fulfilled.

Mr. SPARKMAN. Mr. President, the following Senators, who are members of the Committee on Banking and the Housing Subcommittee, are not able to be here today, but each one has prepared his own remarks. I ask unanimous consent that they be printed in the RECORD in connection with the remarks that will be made: Senator TOWER, Senator BROOKE, Senator STEVENSON, Senator PACKWOOD, and Senator GARN.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

STATEMENT BY SENATOR TOWER

I came into the Senate 16 years ago, in 1961, the same year that Carl Coan became Staff Director to the Senate Housing Subcommitte. I have always been on the Banking Committee, and for 16 years, I benefited from Carl's wisdom.

One might think that because I am a Republican and Carl was Staff Director for the Democrats, that we would always be at odds with each other on housing issues. There is no question we had differences, but, they were occasional and few. For while Carl had the title of Staff Director, I doubt if he gave that a second thought. Carl was not a person to be concerned about a title—he was a person who was concerned about providing decent housing for people.

And that purpose transcended any question of partisanship. It was not whether there should be a Republican or Democratic housing bill or program. The only question in Carl's mind was whether the program or bill would provide housing for not only Americans, but people all over the world.

Carl always stated that he had no pride in authorship when it came to writing housing legislation. Yet more housing legislation can be attributed to his hand than any person I know of today.

To produce legislation that eventually becomes law is an art—it just does not happen on its own. Carl was an artisan of the highest caliber. I must say that I do not think Senator Sparkman and I ever took a bill to the Floor together where any differences we might have had were not resolved in advance. And Senator Sparkman and I never took a bill to the Floor that failed to pass. And many times we passed billion dollar housing bills by voice vote.

I need not remind any of you that this is not a simple task. But I shall be the first to state that this was not the result of any oratorical powers that either Senator Sparkman or I possessed. It is simply a matter that if a bill is good, and if it is right, then very few, if any, will oppose it.

And it would be an understatement to say that but for the artisanship of Carl Coan, many of the housing laws we have today would never have passed the Senate. In the early stages of legislation, major differences would occur among the members. And I know every time Carl talked to Senator Sparkman about these problems, he would ask Carl to see if he could ". . . work it out."

Carl had a tremendous ability. There was no problem, however large, that he couldn't "work out." But the magic of Carl, his artisanship, is that in working out problems, the end product satisfied all of us, but the integrity of the particular program remained. Whatever the particular issue was at the time, after all was said and done, the result was that people were able to find decent shelter a little bit easier than before.

In spite of all the rhetoric, the oratory, the lobbying, the different positions of members, the particular Administration's viewpoint, in spite of all the hurdles, Carl made things work. He brought it all together. We can all learn something from Carl. He taught by example. I am fortunate in having known him, worked with him, and learned from him.

STATEMENT OF SENATOR BROOKE

As the 95th Congress convenes, we who serve on the Committee on Banking, Housing and Urban Affairs feel a great sense of loss. Carl Coan, who served on our Housing Subcommittee staff since 1958, and as our staff director since 1961, died suddenly on December 21.

Carl was a familiar figure on the Senate Floor. For almost 20 years he sat next to the majority floor manager whenever the Senate considered legislation relating to housing and urban affairs. John Sparkman and Bill Proxmire can attest to his confident command of housing legislation and the invaluable advice he offered as he sat by their sides. And so can I, for I often sought his counsel. But Carl's extraordinary influence in shaping our national housing policy was not limited to the Senate. Indeed it was felt throughout the country and even in some foreign nations. He was truly a champion of better housing.

Serving on the Housing Committee, I came to know Carl well. He was not only a wise adviser on housing legislation but a practical man, who understood political realities, yet never lost sight of the goal of improving the quality of human life.

But he was also a good friend. We worked together and traveled together, and in the course of time, I learned about the personal side of Carl Coan, his devotion to his family and his deep personal concern about his fellow man.

Though few knew it, he went to church almost every day, and he always practiced true charity. He was devoted to his dear wife, Flora; indeed they were deeply in love. And he was devoted to his 8 children and 31 grandchildren. A deceased daughter, Mary Jo, who was afflicted with cerebral palsy, was a great joy to Carl, and he personally cared for her at home throughout her 20 odd years.

To Flora and the Coan family, our hearts go out. We who knew Carl in the Senate have some sense of what he must have meant to his family, and we know what a loss they have sustained.

So far as we in the Senate are concerned, we have been privileged to work with a man of good heart and good sense. We have been inspired by him as an expert in housing but, more importantly, as a good and decent

human being. We have lost a friend, and we will truly miss him.

STATEMENT BY SENATOR PACKWOOD

It is with deep regret that the Senate marks the passing of Mr. Carl Coan. He was a man of principle and a man of integrity. His professional service to the Banking, Housing and Urban Affairs Committee and his impact on housing legislation over the past several decades will long be remembered.

I have known Carl since I arrived in the Senate in 1969. I have always been impressed with his grasp of the issues and his ability to communicate with the Members. He was very diligent and always helpful.

Carl not only had a thorough understanding of the field of housing and urban affairs but also a strong sense of compassion for the less fortunate. He understood the problems and had the ability to develop situations.

The Senate and the American people have lost a good man. I am fortunate and proud to have worked with Mr. Carl Coan.

STATEMENT BY SENATOR ADLAI E. STEVENSON

I was much saddened by the unexpected death of Carl Coan, Sr. last December. I have known Carl for the six years I have served on the Banking Committee. He was not a man of parts; his humanity, compassion, and concern filled his professional life as it undoubtedly did his personal life. I know of no staff member of the Senate so respected for his personal qualities and for the excellence of his professional work as Carl. Respect for Carl reached far beyond the Senate to many others concerned about improving the urban condition and housing of all Americans.

Mr. President, it is difficult to imagine the Housing Subcommittee without Carl Coan. The Senate will miss him greatly, and so will I.

STATEMENT OF SENATOR GARN

It is my good fortune to have known and worked with Carl Coan, Sr. for the past two years. During that time I came to know him as a subcommittee staff director of the highest order. He was wise in the ways of housing legislation but open to and searching for new ideas and developments in an ever-changing field. He served his chairman, Senator Sparkman, loyally and faithfully, with a respect that was equalled only by that of the chairman for his staff director. The committee system functions only as well as the leadership and direction given it by the leaders and their staff. Mr. Coan served as a model which hopefully will be followed by all members of Senate committee staffs.

The Senate has lost an intelligent, diligent and honest servant. I know his memory will be cherished by those who knew him, and especially by his family.

Mr. SPARKMAN. Mr. President, I ask unanimous consent to have printed in the RECORD tributes paid to Carl by several people who knew him well and worked with him for many years.

There being no objection, the tributes were ordered to be printed in the RECORD, as follows:

TRIBUTES

(By Grady Perry, Jr., Member, Federal Home Loan Bank Board)

It's hard for any man to tell what we did lose when we lost Carl Coan. No man, in my little experience, ever combined as many really unusual traits, all based on One—Just Human.

I think every one of us that had the pleasure of knowing him is just a little better by having done so. He not only left us a great record of helping others, but he left us an example of how to live in friendship with all mankind.

(By Louis H. Nevins, Director Counsel, National Association of Mutual Savings Banks)

Like all who knew him, I will miss Carl Coan. The issues he worked with during his lifetime involved one of man's most basic needs—shelter. He was a man of importance, whose judgments affected and benefited thousands, but he was the only one who was unaware of his importance. For he was uncomplicated and unpretentious, embarrassed by compliments and recognition. A man with time for everyone and everything; his loss does not accrue to housing alone.

(By Leon N. Weiner, President, National Housing Conference)

One of the truly great men in the Federal government has died—Carl A. S. Coan, Sr. The National Housing Conference pays tribute to this great American who dedicated his life in public service to help achieve decent housing for all Americans.

As Staff Director of the Subcommitte on Housing and Urban Affairs of the Senate Committee on Banking, Housing and Urban Affairs, Carl Coan has been a wise counselor, superb technician, brilliant tactician, and constant friend of all those with critical housing needs.

He will be sorely missed.

In Carl Coan's memory, the National Housing Conference will establish an annual award to be known as the Carl A. S. Coan, Sr. Award for outstanding service to housing and community development. This Award will be presented each year to the individual in public service whom we feel has made an outstanding contribution to the goal of decent homes and better communities for all Americans.

(John E. Horne, Chairman, Investors Mortgage Insurance Co.)

Since coming to Washington in 1947, I have worked with many Congressional staff people in the field of housing. Never did I know one more informed about housing or more dedicated toward enabling all people in America to be adequately housed than Carl Coan.

(By Andrew I. Hickey, Federal National Mortgage Assn.)

I have known Carl Coan for more than 20 years. I have known him in a business connection and in a personal connection. I do not know a more honest, more capable, more dedicated man than Carl. Those of us who have worked on the Hill realize that we shall always miss our wonderful friend.

KROOTH & ALTMAN,
Washington, D.C., January 13, 1977.

Carl Coan, Sr. was an alive, alert, beautiful human being—always ready to help. He provided leadership and was a great inspiration to all of us.

He helped formulate and initiate programs in all phases of national housing legislation with emphasis on meeting the needs of the underprivileged. He initiated new programs of mortgage financing and urban development, subsidies and 1% mortgage assistance under Sections 235 and 236. He stimulated housing and community development, seeking to improve and increase production and spur the construction of needed housing, also reducing unemployment.

The sudden, unexpected death of Carl was shocking. We miss him. We always shall.

DAVID L. KROOTH.

FCH SERVICES, INC.,
Washington, D.C., January 13, 1977.

Carl Coan, Sr. was a kind, concerned, intelligent and loving man. His devotion to helping people improve their housing and living environment was complete. His capacity to innovate, understand, organize, and help achieve legislative enactment of these programs was unequalled.

Everyone who had the honor of knowing Carl feels his loss deeply.

JEFFREY G. SPRAGENS.

When I first came to Washington as a novice in the ways of housing legislation, the person who took me by the hand with patience, understanding and genuine interest in my special housing problems was Carl Coan. I shall always remember many times his words, "Now let's see if we can get this problem worked out," and he usually could.

(By Dorothy Duke, Director of Housing, National Council on Negro Women)

JANUARY 12, 1976.

We knew and loved Carl Coan for nearly twenty years. Initially our friendship was based on close interfamily ties where, despite the generation that lay between us, we were able to share the myriad of experiences and emotions associated with a growing maturing family. Later the ties expanded to include a professional working relationship. Just as with our experiences in the family milieu, we always looked to Carl Coan as our mentor. As our families continue to intertwine in the years ahead and as our careers follow their course, we shall always have near to us the strength, wisdom and serenity that the memory of Carl Coan provides.

JOHN AND CHARLOTTE COUTURE.

(By Virginia S. West, Executive Director, Sylacauga, Alabama Housing Authority)

Those of us in the housing community in this Nation admired, respected, and loved Carl Coan, Sr., for his friendliness, his wisdom, and his many contributions toward our goal of "a decent home and a suitable living environment for every American family." We are surely going to miss him, not only as a pro, but as a good friend, and we shall long remember him for his good works.

(By Jack H. Shiver, Executive Director, Norfolk, Va. Redevelopment & Housing Authority and President, National Association of Housing & Redevelopment Officials)

With the death of Carl Coan, the National Association of Housing and Redevelopment Officials and the Nation lose one of the most effective influences on housing programs for the poor of our time.

I hope that Carl's kind of genuine concern for the needs of the people will become a standard for all who continue to work for better housing.

U.S. LEAGUE OF
SAVINGS ASSOCIATIONS,
Washington, D.C., January 11, 1977.

The staff of the Washington Office of the U.S. League of Savings Associations will greatly miss Carl Coan, a top Capitol Hill professional of the highest integrity and ability. Carl was both persuasive and effective in his day to day work, in that he knew how to get things done—including making the necessary compromises—to fashion sound housing and financial institution legislation. He did this year after year with the same cheerful, generous, and friendly attitude and manner. We found him willing to take the time to talk over the issues, ask the necessary probing questions, and articulate the conflicting points of view—which might include his own. No special interest group could or should ask for more.

ARTHUR B. EDGEWORTH,
Director, Washington Operations.

U.S. LEAGUE OF
SAVINGS ASSOCIATIONS,
Washington, D.C., January 11, 1977.

Carl Coan was a conscientious, dedicated, able and hard-working senior Senate staff man that we in housing will sorely miss.

GLEN TROOF,
Legislative Director.

U.S. LEAGUE OF SAVINGS ASSOCIATIONS,
Washington, D.C., January 11, 1977.

While all would agree that we have lost an able and knowledgeable housing expert, it is more to the point to recognize that all of us have lost a great friend.

LEE B. HOLMES,
Staff Vice President.

(By Gordon Cavanaugh, Executive Director, Housing Assistance Council, Washington, D.C.)

Carl Coan always saw the country whole, and rural and low-income people everywhere will long benefit from progressive housing programs that would not exist but for his concern and skill.

(By Joseph Burstein, Assistant General Counsel for Public Housing, Department of Housing & Urban Development)

Carl Coan, Sr. was the most influential individual in the Country in shaping housing and urban development Federal legislative policy in the last 30 years. Personally, I found him to be completely open minded and unbiased in every way, always ready to listen to new ideas, and frank to disagree with them for good reason. Carl was, in all respects over the years, a gentle, kind and considerate person.

NATIONAL FOREST
PRODUCTS ASSOCIATION,
Washington, D.C., January 12, 1977.

Hon. JOHN SPARKMAN,
Chairman, Subcommittee on Housing and Urban Affairs, Committee on Banking, Housing and Urban Affairs, Dirksen Senate Office Building, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: On behalf of the entire forest products industry, may I express to you and to the Senate our deep sorrow at the loss of an esteemed friend, your staff director Carl A. S. Coan.

Carl was a superb professional in all of the many years I knew him and a man completely dedicated to improving the housing conditions of all people in America. He was a tireless worker and completely unassuming in his manner. Yet the legislation on which he worked and helped create bears evidence of his great achievements for mankind.

More than anything else, however, I remember Carl for his unfailing courtesy in all circumstances and his willingness to listen to a point of view even when he might in the end disagree. Carl Coan, in my opinion, was one of the truly outstanding career executives who helped the Congress in achieving its mission. He was always seeking what is best for the public good and for the benefit of people generally. Never do I recall in the many years I knew him a decision which was not in the public interest. He was loyal to both Majority and Minority members of the Subcommittee and other committees which sought his expertise. He will be sorely missed in the days and years ahead.

Sincerely,

JOSEPH B. MCGRATH.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. SPARKMAN. Mr. President, I yield to the Senator from Wisconsin.

The ACTING PRESIDENT pro tempore. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I am honored to join the distinguished Senator from Alabama in paying tribute to Carl Coan, the former staff director of the Senator's Housing Subcommittee.

Yesterday, tributes were paid to our distinguished colleague from Alabama (Mr. SPARKMAN) by some Members of the Senate and also by some of the most distinguished Americans in the country, and they were well earned.

Senator SPARKMAN's great career—and it is one of the great careers, I think, in the history of this body—has been particularly distinguished because of his marvelous contribution to the Nation's housing.

Those contributions, as Senator SPARKMAN just indicated, were in no small part a result of his work with Carl Coan, a brilliant staff member and a man of great ability.

It is sometimes said that no one in an office is irreplaceable. That may be true, in the sense that when one person is gone, someone else comes in and sits at their desk and does their job and the office goes on functioning. But when the Senate Banking Committee lost Carl Coan the week before Christmas, we lost something that can never be regained, and for which no substitute will ever be complete.

We lost, first of all, one of the Nation's foremost housing experts. Carl spent about 20 years on the Senate Housing Subcommittee, most of the time as its staff director. His knowledge of housing, in all its dimensions, was probably unexcelled by anyone in the country. It was an immensely valuable resource to the whole housing field, and though much of it will be preserved in his work and in the minds of others, much of it is now lost to us.

We have also lost a brilliant Capitol Hill tactician. Like his chairman, JOHN SPARKMAN, Carl had a knack for recognizing the idea whose time has come or for devising the compromise which would work politically. As a result, he got things accomplished, year after year, because they were practical.

And yet, we have at the same time lost a great idealist. A practical idealist is sometimes a rare thing in Washington, where pragmatists are often cynics, and idealists are often ineffective. But in Carl, the pragmatism and tactician's skills were simply instruments for pursuing ideals. After all his years working on Capitol Hill, he never lost his almost youthful excitement and optimism when he talked about what needed to be done in housing. He believed that the problems of the cities and of poor and disadvantaged people throughout the entire world could be solved if only we would keep working for it.

And work he did. We have lost a tireless laborer, with an unflagging capacity for hard work in evenings, weekends, or whenever it was needed to get the job done. He was continually reading, talking to people from all sides of the housing process, from consumers to lenders to builders to Wall Street analysts to city officials, ad infinitum. Whenever he traveled, even on vacation, he would seek out the local housing officials and arrange to see an urban renewal site or public housing units or an elderly housing project, so that he could learn something to bring back into his work.

Mr. President, I recall something that endeared Carl to me especially—he was a great athlete. He was a marvelous runner. He was one of the great runners about 35 or 40 years ago at the University of Pennsylvania.

He came close to breaking the world's record in the mile when 4:10 was the record set—which was the record Paavo Nurmi set. Carl ran less than that, but unfortunately he broke that 5:10 barrier after others had broken it. But he came very close to being one of the great, truly great athletes of the 1930's. He was a great athlete.

One other thing I want to say about Carl is his remarkable wife. One of the most successful marriages ever achieved was the marriage between Carl and Mrs. Coan.

Mrs. Coan paid tribute to Carl at the memorial services for him in the most moving way. Unfortunately, I could not be there, but everybody told me what a remarkable person she was and what a great love story they had throughout their married life.

She is a great person and I know what a terrible loss she suffered.

Carl Coan, Jr., is also a man who has contributed greatly to housing in a different way as counsel to the Home Builders. I know he will carry on in that great tradition.

We have lost, also, a fair-minded man. He was partisan in the good sense that he was loyal to the goals of his party and, of course, to his chairman and friend, Senator SPARKMAN. But he served every member of the Senate Banking Committee—Democrats and Republicans, ranking members and freshmen—with the same competence and fairness and devotion to his job. And his partisanship did not keep him from listening to every side of an issue, and working for the position which would best serve the goal of providing people with decent housing. His openmindedness included the ability to criticize his own handiwork, the programs which he had drafted in previous years, and to work constantly for changes which would improve them.

In other words, we have lost a humble man, another thing sometimes scarce in Washington. Working at the centers of power never went to Carl's head. He was modest not only in what he said, but in his whole manner of living. He seemed to have it clearly fixed in his mind that the purpose of his work was not to advance Carl Coan, but to provide people with better housing, and he never seemed to take his eyes off that objective for an instant to look around for acclaim or gain or personal power.

We have lost, simply, a good man. He was the kind of man who had time for people. Students, international visitors, job applicants, young staff people—anyone who wanted to know something about housing could claim a few minutes of his precious time. He was always dispensing assistance to somebody. Since his death, countless people have told his family and staff about the good turn Carl had done them somewhere along the way—encouragement when it was needed, help in starting some kind of housing project, or whatever.

And by his staff he was loved. Imagine a staff director whose staff says they never heard a sharp word from him. They say he made it easy to work in close, crowded offices, or to work under the pressure before an adjournment deadline, or just to enjoy coming to work

day by day. His whole life long, he was giving to people, in a quiet way which did not want gratitude and shied away from recognition, but which left those around him with richer lives.

What I am saying, in short, is that we have lost a man who was set apart from others, in the service which he rendered the Congress and country, and in the gentle, generous manner in which he lived his life. We have lost a friend who truly can never be replaced.

I thank the distinguished Senator from Alabama.

Mr. McINTYRE. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield to the Senator from New Hampshire, who likewise is a member of the committee.

Mr. McINTYRE. Mr. President, having served on the Banking Committee since 1963, I had numerous opportunities to work with and observe the late Carl Coan.

I think perhaps three things stand out most vividly in my mind about Carl. First, he had a deep-rooted concern over the housing problems of this country and worked tirelessly to remedy them. Second, he was a true professional, capable of producing absolutely first-class work without really letting his own personal biases color his advice to the members of the committee. Third, and this is perhaps the way I will remember Carl best, he was always helpful. Mr. President, despite his workload, Carl always had time, or took time to work with those of us who serve on the committee and the Housing Subcommittee and answer our endless questions about the arcane mysteries of Federal housing programs. Moreover, he was careful on several occasions to alert me to developments in which he knew I was interested in order to permit me to advance my position.

In short, Mr. President, Carl Coan was refreshing to work with. His charm, his poise and his sense of humor were most welcome as we wended our way through the intricate details not only of housing legislation, but legislation in many fields in which Carl had gained wisdom and experience over his distinguished career.

It was my good fortune to have known and worked with Carl Coan, and I hope that Flora and the rest of Carl's family will find some comfort from the fact that he has left a rich legacy which shall forever serve as an inspiration to us all.

Mr. SPARKMAN. Mr. President, I yield to the Senator from California (Mr. CRANSTON).

Mr. CRANSTON. Mr. President, on behalf of myself and members of my staff, I join my colleagues today in paying tribute to Carl A. Coan, the former staff director of the Senate Subcommittee on Housing and Urban Development.

As a member of the subcommittee since I came to the Senate 8 years ago. I feel fortunate to have had the privilege and the pleasure to know and to work with Carl. It was with deep sadness that I learned of his sudden death over the Christmas holidays.

To all of us, Carl was an exceptionally able public servant. His knowledge of housing legislation, mortgage finance, and urban development was encyclopedic. His ability to get things done—derived from his unusual blend of expertise, persistence, patience, and never-failing good humor—was widely and deservedly respected.

The Senator from Wisconsin mentioned Carl's exceptional athletic abilities. It was one of my great pleasures to run with him on the University of Georgetown track upon occasion. We encountered each other up there and circled around the track together.

We know that Carl's wife, Flora, their 8 children and 31 grandchildren—many of whom are with us in the gallery today—can be understandably proud of his long and outstanding career and countless contributions in the field of housing.

Carl had my highest respect and admiration. I shall miss him.

Mr. MORGAN. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield to the Senator from North Carolina.

Mr. MORGAN. Mr. President, I had the pleasure of knowing Carl Coan for a very short time, having served in the Senate for only 2 years on the Committee on Banking, Housing and Urban Affairs. However, during that time I came to respect him very highly.

The U.S. Senate has lost the services of one of its most capable employees, Carl A. S. Coan, staff director of the Subcommittee on Housing. His death touches us all humanly. But it is particularly untimely because we need Carl's ability and expertise more than ever. I am afraid his death deprives America of a mind which could have turned with effect to one of her worst problems, the housing crisis.

Carl was with the committee beginning in 1958, and has served as staff director since 1961. He was involved with all the major legislation under which the Government has attempted to improve the living conditions of the disadvantaged. Most of the housing units built by local governments has been successful in its aim. In the cities of North Carolina, there are thousands of families who live with a decent roof over their heads, and Carl's work contributed to that fact.

Carl became a national authority on housing, and he won the respect of all who knew him. He enjoyed a rare reputation as a nonpartisan, evenhanded staff member of unusual effectiveness.

How sad it is, then, to be facing our present housing crisis without his expertise and good sense. We have an even greater task at hand than in the past. Once, we could look at the sore needs of the poor in the cities and in the rural areas, and wonder how we could ever prevail, how we could meet so vast a need. Now, we still have the unsolved problems of low-income housing, made worse by inflation, and on top of that we have to find a way to help the entire depressed housing industry return to production.

So we have double the job to do. I think we can prevail. The housing programs of the recent past had effect. It is tragic that the recent administrations have not seen fit to do the will of Congress in this matter, persistently failing to carry out the law and failing to realize improvements of proven quality. But the job can be done. We can regenerate effective housing programs. I believe we can have an effect, as well, on the ability of the housing industry to produce affordable homes for the average buyer. And I think we can contribute to recovery of this segment of the economy.

It is just sad that we will not have Carl's help with what we must do. I believe our course would be easier, and our results more competent, were he here to lend his experience and incisiveness. We are on the threshold of that attempt, with the support of an interested administration for the first time in 8 years. I am sorry Carl cannot be with us, for we need him now, in a time of great challenge, and great promise.

Mr. JAVITS. Mr. President, the untimely death of Carl Coan late last year deprived us and the Nation of one of the finest servants of the people I have ever known.

Carl, as longtime staff director of the Housing Subcommittee, had played an important role in all the major housing legislation over the past several decades. He was knowledgeable, fair, and, above all, tolerant of differing viewpoints. He was especially helpful in trying to solve the unique and difficult problems of New York City. Many times Carl was able to help us enact laws that would allow housing to work in New York City. And for its poor and disadvantaged in regard to race, creed or color or ethnic origin. This was a difficult task and he showed termendous understanding and sympathy for our problems.

I know the Coan family is a large one and a close one. I extend my deepest sympathies to Flora Coan and all the Coan children. Carl will be greatly missed by all of us not only for his expertise but for his character, his decency and his high sense of public duty.

Mr. SPARKMAN. Mr. President, I just wish to say this, in concluding these remarks.

I have worked with many people in the course of my service in the Congress of the United States, but never have I worked with someone who was more complete in his understanding, in his approach, in his work, than Carl Coan.

I wish to add to what Senator PROXMIRE has said with reference to Carl's wife, Flora, who is a great lady in her own right and always was a great support for Carl and for the wonderful family they have.

I shall not hope and shall not expect that many more such as Carl Coan will be going my way in the future, but I shall always be grateful for the fact that I did have the opportunity to be with him and work with him for the approximately 20 years that he served the country so well.

ORDER OF BUSINESS

The PRESIDING OFFICER (Mr. BUMPERS). Under the previous order, the Senator from Wisconsin (Mr. PROXMIRE) is recognized for not to exceed 15 minutes

Mr. PROXMIRE. Mr. President, I had reserved this time in case we needed ad-

ditional time for paying tribute to Carl Coan. That will not be necessary, so I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, for not to exceed 30 minutes, with statements therein limited to 10 minutes each.

PARDONING DRAFT EVADERS

Mr. ALLEN. Mr. President, under the Senate rules, at 1 o'clock, provided the 30-minute period for the transaction of routine morning business has expired, Senate Resolution 18 will come over, as the rules say, under the rule.

This resolution expresses the sense of the Senate that no blanket pardon or amnesty should be issued to draft evaders and draft dodgers. It expresses the sense of the Senate that the President—either President, for that matter—would be ill advised to take this action, because a blanket pardon for draft dodgers and draft evaders would be an affront to the 3 million men and women who served in the Vietnam war. It would be an affront to the 300,000 who were wounded in that war. It would be an affront to the memories and to the families of the 50,000 and more servicemen who were killed in Vietnam.

Also, how can you run an army, how can you fight a war, if those who are subject to service for their country in that war know that if they evade the draft or if they desert, somewhere down the line they will be given a blanket pardon or amnesty? Mr. President, it is well-known that President Ford set up a Clemency Board offering clemency or a pardon, on an individual basis, to all those who would be covered by the contemplated action granting blanket pardon or amnesty, provided those who availed themselves of this act showed some sort of contrition by taking on the performance of humanitarian service. Some 15,000 service men availed themselves of that opportunity, and it hardly would be fair to them, because they at least have performed some sort of service in return for amnesty or for pardon.

Mr. President, I feel that this is such an important issue that the Senate should not sit idly by and allow the incoming President or the present President to take this action without the Senate giving some input into that decision. If we do nothing, that, in effect, would be condoning and agreeing, in a sense, to this action. So I am hopeful that the leadership will allow this resolution to come to a vote. We must have a vote on it sometime between 3 minutes after 1 and 2 o'clock. But I am hopeful that the leadership will allow the Senate to vote on this important issue. It is an issue on which the Senate should take a stand. We should not hide behind the Senate rules and allow this issue to go unanswered in the Senate.

So I am hopeful that, after a brief discussion between 1 and 2 p.m., we will be able to come to a vote on this issue.

PROPOSED REMOVAL OF CLARENCE KELLEY AS DIRECTOR OF THE FBI

Mr. DANFORTH. Mr. President, I am deeply concerned about recent statements by Attorney General-designate Griffin Bell that he intends to remove Clarence Kelley as Director of the FBI. I firmly believe that there are at least two compelling reasons for retaining Mr. Kelley in this important position.

First, Mr. Kelley is a highly competent and progressive law enforcement professional. From 1961 to 1973, he served as chief of the Kansas City, Mo., Police Department. During that time, he transformed the Kansas City Police Department into one of the best, if not the best, police departments in the Nation. He restored public confidence in the quality and the integrity of his department. He developed a strong community relations program. He included officers on the beat in the process of making management decisions. He established a regional training center serving law enforcement agencies in western Missouri. He pioneered in the use of the computer as a tool of law enforcement agencies. And at all times, Mr. Kelley demonstrated a keen sensitivity to the constitutional rights of the citizens he served. In 1970, he was awarded the J. Edgar Hoover Gold Medal as the Outstanding Police Chief in the United States.

During his three and a half year tenure as Director of the Federal Bureau of Investigation, Mr. Kelley has reduced domestic security investigations from nearly 22,000 to less than 300. He has exemplified his strong belief in legislative oversight by appearing before congressional committees more frequently than did his predecessors. Congressional committees have had more access to personnel of the FBI than at any time in history.

He has restored the damaged pride and morale of the dedicated FBI employees. He has improved the recruitment and employment of minorities and women by the Bureau. He has established a career development program to help assure the selection of outstanding persons for leadership positions. And most important to law enforcement at the State and local level, he has reestablished the proper balance between the FBI and local police forces throughout the United States, by cooperating rather than competing with local efforts.

A second major reason for retaining Clarence Kelly as Director concerns the image of the Bureau as an institution removed from political considerations. As a matter of public policy, it would be a serious mistake to make the directorship of the FBI a function of Presidents in office or parties in power.

One lesson we should have learned in recent times is that investigative agencies must be insulated from particular administrations—not beholden to them for employment. The independence of the FBI, and the public's perception of that independence would be lessened if a new administration were to remove an outstanding Director in the middle of his 10-year term of service.

Mr. President, I ask unanimous consent that a copy of a letter which I have sent Attorney General-designate Griffin Bell be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., January 13, 1977.

Hon. GRIFFIN BELL,
King & Spalding, Trust Co. of Georgia Building, Atlanta, Ga.

DEAR JUDGE BELL: I am very distressed and disappointed with your statement to the Senate Judiciary Committee that you would remove FBI Director Clarence Kelley if you are confirmed as Attorney General of the United States. Director Kelley in his three-year tenure at the Justice Department clearly has done a superior job, under what can only be described as adverse circumstances. He has reorganized the Bureau, and has set standards of performance which are a credit to effective law enforcement. Most importantly, he has contributed much to the important process of restoring public confidence in the FBI.

As Attorney General Levi has explained, Director Kelley has undertaken a complete transformation of the priorities of the FBI, "without flamboyance and without extraordinary disturbance." Over the last three years, domestic security investigations have dropped from 22,000 to less than 300 today. This is indicative, I think, of the high-caliber leadership which Director Kelley has given to the Bureau.

You indicated in your confirmation hearings that Director Kelley "could be removed for cause," yet the only cause I can discern from your statements is a belief that the FBI Director should change with each administration. This is an ominous decision, one which portends an unforgiveable politicization of the FBI, and if we have learned anything from Watergate, it is that politics has no place in investigative agencies.

In my former position as Attorney General of Missouri, I had many opportunities to observe closely the work of Clarence Kelley while he was Chief of Police in Kansas City. He is a good and decent public servant and a man of great competence, integrity and ability. Therefore, I hope that you will reconsider your decision and retain Clarence Kelley as Director of the Federal Bureau of Investigation.

Sincerely,

JOHN C. DANFORTH.

Mr. STEVENS. Mr. President, I commend the Senator from Missouri for his statement and to say for myself and myself only that the statement I read concerning the FBI Director disturbed me considerably. It is my belief that we should inquire further of the Attorney General-designate whom he intends to appoint to this very important position in the FBI in the event he is confirmed before his confirmation comes before this body.

PARDONING DRAFT EVADERS

Mr. HELMS. Mr. President, we are still in the morning hour, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. HELMS. Mr. President, I share the hopes of the able Senator from Alabama that the Senate will proceed promptly to vote on Senate Resolution 18 cosponsored by the able Senator from Alabama the Senator from Virginia (Mr. HARRY F.

BYRD, JR.), the Senator from North Carolina (Mr. HELMS), the Senator from California (Mr. HAYAKAWA) and, I believe, some others.

Mr. President, this resolution poses no challenge to the authority of the President to grant blanket amnesty. That is not the purpose of the resolution. The resolution is purely for the purpose of giving this Senate an opportunity to exercise its constitutional advise and consent capacity.

The Senator from North Carolina assumes that no Senator, regardless of his position on this particular question, would hesitate taking a stand.

Mr. President, the national commander in chief of the Veterans of Foreign Wars recently issued a statement which deserves consideration by every Member of the Senate. The distinguished national commander in chief of the VFW, Mr. R. D. Smith, began by pointing out that the 1.8 million members of the VFW, including over 500,000 Vietnam veterans, joined by 567,000 members of the ladies auxiliary, oppose with one voice the reported decision of President-elect Carter to issue a blanket pardon covering all Vietnam war draft dodgers.

Then the statement goes on to say, Mr. President:

With equal vehemence, we urge President Ford to hold firm on his decision not to grant an 11th hour mass pardon.

Apparently President Ford is not going to do that.

Mr. President, I am not going to read all of the statement by Mr. Smith, but there are portions of it which ought to be emphasized. He asked the question, with reference to the rhetoric of those who favor amnesty and draft dodgers, "Whose 'wounds' will a blanket pardon 'bind up'?" Then he goes on to say:

Surely not the overwhelming majority of families of the 56,234 American dead in Vietnam (a war we chose not to win), the 303,000 wounded, the families of the hundreds still carried as missing in action, the 591 returned prisoners of war, the 2.5 million who served honorably in Vietnam, including 600,000 conscriptees who there suffered 71,500 killed and wounded.

Mr. President, I do hope the Senate will vote on this question, and quickly, and not duck the issue. The two opposing points of view speak for themselves. I hope Senators have the courage of their convictions. I trust that no Senator would be unwilling to take a public stand on this question as to where he stands on this important question.

I thank the Chair.

SENATE RESOLUTION 18—PARDON OF VIETNAM-ERA DRAFT EVADERS

The PRESIDING OFFICER. The Chair lays before the Senate Senate Resolution 18, coming over under the rule, which the clerk will state by title.

The legislative clerk read as follows:

A resolution (S. Res. 18) to express the sense of the Senate in opposition to a general Presidential pardon by proclamation of Executive order of Vietnam era draft evaders, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ALLEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. ALLEN. I ask for the yeas and nays on the resolution.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. ALLEN. Mr. President, I have literally scores of communications from citizens in opposition to the issuance of blanket pardon or amnesty, but as typical of those communications, I ask unanimous consent that I might print in the RECORD a communication signed by approximately 1 dozen American Gold Star Mothers in opposition to blanket pardon or amnesty, a letter dated January 1, 1977, from Mr. Richard Slepin, of Portsmouth, Va., and also a communication, dated January 14, 1977, from the National Office of the American Legion, together with a statement from the national commander himself, Comdr. William Rogers, who, by the way, is here in the Capitol, and his sole purpose in being in Washington is to advocate the passage of this resolution and to protest the issuance of blanket pardon or amnesty by the President.

I ask that all of those communications be printed in the RECORD.

There being no objection, the communications were ordered to be printed in the RECORD, as follows:

AMERICAN GOLD STAR MOTHERS, INC.,
Fort Collins, Colo., December 21, 1976.

TO THOSE CONCERNED: How fair are we to pardon draft evaders who fled our nation during the Vietnam War? Other young men, who served patriotically as they believed or were told—and lost their lives—cannot be treated fairly by such pardons or amnesty. Nor can their parents and other relatives.

We do not believe in punishing such evaders. But certainly they should give a part of their ". . . lives . . . fortunes, and . . . sacred honor," in restitution, if they are to return as citizens.

Surely we should not, by such pardons, scorn and torment relatives, including Gold Star Mothers, of fallen military youths whose graves throughout the world are marked by white crosses, or similar identifications for the heroic dead.

In this situation we should be intelligent, patriotic, and highly principled—not just politically motivated in seemingly an effort to buy votes.

Signed: Dorothy L. White, Doris Spurrier, Dorothy M. Schenck, Lorrine M. Lockwood, ——— Maire, Evelyn Berry, M. Edna ———, Helen Brown, Dorothy M. ———, Ethel L. Whiting, Eunice A. Bush.

YORKSHIRE ROAD,
Portsmouth, Va., January 1, 1977.

Hon. JIMMY CARTER,
President Elect, United States of America, Plains, Ga.

DEAR MR. CARTER: I need assistance and you are the only one who can furnish it, either as President Elect, or as Jimmy Carter, private citizen.

I am concerned about the effect which your proposal of amnesty will have on the nation as a whole, veterans of recent wars confined to hospitals and those (millions) more fortunate like myself. Even more I am concerned lest the nation be faced with another Pearl Harbor. What would be the "percentage" in joining the fight?

The view has been advanced that Vietnam was an immoral war. I give deserters and draft evaders the benefit of the doubt, eliminating cowardice as their motive, suggesting they acted on the grounds Vietnam was immoral. To me this view is untenable. I am no warmonger; I do, however, strongly support the view that citizenship in this country carries with it certain responsibilities. A great American patriot said it in words similar to "my country first, but rght or wrong, my country."

Mr. Carter, more than most, you should recognize the effects of a general pardon. There will remain the core of citizens of such moral fiber who will support the country with their lives if needs be. But I am concerned for an even greater number who will hesitate and back off knowing that a pardon will excuse their reluctance. I suggest, Mr. Carter, that there might be no country to grant amnesty; I suggest that our young men with a strong unwillingness to bear arms will prove the nation's downfall, and lead to its ultimate defeat at the hands of an aggressor.

You have proven your ability in the political world as witness your rise from Jimmy who? to President Elect. No one is infallible. I urge you to search your own mind, I urge you to seek the guidance of Almighty God before you make your final decision. Whatever your decision I shall abide by it. So there will be no doubt I will be one of the moral fiber I previously described.

Most sincerely and respectfully,
RICHARD SLEPIN.

Washington, D.C., January 14, 1977.

Hon. JAMES B. ALLEN,
U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR ALLEN: The American Legion is most gratified by your expression of opposition to President-Elect Carter's proposed blanket amnesty or pardon plan. Your concern over the probable disastrous effects on the future security of this nation is shared by our organization.

We see this matter as becoming especially critical during recent days with the statement by Attorney General-Designate Griffin Bell outlining the sweeping nature of Mr. Carter's plan. His statement has prompted our National Commander, William J. Rogers, to send the enclosed message by telegram to the President-Elect.

You are being provided with a copy of Commander Rogers' message for your information and for the purpose of demonstrating our desire to cooperate in voicing the strongest possible objection to blanket amnesty or pardon.

Sincerely,
MYLIO S. KRAJA,
Director, National Legislative Commission.

Enclosure.

NATIONAL COMMANDER'S STATEMENT TO DEPARTMENT COMMANDERS, AMERICAN LEGION JANUARY 14, 1977

The following is the statement which I have sent to President-elect Carter today regarding his proposed pardon for draft evaders and military deserters and those receiving less than honorable discharges:

"The American Legion and the American Legion Auxiliary vehemently protest and unalterably oppose your proposed pardon, amnesty plan for draft evaders, military deserters and those receiving less than honorable discharges during the Vietnam period. We

continue to urge that each case be judged on an individual basis through the existing judicial and administrative channels currently open to those individuals.

"The American Legion reaffirms its belief in the fairness and compassion of the American judicial system. The proposed blanket amnesty would insult the vast majority of Americans who served honorably during the Vietnam period. Moreover, a pardon could have serious effects on our already lagging, all-volunteer force and will raise serious questions about military service for our people in the event of a future national emergency.

"We submit that, rather than healing wounds, the proposed action will prove a divisive influence."

I am personally asking each of you to individually and collectively mobilize the membership of your Department to advise President-elect Carter and your elected representatives of our strong and unwavering opposition to any pardon. I ask that you do this by telegram and by other responsible action within your Department. The pardon/amnesty issue is of paramount importance to The American Legion and to the future of American society as we know it. America's future may be at a crossroad and we may lose our oldest tradition of citizen responsibility and a nation under law if this proposed pardon is enacted.

If you have any questions concerning my phone call today, call Mike Schlee (collect), Director, National Security-Foreign Relations Division at 202/393-4811.

Mr. ALLEN. I also have a transcript of the TV interview with Judge Griffin Bell that indicates that the President plans now to go far beyond what originally seemed indicated, in the first place, as to some 9,000 persons who have been convicted in the courts for violation of the law in connection with service in the Armed Forces, and he has also indicated that enactment of laws will be sought that would allow some deserters or evaders who went to foreign countries and became citizens of those countries to reenter the United States.

So I ask unanimous consent that that transcript also be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

FROM NBC TV NEWS, JANUARY 12, 1977, JOHN CHANCELLOR-DAVID BRINKLEY

CHANCELLOR. We got the first details today on what Jimmy Carter's plans are for pardoning Vietnam draft resisters and evaders which will be one of his first actions as President. The details came from Griffin Bell, Carter's choice to be Attorney General. Carl Stern has the story.

STERN. At the confirmation hearings, Bell outlined for the first time what is expected to be the Carter Administration's program for Vietnam war pardons. The plan Bell described is wider than the one first proposed by Mr. Carter.

Bell said the plan calls for pardons for draft evaders who have been convicted, who number about 9,000, and the dropping of charges against about 3,000 others who are technically still listed as fugitives. Bell also indicated a change would be sought in immigration laws to permit young men who fled and became citizens of other countries to reenter the United States. He said there would be an extradited review in certain cases for those who received less than honorable discharges for opposition to the war while in the military.

He also said there would be a review system set up to see which military deserters deserved to be pardoned. Bell stressed that the language is still being worked on but the major work has been done.

BELL (Voice). I think it is a reasonable plan from what I've seen. There may be changes but I have seen drafts over the past month. The Attorney General will have some role in the over-all plan. I don't foresee any problems in implementing this plan.

STERN. Parts of the program are not as broad or as automatic as Carter's own staff had recommended but Bell said he did consider it equitable. Spokesmen for veterans groups in Washington said that they are still opposed to blanket pardon.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. ALLEN. I yield.

Mr. GOLDWATER. Not being a lawyer I wish to ask a lawyer's opinion. Does the President of the United States have the power to grant amnesty?

Mr. ALLEN. In my judgment, the Constitution of the United States does give the President that authority, but it does not prevent the Senate from expressing its opinion on this contemplated action. He has that authority, and that resolution does not seek to force him not to issue blanket pardon and amnesty. But it does give the President, who has stated that he wants to cooperate with Congress, the benefit of the views of the Senate.

Possibly, the Senate will vote this resolution down. I do not know. All I am asking is that the leadership, instead of interposing quorum calls when the matter is called for a vote, allow this issue to come to a vote. I decry these efforts on the part of the leadership to prevent the Senate from taking a stand on this issue.

Mr. GOLDWATER. I might say to my friend from Alabama that I believe—and I will take the word of the Senator who is a lawyer—the Constitution only gives the President the right to grant a pardon, that he has no right to give amnesty but he can pardon. I think sometime during the debate we ought to clear that matter up.

Mr. President, if my friend from Alabama, has no objection, I wish to be included as a cosponsor on his resolution.

Mr. ALLEN. I thank the distinguished Senator.

Mr. GOLDWATER. I ask unanimous consent that that be done.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLEN. Mr. President, I also ask unanimous consent that the distinguished Senator from South Carolina (Mr. THURMOND) and the distinguished Senator from California (Mr. HAYAKAWA) be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. ALLEN. I yield.

Mr. CRANSTON. This Senator would just like to explain that the actions taken thus far by the "leadership" do not represent an effort to prevent the matter from ultimately coming to a vote. They represent an effort to make sure that Senators who have any interest in the matter are fully alerted that there may be a vote, if they wish to participate.

Mr. ALLEN. Will the Senator be willing by unanimous consent to set a time certain for a vote on the resolution?

Mr. CRANSTON. Not unless Senators who have an interest have been alerted to the fact that such a request may come before the Senate.

Mr. ALLEN. Yes. I believe the Senator has been alerted to that fact because on the very first day of the session the Senator from Alamaba spoke on the subject and printed in the RECORD, by unanimous consent, a copy of the resolution in which he stated at the first available time he would introduce that resolution. He refrained from introducing it on the first day at the request of the leadership which did not want any bills or resolutions other than routine housekeeping resolutions introduced at that time. So complying with the wishes of the leadership, the Senator from Alabama delayed until the 6th of January to introduce that resolution. It has been in the RECORD. The whip notices have stated that in all likelihood or probability this resolution might come to a vote today. So I believe there has been ample notice. But I hope that around 1:55 p.m., then, we might possibly have a vote on the issue.

Mr. CRANSTON. The Senator from California is aware of all that the Senator from Alabama has stated. In his capacity as whip he put out notices regarding these resolutions, stating not that there would probably be rollcall votes, but that there might be. It was not then known that the Senator from Alabama would necessarily want the yeas and nays and insist upon a rollcall. The Senator's request for the yeas and nays makes firm what was only in part anticipated, and the leadership feels that Senators who have any interest in the matter should be given the full opportunity to know about the new situation before any action is taken.

Mr. ALLEN. I wonder if the Senator might agree on a certain time for debate on Wednesday and vote on Wednesday? That ought to give ample time, I should think.

Mr. CRANSTON. The Senator from California has already stated that at this time he is not prepared, because of the potential interest of other Senators, to enter into any unanimous-consent agreement.

Mr. ALLEN. I must say it seems passing strange to the Senator from Alabama that the leadership, which is so often anxious to bring issues to a vote here in the Senate, now seems hesitant and extremely reluctant to allow the Senate to take a stand on this important issue.

Mr. CRANSTON. The Senator knows the leadership is often anxious to see that matters are brought expeditiously to a vote. The Senator also knows the leadership has a responsibility to see to it that all Senators are protected in matters that may be of interest to them. That is what the leadership is now doing.

Mr. ALLEN. Will the Senator use his good offices to see that we get a vote on this issue not later than the 19th of January?

Mr. CRANSTON. The Senator will use

his good offices to see to it that all Senators who may have an interest in the matter are fully alerted before decisions are made.

Mr. ALLEN. And it comes to a vote by the 19th?

Mr. CRANSTON. That is up to the Senate as a whole. In fairness to all Senators, they should be alerted to unanimous-consent requests for votes on matters they are interested in before such agreements are entered into. They are entitled to the opportunity, if they so wish, to modify them, expedite them, delay them, or do anything about them. They have that right as individual Senators.

Mr. ALLEN. We have had about four or five unanimous-consent requests granted already this morning. I wonder why the insistence on alerting Senators on this one.

Mr. CRANSTON. I think the Senator is referring to matters that plainly were not controversial, as this matter may be. This Senator does not know whether it will be controversial or not, but he is seeking to protect the rights of those Senators for whom it might be.

There was a request to provide a substantial block of time at some time in the near future to provide for eulogies to the outgoing President which was not felt to be a controversial matter.

Mr. ALLEN. It could well have been, because the Senator from Alabama recognizes, as I am sure the Senator from California does, that it might freeze out discussion of this matter on Wednesday, making it all the more imperative that we vote on this matter today.

Mr. CRANSTON. This Senator feels, with respect to that matter, that it is important that there be an opportunity for eulogies to President Ford, who, as all of us feel, has done a splendid job. That was evidenced by his reception in the House Chamber Wednesday evening. Therefore it is important that opportunity be accorded to Senators, both for personal and historical reasons, to express their affection to Gerald Ford.

Mr. ALLEN. I agree with the Senator, but I would think after those 4 hours are up there would be an opportunity for a vote on this issue. I would hope the Senator would not hide behind the Senate rules to delay action on this matter.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. ALLEN. I yield the floor, unless the Senator wishes to address me.

Mr. HELMS. I simply want to ask if my understanding is correct that the leadership intends to prevent a vote on this issue today. Is that correct?

Mr. CRANSTON. Not necessarily.

Mr. HELMS. Mr. President, I suggest we vote.

QUORUM CALL

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. HELMS. Mr. President, I object.

The PRESIDING OFFICER (Mr. MORGAN). Objection is heard.

The assistant legislative clerk resumed the call of the roll, and the following Senators entered the Chamber and answered to their names:

[Quorum No. 2 Leg.]

Abourezk	Hatch	Riegle
Allen	Hayakawa	Schmitt
Anderson	Helms	Stevens
Church	Leahy	Thurmond
Cranston	Metzenbaum	Zorinsky
Ford	Morgan	
Goldwater	Pearson	

The PRESIDING OFFICER. A quorum is not present. The clerk will call the names of absent Senators.

The assistant legislative clerk resumed the call of the roll.

Mr. HELMS. Mr. President, I move that the Sergeant at Arms be instructed to request the attendance of absent Senators, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from North Carolina. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Delaware (Mr. BIDEN), the Senator from Arizona (Mr. DECONCINI), the Senator from New Hampshire (Mr. DURKIN), the Senators from Colorado (Mr. HART and Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Washington (Mr. MAGNUSON), the Senator from New York (Mr. MOYNIHAN), the Senator from Georgia (Mr. NUNN), the Senator from Maryland (Mr. SARBANES), the Senator from Mississippi (Mr. STENNIS), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Massachusetts (Mr. BROOKE), the Senator from Nebraska (Mr. CURTIS), the Senator from Oregon (Mr. PACKWOOD), the Senator from Delaware (Mr. ROTH), the Senator from Virginia (Mr. SCOTT), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that the Senator from Oklahoma (Mr. BARTLETT) is absent due to illness.

The result was announced—yeas 75, nays 0, as follows:

[Rollcall Vote No. 1 Leg.]

YEAS—75

Abourezk	Cannon	Domenici
Allen	Case	Eagleton
Anderson	Chafee	Eastland
Bellmon	Chiles	Ford
Bentsen	Church	Garn
Bumpers	Clark	Glenn
Burdick	Cranston	Goldwater
Byrd, Harry F., Jr.	Culver	Gravel
Byrd, Robert C.	Danforth	Griffin
	Dole	Hansen
Hatch	McClellan	Riegle
Hatfield	McClure	Sasser
Hayakawa	McGovern	Schmitt
Heinz	McIntyre	Schweiker
Helms	Melcher	Sparkman
Humphrey	Metcalf	Stafford
Inouye	Metzenbaum	Stevens
Jackson	Morgan	Stevenson
Javits	Muskie	Stone
Johnston	Nelson	Thurmond
Laxalt	Pearson	Wallop
Leahy	Pell	Williams
Long	Percy	Young
Lugar	Proxmire	Zorinsky
Mathias	Randolph	
Matsunaga	Ribicoff	

NAYS—0

NOT VOTING—25

Baker	Haskell	Roth
Bartlett	Hathaway	Sarbanes
Bayh	Hollings	Scott
Biden	Huddleston	Stennis
Brooke	Kennedy	Talmadge
Curtis	Magnuson	Tower
DeConcini	Moynihan	Weicker
Durkin	Nunn	
Hart	Packwood	

So the motion was agreed to.

The PRESIDING OFFICER. With the addition of Senators voting who did not answer the quorum call, a quorum is now present.

The Senator from South Dakota is recognized.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. McGOVERN. Mr. President, I think the resolution pending before us is a very ill-advised move and one that I hope the Senate will not accept.

It deals with one of the most complicated problems before the country today. That is the question of what to do with the thousands of young men who either manifested their opposition to the recent war in Vietnam by going into exile or by risking a prison sentence here at home.

It also raises the question of whether those men should be treated on the same basis as those who signed up for military service and then deserted.

As Senators know, the President-elect has drawn a distinction between these two groups of men. He has said that those who stood up against the war on the ground of conscience and refused to be drafted, refused to participate in it, should be covered by a general pardon. There is some confusion as to what the difference is between a general pardon and amnesty. If we look at Webster's dictionary, the first definition of "amnesty" is a general pardon. It becomes amnesty when it becomes general. So there is an argument about the difference between these two terms.

In any event, President-elect Carter has taken the same position I took 4 years ago, that those who deserted should be dealt with on a case-by-case basis.

There are various reasons why people desert military service. Some of it may be connected with their moral opposition to the war. Some of it may be connected with the fact that they just become bored or that they committed some kind of crime. Maybe they are guilty of something other than a protest against the war. In those cases, it does seem to make sense to deal with them on an individual basis rather than on a general amnesty or general pardon.

In any event, it seems to me a mistake

to confuse the issue by a resolution which, by implication at least, leaves the impression that what is before us is a proposal from the President or the President-elect of a general pardon or general amnesty for all those who were draft resisters or deserters. That is not the proposal that the newly elected President has made. He never has suggested that.

I think this resolution confuses the issue, both in the minds of Senators and of the public, the way it is now worded.

Mr. ABOUREZK. Mr. President, will the Senator yield?

Mr. McGOVERN. I yield to the Senator for a question or an observation.

Mr. ABOUREZK. It is important to note that this was one of the major campaign issues of President-elect Carter. If this resolution is agreed to, it will, in a way, deprive him of the opportunity to fulfill what he had pledged during the campaign and what the people of this country expect him to do under his promises.

I believe that the measure should be referred to a committee, for the committee's consideration and to give the President-elect time to do whatever he has to do on it.

I agree with the Senator from South Dakota that it is most ill-advised. I favor an amnesty of a sort that is even stronger than the President-elect has announced he favors.

So I suggest to the Senator that this matter be referred to a committee for consideration at least, so that we can get the views of the incoming administration on it.

Mr. McGOVERN. I think the Senator's point is well taken, and at the appropriate time I intend to make such a motion.

I draw the attention of the Senate to the fact that we really have not been focusing on this issue. I believe that I have been as concerned about it as most Senators, but I have not been concentrating on this issue for many months. The one Senator who really took the time and effort to deal with this issue seriously in recent months no longer is with us. I refer to the late Senator Hart of Michigan. This was the issue that was closest to his concerns in the closing months of his life. He gave the major attention to it. He probably was one of the few Members of the Senate who really thought the issue through. He was a skilled lawyer, a man of judicious temperament, whom we all respected and loved and admired. He felt very strongly that what was needed was a general amnesty to deal with this problem.

However, I mention him not so much because of his position, but simply to remind us that most of the other Members of the Senate, myself included, have not given the time and attention to this issue that the late Senator Hart did. Most of us have not treated this issue as a major priority. We have been concentrating on other things. I think it would make us look ridiculous to open a new session of the Senate on a complicated question of this kind and then not only go on record in opposition to the publicly stated position of a newly elected President but also apparently in opposition to what is the prevailing view of the American people who just elected this new President.

So I urge, in the spirit of the suggestion of Senator ABOUREZK, that rather than try to vote on this matter today, we refer it to the appropriate committee, where it can be studied and analyzed and we can put in the formula we might want to propose to the President.

At least, we should hear what the administration has to say about it, hear the views of some of the groups that are especially concerned with this issue. We should get the best legal counsel that can be brought to bear on it. We should look at the constitutional implications of it, the humanitarian aspects of it, what the impact might be on future efforts to recruit and to draft men into the armed services. These are all very complicated questions.

It is in that spirit, Mr. President, that I now move that this matter be referred to the Committee on the Judiciary, and I ask for the yeas and nays on that motion.

Mr. ABOUREZK. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ALLEN. Mr. President, it is quite interesting that those who have been insisting in past Congresses that the Senate should take a stand on issues confronting the Nation, that it should do so expeditiously, that dilatory quorum calls should not be called for, are the same people who are preventing this issue from being passed upon by the Senate.

We are starting a new Congress, with new leadership on both sides of the aisle, and an important issue comes before the Senate, an issue that should be acted upon in order that the Senate, as an institution, might give its advice, the sense of the hundred Members, to the incoming President, to allow him to make a proper disposition of this issue.

I was amazed to read a transcript of a television program on which Judge Bell appeared. The interviewer, the commentator, points out, and Judge Bell confirms—he seems to know what the President tentatively is planning to do—that this tentative plan goes much farther than anyone ever dreamed it would go.

According to this transcript, this plan calls for pardoning draft evaders who have been convicted, numbering about 9,000, and dropping charges against others who technically are still listed as fugitives.

More than that, Mr. President, this plan recommends legislation that would permit many deserters who have left the country and have become citizens of other countries—I am not absolutely sure of the number 3,000 as being accurate, but a large number—to come back to the United States after having elected to give up their citizenship.

So. Mr. President, all this issue before the Senate is: shall the Senate take a stand, shall we acquit ourselves as men, shall we be willing to take a stand on this issue and advise the President of our view?

I am of the opinion that Mr. Carter was elected as President of the United States not because of his pledge to take action in this area but in spite of it. I do not feel the American people approve of this action.

It has been stated that we want cooperation between the two branches of government. What better way would we have of cooperating than to advise the President of the view of the Senate in this sensitive issue?

Mr. ABOUREZK. Mr. President, will the Senator yield?

Mr. ALLEN. The Senator knows I have only a short time. So, Mr. President, I believe this issue should be met head on by the Senate.

Mr. ABOUREZK. Mr. President, will the Senator yield so that I can accomplish his desire?

Mr. ALLEN. I hope the distinguished Senator will not disturb me any further. I will not yield.

In order that we might—obviously, we are not going to get a vote on this issue up or down, so I therefore move, Mr. President, in order to have a test vote on the issue—and I hope the Senators will regard it as a test vote—to lay on the table the motion of the distinguished Senator from South Dakota (Mr. McGOVERN) to commit this resolution.

Mr. HELMS. Mr. President, I call for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alabama. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STONE assumed the chair at this point.

Mr. CRANSTON. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Delaware (Mr. BIDEN), the Senator from Arizona (Mr. DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HART), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Washington (Mr. MAGNUSON), the Senator from New York (Mr. MOYNIHAN), the Senator from Georgia (Mr. NUNN), the Senator from Maryland (Mr. SARBANES), the Senator from Mississippi (Mr. STENNIS), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announced that, if present and voting, the Senator from Arizona (Mr. DECONCINI), and the Senator from New York (Mr. MOYNIHAN) would each vote "nay."

Mr. STEVENS. I announce that the Senator from Massachusetts (Mr. BROOKE), the Senator from Nebraska (Mr. CURTIS), the Senator from Oregon (Mr. PACKWOOD), the Senator from Delaware (Mr. ROTH), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I also announce that the Senator from Oklahoma (Mr. BARTLETT) is absent due to illness.

The result was announced—yeas 37, nays 41, as follows:

[Rollcall Vote No. 2 Leg.]

YEAS—37

Allen	Garn	Morgan
Baker	Glenn	Schmitt
Bellmon	Goldwater	Schweiker
Bentsen	Griffin	Scott
Byrd, Harry F., Jr.	Hansen	Sparkman
	Hatch	Stafford
Cannon	Hayakawa	Stevens
Chiles	Helms	Stone
Danforth	Johnston	Thurmond
Dole	Laxalt	Wallop
Domenici	Lugar	Young
Durkin	McClellan	Zorinsky
Ford	McClure	

NAYS—41

Abourezk	Heinz	Metzenbaum
Anderson	Humphrey	Muskie
Bumpers	Inouye	Nelson
Burdick	Jackson	Pearson
Byrd, Robert C.	Javits	Pell
Case	Kennedy	Percy
Chafee	Leahy	Proxmire
Church	Long	Randolph
Clark	Mathias	Ribicoff
Cranston	Matsunaga	Riegle
Culver	McGovern	Sasser
Eagleton	McIntyre	Stevenson
Gravel	Melcher	Williams
Hatfield	Metcalf	

NOT VOTING—22

Bartlett	Haskell	Roth
Bayh	Hathaway	Sarbanes
Biden	Hollings	Stennis
Brooke	Huddleston	Talmadge
Curtis	Magnuson	Tower
DeConcini	Moynihan	Weicker
Eastland	Nunn	
Hart	Packwood	

So the motion to lay on the table was rejected.

Mr. McGOVERN. Mr. President, I move to reconsider the vote by which the motion was rejected.

Mr. CRANSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The hour of 2 p.m. having passed, Senate Resolution 18 will go to the calendar.

Mr. ALLEN. Mr. President, I do not believe that we should allow the arrival of the hour of 2 o'clock to prevent a final vote on this issue. I hope that the leadership will cooperate in having a final vote on the resolution. Here we are, starting a new administration, a new Congress, and yet the very——

The PRESIDING OFFICER. The Senator will suspend. The Senate will be in order. The Senator from Alabama may proceed.

Mr. ALLEN. On the very first issue to come before the Senate, the Senate ducks behind this motion to refer.

Everyone knows that referral would kill the resolution, but rather than permit an up or down vote, this dilatory practice has been resorted to. I am hopeful that we can have an up or down vote. It looks as though the opinion of the Senate was pretty well demonstrated here by the last vote. Why, then, should we not vote up or down on the issue?

Hoping, then, Mr. President, that we will be able to bring the issue before the Senate again, I move that the Senate proceed to the consideration of Senate Resolution 18, and send up a motion in writing to that effect.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alabama.

is the motion?

The PRESIDING OFFICER. That the Senate proceed to the consideration of Senate Resolution 18. The question is on agreeing to the motion.

QUORUM

Mr. CRANSTON. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. GLENN). The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. McGOVERN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. HELMS. Mr. President, I object.

The PRESIDING OFFICER (Mr. STONE). Objection is heard. The clerk will call the roll.

The second assistant legislative clerk resumed the call of the roll and the following Senators entered the Chamber and answered to their names:

[Quorum No. 3 Leg.]

Abourezk	Goldwater	Metcalf
Allen	Gravel	Metzenbaum
Anderson	Griffin	Morgan
Baker	Hansen	Muskie
Bellmon	Hatch	Nelson
Bumpers	Hatfield	Pearson
Burdick	Hayakawa	Pell
Byrd, Harry F., Jr.	Heinz	Percy
	Helms	Proxmire
Byrd, Robert C.	Humphrey	Randolph
Cannon	Inouye	Ribicoff
Case	Jackson	Riegle
Chafee	Javits	Sasser
Chiles	Johnston	Schmitt
Church	Kennedy	Schweiker
Clark	Laxalt	Scott
Cranston	Leahy	Sparkman
Culver	Long	Stafford
Danforth	Lugar	Stevens
Dole	Mathias	Stevenson
Domenici	Matsunaga	Stone
Durkin	McClellan	Thurmond
Eagleton	McClure	Wallop
Ford	McGovern	Williams
Garn	McIntyre	Young
Glenn	Melcher	Zorinsky

The PRESIDING OFFICER. A quorum is present.

The Senator from South Dakota is recognized.

Mr. McGOVERN. Mr. President, the Senate, just a few minutes ago, I think very clearly, indicated that it believes that the procedure to follow with reference to the resolution of the Senator from Alabama is to refer it to the Committee on the Judiciary, where it belongs, so that we can look at it as we do other complicated proposals of this kind, in a systematic way. When the Senator talks about dilatory tactics, it is not dilatory to treat a measure of this kind through the committee process. That is the way we deal with legislation of substance. That is all the Senate has said in rejecting the Senator's tabling motion. They are not trying to stall the issue, but simply to put it in the proper committee. We have had a rollcall vote on that and I think the Senate has made its view known.

So, under those circumstances, in order to save the time of the Senate, I move to lay on the table further consideration at this time of the Senator's resolution.

Mr. ALLEN. I call for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second. The yeas and nays are ordered on the motion to lay on the table the motion to proceed.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Texas (Mr. BENTSEN), the Senator from Delaware (Mr. BIDEN), the Senator from Arizona (Mr. DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HART), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Washington (Mr. MAGNUSON), the Senator from New York (Mr. MOYNIHAN), the Senator from Georgia (Mr. NUNN), the Senator from Maryland (Mr. SARBANES), the Senator from Mississippi (Mr. STENNIS), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announce that, if present and voting, the Senator from Arizona (Mr. DECONCINI) and the Senator from New York (Mr. MOYNIHAN) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Massachusetts (Mr. BROOKE), the Senator from Nebraska (Mr. CURTIS), the Senator from Oregon (Mr. PACKWOOD), the Senator from Delaware (Mr. ROTH), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that the Senator from Oklahoma (Mr. BARTLETT) is absent due to illness.

The result was announced—yeas 37, nays 40, as follows:

[Rollcall Vote No. 3 Leg.]

YEAS—37

Abourezk	Heinz	Muskie
Anderson	Humphrey	Nelson
Bumpers	Inouye	Pearson
Byrd, Robert C.	Javits	Pell
Case	Kennedy	Percy
Chafee	Leahy	Proxmire
Church	Long	Ribicoff
Clark	Mathias	Riegle
Cranston	Matsunaga	Sasser
Culver	McGovern	Stevenson
Eagleton	McIntyre	Williams
Gravel	Melcher	
Hatfield	Metzenbaum	

NAYS—40

Allen	Glenn	Morgan
Baker	Goldwater	Randolph
Bellmon	Griffin	Schmitt
Burdick	Hansen	Schweiker
Byrd, Harry F., Jr.	Hatch	Scott
	Hayakawa	Sparkman
Cannon	Helms	Stafford
Chiles	Jackson	Stevens
Danforth	Johnston	Stone
Dole	Laxalt	Thurmond
Domenici	Lugar	Wallop
Durkin	McClellan	Young
Ford	McClure	Zorinsky
Garn	Metcalf	

NOT VOTING—23

Bartlett	Hart	Packwood
Bayh	Haskell	Roth
Bentsen	Hathaway	Sarbanes
Biden	Hollings	Stennis
Brooke	Huddleston	Talmadge
Curtis	Magnuson	Tower
DeConcini	Moynihan	Weicker
Eastland	Nunn	

So the motion to table the motion to proceed was rejected.

Mr. SCOTT. Mr. President, I rise in

support of the motion of the distinguished Senator from Alabama and in support of the resolution that he would call before the Senate.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield, with the understanding that he not lose his right to the floor, for the purpose only of my making a unanimous-consent request that has nothing to do with this matter?

Mr. SCOTT. I am glad to yield.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR TIME LIMITATION ON ROLLCALL VOTES DURING REMAINDER OF 95TH CONGRESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a time limitation on any rollcall vote during the remainder of the 95th Congress of 15 minutes, with the warning bell to be sounded at the midway point—to wit, at the beginning of the last 7½ minutes.

Mr. SCOTT. Mr. President, reserving the right to object, and I am not going to object, I believe that in the past Congress there was a warning bell at a different time. What was the practice? Was it at 10 minutes that we had the warning bell?

Mr. ROBERT C. BYRD. The warning bell sounded at the midway point.

Mr. ALLEN. Mr. President, reserving the right to object, and I shall not object, this question came up during the last Congress, I believe, or possibly the Congress before—that because there had been a slight delay in sounding the warning bell, more than 15 minutes should be allowed for the consummation of the vote. I believe that request was made by one of the Senators and that argument was made.

Could there be an understanding, by unanimous consent, that irrespective of the failure of the clerk to sound the warning bell on time, it would not extend the 15 minutes?

Mr. ROBERT C. BYRD. Mr. President, the Clerk of the Senate is directed to sound that warning bell at the midway point. There are two clerks there, and surely one of them can watch a time watch and see that that is done.

What the Senator has said is pertinent, and what I am saying in return is not in denigration of what he is saying. I am simply saying it is the responsibility of one of those clerks to sound that bell at the midway point so that all Senators know that when that bell sounds they have 7½ minutes to get to the floor.

Mr. ALLEN. Yes. I am not being critical. I just want it understood that if the clerk failed to sound the warning bell until 8½ minutes of the 15 minutes had expired would that extend the 15 minutes. That is what the Senator from Alabama wants to know.

Mr. ROBERT C. BYRD. Well, I think if the clerk fails—and if he fails, may I say, he is going to get some heat——

Mr. ALLEN. I understand that.

Mr. ROBERT C. BYRD. But if he fails and that bell sounds at 8½ minutes after the rollcall begins, I do not think Senators should be penalized for that 1 minute. I think they ought to have the understanding, ought to be able to proceed on the understanding, that when that midway bell sounds they have 7½ minutes to get here.

Mr. ALLEN. In other words, we are not talking about a limit of 15 minutes; we are talking about 7½ minutes after the warning bell sounds; is that correct?

Mr. ROBERT C. BYRD. We are talking about a limit of 15 minutes. In our own caucus only a day or so ago, the leadership was instructed to ask for the regular order when those 15 minutes are up, and it is my intention to follow the direction of the caucus in that regard.

The PRESIDING OFFICER. The Chair is advised by the clerks that the use of the first vote bell automatically triggers the midway bells. It is an automatic situation.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. BUMPERS. Mr. President, reserving the right to object, will the distinguished majority leader consider amending the request also to provide that when the rollcalls are less than 15 minutes by unanimous consent the 7½ minute warning will be sounded 7½ minutes prior to the expiration of that period?

Mr. ROBERT C. BYRD. I will. That was the reason why I so worded my response a moment ago that the midway bell not sound after the first 7½ minutes but that the midway bell sound just prior to the beginning of the last 7½ minutes. That is what I had in mind.

I thought that all Senators should understand that when that midway bell sounds, whether it is a 10-minute vote or a 15-minute vote, they have 7½ minutes to get to the floor, and I include that in my request, as the distinguished Senator from Arkansas has suggested, to wit, if and when the Senate, by unanimous consent, orders a rollcall vote to be 10 minutes in length only that the warning bell be sounded at the beginning of the last 7½ minutes.

Mr. BUMPERS. I thank the Senator.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the Senator.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. ROBERT C. BYRD. May I impose on the Senator's courtesy once again?

Mr. SCOTT. Without losing my right to the floor.

Mr. ROBERT C. BYRD. Mr. President, I am under instructions from my side of the aisle to ask for the regular order when the 15 minutes are up, and when I am not here someone else in the leadership on this side of the aisle is instructed to do that.

Now, of course, if there is a Senator in the well, a Senator comes in the door and is seeking recognition, he is entitled to that recognition even if the 15 minutes are up, and I will do everything I can to protect his rights whether he is on my side of the aisle or the other. But I would hope all Senators do get this message clearly that when the 15 minutes are up the call for the regular order can be made by any Senator. As far as I am concerned, the leadership on this side of the aisle has instructions to do that. I thank the Senator for his courtesy.

Mr. BAKER. Mr. President, will the Senator yield 30 seconds?

Mr. SCOTT. Without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thoroughly concur and agree that we ought to have the regular order after 15 minutes. There will be no objection on my side to that, and I will be happy to do that in concert with the majority leader.

I urge that we always do it so that there is no question about it, so that at the end of 15 minutes the regular order will be to recognize those Senators in the Chamber attempting to vote or clearly making an effort to vote, but other than that that the rollcall ends. I thank the Senator.

Mr. ROBERT C. BYRD. I thank the Senator.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. SCOTT. Commenting briefly on what has been said by the majority leader and the minority leader, there are times when a Senator is passing on his way over here and passes one of the police officers, and they call and say, "A Senator is on his way."

I hope that the leadership on both sides of the aisle, if it is just a matter of a minute, might accommodate a Senator under those circumstances. I am merely expressing a hope that that might be followed. It happened to me this morning.

Mr. ROBERT C. BYRD. Mr. President, may I say to the distinguished Senator that was not included in the instructions given to me by my caucus. If we start to do that, if we start to accommodate one Senator in that regard—and I personally would love to do it in the interest of that Senator—however, in the interest of the other 99 Senators and in the interest of the Senate which, I think, supervenes my interest in accommodating a Senator, we ought to stick to the rule if we are going to have it, and apply it without fear or favor. If it catches me it just catches me.

Mr. SCOTT. It might be that the distinguished majority leader might bring the matter before his caucus again, because I am not speaking on my behalf but collectively the 100 individual Senators do constitute the Senate.

PARDON OF VIETNAM ERA DRAFT EVADERS

The Senate continued with the consideration of the motion to proceed to consider the resolution (S. Res. 18) to express the sense of the Senate in opposition to a general Presidential pardon by proclamation of Executive order of Vietnam-era draft evaders, and for other purposes.

Mr. SCOTT. Mr. President, we do not know when our country will again face a national emergency on the scale of a major war. We know only that such tragedies have been all too frequent in the past. In wartime crisis, however, the American people have responded to their

Nation's needs. Not all served in uniform, but the vast majority of Americans joined together to provide for the common defense as best they could. The American system derives its strength from the freedom, diversity, and industry of its people, and not from efforts to place every citizen in uniform. For that reason, we can be proud that our system has the physical and moral strength to accept religious and conscientious objectors and to provide a means by which these citizens can also contribute to the common good in time of war.

There have, however, been some who, when unable to obtain exemption or alternative service under the draft laws, have gone into hiding or fled their country in order to avoid induction into the military. Even under the liberal selective service laws of the Vietnam era, there were those who would neither serve nor accept the legal consequences of their failure to show adequate cause why they should not serve. The causes of draft evasion are many, but, fortunately, the actual number of draft evaders was not great. The unity which our Nation displays during times of national emergency and the severe moral and legal sanctions which all nations apply to those who abandon their fellow citizens in time of war have served to keep draft evasion and similar crimes to a minimum.

Legislation which makes draft evasion a crime is not designed to obtain vengeance against those who dodged the draft. It is meant to help deter the act of draft evasion.

Mr. President, I call the Senator's attention to the next to the last paragraph in the preamble of the resolution of the distinguished Senator from Alabama, Senate Resolution 18, and it reads this way:

> Whereas a blanket Presidential pardon for Vietnam era draft evaders, deserters, or military law violators could have dire effect on military morale and discipline and might tend to hamper future defense efforts;

Mr. President, as I understand it, all of our criminal laws are premised on that basis. We are not trying to be punitive, to extract punishment from an individual citizen. I do not believe that the Members of the Senate desire to punish these individuals. I would like to think that we can be forgiving, but at the same time we have to think about the future of this country.

Suppose all of those who failed to observe the laws are pardoned and a blanket pardon is extended to them. What will happen the next time a similar situation arises? Will the individual citizen decide for himself whether it is a just war? Will the individual citizen decide for himself whether or not he should obey the call of his country, whether he should obey whatever means are ordered in the statute as enacted by Congress?

I believe that the adoption of this resolution, if it should be persuasive on the President-elect, if the general pardon is not granted in the future when similar situations arise the individual that is subject to the draft laws will think about the punishment that can be extracted from him if he does not obey the law, and I would hope that we are looking to the future and to the future welfare of the country and our ability to obtain whatever forces may be necessary to defend the country in the years to come.

While humanitarian considerations have moved past Presidents to grant pardon or amnesty for draft evasion, this has usually been done on an individual basis. In each case where a pardon has been granted on other than an individual basis, a major concession was required from the draft evader himself—an oath, alternative service, even jail. President Ford continued this practice by establishing the Clemency Review Board to weigh the merits of the individual cases. I think he was quite lenient in what he did. He did this where draft violators from the Vietnam war era applied for clemency. This limited amnesty program may have served the interests of justice because it is selective. Rather than group draft evaders and putting them into a single category, the clemency board judges whether each individual who has made the decision to apply for clemency sincerely desires to become in good standing as a citizen once again. Not only was it an effort to serve justice, but those persons considering draft evasion in the future will see that they cannot simply sit out the war and wait for forgiveness later. They will see that their conduct will be judged no mater how long they wait. And this consideration will amplify the deterrent effect of our Nation's laws against draft evasion.

Mr. President, President-elect Carter has indicated that he will issue some form of Presidential pardon to all draft evaders from the Vietnam war era. He has said that this will be done as one of his first official acts as President. Certainly, he has the power and authority under article II, section 2 of the Constitution, to do this. However, this is a power that in my opinion, should be used with caution, and I expect that Governor Carter is carefully considering the positive and negative aspects of the statement on pardoning draft violators that he made during the heat of the recent political campaign.

Many Virginians have done more than write to their Congressmen, and I am sure that many of us have received letters on this. A group in Norfolk, Va., have circulated a petition against a blanket pardon. They have gathered thousands of signatures which they hope to present to President-elect Carter. In Virginia Beach, which is near Norfolk, adjoining Norfolk, a former prisoner of war in Vietnam left his military decorations for heroism on the tombstone of a World War I veteran to show his opposition to blanket amnesty. He said he was disillusioned and he felt that the values that he was taught as a child were no longer held in esteem by many Americans. These Virginians recognized the injustice of what the President-elect has indicated that he proposes to do.

A blanket pardon will certainly be unjust to those who overcame their own fears and their own reservations to serve loyally in the Armed Forces of the country. Making the decision to risk one's life in a far-away land for complex reasons is not easy. Some men made the decision not to serve and to take the consequences for their decision. Many others took their cases to the courts, made the best argument that they could and when they lost they foreswore any chance to jump bail and flee. They earned the respect of many people, even those who disagreed with their actions, for standing up for the principles they believed in and accepting the consequences.

They promoted what they believed to be a higher law and at the same time did not undermine the deterrent effects of our laws. A blanket pardon for draft violators would say to these men:

> Don't respect your Nation's laws. Don't even stand up for your own principles. Do the smart thing and hide until the problem goes away.

Mr. President, there is no doubt that there are many draft violators who believe that they have been wronged by society and that they themselves have done no wrong. These draft evaders have made this clear by their refusal to take part in programs sponsored by the Clemency Review Board. Many claim access to a political or moral superiority which exempts them from having to obey the country's law, and they demand recognition of this. Many draft violators see a blanket amnesty or a blanket pardon not as a humanitarian act, but as the symbolic submission of this Nation, our Government, and people to the philosophy of these expatriates. I think we should not submit. We must stand by the laws of the country and by the principles we believe in, not because they are ours, but because we have struggled over the years to make them just.

Mr. President, the thrust of my argument here is that we should consider the resolution of the distinguished Senator from Alabama. We should pass the resolution, expressing the views of the Senate against the granting of blanket amnesty, and in my opinion it is in the interest of the Nation that we not have blanket pardon even though this is a decision to be made by the President now in office or the President-elect when he assumes office.

Mr. President, I yield to the Senator from California.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. HAYAKAWA. Mr. President, I wish to speak in support of Senate Resolution 18. But I wish to speak from the point of view of a conscientious objector, who could not and would not take part in combat, since the shedding of blood is contrary to his moral principles. Many of these conscientious objectors served as medical corpsmen, to rescue the wounded and the maimed, to gather up the remains of the dead. They performed this humane service even in the midst of combat, at as much risk—often at greater risk—to their lives and safety as the infantrymen—and many were wounded and killed.

I also wish to speak from the point of view of those who served prison terms, because they would accept neither combatant nor noncombatant service in a

war—because any kind of participation in a war would have been contrary to their own moral principles. However much these people disagreed with the decision of the Government to wage a war, they acknowledged the authority of their Government; and in refusing to participate in war, they nevertheless accepted, in sorrow but with dignity, the penalties for their refusal.

I believe that a blanket amnesty would be an affront not only to those who served and bled and died in the war, but also to those who refused to fight, but nevertheless remained good citizens—indeed exemplary citizens—in that they found ways both of obeying the dictates of their conscience and of acknowledging the legitimate and legal demands of their Government in time of war.

In the interest of justice both to those who fought and to those who honorably refused to fight, but accepted the consequences of that refusal, I respectfully urge the support of Senate Resolution 18.

The PRESIDING OFFICER. The question is on agreeing to the motion to proceed to the consideration of Senate Resolution 18.

Mr. CRANSTON. Mr. President, what motion was that?

The PRESIDING OFFICER. The motion to proceed with Senate Resolution 18.

The question is on agreeing to the motion.

Mr. CRANSTON. Mr. President, I think there should be an opportunity for a rollcall vote on this matter. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. CRANSTON. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. DURKIN. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. CRANSTON. I was going to ask for the yeas and nays.

The PRESIDING OFFICER. The clerk will continue.

The call of the roll was continued.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, will the Senator yield for the purpose of my asking for the yeas and nays?

Mr. THURMOND. I yield for that purpose.

Mr. CRANSTON. I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. THURMOND. Mr. President, I rise in support of Senate Resolution 18 which advises President-elect Jimmy Carter that it is the sense of the Senate he would be ill advised to grant a general amnesty.

It has always been my position that individuals who refuse military service or desert from military service should be dealt with on a case-by-case basis.

Mr. President, there are a number of reasons as to why I support this resolution urging President-elect Carter not to give a general amnesty to draft evaders and deserters.

First, these individuals chose to violate the law rather than serve honorably in the Armed Forces during the Vietnam war. They should not be exempted from the responsibilities of their action.

Second, a general amnesty represents a rebuke to those who served, suffered, and died in Vietnam. Some of those who served did so unwillingly and without commitment, yet despite their reservations, they recognized an obligation to their Government.

Third, the granting of a general amnesty greatly weakens future Presidents when they find it necessary to commit U.S. troops to combat. The morale of our current forces is damaged and the potential for future defections in a time of emergency is increased.

Fourth, President-elect Carter should realize that for each of the approximately 32,000 deserters and 14,000 draft evaders, some other individual had to step forward and serve in their place. Many of these individuals may today be lying in veterans' hospitals, among the missing in action, or buried in the cemeteries of this Nation.

Mr. President, I have some additional statements with me. I have one by the commander of the American Legion, the largest veterans' organization in the world, which I would like to present to the Senate at this time. This is a statement that he made:

The following is the statement which I have sent to President-elect Carter today regarding his proposed pardon for draft evaders and military deserters and those receiving less than honorable discharges:

The American Legion and the American Legion Auxiliary vehemently protest and unalterably oppose your proposed pardon/amnesty plan for draft evaders, military deserters and those receiving less than honorable discharges during the Vietnam period. We continue to urge that each case be judged on an individual basis through the existing judicial and administrative channels currently open to those individuals.

The American Legion reaffirms its belief in the fairness and compassion of the American judicial system. The proposed blanket amnesty would insult the vast majority of Americans who served honorably during the Vietnam period. Moreover, a pardon could have serious effects on our already lagging, all-volunteer force and will raise serious questions about military service for our people in the event of a future national emergency.

We submit that, rather than healing wounds, the proposed action will prove a divisive influence.

The following is his statement to the State commanders:

I am personally asking each of you to individually and collectively mobilize the membership of your Department to advise President-elect Carter and your elected representatives of our strong and unwavering opposition to any pardon.

Then he goes on and outlines a procedure for the Legion to help to stop this.

Mr. President, I have a resolution which was passed by the American Legion on August 26–26, 1976, when it met at Seattle, Wash. This is resolution No. 434 by the national security committee of the Legion. The subject is draft evaders and/or deserters:

FIFTY-EIGHTH NATIONAL CONVENTION OF THE AMERICAN LEGION, SEATTLE, WASH., AUGUST 24–26, 1976

Resolution 434.

Committee: National Security.

Subject: Draft evaders and/or deserters.

Whereas, young men throughout the history of the United States have patriotically answered the call of their country and defended its lands and ideals; and

Whereas, hundreds of thousands of these young men volunteered for, or accepted, duty in Vietnam and served with honor and distinction; and

Whereas, thousands of these young men lost their lives, or were gravely wounded; and

Whereas, thousands were captured by the enemy and were imprisoned and/or tortured for long periods of time; and

Whereas, the question of amnesty for those who have fled the country to avoid induction into the Armed Services, or have deserted their assigned military units to avoid military obligation during the Vietnam conflict has been again raised; now, therefore, be it

Resolved, by The American Legion in National Convention assembled in Seattle, Washington, August 24–26, 1976, that we reaffirm our opposition to general amnesty for draft evaders, draft dodgers and military deserters and urge that each case be tried on an individual basis, and each deserter be dealt with as prescribed by the Uniform Code of Military Justice; and, be it further

Resolved, that we urge the United States Government and its courts of justice to prosecute to the full extent of the law, all individuals charged with evading the military draft; and, be it further

Resolved, that all members of The American Legion are urged to publicize our stand on draft evaders, deserters and blanket amnesty.

Mr. President, the Veterans of Foreign Wars also passed a resolution on this subject. The VFW resolution is numbered 401, entitled "No Amnesty or Pardon."

RESOLUTION NO. 401: NO AMNESTY OR PARDON

Whereas, two and one half million American citizens were called upon and honorably served in Vietnam at their country's bidding; and

Whereas, in so doing, 56,234 were killed; 303,000 wounded; over 600 were incarcerated in enemy prison camps; nearly 1,100 are still missing in action, and many returned home to rebuild a life of peace and opportunity for themselves and their families and took their fully earned place in the land for which they fought; and

Whereas, while the overwhelming majority of our men served with courage and honor, others who also had been called upon to serve avoided their responsibilities, and abandoned their country by fleeing outside its borders or going underground; and

Whereas, others, while serving in the military, chose to desert rather than discharge their sworn obligations; and

Whereas, to grant "amnesty" or "pardon" to those draft dodgers and military deserters who violated civil and military laws without penalty would be a gross miscarriage of our judicial system, to the sacrifices made by those who served and are still serving, their

families, POWs-MIAs, and to the United States of America; and

Whereas, the "Clemency" program announced by President Ford at the 75th National Convention of the Veterans of Foreign Wars of the United States finally drew to an unmourned close on September 15, 1975, with the overwhelming majority of draft dodger eligibles turning their backs on the President's unwise—albeit decently-motivated—effort, preferring clearly to await their "vindication" by a Congressional grant of unconditional "amnesty" or "pardon;" and

Whereas, we fully and completely reject the fallacious notion that only those calling for "amnesty" or "pardon" have "compassion," our compassion being reserved for those who fought and their families; now, therefore

Be it resolved, by the 77th National Convention of the Veterans of Foreign Wars of the United States, that we sustain total opposition to both unconditional and conditional "amnesty" or "pardon" for draft dodgers and military deserters; and

Be it further resolved, that we cannot and will not advocate support of any political party or candidate proposing to grant "amnesty" or "pardon" to those refusing to serve in our nation's Armed Forces at a time when other loyal citizens were dying in conflict with our nation's enemies; and

Be it further resolved, that the Veterans of Foreign Wars of the United States, continues our total commitment to pursue the "Amnesty Never" doctrine through our membership to the Congress and to the American people and to be firm in our stand never to relinquish, dilute or compromise this position.

Mr. President, this resolution was adopted at the 77th National Convention of the Veterans of Foreign Wars of the United States held in New York, N.Y., on August 13 through 20, 1976.

Mr. President, I have a VFW memorandum that was put out to the national officers and National Council of Administration, past commanders in chief, department commanders, department adjutants, department publications, and PRO's, from R. D. "Bulldog" Smith, commander in chief, Veterans of Foreign Wars of the United States, dated September 1, 1976:

1. During my acceptance remarks in New York City on August 20, I included the following statements:

"Some say that 'amnesty' will 'bind up the country's wounds.' I say that it would be a mass precedent for desertion and draft dodging and we will never stand for it; and no candidate for political office at any level should forget this for one moment.

"And I specifically include those who call for a Presidential 'pardon.' Changing the word 'amnesty' to the word 'pardon' doesn't fool us for one moment—and I don't believe it will fool the American people."

2. I read where my fellow Georgian, Governor Jimmy Carter, made a speech and included the following:

"I do not favor a blanket amnesty, but for those who violated Selective Service laws, I intend to grant a blanket pardon.

"To me there is a difference. Amnesty means that what you did is right. A pardon means that what you did—right or wrong—is forgiven. So, pardon—yes, amnesty—no.

"It is time for the damage, hatred and divisiveness of the Vietnam War to be over. The cases of deserters from the Armed Forces should be handled individually, in accordance with our nation's system of military justice.

"While all Americans may not be able to agree about whether the nation ever should have been involved in Vietnam, we can now agree to respect those differences and to forget them.

"We must bind up our wounds. We simply cannot afford to let them fester any longer. The world is too dangerous. We cannot remain distracted from what must be our overriding aim. Attention must turn to rebuilding the military, economic and spiritual foundations of a peaceful world order."

3. Governor Carter is as wrong as he can be. My reasons follow.

(a) We should all hate war; we must always honor those we call upon to be our warriors.

(b) The semantical shading between "pardon" (forgiveness) and "amnesty" (forgetfulness) is of no consequence. What is of consequence is that a blanket pardon will gratuitously open up wounds, while a deliberate case-by-case review would bespeak confidence in the fairness and compassion of our on-going system of justice.

(c) The great majority of the next of kin of the 56,234 KIA, 303,000 WIAs, and the 591 returned POWs will be insulted by a step which implies that sacrifices made in a lost cause we could have won (but wouldn't) were not only pointless; they were stupid.

(d) Hundreds of Americans are still—three and one half years after Vietnam—carried on the rolls of their services as MIA.

What must their families think of Governor Carter's priorities?

(e) Of the more than 600,000 draftees who served in Vietnam, 11,500 were killed and 60,000 were wounded. Now, the names of these 71,500 draftee casualties—again I'm talking just of our draftees—would be far different if those called by the country had met the first test of citizenship.

(f) Mr. Carter's proposal is both a mass burial of due process and an irrevocable precedent for future mass defections—possibly during his Presidency. He seems to be saying to our all volunteer forces, if you volunteered in, you can volunteer out.

(g) No American can expect "full customer choice" on the wars he chooses to support.

We all should neither expect more, nor settle for less, than our fair day in court.

I will carefully consider the possibility of calling for a mass demonstration of V.F.W. members, and members of like-minded groups, should Governor Carter's foolish statements on a "blanket pardon" for draft dodgers appear likely to be implemented.

Together we will make it!

Sincerely,

R. D. "Bulldog" Smith, Jr.,
Commander in Chief.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield for a moment?

Mr. THURMOND. Mr. President, I shall be pleased to yield to the distinguished majority leader without losing my rights to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR U.S. SECRET SERVICE TO CONTINUE TO FURNISH PROTECTION TO CERTAIN FORMER FEDERAL OFFICIALS OR MEMBERS OF THEIR FAMILIES

Mr. ROBERT C. BYRD. Mr. President, the present law with respect to the extension of Secret Service protection to certain Government officials after they leave office extends Secret Service protection to former Presidents, their wives, and their children under the age of 18. However, such protection may not be granted by a President to any former Government official. I am going to introduce a resolution, cosponsored by Mr. Baker and myself, to allow President Carter to extend Secret Service protection, if he feels it is necessary, to those Government officials now protected, but who would lose such protection on January 20, 1977. At the present time, the President and his family, the Vice President and his family, the Secretary of State and his family, and the Secretary of the Treasury and his family are receiving protective service.

All, as I have indicated, except the President and Mrs. Ford, will no longer be protected after January 20, 1977. Under the present law, the President has no authority to extend protection to any of those persons after January 20, 1977, even if he feels that there is a significant danger to their lives.

The resolution jointly introduced by the majority and minority leaders would provide authorization which would expire on July 20, 1977. It is a 6-month emergency situation authorization measure only. During that time, Congress may consider whether it wishes to grant such authority to a President on a permanent basis. In the meantime, President Ford feels that there is a significant danger to the life of Secretary of State Kissinger that such authorization is needed. This resolution has been cleared by me with Senator Long, chairman of the Senate Committee on Finance, for immediate consideration by the Senate, and I shall urge its passage.

I know that the distinguished Republican leader will have some comments. He knows of the resolution, he is a cosponsor of it. He may wish to make his comments now or he may wish to wait until the clerk states the contents of the resolution, whichever my colleague prefers.

Mr. BAKER. Mr. President, if the Senator will yield, it will not take more than a moment to put this in.

Mr. THURMOND. I yield to the distinguished minority leader, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I am a cosponsor of this resolution. I feel it is a matter that requires our immediate attention. I met this morning, as did the distinguished majority leader and bipartisan leaders of both Houses, with the President and representatives of the Secret Service. I am convinced that it is a matter that should be dealt with promptly.

I might say for the record, Mr. President, that Secretary Kissinger himself has not asked for this relief. It was suggested by the President, I understand, on the recommendation of the Secret Service. It leaves to the incoming President of the United States, President-elect Carter, the full discretion that I think a President should have in this respect. I think the resolution is appropriate for the circumstances and I am pleased to be a cosponsor.

Mr. ROBERT C. BYRD. Mr. President, I have now sent the resolution to the desk. I ask unanimous consent that it be stated by the clerk and that the Senate proceed immediately to consider the resolution.

Mr. ALLEN. Reserving the right to object, I do not plan to object.

Will the resolution be stated?

Mr. ROBERT C. BYRD. Yes; I asked that the clerk state the resolution.

The ACTING PRESIDENT pro tempore (Mr. DECONCINI). The joint resolution will be stated.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 12) to authorize the United States Secret Service to continue to furnish protection to certain former Federal officials or members of their immediate families.

Mr. ALLEN. Mr. President, reserving the right to object, and I shall not object, I ask the distinguished majority leader how many Secret Service agents per family would be employed and at what expense to the Treasury?

Mr. ROBERT C. BYRD. I cannot answer that. I cannot answer either of the questions, I say to the distinguished Senator from Alabama.

Mr. ALLEN. Does the Senator not think that is material?

Mr. ROBERT C. BYRD. It is a very pertinent question. I will be glad to see that such information is printed in the RECORD. I will make every attempt to procure that today so that that information will be in the RECORD in response to the Senator's question.

Mr. ALLEN. But that would be after the fact.

Mr. ROBERT C. BYRD. That would be after the fact, yes.

It may be possible for us to get that information now before we act on the resolution, if the Senator would like.

Mr. ALLEN. I will not object, if the Senator will follow that procedure.

Mr. ROBERT C. BYRD. I will certainly make every effort to do so. I have already instructed an aide to get that information.

Mr. ALLEN. I thank the Senator.

Mr. ROBERT C. BYRD. Mr. President, if the Senator will further indulge me, I send to the desk a communication from the President of the United States in connection with this resolution and I ask that it be stated by the clerk in its entirety.

The PRESIDING OFFICER. The communication will be stated.

The assistant legislative clerk read as follows:

THE WHITE HOUSE,
Washington, January 14, 1977.

Hon. NELSON A. ROCKEFELLER,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: I am transmitting for consideration by the Congress an urgent Joint Resolution which would authorize the Secret Service to furnish protection to a person who as a Federal Government official or as a member of such official's immediate family had been receiving protection for a period immediately preceding January 20, 1977, if the President determined that such person may thereafter be in significant danger. This protection could not continue beyond July 20, 1977, unless otherwise permitted by law.

The lives of the Vice President, the Secretary of State, and other Federal officials have been threatened because of their service to the United States and the American people. The number of threats against prominent Federal officials normally declines after they leave office. The emergence in recent years of numerous and mobile foreign terrorist groups has created an added degree of risk, especially for the Vice President and the Secretary of State; they are natural targets for individuals and groups prone to violence. Threats against Secretary Kissinger's life are current and continuing.

We cannot in good conscience subject any departing Vice President, Secretary of State, or any other Federal official to possible harm because of his or her service to the United States. Because this danger results directly from the high visibility of their positions, I believe that the Federal Government has an obligation to provide them and their immediate families, if necessary, with protection as long as there is significant danger to their lives.

Existing statutory authority is not adequate for this purpose. Consequently, unless the Congress acts immediately, protective services necessary to ensure the continued safety of the Vice President, the Secretary of State, and other Federal officials cannot be provided after they leave office on January 20.

The emergency resolution that I am proposing is a temporary measure. It would allow the next President to extend protection, if the situation warrants, to one or more of the persons having protection now who would otherwise abruptly lose that protection next Thursday. The persons now having protection, in addition to me and my immediate family (of whom Betty and I, but not our children, will have continued protection under existing law) are the Vice President and the Secretaries of State and Treasury and their immediate families, but it is likely that only a few of those persons will require extended protection after next Thursday and for merely limited periods as the next President may determine. In any event no such protection could go beyond July 20, 1977 unless the Congress should act later to permit protection over a longer period in particular instances.

The adoption of this proposed resolution is endorsed by the Secret Service, and I request that the Congress act swiftly on this proposal.

Sincerely,

GERALD R. FORD.

Mr. ROBERT C. BYRD. Mr. President, both the distinguished Republican leader and I are attempting to seek to secure the information in response to the distinguished Senator from Alabama. I believe the distinguished Republican leader has just completed discussing this matter with the Senator. Perhaps the Republican leader would like to speak.

Mr. BAKER. Will the Senator yield under the same circumstances?

Mr. THURMOND. I yield under the same conditions.

Mr. BAKER. Mr. President, I tried just now to ascertain on the phone the two items the Senator from Alabama requested. I am sure I can have those items and numbers very shortly.

I conveyed that information to the Senator from Alabama. It is my understanding that he indicated on that basis he would not object to our proceeding with the immediate consideration of the resolution at this time.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Alabama.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration, and, without objection, the joint resolution will be considered to have been read the second time at length.

The joint resolution (S.J. Res. 12) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S.J. RES. 12

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States Secret Service, in addition to other duties now provided by law, is authorized to furnish protection to a person who (a) as a Federal Government official has been receiving protection by the United States Secret Service for a period immediately preceding January 20, 1977, or (b) as a member of such official's immediate family has been receiving protection by either the United States Secret Service or other security personnel of the official's department immediately preceding January 20, 1977, if the President determines that such person may thereafter be in significant danger: *Provided, however,* That protection of any such person shall continue only for such period as the President determines and shall not continue beyond July 20, 1977, unless otherwise permitted by law.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I thank my friend from South Carolina for his courtesy.

The PRESIDING OFFICER. The Senator from South Carolina.

PARDON OF VIETNAM ERA DRAFT EVADERS

The Senate continued with the consideration of the motion to proceed to consider the resolution (S. Res. 18) to express the sense of the Senate in opposition to a general Presidential pardon by proclamation of Executive order of Vietnam era draft evaders, and for other purposes.

Mr. THURMOND. Mr. President, an editorial appeared in the Aiken Standard—that is a newspaper in my home county of Aiken—which I think brought out some good points on this subject, entitled "Problems of Pardon Multiply."

Last August, Jimmy Carter aroused hostile reactions in an American Legion audience when he announced he would grant a blanket pardon to Vietnam draft resisters if he became president. He took pains to point out what he saw as a difference between pardon and amnesty—the former implying forgiveness for having done wrong, the latter implying that no wrong had been done.

It now develops that Mr. Carter may have to qualify the term "blanket" as well. He has told reporters that he had not been aware during the campaign that there were different categories of young men who violated the Selective Service laws. He acknowledged this has raised problems in drafting a proclamation of pardon that would be one of his first official acts as president.

Mr. Carter has encountered the difficulty that has always surrounded the proposals to clear the books of this aspect of the Vietnam war. Some young men failed to obey the draft laws out of ignorance, others out of fear, others out of a desire to protest, others from a conviction of conscience. There are varying degrees of guilt or responsibility

among their cases. An all-inclusive pardon could create injustice by lumping them all together.

That's the problem Mr. Carter created for himself with his campaign promise. He told the Legionnaires in August that his aim was to end the damage and divisiveness that lingers from the Vietnam war. We hope that in fulfilling his promise he can manage to avoid creating more of the same from the way his pardon is applied.

Mr. President, another editorial which I think is of great interest appeared in the Augusta Chronicle, entitled " 'No' to Pardon" on December 22, 1976.

Another article of great interest which appeared is by Pat Buchanan, entitled "If There Is No Reward for Loyal Service . . .," which appeared in the Arizona Republic on December 28, 1976.

Another article appeared in the New York Daily News, entitled "Why the Veterans of Foreign Wars of the United States Will Never Agree to a Blanket Pardon of Draft Dodgers or Military Deserters," by R. D. "Bulldog" Smith, national commander in chief, VFW.

Also, I have a news release by the VFW, entitled "VFW Leader Hits Alaska Judge's 'Playboy' Desertion on Draft Dodgers."

In order to save time, I ask unanimous consent that this material be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Augusta, (Ga.) Chronicle, Dec. 22, 1976]

"No" TO PARDON

If President-elect Jimmy Carter was surprised to see a letter to him signed by 106 members of the Congress asking that he reconsider his pledge to pardon all Vietnam-era draft dodgers, he shouldn't have been.

There is a large bloc of bipartisan sentiment in this country (as evidenced by the fact that 39 Democrats signed the letter to the incoming Democratic President) firmly against such a pardon. As Rep. G. V. (Sonny) Montgomery (D-Miss.) states, there are a great many Americans who are also concerned "about the problems which might arise regarding those who did serve and received less than an honorable discharge." Congressman Montgomery notes that Mr. Carter is under heavy pressure from the left-wing of his party to issue an even broader pardon that would cover groups such as military deserters.

If President-elect Carter fulfills his pledge to issue a blanket pardon a week after he takes office, look at the precedent that would be set:

In some future emergency, any person who simply doesn't choose to risk his life when his country calls would, as a matter of course, remember that the law was virtually nullified by Mr. Carter. Who could blame him for thinking that he need pay no heed to possible future Selective Service obligations, reasoning that if it meant nothing during the Vietnam conflict, it could never mean anything again?

And, when the implications are further extended, who could be surprised if amnesty for draft dodgers and possibly even deserters led to a great increase in law violations of all kinds, encouraged by the conclusion that law as such is a flexible, meaningless thing that can be bent at will by a President?

For Mr. Carter to grant an "easy out" to draft dodgers would be equivalent to dismissing indictments against persons who violated any other law with which they did not agree.

Time hasn't cleansed them of their guilt, nor has the blood of those who met their responsibility washed away the culpability of those who evaded it.

We hope Mr. Carter takes the advice of the 106 congressmen.

[From the Arizona Republic, Dec. 28, 1976]

IF THERE IS NO REWARD FOR LOYAL SERVICE . . .

(By Pat Buchanan)

WASHINGTON.—The nation might be spared a miscarriage of justice if someone will pony up $15 to buy Charles Kirbo, Jimmy Carter's eminence grise, a Christmas book, new on the market.

Authored by John Hubbell, published by Reader's Digest Press, the book is titled "P.O.W."; its subtitle: A Definitive History of the American Prisoner-of-War Experience in Vietnam, 1964–1973.

It is the story of the almost uninterrupted heroism of the American prisoners of war who came home in 1973 from their hellholes in North Vietnam. Not only should it be on the shelves of the nation's military academies, it should be required reading for every high school student in America.

Whatever one believes about Vietnam, the next generation ought to know that within the present U.S. officer corps there is a band of heroes without equal in their country's history.

Kirbo needs to give the book special attention. For, thus far, he has failed to answer the public request of Air Force Colonel George E. (Bud) Day for a meeting to discuss the issues of amnesty for the Vietnam draft dodgers and deserters, and elevating to "honorable" all the "dishonorable" discharges given during the Vietnam era.

Tortured by the Communists until he was permanently crippled, Colonel Day is one of two living ex-POWs to have received the Congressional Medal of Honor for "conspicuous gallantry and intrepidity at the risk of his life above and beyond the call of duty." (The other is Navy Rear Admiral James B. Stockdale.)

While Kirbo has yet to find time in his busy schedule for Colonel Day, he has found ample time to meet with a pro-amnesty delegation featuring former POW Edison W. Miller.

According to this book, ex-Colonel Miller was the closest thing to a Communist collaborator in the North Vietnamese camps. Kirbo might find this passage from the book's epilogue instructive:

"As the senior Navy returnee, Rear Adm. James B. Stockdale filed charges against . . . Marine Colonel Edison W. Miller. The charges included mutiny, aiding the enemy, conspiracy, soliciting other prisoners to violate the Code of Conduct, and causing or attempting to cause insubordination and disloyalty."

Then-Secretary of the Navy John Warner "found merit in Stockdale's charges." He "issued a letter of censure to Miller, charging him with failing to meet the standards expected of officers of the Armed Forces of the United States. He also announced that the officer should be retired 'in the best interests of the naval service.' "

If former officers like Miller have access to Kirbo, while Vietnam heroes like Day cannot get a hearing, it says something about the incoming administration that is not a little disturbing.

Before Kirbo makes his recommendation to Jimmy Carter on amnesty and pardons, he ought to go to the back of the book "P.O.W." and find and read the respective references to Colonel Day and ex-Colonel Miller. And he might answer in his own mind the question publicly put by Colonel Day:

"If there is no reward for loyal service or sanctions against those who disobey orders in uniform, how can we expect high standards of performance in future military conflicts?" How indeed, Mr. Kirbo?

It is not justice to place on an equal plane those who served honorably with those severed from the services under conditions other than honorable. It is not right to treat equally those who fought with those who ran away.

If Carter, at Kirbo's urging, does grant amnesty to the draft dodgers and deserters as well, if he decides to upgrade to honorable all the "dishonorable discharges" given during the Vietnam War—we ought to fly the American flag upside down, at half mast, when the slugs come marching home.

WHY THE VETERANS OF FOREIGN WARS OF THE UNITED STATES WILL NEVER AGREE TO A BLANKET PARDON OF DRAFT DODGERS OR MILITARY DESERTERS

(By R. D. "Bulldog" Smith National Commander-in-Chief, VFW)

The 1.8 million members of the Veterans of Foreign Wars of the U.S. (including over 500,000 Vietnam veterans), joined by 567,000 members of our Ladies' Auxiliary, oppose with one voice the apparent decision of President-elect Carter to issue a blanket pardon covering all Vietnam war draft dodgers. With equal vehemence, we urge President Ford to hold firm on his decision not to grant an 11th hour mass pardon.

As first announced, Mr. Carter's campaign blunder would affect about 4,000 law breakers. Press reports now indicate that this early blunder is being parlayed by his staff aides into an exercise of mass lunacy; ie, pardons, not only for draft dodgers, but for military deserters and so-called "bad paper" dischargees—some 250,000-plus.

Why will the V.F.W. not agree to Mr. Carter's announced effort to "bind up the nation's wounds?"

To begin with, whose "wounds" will a blanket pardon "bind up?"

Surely not the overwhelming majority of the next-of-kin of the 56,234 American dead from all causes in Vietnam (a war we chose not to win), the 303,000 wounded, the families of the hundreds still carried as Missing in Action, the 591 returned Prisoners of War, the 2½ million who served honorably in Vietnam, the 600,000 conscriptees who served in Vietnam, like it or not, and suffered 71,500 killed and wounded while so doing.

No, Mr. Carter's folly would "bind up" only the self-preening egos of those hard core "amnesty addicts" who have always viewed the amnesty issue as a convenient weapon to discredit our country, our history, and our institutions, and find draft dodgers and deserters to be handy props in this paranoid effort.

As to the future, a distinguished U.S. Senator, John Stennis, Chairman of the Senate Armed Services Committee, foresees the need soon for a resumption of obligatory military service. I believe the need for such a step is becoming increasingly clear. A 1977 blanket pardon would destroy forever the pride and honor connected with service to our beloved country and gut a future conscription before its inception.

But even today there is a serious desertion problem that a blanket pardon would compound. In 1976, for example, the Navy suffered the highest desertion rate in its history—more than double the highest Navy rate during the Vietnam war. The Marines and the Army are also experiencing serious desertion problems.

If war-time desertion and draft dodging are to be excused by the new President (Commander-in-Chief of the Armed Forces), why not the less serious offense of peacetime absences? In the era of all volunteer forces, a young man could reasonably make a deci-

sion to "volunteer out" an easily as he "volunteered in;" and how could he be held accountable?

"Blanket pardon" would constitute class action by a President which would equal mass burial of due process of the law. Judicial findings in light of individual circumstances would never see the light of day. A general pardon or amnesty would define the word "prejudicial."

Amnesty on its merits breaks down badly in terms of (a) equity; (b) precedent; and, (c) faith in the efficacy of our home-grown system of justice—and whatever else may or may not be wrong with the U.S., American justice (properly prodded by a free press) is doing just fine.

The new President has a plateful of real problems to work on; the self-preening and divisive issue of "amnesty" has been center stage for far too long. No American should expect more, nor settle for less, than his fair day in court.

A final thought.

More than most, the V.F.W. knows full well that wars are fought by boys, suffered by women, and started by men old enough to know better.

But—and here's the crucial "but"—while we hate the war, we will never desist in our support for those who are called upon to be our warriors.

I earnestly commend this approach to President-elect Carter and call upon him to reconsider his announced plan and let our on going systems of justice accommodate all violators of the law, before irremediable damage is pointlessly inflicted on the country he has been summoned to lead.

VFW Leader Hits Alaska Judge's "Playboy" Decision on Draft Dodgers

Washington, D.C.—R. D. "Bulldog" Smith, National Commander-in-Chief of the Veterans of Foreign Wars of the United States, today described as "weird" an Alaskan Judge's citation of President-elect Carter's views on pardoning draft dodgers, as reported in the girlie magazine "Playboy," as the basis for releasing a draft dodger without bail.

(Anchorage, Alaska Judge Terry Aglietti said Carter's statement on draft dodgers in his "Playboy" Magazine interview was a major factor in his decision to release 34-year old Dickran James Erkiletian on his own recognizance with no travel restrictions. Erkiletian is under a 1967 draft evasion indictment from a St. Louis, Missouri U.S. District Court. He has renounced U.S. citizenship and has become a Canadian.)

The V.F.W. leader cited the following reasons for his "shock and anger" over Judge Aglietti's decision:

"While I forecast President-elect Carter's plan to grant a blanket pardon to draft dodgers will be the first major mistake of his new Administration, no one disputes his authority, under our Constitution, to so act, but, and here's the crucial 'but,' the Judge's action pre-judges Carter's decision. As of now, there is no precedent for the Judge's ruling;

"President-elect Carter, reportedly, has moderated his forecast on when the rate of unemployment may be reduced without inducing galloping inflation. Millions of America's veterans, active duty, reserve, and retired servicemen, and their families see in the Carter 'blanket pardon' a gratuitous affront to their dearest values in an effort to win over the left/liberal fringe. I forecast the political and social damage of this step will be irremedial and the perceived sop to the left incomplete and unappreciated, therefore, I urge the President-elect to rethink his stated position and call for a fully safe-guarded, due process, case-by-case review of both military deserters and draft dodgers. Both equity and compassion would be served by such a reconsideration;

"Perhaps we might all now agree that 'Playboy' Magazine makes a mighty poor vehicle for the transmittal of national goals. Its commercial success has been based upon very different criteria; and

"There is time for mature and responsible reconsideration of the 'blanket pardon' plan. I again urge Mr. Carter to come down on the side of due process and equity on this matter. No American should expect more, nor settle for less, than his fair day in court."

Mr. THURMOND. Mr. President, this is a most important matter. I deeply regret that President-elect Carter has taken the stand he has. I hope the Senate will agree to this resolution and that it will have influence on the President-elect not to take the position he has taken about granting a pardon to these draft evaders.

Mr. President, I yield the floor.

EXECUTIVE B, 95TH CONGRESS—REMOVAL OF INJUNCTION OF SECRECY

Mr. ANDERSON. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from two related protocols done at Montreal on September 25, 1975, amending the Convention for the Unification of Certain Rules Relating to International Carriage by Air, as amended (Executive B, 95th Congress, first session), transmitted to the Senate today by the President of the United States, and that the treaty with accompanying papers be referred to the Committee on Foreign Relations and ordered to be printed, and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

I transmit herewith, for the advice and consent of the Senate to ratification two related Protocols done at Montreal on September 25, 1975 entitled:

a) Additional Protocol No. 3 to Amend the Convention for the Unification of Certain Rules Relating to International Carriage by Air, signed at Warsaw on October 12, 1929, as Amended by the Protocols done at The Hague, on September 28, 1955, and at Guatemala City, March 8, 1971 (hereinafter, Montreal Protocol No. 3); and

b) Montreal Protocol No. 4 to Amend the Convention for the Unification of Certain Rules Relating to International Carriage by Air, signed at Warsaw on October 12, 1929, as Amended by the Protocol done at The Hague on September 8, 1955 (hereinafter, Montreal Protocol No. 4).

The report of the Department of State with respect to the protocols is enclosed for the information of the Senate in connection with its consideration of them. The two protocols provide a set of modernized rules applicable to international air carriage of passengers, baggage, and cargo to replace currently applicable provisions of the 1929 Warsaw Convention, to which the United States has been party since 1934.

The United States has been one of the leaders in the efforts which have resulted in the adoption of Montreal Protocols No. 3 and No. 4. For nearly two decades the United States, while recognizing the value of a unified legal regime which would assure stability in international air transportation, has sought to ensure that the regime would be responsive to the needs of today's international air travelers and shippers. To this end this government has been in the forefront in urging amendments to the Warsaw Convention to provide for no-fault liability of air carriers, increased limits of liability, and rapid settlement of claims at a fair level. Ratification of Montreal Protocols No. 3 and No. 4 by the United States will significantly advance these efforts to increase the economic protection of users of the international air transport system. Ratification by the United States will be an invitation to those States which have hesitated, while awaiting United States action, to approve the Protocols.

Montreal Protocols No. 3 and No. 4 are part of what would be a comprehensive package of benefits available to United States citizens traveling to and from the United States by air and to international shippers by air. This package would include a proposed domestic plan to supplement recoveries under the new protocols in cases of passenger injury or death, which is now being considered by the Civil Aeronautics Board.

The development of a comprehensive system of compensation for injured parties in aviation accidents, and modernized rules relating to baggage, ticketing procedures, and cargo documentation and damage provisions are achievements that, upon the entry into force of Montreal Protocols No. 3 and No. 4, will bring the legal regime which has developed under the 1929 Warsaw Convention into today's world. For these reasons, I recommend that the Senate give prompt consideration to these protocols and give its advice and consent to ratification at an early date.

GERALD R. FORD.

THE WHITE HOUSE, *January 14, 1977.*

AUTHORIZATION FOR U.S. SECRET SERVICE TO CONTINUE TO FURNISH PROTECTION TO CERTAIN FORMER FEDERAL OFFICIALS OR MEMBERS OF THEIR FAMILIES

The Senate continued with the consideration of the resolution (S.J. Res. 12) to authorize the U.S. Secret Service to continue to furnish protection to certain former Federal officials or members of their immediate families.

Mr. ROBERT C. BYRD. Mr. President, may I have the attention of the distinguished Senator from Alabama?

In respect to his question, it will not be possible for the majority leader or the Republican leader to secure a direct response to the Senator's question as to the dollar amounts that would be involved, for the reason that if the dollar amounts were known, the number of Secret Service personnel assigned to the

protection of the individuals aforementioned also could be known.

However, the distinguished Republican leader will be in a position, and perhaps I will, also—either of us—not today but on one day next week, to put into the RECORD a letter from the President or from one of his aides to explain this matter. I think it will be to the satisfaction of the Senator from Alabama.

Am I correct?

Mr. BAKER. Mr. President, if the distinguished majority leader will yield briefly, I talked to Mr. Paul Buchen, Presidential Counselor, who indicated to me that he would ask the Secret Service and other agencies to provide, in suitable form, a letter addressed to the majority leader and to me, responding to the requests that were made by the Senator from Alabama. I believe the Senator will find the information satisfactory and still consonant with the requirements of security.

Mr. ALLEN. I thank the distinguished leadership.

Obviously, the Senator from Alabama is not going to object, whatever the cost, because human life cannot be measured in dollars and cents. Yet, he thought it was pertinent to obtain this information. However, the explanation that has been given is entirely satisfactory to the Senator from Alabama. He understands that that would be a disclosure of the amount of protection that is furnished.

Mr. ROBERT C. BYRD. I thank the Senator.

ADDRESS TO THE SENATE BY THE VICE PRESIDENT OF THE UNITED STATES

Mr. ROBERT C. BYRD. Mr. President, in response to the query by the distinguished Republican leader, I ask unanimous consent that following the address to the Senate on Tuesday next by the very distinguished Vice President of the United States, there be a period of not to exceed 30 minutes in which Senators may respond to the Vice President, if they desire.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent, further, that the majority leader and the minority leader be in control of that time, that it be divided equally between the majority and minority leaders.

The PRESIDING OFFICER. Without objection, it is so ordered.

RESOLUTION PERTAINING TO THE RELEASE OF ABU DAOUD—UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, it has been brought to my attention that the Committee on Foreign Relations today has reported a sense of the Senate resolution with respect to the release by the French Government of an alleged terrorist.

I ask the majority leader if it might be possible on Tuesday next to schedule a brief time, controlled time, for the debate and consideration of that sense of the Senate resolution.

Mr. ROBERT C. BYRD. Does the Senator have a proposal as to the amount of time needed?

Mr. BAKER. I would think that 30 minutes, equally divided, on the resolution would be adequate. I understand that it came from the Committee on Foreign Relations unanimously; and so far as we can ascertain, there is no objection to the consideration or the adoption of the resolution.

Mr. ROBERT C. BYRD. Very well.

Mr. President, an order has been ordered providing that not to exceed 2 hours next Tuesday be allotted, to be equally controlled by the majority and minority leaders, for the extending of best wishes to President Ford. I ask unanimous consent that upon the expiration of that time—or if such time is yielded back in part—the Senate may then proceed to the consideration of the resolution to which the distinguished Republican leader has referred, a resolution expressing the sense of the Senate relative to the release of Abu Daoud; that there be a time limitation for debate thereon of 30 minutes, to be equally divided between the Republican leader and myself; a time limitation on any amendment thereto of 20 minutes; a time limitation on any debatable motion or appeal or point of order, if such is submitted to the Senate, of 10 minutes, and, of course, we do not expect any of these; and that the agreement be in the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Does that adequately respond?

Mr. BAKER. I thank the majority leader. I think that covers the situation, and I am grateful for the arrangement.

Mr. ROBERT C. BYRD. I thank the distinguished Republican leader.

ORDER FOR ADJOURNMENT TO WEDNESDAY, JANUARY 19, 1977, AT 2 P.M. FROM TUESDAY NEXT

Mr. ALLEN. Mr. President, will the Senator be kind enough to yield?

Mr. ROBERT C. BYRD. Yes.

Mr. ALLEN. I am not sure whether the distinguished majority leader has announced that there will be a session on Wednesday.

Mr. ROBERT C. BYRD. Yes, there will be a session of the Senate on Wednesday. May I ask the Chair if an order has already been entered for a time for convening of the Senate on Wednesday?

The PRESIDING OFFICER. No, it has not.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. President, in partial response, in further response, to the distinguished Senator from Alabama, I ask unanimous consent that when the Senate completes its business on Tuesday next it stand in adjournment until the hour of 2 p.m. on Wednesday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLEN. Mr. President, will the Senator yield further?

Mr. ROBERT C. BYRD. Yes.

PARDON OF VIETNAM ERA DRAFT EVADERS

The Senate continued with the consideration of the motion to proceed to consider the resolution (S. Res. 18) to express the sense of the Senate in opposition to a general Presidential pardon by proclamation of Executive order of Vietnam era draft evaders, and for other purposes.

Mr. ALLEN. The Senator from Alabama and other Senators who have sponsored Senate Resolution 18, which is the most important issue before the Senate at this time, have been, as the distinguished Senator knows, extremely cooperative with the leadership as they have made requests that have used up the available time on next Tuesday, the next day that we will meet, and we have had several test votes, so to speak, on Senate Resolution 18, the last test vote being the failure of the motion to table by the distinguished Senator from South Dakota (Mr. MCGOVERN) of the motion of the Senator from Alabama to proceed to the consideration of Senate Resolution 18.

Some Senators may possibly be unfortunately shown by these two test votes we have had to have to have voted for a position that really does not reflect their views on this issue, and they may have gone off for procedural factors or reasons.

The Senator from Alabama is anxious, as I know the leadership is anxious, to see important issues coming before the Senate resolved, and that delaying tactics be not used to defeat them from coming to a vote.

The Senator from Alabama wonders if the leadership would be willing, in view of the cooperation that the proponents of this resolution have given the leadership, to seek to work out a time certain under which this matter might come before the Senate so that the Senate could work its will on this resolution.

Two Senators pointed out a clause in the resolution they felt they could not agree with, and they asked that that be amended. The Senator from Alabama and others supporting the resolution would be glad to amend it in this fashion. But would there be any chance that an effort would be made to allow this matter to come before the Senate and that it work its will under a time limitation?

Mr. ROBERT C. BYRD. I will be delighted, may I say, in response to my friend from Alabama, to seek to reach an agreement to that effect. I am not very sanguine at the moment as to the prospects, but it may be achievable, and I will make the effort.

Mr. ALLEN. I thank the distinguished majority leader. I know he will make this effort in all sincerity. I appreciate his pledge to seek to do that. I believe if the Senator from West Virginia puts his shoulder to the wheel we are going to see that wheel move, we are going to see a vote on this resolution. I thank the distinguished Senator.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

Mr. ALLEN. Mr. President, I have left at the desk an amendment to the McGovern amendment.

If Senate Resolution 18 should again become the pending business in the Senate, what it would do is whereas he moves that the resolution go to the Judiciary Committee, my amendment would say it would be reported out forthwith by the Judiciary Committee with the minor amendment that I referred to.

I would just like to ask unanimous consent that this amendment be printed and lie on the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I ask unanimous consent that Bill Jackson may have the privileges of the floor during the consideration of Senate Resolution 18.

The PRESIDING OFFICER. Without objection, it is so ordered.

BLANKET PARDON WOULD BE MISTAKE

Mr. DOLE. Mr. President, I want to take this opportunity today to restate my continued strong objections to issuance of a blanket Presidential pardon for draft evaders, military deserters, or those with less than honorable discharges. It would be a serious mistake for any of us to underestimate the negative impact which such a pardon would have on our country's future defense capabilities, as well as on the concept of equal justice for all in this Nation.

The President-elect has already indicated that he intends to issue a blanket pardon for all Vietnam-era draft resisters within 1 week following his inauguration. There have been indications that the pardon will be extended to military deserters and violaters of military law as well. My colleague from the State of Alabama has introduced a Senate resolution urging that no such general amnesty be issued by the new President, and I fully support the purpose of this measure.

A DANGEROUS PRECEDENT

It seems entirely clear that a sweeping pardon for those who willingly violated our selective service laws undermines the very sense of an individual's legal and moral responsibility, which bolsters our national defense system. We are not engaging in an academic debate about the morality of the Vietnam war. We are discussing the executive-level sanctioning of willful violations of conscription laws. Hundreds of thousands obeyed those laws, providing the military resource upon which our Nation has traditionally relied. A serious crisis to our national security in the future would require the same sort of reliance. I shudder to think of a situation where each man of military age would decide, in a cavalier manner, whether to obey or disregard the draft law. But a blanket pardon at this time would encourage that behavior, I believe.

Each of those who consciously evaded this responsibility in the last war did so for his own very personal reasons. I do not doubt for a moment that some of those reasons were well-founded and justified. Those who felt motivated by a legitimate cause should not hesitate to ask that it be considered on its own merits. I am not opposed to a compassionate review of such circumstances on a case-by-case basis. But a democracy such as ours is based on obedience to the law, and disobedience should not be condoned on a blanket basis. If it is, then the strength of our Nation's security will be reduced by chaos and confusion.

AN OFFENSE TO THOSE WHO SERVED

Advocates of blanket amnesty or pardon talk of national reconciliation, compassion, and justice. What about equal justice under the law? What about justice and compassion for those who answered their Nation's call; for those who returned disabled by war; and for the families of those killed in action and those still missing? I personally find it very difficult to characterize draft evaders or military deserters as "moral heroes" who were "victimized" by circumstances, when they have shown no inclination to make an alternative contribution to their country. Certainly, the men and women who performed their legal and political duties when called upon contributed an integral part of themselves to the welfare of this Nation. The attitude which I and many of my colleagues in Congress share on this issue is not one of vindictiveness, but represents a commitment to equal treatment for all. This attitude, I believe, is shared by many Americans today.

I was deeply impressed by news reports last week of the former Vietnam prisoner of war, Lt. Comdr. Michael D. Christian, who announced his retirement from the Navy to protest blanket amnesty for draft evaders. He was quoted as saying that:

> Over the years, we have brainwashed ourselves into being bad guys. Now we make heroes out of deserters and condemn ourselves. The price of honor seems pretty cheap this year.

Commander Christian, who has been awarded more than 10 medals of commendation, announced that he would leave his medals on the graves of Vietnam veterans to further dramatize his concern. I, for one, respect his decision and know that his concerns are the concerns of many Americans.

BLANKET PARDON ILL-ADVISED

It is appalling to think that a blanket pardon will be one of the first official acts of the new administration. I am particularly concerned that priority attention is being given to that matter when we still do not possess all available information about the fates of our MIA's in Indochina. The final report issued by the House Select Committee on Missing Servicemen last month concluded, on the basis of their studies, that the Vietnamese do possess additional information about MIA's that has never been turned over to our Government. I believe that this is the matter which deserves priority attention, and I have introduced legislation calling for early creation of a Presidential task force to obtain such additional information.

Although the wisdom and morality of the Vietnam war is still disputed in some circles, its legality—and that of the Selective Service System—was well established. Those who answered their country's call and served, those who were wounded or killed in that effort, and those who were imprisoned in enemy territory were the real "heroes" of that era. Others who evaded their responsibility have already been given a fair opportunity for clemency, which thousands accepted. Our clemency program was by far the most lenient amnesty program administered in this country during the 20th century, and more than 5,000 full pardons were individually granted under the program. Thousands accepted alternative civilian service to compensate for their evasion of duty. There is no need for a sweeping Presidential pardon for any military violators at this time.

There is no virtue in assigning a "moral heroism" to draft evasion. It establishes a dangerous precedent and certainly must offend the conscience of anyone who believes in equal justice and fairness for all.

ORDER GRANTING PERMISSION TO FILE UNTIL 5 P.M. TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Senators may have until 5 p.m. today to introduce statements, petitions, memorials, bills, and resolutions into the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Marks, one of his secretaries.

REPORTS OF THE SECRETARY OF DEFENSE AND THE SECRETARY OF TRANSPORTATION—MESSAGE FROM THE PRESIDENT—PM 17

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Armed Services:

To the Congress of the United States:

Forwarded herewith in accordance with the provisions of 1 U.S.C. 1124 are reports of the Secretary of Defense and the Secretary of Transportation on awards made during Fiscal Year 1976 to members of the Armed Forces for suggestions, inventions and scientific achievements.

Participation by military personnel in the cash awards program was authorized by the Congress in 1965. More than 1.89 million suggestion submissions since that time attest to the success which the program has had as a means of motivating military personnel to seek ways of reducing costs and improving efficiency. Of those suggestions submitted, more than 296,000 have been adopted with resultant tangible first-year benefits in excess of $929,000,000.

Of the 119,256 suggestions which were submitted by military personnel (including Coast Guard military personnel)

during Fiscal Year 1976, 19,375 were adopted. Cash awards totaling $1,343,224 were paid for these adopted suggestions, based not only on the tangible first-year benefits of $52,983,753 which were realized therefrom, but also on many additional benefits and improvements of an intangible nature. Enlisted personnel received $1,104,328 in awards, which represents 82 percent of the total cash awards paid. The remaining 18 percent was received by officer personnel and amounted to $238,896.

Attached are reports of the Secretary of Defense and the Secretary of Transportation containing statistical information on the military awards program and brief descriptions of some of the more noteworthy contributions made by military personnel during Fiscal Year 1976.

GERALD R. FORD.

THE WHITE HOUSE, *January 13, 1977.*

REPORTS OF THE SECRETARY OF DEFENSE AND THE SECRETARY OF TRANSPORTATION—MESSAGE FROM THE PRESIDENT—PM 18

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Armed Services:

To the Congress of the United States:

Forwarded herewith in accordance with the provisions of 10 U.S.C. 1124 are reports of the Secretary of Defense and the Secretary of Transportation on awards made during Fiscal Year 1975 to members of the Armed Forces for suggestions, inventions and scientific achievements.

Participation by military personnel in the cash awards program was authorized by the Congress in 1965. More than 1.76 million suggestion submissions since that time attest to the success which the program has had as a means of motivating military personnel to seek ways of reducing costs and improving efficiency. Of those suggestions submitted, more than 275,000 have been adopted with resultant tangible first-year benefits in excess of $873,000,000.

Of the 125,777 suggestions which were submitted by military personnel (including Coast Guard military personnel) during Fiscal Year 1975, 20,760 were adopted. Cash awards totaling $1,442,536 were paid for these adopted suggestions, based not only on the tangible first-year benefits of $74,347,607.94 which were realized therefrom, but also on many additional benefits and improvements of an intangible nature. Enlisted personnel received $1,175,908.50 in awards, which represents 81 percent of the total cash awards paid. The remaining 19 percent was received by officer personnel and amounted to $266,627.50.

Attached are reports of the Secretary of the Defense and the Secretary of Transportation containing statistical information on the military awards program and brief descriptions of some of the more noteworthy contributions made by military personnel during Fiscal Year 1975.

THE WHITE HOUSE, *January 13, 1977.*

AVIATION ACT OF 1977—MESSAGE FROM THE PRESIDENT—PM 19

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Commerce:

To the Congress of the United States:

In October of 1975, I sent to the Congress a bill, the Aviation Act of 1975, that would have fundamentally reformed the manner in which the Civil Aeronautics Board regulates the airline industry. The bill was designed to make that industry more competitive and responsive to the needs of the American consumer. At the same time, the bill would have permitted efficient, well-managed companies to earn a fair return on investment and to attract the large amounts of capital needed for long-term growth, thus helping to make the industry healthier.

Many events have taken place since late 1975. Although my proposed aviation regulatory reform bill was not enacted, major and thorough hearings were held in both houses of the Congress on the many proposals to reform the economic regulation of the airlines. These hearings attracted wide public participation and discussion. They built an impressive record of detailed economic study and practical airline industry experience.

We have carefully reviewed testimony presented in these hearings and debates. The record is clear: The present regulatory system is costly to the consumer and is also sapping the financial health of the industry. Reform of airline economic regulation is needed, as soon as possible, and it must be thorough and substantial—even beyond my original proposal. Accordingly, I am submitting today the Aviation Act of 1977.

This new proposal is based on the same concepts as the 1975 bill and, like it, would reform aviation regulation in three key areas: Pricing, entry and exit, and antitrust exemptions. In each of these areas the Aviation Act of 1977 provides meaningful reform of the current, archaic regulatory system to allow this naturally competitive industry to reach its full potential. This proposed legislation is an improvement over the Aviation Act of 1975 since it builds upon the experience and information developed during the Congressional hearings and incorporates constructive concepts contained in other aviation reform proposals considered last year. The result is a simpler bill which provides a more appropriate approach to pricing and entry reform than was originally proposed. Furthermore, the bill contains other improvements, including a provision which would assure the continuation of essential air service to small communities.

The case for reform has been made. It is now time to act. My firm hope is that the Aviation Act of 1977 will receive prompt consideration and action by the Congress.

GERALD R. FORD.

THE WHITE HOUSE, *January 13, 1977.*

FISHERY AGREEMENT BETWEEN UNITED STATES AND PEOPLE'S REPUBLIC OF BULGARIA—MESSAGE FROM THE PRESIDENT—PM 20

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States:

To the Congress of the United States:

In accordance with The Fishery Conservation and Management Act of 1976 (P.L. 94–265; 16 USC 1801), I transmit herewith a governing international fishery agreement between the United States and the People's Republic of Bulgaria, signed at Washington on December 17, 1976.

This Agreement is significant because it is one of a series to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this Agreement at an early date. Since 60 calendar days of continuous session as required by the legislation are not available before March 1, 1977, I strongly recommend that the Congress consider issuance of a joint resolution in order to bring this Agreement into force by that date.

GERALD R. FORD.

THE WHITE HOUSE, *January 14, 1977.*

Mr. ANDERSON. Mr. President, I ask unanimous consent that the message from the President of the United States, pursuant to Public Law 94–265, transmitting a governing international fishery agreement between the United States and the People's Republic of Bulgaria, be jointly referred to the Committee on Commerce and the Committee on Foreign Relations.

The PRESIDING OFFICER. Without objection, it will be jointly referred.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following letters, which were referred as indicated:

EC–380. A letter from the Chairman of the United States Consumer Product Safety Commission transmitting, pursuant to law, the Fourth Annual Report of the Consumer Product Safety Commission (with an accompanying report); jointly, by unanimous consent, to the Committees on Commerce and Labor and Public Welfare.

EC–381. A letter from the Executive Secretary of the National Music Council transmitting, pursuant to law, their audit report for the fiscal period ending April 30, 1976 (with an accompanying report); to the Committee on the Judiciary.

EC–382. A communication from the President of the United States transmitting proposed legislation which would authorize the Secret Service to furnish protection to a person who as a Federal Government Of-

ficial or as a member of such official's immediate family had been receiving protection for a period immediately preceding January 20, 1977, if the President determined that such person may thereafter be in significant danger (with accompanying papers); to the Committee on Finance.

EC–383. A communication from the President of the United States transmitting proposed legislation entitled "The Puerto Rico Statehood Act of 1977" (with accompanying papers); to the Committee on Interior and Insular Affairs.

EC–384. A letter from the National Executive Director of the American Veterans of World War II–Korea–Vietnam transmitting, pursuant to law, the audit report of AMVETS for the fiscal year ending August 31, 1976 (with an accompanying report); to the Committee on the Judiciary.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the fourth annual report of the Consumer Product Safety Commission, transmitted by the chairman of that Commission, be referred jointly to the Committees on Commerce and Labor and Public Welfare.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions, which were referred as indicated:

POM–1. A resolution from the Arkansas Legislative Council, opposing legislation on publicly supported retirement systems under the Employees Retirement Income Security Act.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a resolution from the Arkansas Legislative Council, opposing legislation on public supported retirement systems under the Employees Retirement Income Security Act, be referred jointly to the Committees on Finance, Post Office and Civil Service, Labor and Public Welfare, and Government Operations.

The PRESIDING OFFICER. Without objection, it is so ordered.

POM–2. Three resolutions adopted by the National Convention of the Ladies' Auxiliary, Ancient Order of Hibernians; to the Committee on the Judiciary.

POM–3. A resolution adopted by the House of Delegates of the Nebraska Medical Association on National Health planning and resources development; to the Committee on Labor and Public Welfare.

POM–4. A resolution endorsed by the Women in Communications, Inc., concerning copyright legislation; to the Committee on the Judiciary.

POM–5. Resolution No. 77–2 adopted by the Central Virginia Planning District Commission; to the Committee on Government Operations.

POM–6. A resolution adopted by the National Board of the Croatian Fraternal Union of America; ordered to lie on the table.

POM–7. A resolution adopted by the National Association for Community Development calling for full congressional representation for the District of Columbia; to the Committee on the Judiciary.

POM–8. A resolution of the Pico Rivera Chamber of Comlerce, Pico Rivera, Calif., relating to tne Consumer Communications Reform Act of 1976; to the Committee on Commerce.

POM–9. Resolutions adopted by the Massachusetts State Senate urging the President of the United States to sign the Public Safety Officers Benefit Act; ordered to lie on the table:

Whereas, HR–366, the public safety officers benefit act, provides fifty thousand dollars for a firefighter or police officer killed in the line of duty; and

Whereas, Said HR–366 passed each branch of the Congress, in the House of Representatives by a vote of two hundred and ninety to seventy-one, and in the Senate by a voice vote; now therefore, be it

Resolved, That the Massachusetts Senate respectfully urges the President of the United States to sign HR–366, the public safety officers benefit act of nineteen hundred and seventy-six; and be it further

Resolved, That copies of these resolutions be transmitted forthwith by the Clerk of the Senate to the President of the United States, the presiding officer of each branch of the Congress, and to the members thereof from the Commonwealth.

POM–10. A resolution adopted by the Lithuanian Workers Society expressing thanks for the privilege of arriving on American shores; ordered to lie on the table.

POM–11. A petition from Mrs. Mary C. Torres, Keaau, Hawaii, calling for assurance the continued sugar production in Hawaii and the rest of the United States; to the Committee on Finance.

POM–12. A petition from Mrs. Mary C. Torres, Keaau, Hawaii, calling for assurance the continued sugar production in Hawaii and the rest of the United States; to the Committee on Finance.

POM–13. Resolutions adopted by the Massachusetts State Senate memorializing Congress to absorb the cost of education in the city of Boston public school system; to the Committee on Labor and Public Welfare:

Whereas, The cost of education has had a direct and detrimental bearing upon the city of Boston's tax rate; and

Whereas, The tax rate in nineteen hundred and seventy-two for school education was thirty-five dollars and fourteen cents and it has tripled to eighty-one dollars and eighty-seven cents in nineteen hundred and seventy-six; and

Whereas, The federal courts created this dilemma; now therefore, be it

Resolved, That the Massachusetts Senate hereby urges the federal government to bear the financial burden of the cost of education in the city of Boston; and be it further

Resolved, That copies of these resolutions be transmitted forthwith by the Clerk of the Senate to the presiding officer of each branch of the Congress and to each member thereof from the Commonwealth.

POM–14, Joint Resolution No. 60, adopted by the California Legislature, relative to the exchange of public lands; to the Committee on Interior and Insular Affairs:

Whereas, The State of California owns approximately 600,000 acres of land which was granted for the benefit of common schools and has an additional entitlement of approximately 100,000 acres of these school lands still to be received; and

Whereas, These land resources of the state are generally unmanageable and unproductive because they are scattered widely throughout the state; are enclosed within the boundaries of federal military reservations, national monuments, and national forests; contain unexploded military ordnance; and remain unsurveyed; and

Whereas, These serious and enduring management problems can largely be resolved by timely indemnity selections and land exchanges with the Federal Bureau of Land Management; and

Whereas, This selection and exchange of lands is long overdue and would clearly allow the state and federal governments to improve their respective land ownership patterns and develop better land management programs; and

Whereas, The citizens of the nation and the state would benefit materially from the more efficient use of these federal and state lands; now, therefore, be it

Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to enact legislation which would mandate the immediate satisfaction of California's school land entitlement and which would grant this state first priority of classification of national resource lands for this purpose and for the purpose of extensive land exchanges; and be it further

Resolved, That the California State Lands Commission is requested to cooperate fully in the drafting, enactment, and subsequent implementation of this highly desirable legislation; and be it further

Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, to the Secretary of the Interior, and to the California State Lands Commission.

POM–15. Resolution No. 69–1976, adopted by the City Council, Norton, Ohio, commending the humanitarianism of the Members of the U.S. Congress for enacting the Local Public Works Employment Act of 1976; to the Committee on Public Works.

POM–16. House Concurrent Resolution No. 667, adopted by the Michigan Legislature, memorializing the U.S. Congress to increase the Federal effort for the control of Reye's Syndrome; to the Committee on Labor and Public Welfare:

Whereas, Reye's Syndrome is known to be a killer of young children, with the fatality rate for reported cases being nearly forty percent. Michigan had the highest reported incidence of Reye's Syndrome in the Nation for the last reported year; and

Whereas, The incidence of Reye's Syndrome is suspected to be on the increase. The onset of Reye's Syndrome is commonly precipitated by viral infection such as influenza and a nationwide influenza epidemic is anticipated in the coming winter season; and

Whereas, Research activities and findings related to Reye's Syndrome are not coordinated and are generally confined to a few major medical centers. However, the ability exists within the federal government to provide support and coordination for research activities and to collect the necessary epidemiologic data relating to the incidence of Reye's Syndrome; and

Whereas, Reye's Syndrome is a national health problem and the understanding of its etiology can be greatly enhanced by the collection and analysis of epidemiological data on a federal level; now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Michigan Legislature hereby memorialize the Congress of the United States to increase the efforts of the Center for Disease Control, the National Institutes of Health, and any other appropriate resources to implement mechanisms for the coordination of data collection and research activities for Reye's Syndrome; these mechanisms should, at a minimum include:

A. A system for the collection of epidemiologic data specific for Reye's Syndrome;

B. Periodic reports containing the findings of data analysis and research activities for Reye's Syndrome:

C. Research contracts to institutions of higher learning to study Reye's Syndrome;

D. Methods to educate physicians regard-

ing the detection and treatment of Reye's Syndrome; and be it further

Resolved, That copies of this resolution be transmitted to the Speaker of the House, the President of the Senate, and the Michigan Congressional delegation, as well as the Reye's Syndrome Foundation who has pioneered the movement to combat Reye's Syndrome.

POM–17. A resolution adopted by the Georgia Association of Chiefs of Police reaffirming their appreciation for the late Director Hoover; to the Committee on the Judiciary.

POM–18. Resolution 186–1976 adopted by the Westchester County Board of Legislators, White Plains, N.Y., urging the continuance of the present level of financial support to the mobile radio district program; to the Committee on the Judiciary.

POM–19. A petition from Mr. John J. Yarnall, Wayne, Pa., on new evidence or criminal evidence not considered by the court of claims because of the jurisdictional regulations for Civil Procedure of Law; to the Committee on the Judiciary.

POM–20. Resolution No. 76–137, adopted by the Council of the County of Maui, Wailuku, Hawaii, requesting the Hawaii delegation to Congress to introduce appropriate legislation to return prayer to the schools; to the Committee on the Judiciary.

POM-21. Resolutions adopted by the Massachusetts State Senate urging the President of the United States to release the names of companies complying with the Arab boycott; to the Committee on Commerce.

Whereas, It has been the expressed policy of both the United States and the commonwealth of Massachusetts to act in opposition to economic boycotts of American businessmen by foreign nations; and

Whereas, The commonwealth by act of the legislature has this year incorporated this policy into the law of the commonwealth; and

Whereas, The President of the United States in an address to the American people on Wednesday evening October sixth, nineteen hundred and seventy-six reiterated that it was the domestic and foreign policy of the United States to take strong action in opposition to such boycotts of American businessmen on the basis of religion or doing business with nations friendly with the United States; and

Whereas, The President on October sixth, nineteen hundred and seventy-six stated that he was then ordering the department of commerce to disclose the names of companies who have participated in the Arab boycott; and

Whereas, Since that day the President has indicated a change in position and has instead asked the department of commerce not to release the names of past participants in the boycott; now, therefore be it

Resolved, That the Massachusetts Senate urges the President of the United States to order the department of commerce to release immediately the names of all companies who have been and are now complying with the Arab boycott, and to periodically and regularly publish and make available to the American people the lists of such companies; and be it further

Resolved, That the Massachusetts Senate further urges the President and the Congress to enact legislation that incorporates a prohibition against such boycotts into the written laws of the United States; and be it further

Resolved, That a copy of these resolutions be transmitted by the Clerk of the Senate to the President of the United States, to the presiding officers of each branch of the Congress, and to each member thereof from the commonwealth.

POM–22. A deposition and legal demand from Mr. Edward C. Rose, Chicago, Ill.; to the Committee on the Judiciary.

POM–23. Resolution No. 296–1976, adopted by the Northern Mariana Islands Legislature, urging and requesting the U.S. Government to approve the constitution of the Commonwealth of the Northern Mariana Islands; to the Committee on Interior and Insular Affairs:

Whereas, Article II of the Covenant to Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States of America, signed on February 15, 1975, and thereafter approved by the United States Congress, authorizes the people of the Northern Mariana Islands to draft and approve a Constitution for their future internal government; and

Whereas, pursuant to the provisions on the said Article II, the Fourth Northern Mariana Islands Legislature enacted District Law No. 4–205, calling for a Constitutional Convention for the Northern Mariana Islands, Prescribing its powers, duties and functions, authorizing appropriation therefore, and for other purposes; and

Whereas, the Northern Marianas Constitutional Convention was held at Saipan, Northern Mariana Islands, from October 18 to December 6, 1976; and

Whereas, the said Constitutional Convention drafted a Constitution of the Commonwealth of the Northern Mariana Islands, and the President of the Convention has transmitted the said Constitution to the Resident Commissioner for submission to the people in a referendum; and

Whereas, upon aproval by popular referendum, the Constitution will be transmitted to the President of the United States, on behalf of the Government of the United States, for its consideration; and

Whereas, the Constitution of the Commonwealth of the Northern Mariana Islands reflects the political aspirations of the people of the Northern Mariana Islands, as expressed by their duly elected representatives sitting in the Constitutional Convention; and

Whereas, it is the sense of the Northern Mariana Islands Legislature that said Constitution is fully consistent with the Covenant to establish a Commonwealth of the Northern Mariana Islands and those provisions of the Constitution, treaties and laws of the United States which will be applicable to the Northern Mariana Islands pursuant to the said Covenant; and

Whereas, the Northern Marianas Constitutional Convention has adopted Resolution No. 17, calling for the prompt consideration and approval of the Constitution by the Government of the United States following its approval by the people of the Northern Mariana Islands; and

Whereas the approval of the Constitution of the Commonwealth of the Northern Mariana Islands by the United States Government in accordance with Section 202 of the Commonwealth Covenant will permit the people of the Northern Mariana Islands to attain their desire for a constitutional government in political union with the United States of America;

Now, therefore, be it resolved by the Fourth Northern Mariana Islands Legislature, Eighth Regular Session, 1976, that the United States Government is hereby respectfully requested to accord prompt consideration to and approval of the Constitution of the Commonwealth of the Northern Mariana Islands following its approval by popular referendum of the people of the Northern Mariana Islands; and

Be it further resolved, that certified copies of this Resolution be transmitted to the President of the United States; to the Secretary of Interior; to the President of the Senate; to the Speaker of the House of Representatives; to the Chairman of the Senate Committee on Interior and Insular Affairs; to the Chairman of the House of Representatives Committee on Interior and Insular Affairs; to the Chairman of the House of Reginia Association of School Business Officials resentatives Subcommittee on Territorial and Insular Affairs; to the President's Personal Representative for Micronesian Status Negotiations; to the Director of the Office of Transition Studies and Planning; to the Resident Commissioner of the Northern Mariana Islands; and to the President of the Northern Marianas Constitutional Convention.

POM–24. A petition from the Marshall Islands Nitijela requesting a delay in the implementation of the proposed regulations concerning a trust territory medical fee schedule; to the Committee on Interior and Insular Affairs.

POM–25. Resolution No. 383 adopted by the 13th Guam Legislature expressing the dissatisfaction of the legislature with the recent resolution passed by the United Nations Committee on Non-self-governing Territories; to the Committee on Interior and Insular Affairs:

Whereas, the United Nations Committee on Non-self-governing Territories has again passed a resolution demanding that the United States allow the residents of Guam political self-determination and independence, and criticizing the presence of U.S. military bases on Guam; and

Whereas, the military presence on Guam is vital to providing optimum defense for all America including Guam; the military provides the island's major economic support including thousands of jobs for the local residents; the military personnel and their families are, in fact, a very important part of our community and over the years have made many valuable contributions to the community; and

Whereas, the U.N. Committee Resolution was passed after the United States Ambassador to the U.N., William Scranton, correctly informed the Committee members that Guam is an integral part of the United States, Guam residents being citizens of the United States by their own request since 1950; and

Whereas, the United States President and Congress have recognized the right of the citizens of Guam to draft and approve their own Constitution by enacting Public Law 94–584; and

Whereas, the Guam Legislature is in the process of enacting legislation calling for a Constitutional Convention to convene on July 1, 1977; now, therefore, be it

Resolved, That the members of the 13th Guam Legislature although recognizing the concern of the U.N. Committee on Non-self-governing Territories toward the island's welfare, do hereby deplore the misconceptions of the committee regarding our status and their failure to recognize the facts of the present close and harmonious relationship between the Territory of Guam and the United States of America; and be it further

Resolved, That the members of the 13th Guam Legislature hereby restate their support for the continued close relationship with the United Sates as approved by the people of Guam, their approval of recent actions taken by the United States Congress and the President to further improve the close relationship between the Territory of Guam and the United States, and their support for the continued presence of the United States military personnel and operations within the Territory of Guam; and be it further

Resolved, That the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the United States; the Speaker of the House of Representatives; the President Pro tempore of the U.S. Senate; the United States Ambassador to the United Nations; the Chairman of the United Nations Committee on Non-self-governing Territories and to the Governor of Guam.

POM–26. A resolution adopted by the Virginia Association of School Business Officials in opposition to H.R. 77, 94th Congress; to the Committee on Labor and Public Welfare.

POM–27. A petition from Mr. Charlie J. Harrison, Jr., State representative, Michigan, in opposition to the abolition of the Senate Veterans' Affairs Committee; to the Committee on Rules and Administration.

POM–28. House Resolution No. 527 adopted by the Michigan House of Representatives urging the Senate of the United States not to abolish the Senate Veterans' Affairs Committee; to the Committee on Rules and Administration:

Whereas, For many years, the Senate Veterans' Affairs Committee has met the special needs of America's thirty million living veterans; and

Whereas, Now the Temporary Select Committee to Study the Senate Committee System has recommended a plan to abolish the Veterans' Affairs Committee, and to combine it with several other committees in a proposed human resources unit; and

Whereas, Since the interests of veterans would then be looked after by those concerned with numerous other groups, including welfare, health, and labor, abolishing the Veterans' Affairs Committee would almost certainly mean a drastic reduction in aid to America's veterans; and

Whereas, The effect of this action would ultimately lead to the neglect of the Nation's men and women who risked life and limb for their country during times of armed conflict. Most certainly, we cannot allow this to happen; now, therefore, be it

Resolved by the House of Representatives, That the members of this legislative body urge the Senate of the United States not to abolish the Senate Veterans' Affairs Committee; and be it further

Resolved, That copies of this resolution be transmitted to the President of the United States Senate and to each member of the Michigan delegation to the Senate of the United States.

POM–29. Resolution No. 261–1976 adopted by the Northern Mariana Islands Legislature commending U.S. Senator Hiram L. Fong for his outstanding and distinguished service to the people of the Trust Territory of the Pacific Islands; ordered to lie on the table:

Whereas, in a recent announcement, the Honorable Hiram L. Fong, a Senator of the United States Congress, announced that he will retire from the United States Senate at the end of his present term; and

Whereas, his retirement from the United States Senate marks the end of a milestone in his outstanding and distinguished career to public service and to the people of the Trust Territory of the Pacific Islands; and

Whereas, the life and political career of Senator Hiram L. Fong is a remarkable account of the rise from humble beginnings to a prominent figure in the United States of America; and

Whereas, during his tenure, the Honorable Hiram L. Fong has consistently shown a keen interest in the welfare of the people of the Trust Territory of the Pacific Islands and specifically for the welfare of the Northern Mariana Islands; and

Whereas, over the years, Senator Hiram L. Fong has always made himself available in Washington to assist various delegations from the Northern Mariana Islands during their visit to Washington and assist in resolving their problems of facilitating delegations to meet those individuals that are in a position to assist in solving their problems, all of which we are very grateful; and

Whereas, needless to say, the people of the Northern Mariana Islands will greatly miss the assistance and dedicated service of Senator Hiram L. Fong after his retirement, but wish to take this opportunity to express to him a sincere appreciation and gratitude of the people of the Northern Mariana Islands for all of his assistance over the years and to wish him a very enjoyable retirement from public service; and

Whereas, we, the elected leaders in the Northern Mariana Islands, for and on behalf of our people, do hereby extend to the Honorable Hiram L. Fong our heartiest and sincere thanks for his outstanding dedication to the people of the Northern Mariana Islands and to the public and wish for him a very enjoyable retirement;

Now, therefore, be it resolved by the Fourth Northern Mariana Islands Legislature, Eighth Regular Session, 1976, that United States Senator Hiram L. Fong be and he hereby is commended for his outstanding and distinguished service to the people of the Trust Territory of the Pacific Islands;

And be it further resolved, that certified copies of this Resolution be transmitted to the President, United States Senate; to the Speaker, United States House of Representatives; to the Governor of Hawaii, George Ariyoshi; to the Resident Commissioner of the Northern Mariana Islands; and to Senator Hiram L. Fong of Hawaii.

POM–30. A resolution adopted by the 42d Conference of Southern Governors on the Report of the Task Force Committee on Correctional Problems; to the Committee on the Judiciary.

POM–31. A resolution adopted by the 42d Conference of Southern Governors on metropolitan planning organizations; to the Committee on Banking, Housing and Urban Affairs.

POM–32. A resolution adopted by the 42d Conference of Southern Governors on the Interstate Highway System; to the Committee on Commerce.

POM–33. A resolution adopted by the 42d Conference of Southern Governors on airport development; to the Committee on Commerce.

POM–34. A resolution adopted by the 42d Conference of Southern Governors on coordinated public transportation; to the Committee on Commerce.

POM–35. A resolution adopted by the 42d Conference of Southern Governors on policies to improve analysis and review of regulations from the U.S. Department of Transportation; to the Committee on Commerce.

POM–36. A resolution adopted by the 42d Conference of Southern Governors on the Landsat follow-on program; to the Committee on Aeronautics and Space Sciences.

POM–37. A resolution adopted by the 42d Conference of Southern Governors on the clearinghouse of corrections and mental health information; to the Committee on the Judiciary.

POM–38. A resolution adopted by the 42d Conference of Southern Governors on respective State-local-Federal roles in research management; to the Committee on Interior and Insular Affairs.

POM–39. A resolution adopted by the 42d Conference of Southern Governors on Section 404, Water Pollution Control Act amendments; to the Committee on Public Works.

POM–40. A resolution adopted by the 42d Conference of Southern Governors on finance capitalization problems of energy industries; to the Committee on Interior and Insular Affairs.

POM–41. A resolution adopted by the 42d Conference of Southern Governors on natural gas transmission from the Arctic Slope; to the Committee on Interior and Insular Affairs.

POM–42. A resolution adopted by the 42d Conference of Southern Governors on prevention of mental retardation through maternal and child health; to the Committee on Labor and Public Welfare.

POM–43. A resolution adopted by the 42d Conference of Southern Governors on vocational rehabilitation; to the Committee on Labor and Public Welfare.

POM–44. A resolution adopted by the 42d Conference of Southern Governors on aging and adult services; to the Committee on Labor and Public Welfare.

POM–45. A resolution adopted by the 42d Conference of Southern Governors on emotionally disturbed children; to the Committee on Labor and Public Welfare.

POM–46. A resolution adopted by the 42d Conference of Southern Governors on educational governance; to the Committee on Labor and Public Welfare.

POM–47. A resolution adopted by the 42d Conference of Southern Governors on health; to the Committee on Labor and Public Welfare.

POM–48. A resolution adopted by the 42d Conference of Southern Governors on mental health; to the Committee on Labor and Public Welfare.

POM–49. A resolution adopted by the 42d Conference of Southern Governors on medicare reimbursement of physician extenders; to the Committee on Finance.

POM–50. A resolution adopted by the 42d Conference of Southern Governors on health manpower licensure; to the Committee on Labor and Public Welfare.

POM–51. A resolution adopted by the 42d Conference of Southern Governors on food stamps; to the Committee on Agriculture and Forestry.

POM–52. A resolution adopted by the 42d Conference of Southern Governors on fiscal responsibility; to the Committee on the Judiciary.

POM–53. A resolution adopted by the 42d Conference of Southern Governors on Navy contracts with private shipyards; to the Committee on Armed Services.

POM–54. A resolution adopted by the 42d Conference of Southern Governors on national coordinated tourism policy; to the Committee on Commerce.

POM–55. A resolution adopted by the 42d Conference of Southern Governors on regional primaries; to the Committee on Rules and Administration.

POM–56. A resolution adopted by the 42d Conference of Southern Governors on their guest speaker; ordered to lie on the table.

POM–57. A resolution adopted by the 42d Conference of Southern Governors on appreciation; ordered to lie on the table.

EXECUTIVE REPORTS FROM THE COMMITTEE ON ARMED SERVICES

Mr. HARRY F. BYRD, JR. Mr. President, as in executive session, from the Committee on Armed Services, I report favorably the nominations of 78 in the Air Force for temporary and permanent appointment to major general and brigadier general (list beginning with Brig. Gen. James H. Ahmann); and 44 in the Air Force for temporary appointment to the grade of brigadier general (list beginning with Col. Walter J. Bacon); and Maj. Gen. Robert Gibbins Gard, Jr., Army, to be lieutenant general as president, National Defense University. Also, there are 24 in the Army for permanent appointment to the grade of major general and brigadier general (list beginning with Maj. Gen. Cecil W. Hospelhorn); and 39 in the Army for temporary appointment to the grade of major general (list beginning with Charles K. Heiden); and 50 in the Army for temporary appointment to the grade of brigadier general (list beginning with Col. Frederick J. Brown III). I ask that these nominations be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of January 6, 1977, at the end of the Senate proceedings.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. BENTSEN:

S. 209. A bill for the relief of Manuel Suarez and his wife, Aurora Garcia Suarez; and

S. 21. A bill for the relief of Dr. Juan Fidel Viola, Helen de Guzman Viola, Mariquit de Guzman Viola, and Mark Winston de Guzman Viola; to the Committee on the Judiciary.

By Mr. BUMPERS:

S. 211. A bill to provide for the recognition of nonprofit health maintenance organizations as charitable organizations; to the Committee on Finance.

By Mr. METCALF:

S. 212. A bill to provide additional funds to the States for carrying out restoration projects and programs, and for other purposes; to the Committee on Commerce.

S. 213. A bill to amend the Accounting and Auditing Act of 1950 to provide for the audit, by the Comptroller General, of the Internal Revenue Service and of the Bureau of Alcohol, Tobacco, and Firearms; to the Committee on Government Operations.

S. 214. A bill to direct the Secretary of the Interior to pay certain legal and other expenses incurred by all parties to the action commenced by the Northern Cheyenne Tribe pursuant to the act of July 24, 1968 (82 Stat. 424, 425); to the Committee on Interior and Insular Affairs.

S. 215. A bill for the relief of Nostratollah Moradi; to the Committee on the Judiciary.

S. 216. A bill for the relief of the Mondakota Gas Co.; to the Committee on the Judiciary.

By Mr. McINTYRE (for himself and Mr. PROXMIRE):

S. 217. A bill to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

By Mr. HANSEN:

S. 218. A bill to establish a program of comprehensive medical, hospital, and dental care as protection against the cost of ordinary and catastrophic illness by requiring employers to make insurance available to each employee and his family, by Federal financing of insurance for persons of low income, in whole or in part according to ability to pay, and by assuring the availability of insurance to all persons regardless of medical history, and on a guaranteed renewable basis; jointly by unanimous consent to the Committees on Finance and Labor and Public Welfare.

By Mr. McINTYRE:

S. 219. A bill for the relief of Samy Ennabe; to the Committee on the Judiciary.

S. 220. A bill for the relief of Georgios Ballasis; to the Committee on the Judiciary

By Mr. INOUYE:

S. 221. A bill to authorize the Secretary of the Navy to set aside and clear a certain portion of the Island of Kahoolawe, Hawaii, as a pilot project to determine the feasibility and cost factors of clearing the entire island and surrounding waters of naval ordnance which is on such island and in such waters as the result of such island being used as a target range; to the Committee on Armed Services.

By Mr. PEARSON:

S. 222. A bill for the relief of Dr. Nazeeh A. L. Abdul-Hadi; to the Committee on the Judiciary.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 223. A bill to amend part B of title XI of the Social Security Act to assure appropriate participation by professional registered nurses in the peer review, and related activities authorized thereunder; to the Committee on Finance.

By Mr. INOUYE:

S. 224. A bill to amend title 5, United States Code, to allow credit for civil service retirement purposes for time spent by Japanese-Americans in World War II internment camps; to the Committee on Post Office and Civil Service.

By Mr. PROXMIRE (for himself, Mr. McINTYRE, and Mr. WILLIAMS):

S. 225. A bill to amend the Federal Credit Union Act in order to improve the efficiency and flexibility of the financial system of the United States by permitting Federal credit unions to operate more efficiently and to better serve the family financial needs of their members, by reorganizing the National Credit Union Administration, and by establishing a Central Liquidity Fund for Federal and State credit unions, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

By Mr. GRAVEL:

S. 226. A bill for the relief of Carlos C. Montanes;

S. 227. A bill for the relief of Richard Zorza; and

S. 228. A bill for the relief of Clifford and Yvonne Gibbons; to the Committee on the Judiciary.

By Mr. INOUYE:

S. 229. A bill to amend chapter 35 of title 38, United States Code, to permit children who are eligible for educational assistance under such chapter to pursue a program of education under such chapter exclusively by correspondence; to the Committee on Veterans' Affairs.

S. 230. A bill to amend the Federal Water Pollution Control Act relating to the discharge of pollutants into open ocean waters; to the Committee on Public Works.

S. 231. A bill to require that skilled nursing homes furnishing services under the medicare and medicaid programs be adequately equipped with wheelchairs and other appropriate equipment and supplies; to the Committee on Finance.

S. 232. A bill to amend title 10, United States Code, so as to provide that the Chief of the Biomedical Sciences Corps of the Air Force shall be a brigadier general, and for other purposes; to the Committee on Armed Services.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 233. A bill to provide for a greater utilization of the professional services of qualified professional psychiatric nurses in the medicare and medicaid programs; to the Committee on Finance.

By Mr. INOUYE:

S. 234. A bill to provide Federal programs of educational, employment, and other assistance to areas with heavy concentrations of foreign-born persons; to the Committee on Labor and Public Welfare.

By Mr. CRANSTON:

S. 235. A bill for the relief of Felix Hernandez-Arana and his wife, Felicia Ogaldez-De Hernandez; to the Committee on the Judiciary.

By Mr. ABOUREZK:

S. 236. A bill to amend the Veterans' Education and Employment Assistance Act of 1976; to the Committee on Veterans' Affairs.

By Mr. BELLMON (for Mr. BARTLETT):

S. 237. A bill to amend the headnote to the tariff schedules of the United States; to the Committee on Finance.

By Mr. DOLE (for himself and Mr. McGOVERN):

S. 238. A bill to amend the Internal Revenue Code of 1954 to exempt farm trucks and soil and water conservation trucks from the Highway Use Tax: to the Committee on Finance.

By Mr. BELLMON (for Mr. BARTLETT):

S. 239. A bill to amend Public Law 88-482; to the Committee on Finance.

By Mr. DOLE (for himself and Mr. McGOVERN):

S. 240. A bill to amend the Soil Conservation and Domestic Allotment Act to provide an updated national direction to the conditions under which the Federal Government will provide financial assistance to agricultural producers for needed soil, water, wood, and wildlife conservation on agricultural lands; to the Committee on Agriculture and Forestry.

By Mr. THURMOND:

S. 241. A bill for the relief of Henry C. Fleming III; to the Committee on Armed Services.

By Mr. CHURCH (for himself, Mr. JACKSON, Mr. MELCHER, Mr. HANSEN, and Mr. McCLURE):

S. 242. A bill to provide for consideration of the comparative productive potential of irrigable lands in determining nonexcess acreages under Federal reclamation laws; to the Committee on Interior and Insular Affairs.

By Mr. NELSON (for himself and Mr. JAVITS):

S. 243. A bill to amend the Small Business Act and the Small Business Investment Act of 1958; to the Committee on Small Business.

By Mr. THURMOND (for himself, Mr. CANNON, Mr. DOMENICI, and Mr. HATHAWAY):

S. 244. A bill to authorize the construction and maintenance of the General Draza Mihailovich Monument in Washington, District of Columbia, in recognition of the role he played in saving the lives of approximately five hundred United States airmen in Yugoslavia during World War II; to the Committee on Rules and Administration.

By Mr. THURMOND:

S. 245. A bill to amend title 5, United States Code, to permit military service performed by an individual after 1956 to be credited under the civil service retirement program, even though such individual is eligible for social security benefits, but requiring the civil service annuity to be offset by the amount of his social security benefit that is attributable to his military service; to the Committee on Post Office and Civil Service.

S. 246. A bill to amend chapter 67, relating to retired pay for nonregular service) of title 10, United States Code, to authorize payment of retired pay actuarially computed to persons, otherwise eligible, at age fifty, and for other purposes; to the Committee on Armed Services.

By Mr. GOLDWATER:

S. 247. A bill to provide recognition to the Women's Air Forces Service Pilots for their service to their country during World War II by deeming such service to have been active duty in the Armed Forces of the United States for purposes of laws administration; to the Committee on Veterans' affairs.

By Mr. DOLE (for himself and Mr. McGOVERN):

S. 248. A bill to establish a National Agricultural Research Policy Advisory Committee on Agriculture and Forestry.

Mr. JACKSON (for himself and Mr. MAGNUSON):

S. 249. A bill to amend the Youth Conservation Corps Act of 1970 (84 Stat. 794); to the Committee on Interior and Insular Affairs.

By Mr. INOUYE:

S. 250. A bill to amend title I of the Employee Retirement Income Security Act of

1974, and the Internal Revenue Code of 1954 to prohibit the reduction of disability payments under employer-maintained disability compensation plan whenever certain social security benefit payments are increased; to the Committee on Finance.

By Mr. MUSKIE:

S. 251. A bill to amend the Clean Air Act, as amended; to the Committee on Public Works.

By Mr. MUSKIE (for himself, Mr. RANDOLPH, Mr. STAFFORD, and Mr. BAKER):

S. 252. A bill to amend the Clean Air Act, as amended; and

S. 253. A bill to amend the Clean Air Act, as amended; to the Committee on Public Works.

By Mr. HUMPHREY:

S. 254. A bill for the relief of Mr. Jeff Yee; to the Committee on the Judiciary.

S. 255. A bill to establish a Department of Education; to the Committee on Government Operations.

By Mr. PEARSON (for himself and Mr. BENTSEN):

S. 256. A bill to regulate commerce to assure increased supplies of natural gas at reasonable prices for consumers, and for other purposes; to the Committee on Commerce.

By Mr. HUMPHREY (for himself, Mr. RANDOLPH, Mr. ROBERT C. BYRD, and Mr. HUDDLESTON):

S. 257. A bill to establish fiscal incentives for the conversion of existing petroleum-fired and natural gas-fired powerplants and fuel burning installations to coal as a primary energy source and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

By Mr. RIBICOFF (for himself, Mr. WEICKER, Mr. HUMPHREY, Mr. PELL, and Mr. MAGNUSON):

S. 258. A bill to provide for the development and implementation of programs for children and youth camp safety; to the Committee on Labor and Public Welfare.

By Mr. HANSEN (for himself and Mr. WALLOP):

S. 259. A bill to extend certain oil and gas leases by a period sufficient to allow the drilling of an ultra-deep well; to the Committee on Interior and Insular Affairs.

By Mr. KENNEDY (for himself and Mr. MCCLELLAN):

S. 260. A bill to amend title 18, United States Code, so as to impose mandatory minimum terms with respect to certain offenses, and for other purposes; to the Committee on the Judiciary.

By Mr. KENNEDY (for himself, Mr. WILLIAMS, and Mr. DECONCINI):

S. 261. A bill to amend the Internal Revenue Code of 1954 to provide an election under which State and local governments may issue taxable obligations and receive a Federal subsidy of 40 percent of the interest yield on such obligations; to the Committee on Finance.

By Mr. KENNEDY (for himself and Mr. ALLEN):

S. 262. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968, as amended, to authorize group life insurance programs for public safety officers and to assist State and local governments to provide such insurance, and for other purposes; to the Committee on the Judiciary.

By Mr. PEARSON (for himself and Mr. MAGNUSON):

S. 263. A bill to provide for interim regulatory reform as to certain independent regulatory agencies; to the Committee on Commerce.

By Mr. DOLE:

S. 264. A bill to increase the maximum Federal contribution to the cost of any State meat or poultry inspection system from 50 to 80 per centum; to the Committee on Agriculture and Forestry.

By Mr. MCINTYRE (for himself, Mr. HUMPHREY, Mr. LEAHY, Mr. MELCHER, and Mr. RANDOLPH):

S. 265. A bill to amend the Federal Aviation Act of 1958 to authorize reduced fare transportation on a space available basis for elderly persons and handicapped persons, and for other purposes; to the Committee on Commerce.

By Mr. JACKSON (for himself and Mr. BAKER):

S. 266. A bill to authorize appropriations for fiscal year 1977 to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended and section 305 of the Energy Reorganization Act of 1974; to the Joint Committee on Atomic Energy.

By Mr. DOLE:

S. 267. A bill to amend the Commodity Exchange Act, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. LEAHY (for himself, Mr. STAFFORD, Mr. PEARSON, Mr. HUMPHREY, Mr. MATHIAS, Mr. MCGOVERN, Mr. HUDDLESTON, Mr. ABOUREZK, and Mr. STEVENS):

S. 268. A bill to create within the Department of Agriculture an office specifically charged with the responsibility of assessing the fuel and energy needs of rural residents as such needs pertain to home heating and cooling, transportation, agricultural production, electrical generation, conservation, and research and development; jointly, by unanimous consent, to the Committees on Agriculture and Forestry, Banking, Housing and Urban Affairs, Commerce, Interior and Insular Affairs.

By Mr. PEARSON:

S. 269. A bill to provide additional emergency credit for farmers and ranchers and to expand existing credit, and emergency credit authority available to farmers and ranchers under the Consolidated Farm and Rural Development Act; to the Committee on Agriculture and Forestry.

By Mr. KENNEDY (for himself, Mr. ABOUREZK, Mr. BAYH, Mr. BROOKE, Mr. CHURCH, Mr. DURKIN, Mr. FORD, Mr. HUMPHREY, Mr. JAVITS, Mr. MATHIAS, Mr. MAGNUSON, Mr. METCALF, Mr. PELL, Mr. RIBICOFF, and Mr. WILLIAMS):

S. 270. A bill to amend chapter 5 of title 5, United States Code (commonly known as the Administrative Procedure Act), to permit awards of reasonable attorneys' fees and other expenses for public participation in Federal agency proceedings, and for other purposes; jointly, by unanimous consent, to the Committees on Government Operations and the Judiciary; and the second committee to report the bill after the first committee reports said bill.

By Mr. RANDOLPH:

S. 271. A bill to provide authority to institute emergency measures to minimize the adverse effects of natural gas shortages and curtailments, to provide authority to allocate propane, and for other purposes; to the Committee on Commerce.

S. 272. A bill to require, to the extent practicable, that electric powerplants and major fuel burning installations utilize other than natural gas as their primary energy source in compliance with applicable environmental requirements, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. RANDOLPH (for himself, Mr. HUDDLESTON, Mr. HUMPHREY, and Mr. JACKSON):

S. 273. A bill to require, to the extent practicable, that new electric powerplants and new major fuel burning installations, in categories to be determined, be constructed with the capability to utilize other than natural gas or petroleum as their primary energy source in compliance with applicable environmental requirements, and for other purposes; to the Committee on Commerce.

By Mr. JAVITS:

S.J. Res. 7. A joint resolution to authorize a special gold medal to be awarded to Miss Marian Anderson; to the Committee on Banking, Housing and Urban Affairs.

By Mr. CANNON:

S.J. Res. 8. A joint resolution proposing an amendment to the Constitution of the United States providing for the election of the President and the Vice President of the United States; to the Committee on the Judiciary.

By Mr. JAVITS (for himself, Mr. BROOKE, Mr. GLENN, Mr. HART, Mr. HASKELL, Mr. HUMPHREY, Mr. MAGNUSON, Mr. CHURCH, Mr. HATFIELD, Mr. KENNEDY, Mr. WEICKER, Mr. JAVITS, Mr. MCGOVERN, Mr. CASE, Mr. STAFFORD, Mr. STEVENS, Mr. WILLIAMS, Mr. STEVENSON, Mr. PERCY, Mr. CLARK, Mr. PELL, Mr. METZENBAUM, Mr. DECONCINI, Mr. BAYH, Mr. CULVER, Mr. MCINTYRE, Mr. STONE, Mr. ABOUREZK, Mr. BUMPERS, Mr. LUGAR, Mr. PEARSON, Mr. BELLMON, Mr. CRANSTON, Mr. GRAVEL, Mr. DANFORTH, Mr. DOLE, Mr. JACKSON, Mr. PROXMIRE, Mr. MATHIAS, Mr. GRIFFIN, Mr. NELSON, Mr. EAGLETON, Mr. MATSUNAGA, Mr. BURDICK, Mr. BIDEN, Mr. MUSKIE, Mr. HATHAWAY, Mr. SCHWEIKER, Mr. RIEGLE, Mr. FORD, Mr. SARBANES, Mr. HUDDLESTON, Mr. RIBICOFF, Mr. HEINZ, and Mr. WALLOP):

S.J. Res. 9. A joint resolution designating January 15 of each year as "Martin Luther King Day"; to the Committee on the Judiciary.

By Mr. ABOUREZK:

S.J. Res. 10. A joint resolution to extend the period of time in which the American Indian Policy Review Commission must submit its final report and to increase the authorization of appropriations for such Commission; to the Committee on Interior and Insular Affairs.

By Mr. STONE (for himself, Mr. ROBERT C. BYRD, Mr. DANFORTH, Mr. JACKSON, Mr. RANDOLPH, Mr. CHILES, Mr. NUNN, Mr. HATFIELD, and Mr. MELCHER):

S.J. Res. 11. A joint resolution providing for a National Leadership Conference on Energy Policy to be held during 1977; to the Committee on Interior and Insular Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BUMPERS:

S. 211. A bill to provide for the recognition of nonprofit health maintenance organizations as charitable organizations; to the Committee on Finance.

Mr. BUMPERS. Mr. President, in recent years, health care costs have been rising much faster than overall prices. In order to reverse the structural and incentive deficiencies of the present health delivery system, costs should be controlled by organizing a system so that consumers and providers have incentives to control the cost of medical care.

These incentives exist in Health Maintenance Organizations—HMO's—which provide for the delivery of a comprehensive range of health care services to a specific population for a fixed, prepaid fee.

The merits of this type of health care delivery system were debated at length during the consideration of the HMO Act of 1973 (Public Law 93–222) and the HMO Amendments of 1976 (Public Law 94–460).

The support for HMO's is based on several assumptions about their differences

from the traditional fee-for-service system: First, lower hospital utilization and subsequent lower costs; second, continuity of care rather than fragmentation; third, emphasis on prevention, early detection, and treatment, rather than on acute care; fourth, greater accessibility to and use of primary medical care; and fifth, greater satisfaction with medical care received. These differences are said to result from the unique organization and financial arrangements of HMO's.

Unlike a traditional fragmented delivery system, a health maintenance organization provides both inpatient and ambulatory care within one organizational structure. The availability and coverage of ambulatory care alternatives, combined with a fixed budget basis of financing, tend to reduce the unnecessary use of institutional services. Evidence already compiled reveals a significant reduction in hospitalization for HMO's compared to other financing and delivery arrangements.

For example, a study of medicare expenditures for calendar year 1970 reveals a per capita savings of more than 15 percent for the 125,000 beneficiaries in a total of seven HMO's compared to those in non-HMO arrangements. Similarly, a recently published study of Medicaid recipients enrolled in the Group Health Association of Washington, D.C. from 1972 to 1974 reveals a 37-percent savings in per capita costs and significant decreases in hospital admissions—within 2 years after enrollment—44 percent for surgery and over 60 percent for medical problems. In addition, for 1976 over 1975, enrollment costs for Washington area Federal employees in HMO's increased less than half as much as these for the "high option" fee-for-service insurance arrangement.

This type of evidence is impressive, especially when we are seeking solutions to spiraling health care costs. With the 1976 amendments, Congress addressed many of the problems encountered by applicants in the implementation of the 1973 act. However, there is still need for clarification of the tax laws pertaining to HMO's.

The IRS has not published a ruling setting forths its official position on the tax status of HMO's. Its position in recent years has been that HMO's can qualify as social welfare organizations under section 501(c)(4), but not as charitable organizations under section 501(c)(3).

An exemption under section 501(c)(3) is desirable for HMO's because: First, organizations so described are exempt from the payment of Federal income tax; second, contributions to such organizations are deductible for Federal income, estate, and gift tax purposes; third, grants by private foundations are generally limited to section 501(c)(3) organizations, not 501(c)(4) organizations; fourth, section 501(c)(3) organizations are often exempt from certain excise and employment taxes and are given special mailing privileges at considerable financial savings; fifth, failure to qualify under section 501(c)(3) can have adverse consequences at the State level for income tax exemptions, as well as real and personal property and sales tax exemptions; sixth, the ability of 501(c)(3) organizations to attract highly qualified personnel through offering them tax-sheltered annuity plans which are only available to such tax-exempt organizations; and seventh, the ability of new projects to attract facilities construction and renovation funds which are not supplied under the HMO Act. The abovementioned factors can significantly influence the ability of an HMO both to attract funds and to enjoy favorable tax advantages. These two circumstances often have significant effects on the financial viability of HMO's.

For these reasons I am introducing a bill which will provide tax exempt status for HMO's under 501(c)(3) if the HMO is nonprofit and meets the requirements of the HMO Act.

The logic of this position cannot be disputed. The Federal Government is supplying funds under a project grant program to stimulate a more rational and economically feasible means of delivering health services, while, at the same time, through the Tax Code provisions, placing an additional burden on those same federally supported programs.

In order for an HMO to receive funds under the grants program, it must be fiscally sound. Once established, the HMO must become financially self-sufficient, and this financial integrity would be aided by a tax-exempt classification.

Mr. President, I introduce this bill to encourage a more complete Federal commitment to the development of HMO's. The ambiguity that exists in the present Tax Code wording on the tax-exempt status of prepaid health plans has created difficulty for potential development of HMO's. The effectiveness of the Federal investment in prepaid plans would be greatly increased if private funds could be used to reinforce the tax dollar commitment in a joint Federal-private sector endeavor.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 211

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for purposes of the Internal Revenue Code of 1954, a health maintenance organization which meets the requirements of section 1301 of the Public Health Service Act (42 U.S.C. 300e) and which is organized and operated as a corporation not for profit shall be treated as an organization described in section 501(c)(3) of such Code exempt from tax under section 501(a) of such Code.

By Mr. METCALF:

S. 212. A bill to provide additional funds to the States for carrying out restoration projects and programs, and for other purposes; to the Committee on Commerce.

Mr. METCALF. Mr. President, I am introducing a bill today that would provide State wildlife agencies additional money for wildlife restoration and hunter education programs. Inflation, new responsibilities, increasing numbers of wildlife users, accelerating habitat destruction, and other factors have put an unbearable strain on these agencies' budgets.

The bill I am proposing would help relieve that financial pressure on State wildlife agencies. It would not, however, require appropriations from the general treasury. The money would come from a tax levied on component parts of handloaded ammunition, the purchasers and manufacturers of which support this bill.

The bill is in the form of an amendment to the Federal aid in wildlife restoration program. It would establish an 11-percent manufacturer's excise tax on component parts. The receipts, estimated at $6 million annually, would be added to those already being collected on handguns and archery equipment and apportioned to the States.

The Federal aid in wildlife restoration program was initiated in 1937. It is funded by an 11-percent manufacturers' excise tax on sporting firearms and factory-made ammunition. Sportsmen pay those taxes. The program is not supported at all by general tax revenues. The U.S. Fish and Wildlife Service retains enough of the receipts to pay Federal administrative costs. The remainder is divided among the States to pay 75 percent of the cost for wildlife projects approved by the Service. The State agencies provide 25 percent of the funding. All of the receipts from sporting arms and factory-made ammunition—more than $60 million anually—is used for wildlife restoration.

In 1970, Congress increased funding for the program by redirecting the 10-percent manufacturers' excise tax on handgunds from general receipts to the Federal aid program. In addition, Congress gave States the option of using up to half of their apportionment of handgun tax receipts for hunter education programs and shooting range construction. The remainder could be used for wildlife purposes.

In 1972, Congress imposed an 11-percent tax on certain items of archery equipment. Those receipts are used just as are the ones from handguns.

Receipts from the components tax I am proposing would be added to the handgun and archery equipment moneys and would be used for the same purposes. I should point out that this bill would not affect the use of receipts from sporting firearms and factory-made ammunition which make up the bulk of the overall program money. Those would continue to be used only for wildlife restoration work. Only portions of the handgun and archery receipts—as has always been the case—and components receipts could be used for hunter education and shooting range purposes.

The only change this bill would make in existing law, other than acquiring additional funds, would be to require the States to use a full 50 percent of the handgun, archery equipment, and components receipts for hunter education and shooting range purposes, if it is used at all by the States. Unused money would be transferred to the migratory bird conservation account and invested in national wildlife refuge land acquisition.

This provision was inserted in the bill to accommodate the interests of those who would be paying the tax. Most pur-

chases of handgun, archery, and components are not for wildlife related purposes. The items are used mainly for skeet, trap, and target shooting. The purchasers' interest in State agency programs is restricted mainly to hunter education efforts, which include firearm safety training. They are willing for half of their tax money to go for wildlife restoration, but they want some assurance that education programs are adequate.

Requiring that 50 percent of the handgun, archery equipment, and component taxes be used for education and ranges would not reduce funding for wildlife as some have claimed erroneously. In fact, the additional receipts from component parts would increase funding both for wildlife and education purposes. That is because the States already are using and increasing the amount of the funds available for education purposes. All 50 States have hunter education programs. In 25 States, the program is mandatory for all first-time hunters.

According to the U.S. Fish and Wildlife Service, $11.8 million in handgun and archery gear taxes were distributed to the States last year. The States used $8.3 million for wildlife and $3.5 million for hunter education and ranges. If the bill I propose had been in effect, receipts from the three sources would have been at least $17.8 million. The States would have been apportioned $8.9 million for wildlife—$600,000 more than they were—and $8.9 million for education and ranges—$5.4 million more than they were.

Last year the House Merchant Marine and Fisheries Committee and the Ways and Means Committee reported this bill favorably late in the session, but time ran out before further action could be taken. I hope Congress this year will expedite enactment of this bill. I urge my colleagues to lend their support.

By Mr. METCALF:

S. 213. A bill to amend the Accounting and Auditing Act of 1950 to provide for the audit, by the Comptroller General, of the Internal Revenue Service and of the Bureau of Alcohol, Tobacco, and Firearms; to the Committee on Government Operations.

GAO AUDIT OF THE IRS AND ATFB

Mr. METCALF. Mr. President, again, I introduce for appropriate reference a bill to authorize the Comptroller General to make an independent audit of the Internal Revenue Service and the Bureau of Alcohol, Tobacco, and Firearms of the Treasury Department.

This legislation passed the Senate on the last day of the session, and apparently became the victim of papershuffling and legislative redtape, since it arrived at the Speaker's desk for House action shortly after the House had adjourned sine die. Thus, we must start over again in the 95th Congress, and I hope that the legislation will be moved quickly to enactment, since all the basic work has been done, and all appropriate committees and agencies have signified their approval.

The main purpose of this bill is to resolve a longstanding disagreement between the IRS and the GAO, and to make clear that the Comptroller General has the authority to self-start regular management reviews of the IRS and the ATFB, to obtain access to pertinent records and personnel, including tax returns and information, and to conduct such audits on an independent basis. It should be noted that the bill states unequivocally that the final authority of the Secretary of the Treasury to make decisions regarding the merits of claims under the internal revenue laws would not be disturbed.

A second, and most important purpose of the legislation is to assure that such audits will in no way result in the unauthorized disclosure of tax returns and tax information, that there shall be full congressional oversight over GAO's procedures for protecting this confidentiality and that for such unauthorized disclosure GAO employees are subject to the same penalties and sanctions as are employees of the IRS.

By way of a brief legislative history, Mr. President, the measure was reported by the Senate Government Operations Committee on April 14, 1976 (S. Rept. 94–752) and was referred to the Senate Finance Committee, which reported its version to the Senate on May 20, 1976 (S. Rept. 94–909).

The Finance Committee preserved the "self-starting" authority of the Comptroller General to initiate the audit, but it added the requirement that any access by the GAO to tax returns or information must be subject to the approval of the Senate Finance Committee, the House Ways and Means Committee, or the Joint Committee on Internal Revenue Taxation.

The Senate Government Operations Committee version had provided for various reporting requirements to be followed by the GAO in notifying the Joint Committee and the Government Operations Committee as to those with access to tax returns and information, and to its procedures for protecting confidentiality, but it did not require any such prior committee approval.

The differences between the two committees on the legislation became involved in the debate on the 1976 tax reform measure. In that bill, the Senate Finance Committee inserted an amendment that again would require the Comptroller General to obtain first approval from the tax writing committees before he could look at tax returns or information in making an audit.

After certain discussion between the floor leaders on that legislation, a modified amendment was agreed to for insertion in the bill. That amendment permitted the GAO to initiate audits on its own or at the request of members or committees, but GAO would have to notify the Joint Committee on Internal Revenue Taxation of the subject matter of its planned audit and its plans for inspection of tax returns and information, and could independently proceed with the audit unless the joint committee by a two-thirds vote of its members vetoed the audit plan within 30 days after first receiving notice.

Now that the tax reform bill has passed into law, it is still necessary to move the original measure which establishes the authority in the GAO to make its independent audit and have access to the tax return information subject to the limitations provided in the tax bill. The Senate Finance Committee has no objections to such a bill.

The legislation which I introduce today is in full conformance with the tax reform bill amendment and the agreements worked out by the Senate committees. Indeed when the language passed the Senate in the closing hours of the 94th Congress, the language was understood to be acceptable to the House and was expected to be passed. However it never reached that body.

In summary, Mr. President, this bill provides for an independent audit and review of the tax agencies by the GAO, and assures that the GAO shall have access to tax returns and related information but only subject to notice to, and opportunity for veto by, the joint committee.

In keeping with the objective of protection of privacy, it further requires that no GAO personnel shall disclose such information which in any way would identify a taxpayer and that if he did, he would be subject to the same stiff penalties as are IRS employees.

It includes the same reporting requirements which were in the Government Operations Committee amendments, that is, that GAO shall designate in writing the name and title of each officer and employee who will have access to the returns, and shall forward same to the Senate and House tax writing committees and the two Government Operations Committees and the IRS and ATFB.

It also provides for reports to Congress on the results of audits performed, and for annual reports to the tax committees and Government Operations Committees as to the procedures to be followed with respect to protecting the confidentiality of tax returns and tax information, the scope and subject matter of audits and review authorized, and findings, conclusions, and recommendations made as a result of the GAO review.

Mr. President, I will urge that this bill be taken up again by the Government Operations Committee and reported to the Senate for action as soon as possible in the new session.

By Mr. HANSEN:

S. 218. A bill to establish a program of comprehensive medical, hospital, and dental care as protection against the cost of ordinary and catastrophic illness by requiring employers to make insurance available to each employee and his family, by Federal financing of insurance for persons of low income, in whole or in part according to ability to pay, and by assuring the availability of insurance to all persons regardless of medical history, and on a guaranteed renewable basis; jointly by unanimous consent to the Committees on Finance and Labor and Public Welfare.

COMPREHENSIVE HEALTH CARE ACT OF 1977

Mr. HANSEN. Mr. President, it is my privilege to introduce for consideration by the Congress the American Medical Association's national health insurance proposal.

The legislation, similar to measures I

have sponsored or cosponsored in past Congresses, will build on the present system of employer-employee group health insurance plans and I commend it to the attention of my colleagues.

It will provide for Federal financial assistance on the basis of need.

The AMA bill will allow everyone to choose his own physician, dentist, and health insurance plan.

The legislation will protect against the costs of catastrophic illness; there will be no ceiling on these benefits.

As the principal sponsor in the Senate, I am confident that this measure can meet our needs at a cost, in new tax dollars, that will not be burdensome.

Mr. President, I am fully aware that this proposal is one of several dealing with national health insurance that the Congress will study. But I believe it is a good program and a balanced program and worthy of serious attention.

Let me take this means to briefly summarize the main functions of the legislation as outlined by the AMA's Washington office:

FULL HEALTH CARE FOR ALL

The basic concept of this proposal is full health care for all persons through private health insurance. For many who are now employed and have some insurance protection, it will mean a substantial increase in allowable benefits that will assure that their health care needs will be met. Equally comprehensive benefits will be available to the poor and the indigent, through Federal participation in the cost of insurance. A special program of supplemental insurance will provide like protection for the medicare population.

EMPLOYER AND EMPLOYEE COVERAGE

Most persons will receive their health care protection under employer insurance programs fully financed by premium paid by employers and their employees. Employers will be required to offer the coverage, and participation will be optional for the employee; 65 percent of the premium will be payable by the employer—who could, if individually agreed upon, pay more than 65 percent—for the benefit of the employee—and family; the employee will pay the balance.

Individuals regularly working at least 20 hours per week, as well as full-time employees, will be entitled to this coverage.

For those employers, particularly any small employers, who will incur a substantial increase in payroll costs as a result of the new requirement to provide insurance for employees, Federal assistance, over a period of 5 years, will largely alleviate the added burden. Moreover, a Government study ordered by the bill will determine any need for continuing assistance.

SELF-EMPLOYED, NONEMPLOYED, AND THE ELDERLY

Needs of the poor and the medically indigent will be met through a system of insurance premium subsidies providing either credits against income tax, or "certificates of entitlement" acceptable by carriers toward payment of premium. Such subsidies will be scaled according to income, and will pay all of the premium for some and a part of the premium for others.

A nonemployed person or a self-employed person would buy health care insurance which is "qualified," that is, meets federally established standards and conditions of coverage affording a person—and family—full care—diagnostic, therapeutic, and preventive, in and out of the hospital. A person could choose to pay the premium, in which case, when computing income tax return at year-end, the individual would simply reduce the amount of income tax by the amount of credit to which the person is entitled. On the other hand, a person might choose, instead, to make an application for a certificate of entitlement. An individual's insurance company could provide assistance—if so desired—and even put the insurance in force pending receipt of the certificate—with the Government guaranteeing payment of the premium during the interval between application and receipt of the certificate.

The amount of the Federal contribution will be based on individual or family income, measured by income tax liability for the year preceding the year for which the purchase is made. A table incorporated in the bill will show for each level of income tax liability—in $10 intervals—the percentage of the insurance premiums which the Government will contribute. Low income individuals and families having no income tax liability will be entitled to income tax credit—or a certificate—for the full amount of the premium; for other eligible persons, the entitlement will change gradually—within a range of 99 to 10 percent of the premium.

Since medicare benefits fall short of the standard benefits provided in "qualified" insurance, special provision is made to offer "supplemental" insurance for the elderly. This will make available to them the full range of benefits provided for the under-65 population. The supplemental insurance premium will be supported by the Federal Government, in full for the aged poor, in part for the others, according to income.

CONTINUITY OF INSURANCE FOR THE UNEMPLOYED

Persons between jobs will be covered under a special program. All employer-sponsored insurance will provide coverage of employees and their families for 30 days following termination of employment. In addition, however, an individual will, during the period for which a person is entitled to unemployment compensation, be eligible for continuation of the same insurance held at the time of termination of employment, and such continuing insurance will be fully paid for by the Federal Government.

BENEFITS

Health benefits under the program are comprehensive and afford the basic needs as well as the catastrophic expenses that a family might encounter. Any person covered under the program will be entitled to all the hospital inpatient care a person might need, as many as 100 days of inpatient care in a skilled nursing facility, and all home health services. Each member of the family will also be entitled to full physician services, providing all surgical needs as well as general care, and a full range of preventive services, including physicial examinations, immunizations, and inoculations, and outpatient psychiatric care. Children under 7 will be fully covered for dental care, and this age limit will be raised each year so as ultimately to include all persons under 18. Adults will be covered for emergency dental care. But the plan will not pay for items normally excluded, such as comfort items or cosmetic surgery.

COINSURANCE REQUIREMENTS

To keep costs down, and as a curb against overutilization, individuals will be subject to a payment of 20 percent—called "coinsurance"—of health benefits derived. However, the total coinsurance which a family will have to pay in any year will be limited according to its income. The poor will pay no coinsurance, others will pay a maximum in any year of 10 percent of income reduced by a "coinsurance deduction" that will assure that the obligation for coinsurance will increase only gradually as income rises. In effect, a family of four with a total income of $4,200, with no income tax liability, will be exempt from coinsurance. At $4,300 of income, the coinsurance limit would be 10 percent of the additional $100 of income, or $10; at $10,000 the limit would be $580. In no case could the annual coinsurance limit be more than $1,500 for an individual of $2,000 for a family. The limitation on coinsurance triggers the catastrophic expense protection, for health services are free of coinsurance when the limit is reached.

INSURANCE AVAILABILITY

Insurance will be available to all persons, regardless of prior medical history and on a guaranteed renewable basis. All carriers will offer the insurance, and will participate in an assigned-risk pool, if the State believes such pool is necessary to assure the availability of the coverage. In addition, premium for individuals or small groups within a State will be not more than 125 percent of the cost of insurance for members of large employee groups—over 50 persons—in a State.

ADMINISTRATION

State governments will regulate insurance within the State, subject to Federal guidelines established under the program by a 15-member Health Insurance Board. The Secretary of Health, Education, and Welfare and the Commissioner of Internal Revenue will be members of the board, and the additional members will include seven practicing doctors of medicine, a doctor of osteopathy, a doctor of dentistry, and members of the general public. The new board will also consult with carriers, providers, and consumers in planning and developing programs for quality medical care, and will make annual progress reports to the President and to the Congress.

Mr. CRANSTON. Mr. President, I ask unanimous consent that a bill introduced by Senator HANSEN relative to establishing a comprehensive Health Care Act of 1977, be jointly referred to the Committees on Labor and Public Welfare, and Finance.

The PRESIDING OFFICER. Without objection, the bill will be jointly referred.

By Mr. INOUYE:

S. 221. A bill to authorize the Secretary of the Navy to set aside and clear a certain portion of the island of Kahoolawe, Hawaii, as a pilot project to determine the feasibility and cost factors of clearing the entire island and surrounding waters of naval ordnance which is on such island and in such waters as the result of such island being used as a target range; to the Committee on Armed Services.

Mr. INOUYE. Mr. President, I am today introducing a bill affecting Kahoolawe Island, one of the eight major islands in the Hawaiian chain. For more than 35 years, Kahoolawe has been the site of aerial bombing and ship-to-shore target practice, conducted primarily by the U.S. Navy as part of its general training exercises.

This island has the dubious distinction of being one of the most bombed islands in the Pacific. I am concerned about this island, not so much because its somewhat limited resources are being destroyed by the Navy's live ammunition practices, but rather because the island is no more than 8 miles off the coast of a fast-developing population center on the island of Maui. The threat to the lives and property of the Maui residents is very real and warrants the concern of my distinguished colleagues in the Congress.

The bill I introduce today would direct the Navy to conduct a pilot project to clear a portion of the island within a year and to report back to the appropriate congressional committees about the project results.

I see this legislation as a significant step toward the eventual clearance of the entire 45-square-mile island of unexploded bombs and other ordnance and debris. And I expect this bill to pave the way for the eventual transfer of a revitalized Kahoolawe from the U.S. Government to the State of Hawaii.

It is true that there are other areas within the territorial boundaries of the United States used for similar military training purposes, but Kahoolawe is different from these locales. The State of Hawaii retains residential rights over Kahoolawe since it formerly owned the island, subject only to "temporary" military exigencies enumerated in the Executive order reserving use of the island to the U.S. Government. Furthermore, because of the close proximity of Kahoolawe to Maui, the second largest island in the State, Maui residents have long complained of the effects of aerial and shore bombardment. Finally, Kahoolawe was once usable for other purposes. It is now rapidly being destroyed and rendered unfit for human habitation. This erosion is an unforgiveable waste in a State where land is at a premium.

In the last three Congresses, I introduced measures that would have transferred Kahoolawe back to the State of Hawaii and that would have authorized moneys needed to clear the island of ordnance now estimated at over 10,000 tons. The bill met stiff opposition by the Navy Department in each Congress and most probably would have no hope for survival in this Congress as well.

The measure I now propose incorporates recent findings of a year-long study of Kahoolawe by the Navy Department, the most significant of which was the feasibility of clearing 90 percent of the land to a depth of 4½ feet in about 6 years. Prior to the study, the Navy made repeated claims that clearance of the island—to an extent feasible for human habitation—was impossible.

I succeeded in inserting a directive to the Navy in the 1975 military construction appropriations bill to conduct the 1-year study so that cost estimates of clearing Kahoolawe could be made for the first time. The Navy did a thorough and commendable study—one which I have found instructive.

The study finds not only that it is indeed feasible to restore Kahoolawe for human habitation, but also finds that a clearing operation on the island would be advantageous for Navy explosive ordnance disposal—EOD—training programs. The study says the civilian work force lacks the personnel qualifications for ordnance clearance on a par with the EOD teams. The study says also:

> The use of active duty EOD personnel would be advantageous from the standpoint of current qualifications, familiarity with the ordnance and area and potential labor cost reductions. From a military standpoint, it would provide unique operational training for the EOD group and valuable experience toward improving ordnance clearance techniques and equipment.

One other major finding of this study is that no precedent exists for a clearing operation on the scale of an island land mass like Kahoolawe. The study says:

> The lack of precedent for large-scale clearance and the magnitude of this effort in terms of cost indicate it would be prudent to undertake a pilot program to test procedures and confirm clearance rates. This would allow for refinement of cost estimates and subsequent cost benefit analysis based on land-use alternatives.

I agree with the recommendation that a pilot project be implemented, and I hope consideration of my bill may proceed carefully, but expeditiously through the Congress. I do not believe Kahoolawe Island is a mere "hell hole," as the Navy once alleged a few years ago. It is true the island, which has rich possibilities as a future State wilderness park, picnic-recreation site or wildlife refuge, is becoming unfit for anything except bombardment unless we reverse Navy policies of neglect and destruction.

Kahoolawe was not always the victim of defense demands. Through most of our history as a territory, Kahoolawe was owned by the territorial government and leased to private parties for grazing. In 1919 and again in 1933, the territory leased most of the island to a private ranch. In 1940, the Navy obtained a sublease to the island. Then in 1952 the original lease was canceled by the territory. In 1953 the area that was not being used for a lighthouse, which was already Federal property, was taken by the United States under the controversial Presidential Executive Order 10436.

Under the terms of the Executive order, when the Navy decided that the area was no longer needed, the island would be rendered reasonably safe for human habitation without cost to Hawaii and returned to the latter's jurisdiction. Moreover, the Navy was to either eradicate all goats from the island or strictly control their number. Finally, the Navy was to permit the then territory to enter and inspect the island and take appropriate measures to conduct a program of soil conservation.

What has happened in the years since the Navy secured control of the island? Kahoolawe is rapidly deteriorating between the Navy's bombardment and the animals that are stripping away the natural covering. In an era of environmental concern, Kahoolawe stands as mute testimony to the failure of the Federal Government to practice what it preaches. Soon, between the animals and the Navy, Hawaii will be left with nothing except outcroppings of rock from the Pacific.

Kahoolawe was and remains an integral part of Hawaii. Under the terms of the Admission Act, all lands reserved to the United States remained Federal property. However, the Executive order reserved only use, and the order's drafters clearly foresaw eventual return to the State. Thus title remains vested in Hawaii, which has granted the Federal Government use of the island.

The people of Hawaii have shown remarkably good faith and tolerance for the Navy's activities. We have recognized the fact that security requirements can demand a sacrifice on our part. However, the limits of our tolerance have long been exceeded, and the Navy has failed to prove that our defense posture will be undermined by the cessation of the bombardment of Kahoolawe.

Aside from the actual physical ruin of Kahoolawe itself, which is proceeding apace, the bombing constitutes a serious danger to the people of Maui. In September 1969 unexploded ordnance was discovered buried in the pasture of the mayor of the county of Maui. After an investigation, the Navy determined that the bomb had been dropped in 1966 but was in no danger of detonating.

However, this has not been the only incident. Residents have often complained about the noise from aircraft utilizing Kahoolawe. Because the population of Maui is expanding and the use of Kahoolawe is very heavy, the odds of an accidental bombing of Maui are very high. In the interest of the safety and comfort of the citizens of Maui, the policies of the Navy must be reversed.

I have made countless inquiries with the Navy about Kahoolawe and one exchange of letters stands out in my mind. In response to my correspondence in late 1969, Rear Adm. D. C. Davis, Commander, Hawaiian Sea Frontier, alleged that—

> The ravages of over a quarter of a century of air and surface bombardment have probably irrevocably eliminated the possibility of future safe, domestic use of the island.

He continued:

> This element has not been realistically faced in years past.

In his response to my inquiry, Admiral Davis added—

> The time has come to inform the local public that Kahoolawe should remain for the indefinite future an uninhabited monument to the requirements of our national security.

Admiral Davis should be commended for his frankness in stating that Navy utilization has rendered Kahoolawe bar-

ren and useless, but this candor was long overdue. I cannot believe that this discovery was suddenly made in 1969 only at my urging. Where was this candor during the previous 29 years of Navy use?

The Navy has claimed that there are no alternate sites available, but no one in the civilian sector really knows what efforts have been made to locate a less objectionable location. In fact, the Navy already uses the uninhabited island of Kaula, which is farther away from population centers and which is totally useless for any further development.

Furthermore, Mr. President, what are the people of Hawaii to make of the Executive order which promised to return Kahoolawe to the State after it was no longer required and to provide conservation programs for the island? The Navy Department obviously is saying in effect that it may some day return this ravaged "uninhabited monument" after it renders it sterile, but there is no indication when, if ever, we can expect this action.

We hear much about the credibility gap, and it is precisely this kind of callous disregard for the safety of civilians that contributes to the growing alienation of civilians from the Armed Forces.

Within the last 12 months, a wide range of local Hawaiian community groups, the two largest daily newspapers, the Hawaii Chamber of Commerce, all four county councils in the State and both State legislative houses have passed resolutions and written letters to Navy officials and the President to seek an end to the bombing, restoration of the island and return of the rights to the land to the State of Hawaii. The people of my State are looking toward Washington for a resolution of this devastating problem.

Mr. President, I request unanimous consent to have printed in the RECORD the text of the bill, along with two editorials from the Honolulu Advertiser, which were published before and after the Navy conducted the 1976 Kahoolawe study.

There being no objection, the bill and editorials were ordered to be printed in the RECORD, as follows:

S. 221

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to determine the feasibility and cost of clearing the island of Kahoolawe, Hawaii, and the surrounding waters of ordnance and other debris resulting from the use of such island as a target range by the United States Navy the Secretary of the Navy is authorized and directed to (1) select and set aside, in consultation with the appropriate officials of the State of Hawaii, a land area of such island equal to not less than one percent of the land area of the island, and (2) clear all ordnance and other debris from such set-aside area. The set-aside area shall be cleared to a depth of at least 4½ feet.

SEC. 2. The pilot project authorized by the first section shall be completed not later than one year after the date of enactment of this Act. The Secretary of the Navy shall report to the Committees on Armed Services of the Senate and the House of Representatives the results of such project not later than 60 days after the completion of such project.

SEC. 3. The land area of the island of Kahoolawe which is cleared as provided in this Act shall, after the clearing operations have been completed, be used for such purpose or purposes as shall be agreed upon by the Secretary of the Navy and the State of Hawaii.

SEC. 4. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

KAHOOLAWE: WHEN?

Kahoolawe belongs to Hawaii, not to the U.S. Navy which uses the island as a bombing range.

Under the 35-year-old agreement allowing such use, the Navy is obligated to eventually restore and return Kahoolawe to civilian use.

Toward that end, Congress in November told the Defense Department to make a study and report within a year on the feasibility of restoration and return.

So it's not a question of whether Kahoolawe will be returned. The question is when—when dates are set for the end of the bombing, the start of the cleanup, and the turn over.

Until recently, at least, pressure has not been great here for such action, although The Advertiser has made the point it's an issue that won't go away and will grow for a couple of reasons:

Most immediate, from a safety and nuisance standpoint, it is increasingly untenable to be bombing just a few miles from the growing resort and residential area on Maui.

This month's symbolic "invasion" of Kahoolawe by a few Hawaiians just stresses a broader point that political opposition is possible on several levels.

At some future date, Hawaii's people are going to need Kahoolawe for some productive use by our growing population. Between now and then, it will take many years to clean up unexploded bombs, control the goats, restore vegetation, provide water and otherwise make the island livable.

Hard as it is to see in a practical way now, given new technology and ideas there may be a viable long-range future for Kahoolawe, a future that will never begin to be approached as long as it remains a barren bombing target.

At the same time, we would not romanticize Kahoolawe's history or the potential in its present condition. An article on the front page of this section deals with the past.

The Navy study may well contend again that bombing Kahoolawe is essential for national security. But too much for too long—proclaimed for such a reason to be accepted at face value.

Moreover, it must be weighed against other considerations such as safety and ultimate alternate land uses.

In that regard, it's hard to see how Hawaii's position as a Mid-Pacific defense center would be threatened by a return of Kahoolawe to the State.

Governor Ariyoshi has expressed support of Kahoolawe's return, and the Legislature in the past has entertained resolutions to that effect.

Now some stronger expressions, hearings and more detailed local research would seem in order to be prepared for the next phases of the effort.

CLEANING UP KAHOOLAWE

Results of a private study done for the U.S. Navy on the cost of clearing Kahoolawe should be encouraging to those who seek return of the target island to civilian control and more productive use.

The cost may seem high, ranging from $77 to $130 million, depending on how much of the island is cleared of bombs, shells and other debris and to what depth.

But that cost would be spread over four to six years, and it is not out of sight compared to that of some military hardware. For example, the current estimated cost for a single B–1 bomber is $93.8 million and rising.

Moreover, the Navy has an obligation to return the island in reasonable condition as part of its 35-year-old agreement with the State.

As we have said many times before, it's not a question of whether the U.S. government should clean up Kahoolawe and return it to the people of Hawaii. The only question is when—and it's in everyone's long-range interest to start moving toward that end.

The study, requested by Senator Dan Inouye as part of the military construction appropriation bill, is a step in that direction.

The senator expects to follow it up with a new proposal to the next Congress in behalf of Hawaii's case for return of the island. That is a needed move.

But, as also stated before, there is already the basis for a reasonable compromise, a phased reduction of bombing coupled with restoration of parts of the island.

That's possible because bombing is now confined to the side of Kahoolawe away from Maui. That could continue for a time, especially with use of smoke or similar bombs instead of live ordnance. Meanwhile, work could begin right away on clearing up the other side of the island and returning it for State park or other use.

Kahoolawe's long-range future is most uncertain. If it's now hard to see real economic possibilities, it would be a mistake to underestimate what's possible with new technology in years ahead.

Nor should anyone take lightly the feelings of some Hawaiian groups about Kahoolawe and the demands for its return by Maui Mayor Cravalho and others.

For its part, the military has legitimate concerns about its training needs—as well as an obligation to actively seek out alternatives to dropping live bombs on an island so near Maui's tourism center.

The transition of Kahoolawe from bombing target to something better offers a chance for military-civilian cooperation. The chance should not be lost due too much militancy on either side.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 223. A bill to amend part B of title XI of the Social Security Act to assure appropriate participation by professional registered nurses in the peer review, and related activities authorized thereunder; to the Committee on Finance.

Mr. INOUYE. Mr. President, today I am introducing legislation to amend the Social Security Act in order to assure that members of the nursing profession will be active participants in our Nation's Professional Standards Review Organizations.

Under the terms of this proposed legislation, our professional registered nurses will become eligible for, and receive, full voting membership on local PSRO's, as well as on the Statewide and National Professional Standards Review Councils.

It would seem to me that if we are to provide for effective review of health care, the present law must be amended to include participation of registered nurses, the largest single group of health care practitioners in the country—numbering some 907,000.

The nursing profession has a long history of concern for developing and improving mechanisms for self regulation to assure the public of the competence of those who engage in the practice of nursing and to foster accountability of individual nurses for high standards of care. This concern has been reflected over the years in such things as the profes-

sion's establishment of state licensure, promotion of continuing education, the initiation of a certification program and the development of standards for practice.

Under current provisions of the PSRO law, physicians are involved in all levels of PSRO activities and have authority for decisionmaking relative to medical care. It is apparent to me that it is time to make clear provision as well for nursing involvement in PSROs, and I hope my colleagues will join me in seeking to make this beneficial change in the law.

I am pleased to report that the American Nursing Association strongly endorses this proposal.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 223

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1152(b)(1)(A) of the Social Security Act is amended—

(1) by inserting "and professional registered nurses licensed to engage in the practice of nursing in such area," immediately after "medicine or surgery in such area,",

(2) by inserting ", and at least 30 per centum of the membership of which is composed of professional registered nurses" immediately after "all such physicians in such area",

(3) by inserting ", and all professional registered nurses licensed to engage in the practice of nursing in such area," immediately after "licensed to engage in the practice of medicine or surgery in such area", and

(4) by inserting "or health" immediately after "organized medical".

SEC. 2. Section 1155(a)(1)(C) of the Social Security Act is amended by striking out "medical" and inserting in lieu thereof "health".

SEC. 3. Section 1162(b)(2) of the Social Security Act is amended by inserting ", and two professional registered nurses who may be designated by the State nursing association of such State," immediately after "hospital association of such State".

SEC. 4. (a) Section 1163(a)(1) of the Social Security Act is amended by inserting "and three professional registered nurses immediately after "eleven physicians".

(b) Section 1163(b) of such Act is amended—

(1) by striking out "members" in the first sentence and inserting in lieu thereof "The physician members", and

(2) by inserting immediately after the first sentence the following new sentence: "The three professional registered nurse members of the Council shall be individuals of recognized standing in the appraisal of professional registered nurse practice.".

(c) The amendments made by subsections (a) and (b) shall be effective in the case of appointments to the National Professional Standards Review Council made after the date of enactment of this Act.

SEC. 5. (a) Section 1167(c) of the Social Security Act is amended—

(1) by inserting ", no professional registered nurse," after "No doctor of medicine or osteopathy",

(2) by inserting ", professional registered nurse," after "such doctor of medicine or osteopathy", and

(3) by inserting "or a professional registered nurse" after "a doctor of medicine or osteopathy".

(b) The amendments made by subsection (a) shall be effective with respect to professional actions taken by professional nurses after the date of enactment of this Act.

By Mr. INOUYE:

S. 224. A bill to amend title 5, United States Code, to allow credit for civil service retirement purposes for time spent by Japanese-Americans in World War II internment camps; to the Committee on Post Office and Civil Service.

Mr. INOUYE. Mr. President, I am introducing a bill designed to give Japanese Americans interned during World War II credit toward civil service retirement for the time spent in the internment or relocation camps from 1942 to 1945.

Japanese Americans interned during those years were deprived of their liberty and the opportunity to engage in normal economic pursuits. Many lost valuable property in addition to their loss of the opportunity to practice their professions and continue working at their jobs.

A previous amendment to the Social Security Act allows them credit toward social security for the years spent in the camps if they were 18 years or older.

However, many have invested their time and service in the Government rather than private concerns, and thus have not been able to take advantage of that provision of that law. This bill simply complements the previous social security amendment. It extends to Federal employees the right to claim those years for civil service retirement credit.

I urge prompt action to enact this bill so that justice may be done.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 224

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8332 of title 5, United States Code, is amended by adding at the end thereof following new subsection:

"(1)(1) Any employee or Member who is a Japanese-American World War II internee shall be allowed credit for the period or periods after his 18th birthday during which he was detained or interned in a camp or similar facility or installation during World War II as described in paragraph (2)(A) of this subsection (and shall be considered to have performed service creditable for purposes of this subchapter while so detained or interned).

"(2) As used in this subsection—

"(A) the term 'Japanese-American World War II internee' means a United States citizen (or alien lawfully admitted for permanent residence) of Japanese ancestry who was evacuated or excluded by the appropriate military commander from a military or geographic area in the United States (or voluntarily departed from such an area prior to but in anticipation of an order of exclusion therefrom) during World War II, and was detained or interned in a camp or similar facility or installation in accordance with the policy and program of the United States with respect to persons of Japanese ancestry in the interests of the national security during World War II, whether pursuant to Executive Order Numbered 9066, dated February 19, 1942, section 67 of the Act of April 30, 1900, Executive Order Numbered 9489, dated October 18, 1944, sections 4067 through 4070 of the Revised Statutes of the United States, or otherwise; and

"(B) the term 'World War II' means the period beginning with September 1, 1940, and ending at the close of July 24, 1947.

"(3)(A) The Commission shall prescribe such regulations and take such actions as may be necessary or appropriate to insure that all Japanese-American World War II internees will be informed of their rights under this subsection and to assist them in submitting (in or with their applications for annuities under this subchapter) the information required to substantiate the performance by them of service referred to in paragraph (1).

"(B) Notwithstanding any other provision of this subchapter, any Japanese-American World War II internee who is entitled to an annuity under this subchapter for the month in which this subsection is enacted, or who thereafter becomes so entitled without having taken into account service referred to in paragraph (1), may request in writing (in such manner and form as the Commission shall prescribe) that such service be credited to him in computing his annuity under section 8339; and the Commission shall thereupon recompute such internees annuity so as to give him credit for such service, effective with the month following the month in which such request is made.

"(4) Any department or agency of the United States which performed functions or presently possesses records relating to the detention or internment of persons of Japanese ancestry during World War II shall, at the request of the Commission, certify to the Commission with respect to any Japanese-American World War II internee such information as the Commission deems necessary to carry out its functions under this subsection."

SEC. 2. (a) Section 8333(a) of title 5, United States Code, is amended by inserting "(not including any service described in section 8332(1))" after "service".

(b) Section 8334(g) of such Code is amended by striking out "or" at the end of paragraph (4), by striking out the period at the end of paragraph (5) and inserting in lieu thereof "; or", and by adding at the end thereof the following new paragraph:

"(6) periods of detention or interment credited under section 8332(1) of this title."

SEC. 3. Except as otherwise provided in the amendments made by this Act, such amendments shall apply with respect to annuities accruing under subchapter III of chapter 83 of title 5, United States Code, for months after the month in which this Act is enacted.

By Mr. PROXMIRE (for himself, Mr. MCINTYRE, and Mr. WILLIAMS):

S. 225. A bill to amend the Federal Credit Union Act in order to improve the efficiency and flexibility of the financial system of the United States by permitting Federal credit unions to operate more efficiently and to better serve the family financial needs of their members, by reorganizing the National Credit Union Administration, and by establishing a Central Liquidity Funds for Federal and State credit unions, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

CREDIT UNION MODERNIZATION ACT OF 1977

Mr. PROXMIRE. Mr. President, I am today cosponsoring a bill, with Senator MCINTYRE and Senator WILLIAMS, by request, to amend the Federal Credit Union Act for reference to the Committee on Banking, Housing and Urban Affairs. The purpose of this legislation is to improve the efficiency and flexibility of the financial system of the United States by per-

mitting Federal credit unions to operate more efficiently and to better serve the family financial needs of their members; and to reorganize the National Credit Union Administration so that the Government regulatory system having supervisory jurisdiction over insured credit unions will be updated to meet current needs.

Mr. President, I am proud of the credit union movement and the significant contributions the State of Wisconsin has made to the evolution of credit unions. Credit Unions fulfill important and growing public interest purposes. There are over 23,000 credit unions in operation with $36 billion in assets.

I am one of those who believe that the contributions of credit unions to the public interest will see their greatest days in the future. That is why I generally support the provisions of this legislation which will increase the ability of credit unions to serve their members and the public interest.

There is no good public policy reason to allow the commercial banking industry to retain a monopoly on checking account services. The ability to provide such services gives commercial banks an unfair competitive advantage over other types of financial institutions. Consumers benefit by the convenience to them of maintaining their checking accounts where they deposit their savings and at places where they maintain their common bond. This legislation will remedy this problem by giving credit unions checking account powers.

This legislation will also help borrowers to own their own homes. The homebuilding industry has been required to bear the brunt of every recent money crunch. During periods of tight money, funds have flowed out of thrift institutions and into the commercial banks. In the process, the homebuilding industry has been decimated. The provisions of this bill will allow credit unions to make home mortgage loans. This should be of benefit to homeowners and the homebuilding industry. There is no question that homeownership strengthens our democracy by giving the ordinary citizen an important stake in our society. Every effort should be made to encourage homeownership. This bill is an important step in that direction.

This bill will also reorganize the Federal Credit Union Administration in two important ways: First, by abolishing the single administrator in favor of a three-man board, and second, providing a fixed 6-year term for members of the three-man board. This will provide a better management structure for administering the credit union program and remove the day-to-day decisions of the credit union administration from the political arena.

Mr. President, I have discussed the principal thrust of this legislation. I ask unanimous consent that a section-by-section analysis of the bill, together with the text of the bill, be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 225

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Credit Union Modernization Act of 1977".

TITLE I—NEW POWERS AND MODERNIZATION

SEC. 101. (a) Paragraph (1) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752) is amended to read as follows:

"(1) 'Federal credit union' means a cooperative thrift institution incorporated in accordance with the provisions of this subchapter for the purpose of (A) encouraging thrift, (B) creating a source of credit at fair and reasonable rates of interest, (C) meeting the financial needs of its members and the member's family, and (D) providing an opportunity for its members to use and control their own money in order to improve their economic and social condition."

(b) Paragraph (4) of such section which begins with "The terms 'member account' " is redesignated paragraph "(5)" and the succeeding paragraphs numbered (5) through (8) are redesignated as paragraphs (6) through (9) respectively.

(c) Paragraph (5) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752), as redesignated by (b) of this section is amended—

(1) by striking out "The terms"; and

(2) by striking out "(when referring to the account of a member of a credit union)"; and

(3) by striking out "or" each time it appears between the words "share certificate," and "share deposit"; and

(4) by inserting "or demand deposits," after the "," following "share deposits" each time such words appear therein; and

(5) by striking out "Administrator" each time it appears and inserting "Board" in lieu thereof.

SEC. 102. Section 103 of the Federal Credit Union Act, as amended (12 U.S.C. 1753), is amended—

(1) by striking out the words "some officer competent to administer oaths" and inserting "a witness either individually or collectively," in lieu thereof; and

(2) by striking out the words "$5 each" at the end of paragraph (4) thereof and inserting in lieu thereof: "in $5 multiples, not less than $5 and not more than $25 each".

SEC. 103. (a) Paragraph (5) of section 107 of the Federal Credit Union Act, as amended (12 U.S.C. 1757), is amended to read as follows:

"(5) to make loans and extend lines of credit to its members, to other credit unions and to credit union organizations and to participate with other credit unions, credit union organizations or financial organizations in making loans to credit union members in accordance with the following:

"(A) Loans to members shall be made in conformity with criteria established by the board of directors, except that—

"(i) except as otherwise specifically provided herein, the maturity of any such loan may not exceed 12 years;

"(ii) a residential real estate loan which is made to finance the purchase of construction of a one-to-four family dwelling for the residence of a credit union member, and which is secured by a first lien upon such dwelling, may have a maturity not exceeding 30 years;

"(iii) a loan to finance the purchase of a mobile home, which shall be secured by a first lien on such mobile home, to be used by the credit union member as his residence, or for the repair, alteration, or improvement of a residential dwelling which is the residence of a credit union member shall have a maturity not to exceed 15 years unless such loan is insured or guaranteed as provided in subparagraph (iv);

"(iv) a loan secured by the insurance or guarantee of the Federal Government, or a State government, or any agency of either may be made for the maturity and under the terms and conditions specified in the law under which such insurance or guarantee is provided;

"(v) a loan or aggregate of loans to a director or member of the supervisory or credit committee of the credit union making the loan which exceeds $5,000 plus pledged shares, must be approved by the board of directors;

"(vi) loans to other members for which directors or members of the supervisory or credit committee act as guarantor or endorser must be approved by the board of directors when such loans standing alone or when added to any outstanding loan or loans of the guarantor or endorser exceeds $5,000;

"(vii) loans must be approved by the credit committee or a loan officer;

"(viii) the rate of interest shall not exceed 1 per centum per month on the unpaid balance, inclusive of all charges incident to making the loan, or such higher rate for specific classes of loans as is permitted by the Board, but in no case to exceed 1.5 per centum per month on the unpaid balance.

"(ix) the taking, receiving, reserving, or charging of a rate of interest greater than is allowed by this paragraph, when knowingly done, shall be deemed a forfeiture of the entire interest which the note, bill, or other evidence of debt carries with it, or which has been agreed to be paid thereon. If such greater rate of interest has been paid, the person by whom it has been paid, or his legal representatives, may recover back from the credit union taking or receiving the same, in an action in the nature of an action of debt, the entire amount of interest paid; but such action must be commenced within two years from the time the usurious collection was made;

"(x) a borrower may repay his loan, prior to maturity in whole or in part on any business day without penalty;

"(xi) loans shall be paid or amortized in accordance with rules and regulations prescribed by the Board after taking into account the needs or conditions of the borrowers, the amounts and duration of the loans, the interests of the members and the credit unions, and such other factors as the Board deems relevant.

"(B) A self-replenishing line of credit to a borrower may be established to a stated maximum amount on certain terms and conditions which may be different from the terms and conditions established for another borrower.

"(C) Loans to other credit unions shall be approved by the board of directors.

"(D) Loans to credit union organizations shall be approved by the board of directors and shall not exceed 1 per centum of the paid-in and unimpaired capital and surplus of the credit union. For purposes of this paragraph, a credit union organization is any organization which primarily serves credit unions, and of which the credit union is a member.

"(E) Participation loans with other credit unions, credit union organizations or financial organizations shall be in accordance with written policies of the board of directors;".

(b) Paragraph (6) of such section is deleted.

(c) Paragraph (7) of section 107 of the Federal Credit Union Act (12 U.S.C. 1757) is redesignated paragraph (6) and is amended to read as follows:

"(6)(A) to receive from its members,

from other credit unions, from an officer, employee, or agent of those nonmember units of Federal, State, or local governments and political subdivisions thereof enumerated in section 207 of this Act and in the manner so prescribed, and from nonmembers in the case of credit unions serving predominantly low-income members (as defined by the Board) payments on—

"(i) shares, share certificates and share deposits, any of which may be issued at varying dividend rates and maturities, subject to such terms, rates, and conditions as may be established by the board of directors, within limitations prescribed by the Board, and

"(ii) demand deposits, subject to the prior approval of the Board, in accordance with rules and regulations which shall be prescribed by the Board;

(d) Paragraph (8) of such section is redesignated paragraph (7) and amended to read as follows:

"(7) to invest funds (A) in securities, obligations, certificates, or other instruments of, or issued, or fully guaranteed as to principal and interest by the United States of America, any agency or instrumentality thereof, or any corporation wholly or partially owned or established by the United States of America or any agency or instrumentality thereof, or by any trust or trusts established by the United States of America or any agency or instrumentality thereof; (B) in obligations fully guaranteed as to principal and interest of any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Panama Canal Zone, the several territories and possessions or any political subdivision thereof; (C) in the shares, stocks, or obligations of any other organization, corporation, or association which strengthens or advances the development of credit unions or credit union organizations, up to 5 per centum of the total paid-in and unimpaired capital and surplus of the credit union with the approval of the Board;"

(e) Paragraph (9) of such section is redesignated paragraph (8) and amended to read as follows:

"(8) to place its funds (A) in shares, accounts, or deposits of savings and loan associations and mutual savings banks which are insured by the Federal Savings and Loan Insurance Corporation or the Federal Deposit Insurance Corporation; (B) in shares, share certificates, share deposits, demand or time deposits of any federally or State insured credit union; (C) in shares, share certificates, share deposits, demand or time deposits of any central credit union in which such investments are specifically authorized by the board of directors of the Federal credit union making the investment; (D) in demand or time deposits of any bank or trust company the deposits of which are insured by the Federal Deposit Insurance Corporation; (E) for Federal credit unions, or credit unions authorized by the Department of Defense, operating suboffices on American military installations in foreign countries or trust territories of the United States, in demand deposit accounts in banks located in those countries or trust territories, if such banks are correspondents of banks described in clause (D) of this paragraph, subject to such regulations as may be issued by the Board;".

(f) Such section is amended by redesignating paragraphs (10) through (14) as paragraphs (9) through (13).

(g) Paragraph (12) of such section, as redesignated, is amended by striking out everything after "Administrator," and inserting in lieu thereof the following: "to sell, purchase, or handle any money transfer instrument to or for members;".

(h) Paragraph (13), as redesignated, of such section is amended by inserting after the first comma the following: "to purchase, sell, pledge, or discount or otherwise receive or dispose of, in whole or in part, any eligible obligations (as defined by the Board) of its members and".

(i) Such section is further amended by adding the following new paragraphs after paragraph (13):

"(14) to sell all or a part of its assets to another credit union, to purchase all or part of the assets of another credit union and to assume the liabilities of the selling credit union and those of its members subject to regulations of the Board;

"(15) with the approval of the Board, to permit its members to transfer money to and from their accounts at such intervals and by such means as may be permitted by regulations of the Board;"

(j) Paragraph (15) of such section is redesignated paragraph (16) and is amended by inserting "to meet the financial needs of its members and its members' families and" after "to enable it".

SEC. 104. Section 111 of the Federal Credit Union Act (12 U.S.C. 1761) is amended to read as follows:

"MANAGEMENT

"SEC. 111. The management of a Federal credit union shall be by a board of directors, a supervisory committee and, when the bylaws so provide, a credit committee.

"The board shall consist of an odd number of directors, at least five in number, to be elected annually by and from the members as the bylaws provide. Any vacancy occurring on the board shall be filled until the next annual election by appointment by the remainder of the directors.

"The supervisory committee shall be appointed by the board of directors and shall consist of not less than three members nor more than five mmebers; one of whom may be a director other than the treasurer.

"A record of the names and addresses of the executive officers and the chairperson of the supervisory and, when utilized, the credit committee shall be filed with the Board within ten days' after their election or appointment.

"No member of the board or of any committee shall, as such, be compensated: *Provided, however,* That reasonable health, accident, and similar insurance protection shall not be considered compensation.".

SEC. 105. Section 112 of the Federal Credit Union Act (12 U.S.C. 1761a) is amended to read as follows:

"OFFICERS

"SEC. 112. At their organization meeting and within thirty days following each annual meeting of the members thereafter, the directors shall elect from their own number an executive officer who may be designated as chairperson of the board or president, a vice chairperson of the board or one or more vice presidents, a treasurer, and a secretary, of whom the last two may be the same individual, and the persons so elected shall be the executive officers.

"No executive officer, except the treasurer, shall be compensated as such.

"The board of directors may employ a person to be in charge of operations whose title shall be president or general manager; or, in lieu thereof, the board of directors may designate the treasurer to act as general manager or president and be in active charge of the affairs of the Federal credit union.

"The duties of the officers shall be as determined in the bylaws.

"Before the officer in charge of operations acting as general manager or president or the treasurer shall assume the duties of the office, such officer shall give bond with good and sufficient surety, in an amount and character to be determined by the board of directors in compliance with regulations prescribed from time to time by the Board, conditioned upon the faithful performance of such officer's trust.".

SEC. 106. Section 113 of the Federal Credit Union Act (12 U.S.C. 1761b) is amended to read as follows:

"DIRECTORS

"SEC. 113. The Board of directors shall meet at least once a month and shall have the general direction and control of the affairs of the Federal credit union. Minutes of all meetings shall be kept.

"Among other things, the board shall—

"(A) act upon applications for membership or appoint membership officers from among the members, other than the treasurer, and assistant treasurer, or a loan officer, to act on its behalf;

"(B) require any officer or employee having custody of or handling funds to give bond with good and sufficient surety in an amount and character in compliance with regulations of the Board, and authorize the payment of the premium or premiums therefor from the funds of the Federal credit union;

"(C) fill vacancies on the board until successors elected at the next annual meeting have qualified;

"(D) if the bylaws provide for an elected credit committee, fill vacancies on the credit committee until successors elected at the next annual meeting have qualified;

"(E) appoint the members of the supervisory committee and, if the bylaws so provide, appoint the members of the credit committee;

"(F) have charge of investments including the right to designate an investment committee of not less than two to act on its behalf;

"(G) determine the maximum number of shares, share certificates, and share deposits, and the classes of shares, share certificates, and share deposits that may be held by members, and in the case of low-income credit unions, nonmembers;

"(H) subject to the limitations of this subchapter, determine the interest rates on loans, the security, and the maximum amount which may be loaned or provided in lines of credit;

"(I) authorize interest refunds to members from income earned and received on such classes of loans and under such conditions deemed fair;

"(J) provide for the hiring and compensation of employees, including loan officers in cases where there is no credit committee;

"(K) if the bylaws so provide, appoint an executive committee of not less than three directors to act on its behalf and any other committees to which it can delegate specific functions;

"(L) prescribe conditions and limitations for the investment, executive, appointed credit committee, and any other committee which it appoints;

"(M) review at each monthly meeting a list of approved or pending applications for membership received since the previous monthly meetings altogether with such other related information as it or the bylaws require;

"(N) make provision for the furnishing of the written reasons for the denial of any membership application upon the written request of the applicant;

"(O) establish the dividend to be paid on share accounts;

"(P) specify, prior to offering, the dividend rate to be paid on share certificate and share deposit accounts;

"(Q) do all other things that are necessary and proper to carrying out the purposes and powers of the Federal credit union.".

SEC. 107. Section 114 of the Federal Credit Union Act (12 U.S.C. 1761c) is amended to read as follows:

"CREDIT COMMITTEE

"SEC. 114. The board of directors may appoint or the members may elect a credit committee consisting of an odd number of members of the credit union. The method used shall be set forth in the bylaws. The

credit committee shall hold such meetings as the business of the Federal credit union may require, not less frequently than once a month, to consider applications for loans or lines of credit. Approval of an application shall be by a majority of the committee who are present at the meeting at which it is considered provided that a majority of the full committee is present. The credit committee may appoint and delegate to loan officers the authority to approve applications.

"If loan officers are utilized, loans or lines of credit not approved by the loan officer shall be reviewed by the credit committee and the approval of a majority of the members who are present at the meeting when such review is undertaken shall be required to reverse the loan officer's decision provided a majority of the full committee is present.

"No loan may be made to any member if, upon the making of that loan, the member would be indebted to the Federal credit union upon loans made to him in an aggregate amount which would exceed 10 per centum of the credit union's unimpaired capital and surplus.".

SEC. 108. Section 116 of the Federal Credit Union Act (12 U.S.C. 1762) is amended by striking out all after the colon in subsection (a), by striking out subsection (b), and by inserting in lieu thereof the following:

"(1) A credit union in operation for more than 4 years and having assets of $500,000 or more shall set aside (A) 10 per centum of gross income until the regular reserve shall equal 4 per centum of the total of outstanding loans and risk assets, then (B) 5 per centum of gross income until the regular reserve shall equal 6 per centum of the total of outstanding loans and risk assets.

"(2) A credit union in operation less than 4 years or having assets of less than $500,000 shall set aside (A) 10 per centum of gross income until the regular reserve shall equal 7½ per centum of the total of outstanding loans and risk assets, then (B) 5 per centum of gross income until the regular reserve shall equal 10 per centum of the total of outstanding loans and risk assets.

"(3) Whenever the regular reserve falls below the stated per centum of the total of outstanding loans and risk assets, it shall be replenished by regular contributions in such amounts as may be needed to maintain the stated reserve goals.

"(b) The Board may decrease the reserve requirement set forth in subsection (a) of this section when in his opinion such a decrease is necessary or desirable. The Board may also require special reserves to protect the interests of members either by regulation or for an individual credit union in any special case.".

"(c) Each Federal credit union shall maintain interest-bearing reserves against its demand deposits in balances in the Central Liquidity Fund or agents thereof, in currency and coin, or in such other form as the Board of Governors of the Federal Reserve System may provide for similar reserves of member banks, equal to not less than such percentages of its aggregate amounts of such deposits (not less than 1 per centum nor more than 22 per centum) as may be established by the Board of Governors after consultation with the Board. Such determination and consultation shall take into consideration the various types of accounts of the institutions, the length of time such accounts have been offered by any institution, and such other factors as may be deemed appropriate, and different percentages may be prescribed on the basis of such considerations.".

SEC. 109. Section 117 of the Federal Credit Union Act (12 U.S.C. 1763) is amended to read as follows:

"DIVIDENDS

"SEC. 117. At such intervals as the board of directors may authorize, and after provision for required reserves, the board may declare a dividend to be paid at different rates on different types of shares and at different maturity dates in the case of share certificates and share deposits. Dividend credit may be accrued on various types of shares as authorized by the board of directors.

SEC. 110. Subsection (b)(3)(B) of section 120 of the Federal Credit Union Act, as amended (12 U.S.C. 1766), is amended by striking out "shares" and inserting in lieu thereof "member accounts".

SEC. 111. Sections 1, 2, and 3 of Public Law 88-395 (12 U.S.C. 1773-1775) are repealed.

TITLE II—RESTRUCTURING THE NATIONAL CREDIT UNION ADMINISTRATION

SEC. 201. (a) Paragraph (2) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752) is amended by—

(1) striking out "the term";

(2) striking out "Administrator" both times it appears and inserting "Chairperson" in lieu thereof;

(3) inserting "Board" after "Administration".

(b) Paragraph (3) of such section is amended by striking out "the term" and "and".

(c) Paragraph (4) of such section is amended by—

(1) striking out "the term";

(2) inserting "Administration" after "Union";

(d) Redesignated paragraph (6) of such section is amended by striking out "The terms".

(e) Redesignated paragraph (7) of such section is amended by—

(1) striking out "the term";

(2) striking out "title" and inserting in lieu thereof "subchapter";

(3) striking out "Act" and inserting in lieu thereof "chapter".

(f) Redesignated paragraph (8) is amended to read as follows:

"(8) Share Insurance Fund or 'Insurance Fund' or 'Fund' means the National Credit Union Share Insurance Fund.

(g) Redesignated paragraph (9) of such section is amended by striking out "The term".

(h) Such section is further amended by adding the following:

"(10) 'Central Liquidity Fund' or 'Liquidity Fund' mean the National Credit Union Central Liquidity Fund;".

SEC. 202. Section 102 of the Federal Credit Union Act (12 U.S.C. 1752a) is amended to read as follows:

"ESTABLISHMENT OF BOARD

"SEC. 102. (a) There is hereby established in the executive branch of the Government an independent agency to be known as the National Credit Union Administration. The management of the Administration shall be vested in the National Credit Union Administration Board.

"(b) The Board shall consist of three members having tested credit union experience appointed by the President with the advice and consent of the Senate. In appointing the members of the Board, the President shall designate the Chairperson. The Chairperson shall be compensated at level III of the Executive Schedule (5 U.S.C. 5315) and the remaining Board members shall be compensated at level IV of the Executive Schedule. Not more than two members of the Board shall be members of the same political party.

"(c) The term of office of each member of the Board shall be six years. However, the terms of the members of the Board initially appointed shall expire as follows: one two years from the date of appointment, one four years from the date of appointment, and one (Chairperson) six years from the date of appointment. Any Board member may continue to serve as such after the expiration of said member's term until a successor has qualified.

"(d) The Board shall adopt such rules as it sees fit for the transaction of its business and shall keep permanent and complete records and minutes of its acts and proceedings. A majority of the Board shall constitute a quorum. The Board shall make an annual report to the President for submission to the Congress summarizing the activities of the Administration. The Board will begin to function as soon as the last member of the Board is approved. The Administrator or the Administration prior to the effective date of these provisions shall exercise the authority contained in this chapter until such time as the last Board member is approved.

"(e) The Chairperson of the Board shall be the spokesperson of the Board and shall represent the Board and the National Credit Union Administration in its official relations with other branches of the Government. The Chairperson shall determine each Board member's area of responsibility and shall review such assignments biennially. It shall be the Chairperson's responsibility to direct the implementation of the adopted policies and regulations of the board.

"(f) The members of the Board shall be ineligible during the time they are in office or for two years thereafter to hold any office, position, or employment in any credit union, except that this restriction shall not apply to any member who has served the full term for which he was appointed.

"(g) Except as provided by this Act, provisions of law now or hereafter in effect shall not apply to funds, contracts obligations, expenditures, lending or payments; to fees and charges authorized in connection with applications, or in connection with the providing of information, services, facilities, to any persons; to claims, demands, or accounts of or against or relating to either: *Provided* (without regard to any provision of the Government Corporation Control Act as to government capital) banking and checking accounts of the Administration, including their receipts, shall be maintained in accordance wtih section 302 of said last named Act as now in effect, and the financial transactions of the Administration shall be subject to audit (except, however, closed sections of Examination Reports shall not be deemed to be records of any type necessary to facilitate the audit), which may be on a calendar year basis, in accordance with subchapter I of said Act as now in effect.

"(h) All policies, procedures, rules, and regulations effective at the time this section becomes effective shall remain in effect until modified or withdrawn by the Board.".

SEC. 203. (a) Subsection (b) of section 120 of the Federal Credit Union Act (12 U.S.C. 1766) is amended by—

(1) striking out "bankrupt or" in paragraph (1);

(2) by inserting the following new paragraph at the end thereof:

"(6) Any aggrieved party may seek to enjoin or obtain other appropriate remedy when a charter revocation or suspension or an involuntary liquidation is ordered by the Board. Any such suit may be brought in any court of the United States of competent jurisdiction in the district or territory in which the principal office of the credit union is located.".

(b) Subsection (1) of such section is amended—

(1) by striking out in paragraph (2) ", and perform such other functions or acts deemed necesary or appropriate to carry out the provisions of this Act"; and

(2) by striking out "." at the end of paragraph (3) and inserting "; and" in lieu thereof; and

(3) by adding the following new paragraph:

"(4) to exercise all powers specifically granted by the provisions of this chapter and such incidental powers as shall be necessary to carry out the powers so granted.".

SEC. 204. Section 5108 of title 5, United States Code, is amended by adding the following new paragraph:

"(h) In addition to the number of positions authorized by subsection (a), the National Credit Union Administration is authorized without regard to any other provision in this section, to place in the Administration one position at Level V of the Executive Schedule, three positions at GS–18 and a total of twelve positions at GS–16 or GS–17."

TITLE III—SHARE INSURANCE

SEC. 301. (a) Paragraph (a) of section 201 of the Federal Credit Union Act (12 U.S.C. 1781) is amended by—

(1) inserting ", including the trust territories," after "several territories";

(2) striking out "title" and inserting "subchapter" in lieu thereof;

(3) striking out "Act" and inserting "chapter" in lieu thereof

(b) Paragraph (b)(7) of such section is amended by inserting "except for accounts authorized by State law for State credit unions" before the semicolon.

(c) Paragraphs (b)(8) and (b)(9) of such section are amended by striking out "title" and inserting "subchapter" in lieu thereof.

(d) Paragraphs (c)(1)(E) and (c)(2) of such section are amended by striking out "for provident or productive purposes" and inserting "at a fair and reasonable rate of interest" in lieu thereof.

(e) Paragraph (c)(3) of such section is amended by striking out the last sentence thereof.

(f) Such section is further amended by striking out all of paragraph (d) and redesignating paragraph (e) as (d).

SEC. 302. Section 202 of the Federal Credit Union Act (12 U.S.C. 1782) is amended by—

(1) striking out "his" in the fifth sentence of paragraph (a)(1) and inserting "said officer's" in lieu thereof;

(2) striking out "title" and "Act" in paragraph (a)(5) and inserting "subchapter" and "chapter", respectively in lieu thereof.

SEC. 303. Section 205 of the Federal Credit Union Act is amended by striking out "for provident or productive purposes" in paragraph (c)(6) and inserting "at a fair and reasonable rate of interest" in lieu thereof.

SEC. 304. Section 208 of the Federal Credit Union Act (12 U.S.C. 1788) is amended by striking out "SPECIAL ASSISTANCE TO AVOID LIQUIDATION" and inserting "SPECIAL ASSISTANCE FOR FEDERALLY INSURED CREDIT UNIONS" in lieu thereof.

TITLE IV—CENTRAL LIQUIDITY FUND

SEC. 401. The Federal Credit Union Act (12 U.S.C. 1751–1790) is amended by adding at the end thereof the following:

"TITLE III—NATIONAL CREDIT UNION CENTRAL LIQUIDITY FUND

"FINDINGS

"SEC. 301. The Congress finds that the stability of credit unions will encourage savings and will be promoted by establishing a National Credit Union Central Liquidity Fund to provide funds to meet the temporary liquidity needs of credit unions and for that purpose to provide for the orderly transfer of funds among and between credit unions and other financial institutions.

"DEFINITIONS

"SEC. 302. As used in this title—

"(1) 'member' means any shareholder of the National Credit Union Central Liquidity Fund;

"(2) 'temporary liquidity needs' include emergency needs, seasonal needs, and needs arising from local economic dislocations;

"(3) 'Central Liquidity Fund' or 'Liquidity Fund' mean the National Credit Union Central Liquidity Fund;

"(4) 'Board' means the three member Board of the National Credit Union Administration;

"(5) 'State credit union' means a credit union organized under the laws of the States of the United States or the District of Columbia, the several territories, including the trust territories and possessions of the United States, the Panama Canal Zone, and the Commonwealth of Puerto Rico and which is not prohibited by the laws under which it is organized from becoming a member of the Discount Fund in accordance with the requirements of this title;

"(6) 'federally-insured credit union' means any credit union insured by the National Credit Union Administration Share Insurance Fund;

"(7) 'State-insured credit union' means any State credit union that has obtained a certificate of insurance from a corporation authorized and duly licensed to insure member accounts by the State in which the credit union is chartered; and

"(8) 'paid-in and unimpaired capital and surplus' means the balance of the paid-in shares account as of a given date, less any loss that may have been incurred for which there is no reserve or which has not been charged against undivided earnings, plus the credit balance (or less the debit balance) of the undivided earnings account as of a given date, after all losses have been provided for and net earnings or net losses have been added thereto or deducted therefrom. Reserves shall not be considered as part of surplus.

"ESTABLISHMENT OF THE NATIONAL CREDIT UNION CENTRAL LIQUIDITY FUND

"SEC. 303. There is hereby created the National Credit Union Administration Central Liquidity Fund which shall exist perpetually within the National Credit Union Administration unless and until dissolved or transferred by Act of Congress. The principal office shall be located at the principal office of the National Credit Union Administration but the Board may establish such regional, district, or branch offices as he deems necessary and appropriate.

"MANAGEMENT

"SEC. 304. The management of the Liquidity Fund shall be vested in the Board. The Board shall administer the affairs of the Liquidity Fund fairly and impartially and without discrimination in favor of or against any member, and shall, subject to the provisions of this title, extend to each credit union authorized to secure advances such advances as may be made safely and reasonably with due regard to the maintenance of an adequate credit standing for the Liquidity Fund and its obligations.

"INITIAL EXPENSES

"SEC. 305. In order to facilitate the formation of the Liquidity Fund, the Board is authorized to borrow up to $500,000 from the National Credit Union Share Insurance Fund, to be utilized for the initial organizational and operating expenses of the Liquidity Fund. Any sums advanced hereunder shall be repaid within a reasonable time.

"CAPITALIZATION

"SEC. 306. (a) As soon as practicable after the effective date of this subchapter, the Board shall open books for subscriptions to the capital stock.

"(b) The capital stock shall be divided into shares having a par value of $50 each. The minimum capital stock shall be issued at par. Stock issued thereafter shall be issued at such price not less than par as may be fixed by the Board.

"(c)(1)(A) The original stock subscription of each credit union eligible to become a member under paragraphs (f) and (g) of this section shall be an amount equal to at least one-half of 1 per centum of the subscriber's paid-in and unimpaired capital and surplus, but not less than $50.

"(B) Only one-half of the required subscription amount must be transferred to the Liquidity Fund. The other one-half may be held by the credit union on call of the Board and be invested in such assets as the Board may determine.

"(C) The regular reserve requirement, as set forth in section 116, may, pursuant to such terms and conditions as may be prescribed by the Board be reduced by an amount equal to the funds transferred to or held on call by the Liquidity Fund.

"(D) The Liquidity Fund shall annually adjust, at the close of the calendar year, in such manner and upon such terms and conditions as the Board may prescribe, the amount of stock held by each member so that such member shall have invested in the stock of the Liquidity Fund at least an amount calculated in the manner provided in paragraphs (c)(1)(A) and (B) of this section (but not less than $50).

"(E) If the investment in stock of any member is greater than that required under this section, the Board may, in its discretion and upon application of such member, retire the stock of such member in excess of the amount so required.

"(F) The Board may provide for adjustment in the amounts of stock to be issued or retired but not in fractional shares.

"(2) Upon the reitrement of the stock of any member, the Board shall pay such member for the stock retired an amount equal to what the member paid for such stock, or, at the direction of the Board the whole or any part of the payment which would otherwise be so made shall be credited upon the indebtedness of the member to the Liquidity Fund. In either such event, stock equal in par value to the amount of the payment or credit, or both, as the case may be, shall be canceled.

"(3) The Board may require each member to submit such reports and information as the Board deems necessary or appropriate to carry out his duties and responsibilities under this title.

"(d) Stock subscriptions shall be paid for in cash or in securities or other assets deemed acceptable by the Board and shall be paid for at the time of application therefor, or, at the election of the subscriber, in installments, but not less than one-fourth of the total amount payable shall be paid at the time of filing the applications, and the remaining amounts at such intervals as may be prescribed by the Board: *Provided, however,* That the last payment shall become due on the one hundred and eightieth day after the date of the application.

"(e) Stock subscribed for shall not be transferred or hypothecated except as provided herein and the certificates therefor shall so state.

"(f)(1) Federal and State credit unions may become members of the Liquidity Fund at any time.

"(2) Credit unions that become members later than one hundred and eighty days from the effective date of this title cannot borrow or receive advances from the Liquidity Fund for a period of one hundred and eighty days after joining.

"(g)(1) Any member may withdraw from membership in the Liquidity Fund one hundred and eighty days after filing with the Board written notice of its intention to do so.

"(2) The Board may, subject to a hearing at the member's request, under procedures set forth in regulations, remove any member from membership, if in his opinion, the member has failed to comply with any provisions of this subchapter or regulations of the Board issued pursuant thereto. In such case, the indebtedness of such member shall be liquidated and the capital stock owned by such member surrendered and canceled. Upon the liquidation of such indebtedness, such member shall be entitled to the return of its collateral, and, upon the surrender and cancellation of such capital stock, the member shall receive a sum equal to what it paid for subscriptions of the capital stock surrendered.

"(h) All stock of the Liquidity Fund shall share in dividend distributions without

preference at rates to be determined by the Board.

"CERTAIN POWERS OF THE BOARD

"SEC. 307. The Board shall have the authority on behalf of the Liquidity Fund to:

"(a) Sue and be sued, complain and defend, in any court of law or equity, State or Federal. All suits of a civil nature at common law or in equity to which the Board shall be a party shall be deemed to arise under the laws of the United States. The United States district courts shall have original jurisdiction thereof, without regard to the amount in controversy.

"The Board may, without bond or security, remove any such action, suit or proceeding from a State court to the United States district court for the district or division embracing the place where the same is pending by following any procedure for removal now or hereafter in effect.

"The Board may, notwithstanding any other provision of law, retain private counsel to represent him.

"No attachment or execution shall be issued against the Board or property of the Liquidity Fund before final judgment in any suit, action, or proceeding in any State, county, municipal or United States court.

The Board shall designate an agent upon whom service of process may be made in any State, territory, or jurisdiction in which any member credit union is located.

"(b) Adopt a seal.

"(c) Pursue to final disposition by way of compromise or otherwise claims both for and against the United States (other than tort claims, claims involving administrative expenses, and claims in excess of $5,000 arising out of contracts for construction, repairs, and the purchase of supplies and materials) which are not in litigation and have not been referred to the Department of Justice.

"(d) Appoint, employ, and dismiss such officers and employees as are not otherwise provided for in this title, define their duties, fix their compensation, require bonds of them and fix the penalty thereof. Nothing in this or any other Act shall be construed to prevent the appointment and compensation as an officer or employee of the Administration of any officer or employee of the United States in any board, commission, independent establishment, or executive department thereof.

"(e) Employ or contract with experts, professionals, and consultants or organizations thereof.

"(f) Prescribe the manner in which general business may be conducted and the privileges granted to him by law may be exercised and enjoyed.

"(g) Require information and reports from member credit unions.

"(h) Delegate to any officer or employee of the Administration such functions as he deems appropriate.

"(i) Prescribe rules and regulations as he may deem necessary or appropriate to carry out the provisions of this title.

"(j) Conduct business, carry on operations, have offices, and exercise the powers granted by this title in any State or territory.

"(k) Lease, purchase, or otherwise acquire and own, hold, improve, use, or otherwise deal in and with property, real, personal, or mixed, or any interest therein, wherever situated.

"(l) Accept gifts or donations of services, or property, real, personal, or mixed, tangible or intangible, in and for the purposes of the Liquidity Fund.

"(m) Enter into contracts with public or private organizations, corporations, or individuals, at the local, regional, State or National level including, but not exclusive to, credit unions, central credit unions, credit union organizations, and other financial institutions; act as agent for or otherwise assist the Liquidity Fund in the conduct of its business; contract for services such as, but not limited to, data processing, printing, and communications where time or economics dictate; and, do all things which are necessary or incidental to the proper management of the affairs and the proper conduct of the business of the Liquidity Fund.

"(n) Obtain indirect participation by private and other public financial sources by issuing bonds, debentures, and such other certificates of indebtedness having such maturities and bearing such interest as the Board may determine. In no event, however, shall the aggregate of such debentures and similar obligations outstanding at any one time exceed twenty times the paid-in capital and surplus of the Liquidity Fund. The obligations of the Liquidity Fund issued under this paragraph shall be fully and unconditionally guaranteed both as to principal and interest by the United States, and such guaranty shall be expressed on the face thereof;

"(o) Make deposits in federally insured commerical banks, mutual savings banks, savings and loan associations, insured credit unions, member credit unions, and financial institutions acting as agents on either a demand or time basis;

"(p) Purchase from any member with its endorsement any note, draft, or other such obligation presented by the member, under limits to be established by the Board;

"(q) Invest such part of the assets of the Liquidity Fund as are not required for advances to members or other purposes specified by this subchapter, and to such extent as the Board may deem desirable, in obligations of the United States or any agency thereof and in obligations or participations issued by an agency of the United States in trust for another agency of the United States;

"(r) Subject to rules and regulations of the Board, to borrow and to give security therefor and pay interest thereon, including from the National Credit Union Share Insurance Fund.

"(s) Exercise all powers specifically granted by the provisions of this subchapter and such incidental powers as shall be necessary to carry out the powers so granted and purposes so stated.

"ADVANCES

"SEC. 308. (a) (1) Any member of the Fund shall be entitled to apply in a form prescribed by regulations for advances. The Board may deny any application, or may grant it, upon such terms, conditions, and maturities as it may prescribe by regulations.

"(2) Advances to members shall be upon such security as the Board may prescribe. Such security may include, but not necessarily be limited to, obligations of the United States, obligations issued in trust by any agency of the United States on behalf of any agency of the United States, notes made by the member in the form of loans to its members or any other legal asset of a credit union. Any such advance, if secured by obligations of the United States, obligations fully guaranteed by the United States, or obligations issued in trust by any agency of the United States, shall be for an amount not in excess of the face value of such obligations.

"(3) Advances shall be made upon the note or obligation of the member, secured as provided in this section, bearing such rate of interest as the Board shall determine, and the Liquidity Fund shall have a lien on and shall hold the stock of such member as further collateral security for all indebtedness of the member to the Liquidity Fund.

"(4) The member applying for an advance shall enter into a primary and unconditional obligation to pay off all advances, together with interest and any unpaid costs and expenses in connection therewith according to the terms under which they were made, in such form as shall meet the requirements of the Liquidity Fund and the approval of the Board. The Liquidity Fund shall reserve the right to require at any time, when deemed necessary for its protection, deposits of additional collateral security or substitutions of security by borrowing institutions, and each borrowing institution shall assign additional or substituted security when and as required.

"(5) The limit on the aggregate amount of outstanding advances to be made to any one member shall be established by the Board by regulation.

"(b) The Secretary of the Treasury is authorized and directed to purchase any obligation issued by the Board in the event that there are insufficient funds in the Liquidity Fund to meet obligations arising under paragraph (a) of this section.

"Purchases by the Secretary of the Treasury under this paragraph outstanding at any time shall be limited to such amounts not in excess of $500,000,000. Such advances shall bear interest at a rate not less than a rate determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such advances adjusted to the nearest one-eighth of 1 per centum.

"ANNUAL REPORT

"SEC. 309. Not later than ninety days after the close of each calendar year the Board shall prepare and submit to the President and to the Congress a full report of the activities of the Central Liquidity Fund for each previous fiscal year. This report may be a part of the Board's annual report to the President and to the Congress, as required by subchapter I of this chapter.

"REIMBURSEMENT TO NATIONAL CREDIT UNION ADMINISTRATION

"SEC. 310. The Board annually shall determine the expenditures under this subchapter incurred in carrying out the responsibilities imposed upon him, and, in conjunction with fees paid for chartering, examination, supervision, and insuring of Federal credit unions, and federally-insured State credit unions, shall assess the Liquidity Fund for its share of such expenses. Receipts derived by the Administrator from the Liquidity Fund for the above purpose shall be deposited in a special deposit account with the Treasurer of the United States and may be withdrawn therefrom from time to time to defray the general expenses of the Administration.

"TAX EXEMPTION

"SEC. 311. The Liquidity Fund, its property, its franchise, capital reserves, surplus holdings, and other funds, and its income shall be exempt from all taxation now or hereafter imposed by the United States or by any State or local taxing authority; except that any real property and tangible personal property shall be subject to Federal, State, and local taxation to the same extent according to its value as other such property is taxed."

"AUDIT OF FINANCIAL TRANSACTIONS

"SEC. 312. The Board shall maintain an integral set of accounts of the Liquidity Fund which shall be audited annually by the General Accounting Office in accordance with principles and procedures applicable to commercial corporate transactions as provided by section 105 of the Government Corporation Control Act. An annual business-type budget as provided for wholly owned Government corporations by the Government Corporation Control Act shall be prepared."

AMENDMENT TO THE FEDERAL CREDIT UNION ACT

"SEC. 402. Section 107 of the Federal Credit Union Act, as amended (12 U.S.C. 1757), is amended by adding at the end thereof the following:

"(17) notwithstanding any other provisions of law, to subscribe for stock in the Fund if otherwise eligible to do so under the National Credit Union Central Liquidity terms of this Act, and to exercise such other functions as may be necessary to participate fully as a member of the Liquidity Fund.

TITLE V—CLERICAL AMENDMENTS

SEC. 501. (a) The Federal Credit Union Act (12 U.S.C. 1751–1790) is further amended by striking out "Administrator" and inserting in lieu thereof "Board" in the following sections:

(1) section 103 (12 U.S.C. 1753);
(2) section 104 (12 U.S.C. 1754);
(3) section 105 (12 U.S.C. 1755);
(4) section 106 (12 U.S.C. 1756);
(5) paragraphs (5), (8), (9), (10), (13), and (14) of section 107 (12 U.S.C. 1757);
(6) section 108 (12 U.S.C. 1758);
(7) section 109 (12 U.S.C. 1759);
(8) section 111 (12 U.S.C. 1761);
(9) section 112 (12 U.S.C. 1761a);
(10) section 113 (12 U.S.C. 1761b);
(11) section 115 (12 U.S.C. 1761d);
(12) paragraph (b)(2) of section 116 (12 U.S.C. 1762);
(13) the title of section 120 (12 U.S.C. 1766);
(14) section 120(a) (12 U.S.C. 1766);
(15) section 120(b)(1) (12 U.S.C. 1766);
(16) section 120(b)(2) (12 U.S.C. 1766);
(17) section 120(b)(3) (12 U.S.C. 1766);
(18) section 120(b)(4) (12 U.S.C. 1766);
(19) section 120(b)(5) (12 U.S.C. 1766);
(20) section 120(c) (12 U.S.C. 1766);
(21) section 120(d) (12 U.S.C. 1766);
(22) section 120(e) (12 U.S.C. 1766);
(23) section 120(f)(1) (12 U.S.C. 1766);
(24) section 120(f)(2)(A) (12 U.S.C. 1766);
(25) section 120(f)(2)(B) (12 U.S.C. 1766);
(26) section 120(g) (12 U.S.C. 1766);
(27) section 120(h) (12 U.S.C. 1766);
(28) section 120(i) (12 U.S.C. 1766);
(29) section 120(l)(3) (12 U.S.C. 1766);
(30) section 121 (12 U.S.C. 1767);
(31) section 125(b)(1) (12 U.S.C. 1771);
(32) section 125(b)(2) (12 U.S.C. 1771);
(33) section 127 (12 U.S.C. 1772a); and
(34) sections 201 to 210 (12 U.S.C. 1773–1775).

(b) Such Act is further amended by striking out the personal pronouns "he", "him", and "his" when referring to the Administrator and inserting in lieu thereof "it", "they", and "its" as appropriate wherever such words appear therein.

SECTION-BY-SECTION ANALYSIS OF THE CREDIT UNION MODERNIZATION ACT OF 1977

TITLE I—NEW POWERS AND MODERNIZATION

This title modernizes some existing powers for federal credit unions and provides for some new powers. It updates the organizational and managerial structure of federal credit unions, improves the ability of federal credit unions to meet the increasing competition in the consumer credit and savings market, and strengthens the relationships between and among credit unions and credit union organizations. The term "Act" used throughout shall refer to the existing Federal Credit Union Act.

Definition of Federal credit union

Section 101(a) changes the definition of "Federal credit union" in section 101 of the Act by specifying that federal credit unions are thrift institutions and by providing that among their purposes federal credit unions are to meet the financial needs of the member's family as well as the member and to provide opportunities for credit union members to use and control their money in order to improve their economic and social condition. In addition, the language is modernized by providing that one of the purposes of a federal credit union is to create a source of credit at fair and reasonable rates of interest rather than to create a source of credit for provident or productive purposes.

Technical correction

Section 101(b) simply corrects a technical error in the existing Act by redesignating the paragraph numbers.

Demand deposits

Section 101(c) amends the definition of "member account" and "account" found in section 101 of the Act by providing that demand deposits shall be considered member accounts. When considered in conjunction with other amendments in this bill, this amendment authorizes federal credit unions to accept the demand deposits of their members, and it would extend National Credit Union Administration (NCUA) share insurance to cover the demand deposits of federal and state-chartered credit unions.

Organization and share par value

Section 102 makes two simple changes in the Act. Subsection (1) permits more flexible procedures in the organization process. Subsection (2) permits shares to be denominated in $5 multiples of not less than $5 and not more than $25 rather only in a par value of $5 each.

Loan powers

Section 103(a) consolidates all of the lending powers contained throughout the Act into a revised paragraph (5) of section 107 of the Act. It would permit real estate loans, lines of credit, participation loans and loans to credit union organizations.

Revised paragraph (5)(A) contains the standards that the board of directors of the credit union must adhere to in establishing the criteria for making loans to members.

Loan maturity limit

Revised paragraph (5)(A)(i) establishes a maturity limit of 12 years and vests the board of directors with the authority to determine the terms and the security for such loans. The Act has a five-year maturity limit for secured loans and a ten-year maturity limit for secured loans.

Real estate loans

Revised paragraph (5)(A)(ii) permits a federal credit union to make mortgage loans secured by a residential dwelling with a maturity of thirty years or less. Since the Act has a maximum maturity limit of ten years, federal credit unions are effectively precluded from extending long-term mortgage loans to their members.

Mobile home and home improvement loans

Revised paragraph (5)(A)(iii) permits a federal credit union to make conventional mobile home and home improvement loans with a maturity of fifteen years. The present maximum maturity for all loans is ten years.

Guaranteed or insured loans

Revised paragraph (5)(A)(iv) permits loans that are secured by the insurance or guarantee of the federal, or any state government, or any agency of either to be made for the maturities and under the terms and conditions specified in the law under which such guarantee or insurance is provided, regardless of what is provided in the Act. The Act provides that mobile home and home improvement loans insured or guaranteed by the Veterans Administration or the Federal Housing Administration may be made for the maturity specified in the VA and FHA statutes dealing with such loans.

Officer loans

Revised paragraph (5)(A)(v) raises the amount of a loan that can be extended to a director or member of the supervisory or credit committee without the approval of the board of directors of the credit union to $5,000 plus pledged shares. This increased limit more realistically reflects certain other provisions of the bill to remove the unsecured loan amount and authorizes lines of credit. At the present time, loans to such credit union officers in excess of $2,500 plus pledged shares must be approved by the board of directors.

Revised paragraph (5)(A)(vi) is in the Act at paragraph (6) of section 107. Since it deals with loans, it has been transferred to paragraph (5). However, the amount for which an officer can be guarantor or endorser has been raised from $2,500 to $5,000 to conform it with the new officer borrowing limit set forth in (5)(A)(v).

Loan approval

Revised paragraph (5)(A)(vii) is contained in the Act in paragraph (5) of section 107 and provides that loans must be approved by the credit committee or a loan officer.

Interest rate on loans

Revised paragraph (5)(A)(viii) would permit the National Credit Union Administration to establish an interest rate on specified classes of loans higher than the statutory 1 percent per month (12% APR) but not to exceed 1½ percent per month (18% APR). At the present time, the statutory maximum rate is 1 percent per month, and there is no authority for the National Credit Union Administration to raise the rate to accommodate open-end credit plans or credit card plans.

Penalty for excess interest on loans

Revised paragraph (5)(A)(ix) is identical to a sentence contained in paragraph (5) of section 107 of the Act and provides a penalty of forfeiture for unlawful excess interest charges.

Repayment without penalty

Revised paragraph (5)(A)(x) is contained in substance in paragraph (5) of section 107 of the Act. However, the Act does not specifically state, and this amendment makes it clear that a borrower may repay his loan prior to maturity without penalty.

Loan amortization

Revised paragraph (5)(A)(xi) is identical to language contained in the Act in paragraph (5) of section 107 and deals with amortization of loans. This amendment simply identifies it as a separate clause for purposes of organization.

Lines of credit

Revised paragraph (5)(B) permits federal credit unions to establish revolving lines of credit for their members. Such lines of credit must have a stated maximum amount, and the terms and conditions for the line of credit may be different for different borrowers. The board of directors of the credit union would establish the terms and conditions.

Loans to credit unions

Revised paragraph (5)(C) permits a credit union to make loans to other credit unions without limitation so long as such loans are approved by the board of directors of the credit union making the loan. Section 107(a)(C) of the Act permits such loans to be made up to 25 percent of the lending credit union's paid-in and unimpaired capital and surplus. That limitation would be removed by this amendment.

Loans to credit union organizations

Revised paragraph (5)(D) would authorize federal credit unions to make loans to credit union organizations so long as such loans were approved by the board of directors and did not exceed 1 percent of the unimpaired capital and surplus of the credit union. A credit union organization is defined as any organization serving credit unions primarily, of which the lending credit union is a member. There is no authority in the Act for credit unions to make loans to credit union organizations.

Participation loans

Revised paragraph (5)(E) permits participation loans to members to be in accordance with written policies of the board of directors.

Transfer of officer borrowing provision

Section 103(b) eliminates paragraph (6) of section 107 of the Act dealing with officer borrowing since the provisions contained therein dealt with loans and have been transferred to the revised paragraph (5) by this bill.

Sources of funds and varying rates

Section 103(c) redesignates paragraph (7) of the present Act as paragraph (6) and

amends it to provide that the board of directors of the federal credit union may establish the terms, rates and conditions for the receipt of payments on shares, share certificates and share deposits and that credit unions may receive payments on demand deposits with NCUA approval. Under the present Act, the board of directors has no clear authority to vary the rate payable on classes of shares, and credit unions are not authorized to receive demand deposits from any source.

Investments

Section 103(d) redesignates paragraph (8) of the Act as paragraph (7) and consolidates therein all of the investment powers of federal credit unions.

Government obligations

Revised paragraph (7)(A) permits a federal credit union to invest its funds in the securities, obligations, certificates or other instruments that are fully guaranteed as to principal and interest by the United States of America or any agency or instrumentality thereof or by any corporation which is wholly or partially owned or which has been established by the United States of America or any agency or instrumentality thereof or by any trust or trusts established by the United States of America or any agency or instrumentality thereof. In addition, a federal credit union would be able to invest in the securities, obligations, certificates or other instruments issued by any of these entities, if fully guaranteed as to principal and interest. The Act designates the specific governmental entities in which federal credit unions may invest their funds. They include Federal Land Banks, Federal Home Loan Banks, Federal Intermediate Credit Banks, Federal National Mortgage Association, Government National Mortgage Association, Student Loan Marketing Association, participation certificates issued by trusts, and others. The new language covers all of these institutions and provides future flexibility for credit unions to invest in the obligations of new governmental entities without further amending the Act.

Municipal obligations

Revised paragraph (7)(B) permits a federal credit union to invest in municipal obligations, i.e., obligations issued by any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and Panama Canal Zone, the several territories and possessions or any political subdivision thereof. Such obligations must be fully guaranteed as to principal and interest. There is no authority in the existing Act for investment in municipal obligations.

Leeway

Revised paragraph (7)(C) is what is commonly referred to as a "leeway" provision. It permits federal credit unions to invest up to 5 percent of their assets in the shares, stocks or obligations of any organization, corporation or association which strengthens or advances the development of credit unions or credit union organizations. Such investments would have to be approved by the NCUA.

Placing funds

Section 103(e) redesignates paragraph (9) as paragraph (8) and consolidates all of the provisions of the Act dealing with the institutions and types of accounts in which credit unions may place their funds.

Redesignated paragraph (8)(A) contains the authority for placing funds in insured savings and loan associations and insured mutual savings banks. This authority is contained in paragraph (9) of section 107 of the Act. The restriction on the authority to place funds only in an institution in the state in which the credit union does business is removed.

Revised paragraph (8)(B) contains the authority for placing funds in any federally or state insured credit union. Such funds could be placed in the forms of shares, share certificates, share deposits, demand or time deposits. The Act permits a federal credit union to place its funds in shares, share certificates or share deposits of federally insured credit unions only, as specified in section 107(8)(H).

Revised paragraph (8)(C) authorizes federal credit unions to invest in shares, share certificates, share deposits, demand or time deposits of central credit unions if specifically authorized by the investing credit union board of directors. Section 107(8)(G) of the Act authorizes federal credit unions to invest in shares or deposits of central credit unions. The amendment would conform the right to invest in central credit unions with the right to invest in other insured credit unions.

Revised paragraph (8)(D) permits a federal credit union to place its funds in a demand or time deposit of any bank insured by the Federal Deposit Insurance Corporation. This authority is presently contained in paragraph (9) of section 107 of the Act. However, the Federal Reserve Board has ruled that credit unions cannot have savings accounts in commercial banks. The inclusion of the words "time deposits" is intended to override that interpretation of the Federal Reserve and to make it clear that credit unions can open savings accounts at commercial banks.

Foreign banks

Revised paragraph (8)(E) deals with the authority of overseas credit unions to maintain demand deposits in foreign banks and restates the provisions contained in paragraph (9) of the Act.

Technical correction

Section 103(f) redesignates paragraph numbers to conform to the revised Act.

Money transfer instruments

Section 103(g) amends paragraph (13) of section 107 of the Act which contains the authority for credit unions to sell negotiable checks and money orders to their members. The amendment provides that a federal credit union can sell, purchase or handle any money transfer instrument to or for members. This more general language is designed to provide flexibility to the NCUA to use its regulatory powers to permit federal credit unions to adopt for their members new money transfer instruments that come on the market. The amendment also eliminates the requirement that the fee charged for such services should not exceed the direct and indirect cost incident to providing such service.

Discounting eligible obligations

Section 103(h) amends paragraph (14) of section 107 of the Act by expanding the authority of credit unions to discount member notes. It would permit credit unions to purchase, sell, pledge, discount or otherwise receive or dispose of, in whole or in part, any eligible obligations of its members. "Eligible obligations" is to be defined by the NCUA.

New powers

Section 103(i) adds two new paragraphs to section 107 of the Act.

New paragraph (14) would permit a federal credit union to sell or purchase all or part of its assets or to purchase or assume the assets or the liabilities of another credit union subject to regulations of the NCUA. The NCUA would be authorized to issue regulations implementing this authority.

Electronic funds transfer

New paragraph (15) would permit credit union members to transfer money to and from their accounts at any interval and by whatever means permitted by regulations of the NCUA. This would give federal credit unions the flexibility needed to respond to electronic funds transfer developments.

Incidental powers

Section 103(j) amends paragraph (15) of section 107, the incidental powers clause, to make it clear that incidental powers may be used by a federal credit union to meet the financial needs of the members and the member's family.

Management structure

Section 104 amends section 111 of the Act which deals with the management structure of federal credit unions. The amendments would permit a federal credit union to have any odd number of at least a five-member board of directors. The amendment would also permit a federal credit union to decide whether or not it wants a credit committee either member elected or board appointed. It also provides that only the names of the chairpersons of the credit and supervisory committees must be submitted to the NCUA. Now, the names of all the members of these committees must be submitted.

Officer's titles

Section 105 amends section 112 of the Act which deals with the officers of credit unions. The amendment simply gives federal credit unions the flexibility to designate the officers of the credit union with various titles including chairperson of the board, president, vice chairperson of the board, vice president. Under the Act, the selection of titles is limited.

Board of directors

Section 106 amends section 113 of the Act which deals with the board of directors. For the most part, this amendment simply separately identifies the powers of the board of directors. It provides that when a credit union decides to have an unelected credit committee, the board of directors can appoint the credit committee if the bylaws so provide. This section also vests the board with the authority to delegate its functions to committees with conditions and limitations. In addition, this amendment authorizes the board to determine the rates applicable to lines of credit and to authorize interest refunds on such classes of loans and under such conditions deemed fair. At the present time, interest refunds paid by credit unions choosing to do so must be uniform.

Credit committee and unsecured loan amount

Section 107 amends section 114 of the Act which deals with the credit committee. The amendment permits a credit union to determine whether or not it wants a credit committee and to determine whether or not the credit committee shall be elected by the members. The amendment also provides that applications for loans can be approved by a majority of the credit committee present at the meeting at which the application is considered. Presently, a majority of the entire committee and all committee members present must approve loan applications.

The amendment would also do away with the unsecured loan amount limit. The board of directors of each federal credit union would establish the unsecured loan amount limit. However, the 10 percent limitation on loans to an individual member would remain.

Statutory reserve requirement and reserves against demand deposits

Section 108 amends section 116 of the Act which deals with regular reserves. The amendment establishes a two-tier regular reserve formula by permitting federal credit unions with assets of more than $500,000 that have been in operation for more than four years to use a different, less stringent reserve requirement, and permits adjustment of the reserve requirements by the NCUA.

It also adds a new reserve requirement to the Act which would be applicable to the demand deposits or checking accounts of federal credit unions. The reserve against demand deposits would be held in interest-

bearing balances with the NCUA Central Liquidity Fund, in currency and in coin, or in a form to be prescribed by the Board of Governors of the Federal Reserve System. The percentage requirements, to range between 1 percent and 22 percent, are to be set by the Board of Governors after consultation with the National Credit Union Administration.

Dividends

Section 109 amends section 117 of the Act which deals with dividends to reflect more accurately and realistically the dividend related practices that must be applied to variable member accounts.

Technical correction

Section 110 contains a clarifying amendment to conform the types of claims made by members in liquidation to reflect all types of member accounts rather than only "shares". Member accounts include share, share certificate, share deposit, and demand deposit accounts.

Obsolete provisions

Section 111 simply eliminates from the Act some provisions that were originally enacted to require credit unions chartered in the District of Columbia to convert to federal status. At the time, the District of Columbia Code provisions dealing with credit unions in the District of Columbia were placed under the jurisdiction of the NCUA. These provisions are no longer needed.

TITLE II—RESTRUCTURING THE NATIONAL CREDIT UNION ADMINISTRATION

The National Credit Union Administration originally had a limited function to charter, examine and supervise federal credit unions. In recent years, it has been given authority over the share insurance fund which insures the member accounts of federal and state-chartered credit unions. And, this bill would create a Central Liquidity Facility within the National Credit Union Administration. For these reasons, it is deemed advisable to restructure the National Credit Union Administration so that it will be administered by a Board rather than by a single individual. Most of the amendments in this title are designed to implement the restructuring.

Definitions and terminology

Section 201 amends the definitions section of the Act to reflect the changes that are being made in the Act and corrects terminology as necessary.

Section 202(a) is the same as the present Act except that it vests the Board rather than an Administrator with the authority to manage the NCUA.

Three-member board

Section 202(b) provides that the National Credit Union Administration Board shall consist of three members having tested credit union experience. Members are to be appointed by the President with the advice and consent of the Senate. The President is to designate the Chairperson of the Board. In addition, it provides that the Chairperson shall be compensated at Level III of the Executive Schedule and that the other two board members shall be compensated at Level IV of the Executive Schedule.

Six-year term

Section 202(c) provides a six-year term of office for the board members. The term is to be six years. Staggered terms for initial appointees are provided.

Organization of board and transition

Section 202(d) imposes rules for Board including recordkeeping and reporting requirements. It also gives Administrator authority during transition until last Board member is approved.

Chairperson

Section 202(e) provides that the Chairperson of the Board shall be the official spokesperson of the Board in dealing with other government agencies and that the Chairperson shall designate each Board member's area of responsibility.

Conflict of interest

Section 202(f) is a standard conflict of interest provision prohibiting Board members from working for credit unions while in office or two years thereafter unless the member has served the full term.

Finances and audit

Section 202(g) contains the provision authorizing the NCUA to handle finances, contracts and various other administrative matters. It also provides for an audit.

Existing policies

Section 202(h) grandfathers all existing policies, procedures, rules and regulations until modified or withdrawn by the newly established Board.

Court review

Section 203(a) corrects some terminology that is inappropriate by removing the word "bankrupt" from the Act. It also provides for injunctions upon court review for credit unions whose charters have been revoked, suspended or placed in involuntary liquidation by the NCUA.

Incidental powers

Section 203(b) simply identifies as a separate paragraph a revised incidental powers clause of the NCUA.

Grade levels

Section 204 provides authorization for the NCUA to add sixteen new positions at super grade levels to reflect the increased responsibilities that the agency has and will be incurring as a result of this bill.

TITLE III—SHARE INSURANCE

Trust territories

Section 301(a) extends the share insurance provisions to credit unions operating in the trust territories of the United States. In the 93rd Congress, the Federal Credit Union Act was made applicable to those credit unions. This section also makes clerical amendments to correct terminology.

Accounts permitted by State law

Section 301(b) permits federally-insured, state-chartered credit unions to maintain whatever types of accounts are authorized by state law. At the present time, federally-insured, state-chartered credit unions may only maintain those types of accounts that have been approved by the Administrator of the National Credit Union Administration.

Clerical

Section 301 (c) and (d) are clerical and conforming amendments.

Insurance for demand deposits of State-chartered credit unions

Section 301(e) eliminates the provision that prohibits the National Credit Union Administration from insuring the demand deposit accounts of federally-insured, state-chartered credit unions.

Clerical amendments

Sections 301(f), 302, 303 and 304 contain clerical, conforming and technical amendments of minor substance.

TITLE IV—CENTRAL LIQUIDITY FUND

For many years, the credit union movement has been engaged in efforts to create organizations for the transfer of excess liquidity from one area to another. Throughout the country there are various central credit unions performing this function. But periods of disintermediation and economic uncertainty have advanced the concept of establishing a National Central Liquidity Fund under the auspices of the National Credit Union Administration while making full use of existing credit union organizations.

Section 401 adds an entire new subsection to the Federal Credit Union Act. The subchapter provides for the establishment of a National Credit Union Administration Central Liquidity Fund.

Purpose

Section 301 of the new subchapter is the findings and purpose clause. The purpose of the Liquidity Fund is to provide funds to meet the temporary liquidity needs of credit unions and to provide for the orderly transfer of funds among and between credit unions and other financial institutions.

Definitions

Section 302 of the new subchapter simply contains definitions for the terms used in the subchapter. Definitions are set forth for "members" of the Liquidity Fund, "state credit union," "federally-insured credit union," "state-insured credit union," and "paid-in and unimpaired capital and surplus."

Establishment and location

Section 303 of the new subchapter simply provides for perpetuity of the Fund and grants discretionary authority to establish regional and branch offices.

Management

Section 304 of the new subchapter provides that the management of the Liquidity Fund shall be vested in the National Credit Union Administration Board.

Initial expenses

Section 305 of the new subchapter permits the Liquidity Fund to borrow up to $500,000 from the Share Insurance Fund for the initial organizational and operating expenses. The loan is to be repaid within a reasonable period.

Capitalization

Section 306 (a) and (b) of the new subchapter requires the Board to open books for subscriptions of capital stock and provides that the capital stock of the Liquidity Fund shall be divided into shares having a par value of $50 each. After the initial offering, stock may be issued at prices to be fixed by the Board.

Stock subscriptions

Section 306(c)(1) of the new subchapter contains the provisions providing for credit union purchase of stock in the Liquidity Fund. Credit unions becoming members must purchase an amount equal to at least ½ of 1% of its paid-in and unimpaired capital and surplus. A minimum subscription of $50 is required. Only one-half of the required subscription must be transferred to the Liquidity Fund. The other half remains on call. Regular reserves may be reduced by an amount equal to the funds transferred to or held on call by the Liquidity Fund. Provisions are provided to vest the Board with the authority to adjust the amount of stock held by member credit unions.

Retiring stock

Section 306(c)(2) of the new subchapter provides that when the stock of any member credit union is retired, the credit union is to get at least what it paid for the stock but the Board retains the right of offset against any outstanding indebtedness.

Reports from credit unions

Section 306(c)(3) of the new subchapter permits the Board to require member credit unions to submit such reports and information as the Board deems necessary and appropriate.

Payment for stock

Section 306(d) of the new subchapter provides that member credit unions must pay for stock subscriptions in cash or with other assets deemed acceptable by the Board. Payments can be made in full with the application for membership or in installments over a 180-day period.

Nontransferable

Section 306(e) of the new subchapter provides that the stock of the Liquidity Fund

is non-transferrable and may not be hypothecated and that such restrictions are to be stated on the certificate.

Memberships

Section 306(f) permits Federal and state credit unions to become members of the Fund at any time. However, credit unions joining later than 180 days after the establishment of the Fund must wait for a period of 180 days before borrowing or receiving advances therefrom.

Withdrawal and expulsion

Section 306(g) of the new subchapter contains the requirements for withdrawal from membership. Any member may withdraw from membership 180 days after filing notice of intention to do so. Expulsion procedures require a hearing at the member's request and must be based on failure to comply with provisions of laws or regulations. Provision is made for retirement of debt and payment of stock upon expulsion.

Dividends

Section 306(h) of the new subchapter provides that all Liquidity Fund members shall share in dividend distribution without preference. The rates of dividends are to be determined by the Board.

Authority of board

Section 307 of the new subchapter vests the Board with the authority to act on behalf of the Liquidity Fund in various matters. Certain matters listed are the usual boiler plate provisions for agencies, e.g., the right to sue and be sued, to adopt a seal, to hire necessary employees, to contract, to delegate functions and to prescribe rules and regulations. More significant sections are described below.

Contracts with organizations

Section 307(m) of the new subchapter contains the authority for the Liquidity Fund to enter into contracts with various organizations to act as the agent or otherwise assist in the conduct of its business. Among the organizations with whom the Liquidity Fund can contract are credit unions, central credit unions and credit union organizations.

Issue debt instruments

Section 307(n) of the new subchapter permits the Liquidity Fund to issue bonds, debentures or other obligations to the Secretary of the Treasury. It also permits the issuance of similar obligations to the private market with a government guarantee. The aggregate of such obligations issued to the private market cannot exceed 20 times the surplus and paid-in capital of the Liquidity Fund.

Deposits

Section 307(o) of the new subchapter contains the authority for the Liquidity Fund to make deposits in federally-insured commercial banks, mutual savings banks and savings and loan assocations and in insured credit unions and member credit unions. In addition, financial institutions, including central credit unions, acting as agents for the Liquidity Fund may be recipients of such deposits. Such deposits may be made on a demand or time basis.

Purchase of notes

Section 307(p) of the new subchapter permits the Liquidity Fund to purchase from member credit unions notes, drafts or other obligations. The limits of such purchases are to be established by the Board.

Invest in Government obligations

Section 307(q) of the new subchapter contains the authority for the Liquidity Fund to invest assets in obligations of the United States or any agency thereof.

Borrowing from share insurance fund

Section 307(r) of the new subchapter provides that the Liquidity Fund may borrow from any source, including the Share Insurance Fund subject to security and interest pursuant to terms and conditions to be established by the Board.

Incidental powers

Section 307(s) of the new subchapter contains the incidental powers clause authorizing the Board to exercise the powers specifically granted and such incidental powers as are necessary to carry out the provisions of the Liquidity Fund subchapter.

Advances to member credit unions

Section 308(a) of the new subchapter contains the standards and requirements that are to be applied to advances that are to be made by the Liquidity Fund to member credit unions. The Board is vested with the authority to determine the security for advances as well as the terms, conditions and maturities. Certain limitations are placed on certain types of security. Advances secured by obligations of the United States may not exceed the face value of such obligations. The Liquidity Fund may require additional security when deemed necessary and the Board is to determine the aggregate amount of outstanding advances that may be made to any one member of the Liquidity Fund.

Treasury backing

Section 308(b) of the new subchapter permits the Liquidity Fund to draw on the Treasury an amount not to exceed $500,000,000. This is an emergency draw which is to be used in the event that there are insufficient funds in the Fund to meet its obligations. Advances from the Treasury are to bear a rate of interest to be determined by the Secretary of the Treasury as provided.

Annual report

Section 309 of the new subchapter requires the Board to submit to the President and to the Congress an annual report of its activities. Such report may be included in the Board's annual report as required by subchapter I.

Reimbursement for costs

Section 310 of the new subchapter contains the authority for the Liquidity Fund to reimburse the Board for all costs incurred in administering the Liquidity Fund. Receipts derived for such purposes shall be deposited in a special deposit account with the Treasurer of the United States.

Tax exemption

Section 311 of the new subchapter provides that the Liquidity Fund is to be tax exempt except that real property and tangible personal property may be subject to federal, state and local taxation to the same extent as similar property is taxed.

Audit of financial transactions

Section 312 of the new subchapter requires an annual audit of the Liquidity Fund by the General Accounting Office.

Conforming amendment

Section 402 amends section 107 of the Act to give federal credit unions the power to participate fully in the Central Liquidity Fund.

TITLE V—CLERICAL AMENDMENTS

Section 501 contains clerical amendments which conform the provisions of this entire chapter to the amendments contained in this bill. For the most part, such clerical amendments consist of striking out "Administrator" and inserting in lieu thereof "Board." Also, singular personal pronouns are changed to plural personal pronouns where appropriate.

By Mr. INOUYE:

S. 229. A bill to amend chapter 35 of title 38, United States Code, to permit children who are eligible for educational assistance under such chapter to pursue a program of education under such chapter exclusively by correspondence; to the Committee on Veterans' Affairs.

Mr. INOUYE. Mr. President, to those who have lost a spouse or parent in the service of our country, the United States owes a deep obligation. Traditionally, the Government has provided opportunities aimed toward alleviating the economic hardships caused by the disability or death of the veteran.

Perhaps the most significant contribution the Government can give to these families is in the form of education assistance. In 1958, the Congress committed itself to aiding families of the deceased or disabled veteran "in attaining the educational status which they might normally have aspired to and obtained but for the disability or death of a parent." Toward this goal, we should strive to provide the widest possible range of educational opportunities for widows and dependents.

Correspondence courses have proven to be viable alternatives to institutional training. Under chapter 43 of the GI bill, which permitted veterans to enroll in correspondence schools, many veterans successfully completed courses by correspondence and, as a result, were able to makeup for educational deficiencies and command better salaries. Six years ago Congress recognized the value of these courses by extending their unique benefits to wives and widows of disabled or deceased veterans. For those eligible people who have children or lack transportation, correspondence courses provide a means toward educational betterment which would otherwise be impossible.

Yet, dependents of disabled or deceased veterans—to whom Congress promised a broad scope of educational options—do not presently have the same opportunity. Though dependents can receive full benefits for attendance at a regularly university, they are prohibited from taking any courses of correspondence.

The distinction seems to be an arbitrary one. This bill would rectify this situation by permitting eligible dependents to pursue a program of education through correspondence, thereby making available the same educational opportunities now offered to widows and veterans. It would be but a small compensation for the loss or disability of a beloved parent.

Mr. President, I ask uanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 229

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1734(b) of title 38, United States Code, is amended by striking out "wife or widow" and inserting in lieu thereof "person".

Mr. INOUYE:

S. 230. A bill to amend the Federal Water Pollution Control Act relating to the discharge of pollutants into open ocean waters; to the Committee on Public Works.

Mr. INOUYE. Mr. President, today I am reintroducing legislation to amend the Federal Water Pollution Control Act, Public Law 92-500, to specifically exempt Hawaii and the other Pacific basin is-

lands from the current secondary sewage requirements.

On March 18, 1974, the Subcommittee on Environmental Pollution, Senate Committee on Public Works, held extensive hearings in Honolulu on this very matter. It is the overwhelming consensus of my constituents in Hawaii in both the private and public sectors that this current technological requirement is neither necessary, nor even beneficial for our unique ecological environment.

Unfortunately, however under our current law, it is not possible for the Administrator of the Environmental Protection Agency to grant an exemption regardless of the merits of the State's case.

Accordingly, today I am introducing this bill to provide the Administrator with this necessary flexibility. I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 230

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 301 of the Federal Water Pollution Control Act (33 U.S.C. 1311) is amended by adding at the end thereof the following new subsection:

"(g)(1) The Administrator may modify the requirements of subsection (b)(1) (B) and (C) of this section for any publicly owned treatment works discharging into open ocean waters upon application and proof satisfactory to the Administrator that compliance with such requirements is inappropriate. In determining whether to grant a modification, the Administrator shall consider the social, economic, and environmental costs involved in developing the designated treatment procedure.

"(2) For purposes of this subsection, the term 'open ocean waters' means those waters immediately contiguous to Hawaii, Guam, American Samoa, and the Trust Territory of the Pacific Islands.".

By Mr. INOUYE:

S. 231. A bill to require that skilled nursing homes furnishing services under the medicare and medicaid programs be adequately equipped with wheelchairs and other appropriate equipment and supplies; to the Committee on Finance.

Mr. INOUYE. Mr. President, today I am introducing legislation that will be a step in the improvement of our system of nursing homes. This bill would require those homes which furnish services under medicare and medicaid programs to be adequately equipped with wheelchairs and other appropriate equipment and supplies.

We have come to realize that our system of care for the aged and infirm has been a tragic failure in public policy. While many nursing homes provide a lifestyle which invigorates their patients, countless others can be rightly depicted as crimes against humanity. Sadly, many of these homes have become places to die, where life is gradually sapped away by a daily routine of humiliation and dehumanization.

The state of physical facilities in the nursing home has a direct bearing on the quality of health services provided. In many homes now receiving medicare and medicaid reimbursements, a lack of wheelchairs confines patients to beds and limits therapy to watching television. Such treatment has been empirically proven to be debilitating to the convalescent's mental and physical well-being. Where patients have enjoyed a variety of stimulating activities, dramatic improvement in their health and outlook on life has resulted.

The legislation that I am proposing would provide for the availability of wheelchairs for patients. While it would be too much to expect that these nursing homes will initiate programs of beneficial therapy, patients will be assured of freedom of movement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 231

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1861(j) of the Social Security Act is amended—

(1) by striking out "and" at the end of paragraph (13),

(2) by inserting "and" at the end of paragraph (15), and

(3) by adding immediately after paragraph (15) the following new paragraph.

"(16) is adequately equipped (as determined under regulations of the Secretary) with wheelchairs and other appropriate equipment and supplies;".

(b) The amendment made by subsection (a) shall take effect on the first day of the calendar month which begins more than 90 days after the date of enactment of this Act, and the Secretary of Health, Education, and Welfare, shall, prior to such date promulgate and have published in the Federal Register, the regulations which are referred to in section 1861(j)(16) of the Social Security Act (as amended by subsection (a) of this section).

By Mr. INOUYE:

S. 232. A bill to amend title 10, United States Code, so as to provide that the Chief of the Biomedical Sciences Corps of the Air Force shall be a brigadier general, and for other purposes; to the Committee on Armed Services.

Mr. INOUYE. Mr. President, today I am introducing legislation to amend title 10 of the United States Code so as to provide that the Chief of the Biomedical Sciences Corps of the U.S. Air Force shall be appointed to the rank of brigadier general.

The U.S. Air Force Biomedical Science Corps has approximately 1,300 officers assigned to its 15 diverse scientific specialities. These include professionals trained in the area of clinical psychology, podiatry, optometry, pharmacy, dietetics, bioenvironmental engineering and aerospace physiology. Unfortunately, however, it has recently come to my attention that in the proud 26-year history of the corps, no biomedical sciences officer has ever been promoted to star rank. This, as shown in the table below, is in sharp contrast to the 1/200 ratios currently achieved by their attorney and physician colleagues:

Group and approximate strength, summer 1975	*Generals*	*Ratio*
Biomedical scientists, 1,300	0	-----
Lawyers, 1,200	6	1/200
Chaplains, 900	2	1/450
Dentists, 1,500	1	-----
Nurses, 3,800	1	-----
Physicians, 3,000	15	1/200
All AF officers, 100,000	400	1/250

There is no justification for this apparent discrimination against a whole class of dedicated officers who serve the field of medical science as well as our Military Establishment. The bill I am authoring will assure the recognition of the importance of their service.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 232

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8036 of title 10, United States Code, is amended by inserting "(a)" immediately before "There is" and by adding at the end thereof the following:

"(b) The Secretary shall appoint the Chief of the Biomedical Sciences Corps from those officers of the Air Force Biomedical Sciences Corps whose regular grade is above captain. The Chief serves during the pleasure of the Secretary, and has the grade of a brigadier general while so serving, without vacating his or her regular grade. For purposes of determining the number of officers, general officers, or brigadier generals in the Air Force, any officers holding the grade of brigadier general under the provisions of this section shall be disregarded.".

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 233. A bill to provide for a greater utilization of the professional services of qualified professional psychiatric nurses in the medicare and medicaid programs; to the Commmittee on Finance.

Mr. INOUYE. Mr. President, I am today reintroducing legislation which I introduced last year which would amend the Social Security Act to provide for a greater utilization of the professional services of qualified professional psychiatric nurses under medicare and medicaid programs.

I believe that the changes in the social security law which I am proposing would have a most beneficial impact on the delivery of mental health services especially in helping to assure such services in rural and inner-city areas where they are all too frequently in short supply today.

The specialist in psychiatric and mental health nursing is distinguished by: graduate education; supervised clinical experience; and depth and amount of knowledge, competence, and skill in the practice of psychiatric and mental health nursing.

These nurses work in such diverse settings as: hospitals, community mental health centers, public health agencies, emergency and crisis care units, clinics, day and night care centers, offices, homes, schools, correctional institutions, camps, and industrial centers. In the role of primary care provider, the nurse assumes responsibility for continuous care for individuals and families, beginning at the point of client's entry into the mental health delivery system

and extending through the treatment and rehabilitation phases.

Direct nursing care functions include individual psychotherapy, group psychotherapy, family therapy, plus performing intake screening and evaluation, making home visits, establishing a therapeutic milieu, conducting health teaching activities, providing support and medication surveillance, and responding to client's needs through community action if that is appropriate.

Current third party reimbursement policy poses a problem which is frustrating and daily threatens the survival of competent practitioners who are accessible to people in need and who are providing valuable services. Let me cite a few examples:

A psychiatric-mental health nurse practitioner in a nearby Maryland county was billed $1,900 by a psychiatrist to review her 93 cases and sign off so the nurse could receive third-party reimbursement. The doctor reviewed the nurse's progress notes on each patient but did not see the patients.

A psychiatric nursing consultation group in Minnesota has repeatedly found that they can reduce the client's anxiety state at crisis points in the home thus preventing unnecessary hospitalization. The hospitalization room and board runs $70 per day while the cost of a nursing visit in the home is $40. The survival of this psychiatric nursing consultation group is threatened because medicare and other insurance programs do not provide for the recognition of nurse psychotherapists as a category for reimbursement.

A child psychiatrist nurse specialist working as a therapist in a group practice in California has been continually refused reimbursement "since the patient was not seen initially by a psychiatrist who states that the child needed therapy." The third-party payer insisted that it needed "proof" that a nurse can do psychotherapy. Social workers and psychologists in the same agency were reimbursed.

These examples can be multiplied many times throughout the country. I believe that they illustrate the need for change in the social security law. There is one provision of this proposal which I would especially like to bring to my colleagues' attention, and that is the requirement that all intermediate care facilities and all skilled nursing facilities shall provide for the services of a qualified professional psychiatric nurse on at least a consultant basis, as a condition for receiving medicare or medicaid reimbursement. I do not like to suggest blameworthiness or culpability. However, I have been deeply saddened by the continuing revelations of inadequate care and treatment for our elderly, and most strongly feel that positive action must now be taken. In this area, there are many services which a psychiatric-mental health nurse can provide to medicare patients. For example:

Supervision of elderly patients when they leave State mental hospitals or other institutions, helping them to reintegrate into the community, coordinating their care with other health care professionals, intervening in crisis, counseling families to aid in readjustment, and making home visits.

Providing psychosocial support to elderly patients in their homes and thus preventing unwanted and expensive institutionalization.

Health teaching to promote psychosocial adaptation to the aging process in the community and in homes of the elderly.

Medication surveillance and instruction geared to the needs of the elderly and consultation to nursing homes, extended and intermediate care facilities, hospitals and State institutions on the special needs of the mentally ill elderly patient.

Over the months since I first introduced this legislation we have seen in the public press many new accounts of the continuing inadequate care and treatment of our elderly and especially the mentally ill aged. I strongly feel that passage of this bill could contribute greatly to improved care for the elderly and open up a source of assistance that is now too often denied because of our outmoded reimbursement requirements.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 233

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1861(j)(4) of the Social Security Act is amended by—

(1) striking out "and" at the end of clause (A) thereof, and

(2) by inserting immediately before the semicolon at the end thereof the following: ", and (C) provides for having a qualified professional psychiatric nurse available, on at least a consultant basis, to assure that necessary psychiatric nursing services are furnished,".

(b) Section 1861(r) of the Social Security Act is amended by—

(1) striking out "or" at the end of clause (4) thereof, and

(2) inserting immediately before the period at the end thereof the following: ", or (6) a qualified professional psychiatric nurse who is licensed by the State in which such nurse performs such function or action, but only with respect to functions or actions which such nurse is legally authorized to perform as a registered nurse by the State in which he or she performs them and, then, only for purposes of section 1861(s)(1), 1861(s)(2)(A), for purposes of making a certification of the type required by section 1814(a)(2)(A), and for purposes of the meeting of the requirement imposed with respect to psychiatric hospitals that each patient of such a hospital be under the care of a physician".

(c) Section 1861 of such Act is further amended by adding at the end thereof the following new subsection:

"QUALIFIED PROFESSIONAL PSYCHIATRIC NURSE

"(aa)(1) The term 'qualified professional psychiatric nurse', when used in connection with the performance of any function or action, means an individual who—

"(A) is licensed to practice nursing by the State in which such function or action is performed,

"(B) holds a master's degree in psychiatric nursing or a related field from an accredited educational institution, and

"(C) is certified as a psychiatric nurse by the duly recognized professional nurses organization.

"(2) An individual who meets the conditions prescribed by clauses (A) and (C) of paragraph (1), but does not meet the condition prescribed by clause (B) of such paragraph, shall, nevertheless, be deemed to be a qualified professional psychiatric nurse with respect to any particular function or action performed by such individual if such individual performed such function or action under the supervision of a person who meets the conditions prescribed in clauses (A), (B), and (C) of paragraph (1).".

(d) The amendments made by this section shall be applicable only with respect to services furnished after the month which follows the month in which this Act is enacted.

SEC. 2. (a) Section 1902(a) of the Social Security Act is amended—

(1) by striking out "and" at the end of clause (35) thereof,

(2) by striking out the period at the end thereof and inserting in lieu thereof a semicolon, and

(3) by adding after clause (36) thereof the following new clauses:

"(37) provide that, with respect to mental health services which are covered under the State plan, payment will be made for professional services furnished by a qualified professional psychiatric nurse who is legally authorized to provide them;

"(38) provide that payment under the State plan will not be made for services furnished by any intermediate care facility or skilled nursing facility unless such facility provides for having a qualified professional psychiatric nurse available, on at least a consultant basis, to assure that necessary psychiatric nursing services are furnished to the patients in such facility; and

"(39) provide that payment under the State plan will not be made for inpatient services furnished by any psychiatric hospital unless, in the operation of such hospital, there is extended to qualified professional psychiatric nurses, with respect to professional services which both physicians and qualified professional psychiatric nurses are authorized to provide, the same staff and similar privileges as are extended to physicians caring for patients in such hospital. Admissions to such hospitals by qualified professional psychiatric nurses will be based on nursing diagnoses or a determined functional diagnosis.".

(b) Section 1905 of such Act is amended by adding at the end thereof the following new subsection:

"(l)(1) The term 'qualified professional psychiatric nurse', when used in connection with the performance of any function or action, means an individual who—

"(A) is licensed to practice nursing by the State in which such function or action is performed,

"(B) holds a master's degree in psychiatric nursing or a related field from an accredtied educational institution, and

"(C) is certified as a psychiatric nurse by the duly recognized professional nurses organization.

"(2) An individual who meets the conditions prescribed by clauses (A) and (C) of paragraph (1), but does not meet the condition prescribed by clause (B) of such paragraph, shall, nevertheless, be deemed to be a qualified professional psychiatric nurse with respect to any particular function or action performed by such individual if such individual performed such function or action under the supervision of a person who meets the conditions prescribed in clauses (A), (B), and (C) of paragraph (1).".

(c) The amendments made by this section shall take effect on January 1, 1978.

By Mr. INOUYE:

S. 234. A bill to provide Federal programs of educational, employment, and other assistance to areas with heavy concentrations of foreign-born persons; to

the Committee on Labor and Public Welfare.

Mr. INOUYE. Mr. President, today I am reintroducing a measure which would provide Federal financial assistance to gateway cities and States with large numbers of foreign-born immigrants to meet their social, health, and economic needs.

Hawaii has become home for many foreign-born immigrants being one of the top 10 States in our country with the largest number of foreign-born residents, the three leading States being New York, California, and Pennsylvania. Thus, we have a situation in which a few States have been asked to bear a disproportionate share of a national responsibility.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 234

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "New Americans Education and Employment Assistance Act".

DECLARATIONS AND FINDING

SEC. 2. The Congress finds and declares that—

(1) many foreign-born persons in the United States lack sufficient education to function adequately in our technological society;

(2) the lack of adequate education prevents many such persons from having satisfactory employment opportunities;

(3) newly arrived foreign-born Americans also experience difficulty in such areas as food, housing, and health;

(4) the needs of newly arrived foreign-born Americans may place heavy financial strains on the communities in which they reside;

(5) a number of "gateway cities" exist where such persons reside in great numbers, thereby placing disproportionate burdens on particular areas of the country;

(6) the policies under which persons move to the United States are set and determined by the Federal Government; and

(7) the Federal Government therefore has a responsibility to assist those States and cities having concentrations of foreign-born populations in meeting the special needs thereby thrust upon such communities.

DEFINITIONS

SEC. 3. As used in this Act—

(1) the term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, and American Samoa;

(2) the term "immigrant" means a foreign-born individual residing in the United States whose residence is based on a permanent residence visa (but does not include any person in the United States for purposes of representing other governments in a diplomatic or similar capacity) and American Samoans residing in any part of the United States, other than American Samoa; and

(3) the term "gateway city" means any city or unit of local government having a population of fifty thousand or greater, having more than 5 per centum of such population who are immigrants.

ENTITLEMENT

SEC. 4. (a) The Secretary of Health, Education, and Welfare (hereinafter in this Act referred to as the "Secretary") shall determine the entitlement of each State and each gateway city under subsection (b) for each fiscal year at least six months prior to the commencement of that fiscal year.

(b) (1) The entitlement of each State for the purposes of grants under section 5 for each fiscal year shall be the number of dollars resulting from multiplying the number of immigrants who arrived in that State during the immediately preceding calendar year by $1,000.

(2) the entitlement of each gateway city within a State for the purposes of grants under section 6 shall be subtracted from the entitlement of that State and shall consist of that percentage of the State entitlement which is equal to the number of dollars resulting from multiplying the number of immigrants who arrived in that State during the immediately preceding calendar year who reside in such city by $1,000.

GRANTS TO STATES

SEC. 5. The Secretary shall make grants each fiscal year to each State, on such terms and conditions as he shall establish, to carry out the purposes of this Act, for programs in education, job training, counseling (including health counseling), orientation, and other similar activities for the benefit of immigrants. The total of such grants shall equal in the case of each State the entitlement of that State under section 4(b)(1) for such fiscal year, but if sufficient funds are not appropriated for that purpose the amounts of grants to each State shall be reduced pro rata by the Secretary.

GRANTS TO GATEWAY CITIES

SEC. 6. The Secretary shall make grants each fiscal year to each gateway city, on such terms and conditions as he shall establish, to carry out the purposes of this Act, for programs in education, job training, counseling (including health counseling), orientation, and other similar activities for the benefit of immigrants. The total of such grants shall equal in the case of each State the entitlement under section 4(b)(2) for such fiscal year, but if sufficient funds are not appropriated for that purpose, the amount of grants to each gateway city shall be reduced pro rata by the Secretary.

DISCRETIONARY GRANTS TO GATEWAY CITIES

SEC. 7. (a) The Secretary is authorized to make additional grants to gateway cities, on such terms and conditions as he shall establish in addition to the requirement of subsection (b), to carry out the purposes of this Act, for programs in education, job training, counseling (including health counseling), orientation, and other similar activities for the benefit of immigrants.

(b) No grant made under subsection (a) shall exceed 75 per centum of the cost of the total annual programs and activities conducted by such city under this section, but the remaining 25 per centum may be supplied by such city from funds granted under section 6.

EMPLOYMENT LOCATION ASSISTANCE

SEC. 8. (a) The Secretary is authorized to make grants of up to $250 to each immigrant arriving in the United States not more than one year prior to the making of the grant, to enable such immigrant to travel for the purpose of changing residence from any gateway city to any State other than that in which such gateway city is located, if an employer in the place to which such immigrant is to travel under the grant certifies that such employer will employ that immigrant. In addition, the Secretary is authorized to make grants of up to $250 to each member of an immigrant's immediate family to enable such member to accompany the immigrant in travel assisted under this subsection.

(b) The United States Employment Service is directed to establish and maintain programs in gateway cities of job referrals for immigrants to jobs available in States other than that in which such gateway city is located.

AUTHORIZATION OF APPROPRIATIONS

SEC. 9. (a) There are authorized to be appropriated such sums as are necessary for the purposes of grants under sections 5, 6, and 7. If sufficient funds are not appropriated for any fiscal year for the purposes of grants under sections 5, 6, and 7 no funds shall be allocated under section 7 until all funds available shall have been allocated under section 6, and no funds shall be allocated under section 6 until all funds available have been allocated under section 5.

(b) There is authorized to be appropriated the sum of $20,000,000, to remain available until expended, for grants and programs under sections 8(a) and 8(b).

By Mr. ABOUREZK:

S. 236. A bill to amend the Veterans' Education and Employment Assistance Act of 1976; to the Committee on Veterans' Affairs.

Mr. ABOUREZK. Mr. President. today I am introducing a bill which would eliminate a part of section 205 of Public Law 94–502, the Veterans' Education and Employment Assistance Act of 1976. Included as a part of section 205 is the "85–15 clause" which prohibits colleges and universities from receiving VA educational benefits for classes in which more than 85 percent of the enrollment is composed of students having their fees paid by either the Federal Government or the institution themselves. This section the law extended the past rule to cover any courses in all schools.

I fully recognize that one of the main purposes of this clause was to limit abuses in VA educational aid and to save the Government some money. In fact, the savings were estimated at $31.6 million. But at the same time, by arriving at the 85 percent requirement by counting all aid to students drastically limits the educational opportunities for eligible veterans. Any kind of subsidy, no matter how small it is, now counts toward the limit. Academic counseling and determination of major programs to achieve career goals will be severely confined by limiting classes to those not having 85 percent of their students on aid.

I have long been an active and strong supporter of the continuation of the GI bill for educational benefits and I am concerned that this 85–15 clause closes the educational opportunities door to veterans. There is no reason why the majority of veterans should suffer because of the abuses of a small minority.

The 85–15 provision affects virtually all veterans who want to enroll in colleges and universities and it affects the institutions themselves. Many of the schools will be required to install costly record-keeping methods to comply with the law and many additional manhours will be necessary for determining, class by class, those which have 85 percent of their students on financial assistance.

There are abuses in the VA educational program but I do not feel this 85–15 clause will eliminate them. In fact, it creates additional problems. There will always be abuses in the educational system but the Veterans' Administration working together with the institutions will have sufficient power to pinpoint them and to deal with them on a case-by-case basis.

But the 85–15 clause does have a po-

tentially devastating impact on the future of many veterans. I urge my colleagues to join me in supporting this bill to eliminate the 85–15 clause of the Veterans' Assistance and Employment Act of 1976.

I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 236

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 205 of the Veterans Education and Employment Assistance Act of 1976 (Public Law 94–502) 90 Stat. 2387, is amended by:

(a) inserting the word "and" after the semicolon at the end of subsection (2); and (b) striking all after the words "standard college degree," in subsection (4) to the end of the section, and inserting in lieu thereof a period.

By Mr. BELLMON (for Mr. BARTLETT):

Mr. BELLMON. Mr. President, on behalf of the distinguished Senator from Oklahoma (Mr. BARTLETT), I introduce a bill and I ask unanimous consent that a statement by Senator BARTLETT be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR BARTLETT

Today I am introducing a bill to amend the Meat Import Law in order to close a technical interpretation which has allowed foreign importers to send partially processed meat into this country, thereby avoiding the formula limitations. Our domestic cattle industry has suffered greatly from numerous causes, and many individuals have been irreparably harmed. The bill I am introducing today would help to relieve the serious financial condition of the livestock producers of the United States.

My bill would clarify the definition found in the headnote to Part 2 of Schedule 1, and would affect two items in the schedule. These two items are meats which are partially prepared outside of this country with the remaining processing being done in the foreign trade zone. This allows the meat to bypass the formula restriction.

The first item 107.60 which is meat valued over 30 cents per pound has shown the following pattern:

Year:	*Millions of pounds*
1970	25.5
1971	41.6
1972	24.4
1973	6.0
1974	3.4
1975	2.7
1976 (first half)	5.6

As you can see, this item has shown great fluctuations, but is on the increase this year.

The other item, 107.55, which is meat not valued over 30¢ per pound, has shown an equally erratic pattern, but is on the increase:

Year:	*Millions of pounds*
1970	0.7
1971	0.6
1972	0.3
1973	0
1974	0.3
1975	0.7
1976 (first half)	0.2

The two terms dealt with in this are "fresh, chilled or frozen" and "prepared or preserved," and are currently defined as follows:

"Fresh, Chilled, or Frozen" covers meats even though completely detendonized and deboned, but does not cover meats which have been prepared or preserved.

"Prepared or preserved" covers meats even if in a fresh, chilled, or frozen state if such meats have been ground or comminuted, diced or cut into sizes for stew meat or similar uses, rolled and skewered, or specially processed into fancy cuts, special shapes, or otherwise made ready for particular uses by the retail consumer; and also covers meats which have been subjected to processes such as drying, curing, smoking, cooking, seasoning, flavoring, or to any combination of such processes.

My bill would include within the meaning of "fresh, chilled, or frozen" that meat on which further preparation or preservation must be done after it reaches this country.

This bill, although very limited in nature, would aid our beleaguered cattle industry which will have to compete in this year, at current rates, with somewhere in excess of 10 million pounds of these two items. Our domestic cattle industry has endured great hardships, partly as a result of the present meat import laws. I therefore urge my fellow Senators to support this bill and show their good faith to the cattlemen of this country.

By Mr. DOLE (for himself and Mr. MCGOVERN):

S. 238. A bill to amend the Internal Revenue Code of 1954 to exempt farm trucks and soil and water conservation trucks from the highway use tax; to the Committee on Finance.

HIGHWAY USE TAX EXEMPTION

Mr. DOLE. Mr. President, I am very pleased to join with my distinguished colleague from South Dakota (Mr. MCGOVERN) in offering legislation to exempt vehicles used for agricultural and closely related purposes from Federal highway use tax liability.

USE TAX INEQUITY

Under different circumstances, I would be very reluctant to propose any further exemptions from a tax which has proved so successful in funding Federal road construction and maintenance. But an existing inequity demands immediate correction.

The highway use tax, which is imposed on most heavy road vehicles, is the means for generating highway trust fund revenues. Unfortunately, for purposes of use tax liability, the Internal Revenue Code fails to distinguish between commercial trucking firms, which use the Federal highway system on a regular basis, and those farmers and ranchers who own heavy vehicles, but seldomly use them on Federal highways, and only for agricultural rather than commercial purposes.

In my State of Kansas, for instance, a growing number of farmers and ranchers have purchased low-boy trailer trucks to carry their tractors and combines from one field to another. Yet these family farmers are subject to the same use tax burden which applies to large, interstate trucking firms.

CONSERVATION VEHICLES

A similar inequity exists in regard to vehicles which are used exclusively for soil and water conservation purposes. A recent survey conducted by the Land Improvement Contractors of America has found that these conservation vehicles are each subject to an average annual use tax of $175, despite the fact that the typical conservation vehicle travels less than 600 miles per year on Federal roads.

I understand that in Kansas some conservation contractors pay as much as $300 per year on trailer trucks which travel less than 1,000 miles annually on Federal highways. In such cases, the tax amounts to more than 33 cents per mile—an unreasonable burden.

By and large, the typical conservation contractor is a small businessman with limited operating capital. The average firm employs only six people and grosses under $100,000 per year. Profit margins on conservation jobs are traditionally low—under 10 percent. But the work they perform is absolutely vital to the future productivity of our soil resources. This is work that our tax system should encourage, not penalize.

Since the use tax is most burdensome to small contractors, our bill proposes to exempt firms with gross annual receipts of less than $950,000 from liability on vehicles used exclusively for conservation work. Hopefully, an exemption of this type will encourage a greater number of small rural contractors to bid on conservation jobs, and result in lowering the cost of this essential work.

COST TO TREASURY SMALL

The Internal Revenue Service does not calculate the total use tax revenue from farmers and conservation contractors, and it is therefore difficult to estimate accurately the fiscal impact of our bill. However, the Joint Committee on Internal Revenue Taxation has estimated that the annual revenue loss on conservation vehicles would not exceed $7 million. Since there are far fewer liable farm vehicles, the total annual loss to the Treasury would probably not exceed $10 million. This is a small price to pay for a greater measure of equity for American farmers, and for new incentives for soil and water conservation.

Exemptions from the use tax are now granted to derrick-drilling trucks, some logging trucks, and oversized vehicles. It is only fair to add farm and conservation vehicles to this list. I strongly recommend this bill to my colleagues in the Senate for timely and affirmative action.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 238

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4483 of the Internal Revenue Code of 1954, (relating to exemptions from tax on use of certain vehicles) is amended by adding at the end thereof the following new subsection:

"(d) FARM AND SOIL AND WATER CONSERVATION TRUCKS.—Under regulations prescribed by the Secretary, the tax imposed by section 4481 on the use of a highway motor vehicle shall not apply to a vehicle owned by an individual who is the owner, tenant, or operator of a farm if such vehicle is used primarily for farming purposes (within the meaning of section 6420(c) (3) or for transporting agricultural or horticultural commodities, livestock, bees, poultry, or fur-bearing animals or wildlife, or supplies, and equipment used in connection with such farming purposes, between his farm and other places; or used in soil and water conservation practices or in the transport of

equipment used for soil and water conservation. This subsection does not apply to a vehicle registered in the name of a corporation the gross receipts of which for the last taxable year exceeded $950,000, or which derived more than 50 percent of its gross receipts for such taxable year from activities other than farming or soil and water conservation."

SEC. 2. The amendment made by the first section of this Act applies to uses after June 30, 1977.

Mr. McGOVERN. Mr. President, during the 94th Congress, Senator DOLE and I introduced bills designed to correct inequities in the manner in which the highway use tax currently applies to vehicles used for agricultural and closely related purposes. We are introducing a bill combining these concerns.

The use tax is intended to generate highway trust fund revenues in order to offset increased road construction and maintenance costs associated with heavy vehicle operation. Some critics argue that the rates are too low—$3 per year for each 1,000 pounds of taxable gross weight of 26,000 pounds or more—but there are few who would quarrel with the principle of a use tax.

The overwhelming majority of those who pay the use tax are commercial truckers. As regular users of the road system, it is entirely appropriate to expect commercial truckers to contribute toward public expenses which are necessary to sustain their own industry.

Unfortunately, however, the current language of the law is so broad that it extends user tax liability to those relatively few persons who make very limited use of the public road system for agricultural rather than commercial purposes. In one case with which I am familiar, for example, the IRS found a farmer fully liable for the use tax on his truck despite the fact that he operated it 90 percent of the time on township roads or on his own farm. To make matters worse, this individual, as well as others from whom I have heard, had no idea that he might have to pay the tax until he received a bill from the IRS some 18 months after he registered the truck. My earlier bill, S. 2897 in the 94th Congress, was intended to exempt farm vehicles from the use tax.

In addition to farm trucks, the IRS has also found that vehicles used exclusively in soil and water conservation activities are liable for this tax. Even though a recent survey showed that the average conservation vehicle travels only 3,000 miles per year—and 80 percent of that on State and county roads—soil and water conservation vehicles continue to be subject to an average annual Federal tax of $175. In the 94th Congress, Senator DOLE introduced a bill, S. 17, in an effort to correct this unjust situation.

Mr. President, I do not think that it makes sense to treat farm trucks and soil and water conservation vehicles in the same way we treat commercial trucks for highway use tax purposes. I do not believe that it was the intent of Congress to equate the farmer transporting his own supplies or the small businessmen engaged in soil and water conservation with the long-distance trucker moving the Nation's freight.

Our bill would correct this situation by adding heavy trucks used for farm and soil and water conservation purposes to the list of exemptions from the highway use tax. In order to insure that the exemption is limited to family farmers and small soil and water conservation concerns, the amendment specifically excludes vehicles registered in the name of any corporation with gross receipts for the last taxable year in excess of $950,000 or which derived more than 50 percent of its gross receipts in that taxable year from activities other than farming or soil and water conservation activities.

If enacted, this measure will have a minimal effect on highway trust fund revenues. Revenue from farm trucks, for example, is so small that the IRS does not bother to segregate income from this source in compiling its own internal data. Where soil and water conservation vehicles are concerns, Senator DOLE has estimated that an exemption would cost the Treasury approximately $7 million per year. It can be argued that the cost of collecting the tax probably comes to a high percentage of the total revenue generated by this means.

I submit that this tax is little more than a nuisance. It penalizes farmers and small businessmen unfairly, produces little revenue and absorbs IRS time and energy which could better be expended elsewhere. I see no good reason to retain this discriminatory tax.

By Mr. BELLMON (for Mr. BARTLETT):

S. 239. A bill to amend Public Law 88–482; to the Committee on Finance.

Mr. BELLMON. Mr. President, on behalf of the distinguished Senator from Oklahoma (Mr. BARTLETT), I introduce a bill and I ask unanimous consent that a statement by Senator BARTLETT be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR BARTLETT

Today I am introducing a bill to amend the Meat Import Law in order to alleviate the serious financial condition of the livestock producers of the United States. Total cattle numbers are up, and the supply-demand situation is out of balance. Low beef prices and high grain costs have distorted the market as more and more cattle are going directly from the range to slaughter. In 1974 the ratio was approximately 45% non-fed to 55% fed slaughtered. For 1975, the ratio changed to approximately 35% non-fed to 65% fed.

The 1964 Meat Import Act was drafted in such a manner as to allow imports from other countries, primarily grass-fed beef straight from the range, to be increased in proportion to total domestic production, including non-fed and fed cattle. This approach to beef imports has been counterproductive and has further complicated an already difficult situation. It makes little sense to allow more imported beef into the country when there is greater domestic beef production and to allow less imported beef when there is lesser domestic production. The reverse, which does make sense, is the central provision of my bill.

While I understand that many cattle producers believe a total beef import embargo is justified, because of consumer and free international trade convictions of many members of Congress, it appears unlikely that such action would be taken by the Congress. In my opinion, the bill I am introducing is a reasonable compromise for all concerned.

Basically, it amends the Meat Import Law in two important ways: First, it would establish a new meat import base level for any one-year period of 750 million pounds, subject to adjustment either up or down based on a new domestic production ratio. This compares to a limit of 725.4 million pounds under the current Meat Import Law which was adjusted during the domestic overproduction of 1975 to 1.3 billion pounds. Second, future import adjustments will be based upon a responsive relationship to a 1969–72 base period. If the ratio of domestic grain-fed beef slaughter decreases in comparison to total slaughter, foreign beef imports would be reduced on an equivalent basis.

However, if this ratio increased above the 73 percent established under the base period, imports would increase accordingly. In such a case, we would exceed the 750 million pound level.

A brief example will illustrate how this would work: From 1969–72 the percentage of total slaughter which was grain-fed was 73 percent. This 1969–72 period reflects operation of a relatively stable market and is used for the base percentage. Since late 1973 there has been economic adjustment in the beef industry. This has taken the form of increased domestic production of non-fed beef, which must compete with foreign non-fed beef imports. The extent of this adjustment is evident in the fact that fed-cattle marketings in the last quarter of 1974 fell to 60 percent of the total beef slaughter, a decrease of 13 percent of fed cattle during the base period. The 13 percent decrease represents a 17.8 percent change from the base period of 73 percent. This 17.8 percent decline in fed-beef production would then be utilized to further reduce the level of foreign beef imports. Thus, the base of 750 million pounds would be reduced on a quarterly basis by 17.8 percent so that total beef imports for the quarter could not exceed 154.1 million pounds—616.5 million pounds at an annual rate.

The quarterly import limit of 154.1 million pounds is obtained by multiplying the 750 million-pound base limit by 17.8 percent, the percentage decrease in the ratio of fed to total domestic slaughter in the last quarter of 1974 compared to the fed to total domestic slaughter of the base period. This gives a figure of 133.5 million pounds which, when subtracted from the base level of 750 million pounds, gives the annual rate of 616.5 million pounds. Dividing by 4 gives us the fourth quarter of 1974 limit of 154.1 million pounds.

The 154.1 million pounds under the formula of this proposed amendment compares to 300 million pounds per quarter which could be imported under the present act and represents a reduction of foreign beef imports of nearly 50 percent when domestic cattle conditions are critical.

Many American livestock producers find themselves near bankruptcy today because of actions taken by this Government under the economic stabilization program. Consequently, I do not believe it to be unrealistic for the Federal Government to take some steps to alleviate the damage. Passage of this bill is one action we can take which would be beneficial to both producers and consumers in the long run.

Producers would know that large domestic beef production will not result in their being penalized by ever-increasing foreign imports. Consumers would benefit from a stabilized meat supply situation because, under our present meat import law, imports go down as domestic production decreases, while under my bill, periods of domestic production decreases would bring about increased imports.

This legislation is needed for the stability

it would bring, and I encourage the acceptance of this legislation.

ATTACHMENT 1

The figures for the examples stated in this testimony are as follows:

Yearly rate: $\frac{750*(rt)}{.73}$

Quarterly rate: $\frac{}{4}$

Where rt=fed-beef÷total slaughter.

#1 Where rt=0.60.
Quarterly imports=$\frac{750*.6}{.73}{4}=154.109.$

This would equa lan annual rate of 616.436 million pounds.

#2 Where rt=0.79.
Quarterly imports=$\frac{750*.79}{.73}{4}=202.93.$

This would equal an annual rate of 811.64 million pounds.

By Mr. DOLE (for himself and Mr. McGOVERN):

S. 240. A bill to amend the Soil Conservation and Domestic Allotment Act to provide an updated national direction to the conditions under which the Federal Government will provide financial assistance to agricultural producers for needed soil, water, wood, and wildlife conservation on agricultural lands; to the Committee on Agriculture and Forestry.

NEW DIRECTION FOR THE AGRICULTURAL CONSERVATION PROGRAM

Mr. DOLE. Mr. President, during the last session of Congress, I introduced S. 3299, a bill to update and redirect the agricultural conservation program—ACP. Since then I have received from informed groups and individuals many thoughtful and constructive suggestions on how to improve my bill. I am pleased today to introduce a new version of S. 3299, reflecting many of the expert concerns expressed to me.

Dating from 1936, the agricultural conservation program represents one of the earliest nationwide efforts at promoting sound conservation and erosion control practices on agricultural land. It is also the principal single channel of Federal soil, water, woodland, and wildlife conservation assistance.

Originally, the agricultural conservation program offered cost-share payments to farmers and ranchers for land use and production-oriented adjustments in addition to longer term conservation measures. Since 1944, however, the Department of Agriculture has attempted, with mixed success, to limit ACP assistance to erosion control measures which agricultural producers generally would not be likely to carry out to the needed extent without cost-sharing incentives.

ENDURING CONSERVATION PRACTICES

A principal purpose of my legislation is to direct the ACP toward an emphasis on enduring conservation and environmental enhancement practices which otherwise might not be undertaken by farmers and ranchers. These include practices aimed at:

Establishing long-lasting protective cover;

Improving or sustaining protective cover;

Conserving or safely disposing of water;

Preventing or abating agricultural-related pollution;

Providing protection against soil erosion and flood damage; and

Meeting special regional conservation needs.

Such enduring measures are especially needed in a time of heavy agricultural production and strict environmental requirements.

UPDATING THE ACP

At the inception of the ACP, farm incomes were low, farm technology was in its infancy, and many producers were unfamiliar with the benefits of conservation farming. The program provided then-needed incentives for liming and other basic soil building and conservation practices which were, at that time, unproven or untried by a majority of producers. Today, however, farmers and ranchers are well aware of the advantages of scientific production practices. But they still require financial incentives to undertake the more ambitious conservation projects such as the installation of terraces, grassed waterways, and shelter belts. In keeping with this new emphasis, I have provided for greater coordination between ACP and the Soil Conservation Service's conservation operations program. Since these projects are more costly than short-term, production-oriented practices, new flexibility in the amount of ACP payments is needed. My bill, therefore, authorizes the Secretary of Agriculture to set administratively the maximum payment limitation.

Several additional aspects of the current authorizing legislation are inconsistent with modern agricultural conditions. Among these is the provision concerning the apportionment of acreage allotments which is no longer applicable or operative under present farm programs. Another outdated provision concerns the incremental formula which proportionately increased the Government's share of the cost of a conservation measure totaling less than $200. I propose to delete these and other provisions which are no longer pertinent or necessary.

IMPROVED FUNDING SYSTEM

One weakness in the agricultural conservation program concerns the funding mechanism. Originally operating under a direct appropriation from the Congress, the program was shifted to an advance authorization funding system in 1944. I understand that the change that was made—simply was a bookkeeping manipulation to make the appropriation budget appear smaller for a single year in 1944. Unfortunately, this current advance appropriation system requires a great deal of paperwork and unnecessarily delays payments to cooperating producers.

Moreover, program funds must be spent within a year, or returned to the Treasury. This creates a use-it or lose-it management approach that results in waste and inefficiency.

My bill reestablishes direct appropriation funding, and stipulates that funds are available for obligation and payment until expended. This will enable the program to function on a continuous basis subject only to subsequent appropriations from the Congress. It will also eliminate the extra paperwork requirements resulting from the current funding system.

In addition, my bill provides that a percentage of appropriated funds be reserved for long-term agreements providing cost-share assistance over a period of several years. The present system discourages long-term agreements by requiring that the Federal share of all projects be charged to a single year's budget account.

Left unchanged is the basic funding authorization which has stood at $500 million since the program's inception in 1936.

NEW MISSION FOR ACP

Mr. President, we have now entered an era of all-out agricultural production to the great benefit of the Nation and the world. But fence-row to fence-row cultivation has taken its toll in our soil and water resources. Soil losses of 50 tons and more annually per acre are now being recorded in Iowa and other major producing areas—an increase in loss over recent past years. This chilling statistic suggests that we may be nearing the point of jeopardizing the means of future productivity. We are not yet facing a crisis situation, but a strengthened conservation effort on agricultural land is clearly indicated. An updated and redirected agricultural conservation program, operating at the current funding level, can go a long way toward accomplishing this task.

An important corollary mission of the program is to aid producers in complying with the National Environmental Policy Act, the Water Pollution Control Act, and other environmental laws and requirements. I am particularly concerned that farmers are assisted in complying with the soon-to-be implemented restrictions on surface runoff and other forms of nonpoint source pollution.

Mr. President, I conclude my introductory remarks by expressing the faith that my legislation will help the ACP regain its focus and once again become the efficient vehicle by which the public cooperates with farmers to make improvements in soil and water for the good of all.

I ask unanimous consent that the bill and a summary be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 240

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 7 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590(a)) is amended to read as follows:

"(a) Congress recognizes that agricultural producers, as the suppliers of the Nation's food and fiber and managers of private lands, have the responsibility for making the management decisions related to (1) changes in land use or cropping systems which are needed to conserve, develop, and protect soil and water resources on agricultural land;

(2) the installation of long term, enduring soil and water conservation measures to protect agricultural land from erosion, deterioration, and pollution by natural and manmade causes; (3) the improvement of water quality through the prevention and abatement of agricultural-related pollution. It is hereby declared to be the policy and purpose of this act to assist agricultural producers in attaining these objectives and thereby help assure (1) the continued supply of food and fiber necessary for the maintenance of a strong and healthy people and economy, and (2) the conservation of vital natural resources and enhancement of the environment. The activities necessary to attain these objectives shall be carried out to the maximum extent feasible in such a way as to benefit fish and wildlife resources; promote recreation; preserve open space and enhance natural beauty; preserve vital historic and archeological sites; maintain important aquatic areas to help prevent floods and improve water management; prevent pollution and environmental degradation; and avoid the creation of hazards to persons or animals."

SEC. 2. Section 8 of said Act (16 U.S.C. 590h) is amended by (a) striking the first three sentences of subsection (b) and inserting in lieu thereof the following:

"(b) The Secretary is authorized to carry out the policy and purpose specified in section 7(a) by providing financial assistance to agricultural producers, based on farm and ranch conservation plans approved by local conservation districts, where such districts are organized, for carrying out enduring conservation and environmental enhancement measures. Eligibility for financial assistance shall be based upon the existence of conservation or environmental problems which cause a reduction in the productive capacity of the Nation's land and water resources or cause a degradation of environmental quality.

The amount of financial assistance to be provided shall be that portion of the cost of effectuating the physical installation of conservation and environmental enhancement measures, which the Secretary determines is necessary. In determining level of payment, consideration will be given to—

"(1) The farmers' inability to carry out the needed measures with his own resources.

"(2) The amount of expected conservation or environmental benefit accruing to society.

"(3) The total cost of carrying out the needed measures.

"(4) The degree to which the farmer benefits from other public programs aimed at conservation and environmental enhancement.

"(5) The degree to which appropriate conservation or pollution abatement practices will be applied in the absence of financial assistance."

The Secretary, in formulating the national program, shall take into consideration:

"(1) The need to control erosion and sedimentation from agricultural land and to conserve the water resources on such land.

"(2) The need to control pollution from animal wastes.

"(3) The need to facilitate sound resource management systems through soil and water conservation.

"(4) The need to encourage voluntary compliance by agricultural producers with Federal and state requirements to solve point and non-point sources of pollution.

"(5) National priorities reflected in the National Environmental Policy Act and other current congressional and administrative actions.

"(6) The degree to which the measures contribute to the national objective of assuring a continued supply of food and fiber necessary for the maintenance of a strong and healthy people and economy.

"(7) The type of conservation measures needed to improve water quality in rural America."

(b) striking from the end of the first paragraph of subsection (b) the phrase ", and, wherever practicable, they shall be classified on two bases: (a) soil-depleting crop and practices, (b) soil building crops and practice.";

(c) striking subsection (c) and inserting in lieu thereof the following: "Funds appropriated for carrying out the purpose of this Act may not be utilized to provide financial or technical assistance for drainage or filling on wetlands designated as Wetland Types 3 through 20 in United States Department of the Interior, Fish and Wildlife Circular 39, Wetlands of the United States, 1956, or other equivalent reports issued subsequently.";

(d) striking subsection (d);

(e) striking the first paragraph of subsection (e) and inserting in lieu thereof the following:

"Payments made by the Secretary under subsection (b) to agricultural producers shall be divided among landlords, tenants, and sharecroppers in proportion to the extent such landlords, tenants, and sharecroppers contribute to the cost of carrying out the conservation or environmental enhancement measures.

"The maximum payment which may be made to any person shall be determined by the Secretary.";

(f) striking subsection (f); and

(g) striking the second sentence of subsection (g).

SEC. 3. Section 10 of said Act (16 U.S.C. 590j) is repealed.

SEC. 4. Section 12 of said Act (16 U.S.C. 590l) is repealed.

SEC. 5. Section 13 of said Act (16 U.S.C. 580m) is amended by striking "Production and Marketing Administration" wherever it appears therein and substituting "Agricultural Stabilization and Conservation Service" by striking "Administration" and substituting "Service".

SEC. 6. Section 15 of said Act (16 U.S.C. 5900) is amended by adding the following to the first paragraph and deleting the remainder of the section.

"The amount appropriated shall be available until expended. A specific amount of percentage of the appropriation shall be designated for long-term agreements. The Secretary shall distribute the funds available for financial assistance among the several States in accordance with their conservation needs, as determined by the Secretary."

SEC. 7. Subsection (a) and (e) of section 16 of said Act (16 U.S.C. 590p (a), 590p (e)) are repealed.

SEC. 8. The last proviso under the heading "CONSERVATION AND USE OF AGRICULTURAL LAND RESOURCES. DEPARTMENT OF AGRICULTURE" in the Act of June 16, 1938 (52 Stat. 710, 746; 16 U.S.C. 590h–1) is repealed.

SECTION-BY-SECTION SUMMARY

SECTION 1

Sets out the policy and purposes of the Soil Conservation and Domestic Allotment Act. It limits the Act to provisions pertaining to soil, water, woodland and wildlife conservation on agricultural lands. It reaffirms that agricultural producers are responsible for making management decisions that affect soil and water conservation and pollution prevention. States that the policy and purpose of the Act is to assist producers in carrying out soil and water conservation and pollution control so as to assure the future productivity of agricultural resources and to prevent environmental degradation from agricultural sources. Activities carried out under the Act are to be beneficial to wildlife as well as aesthetic, historical and environmental values of the community. It further explicitly cites the goal of improved water quality resulting from the reduction of nonpoint sources of pollution.

SECTION 2

Authorizes the Secretary to provide financial assistance to agricultural producers for carrying out enduring conservation measures. An emphasis is placed on enduring (as opposed to production-oriented) practices, and on long-term agreements based on conservation plans approved by local soil conservation districts.

The Secretary is required to develop annually a national program of recommended soil and water conservation and pollution abatement practices. But county ASC committees may develop other special practices needed to meet local conservation problems, subject to the approval of the State committee. In drafting the national program, the Secretary must consider, among other things, the need to plan a sound resource management system, the need for voluntary compliance by agricultural producers with Federal and State requirements to solve point and nonpoint sources of pollution, and the need to assure a continued supply of food and fiber.

No assistance can be given for drainage of wetland types 3 through 20. This is consistent with recent appropriations Acts.

The small cost-share increase (SCI) provision, which establishes a complex formula to increase the cost-share payment whenever annual cost-share earnings are less than $200 for a farm, is deleted. The administrative costs of this provision far outweigh the benefits to the agricultural producer since the maximum premium under the SCI is only $14.

In keeping with the new emphasis on enduring and long-term conservation practices, the Secretary is authorized to lift the ceiling which is currently imposed on the payment which may be made to any single cooperator.

SECTION 3

Deletes Section 10 of the Act which sets out the definition of the term "agricultural commodity" since all commodity references have been eliminated and such a definition is now unnecessary.

SECTION 4

Deletes Section 10 of the Act which authorizes the use of appropriated program funds for domestic and foreign market expansion, authorizes expenditures for the disposal of surplus commodities, and authorizes advances to farmers for the purpose of assisting them in acquiring crop insurance from the Federal Crop Insurance Corporation. This section is deleted since such authority exists in other legislation and is not needed for the purposes of this Act.

SECTION 5

Alters Section 13 of the Act to designate the Agricultural Stabilization and Conservation Service (ASCS), rather than the defunct Production and Marketing Service, as the administering agency.

SECTION 6

Specifies that appropriated program funds be carried over from one fiscal year to the next and remain available, until expended, for entering into obligations and making payments. It further provides that a percentage of appropriated funds be designated for long-term agreements and that the current system of advance authorization be replaced by direct appropriations.

SECTION 7

Deletes the provision of the Act which concerns obligation authority, since both appropriation and obligation authority are

contained in Section 6 of the bill. Also deletes reference to the Land Use Adjustment Program since authority for the program has expired.

SECTION 8

Deletes the section of the Act which authorizes the use of producer associations or any agency of the Government to assist in the efficient administration of the Naval Stores Conservation Program. The program is now administered through the ASC county committee system, and assistance from State forestry agencies is already authorized in Section 8(b) of the Act.

By Mr. THURMOND:

S. 241. A bill for the relief of Henry C. Fleming III; to the Committee on Armed Services.

HENRY C. FLEMING III

Mr. THURMOND. Mr. President, Mr. Henry C. Fleming III, of Greenwood, S.C., enlisted in the Marine Corps Reserve on February 3, 1976. He was assigned to initial active duty for training on June 30, 1976.

It was subsequently discovered that although his enlistment documents indicated his status as married with one dependent, his true marital status was married with one child but legally separated from his wife with a court order for support of the child.

Mr. President, an investigation was conducted by the Marine Corps regarding the circumstances of Mr. Fleming's enlistment. It was revealed that Mr. Fleming informed the recruiter of his marital status and was improperly advised by the recruiter not to indicate the existence of the child in order to save time and paperwork. Mr. Fleming agreed but later requested that the recruiter correct his enlistment documents. The correction was not accomplished.

All of the circumstances in Mr. Fleming's case were carefully reviewed at Headquarters, Marine Corps, and it was determined that, since his enlistment involved recruiter misfeasance, Mr. Fleming had never legally terminated his status as a civilian; that his enlistment was void from its inception; that the Marine Corps lacked jurisdiction over him; and that it was necessary to release him from military control as expeditiously as possible.

On October 22, 1976, Marine Corps Headquarters directed the Commanding General, Marine Corps Recruit Depot, Parris Island, S.C., to void Mr. Fleming's enlistment and release him from military control immediately. Mr. Fleming was released from military control on October 27, 1976, after performing his boot camp training in an outstanding manner.

Mr. President, in order to be discharged from an enlistment contract, a Marine must first have a valid contract. Since Mr. Fleming's enlistment was void from its inception, it was impossible to discharge him. The period of time which he spent with the Marine Corps was not considered active service and is not creditable as such.

It is current policy of the Department of Defense to suspend immediately payment of Government funds to an individual whose enlistment is believed to be void. If it is determined through investigation that the individual is serving a valid enlistment, payment of Government funds is authorized and the individual is entitled to all pay held in abeyance. If it is determined that the individual's enlistment is void, no further pay is authorized and all pay held in abeyance pending final determination in his case is retained by the Government.

Mr. Fleming's case has again been reviewed by the Marine Corps Headquarters. It has been determined that Mr. Fleming was not properly enlisted; that his contract was void from the beginning in acordance with the ruling of the Court of Military Apeals in *U.S.* v. *Russo*, 23 USCMA 511, 50 CMR 651 (1975). As a consequence, his status as a civilian was never terminated. He was properly released from military control, and all pay withheld from Mr. Fleming was properly witheld in consonance with applicable policies, procedures, and laws governing void contracts.

Mr. President, the Marine Corps is not authorized to pay Mr. Fleming for his last 27 days of recruit training, even though his enlistment was a Marine Corps error. Consequently, I am introducing a private relief bill to authorize the Government to pay Mr. Fleming $426.08 for his last 27 days of active duty with the Marine Corps.

Mr. President, I urge my distinguished colleagues to support this bill to correct an injustice. I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 241

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Navy is authorized and directed to pay, out of any funds available for the pay and allowances of Marine Corps personnel, to Henry C. Fleming III of Greenwood, South Carolina, the sum of $426.08 representing the amount that would have been paid to the said Henry C. Fleming III as pay and allowances for service as a member of the United States Marine Corps for the period beginning October 1, 1976, and ending October 27, 1976, had the enlistment of the said Henry C. Fleming III not been declared void by the Marine Corps as the result of misfeasance by recruiting personnel.

SEC. 2. No part of the amount appropriated by this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same is unlawful, any contract to the contrary notwithstanding. A violation of this section is a misdemeanor punishable by a fine in an amount not to exceed $10,000.

By Mr. CHURCH (for himself, Mr. JACKSON, Mr. MELCHER, Mr. HANSEN, and Mr. MCCLURE):

S. 242. A bill to provide for consideration of the comparative productive potential of irrigable lands in determining nonexcess acreages under Federal reclamation laws; to the Committee on Interior and Insular Affairs.

RECLAMATION EQUIVALENCY

Mr. CHURCH. Mr. President, on behalf of a distinguished group of Senators from the West, Mr. JACKSON, Mr. MELCHER, Mr. HANSEN, Mr. HATFIELD, and Mr. MCCLURE, I am sending to the desk a bill to provide for a greatly needed change in the law which governs our reclamation projects. I am particularly pleased that, as chairman of the Senate Interior and Insular Affairs Subcommittee on Energy Research and Water Resources, I am able to join my colleagues in cosponsoring a measure which can mean so much to the farmers of the arid West.

First, let me explain what the law is as it applies to most reclamation projects today. A cardinal principle on Federal reclamation projects is that there is a limitation on the area of land for which any one landowner can receive project benefits. That is, an individual is limited as to the quantity of his lands which are eligible to receive irrigation water from a Federal reclamation project. The basic eligible entitlement is 160 acres or in the case of a husband and wife, 320 acres. This philosophy of limiting the benefits accruing to an individual owner has not changed over the past 70 years and in fact should remain one of the basic principles of reclamation law. However, in some instances the application of a strict acreage limitation works a hardship on farm families and denies the vagaries of nature.

Soils within a project area may vary greatly in their productivity as may other conditions such as slope, exposure, or drainage. On a larger scale, projects in higher altitudes of Northern States may be subject to a short growing season. All of these factors, singly or in combination, can work against the farmer and ultimately defeat the promise implied by reclamation law and the Congress that the people who farm the land may earn a decent living as farmers.

The Congress has, from time to time, recognized on a project-by-project basis the need for departure from the 160-acre limitation as an across-the-board rule. Since 1958, language has been included in reclamation project authorizations which provides for a degree of flexibility in establishing acreages eligible to receive project water in order to reflect varied soils and growing conditions. This is the so-called class I equivalency concept which provides that in those instances where lands of relatively poor quality have been included in a Federal reclamation project, the Secretary of the Interior may increase the acreage limitation beyond 160 acres. The effect is to increase the size of an ownership eligible to receive water so that it would be the equivalent in productive value to 160 acres of class I lands.

The application of the class I equivalency concept has worked well for those projects authorized since 1958, but for the farmers on the many projects built earlier under the reclamation program, there is no flexibility for adjusting eligible acreages to reflect adverse natural conditions. The measure which I introduce today would provide that flexibility to the farmers on those projects which meet specific criteria contained in the bill.

As chairman of the Subcommittee on Energy Research and Water Resources, it was my privilege to take public and administration testimony on a similar

measure in the 94th Congress. At that time concern was expressed for safeguarding the rights of the landowners who would be affected by application of the class I equivalency concept and for assuring full opportunity for public participation in the decisionmaking process. The measure introduced today directly addresses those concerns by specifying that the actions by the Secretary in applying the class I equivalency concept are subject to the requirements of the Administrative Procedure Act of 1946.

It may be that as the subcommittee gathers additional information and comments regarding the application of the class I equivalency concept, the need will arise for further perfecting language to the measure. Be that as it may, the bill as introduced will provide a point of departure and a focus for comment on this aspect of the reclamation program. In turn, the subcommittee will provide a forum for those whose lands and lives would be affected should the measure become law to express their views and offer their suggestions for improvement. I am anticipating a keen interest on the part of those concerned with this measure and I am most earnestly soliciting their views as to how the proposal can be made more responsive to the needs of the farmers in the arid lands of the West.

The committee has already compiled an extensive factual record as a result of the August 26, 1976, public hearing and it is my intent to gather additional information. However, this legislation goes much further than the reams of statistics and cold facts. This legislation may spell the difference between survival and defeat for hundreds of family farms in the western United States.

I am hopeful that the measure will receive the attention of the full Senate in the near future.

By Mr. NELSON (for himself and Mr. JAVITS):

S. 243. A bill to amend the Small Business Act and the Small Business Investment Act of 1958; to the Committee on Small Business.

Mr. NELSON. Mr. President, I am introducing today with Senator JACOB K. JAVITS, ranking minority member of the Select Committee on Small Business, a bill to raise the Small Business Administration's program authorization levels for fiscal year 1977. This bill would raise the ceiling of the business loan fund from $6 billion to $6.8 billion, the small business investment company loan fund from $725 million to $775 million, and the surety bond fund from $56.5 million to $68.5 million. These increases, if enacted, will allow the SBA to operate at full strength throughout fiscal year 1977, ending September 30, 1977.

On Friday, January 7, the Senate Select Committee on Small Business held its first Small Business Administration legislative hearing under the powers given it by Senate Resolution 104, passed on April 29, 1976.

The House and Senate did not agree on a bill to increase the SBA's program ceilings during the second session of the 94th Congress. Because no bill was passed by the Congress, the SBA is fast approaching its statutory fund ceilings. When the SBA reaches 75 percent of its statutory ceiling on any of its loan funds, the agency is compelled to seek increased authorization levels from the Congress. Since the agency has exceeded the 75 percent level in certain programs, Mitchell Kobelinski, the SBA Administrator, came before the Senate Small Business Committee to request program ceiling increases.

He testified before the committee that the agency will reach its lending ceilings by January 31, 1977. If the ceiling is not increased, the SBA will have to reduce its activity by at least one-half, he said.

I ask unanimous consent that the text of the bill and the section-by-section analysis be inserted in the RECORD at this point and that the bill be appropriately referred.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 243

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Subparagraph 4(A) of section 4(c) of the Small Business Act is amended by striking out "$6,000,000,000" and inserting in lieu thereof "$6,800,000,000."

SEC. 2. Subparagraph 4(B) of section 4(c) of the Small Business Act is amended by striking out "$725,000,000" and inserting in lieu thereof "$775,000,000."

SEC. 3. Section 412 of the Small Business Investment Act of 1958 is amended by striking out "$56,500,000" and inserting in lieu thereof "$68,500,000."

SECTION BY SECTION ANALYSIS

SECTION 1

The total amount of loans, guarantees and other obligations or commitments heretofore or hereafter entered into by the Administration which are outstanding at any one time under Sections 7(a), 7(b)(3), 7(e), 7(h), 7(i) and 8(a) of the Small Business Act (under the business loan and investment revolving fund) is now limited by 4(c)(4)(A) to $6 billion. Section 1 would raise this subceiling to $6.8 billion.

SECTION 2

The total amount of loans, guarantees and other obligations or commitments heretofore or hereafter entered into by the Administration which are outstanding at any one time under Title III of the Small Business Investment Act of 1958 (under the business loan and investment revolving fund) is now limited to $725 million. Section 2 would raise this subceiling to $775 million.

SECTION 3

An increase is required in the capital authorized for the Surety Bond Guarantee Fund to finance the 1977 level for this program of $833 million. Section 3 would amend Section 412 of the Small Business Investment Act of 1958 by increasing the authorization to $68.5 million and thereby enable an appropriation of $36 million.

By Mr. THURMOND (for himself, Mr. CANNON, Mr. DOMENICI, and Mr. HATHAWAY):

S. 244. A bill to authorize the construction and maintenance of the General Draza Mihailovich Monument in Washington, District of Columbia, in recognition of the role he played in saving the lives of approximately 500 U.S. airmen in Yugoslavia during World War II; to the Committee on Rules and Administration.

Mr. THURMOND. Mr. President, last session, I introduced S. 2135, a bill to authorize the National Committee of American Airmen Rescued by General Draza Mihailovich to erect a monument in Washington, D.C.

This legislation passed the Senate unanimously, but in the rush toward adjournment, did not pass the House.

Mr. President, I am, therefore, reintroducing the identical legislation as that passed by the Senate last year to erect the General Draza Mihailovich Monument in Washington, D.C.

This monument is to be erected with funds solicited from the general public and will not cost American taxpayers 1 cent.

During World War II, the forces of General Mihailovich, a Yugoslav resistance leader, saved the lives of approximately 500 American airmen and returned them to safety in Italy. For this and his other services to the Allied cause, General Mihailovich was posthumously awarded the Legion of Merit by President Truman in 1948.

The surviving airmen involved in this dramatic rescue have recently petitioned Congress to enact legislation authorizing them to erect a monument to General Mihailovich. I am hopeful the Senate can again pass this legislation expeditiously, so the noble purpose for which it is designed can be accomplished.

Mr. President, when I originally introduced S. 2135, I made extensive remarks detailing the history and background of the Mihailovich movement. Mr. President, I ask unanimous consent that the text of the bill and the detailed analysis which was included in the RECORD on July 17, 1975, be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 244

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, pursuant to section 2 of this bill, the Secretary of the Interior shall permit the National Committee of American Airmen Rescued by General Mihailovich to construct and maintain a monument to General Draza Mihailovich, in recognition of the role he played in saving the lives of approximately five hundred United States airmen in Yugoslavia during World War II, as described in such committee's petition to Congress concerning the authorization of such monument. Such monument shall be located on public land within the District of Columbia, to be located according to plans approved by the National Capital Planning Commission, the Fine Arts Commission, and the Secretary of the Interior.

SEC. 2. The National Committee of American Airmen Rescued by General Mihailovich shall accept private funds which shall be the sole source for the construction and maintenance of such monument. The Secretary of the Interior shall only permit such committee to begin the construction of such monument when he determines that such committee has sufficient funds to complete such construction and to provide for such maintenance; except that such committee must have such funds no later than two years after the date of enactment of this Act.

ANALYSIS

During World War II, the United States and Great Britain initially supported the nationalist resistance movement in Yugoslavia, led by Gen. Drazha Mihailovich. Due to a tragic combination of errors and mistaken information, the Allies withdrew their support from Mihailovich at the end of 1943 and threw their weight behind the Communist resistance movement under the leadership of Marshal Tito. Despite his abandonment by the Allies, and despite the merciless war waged against him by both the Communists and the Nazis during 1944, General Mihailovich and his forces, known as the Chetniks, succeeded in rescuing some 500 American airmen who were shot down over Yugoslavia. Most of these men were safely evacuated to Italy in a series of dramatic air rescue missions, which picked them up from the heart of Nazi-occupied Yugoslavia and flew them to Italy.

President Harry S. Truman in 1948 posthumously awarded the Legion of Merit to General Mihailovich for his services in rescuing American airmen, and for his larger services to the Allied cause. Unfortunately, the State Department kept the award to Mihailovich classified "secret" for almost 20 years, for fear of offending the sensitivities of the Yugoslavia Communist Government.

Now, more than 30 years after their rescue, a group of American airmen have organized themselves into a National Committee of American Airmen Rescued by General Mihailovich and have launched a movement to build a memorial in Washington, D.C., dedicated in gratitude to the man who saved their lives. Today is the anniversary of General Mihailovich's execution. To mark this anniversary, the rescued airmen have assembled in Washington today and are holding a memorial service on the steps of the Capitol.

I am introducing this legislation in response to a petition I have received, signed by 26 of the rescued airmen and eight members of the Air Crew Rescue Mission that organized their evacuation from Yugoslavia. I would like to quote a few paragraphs from this petition:

"To say that General Mihailovich and his men saved our lives tells only a very small part of the story. Frequently, they had to fight off the Germans in order to rescue us. Because of Mihailovich's commitment to protect us at all costs, scores of innocent hostages were executed by the Nazis; the Nazis always knew when an American crew bailed out, and when they could find no trace of the crew, they assumed, quite correctly that they were being sheltered by the Chetniks. Those of us who were wounded received the best medical attention available, sometimes in underground hospitals. Desperately short of supplies, Mihailovich's men frequently went hungry themselves in *order* to feed us.

"All this we can never forget.

"Our ranks have begun to thin with the passage of years. But the years have no way diminished the admiration, affection and gratitude which we hold in our hearts for General Mihailovich and his gallant forces.

"Having consulted with each other, and confident that we speak for all of the 500 airmen who were rescued by the forces of General Mihailovich, the undersigned airmen have decided that it would be proper to give enduring expression to this gratitude by erecting a monument in Washington, D.C. with funds contributed by ourselves and by members of the American public, to "General Mihailovich, Saviour of American Airmen." This concrete expression of gratitude, we feel, would also be in complete harmony with American tradition.

"We respectfully petition the Congress of the United States to enact legislation permitting the erection of such a monument so that we may appropriately discharge what all of us regard as a sacred debt of honor—a debt of honor all the more compelling because Mihailovich in his lifetime received no recognition and no reward for the many services to the Allied cause of which President Truman spoke in his citation."

I can think of no better way of discharging this debt than to authorize these airmen to erect the monument they have in mind. I want to emphasize that this would be done with publicly subscribed funds and will not cost the American taxpayer one penny. Additionally, I was informed that the airmen want to avoid politics and that they intend to abstain from any propaganda against the Tito government—all they want to do is give enduring expression to their gratitude to General Mihailovich by erecting a monument in his memory. This will be a simple memorial, bearing on one side a plaque listing the names of 500 American airmen rescued by General Mihailovich, and on the other side the text of President Truman's citation in awarding the Legion of Merit to General Mihailovich.

By Mr. THURMOND:

S. 245. A bill to amend title 5, United States Code, to permit military service performed by an individual after 1956 to be credited under the civil service retirement program, even though such individual is eligible for social security benefits, but requiring the civil service annuity to be offset by the amount of his social security benefit that is attributable to his military service; to the Committee on Post Office and Civil Service.

Mr. THURMOND. Mr. President, in the last session of Congress, I introduced a bill, known as S. 2564, in behalf of military retirees who subsequently earn civil service eligibility and retire under the civil service retirement law.

When these retirees reach age 62, the law requires a recomputation of their retirement annuities which results in a substantial reduction because of their contribution to social security during military service since 1956. In view of this injustice, I believe it is important for this legislation to be considered by the Senate since the previous measure was never acted upon by the Post Office and Civil Service Committee. Consequently, I am reintroducing this bill which will prevent military retirees who earn civil service retirement credit from being penalized because they contributed to their own social security entitlements.

Mr. President, this bill will amend title 5, United States Code, to permit military service performed by an individual after 1956 to be credited under the civil service retirement program, even though such an individual is eligible for social security benefits. However, it will require the civil service annuity to be offset by the amount of his social security benefit that is attributable to his military service.

In order to help clarify the problem and explain this legislation, I have extracted the following part from my previous remarks in the Senate on October 22, 1975:

It is noted that section 8332(J) of title 5, United States Code, provides that a retiree's annuity must be recomputed when he becomes eligible for social security benefits. In this recomputation, his years of military service performed after December, 1956, are excluded in the computation of his civil service annuity. He will receive a reduced annuity and social security benefits, presumably because the latter would offset the reduction caused by excluding certain years of military service.

Mr. President, the purpose of this section of the law is perfectly clear. It prevents, and rightly so, the retiree from using military service in the computation of both civil service retirement and social security benefits. However, as presently written in the law, it is mandatory that this recomputation be made, even though it might drastically decrease the income an individual receives. Under the present law, when some reach age 62, civil service retirement will be recomputed, excluding as much or more than 9 years of military service.

Mr. President, I am proposing legislation to achieve this objective by offsetting at age 62 the amount of any social security benefit attributable to military service against the civil service retirement annuity.

The social security 'attributable to military service' is computed assuming that the only source of social security coverage is that which results from active military service. The years of military service would continue to be creditable in the social security system and any benefit to which the individual would be entitled under the social security system based on his lifetime covered earnings would be paid by the Social Security Administration. If the individual were not entitled to social security—for example, if he did not have sufficient social security coverage to warrant payment of a benefit—no offset would be accomplished from the civil service retirement annuity. On the other hand, if the individual were entitled to a social security benefit based on his life time covered earnings, a benefit amount equal to that which is attributable to military service would be offset from the civil service annuity; any benefit amount above that which is attributable to military service would be received in addition to the civil service annuity.

Consequently, I am proposing legislation to correct this inequity. . . . It will permit military service performed by an individual after 1956 to be credited under the civil service retirement program, even though such an individual is eligible for social security benefits. My proposal would provide for offset computations for retirees in this unique category. A retiree's civil service annuity would be reduced only by the amount equal to that which he will receive under social security.

There will be some additional cost resulting from enactment of this proposal because the amount of the social security offset will, generally, be less than the value of the military years of service used in computing civil service retired pay. However, this additional cost should be nominal. I believe the administration will recommend enactment of this proposed legislation.

Mr. President, I urge my distinguished colleagues to support this most worthwhile measure. I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 245

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8332(j) of title 5, United States Code, is amended to read as follows:

"(j)(1) Notwithstanding any other provision of this section, the period of an individual's services as a volunteer under part A of title VIII of the Economic Opportunity Act of 1964, and the period of an in-

dividual's service as a volunteer or volunteer leader under chapter 34 of title 22, shall be excluded in determining the aggregate period of service on which an annuity payable under this subchapter to the individual or to his widow or child is based, if the individual, widow, or child is entitled, or would on proper application be entitled, at the time of that determination, to monthly old-age or survivors benefits under section 402 of title 42 based on the individual's wages and self-employment income. If the service as a volunteer under part A of title VIII of the Economic Opportunity Act of 1964 or as a volunteer or volunteer leader under chapter 34 of title 22 is not excluded by the preceding sentence, but on becoming 62 years of age, the individual or widow becomes entitled, or would on proper application be entitled, to the described benefits, the Civil Service Commission shall redetermine the aggregate period of service on which the annuity is based, effective as of the first day of the month in which he or she becomes 62 years of age, so as to exclude that service. For the purpose of this subsection, the period of an individual's service as a volunteer or volunteer leader under chapter 34 of title 22 is the period between enrollment as a volunteer or volunteer leader and termination of that service by the President or by death or resignation, and the period of an individual's service as a volunteer under part A of title VIII of the Economic Opportunity Act of 1964 is the period between enrollment as a volunteer and termination of that service by the Director of the Office of Economic Opportunity or by death or resignation.

"(2) Notwithstanding any other provision of this section, under regulations prescribed by the Commission with the concurrence of the Secretary of Health, Education, and Welfare, in any case where an individual performed military service (except military service covered by military leave with pay from a civilian position) after December 1956 and he (or his widow or child) is or becomes entitled, or would on proper application be entitled, to monthly benefits under section 402 of title 42 based on his wages and self-employment income, the Commission shall exclude from the annuity payable to him (or his widow or child) under this subchapter an amount equal to that portion of the monthly benefit (to which he or his widow or child is entitled under section 402 of title 42) which is attributable to his military service.

"(3) The Secretary of Health, Education, and Welfare, on request of the Commission, shall inform the Commission whether or not the individual, widow, or child described in this subsection is entitled at any named time to the described benefits.".

By Mr. THURMOND:

S. 246. A bill to amend chapter 67—relating to retired pay for nonregular service—of title 10, United States Code, to authorize payment of retired pay actuarially computed to persons, otherwise eligible, at age 50, and for other purposes; to the Committee on Armed Services.

Mr. THURMOND. Mr. President, in the last several sessions of Congress I have introduced a bill which would provide retired pay for nonregular military service at age 50 on an elective basis.

This legislation provoked heavy and favorable correspondence to my office and a number of my colleagues joined as cosponsors. Because it is my belief this legislation is fiscally sound and fully justified I wish to reintroduce this bill today.

Chief among my reasons for reintroduction is the need to provide incentives to keep young reservists and guardsmen in uniform in the All-Volunteer Armed Forces environment.

Mr. President, experience has shown that title III retirement at age 60 for guardsmen and reservists has not proven to be an effective retention incentive. This is significantly true among enlisted personnel where retention is most critical.

Currently, most guardsmen and reservists who are required to retire because of service time must suffer a loss of income corresponding to their Guard or Reserve pay. There is no opportunity to recover any part of this lost income through severance pay or through retired pay until age 60.

Many guardsmen and reservists, especially enlisted personnel where shortfalls are a constant problem, would be attracted to Reserve service if retired pay would commence at the time of retirement from their primary civilian employment. Such a combination of retirement pay, even at a lower rate, would provide added income at just the time when it is needed most.

Under an actuarial plan, as recommended in this legislation, an individual who elects retirement prior to age 60 would draw proportionately less per month. However, there would be some additional costs to the Government as the individual would become eligible for certain retirement benefits other than pay such as the survivor benefit plan, medical care, post exchange, and commissary privileges.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 246

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1331(a) of title 10, United States Code, is amended by adding the following flush sentence to the end: "However, a person who is under the age prescribed in clause (1), but is at least 50 years of age, is entitled to retired pay computed under section 1401 of this title, based upon mortality rates, among those who are currently retired, actuarially computed and prescribed for his age in the following table:

"For ages:	Rate per $100 of retired pay
50	$49.19
51	52.44
52	55.97
53	59.83
54	64.06
55	68.68
56	73.77
57	79.37
58	85.55
59	92.40.".

SEC. 2. Section 1335(a) of title 10, United States Code, is amended by striking out "60" and inserting in place thereof "50".

SEC. 3. The enactment of this Act does not reduce or increase the retired or retainer pay to which a member or former member of an armed force was entitled on the day before its effective date.

SEC. 4. This Act becomes effective on the first day of the first calendar month beginning after the date of enactment.

By Mr. GOLDWATER:

S. 247. A bill to provide recognition to the Women's Air Forces Service Pilots for their service to their country during World War II by deeming such service to have been active duty in the Armed Forces of the United States for purposes of laws administered by the Veterans' Administration; to the Committee on Veterans' Affairs.

THE WASPS—WORLD WAR FORGOTTEN PILOTS

Mr. GOLDWATER. Mr. President, one of my greatest disappointments in the last Congress was the failure of the 94th Congress to enact legislation recognizing the contributions of the Women's Air Force Service Pilots during World War II. These ladies came close to success. An amendment I offered on their behalf passed the Senate on September 10, 1976, but on September 14, the House of Representatives specifically objected to the WASP amendment. That killed the proposal for the session.

The women pilots did achieve a partial success, however, in that both the House and Senate Veterans' Affairs Committees gave formal, written commitments to hold hearings early in the next session of Congress—that is the Congress just begun. Letters giving these promises and signed by both the chairmen and ranking minority members of both committees were placed in the CONGRESSIONAL RECORD of October 1, 1976.

In order to lay the basis for those hearings, I am today reintroducing legislation on behalf of the WASP. The bill would provide veterans pension, disability compensation, hospital and medical care, and other GI benefits to them. Similar legislation is being introduced in the House of Representatives.

Mr. President, let me explain that the WASP are women who served as pilots with, but not in, the Army Air Forces during World War II. They were organized by Gen. "Hap" Arnold, commanding general of the Army Air Forces, as a special experimental program. Everyone concerned with the program expected the women would be commissioned into military service once their performance in the program proved successful. This plan had the full endorsement not only of General Arnold, but of the Secretary of War and of General Marshall, Chief of Staff of the Army.

Well, the girls did meet the highest aviation standards of the military, and, as a result, the Army Air Corps presented a bill to Congress seeking authority to militarize the WASP. This bill was actually approved by the House Committee on Military Affairs and was reported favorably to the House of Representatives. Unfortunately, Congress did not approve the bill at that time because of extraneous matters which have left the taint of sex discrimination.

Now, no other organization that I know of, who has not eventually been taken into the military service, had circumstances like these. The very reason the group was organized from the outset was for militarization; the group proved their military capabilities to the satisfaction of the Army Air Corps; and they had

a militarization bill favorably reported by a congressional committee.

Mr. President, there is no sound nor reasonable basis on which a bill giving recognition to the WASP for their services to their country can be turned down. These women served with distinction in the ferrying of combat aircraft more than 60 million miles during the war, towing targets for fledgling men pilots, and even training men pilots. I was privileged to have served in the second ferrying group stationed at New Castle, Del., when they were there. I made many flights with them and it convinced me that their ability as pilots was equal, and in some instances, superior to men.

This was long before the days of women's lib, but every man who wore wings and flew for the Army had and still has an admiration for these girls, 38 of whom were killed in service. I feel I represent the entire flying service in seeking to have a bill passed to have proper recognition paid to them. I know Congress will welcome these ladies to Capitol Hill as they appear to testify and witness the hearings that have been promised, and am confident that once they present their case in person, Congress will approve their legislation posthaste.

Mr. President, extensive news articles and television commentaries have appeared in the media all across the country since the Senate passed the amendment for them last September, and I ask unanimous consent that five of these informative histories of the WASP be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Daily News, Sept. 7, 1976]

THE FORGOTTEN WOMEN OF WORLD WAR II

(By Paula Bernstein)

Where are the women pilots who made aviation history in World War II? A nationwide search has begun for the 1,074 members of the Women's Airforce Service Pilots (WASP) who flew hundreds of missions over the continental U.S. and Canada from 1942 until the end of 1944.

A reunion is planned Oct. 22, 23, and 24 in Hot Springs, Ark., for all participants in the short-lived WASP training program. About 600 of them have already been located, according to Ziggy Hunter of Dallas, national membership chairman.

The reunion, largest and latest since 1970, with Air Force Thunderbirds giving a show, is sponsored by the Order of Fifinella. This is the WASP alumni group named for the little gremlin, Miss Fifinella, designed for the WASPs by Walt Disney. Both graduates and nongraduates who were cadet trainees at Houston or Sweetwater, Tex., as well as WASP instructors and field staff, are eligible for membership. The current president is Bee Haydu, RD 2, Box 519, Newton, N.J. 07860. Ziggy Hunter, the national membership chairman, lives at 838 Havenwood, Dallas 75232.

According to Ms. Hunter, WASP's were not just co-pilots but first pilots on all the fighter planes and cargo planes, "the hot pursuits" such as the P-51, P-40, P-47, P-38, P-39.

FLEW DOMESTIC MISSIONS

"They also checked out and flew domestic missions on such twin-engine bombers as the B-26 and B-25, and many were assigned to four-engine craft such as the Flying Fortress B-17, B-24, and even the Superfortress B-29. In addition, the jet fighter, just coming into its own at that time, was checked out and piloted by a WASP. Cross-country flights with all-woman pilot crews were by no means uncommon."

The WASPs ferried thousands of new fighter planes from factory to points of embarkation for the battlefront. They ferried combat-weary planes back to maintenance and repair stations. They towed target sleeves behind their planes so fighter pilots could practice with live ammunition at a moving target. They towed gliders; they taught instrument fight controls; they tested radio controls.

"And then it was, 'Get out, girls, the guys are back,'" said Leonora Anderson of Queens, a former WASP, now an Air Force Reserve lieutenant colonel, and a health and physical education teacher at Andrew Jackson High School in Queens.

Gen. H.H. 'Hap' Arnold, chief of the U.S Army Air Force back then, put it a more polite way: "You have freed male pilots for other work," he told the WASPs when they were disbanded. "The situation is that if you continue in service you will be replacing, instead of releasing, our young men."

DEACTIVATED THEM

The WASPs of course, were delighted that combat losses among male pilots were lower than anticipated. Yet they never expected their country to turn its back on women pilots and not only deactivate them, but forget them.

"Due to the experimental secrecy of their program," Ms. Hunter said, "they received litle recognition at the time, and during the intervening 30-plus years, the country has largely overlooked the contribution they made toward winning the air victory in World War II."

Lt. Col. Anderson, who like other WASPs, was a licensed pilot when she volunteered for the program, also believes that WASPs deserve recognition. "The WASPs, although serving under military discipline, and flying military aircraft, received no benefits of any kind," she observed. "They had no insurance, no hospitalization, no GI bill, and no veterans' benefits, The 38 WASPs who lost their lives in service received no consideration.

"A bill in 1944 to militarize the WASPs was defeated by a small margin, due to the well-supported efforts of male civilian pilot organizations who were facing the draft. If we got flying jobs, they wouldn't have flying jobs."

Lt. Col. Anderson learned to fly in Somerville, N.J., at age 20, after graduating from Hunter College where her boyfriends interested her in their hobby—flying. By the time she joined the WASPs she had 180 hours of flying time, her private pilot's license, her master's degree in health and physical education, and a second master's degree in guidance and counseling. As a WASP, she tested airplanes, became an instrument coach, then joined a tow target squadron.

Bills currently pending in Congress (S. 1345 and H.R. 6595) would give the WASP military status and recognition. The bills are apparently stalled in Sen. Vance Hartke's Veterans Affairs Committee, awaiting hearing.

According to a Washington spokesman for the Senate Veterans Affairs Committee, VA officials oppose the bills because they want to define "veterans" narrowly, fearing other civilians who served under military jurisdiction may seek similar benefits. They cite the men who chose alternative service during the Vietnam War.

Sen. Barry Goldwater (R-Ariz.), the Senate sponsor of the bill to give WASPs recognition, and now a retired Air Force reserve major general, flew with WASPs in the Ferrying Command at New Castle, Del.

"These ladies flew 60 million miles for the Air Forces, equal to 2,050 times around the globe," he said. "Their performance was equal in every way to male pilots and was better in some instances, such as towing targets for gunnery practice. They flew the same routes and the same aircraft that male pilots did within the U.S. and Canada. They were under military discipline and subject to all military rules and regulations. They received no benefits such as insurance and hospitalization, and it is long overdue that they acquire this entitlement."

If the bill is passed, the WASPs' major "entitlement" would be the right to enter a veterans' hospital, and the right to have some scholarship money for their children. "It would only cost $90,000 a year," said Terry Emerson, legislative aid to Goldwater. Emerson can't understand the VA objection that other groups might demand the same benefits. "That has nothing to do with this," he insisted. Let others have hearings and prove their case. Then separate legislation could be passed for them on their own merits."

If the bill is stalled too long in the Veterans Affairs Committee, Goldwater plans to offer it as an amendment to other bills on the Senate floor. "He'll keep fighting for it," promised Emerson.

[From the Newark, N.J., Sunday Star-Ledger, Oct. 3, 1976]

WOMAN PILOT RECALLS WW2 EXPERIENCE

(By James Warren)

They were heroines of World War II who became frustrated footnotes in U.S. history. They flew precarious missions so the men could go overseas, but are left without the recognition of their male counterparts.

"I don't think the government has ever treated us well," said Mrs. Joseph Haydu of Newton. "Yet there's no denying the experience shaped our lives."

Wearing baggy GI overalls, Bee Haydu was one of 1,074 women who logged 60 million miles with the short-lived Women's Airforce Service Pilots (WASPs). Formed in late 1943 because of a national pilot shortage, they ferried fighter planes, towed targets for combat pilots and antiaircraft batteries to shoot at and simulated bombing missions for ground troops, among many duties.

They received the same training as Army Air Force (AAF) cadets but were disbanded amid congressional controversy in 1944. The government had promised to militarize the civilian women, but all was scotched in the face of tough lobbying by male pilots.

Efforts to aid the WASPs have continued through the years. The most recent legislation, sponsored by Sen. Barry Goldwater (R-Arizona), would have brought medical and hospital benefits, but died in committee Friday.

Nevertheless, the memories are vivid for Bee Haydu, president of the Order of Finella, a group of ex-WASPs named after the special emblem designed for the WASPs by Walt Disney.

She was a 22-year-old secretary for a Newark zipper firm when General Henry Harley "Hap" Arnold, commanding general of the AAF, established the unique band of females. Coincidentally, she had been taking flying lessons in Pennsylvania on weekends.

She was one of 25,000 applicants contacted by program chief Jacqueline Cochran, the famed aviatrix and wife of millionaire industrialist Floyd Odlum. Haydu passed a standard army physical at Newark Airport and paid her own way to Houston and Sweetwater, Tex., for the seven-month training course which produced 1,074 graduates.

Early in 1944 she was sent to "the middle of nowhere," an austere twin-engine advanced school in barren Pecos, Tex. "You never had a problem finding a date," she remembers. There were several hundred men and 13 women.

They received $250 a month, minus lodging and food. They were issued just one

uniform and accorded all the privileges of the second lieutenants they expected to be. Their places of work became twin-engine bombers such as the B26 and B25, and pursuit planes like the P51.

"The girls were resented at many bases, but we felt very welcome at Pecos," she said. "And we just didn't think we were so unusual. We just wanted to help end the war."

The women's duties may have been far from the European front but the duties were not pristine and safe. Thirty-eight WASPs died during a variety of dangerous tasks: Simulating search light and tracking missions, towing target sleeves which fighter pilots tried to hit with live ammunition, running strafing missions for the benefit of ground troops and controlling small drone airplanes which antiaircraft batteries set their sights on.

"There was even the infamous P39, known as "The Flying Coffin,'" Haydu said. "There had been tremendous problems with the plane but the reason was the men weren't flying them to proper specification. We started flying them correctly and proved everybody wrong."

The East Orange native has not taken kindly to criticism directed at the women's motivation. Some have seen the WASPs as flippant members of the propertied class, wealthy girls out for some kicks.

"That's really crazy. We were women ranging from 18 to 30 years old and came from all walks of life. Some may have had boyfriends or husbands in service but we all loved flying," Haydu said.

Laboring in arid Pecos, the connection to the war became the radio and local base paper. "There may have been feelings of panic elsewhere in the country, but we were so busy training there wasn't even time for that nervous sensation," she said.

Cornelia Fort, 24, of Nashville, Tenn., was the first WASP to die, falling prey to a bomber crash. Yet before she was killed, she authored a piece for a national magazine which described the less-than-glamorous existence.

"We get up in the cold dark in order to get to the airport by daylight. We wear heavy cumbersome flying clothes and a 30-pound parachute. You are either cold or hot. If you are female your lipstick wears off and your hair gets straighter and straighter. You look forward all afternoon to the bath you will have. Sometimes we are too tired to eat and fall wearily into bed."

But even while Fort was writing, the stage was being set for the ultimate dissolution of the group. With the benefit of hindsight Haydu admits that bad luck, and not just prejudice, played a part.

AAF had always wanted the WASPs militarized and functioning as a separate entity. The Women's Army Corps (WAC), however, wanted the women under it and an angry debate continued through most of 1944.

A California congressman, with the backing of the Secretary of War, introduced the first WASP militarization bill in late 1943. There were complications but it was redrafted and ready for action in February, 1944.

Unfortunately, the Army began priming for the invasion of Europe. The flying programs of the Civil Aeronautics Administration-War Training Service (CAA–WTS) were being phased out to free those pilots for ground duty. When those same men heard of the WASP legislation, they deluged the Congress with letters of protest.

AAF Historical Study No. 55 indicates the fate of the militarization measure: ". . . From the record of the congressional proceedings, it appears that the supporters of the measure were too poorly organized and worked too slowly to match the legislative tactics of the opposition." The measure was defeated by 19 votes in the House.

The AAF study is no whitewash, noting the women "were frequently confronted by hostility on the part of male pilots and commanding officers" but "their very successful record of accomplishment has proved that in any future effort the nation can count on thousands of its young women to fly any of its aircraft."

"There is no doubt the failure to militarize women pilots was unfair to many WASPs who had given good service. They were left without the benefits to which veterans' status would have entitled them, and the families of the girls who had been killed in the performance of their duties were denied the gratuities which they would have received as beneficiaries of military personnel."

Life has gone on for the WASPs, who include a federal judge in Arizona, the head of a major cosmetics firm, an anesthesiologist and several lawyers. Bee married Joseph Haydu in 1951, has three children and helps with the family's large meat packing firm, the Haydu Packing Co. in Neptune.

Immediately after the war she stayed in aviation and even started her own flight school in Woodbridge in 1947. The school went well until it was decided to build the Garden State Parkway.

"In those days the New Jersey Department of Transportation wasn't legally bound to give any notice of impending construction," she said. "I woke up one morning to find bulldozers wiping out part of our runway."

She spends many hours working for the Order of Fifinella, especially in tracking down those women who have remained out of touch. The group has had several reunions and the next is set for Oct. 22–24 in Hot Springs, Ark.

One would figure the offspring, raised in a world of supersonic aircraft and color television, might have trouble empathizing with tales about "the war." But it's not true.

"My 21-year-old daughter, Diana, will come to the reunion," said a happy Bee Haydu. "It's a very interesting phenomenon. She just thinks we were a fascinating group of women and I surely won't disagree."

Apparently, old WASPs never die. They just fade into proud adulthood.

[From the Baltimore Evening Sun, Oct. 14, 1976]

WORLD WAR II'S WOMEN PILOTS FEEL FORGOTTEN, THEIR BENEFITS IGNORED

(By Josephine Novak)

Thirty-two years after they flew for their country and sometimes died in flaming crashes, more than 950 former war-time fliers who had been attached to the United States Air Force feel they are not gone but that they are forgotten.

"It appears we are being lost in the records of time," said Elaine D. Harmon, of Silver Spring, Md., a former member of the Women's Air Force Service Pilots.

Scotty Bradley Gough, of Gaithersburg, Mr., agrees.

"Most adults in the early 1940's had no idea of the kind of work we were doing for the Air Force," she says. "And, today, many of the younger people have never heard of us.

"We were trained by military pilots and flew every plane the Air Force had. We went to staff officers' training schools, had military inspections and had to observe military discipline. Our orders were cut on the same page as orders of commissioned officers who were to fly to the same points, sometimes in the same aircraft. We were truly military, yet the families of the women who died were not even accorded the gold star and received no benefits. None of us did."

About 15 women in the Maryland area were among the WASP's who flew thousands of missions throughout the U.S. and Canada between 1942 and the end of 1944. And a Marylander was the youngest of them all.

The youngest WASP, Janet Lee Hutchinson (now Janet Simpson), longtime resident of Ruxton, in Baltimore county, joined the organization when she was 18½. Janet's father was George R. Hutchinson, pioneer aviator, who taught all the members of his family to fly with him. The family became famous as "The Flying Hutchinsons."

Janet had seven months of training with the WASP's, became a test pilot and then took advanced instrument training. She taught flying and ferried in what she recalls as "the happiest year of my life."

"A lot of us washed out in training," she recalls. "My class started with 120 and ended with 60, and 7 of those were killed in training before graduation. One was my roommate."

Another Marylander was Marsha Courtney Bellassai, of Laurel. Assigned primarily to a tow target squadron, she engaged in simulated strafing missions and trained anti-aircraft companies to track with radar. She "knew very well" two girls in her class who were killed in training.

A reunion of all the pilots who served in WASP is scheduled October 22, 23 and 24 in Hot Springs, Ark.

The women pilots of World War II had hoped to come to the reunion, having seen a bill passed last month giving them veterans' hospital and medical benefits. But it was not to be.

A proposal, sponsorod by Senator Barry Goldwater (R., Ariz.), was passed by the Senate as an amendment to a House-passed bill under which Polish or Czechoslovak soldiers who fought with allied forces in World War I or II, and who have been U.S. citizens at least 10 years would be eligible for veterans' hospital and medical benefits. The amended bill, forwarded to the House, was returned to the Senate without action.

The disappointment to the WASP's was one among many they have had.

A previous bill would have accorded them full veterans' benefits, but the bill could not get a hearing in either the Senate Veterans Committee or the House.

No one who is helping the women fight for the benefits, however, is giving up at this point, including Senator Goldwater and Col. Bruce Arnold, son of the late Gen. H. H. (Hap) Arnold, under whose aegis the WASP's were organized in 1942.

Senator Goldwater, who flew with WASP's in the Ferrying Command at New Castle, Del., pointed out to his Senate colleagues that the women had served under military discipline but had been "shunted aside" at the end of 1944. He said 38 of the 1,102 WASP's had lost their lives.

The Ferrying Command delivered aircraft under their own power to tactical units.

The reason given for opposition to the bill in Congress was that WASP was actually a civilian organization, and some veterans' officials oppose a bill to give to them veterans' benefits because they fear other civilian groups who served under military jurisdiction may seek similar benefits.

Colonel Arnold, who for years has been offering his assistance as a concerned citizen, said he is "amazed that a few non-thinking members of the House would fail to understand the WASP's' position."

"Inherent in their organization was the fact that they would be militarized when proven effective," he said. "They tested to prove, and did prove, their effectiveness."

The WASP's were organized for General Arnold, then commanding general of the Army Air Corps, by Jacqueline Cochran, who had herself flown almost every kind of plane and several times had won air races from men.

At first the recruited women all were to be attached to the Ferrying Command, but the WASP program was expanded to the

point that they were handling the fastest fighters and heaviest bombers.

Colonel Arnold ticked off WASP assignments:

Some carried side arms and were under orders to guard their planes with their lives if a plane they were delivering was in the classified category. They performed track missions, towed target sleeves behind planes for aerial gunnery trainees, were instrument and flight instructors for male pilots training for combat, and flew radio controlled drone flights.

WASP's towed large gliders with personnel in them, flew airline operations for military transport, simulated strafing and bomb assignments over practicing ground troops, did test flying, laid smoke screens and did other chemical missions, piloted new aircraft on test runs, did engineering testing and piloted for naval and bombardier students.

In instances involving three new aircraft, the women were used by their commanders to shame male pilots back into the cockpit.

The first such instance, Colonel Arnold said, pertained to the P-39, which the men called "flying coffins because this airplane had its engine behind the pilot and required entirely different flying rules than they were accustomed to. The men would forget they were different and were crashing."

In his book, entitled "Over the Hump," Brig. Gen. William H. Tunner, who headed the Ferrying Command at this time, wrote, "I decided I would put girls in the airplane because I realized they were much more careful pilots, and the girls, of course, flew the airplane perfectly and had no problem at all, and charmed the men back into the cockpit."

A second case involved the B-26. The men training in the B-26 in Florida were crashing, getting psyched out, and had coined the expression, "One a day in Tampa Bay."

Women were then trained to fly the plane to show the men there was nothing difficult about the B-26. "Thereafter, the men had a brilliant record overseas, but this was in training," Colonel Arnold reiterated.

"The third instance involved the B–29. When the first crews were formed, the men were leery of the plane because of its large size. Col. Paul W. Tibbets, Jr., (who dropped the first atomic bomb) checked out Dorothea Johnson and Dora Strother in this airplane and had them fly it to bases where men were stationed to show them they could handle it. Again, the reaction of the men was that if the women could do it the men could, too."

In 1944, the chief of the Army Air Corps sponsored a bill to militarize the WASP's and increase their number to 5,000.

"The WASP's had proved they could fly as well, and in some instances better, than the men," Colonel Arnold said. "But you have to recall the timing: the first atomic bomb had not yet been dropped, the war in the Pacific was still to be won, and there had been fewer casualties than expected among the pilots in the European theater.

"We were bringing the pilots back, but what do you do with them while you're waiting for the big push in Japan?

"Not only were the women pilots filling the shoes of the military men at home, but there were many civilian male pilots contracted to the Air Force who knew they would have no jobs in the U.S. and would also be subject to the draft if the bill sponsored by the Air Force would pass.

"The civilian pilots formed a powerful lobby and, in the main, were responsible for the bill's defeat. The girls lost by only 19 votes, but the fight was terrific in the House. The chairman of the Civil Service Committee, in his committee report, damned the WASP's with half truths and out-and-out lies, but, in conclusion, recommended that they be given hospitalization and medical insurance. Then he never took action on the recommendation.

"The sad thing is that they could have gotten at least a few benefits, but were denied even those."

[From the Charlotte Observer, Oct. 24, 1976]

WHAT DID YOU DO IN THE WAR, LADY?

(By Elizabeth Rhodes)

She didn't fill a Rosie the Riveter stereotype. She wasn't a Betty Grable and now, three decades after World War II, no one ever asks Dorothy Hoover what she did in the war.

The answer might surprise you. Mrs. Hoover, 59 and a freelance court stenographer in Asheville, flew for her country. She was an aviation pioneer, one of 1,074 women, including at least a dozen Carolinians, who were Women's Airforce Service Pilots, WASPs for short.

From 1942 until the end of 1944, WASPs flew 60 million miles across the United States and Canada (they were never sent to combat zones). Classified as civil servants, they were nonetheless subjected to Army rules, regulations and received duty orders just as male pilots did.

Some WASPs, such as Hazel Pracht Caldwell, now a practical nurse at Baptist Hospital in Columbia, S.C., ferried thousands of planes, including the B17 bomber, from factories to points of embarkation.

Others, such as Florine Phillips Scaife, a Chicagoan now transplated to Sea Pines Plantation, S.C., piloted air ambulances carrying wounded servicemen.

Many more WASPs towed huge gliders or pulled target sleeves that fledgling fighter pilots and antiaircraft gunners bombarded with live ammunition.

Armed with Army 45-caliber pistols, WASPs flew planes carrying highly secret equipment they were instructed to protect with their lives. Still others towed "drone plane" targets that were literally shot down in flames.

Thirty-eight WASPs died in service to their country, including several killed in North Carolina and South Carolina.

And yet, 32 years after they were disbanded so their jobs could be given to returning male pilots, the WASPs have been all but forgotten. The country that gave them military training and military duties refuses to classify them as veterans with the attendant benefits: insurance, hospitalization, GI Bill and the chance to apply for scholarship money for their children.

But the 600 or so remaining WASPs and their supporters, including Arizona Sen. Barry Goldwater, aren't willing to forget.

Goldwater, who flew with them during the war and says, "Their performance was equal in every way to male pilots and was better in some instances," has twice sponsored legislation that would give WASPs recognition.

Congressional opponents, fearing this would open the door for other civilian groups to claim costly veterans benefits, have managed to stall and eventually kill WASP legislation.

Yet earlier this month, Congress passed a bill giving GI benefits to approximately 40,000 former Polish and Czechoslovakian citizens (they became Americans after World Wars I and II) who fought for America's allies but not for the United States.

Said Goldwater's legislative aide Terry Emerson, "The rejection of the WASP amendment seems discriminatory against Americans who were citizens at that time, as well as against women. The argument about it setting precedent is bunk."

In 1942, the WASPs did set precedent. Afraid the United States would run out of male combat pilots, the Army Air Force, predecessor of today's Air Force, agreed to train some of the 3,000 licensed women pilots to take over stateside flying missions. Britain and Russia had similar programs.

But according to Ziggy Hunter, a WASP flight instructor who now lives in Dallas, Texas and is writing a book about the women pilots ("Zoot Suits and Parachutes"), the idea was met with trepidation.

"There was a great deal of hesitancy on the part of Air Force people," Mrs. Hunter remembers. "At that time, there was a stereotype that women weren't bright enough to think on their feet. They also wondered if women were strong enough."

Or perhaps diligent enough. A July 19, 1943 Life magazine article paid them a backhanded compliment, saying, "Girls are very serious about their chance to fly . . . even when it means giving up nail polish, beauty parlors and dates for a regimented 22½ weeks (of training)."

The women persevered. They learned to fly military aircraft (they checked out on all fighter and cargo planes, including the P51, P38, P39, B25, B26 and B29) and took on a variety of duties that culminated, for some, in death.

Raleigh resident Mary Clifford Lyman was one of the first WASPs to be stationed at Camp Davis, near Wilmington, N.C., where she towed targets for beginning antiaircraft gunners—and lost a friend, Betty Taylor, wife of WASP instructor Charlie Wood.

On Aug. 23, 1943, Mrs. Wood's plane hit a mound at the end of the runway and flipped over, sending the lone female pilot into the windshield.

Another WASP, Jeanne Norbeck, 31, died Oct. 16, 1944, during an engineering test flight over Shaw Field in Camden, S.C.

Four days later, the Shaw Field News wrote of her, "She has died in the service of her country. She has completed her mission as gloriously as our men overseas who go down heroically with their war planes. (Her) memory will never be forgotten."

"Of course it was forgotten," Ziggy Hunter says dryly.

Nothing, not even a couple of close calls, could deter Dot Hoover, the court reporter from Asheville. She started her WASP career towing the hulking gliders destined for the invasion of Normandy, progressed to towing targets for beginning fighter pilots and ended as a flight instructor.

Three decades later she speaks, in a whispery voice that almost camouflages her zeal, of her great love—flying—and the WASP years that were surely one of the highlights of her life.

But these aren't oft-told war tales. No one's been interested, until now, in an ex-pilot who got the crazy idea, at age 10, that she'd one day fly for the military.

Born in Asheville to Mr. and Mrs. Albert Post, Dorothy was 10 years old when the Lone Eagle, Charles Lindbergh, flew the Atlantic, May 21, 1927. "I was completely fascinated," she recalls. "I had a scrapbook on Lindbergh about yea-thick."

Little Dorothy Post kept that scrapbook for years, through high school when she started "hanging around Asheville-Hendersonville Airport when I could sneak off." Being "kinda bashful," she didn't make her ambitions known and no one ever took her up for a flight.

In 1934, she graduated from Asheville-Biltmore College (now a branch of the University of North Carolina) with a major in English and in 1938 married H. Oliver Hoover. She held a variety of office jobs before and after her marriage. Her dream of flying, a secret from her husband, was dormant, but not forgotten.

In the fall of 1939, Dorothy Hoover, living in Greenville, S.C. where her mate was working for Sears, read that the Civil Aeronautics Administration was sponsoring a pilot training program for male Furman College students. Although she was a married working

woman, she applied anyway and was accepted.

The memory of her first flight is crystal clear. She was in a Piper Cub two-seater with dual controls. An instructor was in the second seat.

"I guess I was sort of numb until we started to leave the ground. I got 100 feet up and said, 'Oh, Lord, this is it! This is what I want more than anything else in the world.'

"I just knew I had to make it through the course, so I really worked at it."

Twenty-seven students graduated. On the final exam, Mrs. Hoover missed one question out of approximately 400. She was first in her class.

Then it was back to the ground and office jobs. Her husband, from whom she was divorced 10 years ago (they had no children), was not enthusiastic about her grand ambition.

In 1941 Oliver Hoover was drafted and sent to the South Pacific. Dorothy Hoover went home to Asheville. In January 1943, she read a short newspaper article. Any "girl" pilot with 200 or more hours of flying time (she had 225) who was between 21 and 34, a high school grad and could pass an Army physical was invited to join the WASPs.

"When I read that, I came up out of my chair. I could hardly wait to get a letter off." Propelled by her own ambition, Mrs. Hoover was nevertheless aware that she was joining to please her father.

"My father was a very dedicated and patriotic person," she explains. "I felt inferior because I was a girl and couldn't go into the Army and fight for my country. That's why I think I grabbed at the opportunity to get into the WASP's." Her mother opposed the idea.

A month later, the pilot was on her way to Avenger Field near Sweetwater, Texas.

There were 40 women in her class. Some were married with husbands overseas. Some had been office workers. One glamorous recruit had been a Powers model. All were crazy about flying and didn't care how it was dished out.

They accepted the fact that they were in the civil service not the military, and yet under the training and regulations of the Army.

"We got identical flying training with Army cadets," Mrs. Hoover says. "We were the first class of women for the instructors who started instructing us and they didn't even change the cuss words.

"We also marched in the sun, chewed dust and had mud on our feet. We went where we were told and did what we were told to do."

After graduation Hoover (the women had no rank and were called simply by their last names) reported to South Plains air field near Lubbock, Texas. Glider crews were being trained for the invasion of Normandy and she was to copilot the tow plane, an 18-ton Lockheed Lodestar. Big as the Lodestar was, the glider, which held 15 men and a jeep, was even bigger.

"It wasn't easy to get the doggone elephant off the ground" she laughs: "The takeoff is critical because you've got to have your glider above your tow ship at all times to keep him out of your slip stream (or the glider will stall the tow ship's engines). You've got to get up enough speed going down the runway to get him airborne first."

Once, when she and a male Army pilot had been towing a glider for four hours in the early morning darkness, the glider pilot fell asleep, drifted into her craft's slip stream and almost stalled her out. Twelve tow planes had been sent up, with 12 gliders attached and they were stacked like cordwood over Lubbock.

Suddenly the glider pilot awoke. Sensing the danger, he cut himself loose and you should have heard that radio! Free glider in the area, clear the area! Everybody was going every which way." Miraculously, there were no midair collisions.

When the glider program finished, Mrs. Hoover was reassigned to Eagle Pass, Texas. She was given an AT6 equipped with a tow mechanism that trailed a 3-by-8-foot banner. Every day sh'd fly a 10-mile course while three or four beginning fighter pilots banked, dove and shot at her banner.

Was she ever frightened that one might miss and send her splat onto the bleak landscape of South Texas? Nope. But "They shot my cable off one time three feet behind my tail and I got a little irritated."

Mrs. Hoover piloted single-engine planes alone. On twin-engine flights she served as copilot. The pilot was always a male. "Every one we ever flew with we had to prove that we could fly," she claims, and adds, "They'd pull little tricks on you."

On one hop from Lubbock to Minneapolis, Minn., the pilot tested her by purposely giving her the wrong map to read. He got away with the prank for about two seconds and on the return trip she got revenge of sorts.

They stopped for the night in Kansas City, went to a hotel and found the waiting room bursting with people.

"After a while the WAC (in charge of reservations) called my captain and said, 'Captain, I found a room for you and your copilot.'

"He was kind of an old maid and he just squawked. She said, 'What's the matter with you—are you too good to sleep with your copilot?'"

Mrs. Hoover found a room with another WASP. And the pilot? Well. "You've never seen anybody so relieved in your life!

"You know," she continues, "there were lots of chances to fool around. But there was a saying that there was nothing more useless that a pregnant pilot. We all wanted to fly so bad that we were pretty darn sure that we weren't going to wash out for that."

Most WASPs did enjoy being rare birds. Says South Carolinian Florine Phillips Scaife, "It was exciting, new and a challenge and nobody knew who we were. We'd fly into a field and they'd know it was an Army plane.

"Many times the tower would ask who the pilot was and be absolutely astonished that I was by myself."

Dot Hoover had just completed instructor's training when the WASPs were deactivated Dec. 20, 1944, to make way for the surplus of male pilots. Gen. H. H. "Hap" Arnold, chief of the Army Air Force at the time, put it this way: "You have freed male pilots for other work. The situation is that if you continue in service you will be replacing, instead of releasing our young men."

Today Arnold's son, Col. Bruce Arnold (USAF-Ret.), has thrown his support to the WASPs and is working on his own to get them official recognition.

The deactivation left Dorothy Hoover heartsick but accepting.

"I racked my brains trying to figure out some way I could turn flying into a lifelong career. I thought if I could get up enough money I could buy an airline. If I had not been married, I would have gone on to college and studied aeronautical engineering and been a test pilot.

"I even thought, gosh, it would be great if I could be an airline pilot, but I'm a woman so you have to give it up and turn to other things."

She gave up flying, for lack of money, and for 16 years served as court reporter of the Buncombe County Superior Court, criminal division. Three years ago she resigned to start Western Carolina Reporters and now is busier than ever.

Like most other WASPs, 30 per cent of whom still fly, Dorothy Hoover yearns for official recognition. "I'd like some recognition, if nothing else. I felt like it was my contribution to the war effort.

"Nobody ever said thanks. We were never told we were appreciated."

This weekend many of the 600 remaining WASPs are meeting in Hot Springs, Ark. They're excited because CBS News is filming their reunion and because Barry Goldwater has Senate and House pledges that hearings on the WASPs' plight will be held during the next Congressional session.

Those hearings could come as early as December, says Goldwater aide Terry Emerson. "They will give the women the opportunity to come to Washington and testify.

"Sen. Goldwater feels that if it is turned down next year, it can only be on the basis of sex discrimination."

[From the Kansas City Times, Nov. 11, 1976]

WOMEN FERRY PILOTS: SEX BARS GI BENEFITS

(By James J. Fisher)

Imagine this. During World War II you answer the call to service. You are trained as a pilot. The training is rigorous and demanding, with 50 per cent of the cadets washing out.

Uniforms are issued. Military discipline is enforced. Cadets live in barracks. The food is military. Pay is $150 a month during training; $250 a month on graduation. Hours are long and hard, ferrying planes, training other pilots, towing targets. All to help America win the war.

There are just a couple of problems. If your plane crashes and you are injured or killed, you have to pay for your hospitalization or funeral. And on deactivation (not discharge) you are back in civilian life with no benefits, GI bill, Veterans Administration hospitalization or insurance.

Sound impossible? Discriminatory? It happened. And those it happened to weren't black, or Latin, or Oriental. They weren't criminals or politically suspect or aliens.

They were women.

"Of course, in those days no one talked about women's rights," Mrs. Francie Park, a Kansas Citian who lived through it, said. "They'd have locked you up as a nut. You just choked back the tears and anger and took your lumps."

Mrs. Park was Miss Francie Meisner then and was a member of the Women's Air Force Service Pilots (WASPS), who flew millions of miles and thousands of missions over the United States and Canada between September, 1942, and December, 1944, when political pressure killed the program.

Other women in the Kansas City area also were members of the WASPS. They include Mrs. Helen Pittenger, Mrs. Margaret Temme, Mrs. Marjorie Rees, Mrs. June Evans, Miss Wilma Miller and Mrs. Mary VanScyoc.

And while Mrs. Park remembers "how devastated we all were" when the WASPS were deactivated in 1944, she and the other 600 surviving members of the group haven't given up.

A good part of the WASPS reunion last week in Hot Springs, Ark., was devoted to methods of bringing pressure to bear on Congress next year to force passage of bills that would give the former WASPS hospital and medical benefits from the Veterans Administration. The bills also would retroactively militarize the WASPS, giving them, as Mrs. Park hopes, a chance to get some retroactive GI education training for themselves or their children.

"Face it," Mrs. Park said, "we were, to use the curent phrase, ripped off 30 years ago. If they tried that now, you'd hear screams all over Washington. But then it wasn't the same as it is now. Women were supposed to stay at home or at most work in the war effort by getting a factory job. But fly an airplane? Never."

More than 300 former WASPS attended the Hot Springs convention and Mrs. Park characterized them as "militant" about the bills before Congress. "We are going to get what's

coming to us. Back then we were young, politically naive and yelling for your rights—rights we'd earned—just wasn't done."

When the bills come up for public hearing many of the former WASPS plan to descend on Washington, Mrs. Park said. Some, she said, will even wear their old blue uniform. "Incidentally," she said, "mine still fits."

Opposing the benefits for the WASPS are the VA, the American Legion, the Disabled American Veterans and the Veterans of Foreign Wars.

According to a spokesman, the VA opposes the bills because the VA wants to define "veterans" narrowly, fearing that other civilians who served under military jurisdiction might want to seek similar benefits. VA officials point to the men who chose alternative service during the Vietnam War.

Mrs. Park said such arguments are specious.

She said the women joined the WASPS believing the unit was to be militarized and many were made to swear they would remain in the WASPS when it was militarized; that a militarization bill for the WASPS passed the House committee on military affairs, something that happened to no other organization; that the WASPS were sponsored for militarization by Gen. H. H. (Hap) Arnold, commanding officer of the U.S. Army Air Forces during World War II, and that the WASPS continually were tested for their military capabilities, bringing the accolade from General Arnold that "the women pilots (WASPS) are professionals."

General Arnold knew what he was talking about. He had ordered formation of the WASPS in September, 1942, as strategic planners estimated that American casualties in the air war over Europe and the Pacific would claim 20 per cent of all fliers.

General Arnold named Miss Jacqueline Cochran director of the WASPS, and more than 1,000 of 1,800 women pilots who applied were graduated from Avenger field near Sweetwater, Tex., during the next two years.

During those years the WASPS flew more than 60 million miles, ferrying air transports, towing targets for fledgling men fighter pilots, testing aircraft for engineering problems and training men pilots.

Thirty-eight WASPS died on duty or during training. They received no death benefits because the WASPS were paid as civilians while the Army Air Force tried to get congressional legislation to militarize them.

WASPS, an Air Force history of the period states, flew every type of aircraft in the United States inventory during the War—from AT6 trainers to B29s. One WASP even was qualified to handle the first United States jet, the Bell P59.

"There was one time in Texas that a B29 came in, one of the first produced, and gave the guys on the ground quite an air show," Mrs. Park said. "The Air Corps personnel just went wild about the plane. They hadn't seen many of them. And they went a little bit wilder when the crew stepped out, all WASPS."

During the two years of the WASPS' existence, General Arnold, his subordinates, and Miss Cochran worked to get the women militarized.

But in March, 1944, the political pressures on Congress mounted, largely from men pilots working for contract flying schools. Anticipated air losses were well below the 20 percent envisioned 18 months earlier and there was a crying need for ground troops which had snatched 36,000 men out of the pool for flight training and assigned them to infantry.

The contract pilots, facing the end of their schools, faced either a draft notice or no pay as the civilian flight training programs wound down. Appropriations for the WASPS were cut off and many men pilots took over their jobs ferrying aircraft.

"The rumors went around for months," Mrs. Park said. "Still when the end of the program was announced, there were a lot of tears. And a lot of anger."

Mrs. Park said any thought of the WASPS getting their rights remained dormant until the 1960s. "Then one of the girls put together a mailing list and from that came the first reunion. And right away there was talk about getting what we figured was owed to us. And it gets stronger every year."

At every reunion, Mrs. Park said, the Order of Fifinella, the official name for alumni of the WASPS, is proudly displayed. Fifinella is a female gremlin and the drawing for the WASPS was created by the Walt Disney studios.

"As you know," Mrs. Park said, "gremlins are persistent. They are indeed."

By Mr. DOLE (for himself and Mr. McGOVERN):

S. 248. A bill to establish a National Agricultural Research Policy Advisory Board, and for other purposes; to the Committee on Agriculture and Forestry.

NATIONAL AGRICULTURAL RESEARCH POLICY ACT OF 1977

Mr. DOLE. Mr. President, during the last session of Congress, the Senator from South Dakota (Mr. McGOVERN) and I introduced The National Agricultural Research Policy Act of 1976. The bill was received with broad, bipartisan approval, but it was introduced so late in the session that there was simply not enough time for the measure to receive full consideration by this body, or be enacted into law.

Today, I am pleased to introduce a similar bill—The National Agricultural Research Policy Act of 1977. The purpose of this legislation is to place increased emphasis on agricultural research so that the food and fiber needs of the Nation and the world can be met in the future.

RESEARCH NEEDS

The record of past successes in agricultural science is impressive. The U.S. Department of Agriculture, universities, foundations, and private enterprise have all made important contributions. Today, a single American farmworker supplies enough food and fiber for 56 people. But past success has created a feeling of complacency. Expenditures on agricultural research have not kept up with inflation during recent years.

For example, in 1965, agricultural research funding from Federal and State agricultural experiment stations, and industry sources was estimated at $854 million. A comparable estimate for 1975 was about $1.6 billion. However, after discounting for inflation, the 1975 expenditure had less purchasing power than the amount spent in 1965.

The President's budget request for the major research arm of the U.S. Department of Agriculture, the Agricultural Research Service, for fiscal 1977 is only about 60 percent of what it was 10 years ago in constant dollars.

It is also informative to compare resources for agricultural research with other sectors of the economy. Suppose we look at the 1977 budget. The President requested that total research and development budget authority be expanded by 11 percent for 1977. This compared to a total budget authority increase of 6.1 percent. The increase for agricultural research was only 5 percent. Thus, agriculture research came up short when compared to total research, the total budget and inflation—should the latter exceed 5 percent.

Beyond the immediate concern of dollar expenditures, however, is the knowledge that available research funds have had to be stretched again and again to cover emerging new needs. Human nutrition, environmental quality, and energy availability are examples of worthy research priorities. At the same time, though, these priorities have forced reductions in production and marketing research.

NEW DEMANDS

Demands for more food production continue to grow. Even with the declining birthrate in the United States, our population is expected to increase from 214 million to 270 million by the year 2000. Worldwide population is expected to increase from 4 billion to at least 6 billion during the same period.

Furthermore, as we look to the future, it appears that it will not be as easy to turn on the spigot of agricultural production as it has been in the past. We no longer have 60 million acres being held out of production as in the early 1970's. In many areas, chemical fertilizers have reached a point of diminishing returns. Crop yields appear to be nearing a biological ceiling unless there is a research breakthrough.

In 1974, the Economic Research Service of USDA gave this assessment of past research accomplishments and our prospects for the future:

An extensive inquiry was made into the root causes of productivity change in agriculture. Factors considered were: mechanization, hybridization, fertilization, and pesticides. Change in aggregate agriculture productivity was made a function of changes in the adoption of these major technologies. There is strong evidence that these few technologies were responsible for the bulk of productivity change during this century. Since most of the major technologies were nearly exploited by 1960, the productivity increase has slackened since that time. For the future, minor technologies will contribute a modest improvement in productivity but major change will have to wait the discovery of new major technology.

This means the day has passed when we can take for granted our excellent past record in bettering our agricultural performance.

FRAGMENTATION OF RESEARCH

While the evidence strongly suggests that there is a need for upgrading the priority given to agricultural research expenditures in this country, increased coordination of research is also needed. In addition to USDA, many colleges and universities—including the land grant colleges—State agricultural experiment stations, the National Science Foundation, the National Institutes of Health, the Department of Health, Education, and Welfare, the Environmental Protection Agency, and the Energy Research and Development Administration all carry out some farm-related research.

Such fragmentation greatly hinders our ability to focus the vast research capabilities of this Nation on the research needs of highest priority.

In short, this country needs to revi-

talize agricultural research through increased funding and better coordination. Then we can begin to tackle basic research in such promising areas as: photosynthesis; nitrogen fixation; crop and livestock protection; water and nutrient efficiencies; genetics; biochemical aspects of handling and processing of crops, livestock, and fish; soil and water relationships; and alternative market arrangements.

This legislation is being introduced so that these goals can be realized.

PROVISIONS OF THE BILL

To accomplish the purposes outlined here, the bill:

First. Establishes one additional Assistant Secretary of Agriculture position to perform such duties as the Secretary may direct, including carrying out the purposes of this act.

Second. Creates a 22-member national agricultural research policy advisory board to advise the Secretary of Agriculture on programs, policies, and goals of research and education.

Third. Provides for coordination and authorizes $7,500 for human nutrition research in the fiscal year ending September 30, 1978.

Fourth. Contains authorization for mission-oriented research grants to all colleges and universities having demonstrable capacity in agricultural research.

Fifth. Establishes a new competitive grant program to be awarded to Federal agencies, research institutions, organizations, and individuals for the purpose of carrying out agricultural research with authorized funding for this program of $15,000,000 in fiscal 1978, and such sums as may be necessary for the 2 subsequent fiscal years up to a total of $750,000,000 for all 3 years.

Sixth. Raises the authorization for existing agricultural research programs and for sections 5 and 6 of this act to a total of $600,000,000 for the year ending September 30, 1978.

Mr. President, I believe that we must put increased emphasis on agricultural research in this country. Consumers in the future will depend on the action we take now. I urge my colleagues in the Senate to take early and affirmative action on this bill.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 248

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. That this Act may be cited as the "National Agricultural Research Policy Act of 1977".

FINDINGS, DEFINITIONS, AND PURPOSES

FINDINGS

SEC. 2. (a) The Congress finds that—

(1) agricultural research, which includes research on food, nutrition, and fiber as well as timber growth and utilization and on other agricultural commodities, is vital to the Nation's well-being;

(2) the projected increase in the population of the United States, together wtih the worldwide population expansion, places increasing demands on agricultural production in the United States;

(3) agriculture and agricultural production are a national resource and should be supported by a strong system of agriculturally related research, resident instruction, and extension;

(4) more intensive research and extension programs oriented to the specific, known needs of small-farm operators are essential to the preservation of the family farm system in this country;

(5) meeting the Nation's needs for wood products, consistent with the principles of multiple use and sustained yield, is in the national interest;

(6) the production of healthy animals and plants is essential to insure a safe food supply for the Nation;

(7) expanding exports of agricultural commodities is essential for maintaining a positive balance of payments in international trade;

(8) the public wants plentiful supplies of quality agricultural and forestry products at reasonable prices;

(9) agricultural research and extension costs have risen more rapidly than appropriations;

(10) various factors such as energy, the environment, and social, political, and economic considerations should be incorporated into planning for the agricultural sciences;

(11) the level of Federal support for the agricultural sciences, including research, conducted by the United States Department of Agriculture, and research and extension conducted by the land-grant colleges, State agricultural experiment stations, and other colleges and universities engaged in agricultural research and the training of agricultural research engineers and scientists, should be substantially increased;

(12) it is important to assure that the results of agricultural research be effectively communicated to farmers and all other users who can benefit therefrom; and

(13) this Nation has an opportunity and a responsibility to use its preeminence in the field of agricultural research to assist chronic food deficit developing countries to increase their own food production for domestic use.

DEFINITIONS

(b) For purposes of this Act:

(1) The term "agricultural research" shall include research into the laws and principles underlying the basic problems of agriculture in its broadest aspects. This term shall include, but not be limited to, those subject areas described or defined in section 1 of the Act of June 29, 1935, as amended (7 U.S.C. 427), section 7 of the Act of October 10, 1962 (16 U.S.C. 582a–6, commonly known as the McIntire-Stennis Act), section 203 of the Agricultural Marketing Act of 1946 (7 U.S.C. 1622), the Act of May 22, 1928, as amended (16 U.S.C. 581 et seq.), and the Manual of Classification of Agricultural and Forestry Research prepared by the Research Classification Subcommittee of the Agricultural Research Policy Advisory Committee.

(2) The term "mission-oriented agricultural research" includes agriculturally related research on fundamental scientific problems with regard to which—

(A) there is a need already in existence for the new knowledge that would be generated by this research;

(B) the research has a strong potential to be of benefit to mankind; and

(C) the research deals with more than an unproven concept.

(3) The word "Board" means the National Agricultural Research Policy Board established pursuant to section 4 of this Act.

(4) The word "Secretary" means the Secretary of Agriculture.

PURPOSES

(c) The purposes of this Act are—

(1) to emphasize agricultural research and education as distinct missions of the United States Department of Agriculture;

(2) to encourage and facilitate the development and implementation of more efficient and environmentally sound methods of producing, processing, marketing, and utilizing food, fiber, and wood products;

(3) to provide for research on human nutrition in order to maximize the health and vitality of the people of the United States; and

(4) to provide a mechanism for identifying the Nation's highest priorities for agricultural research, to assure that high priority research is effectively implemented, and to be certain that all research related to agriculture is effectively planned, coordinated, and evaluated.

COORDINATION OF AGRICULTURAL RESEARCH

SEC. 3. (a) The Secretary shall—

(1) coordinate and disseminate all agricultural research information, conducted or financed by or affiliated with the United States Department of Agriculture, and to the maximum extent practicable after consultation with other Federal departments and agencies coordinate all such research and the dissemination of information related thereto;

(2) keep abreast of developments in, and the Nation's needs for, agricultural research and education and represent the needs for such research and education in deliberations within the United States Department of Agriculture and the executive branch of the United States Government, and with the States and their educational and research institutions, private educational institutions, agricultural and related industries, and other interested institutions and groups;

(3) designate an officer or employee of the United States Department of Agriculture as cochairman of the National Agricultural Research Policy Advisory Board established pursuant to section 4 of this Act;

(4) establish pursuant to the provisions of title 5, United States Code, governing appointments in the competitive service, an appropriate staff to assist him in carrying out the provisions of this Act and to provide such staff support for the Board as he deems necessary. The Secretary shall appoint from such staff one person to serve as the Executive Secretary of the Board; and

(5) provide liaison with other units within the executive branch which are involved in agricultural research activities in other countries.

(b) In addition to the Assistant Secretaries of Agriculture now provided for by law, there shall be one additional Assistant Secretary of Agriculture, who shall be appointed by the President, by and with the advice and consent of the Senate, who shall perform such duties as the Secretary may direct, including, but not limited to, such duties as are necessary to carry out the purposes of this Act, and he shall receive compensation at the rate now or hereafter prescribed by law for Assistant Secretaries of Agriculture.

(c) Paragraph (11) of section 5315 of title 5, United States Code, is amended by striking the number which appears in parentheses following the phrase "Assistant Secretaries of Agriculture" and inserting the next higher number.

ESTABLISHMENT OF NATIONAL AGRICULTURAL RESEARCH POLICY ADVISORY BOARD

SEC. 4. (a) There is established within the United States Department of Agriculture a permanent board to be known as the National Agricultural Research Policy Advisory Board.

(b) The Board shall consist of twenty-two members appointed by the Secretary as follows:

(1) two representatives from the United States Department of Agriculture, one from the Agricultural Research Service and one from the Cooperative State Research Service;

(2) five representatives from colleges and universities engaged in agricultural research;

(3) one representative from each of the following organizations upon the recommendation of the head of such organization:

(A) the National Academy of Sciences;

(B) the National Science Foundation;

(C) the Office of Technology Assessment of the Congress of the United States;

(D) the Environmental Protection Agency;

(E) the Food and Drug Administration, United States Department of Health, Education, and Welfare; and

(F) the Agency for International Development.

(4) nine representatives from the following types of organizations, as designated by the Secretary:

(A) two from national farm organizations;

(B) one from a national forestry organization;

(C) two from agricultural commodity associations;

(D) one from a national environmental organization;

(E) one from a national veterinary medical association;

(F) one from a national consumer organization; and

(G) one from a private sector organization involved in development programs and issues in developing countries.

(c) The Board shall be chaired jointly by the designee of the Secretary and a member of the Board elected by the Board.

(d) The Board's responsibilities shall include, but not be limited to—

(1) establishing appropriate means for evaluating the economic, environmental, and social impacts of research and extension programs related to the agricultural, food, and nutrition sciences;

(2) reviewing programs, policies, and goals of the agricultural research and extension agencies of the Department of Agriculture and the agricultural research and extension portions of programs in other agencies having primary missions outside of such Department, including colleges and universities;

(3) providing a forum for the exchange of information on plans and programs of other Federal agencies sponsoring or conducting research and education programs related to agriculture, food, and nutrition, including information to be provided through the Federal Coordinating Council for Science, Engineering, and Technology;

(4) developing and recommending national policies, priorities, and strategies for agricultural research and education for both the short and the long term for consideration by the Department of Agriculture and other agencies and institutions conducting agricultural research; and

(5) reviewing and making recommendations to the Secretary with regard to the allocation of funds for all programs of research and extension carried out by the Department of Agriculture.

(e) In formulating its recommendations to the Secretary, the Board may obtain the assistance of United States Department of Agriculture employees, and to the maximum extent practicable and after appropriate consultations, obtain the assistance of employees of other Federal departments and agencies conducting related research, and of appropriate representatives of land-grant and other colleges and universities, State agricultural experiment stations, and other non-Federal organizations conducting significant programs in the agricultural sciences.

(f) While away from their homes or regular places of business in the performance of services for the Board, members of the Board shall be allowed travel expenses, including per diem in lieu of subsistence, in accordance with applicable laws.

(g) In the event a vacancy should occur on the Board it shall be filled in the same manner as provided in subsection (b) of this section.

(h) No later than January 31 of each year, the Board shall submit a report on its activities during the preceding fiscal year to the President and the House Committee on Agriculture, the House Committee on Appropriations, the Senate Committee on Agriculture and Forestry, and the Senate Committee on Appropriations. The report may include the separate views of members of the Board. The first report shall be due following the first complete fiscal year after the enactment of this Act. The second annual report shall include a long-range plan for Agricultural Research and Extension, to be updated every five years.

COORDINATION OF HUMAN NUTRITION RESEARCH

SEC. 5. (a) To promote the coordination of human nutrition research and development, the Secretary shall, in cooperation with the heads of other Federal agencies, conduct a continuing inventory of ongoing human nutrition research projects and results. To the extent possible, this inventory shall make use of studies and other inventories being carried on by the Federal agencies, including information contained within the Department of Agriculture's Current Research Information System.

(b) Such inventory shall be conducted by a Clearing House for Federal Human Nutrition Research, to be established within the Department of Agriculture. The purpose of this office shall be to—

(1) collect on a continuing basis from each Federal agency information held by such agency which pertains to research which has been, is being, or will be conducted by or for such agency with regard to human nutrition. Such information shall include complete descriptions of the projects, and the final research results. Human nutrition research shall include studies on the nutritive value of foods, human nutrition requirements, the nutritional impact of Federal food programs, nutrient function and metabolism, malnutrition, food cost plans, nutrient analysis of foods, dietary or food consumption surveys, current dietary practices or habits, nutritional surveillance and status, nutritional education, clinical nutrition, dietary therapy, nutrition and its relationship to alcohol, environmental toxicants, cancer, and so forth, malabsorption syndromes, and familial or inherited errors in metabolism or nutritional defects;

(2) prepare a report containing a detailed summary of the information described in paragraph (1);

(3) submit such report, and each periodic revision thereof, to the Congress and each Federal agency from which the office collected information pursuant to paragraph (1);

(4) forward such report to the appropriate offices within the Department of Agriculture responsible for nutrition research activities; and

(5) make such report and collected information available to the public. The first such report shall be submitted and made available pursuant to paragraphs (3), (4), and (5) not later than one year after the date of enactment of this Act and shall be updated, resubmitted and made available in its updated form every year thereafter.

GRANTS FOR MISSION-ORIENTED RESEARCH

SEC. 6. (a) In addition to any other grants made under Federal law, the Secretary is authorized to make grants to land-grant colleges and universities eligible for assistance under the Acts of July 2, 1862 (commonly known as the First Morrill Act), and of August 30, 1890 (commonly known as the Second Morrill Act), the Tuskegee Institute, and to State agricultural experiment stations eligible for assistance under the Act of March 2, 1887 (commonly known as the Hatch Act), and to all colleges and universities having demonstrable capacity in agricultural research as determined by the Secretary, to carry out mission-oriented agricultural research. These grants shall be made without regard to matching funds being provided by the States in which the recipients are located. The Secretary shall limit allowable overhead costs to those necessary to carry out the purposes of a grant.

(b) Section 3(c)(4) of the Act of March 2, 1887, as amended (7 U.S.C. 361(c)(4)), is hereby repealed.

COMPETITIVE GRANT PROGRAM

SEC. 7. In addition to any other grants made under Federal law, the Secretary is further authorized to make grants, on a competitive basis, to Federal agencies, research institutions, organizations, and individuals for the purpose of carrying out agricultural research. These grants shall be made without regard to maching funds being provided by the States in which the recipients are located. The Secretary shall limit allowable overhead costs to those necessary to carry out the purposes of a grant.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. (a) Except as provided in subsection (b), there is authorized to be appropriated for the purposes of carrying out the provisions of section 7 of this Act $15,000,000 for the fiscal year ending September 30, 1978, and such sums as may be necessary for the two subsequent fiscal years ending September 30, 1979, and September 30, 1980, except that the total amount of such appropriations shall not exceed $150,000,000 during the three-year period beginning October 1, 1977, and ending September 30, 1980, and not in excess of such sums as may thereafter be authorized by law for any subsequent fiscal year.

(b) There is authorized to be appropriated for the purpose of conducting human nutrition research under this Act $7,500,000 for the fiscal year ending September 30, 1978, and such sums as may be necessary to carry out such research for each of the fiscal years ending September 30, 1979, and September 30, 1980, and not in excess of such sums as may thereafter be authorized by law for any subsequent fiscal year.

AUTHORIZATIONS FOR OTHER PROGRAMS

SEC. 9. Notwithstanding any authorization for appropriations for agricultural research in any Act existing prior to the date of enactment of this Act, there is authorized to be appropriated for the fiscal year ending September 30, 1978, a total of $600,000,000 for those agricultural research programs existing prior to the enactment of this Act and for sections 5 and 6 of this Act, and not in excess of such sums as may thereafter be authorized by law for any subsequent fiscal year.

By Mr. JACKSON (for himself and Mr. MAGNUSON):

S. 249. A bill to amend the Youth Conservation Corps Act of 1970 (84 Stat. 794); to the Committee on Interior and Insular Affairs.

YOUNG ADULT CONSERVATION CORPS ACT

Mr. JACKSON. Mr. President, I am introducing today for appropriate reference, a bill to amend the Youth Conservation Corps—YCC—Act of 1970. The purpose of the legislation I am introducing today is to create a Young Adult Conservation Corps to complement the highly successful YCC.

During the depression of the thirties, President Franklin D. Roosevelt proposed a sensible approach to relieving massive unemployment, the Civilian Conservation Corps. The CCC served this Nation well in the 1930's by providing productive jobs for almost 3 million Corps participants. The results of this

program can still be seen today in our national parks and other public lands.

Patterned after the CCC, Congress passed, in 1970, a pilot program—the Youth Conservation Corps—to provide summer employment on our public lands to approximately 3,000 young people 15 to 18 years of age. Since 1970, the Congress has twice extended and expanded the program making the YCC a permanent part of our national scene. Like the CCC, it has proven to be a very successful and popular program.

Since its inception, and including this year's enrollment, some 56,000 young men and women from all segments of society have participated in the YCC program. These young people have made meaningful improvements to our natural resources worth almost $30 million. In so doing, they have returned to the Nation approximately 80 cents on every dollar appropriated. The popularity of the program is attested to by the fact that 200,000 young people applied for approximately 24,000 YCC enrollee positions available last summer.

The legislation I am introducing today builds upon the proven concepts of the CCC and YCC by providing young people, primarily those 19 to 24 years of age, with jobs in conservation-related projects on public lands and waters of the United States. In addition, under the provisions of this proposal grants can be made to States to assist them in developing projects to employ young adults for preservation and maintenance of non-Federal public lands and waters within the States.

The need for creating this new Young Adult Conservation Corps is thoroughly demonstrated by the unconscionably high levels of youth unemployment and the backlog of conservation-related work on our public lands. A large proportion of the Nation's youth are failing in or being failed by, the labor market. At any one time in 1975, 3.6 million jobseekers between the ages of 16 and 24 were unable to find jobs. The unemployment rate for teenagers—16 to 19 years old—was almost three times that for persons 25 and over, while the rate for young adults—20 through 24 years old—was more than twice the rate for older adults. The absolute and relative rates of youth joblessness in the United States are significantly above those in most other industrialized nations.

The situation is much more critical for minority youth, especially those living in central cities and those residing in low-income rural areas. Nearly 3 of every 10 nonwhites under the age of 25 who seek work cannot find it. This unemployment rate is almost double that for young whites.

The rate of teenage unemployment in the central cities in 1975 was nearly a third higher than in the suburbs. More revealing, only 38 percent of central city teenagers were employed, compared with 47 percent of suburban youths. The recession has unquestionably been a depression for youth, especially for minority teenagers. In the first quarter of 1976, the overall teenage rate of unemployment had risen to 19.4 percent, while the nonwhite unemployment rate reached an appalling 35.2 percent. In the third quarter of 1976, the nonwhite teenage unemployment rate was still close to 30 percent and the unemployment rate for nonwhites between the ages of 18 to 24 residing in our Nation's central cities was over 26 percent. For the same age group residing in central city poverty areas the rate was almost 32 percent.

Ironically, while millions of the young people are jobless, jobs that need doing on our Nation's public lands go wanting. There is a tremendous backlog of resource conservation and restoration work on Federal and State owned lands. In almost every part of the country there is a desperate need to replant forests, to prevent erosion, to abate pollution, to guard against and fight fire, to enhance the beauty and utility of our parks, to add new facilities—trails, bridges, and camping areas—in our recreation areas, to improve watershed management, and to make the beauty and grandeur of our public lands accessible to the American people.

The Departments of the Interior and Agriculture estimate a backlog of some 720,000 man-years of recurrent and nonrecurrent work which could be performed by Young Adult Conservation Corps members. They estimate they could easily employ 90,000 to 100,000 youth in the first year of the program's operation given the support and cooperation of other Federal agencies. Significantly, most of the work is highly labor intensive and does not involve extensive supervision or expensive machinery. This critically important work is there waiting to be done and it requires only the people to do the job and the money to pay them.

Mr. President, this legislation is very similar to S. 2630 which I introduced in the 94th Congress. The Senate Interior and Insular Affairs Committee conducted hearings and favorably reported the House-passed version of this legislation—H.R. 10138—in July but no floor action was taken. I hope that we can move expeditiously to enact this legislation during the 95th Congress.

I am pleased to note that one of the recent recommendations of the National Commission for Manpower Policy calls for the conversion of the YCC program from an 8-week summer program to a year-round training/work program for 50,000 young people from low-income families, particularly—but not exclusively—those from rural backgrounds. While the legislation I introduce today is designed to employ more than 50,000 young people and will not directly affect the existing YCC program, I am encouraged by the Commission's recognition of the value of the Young Adult Conservation Corps approach in solving the problem of youth unemployment. I urge my colleagues to join with me in support of this very important legislation. We cannot afford to waste the energy and skills of the young people in our Nation who have an honest desire to work and contribute to their communities.

I ask unanimous consent that the bill and a summary of its major provisions be printed in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 249

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Young Adult Conservation Corps Act".

SEC. 2. The Act entitled "An Act to establish a pilot program in the Departments of the Interior and Agriculture designated as the Youth Conservation Corps, and for other purposes", enacted August 13, 1970 (84 Stat. 794; as amended, 16 U.S.C. 1701–170) (hereinafter in this Act referred to as the "Youth Conservation Corps Act"), is amended by adding at the end thereof the following new Title:

"TITLE II—YOUNG ADULT CONSERVATION CORPS

"POLICY AND PURPOSE

"SEC. 201. The Congress finds that—

"(1) unemployment levels are excessively high among young adults;

"(2) young adults have minimal or no job experience, and that considering our country's current economic situation, these young adults have a limited opportunity of gaining the necessary job experience, training, and fundamental skills required to enter the labor force at a competitive level;

"(3) as a result of the high unemployment levels of this age group our country's social service resources are being unnecessarily drained, and the Government is losing tax revenues;

"(4) due to their limited opportunities, crime rates are higher among young adults;

"(5) there are large inventories of conservation work and other work of a public nature within the national park system, the national forest system, States, municipalities, and other public land and water areas of the United States which require large amounts of labor and relatively small capital investments; and

"(6) much of the conservation work and other work of a public and environmental nature on the lands and waters of the United States, such as reforestation, timber stand improvement, fighting forest fires, trail and campground improvements, and control of insects, diseases, soil erosion, and floods and other natural disasters, can only be accomplished during certain seasons or by a year-round work program.

It is, therefore, the purpose of this title to complement the highly successful Youth Conservation Corps and to provide employment and other benefits to young adults who would not otherwise be currently productively employed while reducing the inventory of conservation work and completing many other projects of a public nature on the lands and waters of the United States. This title shall in no way limit the requirement set forth in the Employment Act of 1946 (15 U.S.C. 1021 et seq.) that the Federal Government promote maximum production and purchasing power in the Nation's economy. This title supplements and extends the provisions of title I of this Act and does not limit or repeal any existing authority provided by title I of this Act.

"EXTENSION OF YOUTH CONSERVATION CORPS

"SEC. 202. The Secretary of the Interior and the Secretary of Agriculture (hereafter in this title referred to as the 'Secretaries') shall jointly extend the Youth Conservation Corps so as to make possible the year-round employment of young adults. Section 102 of this Act applies to the extended Corps under this title, except that individuals employed as Corps members under this title—

"(1)(A) shall have attained age nineteen

but not attained age twenty-four or (B) shall have attained age sixteen (or completed high school) but not attained age nineteen, in the case of individuals who have left school and who give adequate assurances, under criteria established by the Secretaries, that they did not leave school for the purpose of obtaining employment under this title;

"(2) shall be physically capable, as determined under regulations established by the Secretaries, to carry out the work of the Corps;

"(3) shall be given preference for employment if they reside in counties having a rate of unemployment equal to or in excess of 6 per centum for three consecutive months, or, if such data is not kept by counties, such other statistical area basis as is used within the State involved, as determined by the Secretary of Labor; and

"(4) may be employed for a total period of not more than twelve months, with such maximum employment period consisting of one continuous twelve-month period or of two or more periods which together total twelve months.

"SECRETARIAL DUTIES AND FUNCTIONS

"SEC. 203. (a) Section 103 of this Act, relating to the duties and functions of the Secretaries, applies to this title, except that in administering this title the Secretaries shall—

"(1) place individuals employed as Corps members into jobs which will diminish the backlog of relatively labor intensive projects which would otherwise be carried out if adequate funding were made available;

"(2) employ such individuals in such projects as but not limited to—

"(A) tree nursery operations, planting, pruning, thinning, and other silvicultural measures;

"(B) erosion control and flood damage;

"(C) wildlife habitat improvements;

"(D) range management improvements;

"(E) recreation development, rehabilitation, and maintenance;

"(F) forest insect and disease control, road and trail improvements, and wildlife preservation; and

"(G) general sanitation, cleanup, and maintenance of State and public lands;

"(3) in determining appropriate work projects for Corps members, give priority to projects that—

"(A) are relatively labor intensive;

"(B) have work plans or for which work plans could be readily developed;

"(C) may be initiated promptly; and

"(D) are productive;

"(4) to the maximum extent practicable employ such individuals in areas where existing residential facilities are available;

"(5) to the maximum extent practicable employ such individuals in activities similar to activities of those employed in seasonal and part-time employment, in the case of the Secretary of the Interior, in the National Park Service, Bureau of Outdoor Recreation, the United States Fish and Wildlife Service, the Bureau of Reclamation, the Bureau of Land Management, and the Bureau of Indian Affairs, and, in the case of the Secretary of Agriculture, in the Forest Service and the Soil Conservation Service; and

"(6) determine rates of pay for Corps members by giving consideration to housing, transportation, food, medical, and other direct benefits of employment (except that supplies and equipment shall not be benefits of employment), but in no event shall rates be set at less than the current Federal minimum wage, set forth in section 6(a)(1) of the Fair Labor Standards Act of 1938, as amended.

"(b) In carrying out this title, the Secretaries shall provide, to the maximum extent practicable, that Corps members under this title shall not, at the same time, share common facilites or work on common projects with Corps members under title I of this Act.

"EXTENSION OF GRANT PROGRAM FOR STATE PROJECTS

"SEC. 204. (a) The Secretaries shall jointly extend the grant program for State projects required by section 104 of this Act so as to provide increased employment to young adults to develop, preserve, and maintain non-Federal public lands and waters within the States, as defined in section 104(a) (and such employment may include employment on projects which assist the selective cutting and thinning of timber on such lands for essential fuel purposes). Sections 104(a), (b), and (c) of this Act apply to the extended grant program for State projects under this title, except that for the purposes of this title, each grant application shall contain assurances satisfactory to the Secretaries that individual employed under the project for which the application is submitted—

"(1)(A) shall have attained age nineteen but not attained age twenty-four, or (B) shall have attained age sixteen (or completed high school) but not attained age nineteen, in the case of individuals who have left school and who give adequate assurances, under criteria established by the Secretaries, that they did not leave school for the purpose of obtaining employment under this title;

"(2) shall be physically capable, as determined under regulations established by the Secretaries;

"(3) shall be given preference for employment if they reside in counties having a rate of unemployment equal to or in excess of 6 per centum for three consecutive months, or if such date is not kept by counties, such other statistical area basis as is used within that State, as determined by the Secretary of Labor;

"(4) be employed for a total period of not more than twelve months, with such maximum employment consisting of one continuous twelve-month period or of two or more periods which together total twelve months; and

"(5) shall be paid at the rate set under section 203(a)(3).

"(b) Of the sums appropriated under section 207(b) for the fiscal year beginning October 1, 1977, not more than twenty-five per centum shall be made available for grants under this section. Of the sums appropriated under section 207(b) for the fiscal year beginning October 1, 1978, thirty per centum shall be made available for grants under this section. Amounts reserved for this section in any subsequent fiscal year shall be determined by the Congress after receiving the recommendations of the Secretaries of Agriculture and Interior in the report required by section 205. Within 90 days from the date such report is referred to the House Committee on Education and Labor and the Senate Committee on Interior and Insular Affairs, each such Committee shall report legislation providing authorization for the fiscal year to which the report refers.

"(c) The States, in employing young adults in the extended grant programs authorized by this section, shall have the same duty, with respect to common facilities and projects, as is imposed on the Secretaries under section 203(b).

"SECRETARIAL REPORTS

"SEC. 205. The Secretaries shall prepare jointly and submit to the President and the Congress a report detailing the activities carried out under this title for each fiscal year. Such report shall be submitted not later than February 1 of each year following the date of enactment of this Act. The Secretaries shall include in such report such recommendations as they deem appropriate for changes in the percentage of funds allocated to States under section 204(b).

"TIME PERIOD FOR PLANNING AND PREPARATION

"SEC. 206. (a) During the period beginning on the date of enactment of this title and ending on October 1, 1977, the Secretaries shall prepare a plan to carry out the activities authorized by this title. Such plan shall contain an estimate of the annual costs of carrying out the activities authorized by this title, a procedure for selecting candidates, a detailed list and description of the work projects selected by the Secretaries to be initiated under this title, and a detailed list and description of site locations, facilities, and equipment selected by the Secretaries for use under this title. In selecting work projects, the Secretaries shall give priority to reforestation, timber stand improvements, fighting forest fires, trail and campground improvements, and control of insects, disease, soil erosion, and floods. In selecting facilities for Corps camps, the Secretaries shall utilize existing facilities, including military facilities, whenever possible.

"(b) No young adults shall be employed under section 202 and no grants shall be made to the States under the extended grant program of section 204(a) until January 1, 1978.

"(c) The Secretaries shall submit to the Congress the plan they prepared pursuant to subsection (a) no later than October 1, 1977. If neither House of Congress disapproves such plan within sixty days after its submission, such plan shall be deemed approved.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 207. (a) There is authorized to be appropriated to the Secretaries for preparing the plan required under section 206 of this Act, and for preparing the sites, facilities, and equipment selected in such plan (utilizing persons eligible for employment under this title, where practicable), $50,000,000 for the period beginning on the date of enactment of this title and ending on the two hundred and fortieth day after such date.

"(b) There are authorized to be appropriated in addition to the amounts appropriated under subsection (a) such sums as may be necessary for the fiscal year beginning October 1, 1977, and for each of the three succeeding fiscal years, for the purpose of carrying out this title.".

SEC. 3. The Youth Conservation Corps Act is further amended by—

(1) inserting immediately after the enacting clause the following:

"TITLE I—YOUTH CONSERVATION CORPS";

(2) redesignating sections 1 through 6 as sections 101 through 106, respectively;

(3) striking out "section 6" in section 104(d) (as redesignated by clause 2 of this section) and inserting in lieu thereof "section 106"; and

(4) striking out "Act" each place it appears in sections 101 through 106 (as redesignated by clause 2 of this section) and inserting in lieu thereof "title".

SUMMARY OF MAJOR PROVISIONS

S. 249 instructs the Secretaries of the Interior and Agriculture to extend the Youth Conservation Corps by creating a Young Adult Conservation Corps to make possible year-round employment of young adults ages 19–24. The bill also provides for the employment of youths 16–18 years of age who are high school graduates and permits employment of non-high school graduates within this age category provided that such individuals do not drop out of school for purposes of obtaining employment in the Young Adult Conservation Corps.

The Secretaries are directed, beginning on the date of enactment, to prepare a de-

tailed plan to carry out the activities authorized under this legislation. Such plan shall contain an estimate of annual cost, procedures for selecting candidates, a list and description of the work projects initially selected, and a list and description of site locations, facilities and equipment required.

The bill provides that enrollees in the Young Adult Conservation Corps shall be employed a maximum period of 12 months either in one continuous period or two or more periods which together total 12 months and shall be paid the current Federal minimum wage set forth in section 6(a)(1) of the Fair Labor Standards Act of 1938, as amended. Preference for employment is to be given to those individuals residing in counties having an unemployment rate equal to or in excess of 6 percent for three consecutive months as determined by the Secretary of Labor.

The legislation also extends the grant program for state projects authorized by Section 104 of the Youth Conservation Corps Act of 1970. This program will allow State participation in the development and preservation of non-Federal public lands and waters.

By Mr. INOUYE:

S. 250. A bill to amend title I of the Employee Retirement Income Security Act of 1974, and the Internal Revenue Code of 1954 to prohibit the reduction of disability payments under employer-maintained disability compensation plan whenever certain social security benefit payments are increased; to the Committee on Finance.

Mr. INOUYE. Mr. President, I have learned that a gross inequity exists involving private disability insurance benefits and social security cost-of-living increases. I have received letters describing an apparently legal practice where insurance companies have reduced their benefits by the amount of each cost-of-living increase in social security payments.

This practice means that the cost-of-living adjustments in social security never reach the intended recipient; they instead accrue toward the contracted liabilities of insurance carriers, reducing the benefits they pay out. This obviously subverts the purpose of cost-of-living adjustments.

Therefore, I wish to offer some means of corrective action. I believe the bill I am reintroducing today will accomplish this. It does not encroach on the customary jurisdiction claimed by the States in regulating the insurance industry. It does, however, amend the 1974 Employee Retirement Income Security Act and the 1954 Internal Revenue Code by prohibiting the accrual of the increased social security benefits toward defraying, reducing, or subrogating the benefits owed recipients under private insurance companies.

Mr. President, I ask that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 250

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 206(b) of the Employment Retirement Income Security Act of 1974 is amended by striking out "pension plan" in paragraph (1) and inserting in lieu thereof "employee welfare benefit plan".

SEC. 2. (a) Section 264 of the Internal Revenue Code of 1954 (relating to certain amounts paid in connection with insurance contracts) is amended by adding at the end thereof the following new subsection:

"(d) CERTAIN DISABILITY COMPENSATION PLANS.—Notwithstanding the provisions of sections 162, 212, and 404, no deduction is allowed for amounts paid or contributed to or under a disability compensation plan by the employer maintaining that plan if under the plan the benefits payable to an individual receiving benefits under the plan are reduced, or any scheduled increase in such benefits is omitted, on account of an increase in monthly insurance benefits to which such an individual is entitled under title II of the Social Security Act if such increase occurs after such individual begins to receive benefits under such plan. For purposes of this subsection, the term 'disability compensation plan' means a program (including a program of insurance) established by an employer under which employees receive periodic payments or a lump-sum payment in compensation for physical or mental disability resulting from their employment.".

(b)(1) The caption of section 264 of such Code is amended by inserting after "CONTRACTS" the following: "OR UNDER CERTAIN DISABILITY COMPENSATION PLANS".

(2) The table of sections for part IX of subchapter B of chapter 1 of such Code is amended by striking out the item relating to section 264 and inserting in lieu thereof the following:

"SEC. 264. Certain amounts paid in connection with insurance contracts or under certain disability compensation plans.".

SEC. 3. The amendment made by the first section of this Act applies to plan years beginning after the date of enactment of this Act. The amendment made by section 2 applies to taxable years beginning after the date of enactment of this Act.

By Mr. MUSKIE:

S. 251. A bill to amend the Clean Air Act, as amended; to the Committee on Public Works.

By Mr. MUSKIE (for himself, Mr. RANDOLPH, Mr. STAFFORD, and Mr. BAKER):

S. 252. A bill to amend the Clean Air Act, as amended; and

S. 253. A bill to amend the Clean Air Act, as amended; to the Committee on Public Works.

CLEAN AIR ACT AMENDMENTS

Mr. MUSKIE. Mr. President, last year the Congress was unable to complete action on legislation to amend the Clean Air Act. We have now been asked to act quickly to deal with pressing issues, the most visible of which is the question of auto emission standards.

I do not know whether it will be possible in a short time period to move a new bill to the President, but I am willing to try. In order to expedite that process, I am introducing today three bills, one of which is identical to the bill which the Senate passed last August 5; another of which is, in all practical respects, similar to the conference report which was brought to the Senate on September 30, and the third which is similar to legislation I offered last year which extended clean air authority, and modified the auto NO_x emission standards.

As the Members will note, none of the dates in the Senate-passed bill and the conference report of last session have been changed. In many places, the title "Clean Air Amendments of 1976" appears. There are timetable adjustments which would have to be made in the legislation if any of these provisions were adopted this year. I introduce the bills unchanged to emphasize that they are working documents.

Mr. President, last year I told the Senate that I viewed as minimal the need to amend the Clean Air Act. I still hold that view. I am introducing two of these bills today, with Senators RANDOLPH, STAFFORD, and BAKER, not because we support all, or any, of the provisions of each, but because they represent much work, much compromise, and much thought of the House and Senate committees involved. They will be the subject of hearings on February 9, 10, and 11. They will be reviewed again. The first bill, as passed by the Senate, will be the agenda for committee markup sessions scheduled to begin after the Lincoln Day recess. The second bill is only offered to provide an opportunity to build a record in the event we get to conference with the House on a bill similar to that which was passed by that body last year.

I would be happy and satisfied to bring to the Senate today the bill we passed last year and defend it. I would be happy to bring the conference agreement to the Senate and defend it. And because those alternatives may not be wholly acceptable as written, I will try, as a result of the hearings and the markups that follow, to bring a new bill to the Senate and defend it.

I only caution my colleagues that time is running out. We have worked 2 years on clean air amendments. We have held 56 days of hearings on clean air issues over the past 6 years. We know the issues and the implications of most of the alternatives. We are not likely to know a great deal more whether we legislate today or 2 months or 2 years from now. But our job is to legislate and I am prepared to move as fast as the Senate will permit.

I hope Senators will act immediately to let the committee know their views on the minimum number of issues which demand action so we can soon get down to the business of reviewing the Clean Air Act.

Because there is little time and because there will be only a limited opportunity to take oral testimony, I would hope potential witnesses would immediately write to the Subcommittee on Environmental Pollution, the Committee on Public Works, indicating areas on which they would like to comment so that a hearing schedule can be developed.

Mr. President, I ask unanimous consent to include in the RECORD at this point a copy of a letter which was addressed to the members of the Committee on Public Works, which sets forth the schedule for Clean Air Act considerations. This schedule has been tentatively approved by the Committee on Public Works.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JANUARY 13, 1977.

Much interest has been expressed in the plans of the Subcommittee as regards Clean Air Amendments. I have discussed this mat-

ter with Representative Paul Rogers, and the Public Works Committee staff has met to discuss alternatives.

In order to expedite consideration of this important legislation, I propose the following:

1. Introduction of the Senate-passed bill and the Conference Report (I may also introduce a separate auto emission bill);

2. Hearings on February 9, 10, and 11 to take testimony on these bills and such other recommendations as witnesses may desire;

3. Full Committee mark-up sessions on February 21, 22 and 23 with the Senate passed bill as the agenda;

4. Attempt to report a bill before March 15.

This procedure has been discussed with Chairman Randolph and Senators Stafford and Baker. It is intended to speed the process while not precluding any Member from initiating any amendments or examining any witness. However, if we are to get this job done expeditiously so that we can turn to the much-needed review of the Clean Water Act, a tight time schedule must be followed and Members will have to commit blocks of time to the hearings and mark-ups.

If you concur with this approach I will instruct the staff to announce the hearings and begin to schedule as many witnesses as request to appear and can be accommodated during the days set aside, taking into account the commitment of Members to participate.

I would be happy to discuss this further and am open to alternative suggestions. I would like to introduce these two bills as soon as possible and make an announcement of hearings at the same time so that a schedule can be worked out and witnesses will have an opportunity to prepare testimony.

Sincerely,

EDMUND S. MUSKIE,
Chairman, Subcommittee on Environmental Pollution.

By Mr. HUMPHREY:

S. 255. A bill to establish a Department of Education; to the Committee on Government Operations.

EDUCATION REORGANIZATION ACT OF 1977

Mr. HUMPHREY. Mr. President, I am introducing today a bill to create a Cabinet-level Department of Education, to establish a Federal Interagency Committee on Education, and to set up a National Advisory Commission on Education. By organizing the Federal education effort in this way, we can move effectively to establish national education priorities and better administer our wide-ranging education programs.

This action is long overdue. Similar bills have been introduced in recent years—only to die. But now, in 1977, we cannot afford to delay any longer. A lack of support for education shown by the Nixon and Ford administrations has led to a deterioration of our educational system—the public disinterest in education was exploited rather than dispelled. Continued ineffective management of education programs could spell disaster for colleges and universities that depend on Federal resources for stability. Lack of coordination could deprive local and State education agencies of the level of support required to maintain the high standards of quality in education that we demand for our children. Restructuring and consolidation must be the bywords to strengthen the Federal education effort and to meet the needs of the future.

We are the only major nation in the world that lacks a Cabinet-level post in Education. A Federal Department of Education would not add to the levels of the Federal structure. Rather, it follows directly from President-elect Carter's campaign pledges to streamline the bureaucracy by incorporating all of the Federal education agencies into one department. Such a department would provide the national leadership and the assignment of responsibility in an area which has for too long been neglected. Furthermore, it would put us in the best position to address the problems of our fragmented education effort which have been created by a lack of effective communication among Federal agencies.

The present Department of Health, Education, and Welfare has outlived its usefulness in supervising education programs. Its mountainous bureaucracy serves only to impede rather than expedite administration.

The need for a Department of Education has never been more pressing.

A full-time Secretary of Education would oversee all education efforts and speak with Cabinet-level authority to the President, the Congress, the Office of Management and Budget, and the American people. He would provide expert insight into existing programs, proposed programs, and program changes. He could more effectively make the case for deserving but struggling programs. He would be the Nation's chief policy planner for education.

A Department of Education would consolidate existing Federal programs. The responsibility for education is now spread throughout the Federal Department structure. Under my bill, all education policy will be transferred to the Department of Education, and, in addition to other duties, the new Federal Interagency Committee on Education will set the standards, revise the operations of and set policy guidelines for the various and sundry schools, institutes, and nonmission oriented training programs operated by Federal agencies.

Without a Department of Education, there is no overall coordination or direction in the allocation of the many billions of dollars we now spend on education. There is no effective check on duplicated effort or wasted money. There is no way to properly fix responsibility.

Congress itself would benefit from the creation of a Department of Education. We could begin to deal with educational problems systematically, instead of piecemeal and haphazardly. Better information on education legislation would be available. We could more accurately determine whether a given program required strengthening, modification, or abolition. In short, we could expect a more responsible and more responsive execution of education policy.

Mr. President, the United States must reaffirm and strengthen its commitment to the quality education of our young people. We cannot simply pay lip service to the importance of preparing our children to live in a rapidly changing world: We must provide the institutional means to set and implement our goals.

The establishment of a Department of Education would represent a giant step toward these ends. We must take that step—and take it now.

Mr. President, I ask unanimous consent that a summary of my bill to establish a Department of Education, and the text of this legislation, be included in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 255

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Education Reorganization Act of 1977".

DEPARTMENT ESTABLISHED

SEC. 2. There is established an executive department which shall be known as the Department of Education (hereinafter referred to as the "Department"). There shall be at the head of the Department a Secretary of Education (hereinafter referred to as the "Secretary"), who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall receive compensation at the rate prescribed for level I of the Federal Executive Salary Schedule established under section 5312 of title 5, United States Code. The Department shall be administered under the supervision and direction of the Secretary.

FUNCTION AND PURPOSE

SEC. 3. The function and purpose of the Department shall be to promote the cause and advancement of education throughout the Nation. To that end the Secretary shall, among his responsibilities, (1) advise the President with respect to the progress of education; (2) develop and recommend to the President appropriate policies and programs to foster the orderly growth and development of the Nation's educational facilities and resources; (3) exercise leadership at the direction of the President in coordinating Federal activities affecting education; (4) conduct continuing comprehensive surveys, collect data, and make available findings, on the progress of education; (5) provide information and such other assistance as may be authorized by the Congress to aid in the maintenance of efficient school systems; and (6) encourage comprehensive planning by the State and local governments with a view to coordinating Federal, State, and community educational activities at the local level.

UNDER SECRETARY AND OTHER OFFICERS

SEC. 4. There shall be in the Department an Under Secretary, four Assistant Secretaries, and a General Counsel, each of whom shall be appointed by the President, by and with the advice and consent of the Senate, and shall perform such functions and duties as the Secretary may prescribe. The Under Secretary shall receive compensation at the rate prescribed for level III of the Federal Executive Salary Schedule established under section 5314 of title 5, United States Code, and the Assistant Secretaries and General Counsel shall receive compensation at the rate prescribed for level IV under section 5315 of such title. The Under Secretary (or during the absence or disability of the office of Under Secretary, an Assistant Secretary determined according to such order as the Secretary shall prescribe) shall act as Secretary during the absence or disability of the Secretary or in the event of a vacancy in the office of Secretary.

PROVISIONS OF LAW APPLICABLE TO THE DEPARTMENT

SEC. 5. Except to the extent inconsistent with this Act, all provisions of law applicable to the executive departments generally shall apply to the Department.

SEAL

SEC. 6. The Secretary shall cause a seal of office to be made for the Department, of such design as the President shall approve, and judicial notice shall be taken thereof.

DELEGATION OF AUTHORITY

SEC. 7. The Secretary may, without being relieved of his responsibility therefor, and unless prohibited by some specific provision of law, perform any function vested in him through or with the aid of such officials or organizational entities of the Department as he may designate.

TRANSFER TO DEPARTMENT

SEC. 8. (a) The Education Division of the Department of Health, Education, and Welfare, consisting of the Office of Education and the National Institute of Education, together with all of its functions, personnel, property, records, obligations, commitments, and unexpended balances of appropriations, allocations, and other funds is transferred to the Department, and all functions of the Secretary of Health, Education, and Welfare being administered through such division, and all functions of the Secretary of Health, Education, and Welfare, and all functions of the Assistant Secretary of Health, Education, and Welfare for Education, and all functions of the Commissioner of Education with respect to such Division, Office, and Institute, are transferred to the Secretary.

(b) The following additional functions of the Secretary of Health, Education, and Welfare are transferred to the Secretary:

(1) With respect to and being administered by the Secretary of Health, Education, and Welfare through the Office of Child Development;

(2) With respect to all laws dealing with the relationship between Gallaudet College, Howard University, and American Printing House for the Blind, and the Department of Health, Education, and Welfare;

(3) Under section 394 of the Communications Act of 1934, relating to Federal grants for the construction of television broadcasting facilities to be used for educational purposes; and

(c) There are transferred to the Secretary all functions of the Secretary of Housing and Urban Development under title IV of the Housing Act of 1950 relating to college housing.

(d) There are transferred to the Secretary all functions of the National Science Foundation which the Director of the Office of Management and Budget determines relate to instructional personnel development programs, instructional program development, and programs in computer innovations designed for use in education.

(e) All personnel, property, leases, obligations, and commitments and unexpended balances of appropriations, allocations, and other funds which the Director of the Office of Management and Budget determines are to be used with respect to any office, agency, bureau, foundation, or function transferred under the provisions of this section, are transferred to the Department of Education.

ADDITIONAL TRANSFERS

SEC. 9. The President is authorized to transfer to the Department of Education any other agency or instrumentality of the Federal Government which he determines has functions relating to education and should be transferred to the Department of Education to promote efficiency in Government and to carry out the purposes of this Act. Such transfers shall be completed within one hundred and eighty days after the date of enactment of this Act, and a report describing such transfers shall be submitted to the Congress not later than thirty days thereafter.

FEDERAL INTERAGENCY COMMITTEE ON EDUCATION

SEC. 10. (a) There is hereby established a Federal Interagency Committee on Education (hereafter referred to as the "Committee").

(b) The Committee shall study and recommend such actions as may be necessary to assure effective coordination of Federal programs affecting education, including—

(1) development of Federal programs in accordance with the educational goals and policies of the Nation;

(2) consistent administration of policies and practices among Federal agencies in the conduct of similar programs;

(3) full and effective communication among Federal agencies to avoid unnecessary duplication of activities;

(4) adequate procedures for the availability of information on educational matters requested by the Secretary;

(5) set uniform standards, review the operations of, and set policy guidelines for all non-mission-oriented training programs and schools operated by the Federal agencies; and

(6) full and effective cooperation with the Secretary on such studies and analyses as are necessary to carry out the purposes of this Act.

(c) The Committee shall make an annual report, to the President for submission to the Congress once each year, on all Federal programs affecting education.

(d) The Committee shall, within ninety days of the enactment of this Act, advise the President with respect to his responsibilities under section 9.

(e) The Committee shall be composed of the Secretary, who shall be the Chairman, and one appropriate representative of each of the following: The Department of State, the Department of Defense, the Department of Agriculture, the Department of Labor, the Department of Health and Welfare, the Department of Housing and Urban Development, the National Science Foundation, the Energy Research and Development Administration, the National Aeronautics and Space Administration, the National Endowments for the Arts and the Humanities, and the Community Services Administration. Other members may be added by Executive Order of the President as he determines may be necessary.

(f) The Chairman may invite Federal agencies in addition to agencies represented on the Committee under the provisions of subsection (d) of this section to designate representatives to participate in meetings of the Committee on matters of substantial interest to such agencies which are to be considered by the Committee.

(g) The Director of the Office of Management and Budget, the Chairman of the Council of Economic Advisers, and the Executive Director of the Domestic Council may each designate a member of his staff to attend meetings of the Committee as observers.

(h) Each Federal agency which is represented on the Committee under the provisions of subsection (d) of this section shall furnish necessary assistance to the Committee in accordance with section 214 of the Act of May 3, 1945 (31 U.S.C. 691).

NATIONAL ADVISORY COMMISSION ON EDUCATION

SEC. 11. (a) There is hereby established a National Advisory Commission on Education (hereafter referred to as the "National Commission") composed of fifteen members appointed by the President, by and with the advice and consent of the Senate from among individuals—

(1) who are familiar with the educational needs and goals of the United States,

(2) who have competence in assessing the progress of educational agencies, institutions, and organizations in meeting those needs and achieving those goals,

(3) who are familiar with the administration of State and local educational agencies and of institutions of higher education, and

(4) who are representative of the mass media, industry, and the general public.

Members shall be appointed for terms of three years, except that (1) in the case of initial members, one-third of the members shall be appointed for terms of one year each and one-third of the members shall be appointed for terms of two years each, and (2) appointments to fill the unexpired portion of any terms shall be for such portion only.

(b) The National Commission shall—

(1) review the administration of, general regulations for, and operation of Federal education programs;

(2) advise the Secretary and other Federal officials with respect to the educational needs and goals of the Nation and assess the progress of appropriate agencies, institutions, organizations of the Nation in order to meet those needs and achieve those goals;

(3) conduct objective evaluations of specific education programs and projects in order to ascertain the effectiveness of such programs and projects in achieving the purpose for which they are intended;

(4) make recommendations (including recommendations for changes in legislation) for the improvement of the administration and operation of Federal education programs;

(5) consult with Federal, State, and local and other educating agencies, institutions, and organizations with respect to assessing education in the United States and the improvement of the quality of education, including—

(A) areas of unmet needs in education and national goals and the means by which those areas of need may be met and those national goals may be achieved;

(B) determination of priorities among unmet needs and national goals; and

(C) specific means of improving the quality and effectiveness of teaching, curricula, and educational media and of raising standards of scholarship and levels of achievement;

(6) conduct national conferences on the assessment, improvement, and renewal of education, in which national and regional education associations and organizations, State and local education related organizations, institutions, and persons (including parents of children participating in Federal education programs) may exchange and disseminate information on the improvement of education;

(7) conduct, and report on, comparative studies and evaluations of education systems in foreign countries; and

(8) advise and assist in the coordination of all the advisory bodies to Federal education programs.

(c) The National Commission shall make an annual report and such other reports as it deems appropriate, concerning its findings, recommendations, and activities to the President for submission to the Congress once each year.

(d) In carrying out its responsibilities under this section, the National Commission shall take, together with the Secretary, whatever action is necessary to carry out section 448 of the General Education Provisions Act, to devise a manageable and effective advisory structure for the Department. The National Commission shall advise the Secretary on the number of advisory bodies that are necessary and the manner in which such bodies relate to one another. The National Commission shall consult with the National Advisory Council on the Education of Disadvantaged Children, the National Advisory Council on Supplementary Centers and Services, the National Advisory Council on Education Professions Development the National Advisory

Council on Educational Research and Development, and such other advisory councils and committees as may be appropriate to carry out its functions under this subsection. All Federal agencies are directed to cooperate with the National Commission in carrying out its functions under this subsection.

(e) The National Commission is authorized to engage such technical assistance as may be required to carry out its functions and the Secretary shall, in addition, make available to the National Commission such secretarial, clerical, and other assistance and such pertinent data prepared by the Department as the National Commission may require to carry out its functions.

(f) Members of the National Commission who are not in the regular full-time employ of the United States shall, while attending meetings or conferences of the National Commission or while otherwise engaged in the business of the National Commission, be entitled to receive compensation at a rate fixed by the Secretary, but not exceeding the rate specified at the time of such service for grade GS–18 under section 5332 of title 5, United States Code, including traveltime, and while so serving on the business of the National Commission away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons employed intermittently in the Government service.

(g) The President shall appoint the National Commission not later than thirty days after the date of enactment of this Act.

TRANSFER MATTERS

SEC. 12. All laws relating to any agency or function transferred under this Act shall, insofar as such laws are not inapplicable, remain in full force and effect. Any transfer of personnel pursuant to this Act shall be without change in classification or compensation, except that this requirement shall not operate to prevent the adjustment of classification or compensation to conform to the duties to which such transferred personnel may be assigned. All orders, rules, regulations, permits, or other privileges made, issued, or granted by any agency or in connection with any functions transferred by this Act, and in effect at the time of the transfer, shall continue in effect to the same extent as if such transfer had not occurred, until modified, superseded, or repealed. No suit, action, or other proceeding lawfully commenced by or against any agency or any officer of the United States acting in his official capacity shall abate by reason of any transfer made pursuant to this Act, but the court, on motion or supplemental petition filed at any time wtihin twelve months after such transfer takes effect, showing a necessity for a survival of such suit, action, or other proceeding to obtain a settlement of the questions involved, may allow the same to be maintained by or against the appropriate agency or officer of the United States.

ANNUAL REPORT

SEC. 13. The Secretary shall, as soon as practicable after the end of each calendar year, make a report to the President for the submission to the Congress on the activities of the Department during the preceding calendar year. Such report shall also contain objective data on enrollments, expenditures, numbers of teachers, administrative, supervisory, and auxiliary personnel, numbers of professionals who lack full qualifications, needs for classroom and other construction, special needs of critical areas such as urban and rural areas, and similar data.

CONFORMING AMENDMENTS

SEC. 14. (a) Section 19(d)(1) of title 3, United States Code, is amended by striking out "Secretary of Health, Education, and Welfare" at the end thereof and inserting the following: "Secretary of Health and Welfare, Secretary of Education."

(b) Section 1 of title 5, United States Code, is amended by adding at the end thereof: "Eleventh. The Department of Education." and by striking out "Health, Education, and Welfare" and inserting "Health and Welfare."

(c) Any reference to the Office of Education or the Commissioner of Education, in any other law, rule, regulation, certificate, directive, instruction, license, or other official paper in force on the effective date of this Act shall be deemed to refer and apply to the Department of Education or the Secretary of Education, as may be appropriate.

(d) Any reference to the Department of Health, Education, and Welfare or the Secretary of Health, Education, and Welfare in any other law, rule, regulation, certificate, directive, instruction, license, or other official paper in force on the effective date of this Act shall be deemed to refer and apply to the Department of Health and Welfare and the Secretary of Health and Welfare respectively.

EXPENDITURES AUTHORIZED

SEC. 15. The Secretary is authorized to make such expenditures (including expenditures for personal services and rent at the seat of government and elsewhere for lawbooks, books of reference and periodicals, and for printing and binding) as may be necessary to carry out the provisions of this Act, and as may be provided for by the Congress from time to time.

APPROPRIATIONS AUTHORIZED

SEC. 16. There are authorized to be appropriated such sums as may be necessary to enable the Department to carry out the provisions of this Act and to perform any other duties which may be imposed upon it by law.

EFFECTIVE DATE

SEC. 17. The provisions of this Act shall be effective on its date of enactment, except that section 8 shall be effective within ninety days following such date.

SUMMARY OF THE EDUCATION REORGANIZATION ACT OF 1977

Establishes a Department of Education headed by a Secretary at cabinet level, to promote the cause and advancement of education throughout the Nation. Provides for certain functions to be performed by the Secretary of Education and Assistant Secretaries in the fulfillment of this purpose. Transfers to the Department, the Education Division of the Department of Health, Education, and Welfare, as well as specified functions in the area of education, of the Secretary of Health, Education, and Welfare, of the Secretary of Housing and Urban Development, and of the National Science Foundation. The President is authorized to transfer other Federal agency functions to the Department as he determines necessary to carry out the purposes of this act. Specified transfers and the establishment of the Department are made effective within 90 days of the date of enactment of this title. There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this title.

Provides for the creation of a Federal Interagency Committee on Education, to be composed of designated Federal agency officials, whose basic purpose shall be to assure effective coordination of all Federal programs affecting education.

Creates a National Advisory Commission on Education, composed of fifteen members appointed by the President, by and with the advice and consent of the Senate, from among those who have recognized expertise and direct involvement in the field of education, as well as representatives from the general public, industry, and the mass media. The Commission shall review the administration and operation of Federal education programs, conduct evaluations, and make recommendations for necessary improvements and new directions to be undertaken, including legislative recommendations—basically directed toward the determination and implementation of priorities among unmet needs and national goals in education. The Commission shall make annual reports to the President and to Congress. The Commission shall also recommend to the Secretary of Education necessary changes to achieve a manageable and effective advisory structure for the Department.

Provides for a comprehensive report on education to be made annually by the Secretary to the President for submission to the Congress.

By Mr. PEARSON (for himself and Mr. BENTSEN):

S. 256. A bill to regulate commerce to assure increased supplies of natural gas at reasonable prices for consumers, and for other purposes; to the Committee on Commerce.

NATURAL GAS ACT AMENDMENTS OF 1977

Mr. PEARSON. Mr. President, I introduce for appropriate reference, on behalf of Senator BENTSEN and myself, a bill to deregulate the wellhead price of new natural gas produced from onshore reserves, to phase out the wellhead price regulation of new natural gas produced from the Outer Continental Shelf lands, to provide a statutory priority for essential uses of natural gas in agricultural and industrial processes, to phase out the wasteful use of natural gas as a boiler fuel for the generation of electricity in large plants, to provide for emergency sales of natural gas from intrastate sources to distressed pipelines and end users, and for other purposes.

Mr. President, I ask unanimous consent that the text of our bill, together with a section-by-section summary of its provisions, be printed in the RECORD following these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibits 1 and 2.)

Mr. PEARSON. Mr. President, the natural gas shortage today is more serious than at any time in the past. The actual curtailments of natural gas deliveries by interstate pipelines during the year September 1975–August 1976 were in the aggregate 3 trillion cubic feet. According to the Federal Power Commission, estimated curtailments for the year ending August 1977 will equal 3.8 trillion cubic feet—an increase of 26.7 percent above the curtailments of the previous year.

The problems faced by the pipelines are compounded by the current extremely cold weather. This week schools were closed in Kansas City because of the gas shortage. The mayor chose to close the schools rather than ask senior citizens, who are susceptible to infection and pneumonia, to lower the temperatures in their apartments and homes below 55 degrees Fahrenheit.

Mr. President, the current natural gas supply crisis had been predicted to occur last year, and the year before that. The Nation was spared in past years because pipelines cooperated in the voluntary transfer of gas supplies to the most distressed systems.

The Nation was spared in past years

because the Federal Power Commission, within the existing framework of regulation, was successful in creating limited exceptions to wellhead price controls for limited sales to distressed end users and pipeline companies.

The Nation was spared in past years because industrial users made massive efforts and investments to convert to alternate fuels during the winter season.

The Nation was spared in past years because of unusually warm weather throughout the winter in most of the United States.

The Nation was spared in past years because recession conditions pervaded the economy and industrial consumption of energy was depressed compared to normal demand.

Mr. President, the weather is cold this year; the economy is recovering; the access to surplus intrastate natural gas is limited by the unusually high demand, caused by abnormally cold weather, in the producing States themselves The capacity of industry to convert to alternate fuels is rapidly being exhausted; and even those pipelines with traditionally good supply have very little natural gas available for voluntary transfer to their more distressed partners in the industry.

Therefore, Mr. President, Congress no longer has the luxury of endless debate on the natural gas issue. The accumulating shortage these past 2 years has become too great to be offset by stop-gap initiatives. The time for decisive action is at hand.

Mr. President, throughout the years since this gas shortage emerged the Congress has debated alternatives to deal with the impact on consumers and the national economy. Finally, on October 22, 1975, the Senate on a rollcall vote of 58 to 32 approved a comprehensive measure sponsored by Senator BENTSEN and me that was designed, among other things, to increase supply and reduce demand where conversion to alternate fuels was practicable.

Our proposal, despite broad-based bipartisan support in the Senate, did not become law in the 94th Congress. It is necessary, therefore, to press once again for timely congressional action on this major national issue.

Mr. President, today Senator BENTSEN and I are introducing a bill which carries forward the fundamental features of S. 2310, 94th Congress, as passed by the Senate on October 22, 1975. There are changes in the bill, of course, to reflect changed circumstances. There are provisions which have required technical redrafting to improve clarity and minimize confusion as to meaning.

Certain provisions of S. 2310, incorporated originally as floor amendments, have been retained and strengthened; others that originated as floor amendments have been deleted as unnecessary or counterproductive. But the fundamental substance of S. 2310, as passed by the Senate, has been incorporated in the text of the bill that we are submitting today for Senate action.

Mr. President, Senator BENTSEN and I are seeking, as a matter of urgency, the approval of our bill not only because it represents the best long-term policy to enhance energy production in America, but also because it contains the most appropriate short-term response to the present emergency supply situation. Within the terms of our bill, emergency provisions are designed to facilitate deliveries of substantial quantities of natural gas from the surplus in the intrastate network without jeopardizing the intrastate status of the sellers. These emergency provisions, in essence, were contained in S. 2310.

The opportunities of the FPC to respond to the current emergency, without further statutory authority, have more or less been exhausted. The weather has taken a turn for the worse. The Senate, in our judgment, should reaffirm the approach taken more than a year ago and approve, as a matter of high priority, the bill which we are offering today.

Mr. President, the system of wellhead price regulation in the interstate market serves as a barrier to the delivery of new natural gas to that market. It serves as a barrier to capital investment in exploration and development of new reserves for the interstate system. Wellhead price regulation has directly caused the current shortage. In order to alleviate the shortage, the wellhead price of new natural gas must be decontrolled.

Under the terms of our bill, the impact on the consumer will be minimized by a phase-in of decontrol on the outer continental shelf lands. But I would observe that the consumer suffers most from the shortage in the first instance. If the wellhead price of new natural gas is decontrolled, the consumer will benefit from increased supplies and reduced natural gas transportation charges per unit of delivery; the consumer will benefit from lower priced natural gas—compared to alternate fuels—and the consumer will benefit from the renewed availability of clean, efficient fuel for a variety of industrial and commercial uses.

Mr. President, in conclusion may I observe that new natural gas is decontrolled under the terms of this legislation. Old, flowing natural gas remains under FPC wellhead rate regulation. There is no attempt to provide a windfall to producers of old natural gas. New wells in old reservoirs would be allowed new natural gas treatment only if it can be shown that such new wells are necessary to increase deliveries and to promote increased overall production of natural gas. This treatment of development wells is completely consistent with the policy established by the Federal Power Commission in its opinion 770A.

Thus, Mr. President, our bill is a balanced approach to the problem. The legitimate concerns of the consumer and the pipeline companies have been recognized and accommodated.

The producing industry will be assured of decontrol for new supplies, and certainty in the regulatory treatment of the producing industry will be accomplished. Essential agricultural and industrial users will be protected.

This bill represents a constructive and measured response by the Senate to the natural gas supply problem, and I urge my colleagues to consider its provisions favorably at the earliest practicable time.

Mr. BENTSEN. Mr. President, I join with the distinguished senior Senator from Kansas, Mr. PEARSON, in submitting a natural gas deregulation bill which is essentially the same as a bill passed last year by the Senate on a rollcall vote of 58 to 32. It is my firm belief that the interest of natural gas consumers and the interests of this Nation are best protected by less regulation of the wellhead price of natural gas.

Mr. President, there can hardly be any disagreement on the seriousness of the crisis in energy production faced by the Nation. Just this week severe curtailments of natural gas occurred in Ohio, Texas, Oklahoma, Kansas, and elsewhere. This forced the closing of schools and industries in these areas. In fact, the Federal Energy Administration—FEA—has predicted a 30 percent higher rate of gas curtailments this year over last year. Moreover, a continuance of this period of unusually cold weather could cause critical shortages of even alternative fuels in some areas, particularly the Carolinas, Georgia, Maryland, Tennessee, Virginia, Arizona, Kentucky, and West Virginia.

With deregulation the decreasing supply situation can be reversed. The Federal Power Commission—FPC—in the past has experimented with deregulation of small producers and the results were most favorable. In the Texas Panhandle the year after the small producer exemption was approved by the FPC, there was a 50-percent increase in the wells drilled in that area. Natural gas wells completed jumped from 68 in 1971 to 114 in 1972. I believe that this is a fairly good test of what deregulation could mean.

As the Senate determined last year, it is eminently clear that regulation should no longer extend to the prices which interstate pipeline companies are allowed to pay domestic producers of natural gas. What this country needs is immediate action which will make possible increased development and production of natural gas reserves and which will result in the fairest and most efficient distribution of a most precious natural resource.

Our choices are clear, Mr. President, either we establish almost dictatorial powers in the FPC requiring the complete rationing of an ever decreasing supply of natural gas, or we proceed with phased deregulation of the wellhead price of natural gas and allow major exploration and development of new supplies to take place. I do not believe anyone can call a policy of "spreading shortages" an adequate national policy. A national policy must include increases in supply.

Our only sensible choice, Mr. President, is the enactment of a system of phased deregulation and I firmly believe that this bill represents the best achievable compromise by providing for the immediate deregulation of the wellhead price of new onshore natural gas and a 5-year phaseout of regulation of new natural gas produced from offshore Federal lands within the Outer Continental Shelf.

Although the costs to natural gas users forced to convert to alternate energy supplies is measurable in dollars, the human agony of jobless workers and

freezing consumers is not measurable in monetary terms. The facts are simple: We are critically short of natural gas and untold economic and social loss will result unless we do something about it.

Over 7.56 million people in this country are presently unemployed, Mr. President, constituting over 7.9 percent of the Nation's work force. The bulk of this unemployment is the result of economic mismanagement but an increasing portion is due to curtailments of natural gas. If we continue to sit on our hands and do nothing about the natural gas shortage, the unemployment rolls will be further increased by jobless workers displaced because of continued natural gas curtailments.

Mr. President, our problem is clearly evident. We must assure that there exist market incentives for the full development of our domestic natural gas reserves, which are increasingly more expensive to find and develop. It is apparent that the present regulatory scheme acts as a disincentive to the exploration for and development of these new higher cost natural gas reserves. The wellhead price of natural gas must be permitted over a period of time to more nearly reflect market conditions in order to attract the risk capital necessary to increase our natural gas production and to redistribute among other energy sources demands which can be fulfilled by other fuels. Because of the rapidly expanding curtailment rate and because of the time lag involved in obtaining actual production after investment decisions are made, it is essential that our decision be made now. We have clung to outdated policies far too long.

Of even more immediate importance than the goal of increased production is the short-term crisis created by curtailments. Only if the price of natural gas is permitted to rise according to market conditions will there be a fair distribution of this national resource among all energy users. Otherwise, Mr. President, we will be faced with the intolerable situation of certain areas of the country obtaining the benefits of a natural gas supply, albeit at higher prices, while other geographic areas suffer the trauma of having no gas at all.

Frankly, Mr. President, some of my constituents in Texas are satisfied with the present regulatory system which allows them to outbid the interstate market for new reserves. They are willing to pay full value. But a rational energy policy is a national problem and we must face it as a Nation. We must adopt policies that mean more energy reserves for all our people.

While I am on record as being actively engaged in incentives for the development of alternate sources of fuel for our long-term demand, such as gasification of coal, solar energy, geothermal energy, energy from solid wastes, and eventually thermonuclear fusion, we need to act now on solutions which will occur within the immediate future.

People who have taken the time to carefully evaluate the effect of FPC regulation have all concluded that deregulation is necessary. A 1973 study in Harvard Law Review by an MIT economist and Harvard law professor indicated that phased deregulation could reduce the shortage of natural gas to negligible levels by 1980. A later study published by the Brookings Institute concluded that the present method of price regulation has contributed significantly to the natural gas shortage.

Mr. President, opponents of phased deregulation have argued that the OPEC cartel should not be permitted to set the prices of our domestic petroleum supplies. But OPEC, Mr. President, is a fact of life which we cannot ignore and which must be dealt with by affirmative action and not by wishfully pleading that by ignoring the world price of petroleum we will somehow resolve our crisis. For years I have warned about our increasing dependence on foreign oil, and for years I have recommended that we move toward self-sufficiency. The complaints about the oil sheiks setting our domesetic prices simply are not the solution to the problem. The only way to break the hold they have on this Nation is by efforts to both develop and conserve energy resources, whatever form they take whether oil, coal or natural gas.

Central controls over the pricing of natural gas will not allocate gas resources as well as a free market system which will promote competition and substitution among fuels. This is the mechanism necessary for a vastly expanded commitment of capital to develop our remaining gas resources.

Mr. President, the bill which Senator PEARSON and I introduced today is the result of discussions, hearings, and debate which go back considerably prior to the 95th Congress. In fact, there has been a deregulation bill introduced in each session of Congress since 1954 when the Phillips decision thrust upon the FPC the administratively unmanageable burden of regulating the price of natural gas at the wellhead. Moreover, events leading directly up to the introduction of this bill can be traced back at least 3 years. The point being, Mr. President, that this bill offers the best hope of balancing the interests of the smallest domestic consumers of gas, the large users as well as that of the natural gas industry.

I fully recognize that this measure, if enacted, will ultimately result in higher gas prices. But I submit to you that the alternative of a dependable supply of natural gas at modestly higher prices is infinitely preferable to that of no gas or drastically curtailed supplies for all classes of users. Conditions existing today on the interstate pipeline system indicate that curtailment levels on some pipelines could reach such a degree over the next 5 years that service to even residential and commercial users could not be maintained on some systems.

The increase in price which most consumers would pay in the aftermath of the deregulation of new, onshore gas would be relatively small. Transmission and distribution costs constitute two-thirds to three-fourths of the cost of natural gas delivered to residential users in the East and Midwest. These transportation costs will not increase and will not be removed from regulation.

Pipelines, like airlines, have fixed costs which must be paid regardless of the volume of traffic. No matter how many people are traveling on any given airline flight, it costs the same for that plane to take off, fly to its destination and land. The more people who are on the plane, the less it costs, per person, for that plane to fly. By the same token, increasing the volume of natural gas in a pipeline brings down the cost, per cubic foot, of transporting natural gas.

A good example of this type of transportation cost structure is found in the airline industry. When you fly in a plane it makes no difference if the plane is full or half empty—the cost to the passenger is still the same. Similarly, the volume of gas flowing in a pipeline will not cause changes in the rate charged for that gas.

Furthermore, the onshore gas which is deregulated is only new gas—flowing gas will remain controlled. New gas is defined as gas from wells in new reservoirs, from extensions of old reservoirs and from new wells which add gas that would not otherwise be economically recoverable from an existing well.

I believe this is an acceptable way to price the cleanest burning and most adaptable of all fuels, especially when the alternatives cost much, much more.

Mr. President, there is also a provision in this bill to provide certain agricultural users a priority for natural gas second only to residential and small users and public health and safety requirements. I strongly support this important provision, and believe it vital to protecting our food and fiber supply.

Mr. President, the time has come when we must encourage the use of other fuels by electric power generation facilities and other large users who burn natural gas as a boiler fuel and who are able to use other fuels as a substitute.

Burning natural gas as a boiler fuel is a most wasteful use of our cleanest energy source.

The impact of a phaseout in my State will be momentous. Today, about 98 percent of the electric power produced in Texas is generated by natural gas. However, the utilities in Texas have recognized for some time now that natural gas is a premium fuel which should be reserved for higher order uses. The question remaining for them is how best to phase out the use of natural gas in the shortest possible time, yet minimize the impact which construction of new plants and the increased cost of the substitute fuel will have on the ratepayers. This bill provides for a reasonable conversion schedule over a period of years in order not to jeopardize system reliability and disrupt service.

In short, Mr. President, this bill requires some sacrifices and sacrifices directed at moving this Nation toward the goal of energy self-sufficiency.

I urge all of my colleagues in the Senate to carefully study the proposal made today and to support this move to get the Nation back on the right energy track.

As so well expressed in a Washington Post editorial in support of phased deregulation, it makes no sense to hold the price of natural gas at artificially low levels encouraging consumption while discovering production. I ask that that editorial be printed in the RECORD at this point along with a text of the bill and with a section-by-section analysis.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 3, 1975]

GAS PRICES AND JELLYBEANS

As the shortage of natural gas grows more serious in the Washington area, some customers are being forced to convert to oil. Nobody converts voluntarily. The price of gas to a large customer is $1.60 per thousand cubic feet. The equivalent energy in the form of fuel oil is now up around $2.60. That difference is, in fact, the explanation of the gas shortage. There are three basic fuels. Congress insists on holding the price of gas far below the prices of oil and coal. That is the heart of the controversy over the deregulation of natural gas.

The local distributor, Washington Gas Light, has accepted no new customers for three years. The pipeline companies supplying the Washington area have cut back deliveries and, in turn, Washington Gas Light is dropping service to its interruptible customers—those that got a lower rate for signing a condition contract. Most of them are big apartment houses and office buildings, but the list includes some schools and colleges. Next in jeopardy are the industrial customers. Some of them would have been cut off months ago if the weather had been normal. But for the second year in a row this region was lucky. It was a warm winter. What about next winter?

Gas is the cleanest of all the major fuels, and ought to be sold at a premium on environmental grounds alone. Instead, as the cheapest of the three competing fuels, it is used to fire boilers by an industry or utility that can get it. With the enormous increases in oil prices over the past two years, the disparity has become increasingly severe. By last summer, to use a standard comparison, the gas delivered to utility generators throughout the country cost only 26 per cent as much as their fuel oil. Coal cost 38 per cent as much but was rising fast, as contracts expired or were renegotiated. Soft coal went for about $5 a ton throughout the 1960s, but prices now range from $15 to $25 and are climbing. The wider the price gap between gas and the other fuels, the more severe the gas shortage will be.

It is as though Congress were keeping down the price of red jellybeans, to protect the consumers—but not the prices of black or white jellybeans which, in the current inflation, are rising. In time you would find it increasingly difficult to get red jellybeans, although there would be plenty of the others in the stores. In Congress, the defenders of the consumer would explain that the rapacious and monopolistic jellybean industry was willfully withholding red jellybeans from the public. That, of course, would be an outrage. Several senators would promptly introduce bills establishing intricate rules for allocating the dwindling national supply of red jellybeans and maybe extending price controls in the black ones as well, since they are getting increasingly popular.

In the Senate Commerce Committee, Sens. Warren G. Magnuson (D.-Wash.) and Adlai E. Stevenson (D.-Ill.) are currently drafting a bill to resolve the natural gas issue pretty much along the lines of the jellybean case. Their bill would greatly expand and refine the system of allocation and price control that is already in effect. It would extend price ceilings for the first time to gas burned within the state where it is produced. The uncontrolled intrastate prices are currently running almost four times as high as the present federal maximum for gas crossing state lines.

The Commerce Committee's draft bill is pursuing a principle that deserves attention. It would raise the present ceiling price, but deliberately keep it far below the comparable price for oil. The price of oil has been jacked up artificially high, the argument goes, by a cartel of foreign governments. If the U.S. government has lost control of oil and coal prices, why should it voluntarily permit gas prices to accompany them to such unreasonable heights? This view is not a frivolous one. It reflects a well-considered conviction that, as a matter of social justice, it is better to have shortages—managed by various allocation and rationing systems—than high prices.

But keep in mind that any price ceiling turns out to be a subsidy paid by somebody. As people in the Southwest point out, a low ceiling on natural gas means that relatively low-income states like Oklahoma and Louisiana are subsidizing the standards of living in much wealthier states of the northeast—not to mention metropolitan Washington. To help the poor and the elderly in times of rapidly rising prices, the most effective remedies are those that directly increase the amounts of money in their pockets. Straightforward income redistribution is infinitely better than trying to fiddle and distort the mechanisms for pricing each of the hundreds of commodities that are, to one degree or another, necessities of life.

The way to deal with the gas shortage is to deregulate the price. In persent circumstances, it ought to be done in stages, over several years, to cushion the impact. No one can exactly say where fuel prices will be several years from now. But they certainly will not return to the level of two years ago. The basic reason for the great upswing in fuel costs is not the producers' cartel but a worldwide surge of demand for cheap fuel. Higher prices are a signal that supplies are not unlimited and we have to begin conserving. Price controls merely suppress that warning signal. Natural gas currently provides one-third of this country's energy supply. We can afford to make mistakes in our national policy on jellybeans, but not on basic fuels.

EXHIBIT 1

S. 256

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Natural Gas Act Amendments of 1977".

SEC. 2. The Natural Gas Act (15 U.S.C. 717 et seq.) is amended by (1) striking out section 24 thereof (15 U.S.C. 717w); and (2) amending section 1 thereof by redesignating subsections (a), (b), and (c) as subsections (b), (c), and (d), respectively, and inserting therein the following new subsection:

"(a) This Act may be cited as the 'Natural Gas Act'.".

SEC. 3. Section 1(c) of the Natural Gas Act, as redesignated by the Natural Gas Act Amendments of 1977 (15 U.S.C. 717(b)), is amended (1) by deleting "The" at the beginning thereof and by inserting in lieu thereof immediately after "(c)" the following: "(1) Except as provided in paragraph (2) of this subsection, the"; and (2) by inserting at the end thereof the following two new paragraphs:

"(2) Subject to the provisions of section 24 of this Act, after the date of enactment of the Natural Gas Act Amendments of 1977, the authority of the Commission to regulate the sale of natural gas to a natural-gas company for resale in interstate commerce pursuant to this Act shall cease to exist with respect to, and shall not apply to, new natural gas: *Provided,* That nothing contained in the Natural Gas Act Amendments of 1977 shall modify or affect the authority of the Commission in effect prior to the date of enactment of such amendments to (A) regulate the transportation in interstate commerce of natural gas or the sale in interstate commerce for resale of old nautral gas or (B) regulate the sale for resale of natural gas by any natural-gas company which transports natural gas in interstate commerce.

"(3) Any activity or person or facility owned by such person which is exempted under subsection (c) or (d) of this section shall not have that exempt status affected by making an emergency sale or delivery of natural gas not to exceed 180 days to, or by providing emergency transportation of natural gas not to exceed 180 days for, (i) a natural-gas company whose deliveries to its customers (including persons engaged in the local distribution of natural gas) who are, or who supply natural gas to, existing essential users whose supplies of natural gas for essential uses are being curtailed or will, during the period of the emergency sale, be curtailed under reasonably foreseeable circumstances or (ii) a direct or indirect customer (including a person engaged in the local distribution of natural gas) of such a company who is, or who supplies natural gas to, an existing essential user and whose supply requirements for essential uses are being curtailed or will, during the period of the emergency sale, be curtailed under reasonably foreseeable circumstances: *Provided,* That for the purposes of this paragraph, essential uses and essential users shall be deemed to be those uses and users identified in section 25 of this Act. Any contractual provision in any contract entered into by any such exempted person prohibiting emergency sales, deliveries, or transportation of natural gas in interstate commerce or terminating any other obligations of any supply or sales contracts as a result of such sale, delivery, or transportation shall be suspended and unenforceable with respect to and for the duration of such emergency sale or delivery. Natural gas sold or delivered pursuant to this paragraph shall be considered new natural gas for the duration of such sale or delivery regardless of whether such natural gas was sold or delivered in intrastate commerce for the first time prior to January 1, 1977.".

SEC. 4. (a) Section 2 of the Natural Gas Act (15 U.S.C. 717a) is amended by redesignating paragraphs (7) through (9) as paragraphs (13) through (15), and by inserting the following new paragraphs:

"(7) 'New natural gas' means (A) natural gas sold or delivered in interstate commerce for the first time on or after January 1, 1977: *Provided,* That such natural gas was not sold or delivered in intrastate commerce for the first time prior to January 1, 1977: *Provided further,* That new natural gas contracted for sale or delivery from offshore Federal lands shall be committed for an initial contract term of not less than 15 years or for the life of the reservoir from which it is produced if less than 15 years: *Provided further,* That any natural gas sold or delivered in interstate commerce prior to the date of enactment of the Natural Gas Act Amendments of 1977 pursuant to limited term certificates (5 years or less) or temporary emergency contracts shall not be considered, for the purpose of this provision, as having been committed to interstate commerce, or (B) (1) natural gas produced from a reservoir discovered on or after January 1, 1977 (including a reservoir discovered by the deeper drilling of an existing well), as determined by rule by the Commission, regardless of whether or not the leases covering such newly discovered reservoirs were committed by contract or otherwise dedicated to the interstate market, or (2) natural gas produced from a well or wells initiated on or after January 1, 1977, and completed within an extension of a previously discovered reservoir, as determined by rule by the Commission, regardless of whether or not the leases cover-

ing such previously discovered reservoir were committed by contract or otherwise dedicated to the interstate market, or (3) natural gas produced from a well or wells initiated on or after January 1, 1977, and completed within a previously discovered reservoir, regardless of whether or not the leases covering such previously discovered reservoirs were committed by contract or otherwise dedicated to the interstate market: *Provided*, That the seller of such natural gas, in a proper form and manner determined by rule by the Commission within 30 days of the date of enactment of the Natural Gas Act Amendments of 1977, files (i) appropriate documentation that such well or wells are necessary to deplete in a efficient and economic manner the previously discovered reservoir and that each such well is necessary to permit the recovery of additional reserves from such previously discovered reservoir which would not otherwise be economically recoverable from an existing well or wells in such reservoir, in accordance with good operation practices, and the applicable regulations of the appropriate local, State, or Federal agency, (ii) all documentation filed with or issued by a local, State, or Feredal agency charged with authority to authorize such well or wells, and, (iii) any other documentation that may be issued by such local, State, or Federal agency relating to the need for such well or wells: *Provided further*, That any such filing shall be deemed to have been approved by the Commission if the Commission does not reject such filing as not being supported by substantial evidence within 90 days from the date that such application is received by the Commission for filing.

"(8) 'Old natural gas' means natural gas sold or delivered in interstate commerce other than new natural gas: *Provided*, That old natural gas sold or delivered in intrastate commerce for the first time prior to January 1, 1977 shall, if sold or delivered in interstate commerce for the first time after January 1, 1977, be deemed by the Commission as having been sold or delivered from wells commenced on or after January 1, 1975.

"(9) 'Boiler fuel use of natural gas' means the use of natural gas as the source of fuel in a generating unit of more than 25 megawatts rated net generating capacity in the previous quarter, or in any unit which is part of an electric utility system with a total net generating capacity of more than 150 megawatts in the previous quarter, for the purpose of generating electricity.

"(10) 'Affiliate' means any person directly or indirectly controlling, controlled by, or under common control or ownership with any other person, as determined by rule by the Commission.

"(11) 'Offshore Federal lands' means any land or subsurface area within the Outer Continental Shelf, as defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)).

"(12) 'Interstate commerce' means commerce within the United States other than interstate commerce.".

SEC. 5. Section 4(e) of the Natural Gas Act (15 U.S.C. 717c(e)) is amended by adding at the end thereof the following new sentence: "Notwithstanding the foregoing, the Commission shall have no power to deny, in whole or in part, any rate or charge made, demanded, or received by any natural-gas company for, or in connection with, the purchase or sale, except (A) to the extent that such rates or charges, or such portion thereof, for new natural gas sold or delivered from offshore Federal lands exceed the national ceiling or interim ceiling established or modified by regulation of the Commission pursuant to section 24 of this Act or (B) in any case where a natural-gas company which transports natural gas in interstate commerce purchases new natural gas from an affiliate or produces new natural gas from its own properties, to the extent that the rates and charges therefor exceed the current rates and charges, or portion thereof, made, demanded, or received for comparable sales by persons not affiliated with such natural-gas company.".

SEC. 6. Section 5(a) of the Natural Gas Act (15 U.S.C. 717d(a)) is amended by striking the period at the end thereof and by adding the following: ": *Provided further*, That the Commission shall have no power (1) to deny, in whole or in part, any rate or change made, demanded, or received by any natural-gas company for, or in connection with, the purchase or sale of new natural gas, or that portion of the rates and charges of such natural-gas company which relates to such purchase or sale except (A) to the extent that such rates or charges, or such portions thereof, for new natural gas sold or delivered from offshore Federal lands exceed the national ceiling or interim ceiling established or modified by regulation of the Commission pursuant to section 24 of this Act, or (B) in any case where a natural-gas company which transports natural gas in interstate commerce purchases new natural gas from an affiliate or produces new natural gas from its own properties, to the extent that the Commission determines that the rates and charges therefor exceed the current rates and charges, or portion thereof, made, demanded, or received for comparable sales by persons not affiliated with such natural-gas company; or (2) to order a decrease in the rate or charge made, demanded, or received for the sale or transfer of old natural gas or new natural gas produced from offshore Federal lands by a natural-gas company if such rate or charge has been previously determined or deemed to be just and reasonable pursuant to this Act.".

SEC. 7. Section 7 of the Natural Gas Act (15 U.S.C. 717f) is amended by adding at the end thereof the following new subsection:

"(i) Subject to the provisions of section 24 of this Act, after the date of enactment of the Natural Gas Act Amendments of 1977, the provisions of this section shall not permit the Commission to condition the grant of, or to deny, a certificate of public convenience and necessity to a natural-gas company which transports natural gas in interstate commerce for the transportation in interstate commerce or for the sale in interstate commerce for resale of natural gas, or for the facilities used thereof, based on the price of new natural gas: *Provided, however*, That any contract for new natural gas shall be filed with the Commission by the purchasing natural-gas company which transports natural gas in interstate commerce.".

SEC. 8. Section 14 of the Natural Gas Act (15 U.S.C. 717m) is amended by adding at the end thereof the following three new subsections:

"(h) The Commission is further authorized and directed to conduct studies of the private or public exploration, production, sale, transportation, distribution, and consumption of natural gas, produced in the United States or in any State, whether or not otherwise subject to the jurisdiction of the Commission, and to make an annual independent estimate of total natural-gas reserves. The Commission shall, insofar as practicable, obtain and keep current information regarding (1) the ownership, operation, management, and control of all facilities for such exploration, production, sale, transportation, distribution, and consumption; (2) the independent estimate of total natural-gas reserves in the United States as required by this subsection, the current utilization of natural gas, and the relationship between the two; (3) the rates, charges, and contracts for natural-gas service to residential, rural, commercial, and industrial consumers, and private and public agencies; and (4) the relationship of any and all such information to the requirements of conservation, industry, commerce, and the national defense. Notwithstanding the provisions of section 1 of this Act (15 U..C. 717), the provisions of sections 20, 21, and 22 of this Act (15 U.S.C. 717s, 717t, and 717u) shall be applicable to the enforcement of this section. The Commission shall report annually to the Congress and shall publish and make available the results of studies, investigations, and estimates made pursuant to this subsection.

"(i) In making studies, investigations, and reports pursuant to this section, the Commission shall utilize, insofar as practicable, the services, studies, reports, information, and programs of existing agencies and other instrumentalities of the United States, of the several States, and of the natural-gas industry. Such agencies or instrumentalities of the United States shall cooperate with the Commission to the maximum extent practical to carry out the purposes of this subsection. Nothing in this section shall be construed as modifying, reassigning, or otherwise affecting the investigative and reporting activities, duties, powers and functions of any other agency or instrumentality of the United States.

"(j) The reports and information made public by the Commission shall be so composited and published as to preserve the confidentiality of trade secrets and other proprietary information obtained by the Commission as provided by law.".

SEC. 9. The Natural Gas Act, as amended by the Natural Gas Act Amendments of 1977, is further amended by adding at the end thereof the following four new sections:

"NATIONAL CEILING FOR RATES AND CHARGES

"SEC. 24. (a) The Commission shall by rule, as soon as practicable after the date of enactment of the Natural Gas Act Amendments of 1977, establish, an may from time to time modify, a national ceiling for rates and charges for new natural gas sold or delivered from offshore Federal lands on or after January 1, 1977, through December 31, 1982. In establishing such national ceiling the Commission shall consider the following factors and only these factors:

"(1) the prospective costs attributable to the exploration, development, production, gathering, and sale of new natural gas from offshore Federal lands;

"(2) the rates and charges necessary to encourage the optimum levels of (A) the exploration for natural gas, (B) the development, production, and gathering of natural gas, and (C) the maintenance of proved reserves of natural gas;

"(3) the promotion of sound conservation practices in natural-gas consumption necessary to contribute to the maintenance of a supply of energy resources at reasonable prices to consumers; and

"(4) the rates and charges that will protect consumers of natural gas from price increases that would, in the absence of a national ceiling during periods of actual or anticipated shortages, exceed the rates and charges necessary to achieve the objectives of paragraphs (1) through (3) of this subsection.

"(b) The Commission shall monitor the national ceiling established pursuant to subsection (a) or the interim ceiling established pursuant to subsection (d) during the period such ceiling is in effect, and commencing on July 1, 1977, the Commission shall report to the Congress not less than annually on the effectiveness of such national ceiling or interim ceiling in meeting the factors set forth in subsection (a).

"(c) The Commission may authorize a person to charge an amount in excess of the national ceiling established pursuant to subsection (a) or the interim ceiling established pursuant to subsection (d) for new natural gas produced from offshore Federal lands from any high cost production area or verti-

cal drilling depth as designated by the Commission by rule.

"(d) Pending the establishment of a national ceiling pursuant to subsection (a) by a final Commission order which is no longer subject to judicial review and within 30 days after the date of enactment of the Natural Gas Act Amendments of 1977 and on January first of each year thereafter until such establishment of a national ceiling, the Commission shall establish an interim ceiling for rates and charges for new natural gas sold or delivered from offshore Federal lands which shall be effective January 1, 1977, and which shall be equivalent on a British thermal unit (Btu) basis to the average first sale price for new crude oil produced in the United States in effect on the date of enactment of the Natural Gas Act Amendments of 1977 as determined by the Federal Energy Administration pursuant to section 8 of the Emergency Petroleum Allocation Act of 1973, as amended (15 U.S.C. 757). After the establishment of a national ceiling pursuant to subsection (a) by final Commission order which is no longer subject to judicial review, any person who has sold or delivered new natural gas from offshore Federal lands during the period the interim ceiling price was in effect shall thereafter have the benefit of the national ceiling: *Provided, however,* That the Commission shall have no power to order a reduction in the rates and charges for such sale or delivery below the interim ceiling price in effect on the dates of the establishment of the national ceiling.

"(e) From and after January 1, 1983, there shall be no ceiling price applicable to the sale or delivery of new natural gas from offshore Federal lands.

"(f) No price established by or pursuant to the Natural Gas Act Amendments of 1977 for new natural gas produced from offshore Federal lands shall be retroactive so as to affect any price for any natural gas sold or delivered in interstate commerce prior to January 1, 1977.

"(g) The rates and charges made, demanded, or received by any natural-gas company for, or in connection with, a contract for new natural gas sold or delivered from offshore Federal lands shall be deemed to be just and reasonable for the purposes of this Act, if they do not exceed the applicable national ceiling or interim ceiling established by regulation of the Commission or subsequently modified by the Commission pursuant to this section, in effect at the time when such new natural gas is either first sold or first delivered under such contract to a natural-gas company.

"NATURAL GAS FOR ESSENTIAL AGRICULTURE AND OTHER PURPOSES

"SEC. 25. (a) Except to the extent that natural-gas supplies are required to maintain natural-gas service to residential users, small users, hospitals, and similar users vital to public health and safety, as defined by the Commission, and notwithstanding any other provision of law (other than the provisions of this Act) or of any natural-gas curtailment plan in effect under existing law, the Commission shall within 120 days of the date of enactment of the Natural Gas Act Amendments of 1977, by rule, prohibit curtailment by a natural-gas company, to the maximum extent practicable, of natural gas for essential agricultural, food processing, and food packaging purposes for which natural gas is necessary, including but not limited to irrigation, pumping, crop drying, and the use of natural gas as a raw material feedstock or process fuel and in the production of fertilizer and essential agricultural chemicals in both existing plants (for present or expanded capacity) and new plants. The Secretary of Agriculture shall determine by rule within 60 days of the date of enactment of the Natural Gas Act Amendments of 1977 the agricultural, food-processing, and food-packaging purposes for which natural gas is necessary. The Secretary of Agriculture shall certify to the Commission the amount of natural gas which is necessary for such essential uses to meet requirements for full food and fiber production.

"(b) Except to the extent that natural-gas supplies are required to maintain natural-gas service for purposes specified under subsection (a) of this section, the Commission shall prohibit curtailment by a natural-gas company, to the maximum extent practicable, of natural gas for industrial purposes for which natural gas is essential for uses (other than boiler fuel) for which there is no practicable substitute.

"(c) The Commission shall decide applications for special relief from a curtailment plan as soon as practicable, but in no event later than 120 days after the date such applications are accepted for filing.

"NATURAL-GAS CONSERVATION

"SEC. 26. (a) Except as provided in subsections (c) and (e) of this section, the Commission shall by rule prohibit boiler fuel use of natural gas affecting commerce which is supplied pursuant to any delivery arrangement which becomes effective, or contract executed on or after January 4, 1977, unless, upon petition by the user the Commission determines for the subsequent 12-month period that—

"(1) alternative fuels, other than crude oil or products refined therefrom, propane, natural-gas liquid products, are not reasonably available to such user; or

"(2) it is not practicable or feasible to utilize such alternative fuels at the time of such Commission determination.

"(b) Except as provided in subsections (c) and (e) of this section, the Commission shall by rule prohibit boiler fuel use of natural gas affecting commerce which is supplied pursuant to any delivery arrangement in effect or contract initially executed prior to January 4, 1977, at the expiration of such contract or delivery arrangement or 10 years after the date of enactment of the Natural Gas Act Amendment of 1977, whichever is earlier, unless, upon petition of such user, the Commission determines for the subsequent 12-month period that—

"(1) alternative fuels, other than crude oil or products refined therefrom, propane, natural-gas liquids, natural-gas condensate, or natural-gas liquid products are not reasonably available to such user, or—

"(2) it is not practicable or feasible to utilize such alternative fuels at the time of such Commission determination.

The Commission shall modify or terminate certificates of public convenience and necessity issued pursuant to section 7 of this Act that relate to such contracts to the extent necessary to carry out the purpose of this subsection.

"(c) The Commission shall exempt from any rule under this section the boiler fuel use of natural gas by powerplants for the purpose of operating pollution abatement systems to the extent natural gas is required as determined by the Commission for the efficient operation of such pollution abatement systems.

"(d) Nothing in this section shall impair any requirement in any State or Federal law pertaining to safety or environmental protection.

"(e) The Commission shall not prohibit the boiler fuel use of natural gas for the necessary processes of ignition, startup, testing, and flame stabilization by a facility, or for the purpose of alleviating short-term or seasonal air quality emergencies or any other significant risk to the public health or safety.

"(f) Except as expressly provided in subsections (b) and (g) of this section, the Commission under the authority of the Natural Gas Act, shall not (1) modify, amend, or abrogate contracts entered into prior to January 4, 1977, for the sale or transportation of natural gas for boiler fuel use, (2) modify, amend, or abrogate the supply terms of certificates of public convenience and necessity issued pursuant to section 7 of this Act that authorize the sale or transportation of natural gas under such contracts, except upon application duly made by the holder of a certificate under section 7 of this Act; or (3) prevent, impair, or limit, either directly or indirectly, the deliveries under any such contract or certificate except upon application duly made by the holder of a certificate under section 7 of this Act.

"(g) The provisions of this section shall not modify or limit the authority of the Commission to effectuate curtailments of natural gas transported and sold by a natural-gas company.

"(h) Notwithstanding the provisions of section 1 of this Act (15 U.S.C. 717), the provisions of sections 20, 21, and 22 (15 U.S.C. 717s, 717t, and 717u) shall be applicable for the enforcement of this section.

"COMMISSION JURISDICTION OVER SYNTHETIC GAS

"SEC. 27. (a) The provisions of this Act shall apply to any facility constructed or operated by a natural-gas company or an affiliate thereof for the manufacture of pipeline-quality gas from hydrocarbon-containing materials for the purposes of transportation in interstate commerce or sale in interstate commerce for resale for ultimate public consumption for domestic, commercial, industrial, or any other use, to such transportation or sale by a natural-gas company or affiliate thereof, and to natural-gas companies or their affiliates engaged in such manufacture, transportaiton, or sale: *Provided,* That the provisions of this Act shall not apply to the mining production, transportation, sale, delivery, or any other activity related to the furnishing of hydrocarbon-containing material to a natural-gas company or its affiliate for production of such pipeline-quality gas: *Provided further,* That the provisions of this Act shall not apply to such manufacture, transportation, or sale, or facilities used therefor, of such pipeline-quality gas prior to commingling with natural gas if such pipeline-quality gas is derived, in whole or in part, from any of the following hydrocarbon-containing materials: crude oil, residual fuel oil, refined petroleum products, natural-gas liquids or condensate, or natural-gas liquid products.

"(b) If any natural-gas company or predecessor in interest was bona fide engaged in the manufacture of pipeline-quality gas from hydrocarbon-containing material or transportation or sale for resale of such pipeline-quality gas, subject to the jurisdiction of the Commission, or if a certificate of public convenience and necessity has been issued by the Commission authorizing the transportation or sale of such pipeline-quality gas by a natural-gas company prior to the effective date of the Natural Gas Act Amendments of 1977, the Commission shall issue a certificate for such manufacture, transportation, or sale for resale of such pipeline-quality gas without requiring further proof that the public convenience and necessity will be served by such operation, and without further proceedings pursuant to the Natural Gas Act or any other provision of law, if application for a certificate is made to the Commission within 90 days after the effective date of the Natural Gas Act Amendments of 1977. Pending the determination of any such application, the continuance of such operation shall be lawful.

"(c) For purposes of this section, 'pipeline-quality gas' shall mean gas the principal ingredient of which is methane and which is interchangeable and compatible with natural gas as determined by rule by the Commission.".

EXHIBIT 2

SECTION-BY-SECTION ANALYSIS OF THE NATURAL GAS AMENDMENTS OF 1977

SECTION 1—Names the bill the "Natural Gas Act Amendments of 1977."

SEC. 2—Redesignates existing subsections of section 1 of the Natural Gas Act and designates existing section 24 as section 1(a).

SEC. 3—This section, in conjunction with section 9, is the keystone of the Natural Gas Act Amendments of 1977. Section 3 amends section 1 of the Natural Gas Act which latter section establishes the jurisdictional parameters of FPC natural gas regulatory authority. In order to terminate Federal wellhead price regulation over new onshore natural gas, and phase out Federal wellhead price regulation of new offshore gas while preserving the present structure of regulation of "old natural gas" and pipeline operations, section 3 directs that, from and after the effective date of this legislation, the FPC's authority to regulate sales of "new natural gas" for resale in interstate commerce "shall cease to exist * * * and shall not apply."

Federal wellhead price regulation, for a 5-year period, of new natural gas sales from the offshore Federal domain is then reestablished in section 9, but section 3 expressly provides that it shall in no way modify, or affect, the FPC's existing authority (a) to regulate the transportation or sale of old natural gas, or (b) to regulate pipeline rates and service. The second provision further guarantees that there will be no impairment of the FPC's authority to regulate curtailments of services by interstate pipelines, since this authority is derived from the Commission's authority over transportation by pipelines of natural gas in interstate commerce.

The present FPC authority to regulate wellhead sales of natural gas derives, by judicial construction, from existing sections 1, 4, 5, and 7 of the Natural Gas Act. Thus section 3 first terminates all existing FPC authority over new wellhead sales, then reestablishes regulatory authority only as to new offshore sales for the years 1977 through 1982, inclusive. As section 3 makes clear, however, existing authority over wellhead sales of old natural gas and pipeline operations is unchanged.

There is no intent to expand the scope of remaining FPC jurisdiction through this amendment to section 1 of the Natural Gas Act. Thus, for example, retention of FPC transportation authority does not expand FPC jurisdiction to include producer gathering facilities in which natural gas is transported.

Section 3 further amends section 1 of the Natural Gas Act by authorizing emergency sales or transportation of natural gas to interstate pipelines which are curtailing their essential direct or indirect customers. Such sales may also be made to distribution companies and end-users who are essential users and whose supplies are being, or under reasonably foreseeable circumstances during the emergency period will be, curtailed by their interstate pipeline supplier.

These emergency sales, or transportation of natural gas, which will be made by intrastate producers, intrastate pipelines and natural gas distribution companies to curtailing interstate pipelines and their essential customers, will not be subject to FPC jurisdiction nor will the persons making such sales, who are otherwise exempt from FPC jurisdiction, become subject to Federal regulation under the Natural Gas Act due to such sales. Emergency sales under section 3 of the bill may not exceed 180 days nor may natural gas sold pursuant thereto be produced from offshore Federal lands. Contractual provisions which prohibit or prevent the sale of intrastate natural gas to the interstate market shall be suspended and unenforceable with respect to and for the duration of any emergency sale. Flowing intrastate natural gas may be sold pursuant to section 3 of the bill and not be subject to the price and other jurisdictional limitations placed on such natural gas when otherwise sold in interstate commerce as provided in the definition for "new natural gas" in section 4 of the bill.

SEC. 4—Definitions. This section provides the new definitions essential to application of the Natural Gas Act Amendments of 1977. The new definitions, which will appear in section 2 of the Natural Gas Act, are:

(a) "New natural gas" is defined as:

(1) Natural gas sold or delivered in interstate commerce for the first time on or after January 1, 1977. Natural gas that was sold in the intrastate market prior to January 1, 1977 will not qualify for exempt new gas sales. If the sale is from the Federal offshore area the term of the sale must be for a minimum of 15 years or life of the reservoir from which the gas is produced if less than 15 years. Further, the sale is considered new gas even if previously sold or delivered in interstate commerce if such sale was under an FPC limited term certificate of 5 years or less or under a temporary emergency contract.

The intent of this portion of the new gas definition is to insure that new supplies which have not been previously sold will be available for sale to the interstate and intrastate market on an equal basis without granting a preference to purchasers in either market and without the historical impediments of Federal Power Commission regulation. To this end, with respect to sales which have been previously made in the intrastate or interstate market, the status quo will continue. The interstate purchasers will not be able to enter into a bidding war for gas already relied upon by consumers in the intrastate market when contracts for such flowing intrastate gas expire. Substantive disruptions and inflationary pressures in those areas will thus be averted. Conversely, the intrastate purchasers will not be able to bid gas away from the interstate pipelines when interstate contracts expire (thereby avoiding disruptions and inflationary pressures in their marketing areas).

(2) Natural gas produced from a reservoir discovered or extended on or after January 1, 1977 (including a reservoir discovered by the deeper drilling of an existing well) even if the acreage on which the well is drilled was previously committed to the interstate market. The Federal Power Commission will by general rulemaking set out the procedure which will have to be followed in order for deliveries from a new reservoir or an extension of a reservoir to qualify as new natural gas.

The intent of this portion of the definition is to provide incentives to producers to accelerate their drilling programs to search for all new supplies of gas. This includes encouraging the deeper drilling of wells into new reservoirs which in many respects is like drilling a new well.

The interstate consumer must be provided the opportunity to get supplies which would not otherwise be available in the near term to their suppliers. If the gas is not produced the consumer does not pay for these supplies.

To insure that the exemption applies only to sales from these new reservoirs or extensions of reservoirs, the Commission, as it has consistently done since its Opinion No. 567, issued Oct. 3, 1969, must set up the procedures producers must follow in order to qualify for these classifications of new gas.

With respect to "extension of a reservoir," the purpose here is to insure that the potential gas in a known reservoir is developed and made available to the consumer. The ultimate size of a reservoir is often determined by drilling in years subsequent to discovery of the reservoir. Certain wells specifically add to the proved area of the reservoir. The enlargement of the proved area of the reservoir is classified as an "extension".

(3) Natural gas produced from a well or wells initiated on or after January 1, 1977 and completed in a previously discovered reservoir, regardless of whether the acreage on which the well is drilled was committed to interstate commerce.

The intent of this portion of the new gas definition is to bring the concept of what is new gas in line with the policy the Commission recently adopted in Opinion No. 770A, (FPC Docket No. RM–75–14, issued November 5, 1976). Though it is very important to exempt from Commission jurisdiction sales from newly discovered reservoirs and extensions of reservoirs, the most immediate supply of gas to the interstate consumer will come from the drilling of new wells into already known reservoirs.

This drilling of these wells would assure the most efficient and economic recovery of reserves of natural gas in a reservoir. Many large gas reservoirs producing today are developed on relatively sparse spacing, and under improved pricing conditions could be developed economically by the drilling of such wells, but they must be drilled at today's costs. Deregulation of sales from these new wells will permit wells which will recover additional natural gas, as well as permit proved natural gas reserves to be withdrawn from the reservior at a more rapid rate.

In order to avoid the drilling of any unnecessary wells the Commission is provided ample safeguards. First, the Commission will set out by general rulemaking the form and manner in which a filing by a producer must be made to justify classifying this type gas as new gas. It must be documented in the filing that the wells are necessary to deplete the existing reservoir in an efficient and economic manner in accordance with good operation practices and applicable regulations of the appropriate local, State or Federal agency. In addition, it must be shown that each such well is necessary to permit the recovery of additional reserves from the previously discovered reservoir which would not otherwise be economically recoverable from an existing well. Further, all filings made with an issue by a local, State or Federal agency related to the necessity for the drilling of such well or wells must be filed with the Commission. Finally, the Commission has 90 days to reject the filing if it finds that it is not supported by substantial evidence.

(b) "Old natural gas" is defined as natural gas sold or delivered in interstate commerce other than new natural gas. While flowing intrastate ntaural gas, if sold in interstate commerce, will be treated as "old natural gas," such sales are to be priced by the FPC as if they had been sold or delivered from wells commenced on or after January 1, 1975. The intent of this provision is to allow flowing intrastate natural gas to receive the ceiling price authorized by the FPC in Opinion 770–A for sales of jurisdictional natural gas from wells commenced on or after January 1, 1975. That price was $1.42 per Mcf plus a 1¢ quarterly escalator.

(c) "Boiler fuel use of natural gas" is defined as the use of natural gas as the source of generating electricity in certain large generating units and utility systems.

(d) "Affiliate" is defined in terms of control or ownership with the Commission to make detailed determinations of affiliate relationships after rulemaking. Natural gas purchased by a pipeline from its own affiliate should not be totally unregulated because of the absence of arm's-length bargaining in such transactions. As set forth in section 5 and 6, a pipeline's affiliate production may be sold for no higher rate to the parent pipeline than a rate paid for comparable sales by non-affiliated producers.

(e) "Offshore Federal lands" are defined by reference to the meaning of such term

in the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)).

(f) "Intrastate commerce" is defined as commerce other than interstate commerce.

SEC. 5—*Cost Pass-Through*. Amends existing section 4(e) of the Natural Gas Act to prohibit the Commission from denying to pipelines their cost of purchased new natural gas except in the following two specific instances:

1. When the pipeline purchases new offshore gas and pays more than the Commission-set ceiling price applicable to such gas; or

2. When the pipeline purchases gas from an affiliate and pays more to its affiliate than it pays to a nonaffiliated producer.

In these instances, and only in these instances, is the Commission empowered to deny the pipeline recovery of the excessive portion of the wellhead price paid to producers.

It is the intent of this proposed section to make only those changes in existing section 4 of the Natural Gas Act as are necessary to effectuate the basic restructuring of producer regulation set forth in sections 3 and 9 of this amendment—that is, that Commission authority over old natural gas and over pipeline sales for resale, transportation, and curtailment should remain intact; that Commission jurisdiction over sales for new natural gas from offshore Federal lands should continue in modified form only through 1982; and that all Commission jurisdiction over sales for resale in interstate commerce of new onshore gas should cease to exist upon enactment of the amendment. Nothing contained in section 5 is to be construed as authorizing the FPC to exercise any wellhead rate jurisdiction over a sale of new onshore natural gas to an interstate pipeline, except where this sale is by an affiliate to its parent pipeline.

SEC. 6—*Cost Pass-Through and Sanctity of Contract*. Section 6 amends existing section 5(a) of the Natural Gas Act to accommodate the new regulatory structure. The amendment of existing section 5 is comparable to the amendment of existing section 4(e) which is set forth in section 5 with respect to cost pass-through, and which is described above.

It is necessary to amend both existing section 4(e) and 5(a) of the Natural Gas Act because of the interaction of the two sections on producer regulation. Existing section 4(e) establishes the Commission's authority to act on producer rate filings, while existing section 5(a) empowers the Commission to act on its own initiative to decrease rates which may be excessive. Thus, the amendment of existing section 5(a) of the Natural Gas Act, as set forth in section 6 of the bill, is a conforming amendment necessary to maintain internal consistency.

It is the intent of section 6 to make only such changes in existing section 5(a) as are necessary to effectuate the basic restructuring of producer regulation established in section 3—that is, that Commission authority over "old natural gas" and pipeline sales for resale, transportation, and curtailment should remain intact; that Commission jurisdiction over sales for new gas from offshore Federal lands should continue in modified form only through the end of 1982; and that all Commission jurisdiction over sales for resale in interstate commerce of new onshore gas should cease to exist upon enactment. Nothing contained in section 6 is to be construed as authorizing the FPC to exercise wellhead rate jurisdiction over a sale of new onshore gas to an interstate pipeline, except where such sale is by an affiliate to its parent pipeline.

Finally, section 6 brings to producer rate regulation (with respect to old gas sales and new offshore gas sales) the requisite degree of certainty that has heretofore been lacking in the regulatory structure. Section 6 prohibits the Commission from engaging in rate redeterminations, after having determined the just and reasonable rate for a sale. Without this amendatory language establishing sanctity of contract, the Commission would retain authority to readjudicate producer rates at any time without regard to prior final FPC decisions establishing such rates.

SEC. 7—*Amendment to FPC Certificate Authority*. Section 7 adds a new subsection to existing section 7 of the Natural Gas Act. This provision clarifies that the Commission may not use its certification authority to indirectly regulate producer sales of new natural gas which have been exempted from FPC jurisdiction pursuant to the Natural Gas Act Amendments of 1977.

SEC. 8—*FPC Natural Gas Studies*. This section creates new authority in the FPC to gather information, conduct studies and report to Congress on matters relating to natural gas supplies, production, transportation, and consumption.

The FPC currently does not have statutory authority to engage in comprehensive data collection. Its authority is limited to the power to compel reports on sales and services from companies subject to its jurisdiction. The Commission has consistently sought broadened powers to enable it to secure comprehensive data on natural gas. Section 8 would grant such authority.

SEC. 9—*Offshore Ceiling Rates; Agricultural Priority; Boiler Fuel Prohibition; Synthetic Gas*. This section proposes four new sections to the Natural Gas Act:

1. New section 24 provides regulatory criteria for sales of new offshore gas;

2. New section 25 establishes for essential uses of natural gas;

3. New section 26 establishes a basis for phasing out consumption of natural gas for boiler fuel use in generating electricity; and

4. New section 27 creates FPC jurisdiction over certain synthetic gas operations and facilities.

New section 24 grants to the FPC, for a period of 5 years beginning January 1, 1977, wellhead price jurisdiction over sales of "new natural gas" produced from offshore Federal lands. It is the intent that FPC wellhead rate jurisdiction over new gas sales to interstate pipelines be expressly limited to only one category of new gas; namely, gas produced from offshore Federal lands.

During the 5-year period of phased-out regulation of new offshore gas, the Commission is directed to discard utility-type, cost-of-service rate regulation, and to establish rates, instead, on the basis of the following four enumerated criteria—and only those criteria:

1. Prospective costs;

2. The rate necessary to achieve optimum deliveries of natural gas;

3. The rate necessary to promote conservation of natural gas; and

4. The rate necessary to protect consumers from price increases attributable to shortage conditions.

The FPC is directed to set a national ceiling rate for new offshore gas as soon as practicable by rulemaking, through consideration of the four criteria set forth above, and to modify such ceiling rate as necessary, from time to time, prior to December 31, 1982. The Commission also is empowered to authorize rates in excess of the national ceiling for high-cost or deep drilling activities.

Pending the establishment of a national ceiling by a final Commission order which is no longer subject to judicial review, the FPC is directed to establish an interim ceiling rate for sales of new natural gas from offshore Federal lands. This interim ceiling is to be the equivalent of the "upper tier" price allowed for domestic crude oil production which is in effect on the date of enactment of the Natural Gas Act Amendments of 1977; that is, the interim ceiling is to be the regulated price allowed under section 8 of the Emergency Petroleum Allocation Act as amended by Title IV of the Energy Production and Conservation Act for new crude oil production.

Sales of new offshore natural gas at or below the national ceiling will be "just and reasonable" for the purpose of the Natural Gas Act. Producers may be denied their contract rate for new offshore gas only if such contracts exceed the applicable Commission-set ceiling rate for such gas. If the contract rate is excessive, the Commission may reject producer rate filings to the extent that the rate sought exceeds the applicable ceiling.

Finally, new section 24 states that there shall be no ceiling price applicable retroactively to the sale of old natural gas produced from offshore Federal lands.

New section 25 directs the Commission to assure the availability of natural gas supplies, during times of shortage, to residential users, small users, and to hospitals and similar services vital to public health and safety. After these priority uses are protected, the Commission is directed to give next priority for essential agricultural, food processing and packaging purposes. The Secretary of Agriculture shall determine by rule the essential agricultural, food processing, or packaging purposes for which natural gas is essential.

The intent of this section is to specify by statutory language those categories of service to receive natural gas in order of priority pursuant to FPC curtailment plans. New section 25 does not expand the statutory scope, as judicially construed, of FPC curtailment authority nor does it allow the Commission to order physical interconnections or mandatory allocations of natural gas between interstate pipelines.

New section 26 will bring about conservation of natural gas for higher priority utilization by phasing out the use of natural gas as a boiler fuel for the generation of electricity. Proposed section 26(a) directs the Commission to prohibit, by rulemaking, any new sale of natural gas for such boiler fuel purposes, unless the Commission expressly finds that there is no alternate fuel—other than crude oil, crude oil derivatives or propane, or natural gas liquids—available to the purchaser, or that use of alternate fuel is not feasible or practicable.

Proposed section 26(b) requires the termination of the use of natural gas as a boiler fuel by electrical utilities within 10 years after the date of enactment. Alternative fuels, other than crude oil, crude oil derivatives or propane, or natural gas liquids, must be available and their use must be feasible or practicable. Sanctity of contract is provided for electrical utilities who acquired a supply of natural gas for boiler fuel use prior to January 1, 1977. Such contracts for natural gas supply would, however, be subject to the overriding requirements for phaseout within 10 years, and would further be subject to all curtailment orders issued by the Commission under authority of other provisions of the Natural Gas Act.

Subsections (c), (d), and (e) of new section 27 would provide three exemptions from the FPC's boiler fuel conversion authority: (c) an exemption for the burning of essential natural gas for the purpose of operating pollution abatement systems; (d) a prohibition from impairing any State or Federal requirement pertaining to safety or environmental protection; (e) an exemption for the use of natural gas for the necessary processes of ignition, startup, testing, and flame stabilization or for alleviating emergencies to the public health, safety or welfare.

New section 27 establishes Commission jurisdiction over certain synthetic natural gas (SNG) facilities and operations.

The FPC currently has no jurisdiction over SNG until it enters into a natural gas stream

(i.e., jurisdiction now adheres at the tap and valve point of an interstate pipeline). Section 27 would place under FPC authority, with respect to SNG, any plant used for the production of SNG, any sales or transportation of SNG, and any person owning and/or operating such a plant. Expressly exempted from FPC jurisdiction is the feedstock of an SNG plant. Commission rate and certification authority over SNG will be the same as the FPC's present regulatory authority over natural gas. That is, sections 3, 5, and 6 of the 1977 Amendments, and proposed section 24 as contained in section 9 of the Amendments, and proposed section 24 as contained in section 9 of the Amendments, are not to be considered by the FPC in its regulation of SNG. Those SNG plants in existence prior to the date of enactment of the bill will not be required to undergo a certification proceeding pursuant to section 7 of the Natural Gas Act.

New section 27 is not intended to extend FPC jurisdiction over intrastate SNG facilities and operations. Furthermore, no regulatory authority is established with respect to plants employing any of the following feedstocks: crude oil, residual fuel oil, refined petroleum products, natural gas liquids or condensate, or natural gas liquid products. SNG produced from such exempted plants will not become subject to FPC jurisdiction until injection into a jurisdictional natural gas stream.

By Mr. HUMPHREY (for himself, Mr. RANDOLPH, Mr. ROBERT C. BYRD, and Mr. HUDDLESTON):

S. 257. A bill to establish fiscal incentives for the conversion of existing petroleum-fired and natural gas-fired powerplants and fuel burning installations to coal as a primary energy source and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

COAL SUBSTITUTION INCENTIVE ACT OF 1977

Mr. HUMPHREY. Mr. President, Federal efforts to deal with our growing foreign oil dependency have been disappointing, particularly in light of the recent OPEC oil price hike—a price hike we all knew was coming. That price increase and our increased need for foreign oil will cost American consumers close to $5 billion more this year than last for oil and oil related products. In 1977, we will be spending $38 billion for foreign oil, and our reliance on imports will exceed a staggering 40 percent of total domestic oil demand.

In the near future, this dangerous dependence on foreign oil can only be minimized by increased utilization of coal. We must use more coal and less oil, particularly in the production of electricity. All proposals to achieve energy independence assign a major role to coal. Yet, few powerplants have turned to coal, largely due to the expense of satisfying clean air standards with uncertain technology.

Our coal reserves are breathtaking. We have 434 billion tons of known—yes, known—reserves. The energy contained in that coal is over 2½ times the energy contained in all known oil reserves worldwide. It is 10 times the energy contained in reserves of the largest oil producer, Saudi Arabia. It is, furthermore, enough energy to supply our entire economy at 1976's rate of consumption for 200 years.

Yet, we have drastically failed to utilize this remarkable resource—a resource, I might add, which is by far the most abundant in this country, and the least efficiently used. From 1947 to 1976, coal's contribution to domestic energy supplies has fallen to 18 percent from 47 percent. The Federal Energy Administration—FEA—has projected that coal will serve 19 percent of our needs this year. Compared to our increasing rate of oil consumption, this projected increase for coal is inadequate.

The slight improvement in coal use last year was encouraging. But it was hardly unexpected in view of the fact that, on a Btu-equivalent basis, coal is now just one-half as expensive as oil. We should see a further growth and a new record output in 1977, as our economic recovery stimulates industrial production.

HOW TO INCREASE COAL DEMAND

What must be done to stimulate coal demand?

The most effective step would be to encourage the substitution of coal for expensive oil and scarce natural gas. We must aggressively pursue the conversion of electric powerplants to coal from oil and gas. Utilities now burn 70 percent of all coal used. They can achieve economies of scale in purchasing and, especially, in handling coal that few industries can match. I believe Federal conversion efforts, as a result, should be concentrated on them.

The Federal Energy Administration has ordered conversions to coal by some 196 powerplants: The Energy Policy and Conservation Act—EPCA—specifically extended and expanded this FEA program through 1984: And, the Energy Conservation and Production Act provides loan guarantees to new and existing coal mines and to reopen underground coal mines that had previously been closed—all of these programs to expand domestic coal usage. Clearly, Congress supports and will continue to support mandatory coal conversions.

Second, we must see to it that our coal industry remains financially healthy and able to supply a growing market. Realistically, there appears now to be little question that most coal producers can acquire the necessary capital for expansion—even despite the softening of coal prices since early 1975. If this situation is reversed, Congress will not hesitate to provide whatever fiscal assistance is appropriate.

Third, we must resolve the conflict between the necessity for clean air and rather uneven performance and very high cost of pollution control devices for coal users. Marked success has been achieved by removing the visible fly-ash pollution from smoke stacks, but sulphur dioxide is quite another story. The Clean Air Act of 1970 mandated rigorous air quality standards and the Edison Electric Institute has estimated that it will cost utilities $1.7 billion annually just to meet these new and, I believe, necessary standards.

In 1900, coal was used to meet 90 percent of America's energy demands. Beginning in 1920, however, coal became the victim of an inexpensive oil and gas revolution. In spite of all this, coal production remains constant. If we are to see a rapid growth in coal use again, we must either accept a relaxation in clean air standards or pay a lot more for pollution abatement devices and, in turn, coal based energy.

I want clean air, and I think it is the responsibility of the Federal Government to see that we have clean air. But I believe strongly that it is also the responsibility of the Federal Government to promote energy independence based on greater coal use. And part of that responsibility includes assisting firms to convert to coal if the necessary pollution abatement devices impose an undue financial burden on such firms.

THE COAL SUBSTITUTION INCENTIVE ACT OF 1977

For these reasons, I have authored and am today introducing the Coal Substitution Incentive Act of 1977, with several of my distinguished colleagues.

In a real sense, it is a companion effort to the Natural Gas and Petroleum Conservation and Coal Utilization Act of 1977, authored by my good friend, Senator RANDOLPH, and being introduced today. This excellent bill calls for a necessary and quite impressive mandatory transition in the next decade to a coal based economy—particularly for industry. It is a worthwhile bill and I am delighted to cosponsor it.

The Coal Substitution Incentive Act of 1977 complements Senator RANDOLPH's bill in providing up to $500 million annually in loan guarantees and $100 million in low interest rate loans to firms converting to coal; the assistance is for use in acquiring pollution control devices.

It establishes a 10-year program; outstanding loan guarantees could reach as high as $5 billion at any one time, and outstanding low-interest rates could total $1 billion. It also mandates a moderate insurance fee on these loans to avoid any Federal revenue loss should default occur. As a result, this package of financial incentives will be provided without the expenditure of any tax dollars. Yet, in conjunction with Senator RANDOLPH's companion bill, it will accelerate the conversion to coal by utilities and industrial firms now using oil and natural gas—conversions which could equal as much as 30 percent—1.8 million barrels/day—of our oil imports.

Reduced oil imports, utilization of our own domestic resources, no tax outlays and clean air: that is what the Coal Substitution Incentive Act of 1977 is all about. I urge my colleagues to support this bill. Mr. President, I ask unanimous consent that the text of the bill appear at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 257

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Coal Substitution Incentive Act of 1977".

SEC. 2. The Energy Supply and Environmental Coordination Act of 1974 is amended by adding the following new title"

"TITLE II

"FINDINGS AND PURPOSE

"SEC. 201. (a) The Congress finds that—

"(1) the United States is now and will increasingly be dependent on unreliable foreign sources of fossil fuel energy;

"(2) this dependency can be reduced by the use of domestic energy resources at existing major electric powerplants and fuel burning installations;

"(3) the only domestic energy sufficiently abundant to be the primary energy source for such existing facilities is coal; and

"(4) the substitution of coal for petroleum or natural gas as the primary energy source in existing electric powerplants and fuel-burning installations is expensive, and will not occur to a substantial degree without temporary Federal fiscal assistance .

"(b) The purposes of this title are—

"(1) to authorize the Federal Energy Administration to provide loan guarantees and low-interest rate loans for the purchase of pollution-abatement devices necessary to comply with applicable environmental requirements, thereby stimulating the conversion to coal as a primary energy source in existing electric powerplants and fuel burning installations now utilizing petroleum or natural gas; and

(2) to ease the capital requirements temporarily imposed by a conversion to coal or other fuel as the primary energy source by existing electric powerplants and fuel burning installations now utilizing petroleum or natural gas as a primary energy source.

"DEFINITIONS

"SEC. 202. For the purposes of this Act:

"(a) The term 'Administration' means the Administrator of the Federal Energy Administration.

"(b) The term 'natural gas' includes dry natural gas, casinghead gas, and synthetic natural gas derived from natural gas liquids and which is commingled with natural gas.

"(c) The term 'person' includes a Federal, State, or local agency, who owns, leases, operates, or controls any electric powerplant or fuel burning installation.

"(d) The term 'petroleum' includes crude oil, residual fuel oil, refined petroleum products, liquid petroleum gas, or synthetic natural gas delivered from petroleum.

"(e) The term 'coal or other fuel' means coal and any fuel other than natural gas or petroleum.

"(f) The term 'small electric powerplant' means a fossil-fuel fired electric generating unit, which is part of an electric utilities system with a total net generating capacity of less than one hundred and fifty megawatts, that produces electric power for the purposes of sale or exchange.

"(g) The term 'fuel burning installation' means an industrial installation, other than an electric powerplant, that contains a fossil-fuel boiler, a gas turbine unit, combined cycle unit, a diesel engine, that by design is capable of being fired for the generation of steam or heat and includes combinations of more than one such unit at the same site.

"(h) The term 'small industrial installation' means fuel burning installation that by design is not capable of being operated at a total fuel heat input in excess of two hundred and fifty million British thermal units per hour.

"(i) The term 'primary energy source' means the fuel used by an electric powerplant or fuel burning installation for normal operation. The minimum amounts of fuel required (1) for boiler start-up, testing, flame stabilization, control uses, and fuel preparation; (2) to alleviate or prevent acute short-term air quality emergencies; and (3) to alleviate or prevent emergencies directly affecting the public health, safety, and welfare which would result from electric power outages.

"(j) The term 'air pollution control device' means equipment designed to reduce the quantity of atmospheric emissions by any electric powerplants and fuel burning installation using coal or other fuel as its primary energy source.

"LOAN GUARANTEES

"SEC. 203. (a)(1) The Administrator is authorized, in accordance with the provisions of this section and such rules and regulations as he shall prescribe, and after consultation with the Secretary of the Treasury, to guarantee and to make commitments to guarantee the bonds, debentures, notes, and other obligations issued by or on behalf of any person who owns, leases, operates, or controls any existing electric powerplant or fuel burning installation, for the specific purpose of financing the purchase and installation of air pollution control devices at such electric powerplants or fuel burning installations. The aggregate amount of outstanding indebtedness guaranteed under this section may at no time exceed $5,000,000,000. No guarantee or commitment to guarantee shall be undertaken under this section after January 1, 1985.

"(2) An applicant for a guarantee under this section shall provide evidence in writing to the Administrator in such form and with such content and other submissions as the Administrator deems necessary to protect the interest of the United States. Each guarantee and commitment to guarantee shall be extended in such form, under such terms and conditions, and pursuant to such regulations as the Administrator deems appropriate.

"(b) The Administrator shall guarantee or make a commitment under subsection (a) of this section, with respect to air pollution control devices, subject to conditions and priorities pursuant to section 205 of this title, and if—

"(1) the Administrator is satisfied that the guarantee will significantly reduce the borrowing costs associated with acquisition of capital for the purchase of such pollution control devices;

"(2) the Administrator is satisfied that the acquisition of such air pollution control devices would be significantly delayed in the absence of a loan guarantee;

"(3) the amount guaranteed does not exceed 66⅔ per centum of such air pollution control device acquisition costs;

"(4) the Administrator is satisfied that the financial assistance applied for is not otherwise available from other Federal agencies and that assistance as provided in section 204 of this title has not been obtained for such air pollution control devices; and

"(5) the bonds, debentures, notes, or other obligations for which guarantees are made shall not have redemption dates or a maturity in excess of ten years from date of issuance.

"(c)(1) The Administrator shall charge and collect such amounts as he may deem reasonable for the investigations for a guarantee, for the appraisal of properties offered as security for a guarantee, or for the issuance of commitments for a loan or other obligation guaranteed under this section, but such charge shall not exceed one-quarter of one per centum of the amount of the loan or other obligation.

"(2) The Administrator shall charge and collect an insurance fee designed to avoid a Federal revenue loss in the event of a default of a loan or other obligation guaranteed under this section, but such fee shall not exceed one-half of one per centum per annum of such guaranteed loan or other obligation during the twelve-month period following enactment of this title.

"(d) No guarantee or commitment to guarantee an obligation entered into by the Administrator shall be terminated, canceled, or otherwise revoked, except in accordance with reasonable terms and conditions prescribed by the Administrator. Such a guarantee or commitment to guarantee shall be conclusive evidence that the underlying obligation is in compliance with the provisions of this section and that such obligation has been approved and is legal as to principal, interest, and other terms. Such a guarantee or commitment shall be valid and incontestable in the hands of a holder as of the date when the Administrator entered into the contract of guarantee or commitment to guarantee, except as to fraud, duress, mutual mistake of fact, or material misrepresentation by or involving such holder.

"(e)(1) If there is a default in any payment by the obligor of interest or principal due under an obligation guaranteed by the Administrator under this section and such default has continued for ninety days, the holder of such obligation or his agents has the right to demand payment by the Administrator of such unpaid amount. Within such period as may be specified in the guarantee or related agreements, but not later than forty-five days from the date of such demand, the Administrator shall promptly pay to the obligee or his agent the unpaid interest on and unpaid principal of the obligation guaranteed by the Administrator as to which the obligor has defaulted, using funds collected for such purpose as insurance fees pursuant to subsection (c), unless the Administrator finds that there was no default by the obligor in the payment of interest or principal or that such default has been remedied.

"(2) If the Administrator makes a payment under paragraph (1) of this subsection, he shall have all rights specified in the guarantee or related agreements with respect to any security which he held with respect to the guarantee of such obligation, including, but not limited to, the authority to complete, maintain, operate, lease, sell, or otherwise dispose of any property acquired pursuant to such guarantee or related agreements.

"(3) If there is a default under and guarantee or commitment to guarantee an obligation, the Administrator shall notify the Attorney General who shall take such action against the obligor or any other parties liable thereunder as is, in his discretion, necessary to protect the interests of the United States. The holder of such obligation shall make available to the United States all records and evidence necessary to prosecute any such suit.

"COAL CONVERSION LOANS

"SEC. 204. (a)(1) The Administrator is authorized, in accordance with the provisions of this section and such rules and regulations as he shall prescribe, and after consultation with the Secretary of the Treasury, to make loans and to make commitments to loan to any person who owns, leases, operates or controls any existing electric powerplant, or fuel burning installation, for the specific purpose of financing the purchase and installation of air pollution control devices at such electric powerplants or such fuel burning installations. The aggregate amount of loans outstanding under this section may at no time exceed $1,000,000,000. No loan or commitment to loan shall be made under this section after January 1, 1985.

"(2) An applicant for a loan under this section shall provide evidence in writing to the Administrator in such form and with such content and other submissions as the Administrator deems necessary to protect the interest of the United States.

"(3) Each loan shall be extended in such form, under such conditions and terms, and pursuant to such regulations as the Administrator deems appropriate: *Provided*, That the Administrator shall, from time to time as he deems appropriate and on advice of the Secretary of the Treasury, establish the interest rate or rates at which loans shall be

made under this section: *Provided further,* That this interest rate shall be established at the current rate being paid by the Secretary of the Treasury on bonds, notes, and other obligations of comparable duration issued on behalf of the Federal Government, plus such fees and other charges as the Administrator may specify pursuant to subsection (c) of this section, not to exceed one per centum per annum.

"(b) The Administrator shall loan or make a commitment to loan under subsection (a) of this section with respect to air pollution control devices, subject to conditions and priorities pursuant to section 205 of this title and if—

"(1) the Administrator is satisfied that the financial assistance applied for is not otherwise available from other Federal agencies and that assistance as provided in Section 203 of this title has not been obtained for such air pollution control devices;

"(2) the Administrator is satisfied that the acquisition of such air pollution control devices would not occur in the absence of a loan;

"(3) the loan does not exceed 66⅔ per centum of the cost of acquiring and installing such air pollution control devices; and

"(4) the loan does not have a maturity date in excess of ten years.

"(c)(1) The Administrator shall charge and collect such amounts as he may deem reasonable for the investigations for a loan, for the appraisal of properties offered as security for a loan, or for the issuance of a commitment: *Provided,* That such amounts shall not exceed one-half of one per centum of the loan amount authorized pursuant to subsection (a) of this section.

(2) The Administrator shall charge and collect an insurance fee designed to avoid a Federal revenue loss in the event of a default of a loan made pursuant to this section. Such fee shall not exceed one-half of one per centum of such loan during the twelve-month period following enactment of this title.

"(d) No loan or commitment to loan entered into by the Administrator shall be terminated, canceled, or otherwise revoked, except in accordance with reasonable terms and conditions prescribed by the Administrator.

"(e)(1) If there is a default in any payment by the obligor of interest or principal due under a loan entered into by the Administrator under this section and such default has continued for ninety days, the Administrator has the right to demand payment of such unpaid amount, unless the Administrator finds that such default has been remedied, or a satisfactory plan to remedy such default by the obligor has been accepted by the Administrator.

"(2) In demanding payment of unpaid interest or principal by the obligor, the Administrator has all rights specified in the loan-related agreements with respect to any security which he held with respect to the loan, including, but not limited to, the authority to complete, maintain, operate, lease, sell, or otherwise dispose of any property acquired pursuant to such loan or related agreements.

"(3) If there is a default under any loan or commitment to loan, the Administrator shall notify the Attorney General who shall take such action against the obligor or other parties liable thereunder as is, in his direction, necessary to protect the interests of the United States. The holder of such loan shall make available to the United States all records and evidence necessary to prosecute any such suit.

"(f) There are hereby authorized to be appropriated to the Administrator such sums as shall be sufficient for the purposes of this title, but which shall not exceed the sum of $200,000,000 for each fiscal year 1978 through 1982.

"CONDITIONS AND PRIORITIES

"SEC. 205. (a) The Administrator shall guarantee or make a commitment to guarantee as authorized in section 203 of this title, or loan or make a commitment to loan as authorized in section 204 of this title, only when conditions set forth in such sections are satisfied, and if—

"(1) air pollution control devices to be acquired pursuant to this title shall satisfy any applicable environmental requirements;

"(2) the Administrator is satisfied that the acquisition of air pollution control devices will not create serious shortages in the supply of such items, or that temporary price increases will not occur as a result of such acquisitions;

"(3) the Administrator is satisfied that such air pollution control device is necessary to effect a substitution of coal for natural gas or petroleum as the primary energy source for an existing fuel burning installation or electric powerplant;

"(4) the Administrator, in consultation with the Administrator of the Environmental Protection Agency, is satisfied that such air pollution control device does not duplicate or displace existing air pollution control devices with a remaining useful economic life in excess of two years and that such air pollution control devices are being installed are—

"(A) being installed on or after the effective data of this title; or

"(B) being installed to replace any existing electric power plants or fuel or burning installations using natural gas or petroleum as its primary energy source;

"(5) the Administrator has determined that there will be a continued reasonable assurance of full repayment of a loan, or that a realistic plan exists for redeeming all bonds, debentures, notes, or other obligations for which a guarantee is requested; and

"(6) the Administrator is satisfied that competition among private entities for the provision of air pollution control devices for any electric powerplants or fuel burning installations using coal as its primary energy source, to be assisted under this title will be in no way limited to or precluded.

"(b) In making guarantees or commitments to guarantee pursuant to section 203 of this title, or in making loans or commitments to loan pursuant to section 204 of this title, the Administrator is directed to—

"(1) allocate 25 percentum of available financial assistance, to the extent feasible and practicable, to existing small electric powerplants, and to small existing industrial installations; and

"(2) give priority consideration to requests for financial assistance by existing major fuel burning installations and electric powerplants subject to, and in receipt of, a coal conversion order issued by the Administrator pursuant to title I of the Energy Supply and Environmenal Coordination Act of 1974.

"(c)(1) The Administrator shall require all persons receiving financial assistance or guarantees under this title whether in the form of loans, obligation guarantees, or other arrangements, to keep such records as the Administrator shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance was given or used, the amount of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

"(2) The Administrator and the Comptroller General of the United States, or any of their duly authorized representatives, shall, until the expiration of three years after completion of the project or undertaking referred to in subsection (a) of this section or full repayment of interest and principal on a loan made or guaranteed pursuant to provisions of this title, have access for the purpose of audit and examination to any books, documents, papers, and records of such receipts which in the opinion of the Administrator or the Comptroller General may be related or pertinent to the loans, obligation guarantees, or other arrangements referred to in such subsection."

By Mr. RIBICOFF (for himself, Mr. WEICKER, Mr. HUMPHREY, Mr. PELL, and Mr. MAGNUSON):

S. 258. A bill to provide for the development and implementation of programs for children and youth camp safety; to the Committee on Labor and Public Welfare.

YOUTH CAMP SAFETY

Mr. RIBICOFF. Mr. President, the Federal Government estimates that 8 million children attend 10,000 camps each summer. These youngsters' parents assume that their children will have enjoyable and rewarding summers and that the camps they attend are safe, have adequate facilities, and are staffed by trained and competent personnel. Tragically, approximately 100 deaths and more than a quarter of a million serious accidents will occur each summer at these camps.

Conditions at many summer camps are simply appalling. All too frequently there is dangerous equipment, unsafe or improperly operated vehicles, poor sanitation facilities, inadequate medical provisions, and unqualified personnel. Particularly distressing is the fact that only eight States have centralized administrations responsible for monitoring camp conditions and operations.

In 1973 the Department of Health, Education, and Welfare conducted a study of summer camps. This invertigation revealed serious inadequacies in State laws relating to camp safety—24 States have no medical aid and services regulations, 45 States have no rules governing out-of-camp trips, 35 States have no day camp regulations, and 10 States have no provisions pertaining to trained supervision of aquatic activities. In addition, 44 percent of the camps studied did not require a driver's license for employees, 53 percent failed to require flotation devices in boats, and 57 percent had inadequate or no firefighting equipment.

To end unfortunate and senseless deaths and injuries among young summer campers, I authored legislation eliminating unacceptable and unsafe conditions which exist in far too many camps. This measure was originally introduced 10 years ago. To date, no affirmative action has been taken to correct the situation. While the Senate adopted the Ribicoff Youth Camp Safety Act as an amendment to the Higher Education Act in 1971, it was subsequently rejected by the House in favor of much weaker language.

It is a sad commentary that we enact legislation to protect plants, sealife, wild horses and burros and other animals, yet we fail to provide meaningful safeguards for the millions of boys and girls—our children and grandchildren—who attend summer camps.

In the past, organizations such as the

American Camping Association, the Association of Private Camps, the National Recreation and Park Association, scouting organizations, Y camps and certain religious organizations have endorsed this legislation. They recognize the need for proper camp safety standards. Many of them have had to develop and enforce their own standards because of the lack of adequate State and Federal regulations. They know how important it is to have effective measures to properly protect young campers.

I am today reintroducing this legislation. I hope that it will be the last time I must do so. We simply cannot permit more children to be killed or permanently maimed and injured. I am sure that many needless accidents would have been prevented had this measure been enacted into law before this time.

The Senate has already gone on record in support of youth camp safety legislation. I trust it will do so again during this session of the 95th Congress. I am encouraged that our distinguished former colleague, WALTER MONDALE, was an original cosponsor of this measure and actively worked on its behalf, particularly as chairman of the Children and Youth Subcommittee. I hope that, as Vice President, he will continue his efforts in support of the legislation and will assist in its passage.

The children and youth camp safety bill I am reintroducing today—and for which I am seeking cosponsors—is a necessary and positive approach to the long-standing problem of camp accidents. Although no panacea, the bill will initiate efforts to eliminate the sources of camp accidents and will set in motion a mechanism for dealing with this persistent problem.

The children and youth camp safety bill provides that the Secretary of HEW will establish, within 9 months of enactment, minimum standards for the operation of safe and sanitary camp facilities. These standards will be developed in cooperation with an Advisory Council on Children and Youth Camp Safety and must be approved by both the House and Senate. The regulations will go into effect 21 months after enactment.

To comply with these Federal minimum standards, States will have three options. First, the State may choose to accept and enforce the Federal standards. Second, the State may choose to enforce its own safety regulations, which must be at least equal to the Federal guidelines. Third, the State may grant HEW authority to enforce the Federal standards in that State. Financial incentives, up to 80 percent matching funds, are available to those States choosing to enforce the program themselves.

In addition, the bill requires that all camp accidents be reported to the Secretary. Repeated or willful violations of safety regulations will subject the camp operator to financial penalties.

I am pleased that Senators WEICKER, HUMPHREY, and PELL have joined as original cosponsors. I urge that action be taken on this measure as soon as possible so that young campers can be afforded the protection they so desperately need.

By Mr. HANSEN (for himself and Mr. WALLOP):

S. 259. A bill to extend certain oil and gas leases by a period sufficient to allow the drilling of an ultradeep well; to the Committee on Interior and Insular Affairs.

Mr. HANSEN. Mr. President, the purpose of the legislation I introduce today for myself and Mr. WALLOP is to extend certain noncompetitive oil and gas leases located in the State of Wyoming for a period sufficient to allow the drilling of an ultradeep well in Sublette County, Wyo., by a group of six small independent producers, known as the Rainbow Resources Group.

The group consists of Rainbow Resources, Inc., Farmlands International Energy Co., Greenbrier Operating Co., and Oil and Gas Futures, Inc., of Texas.

The well, potentially measuring over 25,000 feet, would be the deepest ever attempted in the Rocky Mountain region. In all likelihood, it will require over 2 years to drill such an ultradeep well, and if mechanical problems develop it could require over 3 years to complete and equip. However, critical leases on the Pacific Creek structure where the well is to be drilled are due to expire in July 1977 because of the unintended effect of the March 1975 administrative redefinition of lease terms under the Mineral Leasing Act of 1920, as amended, by the Department of the Interior. The new regulations prohibit more than one 2-year extension of an oil and gas lease beyond its primary term.

Under the Mineral Leasing Act of 1920, as amended, a lease shall continue so long after its "primary term" as oil or gas is produced in paying quantities. As the result of a change in Department of the Interior regulations in March of 1975, the primary term of the lease is limited to the "initial 10 year period," as opposed to "all periods in all the life of the leases," as the phrase had previously been constructed by the Department prior to March 1975. The Rainbow Group took out leases on the Pacific Creek structure prior to the Department of the Interior's administrative redefinition. If the pre-March 1975 definition were currently effective these independents could drill the 25,000 feet test well since the primary term of the lease, which is now in an extended state, would again be extended for an additional term by reason of such drilling.

To date, the Rainbow Resources Group and associates have expended approximately $13.5 million in the search for gas reserves in the Peceance and Green River Basins. Several million dollars have been spent in order to form and initiate the initial test on the Pacific Creek unit in an attempt to obtain commercial production of natural gas in paying quantities and thereby extend the primary term of the leases. In the past year alone, these small independent producers have attempted one completion at 13,500 feet and two recompletions between 8,500 and 9,500 feet, all of which resulted in dry holes. An ultradeep well has not heretofore been drilled to 25,000 feet since the seismic survey delineating the Pacific Creek structure was not completed until 1974.

The potential proven natural gas reserve of the Pacific Creek structure may be substantial. This reserve potential, however, will not be developed unless these small independents are given the opportunity to drill the 25,000-foot, ultradeep test well. The group has determined that they will have to expend between $6 and $10 million in the next several years to drill, complete, and equip a 25,000-foot exploratory well. Obviously, a prudent businessman will not spend this sum to drill a well which will require more than 2 years to complete and equip on leases that are due to expire in July of 1977. Moreover, the usual lease extension calling for one 2-year period would not allow enough time for the drilling of this ultradeep well in the event any mechanical problems developed.

In a time of nationwide energy shortages, particularly with respect to natural gas, the public interest favors the continued exploration and development of vital natural resources. The ultradeep formations of the Pacific Creek structure could unlock vast new quantities of natural gas reserves to supplement the existing demand for a scarce national resource. Because the proposed 25,000-foot well would be the deepest ever drilled in the Rocky Mountain area, the results of the exploratory operation may well translate into new technology to assist future drilling efforts.

There is no question that the legislation being introduced today is consistent with the spirit and intent of the Mineral Leasing Act of 1920, as amended. The legislative history of the act and its 1960 amendments indicates that the statute was designed to encourage the prompt and efficient development of this country's vital natural resources. Limitations on oil and gas leases were enacted to encourage lease owners to exploit their leases rather than sit on them. The effect of the March 1975 regulations of the Department of the Interior, as applied in the case of these small independent producers, will be to prohibit these lease owners from undertaking ultradeep operations and development on their own leases. The regulations were never intended to work such a hardship.

Moreover, our national energy policy favors the expeditious development of new domestic natural gas supplies in order to eliminate our reliance on foreign sources. If these leases terminate in July of 1977, the ultradeep test of the formation may never be drilled, since it will take many years before a block of newly issued leases can be assembled in common ownership which could justify the cost of such an ultradeep well. The vast potential of the Pacific Creek structure could therefore remain untapped indefinitely.

This legislation will not be detrimental to the interests of the United States. If the leases should expire, any new leases that might be subsequently issued would be noncompetitive and bear the same royalty and rental rate as those held by these small independent producers. If

the ultradeep test well should fail, the leases would automatically terminate, leaving the United States free to reissue the leases. Any substantial benefit that would accrue to these independents or to the United States would thus be the result of commercial production from a deep test well. The Mineral Leasing Act as amended was not intended to deny to a leaseowner the benefits of a substantial investment in an ultradeep exploratory well that is lawfully commenced within the extended term of a lease, but which cannot be completed, equipped, and demonstrated to be capable of production prior to the expiration of the leases. The critical problem faced by these small independents is simply one of time. In cutting off the extension of oil and gas leases, neither Congress nor the Department of the Interior anticipated that lease owners would be attempting to drill 25,000-foot wells which would take 2 or more years to drill. The legislation before us is necessary, therefore, to insure that the diligent operations of the Rainbow Resources Group will not be frustrated.

By Mr. KENNEDY (for himself and Mr. McCLELLAN):

S. 260. A bill to amend title 18, United States Code, so as to impose mandatory minimum terms with respect to certain offenses, and for other purposes; to the Committee on the Judiciary.

MANDATORY MINIMUM SENTENCES FOR CERTAIN VIOLENT CRIMES

Mr. KENNEDY. Mr. President, today I reintroduce legislation cosponsored by Senator McCLELLAN which provides for the imposition of mandatory minimum sentences in certain limited cases of violent street crime. Similar legislation was introduced in the last Congress as S. 2698.

The legislation calls for a mandatory minimum sentence of 2 years imprisonment—without the possibility of probation or parole—in Federal cases involving burglary or aggravated assault under the Federal assimilated crime statute, murder in the second degree, crimes in which a handgun or other dangerous weapon is used, rape, robbery where the victim suffers serious bodily injury and trafficking in heroin. In addition, a 4-year minimum term would be imposed if the convicted defendant were a repeat offender who had committed one of the above enumerated crimes for a second time.

An important exception to the imposition of the mandatory minimum sentence would be permitted in those cases where the defendant was under 16 years of age, was suffering from a mental disease, was acting under duress or was merely an accomplice and not the principal offender. A posttrial hearing would be held to resolve such situations.

Mr. President, this legislation is designed to deal with the violent criminal who all too often plagues our city streets. The soaring rise in violent street crime must be dealt with firmly. One way to combat the menace of crime is by providing punishment of the offender which is both swift and certain. Mandatory minimum sentencing puts the criminal element in American society on notice that apprehension and conviction will result in imprisonment. This bill can be a valuable model for local governments in confronting their own problems of sentencing.

It is important in discussing the merits of such a sentencing procedure to spell out what this legislation does not do. What I introduce today is not touted as the final solution to the Nation's crime problem. The problem of crime is elusive and complex. There is no magic formula for reducing the Nation's crime rate.

The bill is a modest one, limited in application to the most violent crimes and, even then, only to those crimes in which Federal jurisdiction is found to exist. As I have said on numerous occasions violent crime is primarily a local problem.

Nor does mandatory minimum sentencing, in and of itself, assure the incarceration of the violent offender. Imprisonment of the violent offender first requires that the offender be apprehended—no sure thing today where the apprehension rate has slowly increased at a rate appreciably less than the soaring increase in crime.

In addition, any mandatory sentencing proposal will be of little value if punishment of the offender is not made more swift. Our existing criminal justice system—beset with expanding dockets, court congestion, and overcrowding—does not persuade the criminal offender that if he is caught, the chances are high that he will be swiftly brought to trial. Delay is the rule. The result in all too many cases today is that crime does indeed pay—and pay handsomely. Today in my own State of Massachusetts the average offender, including the repeat offender, stands a 98-percent chance of "succeeding," that is of avoiding any punishment at all. In New York City, 99 percent of all adults arrested for a felony are filtered out of the system and escape a prison term.

Finally, even if the violent offender is apprehended and swiftly brought to trial, a conviction cannot guarantee an appreciable term of imprisonment unless prison capacity is increased. Mr. President, the simple fact is that the lack of prison space available today has become a major excuse for lenient sentencing policies. A recent comprehensive study commissioned by the Massachusetts Institute of Technology demonstrates, through a careful analysis of the Massachusetts criminal justice system, that the shortage of prison capacity is the critical variable affecting the ability of the system to lower crime rates. And in an enlightening article by Prof. James Q. Wilson in last month's Commentary magazine—a copy of which accompanies my statement—the need for increased prison capacity as a sine qua non for any crime-fighting program is convincingly made.

In light of these facts mandatory minimum sentencing of the violent offender can be realistically viewed as just one small step in the comprehensive reform of our criminal justice system. We need to improve police resources and eliminate court delay—the new Law Enforcement Assistance Administration reauthorization bill, which has become law, is designed to aid localities accomplish these ends. The Congress must yet act in a meaningful way to deal with the critical problem of prison overcrowding. And, added to this mix, is the concept of mandatory minimum sentencing.

By imposing mandatory minimum sentences this bill makes certainty of punishment more of a reality. The bill is not based on any vindictive desire to punish. It studiously avoids any mandatory minimum sentence of 10 years—the former Federal narcotics law—or life imprisonment—the New York State narcotics law—which laws have not only been unjust, but unworkable. It recognizes that in some situations imposition of the mandatory minimum might work an injustice, and, therefore, provides for just such a circumstance—thus distinguishing this measure from laws such as the Bartley-Fox law in Massachusetts, which calls for a 1-year mandatory sentence for certain gun crimes in all cases.

Rather, this bill arises out of the need to deter potential offenders from criminal conduct while at the same time keeping the violent offender in jail and off the street for at least a limited period of time.

In applying the mandatory minimum sentence we must also make sure that it is applied evenhandedly to all offenders, regardless of social class. Just as the poor suffer the most as victims of crime, so too do they often pay a heavier price for crime than others in society. We must end that shameful double standard and assure that mandatory sentences be applied with an equal hand.

Mr. President, I am not persuaded by those who argue that mandatory minimum sentencing simply compounds the problems confronting our criminal justice system. Those problems must be addressed—effectively and comprehensively. But mandatory minimum sentences of 2 years, for those specific crimes listed in my bill, can have a positive impact in providing certain punishment of the criminal offender. We must stem the wave of violent crime. This bill is a step in that direction.

I ask unanimous consent to have printed in the RECORD the text of the bill establishing mandatory minimum sentences for certain violent crimes and the article by Prof. James Q. Wilson.

There being no objection, the bill and article were ordered to be printed in the RECORD, as follows:

S. 260

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 13 of title 18, United States Code, is amended by striking out "and subject to a like punishment," and inserting the following new sentence: "Whoever is found guilty of a like offense under the provisions of this section shall be subject to a like punishment except that in those cases in which a person is convicted of committing any act which, according to the laws thereof in force at the time, constitutes—

"(a) the crime of burglary, where at night a person, with intent to engage in conduct constituting a crime, enters without privilege, or remains surreptitiously within, a dwelling that is the property of another; or

"(b) the crime of aggravated assault, where a person, by physical force, intentionally causes serious bodily injury to another person;

said person shall be sentenced to a term of imprisonment which may not be less than two years.".

SEC. 2. The third paragraph of subsection (b) of section 1111 of title 18, United States Code, is amended to read as follows:

"Whoever is guilty of murder in the second degree, shall be sentenced to a term of imprisonment which may not be less than two years and which may be up to life imprisonment.".

SEC. 3. Subsection (c) of section 924 of title 18, United States Code, is amended to read as follows:

"(c) Whoever, while engaged in the commission of any offense for which he may be prosecuted in a court of the United States, knowingly possesses, displays, brandishes, or otherwise uses a firearm, destructive device, or other dangerous weapon, shall, in addition to the punishment provided for the commission of such offense, be sentenced to a term of imprisonment which may not be less than two years and which may be up to ten years. In the case of a second or subsequent conviction of a violation of this subsection, or in the case of a conviction under this subsection following a conviction of a State offense during the commission of which the defendant knowingly possessed, displayed, brandished, or otherwise used a firearm, destructive device, or other dangerous weapon, such defendant, with respect to such conviction under this subsection, shall be sentenced to a term of imprisonment which may not be less than four years and which may be up to twenty years.".

SEC. 4. Section 2031 of title 18, United States Code, is amended by striking out "imprisonment for any term of years or for life" and inserting in lieu thereof "shall be sentenced to a term of imprisonment which may not be less than two years and which may be up to life imprisonment".

SEC. 5. (a) Section 2111 of title 18, United States Code, is amended by striking out "shall be imprisoned for not more than fifteen years" and inserting in lieu thereof "shall be sentenced to a term of imprisonment which may not be less than two years and which may be up to fifteen years".

(b) Section 2112 of title 18, United States Code, is amended by deleting "shall be imprisoned not more than fifteen years" and inserting in lieu thereof "shall be sentenced to a term of imprisonment which may not be less than two years and which may be up to fifteen years".

(c) The third paragraph of section 2113 (a) of title 18, United States Code, is amended by deleting "or imprisoned not more than twenty years, or both" and inserting "and shall be sentenced to a term of imprisonment which may not be less than two years and which may be up to twenty years".

(d) The first paragraph of section 2113 (b) of title 18, United States Code, is amended by deleting "or imprisoned not more than ten years, or both" and inserting in lieu thereof "and shall be sentenced to a term of imprisonment which may not be less than two years and which may be up to ten years".

(e) Section 2113(d) of title 18, United States Code, is amended by deleting "or imprisoned not more than twenty-five years, or both" and inserting in lieu thereof "and shall be sentenced to a term of imprisonment which may not be less than two years and which may be up to twenty-five years".

SEC. 6. (a) Section 401(b)(1)(A) of the Controlled Substances Act (21 U.S.C. 841) is amended (1) by adding after the words "more than $25,000, or both", the following sentence: "In the case of a controlled substance in schedule I which is the narcotic drug heroin, such person shall be sentenced to a term of imprisonment of not less than two years or more than fifteen years, and a fine of not more than $25,000"; and (2) by adding after the words "more than $50,000, or both" the following new sentence: "In the case of a controlled substance in schedule I which is the narcotic drug heroin, such person shall be sentenced to a term of imprisonment of not less than two years or more than thirty years, and a fine of not more than $50,000.".

(b) Section 1010(b)(1) of the Controlled Substances Act (21 U.S.C. 960) is amended by adding after the words "not more than $25,000, or both" the following new sentence: "In the case of a controlled substance in schedule I which is the narcotic drug heroin, such person shall be sentenced to a term of imprisonment of not less than two years or more than fifteen years and fine of not more than $25,000.".

SEC. 7. (a) Title 18, United States Code, is amended by adding immediately after section 3578 the following new sections:

"§ 3579. Increased sentence for repeat offenders

"(a) Whoever has been found guilty of an offense described in the provisions of section 13 relating to burglary and aggravated assault as defined therein, section 1111 relating to murder in the second degree, section 2031, section 2111, section 2112, any provision of section 2113 (other than the provisions contained in the second paragraph of subsection (b) of such section), or section 924(c) of this title, or section 401(b) of the Controlled Substances Act, relating to the narcotic drug heroin in schedule I or the provisions of section 1010 of the Controlled Substances Act relating to the narcotic drug heroin in schedule I, and said person is found to be a repeat offender, pursuant to subsection (c) of this section shall be sentenced to imprisonment for an appropriate term which may not be less than four years and may be up to the maximum provided by law for such violation for which he was convicted. Otherwise the court shall sentence the defendant in accordance with the law prescribing penalties for such violation. The court shall place in the record its findings, including an identification of the information relied upon in making such findings, and its reasons for the sentence imposed.

"(b) Notwithstanding any other provision of this section, the court shall not sentence a repeat offender to less than any mandatory minimum penalty prescribed by law for such violation.

"(c) A defendant is a repeat offender for purposes of this section if the defendant has previously been convicted in the courts of the United States, the District of Columbia, the Commonwealth of Puerto Rico, a territory or possession of the United States, any political subdivision, or any department, agency, or instrumentality thereof, for a violation of any provision within the purview of subsection (a) of this section committed on an occasion different from the alleged violation referred to in subsection (a), or has previously been convicted in any State court of a violation of a State law involving murder in the second degree, rape, robbery, burglary, aggravated assault, the commission of any offense while knowingly possessing, displaying, brandishing, or otherwise using a firearm, destructive device, or other dangerous weapon, or the commission of any offense involving the manufacturing, distributing, selling, dispensing, possessing, or importing of the narcotic drug heroin. A conviction shown on direct or collateral review or at the hearing to be invalid or for which the defendant has been pardoned on the ground of innocence shall be disregarded for purposes of this paragraph.

"§ 3580. Imposition and execution of sentence

"(a) Except to the extent otherwise provided by subsection (b), the imposition or execution of any mandatory minimum sentence pursuant to the provisions of section 13 (relating to burglary and aggravated assault), section 1111 (relating to murder in the second degree), section 924(c), section 2031, section 2111, section 2112, section 2113, or section 3579, of title 18, United States Code, or section 401(b)(1)(A) or section 1010(b)(1), of the Controlled Substances Act, shall not be suspended, probation shall not be granted, and section 4202 and chapters 309, 311, and 402 of this title shall not be applicable.

"(b) Notwithstanding any other provision of this title, no mandatory minimum sentence shall be imposed, and the provisions of subsection (a) shall not be applicable, with respect to any individual sentenced pursuant to any provision of this title referred to in subsection (a) if—

"(1) the individual was less than sixteen years of age at the time of the commission of the offense for which he is to be sentenced;

"(2) the individual's mental capacity, at the time of the commission of the offense for which he is to be sentenced, was significantly impaired, although not so impaired as to constitute a defense to the prosecution;

"(3) the individual, at the time of the commission of the offense for which he is to be sentenced, was acting under unusual and substantial duress, although not such duress as would constitute a defense to the prosecution;

"(4) the individual to be sentenced was an accomplice, the conduct constituting the offense was principally the conduct of another person, and the individual's participation was relatively minor; or

"(5) as to the crimes enumerated in sections 2111, 2112, and 2113, no serious bodily injury was inflicted on the victim.

"(c) Whoever is convicted of an offense described in subsection (a) of this section shall be granted a hearing by the court prior to imposition of sentence to determine whether any of the factors enumerated in subsection (b) of this section are applicable. The hearing shall be held before the court sitting without a jury, and the defendant and the government shall be entitled to assistance of counsel, compulsory process, and cross-examination of such witnesses as appear at the hearing. If it appears by a preponderance of the information, including information submitted during the trial, during the sentencing hearing, and in so much of the presentence report as the court relies on, that the defendant is subject to a term of imprisonment as set forth in subsection (a) of this section, the court shall so sentence the defendant. The court shall submit its findings in writing, including an identification of the facts relied upon in making its determination.".

(b) The analysis of chapter 227 of title 18, United States Code, is amended by adding at the end thereof the following:

"3579. Increased sentence for repeat offenders.
"3580. Imposition and execution of sentence.".

WHO IS IN PRISON?

(By James Q. Wilson)

Prisons are usually newsworthy only when their inmates riot, but of late they have become the focus of more general, and on the whole more constructive, attention. The revival of interest in the deterrent effects of the criminal-justice system, the spreading "prisoner-rights" movement, the decisions of various federal judges to close (or to threaten to close) various overcrowded or indecent jails and prisons, the sudden in-

crease in the size of the prison population, and the emerging debate over whether new prison construction is desirable have all combined to thrust a venerable and unpleasant institution onto center stage.

The debate over prisons raises many issues—the length of sentences, the function of parole, the level of amenity, the feasibility of rehabilitation, the rights of inmates—but central to most of these issues are some mundane but rarely examined constraints. If one wishes to award longer sentences to those who now go to prison, or short sentences to a larger fraction of those convicted of a crime, one must find a place to put them. If one wishes to increase the level of amenity, it presumably requires lowering the density of prison populations: it is hard to imagine how to make any institution less brutal if three or four persons are assigned to a cell designed for one, or if persons must sleep in the corridor or on the floor. Among the rights that most inmates certainly cherish is the right not to be abused by fellow prisoners, yet that can scarcely be insured without producing a greater degree of privacy, and accordingly supplying more square feet, for each inmate. In short, the sheer capacity of the prison system will importantly influence what, if anything, can be done toward achieving various objectives.

In general, we do not know what the "capacity" of our prison system is. There are about 400 prisons, 158 community centers and work farms, and 33 other (reception, diagnostic, medical, or classification) facilities operated by the states. Half of all of these are located in the South. These figures, the best available, were compiled by the Census Bureau in January 1974, but that agency admits that there may be more or different institutions—it is hard to be certain what is a distinct facility, some facilities have more than one function, and half of the institutions in one state (Massachusetts) did not even bother to reply to the questionnaire. The survey did not indicate what the "capacity" of each facility was and no survey probably could, inasmuch as many correctional administrators have long since had to put more inmates into a prison than it was designed to receive and in consequence have administratively redefined what constitutes its capacity.

We do know that the great majority of prisoners are in conventional closed prisons, not in work farms or community centers. Though the movement to place more convicted offenders in these "open" facilities has grown of late, less than a tenth of the correctional population is in community centers and less than a seventh on prison farms. Though most inmates are in real prisons, the popular image of these facilities as uniformly ancient and decrepit is not necessarily true. Nearly half of all prisons were built since 1949 and three-fourths were constructed since 1924. There are at least 50 prisons, however, that were built in the 19th century, several around the time of the Civil War.

If we cannot measure the capacitty of prisons, we can at least count their populations. Except for the period during and just after World War II, that population has been remarkably stable. There were 180,000 persons in state and federal prisons in 1939; and there were still about that many in prison fifteen years later, in 1954. During the 1950's, a period of relatively stable or only moderately rising crime rates, the prison population went up sharply—from 166,000 in 1950 to 213,000 in 1960. Then, during the 1960's, a period of rapidly increasing crime rates, the prison population actually declined from 213,000 in 1960 to 196,000 in 1970.

Why the prison population should go up when crime is not serious and go down when it has become a national crisis still defies explanation. One possibility is that certain judges came to believe that prison was an inappropriate way to treat criminals—because these facilities did not rehabilitate, or because they were unpleasant places to live, or because prison was generally "illiberal." This explanation is lent plausibility by the fact that many of the largest reductions in state-prison populations during this decade occurred in states, such as New York, Michigan, Pennsylvania, Minnesota, and Hawaii, with a strong tradition of liberal politics and presumably a liberal judiciary. Yet declines also occurred in Mississippi, West Virginia, Georgia, Alabama, Kansas, and Kentucky, hardly hotbeds of leftists.

One of the most intriguing theories devised to explain the relative stability over long periods of time in imprisonment rates is that advanced by Alfred Blumstein, Jacqueline Cohen, and Daniel Nagin of Carnegie-Mellon University. They show that, not only in the United States but in Norway and Canada as well, the imprisonment rate—the number of persons in prison per 100,000 population—is remarkably stable. Between 1930 and 1970 in this country it averaged around 110 with only small variations around this mean (the standard deviation was less than 9). In the late 1930's, the rate went up to abnormally high levels, in the 1940's down to abnormally low ones, in the 1950's it increased, and in the 1960's it decreased. Their theory is that society penalizes less serious offenses at times when serious crime is not a problem and lets off minor offenders when serious crime has become endemic. If murder is relatively uncommon or at least declining in rate (as it was during the 1950's), society will worry more about shoplifting, prostitution, and auto theft. When murder, assault, and robbery are increasing rapidly (as they did in the 1960's), society will ignore the shoplifter and seek—*de facto* if not *de jure*—to decriminalize prostitution.

The theory is quite suggestive, but thus far unproved. Among other difficulties, it does not account for the substantial variation among states in the use of prison. Crime rates during the 1960's were soaring in both Michigan and New Jersey, but whereas the former state reduced its prison population, the latter increased it despite similar rates of population change. Massachusetts officials have long been preoccupied with the dangers of overcrowded prisons and perhaps in consequence of this kept their prison population constant during the 1960's, despite a tripling of the serious crime rate. South Carolina, on the other hand, allowed its prison population to rise by more than 30 per cent even though it meant increased overcrowding. For some states, the capacity of the prison system is apparently an important constraint on the sentencing practices of judges, but in other states it is not.

In recent years, the prison population has started to rise again. In early 1976, according to *Correctians* magazine, there were nearly 250,000 persons in prison, the largest number since figures began to be kept. In the Blumstein, *et al.*, theory, this was to be expected—after allowing the imprisonment rate to fall during the 1960's (from 119 per 100,000 in 1960 to 97 per 100,000 in 1970), it was inevitable that pressure to respond to the crime wave would drive it back up to its traditional average of around 110. If that rate is applied to the estimated 1975 total population, it would produce a prison population of 234,000, significantly below the actual figure.

The reasons for the increase above expected levels are not hard to find. The population today is more youthful than at any other time in this century, and since young people are disproportionately criminals, it is not surprising that prisoners are growing in numbers faster than society generally. Furthermore, many of the young offenders who were first convicted in the 1960's are now being convicted for the third or fourth time and as a result can no longer expect to avoid prison through probation or suspended sentences. In addition, it is *possible* that judges are becoming more severe, but since we have no national statistics on sentencing that can only be a conjecture.

There is nothing magical about the long-term stability of the imprisonment rate. Society can choose a higher or a lower rate, in part by altering its prison capacity. That can be accomplished by either building more facilities, reducing the sentences of those going to prison, or changing the mix of persons in prison. The first policy results in an absolute increase in prison size, the second permits more persons to be sentenced to prisons despite a constant capacity, and the third permits one to find prison space for increased numbers of more serious offenders.

No accurate national figures exist on changes in total prison capacity. The Federal Bureau of Prisons, which has in confinement about 10 per cent of all prisoners, has, in the last five years, opened thirteen new facilities with a total capacity of over 4,000 inmates but still feels that its system is overcrowded by about 5,000 inmates. Among the states, major new building programs are under way or proposed in Florida, Alabama, North Carolina, Ohio, and elsewhere. The National Moratorium on Prison Construction, a lobbying group sponsored by the Unitarian-Universalist Service Association and the National Council on Crime and Delinquency, which opposes prison construction, reports that it has heard of over 500 planned institutions. Whatever the actual figure, it has so far been inadequate to alleviate the severe overcrowding that now exists and that will, almost certainly, become worse.

Because capacity has not kept up with inmates, there has occurred a dramatic shift in the kinds of crimes for which persons go to prison. In 1960, the Federal Bureau of Prisons counted about 151,000 persons in state prisons. In 1974, the Census Bureau (which has taken over the job of keeping track of prison populations) estimated, on the basis of a survey of about 10,000 inmates, that there were 188,000 persons in state prisons. The increase in size is partly an artifact of who was counted; in 1960, some states gave incomplete or inaccurate figures and persons not in closed prisons were often omitted. In 1974, the coverage was broader and included persons in certain state mental hospitals, as well as those on work-release programs and in community centers. Because the figures are not entirely reliable, only gross differences should be noted. The striking finding is that prison is increasingly reserved for only the most serious offenders. Persons convicted of homicide, robbery, and assault made up one-third of the state-prison population in 1960 but nearly half in 1974. There are nearly twice as many murderers in prison today as in 1960 and 70 per cent more robbers. By contrast, the number of burglars, thieves, and auto thieves in prison has actually declined—from about 55,300 in 1960 to about 49,200 in 1974. (During this period, the reported rate of these crimes increased more than fourfold.)

OFFENSES FOR WHICH ADULT INMATES WERE SENTENCED TO STATE PRISONS*

1974—Estimates derived from National Criminal Justice Information and Statistical Services, Law Enforcement Assistance Administration, "Survey of Inmates of State Correctional Facilities, 1974," *National Prisoner Statistics* (SD–NPS–SR–2), Table 4. Because 1974 figures are estimates from a sample survey, they have been rounded off to the nearest hundred.

---

* Source: 1960—Federal Bureau of Prisons, "Characteristics of State Prisons, 1960," *National Prisoner Statistics*, Table P4, page 10.

Offenses	1960	1974
Homicide	18,538	34,000
Robbery	24,627	42,400
Assault	7,739	9,000
Burglary	35,418	33,800
Larceny	14,284	12,200
Auto theft	5,633	3,200
Embezzlement, fraud forgery	15,633	8,100
Sex (including rape)	12,656	11,700
Drugs	8,030	18,700
Other	8,144	14,400
Total	150,702	187,500

Some have argued that we do not need more prisons because the ones we have are crowded with persons serving sentences for various "victimless" crimes. This was not true in 1960 and it is not true today. Only 10 per cent of the 1974 inmates were serving sentences for drug offenses and only one per cent for sex offenses other than forcible rape. Of the drug offenders, nearly half were serving time for trafficking in hard drugs, such as heroin. Thus, only 6 per cent of the inmates were doing time for merely possessing a drug or trafficking in marijuana. The number of persons in prison for gambling is not reported, but could not exceed one per cent.

Others have argued that prison should be reserved for repeat offenders and not used for persons convicted for the first time. By and large, that is already the case. Less than one per cent of the inmates had never been sentenced before; 28 per cent had served four or more prior sentences.

Prison inmates are, as one would expect, disproportionately drawn from among the poorly educated and those with low income. About half are black (in 1960 only a third were) and most never finished high school. Contrary to what one might suppose, inmates are not typically unemployed during the month preceding their arrest. Two-thirds were employed, and almost all of these said they were employed full time. Of those unemployed, the majority said they had not been looking for work and did not want work.

The other way society can alter its prison capacity is by changing the amount of time the average inmate serves. The shorter that period, the more space each year for additional inmates. Unfortunately, no good figures are available on time served by inmates of all state prisons. We do have such data for certain jurisdictions, however, and we can make an estimate of it for prisons generally. Overall, the length of time served in prison seems to have remained pretty much the same over the last decades or so: for the average inmate, about two years (he may be sentenced to much longer terms, but offenders are actually incarcerated for no more than one-third to one-half of their nominal sentences). This would suggest that nothing has changed. But that is a mistaken inference. Recall that the average prisoner is more likely today to be a murderer or robber and much less likely to be a burglar or auto thief. If time served has remained constant, it can only mean the time served in prison for more serious offenses, such as murder and robbery, has become less.

It is not clear, of course, whether any changes in time served were the result of judicial decisions. Other agencies, such as parole boards, can and do decide how long a person will stay in prison whatever the initial sentence. How this has changed is vividly shown by the experience of the federal correctional system. Federal judges, like their state counterparts, sent fewer persons to prison in 1970 than in 1960—30 per cent fewer, as it turns out—despite the rising crime rate. For those they did imprison, however, they issued longer sentences: in 1960, average sentence length was about 27 months, but in 1970 it was over 38 months. At the same time, however, the proportion of the sentence actually served fell—from about 64 per cent in 1960 to 51 per cent in 1970. As a result, the actual time served remained about constant (around a year and a half) despite the fact that federal prisons in 1970 had a larger proportion of inmates who had committed more serious crimes, such as robbery, assault, and firearms-law violations.

In sum, we have adapted to higher crime rates by reducing the proportions of arrested persons going to prison (a pattern that recently may have been reversed), changing the mix of prison populations to emphasize serious over less serious offenders, keeping more or less constant the average amount of time served despite the fact that those in prison are guilty of more serious crimes, and allowing overcrowding to occur in many systems (especially in the South).

From many different, and even competing, perspectives, this has not been a rational response. If you believe that increasing the percentage of convicted offenders who are imprisoned will deter others from committing crimes, then a declining prison population and a declining imprisonment rate are mistakes. If you believe that more serious offenders should be kept off the streets longer, then a constant sentence length at a time when the prison population is coming disproportionately to consist of serious offenders is a mistake. If you believe that prison conditions are inhuman and indecent, then allowing overcrowding to occur in many states makes difficult or impossible the provision of higher levels of privacy and amenity. If you believe that "white-collar" criminals should be given prison sentences more frequently (either to deter others, to exact retribution, or to prevent the burden of prison from falling overwhelmingly on the poor and the black), then maintaining a limited prison capacity is a mistake, because white-collar (and other nonviolent) offenders will inevitably be displaced by blue-collar, violent ones. (Between 1960 and 1970, the number of persons in federal prison who were convicted of income-tax violations, embezzlement, fraud, and forgery declined while the number convicted of robbery increased.)

In short, increasing the capacity of our prison system is consistent with, if not indeed mandated by, a variety of policy goals that are often thought to be in opposition. It is not clear, of course, that merely having more "prisons"—and by that I mean all variety of facilities, community-based as well as maximum-security—will induce judges to use them more, parole boards to leave serious offenders in longer, or wardens to devote more effort to producing decent and humane environments. It would seem, however, that for the nation as a whole if not for every state, the more or less fixed capacity of our prison system has been allowed to become a major constraint on, or excuse for, sentencing policy. William A. Shaffer of MIT has shown through a careful analysis of the Massachusetts criminal-justice system, how this constraint operates in practice. In that state, he suggests, the shortage of prison capacity is the critical variable affecting the ability of the system to lower crime rates—much more so than police resources or court decisions.

The cities and states, of course, are often pinched for money, in some cases led by officials who believe that only harsh correctional systems are of any value, and usually caught in the middle between citizen groups that want less crime and those that want to block the construction of new prisons. The problem will become more acute as prison populations continue to rise, as they have begun to do. I suggest that the next national administration, whether motivated principally by a concern for victims or inmates, has an obligation to examine the federal relationship to the state-prison system and to think seriously about the desirability of supplying both more funds for expansion of that system and higher standards for its operation.

By Mr. KENNEDY (for himself, Mr. DECONCINI and Mr. WILLIAMS):

S. 261. A bill to amend the Internal Revenue Code of 1954 to provide an election under which State and local governments may issue taxable obligations and receive a Federal subsidy of 40 percent of the interest yield on such obligations; to the Committee on Finance.

MUNICIPAL TAXABLE BOND ALTERNATIVE ACT OF 1977

Mr. KENNEDY. Mr. Speaker, I send to the desk legislation proposing a 40-percent Federal interest subsidy for State and local governments that elect to issue taxable bonds. The legislation is similar to a measure which Congressman HENRY REUSS and I introduced last year in the House and Senate, and which was reported favorably by the House Ways and Means Committee in April 1976. I am introducing the current legislation on behalf of Senator DECONCINI, Senator WILLIAMS, and myself.

The purpose of the taxable bond option is to provide an additional method of Federal financial assistance to help hard-pressed State and local governments ease their current serious problems of obtaining capital. By offering a substantial Federal interest subsidy for jurisdictions that elect to issue taxable bonds, Congress can provide an effective new means of financial assistance to States and cities. At the same time, the legislation would not affect the currently available option of States and cities to obtain capital through the issuance of tax exempt bonds.

A major advantage of the measure is that it involves no Federal approval or other intrusion into State and local affairs. The interest subsidy is automatic—all jurisdictions that elect to issue taxable bonds will qualify automatically for the 40-percent Federal subsidy of the interest cost.

In my view, the taxable bond option should be one of the key aspects of a new program of expanded Federal aid to State and local governments in the years ahead. For example, under this approach, the Commonwealth of Massachusetts, the city of Boston, or any other State or city in the Nation could go into the municipal bond market and raise funds more easily. If the going rate of interest is 10 percent, then the State or city would be entitled to have 4 percent of the interest on its bond issue paid by the Federal Government. The State or city itself would be responsible only for the remaining 6 percent. For many cities, the program would be a lifeline, because it means they would be able to obtain capital at lower interest rates than they are paying now. And the cost to the Federal Government would be extremely modest, compared to the savings that would be achieved by States and cities.

The recession, the recent seige of high interest rates, and the New York City fiscal crisis have sensitized the country

to the serious budget problems confronting many other jurisdictions, especially the Nation's cities. Before another such crisis overtakes us, we have to develop better ways to deal with the financing needs of State and local governments, particularly in New England and the Northeast region, where the needs are especially urgent.

The net cost of the taxable bond program to the Federal Government is relatively low, because the initial Federal cost of the subsidy will be offset in large part by new tax dollars paid into the Treasury by individuals and institutions investing in the taxable bonds. In effect, the Federal subsidy becomes "seed money" to attract new capital and stimulate a larger flow of private funds into investments in State and local bonds. In fact, I know of no other potential Federal program in which so much new benefit can be channeled to the States and cities with so little net expenditure of Federal funds.

For example, according to recent revenue estimates, the program would reduce State and local borrowing costs by $282 million in the first year of the program, at a net Federal revenue cost of $45 million. By the 10th year, the State savings would be $3.5 billion, at a Federal cost of $568 million. Thus, each dollar of Federal spending generates about $7 worth of savings in interest costs paid by State and local governments.

In fact, the traditional method of State and local financing through tax-exempt bonds is a wasteful and inefficient form of Federal subsidy, in spite of its long-standing popularity and its status as a fiscal sacred cow.

The remarkable efficiency of the taxable bond stands in sharp contrast to the inefficiency of the existing subsidy to tax-free State and local bonds. Under the current tax exemption, Congress is providing an annual $5 billion tax subsidy to State and local governments—that is the cost of the current loophole for tax-exempt bonds. But only $3.3 billion of the subsidy actually reaches its destination in the form of lower interest rates for States and cities; $1.6 billion is siphoned off in the form of tax benefits for wealthy private citizens, commercial banks, and insurance companies who have been the principal purchasers of tax-exempt bonds.

In other words, it costs the Federal Government $1 to provide 67 cents worth of benefits to State and local governments under the tax-free bond approach. By contrast, for each dollar spent under the taxable bond alternative, $7 of benefits flow through to State and local governments. Thus, the new alternative is 10 times more efficient as a program of Federal aid than the existing subsidy for tax-exempt bonds. If the current $5 billion subsidy through tax-free bonds were being paid out instead under the taxable bond program, State and local governments would be saving $35 billion a year in interest costs instead of only the $3.3 billion they save today.

However, because the existing tax exemption is widely used by State and local governments, any effort to close this tax loophole for wealthy investors would inevitably raise the cost of State and local borrowing. The virtue of the taxable bond option is that it avoids these undesirable consequences while offering a more efficient form of Federal subsidy to State and local governments willing to adopt the taxable bond approach to their financing.

One of the most important features of this new approach to State and local financing is its entirely voluntary nature. Any jurisdiction may continue to issue tax-exempt bonds. But the new program will encourage jurisdictions to use the taxable bond alternative as a way of obtaining substantial new Federal assistance at a low cost to the Federal Treasury, and at lower interest cost than they are currently paying on tax-free bonds.

A major virtue of the proposal is that it involves no Federal intrusion into the traditional preserve of State and local financing. The subsidy will be automatic, in the sense that it will be available to all jurisdictions issuing taxable bonds; there will be no requirement of Federal approval of the bond issue, and no Federal oversight of the use of the funds.

In addition, the subsidy will be set at a level low enough—40 percent—to guarantee that it will not disrupt the existing tax-exempt bond market, which will continue to be available for all jurisdictions that wish to use it. At a 40-percent level, only about 17 percent of State and local bond issues would shift from tax-exempt to taxable status. Thus, the vast majority of State and local financing—83 percent—would continue to be tax exempt. There is no substantial possibility that this small amount of taxable bond financing would disrupt the traditional tax-exempt market.

In the coming years, I see the taxable bond program taking its place alongside revenue sharing as one of the pillars of a more responsive Federal approach to the immediate and long-term financial needs of State and local governments.

In these years of severe pressure on budgets at all levels of government, it makes obvious sense to adopt methods of Federal aid that channel needed funds to State and local governments with a maximum of efficiency and a minimum of waste. The taxable bond option is designed to meet that need, and I hope that it will be enacted by the current Congress.

Mr. President, I ask unanimous consent that a fact sheet on the bill and the text of the bill may be printed in the RECORD.

There being no objection, the bill and factsheet were ordered to be printed in the RECORD, as follows:

S. 261

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Municipal Taxable Bond Alternative Act of 1977".

SEC. 2. AMENDMENT OF SECTION 103.

(a) IN GENERAL.—Subsections (a) and (b) of section 103 of the Internal Revenue Code of 1954 (relating to tax-exempt interest) are amended to read as follows:

"(a) GENERAL RULE.—Gross income does not include interest on the obligations of a State or a possession of the United States, any political subdivision of any of the foregoing, or the District of Columbia.

"(b) ELECTION TO ISSUE TAXABLE BONDS.—

"(1) SUBSECTION (a) NOT TO APPLY.—Except as provided in paragraph (2), the issuer of obligations described in subsection (a) may elect to issue obligations to which subsection (a) does not apply.

"(2) ELECTION NOT AVAILABLE FOR INDUSTRIAL DEVELOPMENT BONDS, ETC.—No election may be made under this subsection—

"(A) for any industrial development bond,

"(B) for any obligation not described in subsection (a),

"(C) for any obligation the interest on which is includible in gross income without regard to this subsection, and

"(D) for any obligation with respect to which the United States (or any agency or instrumentality thereof)—

"(i) guarantees part or all of the principal or interest under any law of the United States,

"(ii) is obligated under any law of the United States (other than section 3 of the Municipal Taxable Bond Alternative Act of 1976) to pay part or all of the interest,

"(iii) has a commitment to acquire the obligation in connection with a Federal assistance program, or

"(iv) as to principal or interest, provides financial assistance similar to assistance described in clause (i), (ii), or (iii).

"(3) SPECIAL RULE FOR OBLIGATIONS NOT ISSUED PURSUANT TO PUBLIC UNDERWRITING WHICH ARE HELD BY RELATED ENTITIES.—An election under this subsection shall not apply to any obligation not issued pursuant to a public underwriting for any period during which such obligation is held by a related entity.

"(4) ELECTION.—The election described in paragraph (1) shall be made (at such time and in such manner as the Secretary or his delegate by regulation prescribes) separately with respect to each issue of obligations to which it is to apply. An election with respect to any issue once made shall be irrevocable.

(5) CROSS REFERENCE.—

"For provisions relating to the payment by the United States of a portion of the interest cost of an obligation which is part of an issue for which the election described in this subsection has been made, see section 3 of the Municipal Taxable Bond Alternative Act of 1977.".

(b) DETERMINATION OF YIELD FOR PURPOSES OF PROVISION RELATING TO ARBITRAGE BONDS.—Subsection (d) of section 103 of such Code is amended by redesignating paragraph (5) as paragraph (6) and by inserting after paragraph (4) the following new paragraph:

"(5) YIELD DETERMINED WITHOUT REGARD TO UNITED STATES PAYMENTS.—For purposes of determining under this subsection whether or not an obligation is an arbitrage bond, the yield on such obligation shall be reduced by that portion of such yield which is to be borne by the United States under section 3 of the Municipal Taxable Bond Alternative Act of 1977.".

(c) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Subsection (c)(2) of section 103 of such Code is amended by striking out "For purposes of this subsection," and inserting in lieu thereof "For purposes of this subsection and subsection (b),".

(2) Sections 103(c)(1), 103(c)(6)(G), 103(d)(1), and 103(d)(2)(A) of such Code are each amended by striking out "subsection (a)(1)" and inserting in lieu thereof "subsection (a)".

(3) The paragraph headings for paragraph (1) of subsection (c) and paragraph (1) of subsection (d) of section 103 of such Code are each amended by striking out "SUBSECTION (a)(1)" and inserting in lieu thereof "SUBSECTION (a)".

(4) Section 103 of such Code is amended by striking out subsection (f) and insert-

ing in lieu thereof the following new subsections:

"(f) SPECIAL RULES FOR APPLYING SUBSECTION (b)(3).—For purposes of paragraph (3) of subsection (b)—

"(1) PUBLIC UNDERWRITING.—The term 'public underwriting' means a procedure for selling the obligations in which—

"(A) competitive bids for the right to sell the obligations to the general public are solicited from independent parties, and

"(B) 25 percent or more of the obligations sold are acquired by persons who are not related entities.

"(2) RELATED ENTITY.—The term 'related entity' means—

"(A) in the case of obligations issued by a State, such State and any political subdivision of such State,

"(B) in the case of obligations issued by a political subdivision of a State, such State and any political subdivision thereof, and

"(C) in the case of obligations issued by an instrumentality of two or more States, each such State and each political subdivision thereof.

For purposes of this subsection, any agency or instrumentality of a State or political subdivision shall be treated as such State or political subdivision, and any trust or plan for the benefit of the employees of a State or political subdivision shall be treated as an instrumentality of such State or political subdivision, as the case may be.

"(g) CROSS REFERENCES.—

"For provisions relating to the taxable status of—

"(1) Puerto Rican bonds, see section 3 of the Act of March 2, 1917, as amended (48 U.S.C. 745).

"(2) Virgin Islands insular and municipal bonds, see section 1 of the Act of October 27, 1949 (48 U.S.C. 1403).

"(3) Certain obligations issued under title I of the Housing Act of 1949, see section 102 (g) of title I of such Act (42 U.S.C. 1452 (g)).".

(5) Subparagraph (A) of section 6049(b)(2) of such code is amended to read as follows:

"(A) interest on obligations to which section 103(a) (relating to interest on certain governmental obligations) applies;".

(6) Paragraph (4) of section 6362(b) of such Code is amended—

(A) by striking out "described in section 103(a)(1)" in subparagraph (A) and inserting in lieu thereof "to which section 103 applies"; and

(B) by striking out "described in such section" in subparagraph (B) and inserting in lieu thereof "to which such section applies".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to obligations issued after June 30, 1977, with respect to which the due date for the first payment of interest occurs after September 30, 1977.

SEC. 3. UNITED STATES TO PAY 40 PERCENT OF INTEREST YIELD ON TAXATION ISSUES

(a) PAYMENT OF 40 PERCENT OF INTEREST YIELD.—

(1) IN GENERAL.—The Secretary of the Treasury or his delegate shall without any condition or requirement (other than that provided by paragraph (4)) pay 40 percent of the interest yield on each obligation to which an election under section 103(b) of the Internal Revenue Code of 1954 applies. Payment of such interest shall be made not later than the time the issuer makes its corresponding interest payment with respect to the obligation.

(2) INTEREST YIELD.—For purposes of this section, the interest yield on any obligation is the yield over the term of such obligation, determined immediately after such obligation is issued and by taking into account any discount or premium.

(3) ISSUER TO BE PAYING AGENT FOR UNITED STATES.—The issuer of any obligation to which an election under section 103(b) of the Internal Revenue Code of 1954 applies shall be the paying agent for the United States for the payments with respect to such obligation provided by this section. The Secretary of the Treasury or his delegate shall pay to the issuer the amount required to be paid pursuant to paragraph (1).

(4) LIMITATION ON LIABILITY OF THE UNITED STATES.—Nothing in this section shall be deemed to be an assumption by the United States of any liability for the payment of any portion of the principal on any obligation, for the payment of any portion of the interest on any obligation payable by the issuer thereof, or for the payment of any interest at a time when the issuer has not made the corresponding payment.

(b) NO AUTHORITY TO REVIEW PURPOSES OF OBLIGATIONS.—Nothing in this section shall be construed to authorize the Secretary of the Treasury or his delegate to review or approve the purposes of the issuance of any obligation to which an election under section 103(b) of the Internal Revenue Code of 1954 applies.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated for the fiscal year beginning October 1, 1976, and for each fiscal year thereafter, such sums as may be necessary to pay the entitlements provided by subsection (a).

FACT SHEET ON TAXABLE BOND OPTION LEGISLATION

GENERAL

1. The bill would give State and local governments the option of issuing taxable bonds, with a 40% interest subsidy from the Federal Government. (* * * 10% taxable bond, the State or local government would pay 6% of the interest, and the Treasury would pay the remaining 4%).

2. The Federal subsidy would be on a "no strings" basis—any jurisdiction would qualify for the subsidy by issuing a bond. The subsidy would be funded by a "permanent entitlement" (like Social Security) to avoid the delays and uncertainties of the annual appropriations process. The 40% subsidy is set at a level low enough to avoid disruption of the existing tax-exempt bond market. The subsidy will not affect the right of States and local governments to continue to issue tax free bonds.

3. The bill is identical to legislation favorably reported by the House Ways and Means Committee in April 1976 (H.R. 12774), except that the level of the subsidy in the House bill was set at 35%.

4. The taxable bond option will be available for bonds issued after June 30, 1977, so that the first interest subsidy payments would be made in FY 1978.

REVENUE EFFECT

1. Federal Cost.—The bill will have no effect on Federal revenues in FY 1977. In the first full year, the cost will be $45 million. In the tenth year, when it is anticipated that the program will have reached equilibrium, the cost will be $568 million.

2. State and Local Savings.—For each dollar of Federal revenue cost, State and local governments will save approximately $7 in borrowing costs. By contrast, under tax-exempt bonds, each dollar of Federal revenue costs saves only 67¢ in State and local borrowing costs. This relatively high efficiency is the chief advantage of the taxable bond option.

DISCUSSION

1. Although the current tax-exemption for interest on State and local bonds is costing the Treasury $5 billion a year in FY 1977, the exemption is also a lifeline for State and local governments. The taxable bond option avoids the undesirable consequences of imposing a regular tax or minimum tax on tax-free bonds, while offering a more efficient form of federal interest subsidy to state and local governments.

2. The proposal will not in any way impair the tax exemption option available to State and local governments. Any jurisdiction may continue to issue tax exempt bonds. But the bill will encourage jurisdictions to use the taxable bond alternative, as a way of obtaining substantial new Federal assistance at a lower cost to the Federal Treasury, and at lower net interest rates to themselves, than they would have to pay on tax exempt bonds.

3. The proposal involves no federal intrusion into the traditional preserve of state and local financing. On this issue, the bill involves no more intrusion than revenue sharing.

Since the taxable bond alternative is only an option, no jurisdiction is obliged to use it.

The Federal subsidy will be automatic. It will be available, without federal strings, conditions or other federal oversight, to all jurisdictions that choose the alternative of issuing taxable bonds. No Federal agency or official will have to approve the purposes for which the bond is offered.

The subsidy will be funded by a so-called permanent entitlement, which means that the federal funds for the subsidy will be a binding legal obligation of the federal government. In this way, the subsidy funds will be insulated as much as possible from the vagaries and delays and uncertainties of the annual appropriations process in Congress. The entitlement method of funding is the same method used for Social Security payments, and is a necessary guarantee to States and cities that the program will be funded and carried forward in good faith by the Federal Government.

The subsidy will be set at a level low enough to guarantee that it will not disrupt the existing tax exempt bond market, which will continue to be available for all jurisdictions that wish to use it.

4. The principal issue is the subsidy level. The following table indicates the estimated effect of the proposal at various subsidy levels on current State and local financing ($30 billion a year).

[Dollar amounts in billions]

Subsidy level (percent)	Amount of taxable bonds issued				Amount of tax exempt bonds issued	
	Short term	Long term	Total	Percent	Total	Percent
30		1.4	1.4	5	28.6	95
35	0.2	2.9	3.1	10	26.9	90
40	.5	4.5	5.0	17	25.0	83
45	1.0	6.2	7.2	24	22.8	76
50	14.5	13.7	28.2	94	1.8	6

At a 40% subsidy level, only about 17% of the current volume would shift to taxable bonds. Even at 45%, only 24% would shift. Thus, at the 40% level, the vast majority of financing would continue to be tax-exempt. There is no significant possibility that this small amount of taxable bond financing would disrupt this market.

5. The following table illustrates the efficiency of the 40% Federal subsidy for taxable bonds in providing benefits to the State and local governments. Dollars are in millions.

	First year	*Tenth year*
Gross Subsidy Cost	$181	$2,272
Revenues Generated	135	1,704
Net Subsidy Cost	45	568
Reduction in State and Local Borrowing Costs	282	3,547

The remarkable efficiency of the TBO stands in sharp contrast to the inefficiency of the existing subsidy for state and local bonds. At a cost of $45 million to the Federal Treasury in the first year, states and localities will save $282 million; by the tenth year, there will be savings of $3.5 billion at a cost of $0.5 billion.

Through the current tax exemption, Congress is now providing an annual $5 billion tax subsidy to state and local governments, but only $3.3 billion of the subsidy actually reaches its destination: $1.6 billion is siphoned off in the form of tax benefits for the wealthy private citizens, commercial banks and insurance companies who have been the principal purchasers of tax exempt bonds. In other words, it costs the federal government $1.00 to provide 67¢ worth of benefits to state and local governments. By contrast, for each dollar spent under the taxable bond alternative, seven dollars of benefits flow through to state and local governments. Thus, the alternative is ten times more efficient than the existing subsidy for tax exempt bonds.

6. Other economic and tax policy considerations support the taxable bond alternative.

It will help to ease the crisis over municipal capital formation by broadening the existing market for state and local bonds. The current municipal bond market is too narrow to absorb the increasing levels of state and local obligations. Annual long term municipal borrowing has climbed from $10 billion in 1964 to nearly $30 billion today. The development of other attractive investments and tax shelters has diverted traditional investors, especially banks, from the municipal market. For institutions that are already tax exempt, tax free bonds have no attraction, since higher returns are available in the taxable bond market. The taxable bond option will make municipal bonds attractive to many investors now foreclosed to state and local government, especially pension funds, charities, universities, and other tax exempt institutions.

The availability of the taxable bond will exert a beneficial countercyclical effect, by shielding state and local governments from the squeeze felt in periods of tight money. During such periods, tax exempt interest rates tend to rise faster than taxable bond rates. Under the taxable bond option, jurisdictions wil be encouraged to use the taxable bonds whenever the interest rate gap between tax exempt and taxable bonds is less than 40%.

Use of the taxable bond option will reduce the inequity of the current subsidy for tax exempt bonds. According to estimates of the Joint Tax Committee, 88% of the current tax benefits for individuals go to the richest 1.2% of the population, those with incomes over $50,000 a year. By encouraging state and local governments to issue taxable bonds, the option would help to reduce this inequity.

The option will improve the access of state and local governments to the long term bond market. Because of the commercial banks' preference for short term obligations, many municipalities have recently been forced to finance long term projects through a series of one year, bond anticipation notes. As a result, the jurisdictions find themselves in constant jeopardy of default each time the short term note comes up for renewal. The taxable bond alternative will help state and local governments to tap the long term taxable market, thereby reducing their dependence on less stable short term obligations.

7. The taxable bond option is neither new nor the special preserve of any political party. It was initially proposed by Democratic administrations in the 1960's and was incorporated in the House version of the Tax Reform Act of 1969. It has subsequently been endorsed by both the Nixon and Ford Administrations, but at a 30% subsidy level. As the above table indicates, however, at a 30% subsidy level, only a negligible amount of bond issues would be likely to follow the taxable bond option; thus, the value of the option would be substantially curtailed.

Mr. DECONCINI. Mr. President, it is with considerable pleasure that I join with my distinguished colleague from Massachusetts (Mr. KENNEDY) in offering legislation to alleviate some of the financial difficulties confronting many State and local governmental jurisdictions.

The interest-free municipal bond is a cherished financial instrument. Over the years, it has served local jurisdictions well. It must be recognized that the interest-free bond is a subsidy from the Federal Government to State and local governments created to facilitate their access to money markets. By foregoing the right to tax the interest accruing to individuals holding these bonds, the Federal Government insures that municipalities will be able to finance their needs at rates of interest lower than those available to private industries.

I want to make it clear, as Senator KENNEDY has, that in cosponsoring this legislation I do not imply any objection to the tax-free bond, nor do I wish to denigrate the role it has played in financing the many and varied needs of our cities and States. It is a valuable instrumentality which should be continued. But in recent years we have witnessed a dramatic increase in the financial problems plaguing our cities. As a result, their ability to raise money has been circumscribed.

What we are proposing today is an alternative to the tax-free bond. Perhaps, more accurately, it should be viewed as a supplement. It would give State and local jurisdictions the option of issuing either tax-free bonds or bonds at commercial rates of interest that would be taxable. When the municipality chooses to issue bonds at commercial rates, the Federal Government would continue to subsidize it, but in a somewhat different manner.

The new option created by this legislation would involve a direct rather than an indirect subsidy. When a State or local jurisdiction chooses to issue bonds at commercial rates of interest, the U.S. Treasury would pay 40 percent of the interest cost. The legislation would not, however, empower the Federal Government to exercise any new controls over the issuing jurisdiction; State and local governments would retain their present freedom.

Economists have noted that during periods of tight money, the interest rate of the interest-free bond tends to rise more rapidly than the interest rate of the commercial bond. The effect is to raise the price of money for municipalities, adding to their difficulties. With the direct subsidy option, they would be better able to cope with inflationary strains.

The direct subsidy alternative is a more efficient form of subsidy—in economic as well as social terms. In his statement, Senator KENNEDY has already provided an analysis of the relative efficiencies of the two methods. It is clear that to the extent that the new option is employed, it will reduce the cost to the Federal Government of providing bond subsides.

There is another important dimension to this legislation. It can be viewed as a tax reform measure. At present, approximately 88 percent of the tax advantages accruing as a result of the tax-free bond are enjoyed by the richest 1.2 percent of the population. The tax-free bond has become a tax haven for the wealthy. The direct subsidy approach envisioned by this legislation would, to the extent that it was employed, redistribute some of these benefits to broader segments of the population. This would occur, first, because the market for commercial rate bonds is greater; and, second, because overall Treasury outlays—including revenues lost—for bond subsidies would decrease.

A variety of useful social functions are promoted by this legislation. Local jurisdictions are given greater access to money markets, especially during periods of tight money. Aggregate Federal outlays for bond subsidies decrease. And, finally a measure of tax reform is achieved.

In light of these reasons as well as the House Ways and Means Committee's favorable action during the 94th Congress, I urge the Senate to consider this measure quickly and favorably.

By Mr. KENNEDY (for himself and Mr. ALLEN):

S. 262. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968, as amended, to authorize group life insurance programs for public safety officers and to assist State and local governments to provide such insurance, and for other purposes; to the Committee on the Judiciary.

PUBLIC SAFETY OFFICER GROUP LIFE INSURANCE

Mr. KENNEDY. Mr. President, today I join with Senator ALLEN in reintroducing a bill establishing a group life insurance program for State and local government public safety officers. This bill has passed the Senate by overwhelming votes on three separate occasions. Just last year this exact same bill passed the Senate as an amendment to H.R. 366, the public safety officer death benefits bill. Of the handful of Senators who voted against my bill at that time most objected, not to the merits of the group life insurance program, but to efforts to tie it to the death benefits bill. At the request of the chairman of the House Judiciary Committee, Mr. RODINO, the Senate conferees agreed to drop the group life insurance program in conference to expedite passage of the death benefits bill. That bill has now become law. The distinguished chairman, Mr. RODINO, has pledged to move the group life insurance bill early this session and House action seems promising.

This bill—like the three previous bills—provides for a nationwide, federally subsidized program of group life, accidental death, and dismemberment insurance for State and local public safety officers, including police, firefighters—both organized and part of a volunteer program—correctional guards, and probation, parole, and court officers.

The bill is endorsed by the leading public safety officer organizations, including the International Conference of Police Associations through its president, Edward J. Kiernan, and its secretary-treasurer, Robert D. Gordon.

Coverage under this plan is patterned closely after the highly successful Federal employees' and servicemen's group life insurance programs, which are generally available to all Federal civilian employees and to members of our Armed Forces. The Law Enforcement Assistance Administration would buy a national group policy from eligible nationwide life insurance carriers so that the underlying coverage would be provided—and most of the administrative work would be handled—by the private sector. The risks are assumed by private commercial insurance companies with premium contributions by the Federal Government.

Any applicable unit of State or local government could apply to LEAA to participate in the program. Officers in participating groups could elect not to be covered; those remaining in the program would have their share of the premiums deducted from their wages. LEAA would pay up to one-third of the total cost of the premiums, leaving the remainder to be withheld by the insured and/or the employing agency from the insured's salary. This national pooling of risks will help reduce actuarial and administrative costs.

Coverage would be at a level of the officer's annual salary plus $2,000, with a floor of $10,000 coverage rising to a maximum of $32,000. Thus we are talking about a very modest program. Accidental death and dismemberment insurance would be included with the usual double indemnity feature. LEAA would set the premium rate based on such factors as general actuarial tables, age, risk, and so forth. Coverage would continue during the course of employment. Such coverage would cease 2 months after termination of employment or pay, but the bill provides for the subsequent conversion of individual policies to private policies at prevailing insurance rates without the requirement of a medical examination.

I am aware that public safety is and must remain a local responsibility. If an existing State or local group life insurance plan is already in existence which provides similar coverage for public safety officers, eligible officers could choose in a referendum between the Federal and local plan. If they chose the local plan, they would still be eligible to receive the same significant Federal subsidy, without being bound by the provisions of the Federal program. The bill thus respects fully the interest of States, localities, and their officers in their existing plans. Local preferences and options are not preempted by this bill.

From my contact with public safety officers and groups across the Nation, the picture that emerges of available insurance is a very mixed one, with some officers enjoying good benefits at reasonable cost but many others having little or no coverage, higher cost, or less favorable conditions. Many areas are unable or unwilling to provide this benefit, which is so important both to officers personally and to the recruitment and retention of highly qualified personnel. This bill would aid localities to meet their burdens of providing public safety officers with some of the basic benefits to which they are entitled.

Nor does the congressional commitment to assist State and local public safety officers begin with this bill. Since 1968 the Federal Government has committed itself to providing major financial aid to State and local law enforcement personnel in an effort to help them attain a 20th-century level of performance. Last year's passage of the death benefits bill, which I vigorously supported, was just such a bill. This bill is a further important step taken by the Congress to aid States and localities in their struggle to make their communities a safer, better place in which to live.

My bill provides 24-hour coverage to all participants on an attractive low-cost basis because of the national group approach and the Federal subsidy, yet by requiring a contribution of at least two-thirds from the officer or his employer it keeps the cost to the Federal taxpayer at a reasonable level. The congressional budget office projects that the Federal cost of implementing this program will be approximately $27 million for 1978 and $29 million for 1979. Included in these figures are the administrative costs of the program.

Moreover, the insurance approach honors the principle of independence for State and local public safety officers. It would not place any officer or officer's family on the receiving end of a direct pipeline from Washington. It would require no detailed Federal inquiry into the circumstances into each death to determine the job relatedness of the cause.

Mr. President, we all talk about the need to support the efforts of our public safety personnel. This bill provides us with an opportunity to back up our words with action. As was the case in 1970, 1972, and last session, this bill should not lead to any partisan division. In the past it has attracted support from Democrats and Republicans, liberals and conservatives. It has received wide-ranging support from the major public safety officers' organizations and the insurance industry.

Most importantly Mr. President, this bill will go a long way toward alleviating a serious human problem with which the Federal Government is uniquely qualified to deal. We owe these men and women no less. The time for action is now if we are to provide adequate insurance for our Nation's public service protectors.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 262

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Public Safety Officers' Group Life Insurance Act of 1977".

SECTION 1. It is the declared purpose of Congress in this Act to promote the public welfare by establishing a means of meeting the financial needs of public safety officers or their surviving dependents through group life, accidental death, and dismemberment insurance, and to assist State and local governments to provide such insurance.

INSURANCE PROGRAM AUTHORIZED

SEC. 2. Title I of the Omnibus Crime Control and Safe Streets Act of 1968, as amended, is amended by adding at the end the following new part:

"PART K—PUBLIC SAFETY OFFICERS' GROUP LIFE INSURANCE

"DEFINITIONS

"SEC. 800. For the purposes of this part—

"(1) 'child' means any natural, adopted, illegitimate or posthumous child, or stepchild;

"(2) 'month' means a month that runs from a given day in one month to a day of the corresponding number in the next or specified succeeding months, except when the last month has not so many days, in which event it expires on the last day of the month; and

"(3) 'public safety officer' means a person serving a public agency in an official capacity, with or without compensation, in—

"(A) the enforcement of the criminal laws, including highway patrol,

"(B) a correctional probation or parole program, facility, or institution where the activity is potentially dangerous because of contact with criminal suspects, defendants, prisoners, probationers, or parolees,

"(C) a court having criminal or juvenile delinquent jurisdiction where the activity is potentially dangerous because of contact with criminal suspects, defendants, prisoners, probationers, or parolees, or

"(D) firefighting, including officially recognized or designated and legally organized volunteer firefighting, but does not include any person eligible to participate in the insurance program established by chapter 87 of title 5 of the United States Code, or any person participating in the program established by subchapter III of chapter 19 of title 38 of the United States Code;

"(4) 'public agency' means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States or any unit of local government, combination of such States, or units, or any department, agency or instrumentality of any of the foregoing.

"Subpart 1—Nationwide Program of Group Life Insurance for Public Safety Officers

"ELIGIBLE INSURANCE COMPANIES

"SEC. 801. (a) The Administration is authorized, without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5), to purchase from one or more life insurance companies a policy or policies of group life insurance to provide the benefits in this subpart. Each such life insurance company must (1) be licensed to issue life, accidental death, and dismemberment insurance in each of the fifty States of the United States and the District of Columbia, and (2) as of the most recent December 31 for which information is available to the Administration, have in effect at least 1 per centum of the total amount of group life insurance companies have in effect in the United States.

"(b) Any life insurance company issuing such a policy shall establish an administrative office at a place and under a name designated by the Administration.

"(c) The Administration may at any time discontinue any policy which it has purchased from any insurance company under this subpart.

"REINSURANCE

"SEC. 802. (a) The Administration shall arrange with each life insurance company issuing a policy under this subpart for the reinsurance, under conditions approved by the Administration, of portions of the total amount of insurance under the policy, determined under this section, with other life insurance companies which elect to participate in the reinsurance.

"(b) The Administration shall determine for and in advance of a policy year which companies are eligible to participate as reinsurers and the amount of insurance under a policy which is to be allocated to the issuing company and to reinsurers. The Administration shall make this determination at least every three years and when a participating company withdraws.

"(c) The Administration shall establish a formula under which the amount of insurance retained by an issuing company after ceding reinsurance, and the amount of reinsurance ceded to each reinsurer, is in proportion to the total amount of each company's group life insurance, excluding insurance purchased under this subpart, in force in the United States on the determination date, which is the most recent December 31 for which information is available to the Administration. In determining the proportions, the portion of a company's group life insurance in force on the determination date in excess of $100,000,000 shall be reduced by—

"(1) 25 per centum of the first $100,000,000 of the excess;

"(2) 50 per centum of the second $100,000,000 of the excess;

"(3) 75 per centum of the third $100,000,000 of the excess; and

"(4) 95 per centum of the remaining excess.

However, the amount retained by or ceded to a company may not exceed 25 per centum of the amount of the company's total life insurance in force in the United States on the determination date.

"(d) The Administration may modify the computations under this section as necessary to carry out the intent of this section.

"PERSONS INSURED; AMOUNT

"SEC. 803. (a) Any policy of insurance purchased by the Administration under this subpart shall automatically insure any public safety officer of a State or unit of general local government which has (1) applied to the Administration for participation in the insurance program under this subpart, and (2) agreed to deduct from such officer's pay the amount of such officer's contribution, if any, and forward such amount to the Administration or such other agency or office as is designated by the Administration as the collection agency or office for such contributions. The insurance provided under this subpart shall take effect from the first day agreed upon by the Administration and the responsible officials of the State or unit of general local government making application for participation in the program as to public safety officers then on the payroll, and as to public safety officers thereafter entering on duty from the first day of such duty. The insurance provided by this subpart shall to insure all such public safety officers unless any such officer elects in writing not to be insured under this subpart. If any such officer elects not to be insured under this subpart he may thereafter, if eligible, be insured under this subpart upon written application, proof of good health, and compliance with such other terms and conditions as may be prescribed by the Administration.

"(b) A public safety officer eligible for insurance under this subpart is entitled to be insured for an amount of group life insurance, plus an equal amount of group accidental death and dismemberment insurance, in accordance with the following schedule:

"If annual pay is—		The amount of group insurance is—	
Greater than—	But not greater than—	Life	Accidental death and dismemberment
0	$8,000	$10,000	$10,000
$8,000	9,000	11,000	11,000
$9,000	10,000	12,000	12,000
$10,000	11,000	13,000	13,000
$11,000	12,000	14,000	14,000
$12,000	13,000	15,000	15,000
$13,000	14,000	16,000	16,000
$14,000	15,000	17,000	17,000
$15,000	16,000	18,000	18,000
$16,000	17,000	19,000	19,000
$17,000	18,000	20,000	20,000
$18,000	19,000	21,000	21,000
$19,000	20,000	22,000	22,000
$20,000	21,000	23,000	23,000
$21,000	22,000	24,000	24,000
$22,000	23,000	25,000	25,000
$23,000	24,000	26,000	26,000
$24,000	25,000	27,000	27,000
$25,000	26,000	28,000	28,000
$26,000	27,000	29,000	29,000
$27,000	28,000	30,000	30,000
$28,000	29,000	31,000	31,000
$29,000	------	32,000	32,000

The amount of such insurance shall automatically increase at any time the amount of increase in the annual basic rate of pay places any such officer in a new pay bracket of the schedule and any necessary adjustment is made in his contribution to the total premium.

"(c) Subject to conditions and limitations approved by the Administration which shall be included in any policy purchased by it, the group accidental death and dismemberment insurance shall provide for the following payments:

"Loss	Amount payable
For loss of life	Full amount shown in the schedule in subsection (b) of this section.
Loss of one hand or one foot or loss of sight of one eye.	One-half of the amount shown in the schedule in subsection (b) of this section.
Loss of two or more such members	Full amount shown in the schedule in subsection (b) of this section.

The aggregate amount of group accidental death and dismemberment insurance that may be paid in the case of any insured as the result of any one accident may not exceed the amount shown in the schedule in subsection (b) of this section.

"(d) Any policy purchased under this subpart may provide for adjustments to prevent duplication of payments under any program of Federal gratuities for killed or injured public safety officers.

"(e) Group life insurance shall include provisions approved by the Administration for continuance of such life insurance without requirement of contribution payment during a period of disability of a public safety officer covered for such life insurance.

"(f) The Administration shall prescribe regulations providing for the conversion of other than annual rates of pay to annual rates of pay and shall specify the types of pay included in annual pay.

"TERMINATION OF COVERAGE

"SEC. 804. Each policy purchased under this subpart shall contain a provision, in terms approved by the Administration, to the effect that any insurance thereunder on any public safety officer shall cease two months after (1) his separation or release from duty as such an officer or (2) discontinuance of his pay as such an officer, whichever is earlier: *Provided, however,* That coverage shall be continued during periods of leave or limited disciplinary suspension if such an officer authorizes or otherwise agrees to make or continue to make any required contribution for the insurance provided by this subpart.

"CONVERSION

"SEC. 805. Each policy purchased under this subpart shall contain a provision, in terms approved by the Administration, for the conversion of the group life insurance portion of the policy to an individual policy of life insurance effective the day following the date such insurance would cease as provided in section 804 of this subpart. During the period such insurance is in force, the insured, upon request to the Administration, shall be furnished a list of life insurance companies participating in the program established under this subpart and upon written application (with such period) to the participating company selected by the insured and payment of the required premiums, the insured shall be granted life insurance without a medical examination on a permanent plan then currently written by such company which does not provide for the payment of any sum less than the face value thereof. In addition to the life insurance companies participating in the program established under this subpart, such list shall include additional life insurance companies (not so participating) which meet qualifying criteria, terms, and condi-

tions, established by the Administration and agree to sell insurance to any eligible insured in accordance with the provisions of this section.

"WITHHOLDING OF PREMIUMS FROM PAY

"SEC. 806. During any period in which a public safety officer is insured under a policy of insurance purchased by the Administration under this subpart, his employer shall withhold each pay period from his basic or other pay until separattion or release from duty as a public safety officer an amount determined by the Administration to be such officer's share of the cost of his group life insurance and accidental death and dismemberment insurance. Any such amount not withheld from the basic or other pay of such officer insured under this subpart while on duty as a public safety officer, if not otherwise paid, shall be deducted from the proceeds of any insurance thereafter payable. The initial amount determined by the Administration to be charged any public safety officer for each unit of insurance under this subpart may be continued from year to year, except that the Administration may redetermine such amount from time to time in accordance.

"SHARING OF COST OF INSURANCE

"SEC. 807. For each month any public safety officer is insured under this subpart, the Administration shall bear not more than one-third of the cost of insurance for such officer, or such lesser amount as may from time to time be determined by the Administration to be a practicable and equitable obligation of the United States in assisting the States and units of general local government in recruiting and retaining their public safety officers.

"INVESTMENTS AND EXPENSES

"SEC. 808. (a) The amounts withheld from the basic or other pay of public safety officers as contributions to premiums for insurance under section 806 of this subpart, any sums contributed by the Administration under section 807 of this subpart, and any sums contributed for insurance under this subpart by States and units of general local government under section 15 of this part, together with the income derived from any dividends or premium rate readjustment from insurers, shall be deposited to the credit of a revolving fund established by section 17 of this part. All premium payments on any insurance policy or policies purchased under this subpart and the administrative costs to the Administration of the insurance program established by this subpart shall be paid from the revolving fund by the Administration.

"(b) The Administration is authorized to set aside out of the revolving fund such amounts as may be required to meet the administrative costs to the Administration of the program and all current premium payments on any policy purchased under this subpart. The Secretary of the Treasury is authorized to invest in and to sell and retire special interest-bearing obligations of the United States for the account of the revolving fund. Such obligations issued for this purpose shall have maturities fixed with due regard for the needs of the fund and shall bear interest at a rate equal to the average market yield (computed by the Secretary of the Treasury on the basis of market quotations as of the end of the calendar month next preceding the date of issue) on all marketable interest-bearing obligations of the United States then forming a part of the public debt which are not due or callable until after the expiration of four years from the end of such calendar month; except that where such average market yield is not a multiple of one-eighth of 1 per centum, the rate of interest of such obligation shall be the multiple of one-eighth of 1 per centum nearest market yield. The interest on and the proceeds from the sale of these obligations, and the income derived from dividends or premium rate adjustments from insurers, shall become a part of the revolving fund.

"BENEFICIARIES; PAYMENT OF INSURANCE

"SEC. 809. (a) Any amount of insurance in force under this subpart on any public safety officer or former public safety officer on the date of his death shall be paid, upon the establishment of a valid claim therefor, to the person or persons surviving at the date of his death, in the following order of precedence:

"(1) to the beneficiary or beneficiaries as the public safety officer or former public safety officer may have designated by a writing received in his employer's office prior to his death;

"(2) if there is no such beneficiary, to the surviving spouse of such officer or former officer;

"(3) if none of the above, to the child or children of such officer of former officer and to the descendants of deceased children by representation in equal shares;

"(4) if none of the above, to the parent or parents of such officer or former officer, in equal shares; or

"(5) if none of the above, to the duly appointed executor or administrator of the estate of such officer or former officer.

Provided, however, That if a claim has not been made by a person under this section within the period set forth in subsection (b) of this section, the amount payable shall escheat to the credit of the revolving fund established by section 17 of this part.

"(b) A claim for payment shall be made by a person entitled under the order of precedence set forth in subsection (a) of this section within two years from the date of death of a public safety officer or former public safety officer.

"(c) The public safety officer may elect settlement of insurance under this subpart either in a lump sum or in thirty-six equal monthly installments. If no such election is made by such officer, the beneficiary or other person entitled to payment under this section may elect settlement either in a lump sum or in thirty-six equal monthly installments. If any such officer has elected settlement in a lump sum, the beneficiary or other person entitled to payment under this section may elect settlement in thirty-six equal monthly installments.

"BASIC TABLES OF PREMIUMS; READJUSTMENTS OF RATES

"SEC. 810. (a) Each policy or policies purchased under this subpart shall include for the first policy year a schedule of basic premium rates by age which the Administration shall have determined on a basis consistent with the lowest schedule of basic premium rates generally charged for new group life insurance policies issued to large employers, taking into account expense and risk charges and other rates based on the special characteristics of the group. The schedule of basic premium rates by age shall be applied, except as otherwise provided in this section, to the distribution by age of the amount of group life insurance and group accidental death and dismemberment insurance under the policy at its date of issue to determine an average basic premium per $1,000 of insurance, taking into account all savings based on the size of the group established by this subpart. Each policy so purchased shall also include provisions whereby the basic rates of premium determined for the first policy year shall be continued for subsequent policy years, except that they may be readjusted for any subsequent year, based on the experience under the policy, such readjustment to be made by the insurance company issuing the policy on a basis determined by the Administration in advance of such year to be consistent with the general practice of life insurance companies under policies of group life insurance and group accidental death and dismemberment insurance issued to large employers.

"(b) Each policy so purchased shall include a provision that, in the event the Administration determines that ascertaining the actual age distribution of the amounts of group life insurance in force at the date of issue of the policy or at the end of the first or any subsequent year of insurance thereunder would not be possible except at a disproportionately high expense, the Administration may approve the determination of a tentative average group life premium, for the first of any subsequent policy year, in lieu of using the actual age distribution. Such tentative average premium rate may be increased by the Administration during any policy year upon a showing by the insurance company issuing the policy that the assumptions made in determining the tentative average premium rate for that policy year were incorrect.

"(c) Each policy so purchased shall contain a provision stipulating the maximum expense and risk charges for the first policy year, which charges shall have been determined by the Administration on a basis consistent with the general level of such charges made by life insurance companies under policies of group life insurance and group accidental health and dismemberment insurance issued to large employers, taking into consideration peculiar characteristics of the group. Such maximum charges shall be continued from year to year, except that the Administration may redetermine such maximum charges for any year either by agreement with the insurance companies or companies issuing the policy or upon written notice given by the Administration to such companies at least one year in advance of the beginning of the year for which such redetermined maximum charges will be effective.

"(d) Each such policy shall provide for an accounting to the Administration not later than ninety days after the end of each policy year, which shall set forth, in a form approved by the Administration, (1) the amounts of premiums actually accrued under the policy from its date of issue to the end of such policy year, (2) the total of all mortality, dismemberment, and other claim charges incurred for that period, and (3) the amounts of the insurer's expense and risk charge for that period. Any excess of item (1) over the sum of items (2) and (3) shall be held by the insurance company issuing the policy as a special contingency reserve to be used by such insurance company for charges under such policy only, such reserve to bear interest at a rate to be determined in advance of each policy year by the insurance company issuing the policy, which rate shall be approved by the Administration as being consistent with the rates generally used by such company or companies for similar funds held under other group life insurance policies. If and when the Administration determines that such special contingency reserve has attained an amount estimated by the Administration to make satisfactory provision for adverse fluctuations in future charges under the policy, any further excess shall be deposited to the credit of the revolving fund established under this subpart. If and when such policy is discontinued, and if, after all charges have been made, there is any positive balance remaining in such special contingency reserve, such balance shall be deposited to the credit of the revolving fund, subject to the right of the insurance company issuing the policy to make such deposit in equal monthly installments over a period of not more than two years.

"BENEFIT CERTIFICATES

"SEC. 811. The Administration shall arrange to have each public safety officer insured under a policy purchased under this subpart receive a certificate setting forth the benefits to which such officer is entitled thereunder, to whom such benefit shall be payable, to whom claims should be submitted, and summarizing the provisions of the policy principally affecting the officer. Such certificate shall be in lieu of the certificate which the insurance company would otherwise be required to issue.

"Subpart 2—Assistance to States and Localities for Public Safety Officer's Group Life Insurance Programs

"SEC. 812. (a) Any State or unit of general local government having an existing program of group life insurance for, or including as eligible, public safety officers during the first year after the effective date of this part, which desires to receive assistance under the provisions of this subpart, shall—

"(1) inform the public safety officers of the benefits and allocation of premium costs under both the Federal program established by subpart 1 of this part and the existing State or unit of general local government program;

"(2) hold a referendum of the eligible public safety officers of the State or unit of general local government to determine whether such officers want to continue in the existing group life insurance program or apply for inclusion in the Federal program under the provisions of subpart 1 of this part; and

"(3) recognize the results of the referendum as finally binding on the State or unit of general local government for the purposes of this part.

"(b) Upon an affirmative vote of a majority of such officers to continue in such State or unit of general local government program, a State or unit of general local government may apply for assistance for such program of group life insurance and the Administration shall provide assistance in accordance with this subpart.

"(c) State and unit of general local government programs eligible for assistance under this subpart shall receive assistance on the same basis as if the officer were enrolled under subpart 1 of this part, subject to proportionate reduction if—

"(1) the program offers a lesser amount of coverage than is available under subpart 1 of this part, in which case assistance shall be available only to the extent of coverage actually afforded;

"(2) the program offers a greater amount of coverage than is available under subpart 1 of this part, in which case assistance shall be available only for the amount of coverage afforded under subpart 1 of this part;

"(3) the cost per unit of insurance is greater than for the program under subpart 1 of this part, in which case assistance shall be available only at the rate per unit of insurance provided under subpart 1 of this part; or

"(4) the amount of assistance would otherwise be a larger fraction of the total cost of the State or unit of general local government program than is granted under subpart 1 of this part, in which case assistance shall not exceed the fraction of total cost available under subpart 1 of this part.

"(d) Assistance under this subpart shall be used to reduce proportionately the contributions paid by the State or unit of general local government and by the appropriate public safety officers to the total premium under such program: *Provided, however,* That the State or unit of general local government and the insured public safety officers may by agreement change the contributions to premium costs paid by each, but not so that such officers must pay a higher fraction of the total premium than before the granting of assistance.

"Subpart 3—General Provisions

"UTILIZATION OF OTHER AGENCIES

"SEC. 813. In administering the provisions of this part, the Administration is authorized to utilize the services and facilities of any agency of the Federal Government or a State or unit of general local government or a company from which insurance is purchased under this part, in accordance with appropriate agreements, and to pay for such services either in advance or by way of reimbursement, as may be agreed upon.

"ADVISORY COUNCIL ON PUBLIC SAFETY OFFICERS' GROUP LIFE INSURANCE

"SEC. 814. There is hereby created an Advisory Council on Public Safety Officers' Group Life Insurance consisting of the Attorney General as Chairman, the Secretary of the Treasury, the Secretary of Health, Education, and Welfare, and the Director of the Office of Management and Budget, each of whom shall serve without additional compensation. The Council shall meet not less than once a year, at the call of the Chairman, and shall review the administration of this part and advise the Administration on matters of policy relating to its activity thereunder. In addition, the Administration may solicit advice and recommendations from any State or unit of general local government participating in a public safety officers' group life insurance program under this part, and from public safety officers participating in group life insurance programs under this part.

"PREMIUM PAYMENTS ON BEHALF OF PUBLIC SAFETY OFFICERS

"SEC. 815. Nothing in this part shall be construed to preclude any State or unit of general local government from making contributions on behalf of public safety officers to the premiums required to be paid by them for any group life insurance program receiving assistance under this part.

"WAIVER OF SOVEREIGN IMMUNITY

"SEC. 816. The Administration may sue or be sued on any cause of action arising under this part.

"PUBLIC SAFETY OFFICERS' GROUP INSURANCE REVOLVING FUND

"SEC. 817. There is hereby created on the books of the Treasury of the United States a fund known as the Public Safety Officers' Group Life Insurance Revolving Fund which may be utilized only for the purposes of subpart 1 of this part.".

MISCELLANEOUS

SEC. 3. Subsection (c) of section 520 of the Omnibus Crime Control and Safe Streets Act of 1968, as amended, is amended by striking the words "part J" at the end thereof and substituting in lieu thereof the words "parts J and K.".

SEC. 4. The authority to make payments under part K of the Omnibus Crime Control and Safe Streets Act of 1968 (as added by section 2 of this Act) shall be effective only to the extent provided for in advance by appropriation Acts.

SEC. 5. If the provisions of any part of this Act are found invalid, the provisions of the other parts and their application to other persons or circumstances shall not be affected thereby.

SEC. 6. This Act shall become effective on date of enactment.

By Mr. PEARSON (for himself and Mr. MAGNUSON):

S. 263. A bill to provide for interim regulatory reform as to certain independent regulatory agencies; to the Committee on Commerce.

INTERIM REGULATORY REFORM ACT OF 1977

Mr. PEARSON. Mr. President, I introduce for myself and the distinguished chairman of the Committee on Commerce (Mr. MAGNUSON), a bill entitled the "Interim Regulatory Reform Act of 1977."

This legislation is substantially the same as S. 3308, 94th Congress, which I introduced and which was reported by the Committee on Commerce and passed by the Senate without dissent on May 19, 1976. Unfortunately, no further action was taken in the other body on S. 3308 before adjournment sine die of the 94th Congress.

Mr. President, the bill which Chairman MAGNUSON and I are introducing today is major legislation. It requires a comprehensive restructuring of the regulations-in-force that have been promulgated by each of seven independent regulatory agencies of the Federal Government. The subject agencies include the Interstate Commerce Commission, the Federal Trade Commission, the Federal Power Commission, the Federal Communications Commission, the Civil Aeronautics Board, the Federal Maritime Commission, and the Consumer Product Safety Commission.

This legislation imposes the requirement that the subject agencies recodify their regulations in order to achieve the type of efficiencies and improvements achieved when the Department of Transportation was required to revise its regulations governing the transportation of hazardous materials. After the recodifications of those regulations was completed, the verbiage had been reduced by half, safety requirements had been strengthened, and the regulatory requirements on industry had been clarified and streamlined.

Other agencies can, and should, strive for comparable efficiencies through a comprehensive review and recodification of their regulations in force. This bill would mandate such a process.

Mr. President, this legislation also requires all of the designated independent regulatory agencies to propose comprehensive revisions of the statutes which they are, respectively, required to administer. Within a reasonable time frame, each of the agencies is required to propose to Congress a complete modernization of the relevant statutes.

Mr. President, the Interim Regulatory Reform Act imposes upon the other regulatory agencies the provisions enacted previously to mandate the CPSC and the ICC to respond promptly to any petition received from a Government agency, business, union, association, individual, or other interested person, if the petition requests the agency to commence a proceeding for the issuance, amendment, or repeal of an order, rule, or regulation under any statute. Because the courts have held that an agency has the power to control its own docket without substantial judicial review, this legislation should be extended to the other independent regulatory agencies to avoid denial of a legitimate petition simply by ignoring it.

Mr. President, our bill also extends to

all seven regulatory agencies the requirement previously approved by our committee that the FTC, the CPSC, and the ICC provide access in a timely fashion to the appropriate committees of Congress all information required by those committees in exercising their constitutional duties. Without the information that this bill envisions would be submitted to the relevant congressional committees, effective oversight of the agencies cannot be conducted.

Mr. President, the chairman and I are also including in this bill the authority for each regulatory agency, in cooperation with the Department of Justice, to conduct its own litigation directly in certain appropriate cases. This feature of our bill reflects provisions previously approved by our committee with respect to the FTC, the CPSC, and the ICC.

Under existing law, certain Federal officers have Federal protection in the sense that an attack on their person is a Federal crime. Representatives of the ICC, and other agencies, have petitioned for comparable protection. This legislation would extend the protection afforded by sections 1114 and 111 of title 18, United States Code, to the officers and employees of the seven designated independent regulatory agencies.

Mr. President, our comprehensive proposal further requires that former commissioners and members of independent regulatory agencies avoid the appearance of conflict of interest in their professional conduct following their service in the Government. Under the terms of our bill, no person appointed following the date of enactment to serve as a commissioner or member would be eligible to represent any person before his commission or board in a professional capacity for 2 years following his or her service. Moreover, no person serving as commissioner or member of one of the seven designated agencies would be permitted concurrently with his service to engage in any other occupation or business enterprise.

Mr. President, our bill carries forward a provision already applicable to the CPSC to remove, to the extent provided, certain exemptions which have the effect of immunizing the independent agencies from lawsuits based upon misrepresentation or on the exercise or failure to exercise a discretionary function. The historic doctrine of "sovereign immunity" to shield Government from legal responsibility for misfeasance or nonfeasance of its agents, offices, and employees has limited relevance, particularly in the case of agencies whose principal business is the economic regulation of private business activities. Our limited provision on this point will improve the accountability of these agencies.

Mr. President, our bill provides that the chairman of each regulatory agency will be appointed, as chairman, by the President for a fixed term of office. This appointment to the chairmanship will be subject to the advice and consent of the Senate. This improvement in the law will assure that greater independence of the designated agencies is achieved.

Mr. President, it should be noted that our bill closes the open-ended authorizations under which serveral of the agencies operate each year. In order to insure more effective congressional oversight of agency performance, our bill provides that each agency, or a staggered schedule, shall be subject to oversight on the question of authorization of appropriations for continued operations.

In a sense, this provision will force the appropriate committees of the Congress to focus on the actual needs of the several agencies for increases—or reductions—in appropriated funds.

Mr. President, our bill has other minor features. It is an omnibus bill in the sense that it extends reforms considered by the Committee on Comerce to be worthwhile to all seven agencies uniformly and in one document. It is a limited bill, on the other hand, because it does not seek to accomplish within its terms the reform of those economic regulation policies established over the years by the agencies.

The major reform bills dealing with reform of economic regulation of industry, will be considered separately.

Mr. President, the Interim Regulatory Reform Act was approved by the Senate without dissent in the last Congress. We urge timely action on the present bill in this Congress to assure immediate improvement in the accountability of the several regulatory agencies, as well as other structural and operational improvements in their organization and administration of the laws.

By Mr. DOLE:

S. 264. A bill to increase the maximum Federal contribution to the cost of any State meat or poultry inspection system from 50 to 80 percent; to the Committee on Agriculture and Forestry.

STATE-FEDERAL MEAT INSPECTION

Mr. DOLE. Mr. President, today I am introducing legislation which increases the Federal Government's share of meat and poultry inspection programs from 50 to 80 percent of the total cost.

Under provisions of the Federal Meat and Poultry Inspection Acts, the U.S. Department of Agriculture is required to assume responsibility for inspecting intrastate meat or poultry plants in States which are unwilling or unable to conduct inspection programs equal to Federal requirements. At the present time, the Federal Government is responsible for poultry inspection in 24 States. Another 17 States have Federal meat inspection.

The trend has been toward forcing Federal Government to take over intrastate meat and poultry inspection. This shifts the cost of inspection from State governments to the Federal Government.

Mr. President, I believe that many livestock producers and packers would like to maintain State inspection services. However with most State governments operating on extremely tight budgets, one means of saving money has been to shift inspection services to the Federal Government.

If the Federal Government assumes 80 percent of the inspection costs, State inspection will be a much more viable alternative to many State governments. The Federal Government obviously would also make a smaller total outlay than would be necessary by the complete takeover of all State inspection services.

Legislation to amend section 301 of the Federal Meat Inspection Act and section 5 of the Poultry Products Inspection Act was approved by the Senate in the last three Congresses. In each case, this legislation has failed to pass the House of Representatives.

I urge the Senate to again approve this legislation. Prompt approval in the Senate would enhance its changes for success in the other body.

By Mr. McINTYRE (for himself, Mr. HUMPHREY, Mr. LEAHY, Mr. MELCHER, and Mr. RANDOLPH):

S. 265. A bill to amend the Federal Aviation Act of 1958 to authorize reduced fare transportation on a space-available basis for elderly persons and handicapped persons, and for other purposes; to the Committee on Commerce.

ELDERLY AND HANDICAPPED PERSONS TRANSPORTATION ACT OF 1977

Mr. McINTYRE. Mr. President, today I am introducing the Elderly and Handicapped Persons Transportation Act of 1977. I am joined by Senators HUMPHREY, LEAHY, MELCHER, and RANDOLPH.

It would approve reduced air fares on a space-available basis for persons 60 years of age and older, and, for the handicapped and attendants of the handicapped. It would also require the CAB to study the economic feasibility of reduced fare for youth.

This bill is a modification of S. 29, which I introduced on January 10.

This bill would remove the statutory limitations on the CAB's ability to approve reduced fares for deserving groups, if the fares meet the economic test generally applied to discount fares.

The problems affecting the elderly are numerous and transportation has consistently been a major concern. Many of our elderly and handicapped are unable to drive and consequently rely primarily on public transportation. With many medical specialists located only in the metropolitan areas and friends and family spread throughout the country, I believe this legislation would provide many people with the opportunity to make use of the airways who otherwise would find it financially impossible. The mobility provided by air transportation is especially important to the elderly and the handicapped.

The handicapped and elderly are unquestionably deserving of this opportunity and past experimentation has proven that air travel by senior citizens is significantly increased when reduced fares have been provided. When Hawaiian Air Lines offered reduced fares to senior citizens from 1967 to 1973, the carriers' senior citizens traffic increased by 340 percent.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 265

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this

Act may be cited as the "Elderly and Handicapped Persons Transportation Act of 1977".

SEC. 2. (a) Section 403(b)(1) of the Federal Aviation Act of 1958 (49 U.S.C. 1373(b)(1)) is amended by striking out "to ministers of religion on a space available basis." and inserting in lieu thereof "on a space-available basis to any minister of religion, any person who is sixty years of age or older, and to any handicapped person and any attendant required by such handicapped person. For the purposes of this subsection, the term 'handicapped person' means any person who has severely impaired vision or hearing, and any other physically or mentally handicapped person as defined by the Board.".

(b) Within six months after the date of enactment of this Act, the Board shall study and report to Congress on the feasibility and economic impact of air carriers and foreign air carriers providing reduced-rate transportation on a space-available basis to persons twenty-one years of age or younger.

By Mr. JACKSON (for himself and Mr. BAKER):

S. 266. A bill to authorize appropriations for fiscal year 1977 to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended and section 305 of the Energy Reorganization Act of 1974; to the Joint Committee on Atomic Energy.

Mr. JACKSON. Mr. President, I introduce for appropriate reference, legislation to authorize appropriations for fiscal year 1977 for programs administered by the Energy Research and Development Administration dealing with nuclear energy and national security matters.

This bill complements the legislation, S. 36 and S. 37, which I introduced on January 10, 1977. That legislation would authorize appropriations for activities within ERDA which deal with nonnuclear energy research, development, and demonstration programs. Funding for programs supportive of both nuclear and nonnuclear programs, specifically authorization for programs in the environmental and safety research, physical sciences and program support categories, were included in the authorizations already proposed.

The bill I now introduced would, if enacted, authorize funds for ERDA's nuclear energy R. & D. and national security functions.

Provisions of this measure are idential to language agreed upon by the conference committee members to the ERDA authorization bill considered in the closing days of the 94th Congress.

This bill provides authorizations of $5,271,679,000, for nuclear energy R. & D., basic research, space nuclear systems, uranium enrichment and other related programs. In addition, a total of $227,553,000 is authorized for programs in environmental research and safety, basic energy sciences, and program support.

As I indicated in my remarks accompanying the introduction of S. 36 and S. 37, this authorizing legislation is needed by the end of March. Otherwise, a significant portion of ERDA's operations will have to cease by virtue of the limitation requiring authorization which has been placed upon the availability of fiscal year 1977 appropriations. I want to emphasize, therefore, the need for early consideration of this legislation.

For the information of the Senate, I ask unanimous consent that the provisions of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 266

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in accordance with section 261 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2017), and section 305 of the Energy Reorganization Act of 1974 (42 U.S.C. 5875), there is hereby authorized to be appropriated to the Energy Research and Development Administration for fiscal year 1977, subject to the provisions of this Act, the following:

(A) For nuclear energy research and development, basic research, space nuclear systems and other technology, uranium enrichment, national security, and related programs, $5,271,679,000.

(B) For environmental research and safety, basic energy sciences, program support, and related programs directly associated with nuclear programs, $227,553,000.

TITLE I.—FOR NUCLEAR ENERGY RESEARCH AND DEVELOPMENT, BASIC RESEARCH, SPACE NUCLEAR SYSTEMS AND OTHER TECHNOLOGY, URANIUM ENRICHMENT, NATIONAL SECURITY, AND RELATED PROGRAMS

OPERATING EXPENSES

SEC. 101. For "Operating expenses", $3,390,051,000. No funds authorized under this Act may be used to produce any nuclear fuel for export to supply a nuclear power reactor under an Agreement for Cooperation which has not been reviewed by the Congress of the United States under the procedures in section 123d. of the Atomic Energy Act of 1954 (42 U.S.C., 2153(d)), as amended by Public Law 93-485, to a country which has not ratified the Treaty on Nonproliferation of Nuclear Weapons unless the first proposed license authorizing the export of either such reactor or such fuel after the date of this Act is first submitted to the Congress for review under the congressional review procedures provided for Agreements for Cooperation in the above-referenced section 123d. of the Atomic Energy Act of 1954, as amended.

PLANT AND CAPITAL EQUIPMENT

SEC. 102. For "Plant and capital equipment", including construction, acquisition, or modification of facilities, including land acquisition; and acquisition and fabrication of capital equipment not related to construction, a sum of dollars equal to the total of the following amounts:

(1) Magnetic Fusion:

Project 77-2-a, computer building, Lawrence Livermore Laboratory, Livermore, California, $5,000,000.

(2) Laser Fusion:

Project 77-3-a, electron beam fusion, facilities, Sandia Laboratories, Albuquerque, New Mexico, $13,500,000.

(3) Fission Power Reactor Development:

Project 77-4-a, modifications to reactors, $5,000,000.

Project 77-4-b, breeding nondestructive assay facility, Idaho National Engineering Laboratory, Idaho, $9,500,000.

Project 77-4-c, high performance fuel laboratory, Richland, Washington (A-E only), $1,500,000.

Project 77-4-d, fuel storage facility, Richland, Washington (A-E and long-lead procurement), $7,000,000.

(4) Fission Power Reactor Development:

Project 77-5-a, computer building acquisition, Idaho National Enginering Laboratory, Idaho Falls, Idaho, $950,000.

(5) High Energy Physics:

Project 77-7-a, accelerator improvements and modifications, various locations, $3,600,000.

(6) Basic Energy Sciences:

Project 77-8-a, accelerator and reactor improvements and modifications, various locations, $1,300,000.

Project 77-8-b, expanded experimental capabilities, Bates Linear Accelerator, Massachusetts Institute of Technology, Massachusetts, $5,000,000.

Project 77-8-c, increased flux, high flux beam reactor, Brookhaven National Laboratory, New York, $2,500,000.

Project 77-8-d, conversion of steam plant facilities, Oak Ridge National Laboratory, Tennessee, $12,200,000.

(7) Uranium Enrichment Activities:

Project 77-9-a, expansion of feed vaporization and sampling facilities, gaseous diffusion plants, multiple sites, $30,000,000.

Project 77-9-b, air and nitrogen system uprating, gaseous diffusion plant, Oak Ridge, Tennessee, $5,200,000.

Project 77-9-c, upgrade ventilation systems, technical services building, gaseous diffusion plant, Portsmouth, Ohio, $3,000,000.

Project 77-9-d, centrifuge plant demonstration facility, Oak Ridge, Tennessee, $60,000,000.

(8) Uranium Enrichment Activities:

Project 77-10-a, fire protection upgrading, gaseous diffusion plants, multiple sites, $8,300,000.

Project 77-10-b, modifications to comply with the Occupational Safety and Health Act, gaseous diffusion plants, and Feed Materials Production Center, Fernald, Ohio, $8,200,000.

(9) Weapons Activities:

Project 77-11-a, safeguards and research and development laboratory facility, Sandio Laboratories, Albuquerque, New Mexico, $9,300,000.

Project 77-11-b, safeguards and site security improvements, various locations, $13,500,000.

Project 77-11-c, 8-inch artillery fired atomic projectile production facilities, various locations, $20,500,000.

Project 77-11-d, tritium confinement system, Savannah River, South Carolina, $3,500,000.

(10) Weapons Activities:

Project 77-12-a, fire and safety project, Lawrence Livermore Laboratory, California, $2,300,000.

Project 77-12-b, life safety corridor modifications, Bendix Plant, Kansas City, Missouri, $3,100,000.

Project 77-12-c, modifications to comply with the Occupational Safety and Health Act, Y-12 Plant, Oak Ridge, Tennessee, $6,400,000.

Project 77-12-d, upgrade reliability of fire protection, Bendix Plant, Kansas City, Missouri, $7,800,000.

Project 77-12-e, sludge disposal facility, Y-12 Plant, Oak Ridge, Tennessee, $3,000,000.

(11) Weapons Materials Production:

Project 77-13-a, fluorinel dissolution process and fuel receiving improvements, Idaho Chemical Processing Plan, Idaho National Engineering Laboratory, Idaho (A-E and long-lead procurement), $10,000,000.

Project 77-13-b, improved confinement of radioactive releases, reactor areas, Savannah River, South Carolina, $6,000,000.

Project 77-13-c, seismic protection, reactor areas, Savannah River, South Carolina, $3,000,000.

Project 77-13-d, high level waste storage and waste management facilities, Savannah River, South Carolina, $56,000,000.

Project 77-13-e, high level waste storage and handling facilities, Richland, Washington, $40,000,000.

Project 77-13-f, waste isolation pilot plant, site undesignated (A-E, land acquisition, and long-lead procurement), $6,000,000.

Project 77-13-g, safeguards and security

upgrading, production facilities, multiple sites, $12,600,000.

Project 77–13–h, personnel protection and support facility, Idaho Chemical Processing Plant, Idaho National Engineering Laboratory, Idaho, $10,500,000.

(12) Project 77–14 General Plant Projects, $74,610,000.

(13) Project 77–15, Construction Planning and Design $7,200,000.

(14) Capital Equipment, not related to construction, $276,368,000.

LIMITATIONS

SEC. 103. The Administration is authorized to start any project set forth in title I, subsections 102 (2), (3), (5), (6), (7), (9), and (11), only if the currently estimated cost of that project does not exceed by more than 25 per centum the estimated cost set forth for that project.

SEC. 104. The Administration is authorized to start any project set forth in title I, subsections 102 (1), (4), (8), and (10), only if the currently estimated cost of that project does not exceed by more than 10 per centum the estimated cost set forth for that project.

SEC. 105. The Administration is authorized to start any project under title I, subsection 102(12) only if it is in accordance with the following:

(1) The maximum currently estimated cost of any project shall be $750,000 and the maximum currently estimated cost of any building included in such project shall not exceed $300,000: *Provided,* That the building cost limitation may be exceeded if the Administration determines that it is necessary in the interest of efficiency and economy.

(2) The total cost of all projects undertaken under title I, subsection 102(12) shall not exceed the estimated cost set forth in that subsection by more than 10 per centum.

SEC. 106. The total cost of any project undertaken under title I, subsections 102 (2), (3), (5), (6), (7), (9), and (11), shall not exceed the estimated cost set forth for that project by more than 25 per centum unless and until additional appropriations are authorized: *Provided,* That this subsection will not apply to any project with an estimated cost less than $5,000,000.

SEC. 107. The total cost of any project undertaken under title I, subsections 102 (1), (4), (8), and (10), shall not exceed the estimated cost set forth for that project by more than 10 per centum, unless and until additional appropriations are authorized: *Provided,* That this subsection will not apply to any project with an estimated cost less than $5,000,000.

AMENDMENTS TO PRIOR YEAR ACTS

SEC. 108. (a) Section 101 of Public Law 89–428, as amended, is further amended by striking from subsection (b)(3), project 67–3–a, a fast flux test facility, the figure "$420,000,000" and substituting therefor the figure "$540,000,000".

(b) Section 101 of Public Law 91–273, as amended, is further amended by striking from subsection (b)(1), project 71–1–f, process equipment modifications, gaseous diffusion plans, the figure "$510,100,000" and substituting therefor the figure "$820,000,000".

(c) Section 101 of Public Law 93–60, as amended, is further amended by striking from subsection (b)(1), project 74–1–g, cascade uprating program, gaseous diffusion plants, the figure "$270,400,000" and substituting therefor the figure "$417,300,000".

(d) Section 101 of Public Law 93–276, as amended, is further amended by—

(1) striking from subsection (b)(1), project 75–1–c, new waste calcining facility, Idaho Chemical Processing Plant, National Reactor Testing Station, Idaho, the figure "$27,500,000" and substituting therefor the figure "$65,000,000";

(2) striking from subsection (b)(3), project 75–3–b, high energy laser facility, Los Alamos Scientific Laboratory, New Mexico, the figure "$22,600,000" and substituting therefor the figure "$54,500,000";

(3) striking from subsection (b)(6), project 75–6–c, positron-electron joint project, Lawrence Berkeley Laboratory and Stanford Linear Accelerator Center, the figure "$11,900,000" and substituting therefor the figure "$78,000,000".

(e) Public Law 94–187 is amended by—

(1) striking from subsection 101(b)(5), "project 76–5–a, Tokamak fusion test reactor, Princeton Plasma Physics Laboratory, Plainsboro, New Jersey, $23,000,000.", and striking from subsection 201(b)(5) "project 76–5–a, Tokamak fusion test reactor, Princeton Plasma Physics Laboratory, Plainsboro, New Jersey, $7,000,000.", which authorized appropriations for this project totaling $30,000,000 and substituting therefor in section 101(b)(5), "project 76–5–a, Tokamak fusion test reactor, Princeton Plasma Physics Laboratory, Plainsboro, New Jersey, $214,600,000.";

(2) striking from subsection 101(b)(8), project 76–8–e, conversion of existing steam plants to coal capability, gaseous diffusion plants and Feed Materials Production Center, Fernald, Ohio, the figure "$12,200,000" and substituting therefor the figure "$13,500,000";

(3) transferring the text appearing as section 106 in section 201(a) of title II to follow immediately after the colon in (d) of section 103 of title I; and

(4) striking the words "June 30, 1976, and the interim period following that fiscal year and ending September 30, 1976" in the text of section 106(a) and substitute therefor the words "September 30, 1977";

(5) prior to issuing a Construction Permit for the Clinch River Breeder Reactor Demonstration Plant the Nuclear Regulatory Commission must first find that there is reasonable assurance that the plant can be constructed and operated at the proposed location without undue risk to the health and safety of the public and that, in the opinion of the Commission, the issuance of a Construction Permit will not be inimical to the common defense and security;

(6) striking from subsection 101(b)(8), "project 76–8–g, additional facilities, enriched uranium production, locations undetermined, $25,000,000." and substituting therefor "project 76–8–g, enriched uranium production facility, Portsmouth, Ohio, $255,000,000.".

SEC. 109. For a period of one year subsequent to the date of enactment of this Act, no nuclear fuel shall be exported to supply a nuclear power reactor under an Agreement for Cooperation which has not been reviewed by the Congress of the United States under the procedures in section 123d. of the Atomic Energy Act of 1954 (42 U.S.C. 2153 (d)), as amended by Public Law 93–485, to a non-nuclear-weapon state (within the meaning of the Treaty on the Non-Proliferation of Nuclear Weapons) which has not ratified the Treaty on the Non-Proliferation of Nuclear Weapons unless the first proposed license under such agreement authorizing the export of either such facility or such material after the date of this Act is first submitted to the Congress for review under procedures provided for Agreements for Cooperation in the above-referenced section 123d. for the Atomic Energy Act of 1954, as amended; *Provided, however,* That the foregoing prohibition shall not apply where the Nuclear Regulatory Commission receives advice, in accordance with procedures established by the President, that it is the judgment of the Department of State and other concerned Executive Branch agencies that the proposed export would not be inimical to the Common defense and security of the United States and where the Nuclear Regulatory Commission finds that the recipient nation or group of nations has committed itself to apply and adhere to the following principles or their equivalent, and any others which the Commission deems necessary to meet the applicable statutory requirements of the Atomic Energy Act of 1954, as amended, and where the Commission finds that such principles will be applied in a manner acceptable to the United States:

(1) International Atomic Energy Agency safeguards as required by Article III(2) of the Treaty shall be applied with respect to such export and to any special nuclear material produced through the use thereof.

(2) No such material produced through the use thereof, shall be used for any nuclear explosive device or for research on or development of any nuclear explosive device.

(3) Adequate physical security measures shall be maintained with respect to the material or equipment transferred and with respect to any special nuclear material produced through the use thereof.

(4) No such material or equipment transferred, and no special nuclear material produced through the use thereof, shall be retransferred to the jurisdiction of any other nation or group of nations except under conditions acceptable to the United States. The United States shall not approve such retions designated to receive such retransfer agree that it shall be subject to the principles stated herein.

(5) No such material transferred and no special nuclear material used in or produced through the use of transferred nuclear material or equipment shall be reprocessed, and transfer unless the nation or group of nano irradiated fuel elements containing such material removed from a reactor shall be altered in form or content, unless the prior approval of the United States is obtained for such reprocessing or alteration, or unless such reprocessing or alteration will be under other conditions acceptable to the United States.

(6) The foregoing conditions shall be applied to any nuclear material or equipment which is produced or constructed in the recipient nation or group of nations by or through the use of any exported sensitive nuclear technology.

TITLE II—FOR ENVIRONMENTAL RESEARCH AND SAFETY, BASIC ENERGY SCIENCES, PROGRAM SUPPORT, AND RELATED PROGRAMS

OPERATING EXPENSES

SEC. 201. For "Operating expenses", for the following programs, a sum of dollars equal to the total of the following amounts:

(1) Biomedical and environmental research, $85,900,000.

(2) Operational safety, $4,300,000.

(3) Environmental control technology, $8,900,000.

(4) Basic energy sciences for the following:

(A) Material sciences, $19,400,000.

(B) Molecular, mathematical, and geosciences, $11,800,000.

(5) Program support, $88,035,000.

PLANT AND CAPITAL EQUIPMENT

SEC. 202. For "Plant and capital equipment", including construction, acquisition, or modification of facilities, including land acquisition; and acquisition and fabrication of capital equipment not related to construction, a sum of dollars equal to the total of the following amounts:

(1) Capital Equipment, not related to construction:

(A) Biomedical and environmental research, $4,818,000.

(B) Operational safety, $1,100,000.

(C) Environmental control technology, $400,000.

(D) Basic energy sciences for the following:

(i) Material sciences, $1,700,000.

(ii) Molecular, mathematical and geosciences, $700,000.

(E) Program Support, $500,000.

AMENDMENTS TO PRIOR YEAR ACTS

SEC. 203(a) Section 101 of Public Law 92-314 is amended by striking from subsection (a) "Operating expenses" the figure "$2,110,480,000" and substituting therefor the figure "$2,113,480,000".

(b) Section 202 of Public Law 92-314 is amended by—

(1) striking from subsection (b) the words "four years" and substituting therefor the words "seven years", and

(2) adding the following subsections:

"(h) that payment may be made to those who undertook action of a remedial nature prior to the date of this amendment without the determination required in subsection (b) of this section and notwithstanding the requirement in subsection (c) of this section: *Provided, however,* That the determination whether and to what extent such payment shall be made shall be the decision of the Administration based on the recommendation of the State; that requests for such payments shall not be considered after one year from the date of this amendment; *And provided further,* That the United States shall be released from any mill tailings related liability or claim thereof upon such payment.

"(i) That the requirement in subsection (c) of this section that any remedial action shall be performed by the State of Colorado or its authorized contractor may be waived in advance in writing by the State with approval of the Administration: *Provided, however,* That the determination whether and to what extent payment shall be made shall be the decision of the administration based on the recommendation of the State: *And provided further,* That the United States shall be released from any mill tailings related liability or claim thereof upon such payment.".

(c) Section 204 of Public Law 92-314 is amended by striking the figure "$5,000,000" and substituting therefor the figure "$8,000,000".

TITLE III—GENERAL PROVISIONS

SEC. 301. Subject to the applicable requirements and limitations of this Act, when so specified in appropriations Acts amounts appropriated for the Administration pursuant to this Act for "Operating expenses" or for "Plant and capital equipment" may be merged with any other amounts appropriated for like purposes pursuant to any other Act authorizing appropriations for the Administration.

SEC. 302. When so specified in appropriation Acts, amounts appropriated pursuant to this Act for "Operating expenses" or for "Plant and capital equipment" may remain available until expended.

SEC. 303. Amounts appropriated pursuant to title I of this Act for construction planning and design, and for general plant projects, are available for use, when necessary, in connection with all Administration programs.

SEC. 304. (a) Any Government-owned contractor operated laboratory, energy research center, or other laboratory performing functions under contract to the Administration may, with the approval of the Administrator, use a reasonable amount of its operating budget for the funding of employee-suggested research projects up to the pilot stage of development. It shall be a condition of any such approval that the director of the laboratory or center involved form an internal review mechanism for determining which employee-suggested projects merit funding in a given fiscal year; and any such project may be funded in one or more succeeding years if the review process indicates that it merits such funding.

(b) Each director of a laboratory or center specified in subsection (a) of this section shall submit an annual report to the Administrator on projects being funded under this section; and on completion of each such project shall submit a report to the Technical Information Center of the Administration for inclusion in its data base.

SEC. 305. The Administrator is authorized to perform construction design services for any Administration construction project whenever the Administrator determines that the project is of such urgency that construction of the project should be initiated promptly upon enactment of legislation appropriating funds for its construction in order to meet the needs of national defense or protection of life and property or health and safety.

SEC. 306. Any moneys received by the Adminstration may be retained and used, as provided in annual appropriations Acts enacted after the date of enactment of this Act, for operating expenses (except sums received from disposal of property under the Atomic Energy Community Act of 1955 and the Strategic and Critical Materials Stockpiling Act, as amended, and fees received for tests or investigations under the Act of May 16, 1910, as amended (42 U.S.C. 2301; 50 U.S.C. 98h; 30 U.S.C. 7)), notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), and may remain available until expended. Funds may be obligated for purposes stated in this section only to the extent provided in appropriations Acts.

SEC. 307. Transfers of sums from the "Operating expenses" appropriation may be made to other agencies of the Government for the performance of the work for which the appropriation is made, and in such cases the sums so transferred, may be merged with the appropriation to which transferred.

SEC. 308. (a) Each officer or employee of the Energy Research and Development Administration who—

(1) performs any function or duty under this Act or any other Act amended by this Act; and

(2) has any known financial interest—

(A) in any person engaged in the business, other than at the retail level, of developing, producing, refining, transporting by pipeline, or converting into synthetic fuel, minerals, wastes, or renewable resources, or in the generation of energy from such minerals, wastes, or renewable resources, or in conducting research, development, and demonstration with financial assistance under this Act or any other Act amended by this Act, or

(B) in property from which minerals are commercially produced,

shall, beginning on February 1, 1977, annually file with the Administrator a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statements shall be available to the public.

(b) The Administrator shall—

(1) act within ninety days after the date of enactment of this section—

(A) to define the term "known financial interest" for purposes of paragraph (2) of subsection (a) of this section; and

(B) to establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Administrator of such statements; and

(2) report to the Congress on June 1 of each calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) In the rules prescribed in subsection (b) of this section, the Administrator may identify specific positions within the Administration which are of a nonpolicymaking nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Any officer or employee who is subject to, and knowingly violates, this section or any regulation issued thereunder, shall be fined not more than $2,500 or imprisoned not more than one year, or both.

SEC. 309. The Administrator shall not use any funds appropriated pursuant to this Act under any contract in effect on or after October 1, 1977 for research, services, or material conducted or supplied by the Lawrence Livermore Laboratory for the Energy Research and Development Administration unless that contract specifically provides that the employees of the Lawrence Livermore Laboratory will be guaranteed the establishment of an impartial grievance procedure and further guarantees employees shall have the right to self-organization, to form, join, or assist labor organizations, to bargain collectively through representatives of their own choosing, and to engage in other concerted activities for the purpose of collective bargaining or other mutual aid or protection, and shall also have the right to refrain from any or all of such activities: Provided, however, That no employee rights or activities shall be guaranteed in such contract which would be in violation of California State law.

TITLE IV.—BASIS FOR GOVERNMENT CHARGE FOR URANIUM ENRICHMENT SERVICES

SEC. 401. Subsection 161v. of the Atomic Energy Act of 1954, as amended, is amended—

(1) by striking out the word "Commission" each time it appears in the subsection, and inserting in lieu thereof the words "Administrator of Energy Research and Development" in all instances except when the deleted word "Commission" is used in the context of ownership of uranium enrichment facilities, the words "Energy Research and Development Administration" shall be substituted therefor:

(2) by deleting in the first proviso in this subsection the words after "(iii)" of the first proviso to the beginning of the second proviso and inserting in lieu thereof the following: "any prices established under this subsection shall be on such a basis as will recover not less than the Government's costs over a reasonable period of time, and in the opinion of the Administrator of Energy Research and Development will not discourage the development of domestic sources of supply independent of the Energy Research and Development Administration" and

(3) by deleting the third proviso in this subsection and substituting therefor the following, "*Provided,* That before the Administrator of Energy Research and Development establishes such criteria, the proposed criteria shall be submited to the Congress and referred to the Joint Committee and a period of sixty days shall elapse while the Congress is in session (in computing such sixty days, there shall be excluded the days on which either House is not in session because of adjournment of more than three days) *And provided further,* That any such proposed criteria shall not become effective if during such sixty-day period the Congress passes a joint resolution stating in substance that it does not favor the proposed action: *And provided further,* That prior to the elapse of the first thirty days of any such sixty-day period the Joint Committee shall hold full and complete hearings on the proposed criteria and shall submit a report to the Congress of its views and recommendations respecting the proposed criteria and an accompanying proposed joint resolution stating in substance that the Congress favors, or does not favor, as the case may be, the proposed criteria. The foregoing provision for Joint Committee review and approval shall also apply prior to any changes by the Administrator of Energy Research and Development in the basic approach used in arriving at the fair value charge for the Government's

uranium enrichment services or any additions to that charge for the purpose of not discouraging the development of private uranium enrichment projects."

Mr. BAKER. Mr. President, I join with my distinguished colleague from the State of Washington in sponsoring this bill to authorize appropriations for fiscal year 1977 for the nuclear programs of the Energy Research and Development Administration. This bill would give ERDA the full authority needed to spend those funds for ERDA's nuclear programs for fiscal year 1977 which have already been appropriated.

The language of this bill, which is the same as that agreed to by the conference committee on H.R. 13350 during the last Congress, will provide a basis for Senate consideration of the necessary authorizing legislation.

Due to restrictions under present law, enactment of authorizing legislation before March 31, 1977, is essential if we are to avoid serious disruption of ERDA's important nuclear programs. I hope, therefore, that this legislation will receive prompt consideration by the Senate.

By Mr. DOLE:

S. 267. A bill to amend the Commodity Exchange Act, and for other purposes; to the Committee on Agriculture and Forestry.

CFTC AMENDMENTS

Mr. DOLE. Mr. President, today I am pleased to introduec a bill to amend the Commodity Futures Trading Commission Act of 1974.

The Commodity Futures Trading Commission Act of 1974 made extensive changes in the Commodity Exchange Act, bringing under Federal regulation all agricultural and other commodities, goods, and services traded on exchanges, and otherwise strengthening the regulation of the Nation's $600 billion commodity futures industry. One of the most significant changes made by the 1974 act was the creation of the Commodity Futures Trading Commission, an independent regulatory agency consisting of a chairman and four other Commissioners.

To remove any constitutional question regarding the appointment of the Commission's Executive Director, which may be based on the Supreme Court's decision in *Buckley* v. *Valeo*, (96 Sup. Ct. 612 (1976)), the bill deletes the requirement that the appointment be made "by and with the advice and consent of the Senate."

The bill I am introducing would enable the Commission to grant "use" immunity to witnesses in CFTC proceedings. This is consistent with the powers of its predecessor agency, the Commodity Exchange Authority, which could grant such immunity by virtue of being an agency of an "executive department" within the context of section 6001 of title 18 of the United States Code.

This bill also would effect technical amendments to the 1974 act which would among other things: First, extend to 6 months the time for acting on the registration of any commodity trading advisor or commodity pool operator; and second, make it unlawful for any commodity trading advisor or commodity pool operator "who is or should be registered under this act" to defraud any client or participant.

This bill is substantially similar to the House of Representative's amendments to S. 3051 which passed in the Senate during the 94th Congress. However, due to the press of last minute business the Senate was unable to consider the House amendments.

This bill is the result of a request from the Commodity Futures Trading Commission and is largely composed of amendments which are technical or house-keeping in nature.

I hope this bill will be passed quickly so as to allow the Commodity Futures Trading Commission to increase the effectiveness of its regulatory activities.

By Mr. LEAHY (for himself, Mr. STAFFORD, Mr. PEARSON, Mr. HUMPHREY, Mr. MATHIAS, Mr. MCGOVERN, Mr. HUDDLESTON, Mr. ABOUREZK, and Mr. STEVENS):

S. 268. A bill to create within the Department of Agriculture an office specifically charged with the responsibility of rural residents as such needs pertain to home heating and cooling, transportation, agricultural production, electrical generation, conservation, and research and development; jointly, by unanimous consent, to the Committees on Agriculture and Forestry, Banking, Housing and Urban Affairs, Commerce, Interior and Insular Affairs.

RURAL ENERGY OFFICE OF 1977

Mr. LEAHY. Mr. President, when I first introduced this bill last year I warned my colleagues that it would be tragic indeed to lose sight of long-range projections indicating future energy shortages because of a mild winter, a temporary petroleum surplus, and a relaxation of the crisis atmosphere that followed the 1973 embargo. The Federal administration's national energy outlook, 1976, contends that:

The reserves from which most of today's oil is being produced—mainly on-shore in the lower 48 states—will decline by almost two-thirds by 1985 and about 80% by 1990.

The trepidation that preceded the recent two-tier oil price increase by the OPEC nations and the unusually severe winter we have experienced thus far—and which some climatologists warn may signal a major change in our weather patterns—should serve to remind us that we are just as vulnerable to the unpredictable vagaries of price and supply as we were 3 short years ago.

It is clear, therefore, that the energy crisis is not going to disappear. And, as those of us in the Northeast are painfully aware, the energy crisis does not affect all sections of the Nation equally. No fact has been more strikingly demonstrated during past energy shortages than their unequal impact on particular regions and sectors.

As a Vermonter, I have seen the energy crisis hit with special force. Vermonters experience very severe winters. Oil constitutes the major heating source in 70 percent of Vermont households. If our experience in Vermont so far this winter is indicative, that situation is going to get worse. As of December, middle distillate use for home heating in Vermont alone had increased at least 25 percent over last winter at the same time.

While Vermont has only 0.22 percent of the Nation's population, it consumed 0.89 percent of the Nation's supply of No. 2 distillate oil in 1974, an amount four times greater than the national average.

In that regard, Vermont is similar to the other New England States where 5.8 percent of all Americans live, but which consumed 21 percent of the Nation's supply of No. 2 distillate in 1974.

However, to comprehend fully the energy problems of Vermont, it must be perceived not only as a New England State, but also as a rural State. In fact, Vermont is the most rural State in the Nation, and becoming even more rural. Between 1960 and 1970, the number of Americans residing in rural areas decreased slightly between 1960 and 1970, while the number of Vermonters residing in rural areas increased by 25.4 percent.

As a result, there are genuine differences between Vermont and the other States within the New England region, especially with regard to energy. This shows up most vividly in the matter of residual oil—the fuel which fires many New England powerplants and moves the machines in the region's industrial sector. A simple comparison makes this clear. For every 100 barrels of residual oil consumed by Vermonters in 1974, 912 barrels of distillate and 1,047 barrels of motor gasoline were consumed. In contrast residents of the other five New England States consumed 81 barrels of distillate and 87 barrels of motor gasoline for every 100 barrels of residual oil consumed.

Vermont clearly has a different energy consumption pattern than other States in the region, but does have one very similar to that in other rural States.

The more we delve into the energy requirements of rural areas versus urban areas, the clearer it becomes that the energy needs of rural America have been shamefully neglected.

Therefore, I am today reintroducing legislation which would create within the Department of Agriculture a Rural Energy Office, charged specifically with the responsibility of assessing the fuel and energy needs of rural America.

This Office will have two major functions. The first will concentrate upon gathering information. The Department of Agriculture has a well-functioning set of information-gathering offices: The Agricultural Research Service, the AMS, the Economic Research Service, the REA, the ASCS, the Cooperative State Research Service, the Extension Service, the Forest Service, the National Agricultural Library, the Soil Conservation Service, and the Statistical Reporting Service.

Individuals in each with expertise in energy-related subjects would be transferred to the new Rural Energy Office where they could concentrate their efforts in assessing the full dimensions of

energy needs facing rural Americans. No new bureaucracy would be created. People would merely be transferred to an area where they can be more effective.

The second major activity of the Rural Energy Office would be to serve as a clearinghouse for energy legislation likely to impact heavily upon rural and agricultural interests. In this capacity, it would advise the Secretary of Agriculture on the consequences of each proposal that might affect the Nation's food and fiber production or the quality of rural life.

The bill specifically mandates that the FEA Administrator, the ERDA Administrator, the Federal Highway Administrator, and the Chairman of the Federal Power Commission notify the Secretary of Agriculture of proposed regulations for his comments within a prescribed time period prior to their publication.

In promoting the energy interests of rural Americans, the Rural Energy Office would of necessity work with other Federal agencies in a variety of ways.

Its voice would be heard in the preparation of any allocation plans that might be necessary in the future.

It would assist rural residents in obtaining grants from the Energy Research and Development Administration for the development of nonfossil fuels for energy production. Compared to urban areas, rural America has an abundant supply of the nonfossil sources which ERDA has been researching: solar, wind, hydro, geothermal, and wood.

Also, given national anxiety about the possible hazards of nuclear energy and the growing propensity to locate nuclear plants in underpopulated areas, the REO would be consulted on future nuclear plant sitings having a direct impact upon rural America.

Activities of the FPC which directly affect either natural gas distribution or the production of electricity should come to the attention of the Rural Energy Office which, in conjunction with the REA would attempt to prevent serious disclocations in their availability.

Components of the Community Services Administration which relate directly to the "weatherization" of rural housing would also receive REO attention, as would the activities of the Rural Transit Office of the Department of Transportation.

Mr. President, in researching the urban-rural energy consumption problems, my office made inquiries at the FEA's Office of Consumer Affairs/Special Impact. We learned that no formal study of the energy needs of rural people had been prepared, despite the fact that FEA's own Project Independence report in 1974 indicated that one of the groups which would be hit especially hard by the energy crisis was the rural poor.

As a result, we were obliged to develop our own statistics regarding urban-rural energy consumption. Using materials from the FEA, the FPC, the Federal Highway Administration, the Bureau of Mines, and the Census Bureau, outlines were able to be developed of meaningful urban-rural differences in the consumption of petroleum products—the Nation's scarcest and most critical energy source.

Mr. President, in order to focus more clearly on these differences, I have assessed each of the three major petroleum products in terms of how they relate directly to urban-rural differences. With regard to distillate fuel—the lighter weight fuel used primarily in home heating—the 10 States with the lowest metropolitan percentages had a per capita consumption of 352.3 gallons in 1974, a figure 65 percent higher than the 214.2 gallons per capita consumed by all Americans.

In contrast, the 1974 per capita consumption of distillate oil in the 10 most metropolitan States was 212.5 gallons, slightly less than that consumed in the United States as a whole, and 40 percent below that consumed in the least metropolitan States.

Comparisons indicate that as each State's metropolitan percentage rises, per capita consumption of distillate oil decreases. Apart from climate differentials, housing patterns constitute the single most important reason. There are more single-family dwellings in rural areas, and they tend to be less fuel-efficient than the multiple-unit apartment dwellings of metropolitan areas. In addition, as a report for last year's National Conference on Rural America pointed out:

> Rural areas . . . have about one-fourth of the nation's population and 60% of its substandard housing.

This housing is in most cases poorly insulated and energy-wasteful.

However, rural areas are not wasteful when it comes to the consumption of residual fuel—the heavier weight oil used for industrial purposes and the generation of electricity. Residents in the ten most metropolitan States consumed 310.4 gallons of residual oil in 1974, exceeding overall national consumption of residual oil by 120 gallons per capita and that of the 10 least metropolitan States by 142 gallons. This means that the most urban States had a per capita consumption figure 63 percent higher than that for the most rural States.

In direct contrast to distillate, as metropolitan percentages increase, per capita consumption of residual fuel also increases.

The primary reason for the high per-capita consumption of residual fuel in metropolitan States is the dependence of those States upon electricity generated in oil-fired powerplants. Sixteen percent of the Nation's total kilowatt hours are produced by oil-burning plants. However, in the 10 most metropolitan States, 45 percent of all the electricity comes from oil-burning plants.

Caribbean refiners produce most of the Nation's supply of residual. And it is the Caribbean refiners which are the most dependent upon foreign oil imports. Therefore, the actions of OPEC hit hardest those States with the highest consumption of residual fuel.

The reason for this is the fact that domestic refineries produce very little residual fuel. Most of their petroleum products are distillate oil and motor gasoline. According to FEA figures released in February, the normal yield pattern for a domestic refiner is 45 percent gasoline, 22 percent distillate, 8 percent residual, and 25 percent other petroleum products. Caribbean refiners, on the other hand, have a yield pattern of 10 percent gasoline, 11 percent distillate, 60 percent residual, and 19 percent other products.

Electricity production in rural areas is far less dependent upon oil. Only 9 percent of the kilowatt hours produced in the 10 least metropolitan States comes from oil-fired plants. The vast bulk of rural electricity, 38.2 percent, comes from coal and hydropower which furnishes 35.4 percent. FEA's National Energy Outlook for 1976 contends that—

> At current consumption levels, we have enough coal reserves to last at least 300 years.

Therefore, the electricity sources most widely used in rural areas are not subject to the vicissitudes of international energy cartels.

Mr. President, the third major area where urban-rural differences must be assessed relates to motor gasoline. People living in the 10 least metropolitan States consumed 567 gallons of motor gasoline per capita in 1974. This is 31 percent more than that consumed in the 10 most metropolitan States, and 18 percent higher than that for the entire Nation.

Comparisons show that as metropolitan percentages in an area increase gasoline consumption decreases. This is not surprising. Rural people are very dependent upon their automobiles. There are no subways in rural areas. Bus service is sporadic and taxis seldom venture beyond town lines. Mass transit is not a factor in rural life.

A fact not often appreciated by some Federal bureaucrats is that most people living in rural areas are not farmers, and that even among farm families, USDA estimated in 1971 that off-farm income represented about 53 percent of the average family's net income.

Readily available gasoline is crucial to making a living in rural areas. A report of the Nationwide Personal Transportation Study reveals that people living in the Nation's unincorporated areas made 34 percent of all automobile trips even though they constituted only 26.5 percent of the population. In addition to making more automobile trips, their trips are longer on the average. The average trip in the unincorporated areas was 11.0 miles, 28 percent higher than the 8.6 miles recorded for incorporated places.

Rural people have to make more trips because basic social services are not readily available to them. My own State of Vermont has 9 of its 14 counties classified as "hinterland" counties because of the absence of crucial health care and marketing facilities. Vermonters, like rural people elsewhere, have to travel great distances for their basic services. Eighty percent of Vermonters require their cars to get back and forth to work.

Compounding the distance problem in rural areas is the fact, according to a National Opinion Research Center survey cited in FEA's Project Independence Report:

> That the used cars the poor will be buying for the new decade will be the gas guzzlers of

the last few years. Thus, gasoline consumption of rural poor may actually increase over the next few years even though the price may rise.

Obliged to travel great distances for their employment and their social services in automobiles which are not fuel-efficient, rural residents are at a serious disadvantage. As if these problems were not bad enough, the rural resident has to face another crisis—the "pullout" of major gasoline marketers from rural areas.

During the 1960's when gasoline was abundant, a number of major gasoline companies sought to expand their retail outlets by moving into rural areas. This was particularly true of marketers moving beyond their "historic" retail areas. With the energy crunch, many of these marketers decided to pull out of areas far removed from their historic markets and great distances away from their refineries. Others want to concentrate their retail efforts in the more highly profitable urban markets. The areas hardest hit by these pullouts will be rural ones.

In order to slow this process, I recently introduced legislation which would require that companies anticipating pullouts give sufficient notice to the Governor of the State involved so that alternate suppliers can be sought and gas availability to rural areas continue uninterrupted.

While this would be an important step, it would constitute only a short-range solution to the ongoing problems of getting adequate gasoline stocks to the rural areas.

If the Nation is truly committed to a balanced national growth policy, then insuring that adequate and economical motor gasoline is available to rural areas for agricultural and developmental purposes must have a high priority.

Mr. President, given the ever-mounting pressure for a more comprehensive conservation policy, it is important that Congress not take precipitous action which can create long-range harm.

Much of the conservation effort to date has focused upon reduction of motor gasoline consumption. I support this effort wholeheartedly in the area of requiring auto manufacturers to make more energy-efficient automobiles.

However, there are other aspects to the gasoline problem which have not been fully addressed. It appears as if the major thrust for reducing the consumption of gas is to free up the availability of crude oil for the production of residual fuel for industrial purposes.

My study of petroleum consumption reveals that there is no rural-urban difference in the per capita consumption total of motor gasoline and residual fuel combined. The 10 most metropolitan States had a per capita consumption of 742 gallons of residual and gasoline combined in 1974, while the 10 least metropolitan States had a per capita consumption of 735 gallons.

The problem arises from the fact that while the urban consumption is roughly balanced between gasoline and residual in rural areas three times as much gasoline is consumed as residual.

What this means simply is that any conservation effort which seeks only to reduce motor gas consumption in order to create greater supplies of residual fuel is an urban solution. Rural areas will not benefit from the increased availability of residual fuel. In fact, they will be hurt by the decrease in the available supply of gasoline.

Decisions as to whether to use crude oil for residual fuel or for motor gasoline raise fundamental questions about the future of American lifestyles.

This is not the only example of how "urban" solutions to the energy crisis may seriously harm rural citizens. Another involves the purchase of vast quantities of liquefied petroleum gases by industrial firms to compensate for natural gas shortages. Liquefied petroleum gases are crucial for agricultural production, particularly for crop drying. However, with shortages of natural gas in many industrial areas, liquefied petroleum gas is being purchased to cover the shortages. Too often agricultural producers have been outbid for the available supply.

Once again we may see the competition between urban and industrial interests on one side and rural and agricultural ones on the other. And it does not always seem as if those who make energy policy — including the Congress — are wholly mindful of this competition or of the potential hazards which it portends.

Mr. President, the energy crisis alerted Americans to the fact that virtually every aspect of our existence relates in some way to energy. Whether it be our jobs, our heating, our electricity, our transportation, or even our food, the availability of energy affects us all.

Rural Americans, no less than other citizens, have pressing and critical energy needs. Now is the time to create an agency which will assess those needs and to serve as an advocate for rural people and agricultural interests in the councils of Government.

Therefore, on behalf of Mr. STAFFORD, Mr. PEARSON, Mr. HUMPHREY, Mr. MATHIAS, Mr. MCGOVERN, Mr. HUDDLESTON, Mr. ABOUREZK, Mr. STEVENS and myself, I am today introducing legislation which would create within the Department of Agriculture a Rural Energy Office, charged specifically with the responsibility of assessing the fuel and energy needs of rural America.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 268

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Rural Energy Office Act of 1977".

ESTABLISHMENT OF OFFICE

SEC. 2. (a) There is established within the Department of Agriculture an office to be known as the Office of Rural Energy Assessment and Development (hereinafter in this Act referred to as the "Office").

(b) There shall be at the head of the Office a Director who shall be appointed by the Secretary of Agriculture. The Director shall be assisted by an Assistant Director and a staff composed of a sufficient number of economists, statisticians, computer experts, and engineers to conduct the duties of the Office in a timely, efficient, and professional manner.

(c) The Director shall be subject to the supervision and control of the Secretary of Agriculture.

DUTIES OF OFFICE

SEC. 3. (a) The Office shall be responsible for identifying, locating, developing, classifying, and compiling data pertaining to all fuel and other energy needs of people of the United States residing in—

(1) areas outside standard metropolitan statistical areas; and

(2) areas within standard metropolitan statistical areas which are unincorporated or are specified by the Bureau of the Census, Department of Commerce, as rural areas.

(b) Information needed to carry out the duties specified in subsection (a) shall be obtained through independent development by the Office and through the solicitation of information from other governmental agencies at the Federal, State, and local levels, and from private entities.

(c) The Office shall, using the authority and information described in subsections (a) and (b), submit to the Congress, no later than February 15 and September 15 of each year, a report containing a detailed accounting of the findings and conclusions of the Office with respect to the following subject matters as they pertain to the needs of people residing in the areas described in subsection (a):

(1) the heating and cooling of residential dwelling units, especially with regard to—

(A) the methods and sources of heating and cooling existing dwelling units;

(B) anticipated new construction of dwelling units;

(C) energy sources which could be used in heating and cooling such newly constructed units; and

(D) the possibilities of converting existing dwelling units to heating and cooling systems which can be produced but are not widely used;

(2) transportation, especially with regard to—

(A) gasoline for motor vehicles used primarily on highways, including a specification of—

(i) amounts and retail prices of such gasoline;

(ii) the approximate number and location, by State, of existing retail outlets; and

(iii) anticipated changes in the marketing and availability of (and demand for) gasoline, anticipated responses to the changes, and the potential effect of research on these changes;

(B) all fuel, diesel and otherwise, available for farm equipment used primarily in areas other than highways, including a specification of the factors referred to in clauses (i) through (iii) of subparagraph (A) of this paragraph; and

(C) existing availability of intercity and intracity public transportation and the feasibility of expanding such transportation;

(3) the production of agricultural commodities, especially with regard to—

(A) the amount of liquified petroleum gases consumed in the production of various agricultural commodities;

(B) the amount of petrochemicals, fertilizers, and related byproducts consumed in the production of various agricultural commodities;

(C) the marketing and related costs involved in the production and transportation of agricultural commodities; and

(D) the amount of energy used to produce agricultural commodities on different-sized farms;

(4) energy needs of businesses and industries, especially with regard to—

(A) maintaining existing business and industry in rural areas;

(B) attracting new business and industry to such areas; and

(C) comparing the degree of dependence of such industry and business on conventional and on alternative sources of energy with the degree of dependence of urban industry and business on each such source;

(5) sources of electricity, especially with regard to—

(A) existing sources;

(B) short- and long-range anticipated needs for electricity;

(C) short- and long-range projected conversions from electrical to other sources of energy, including nuclear and solar energy;

(D) short- and long-range plans concerning the location of nuclear plants; and

(E) the estimated costs (in 3, 5, and 10 year intervals) of utilizing existing sources of electricity, meeting anticipated needs for electricity, converting from electricity to other sources of energy, and establishing nuclear plants;

(6) conservation of energy, especially with regard to—

(A) the extent of existing programs designed to conserve energy; and

(B) the potential for developing new programs of conservation and the costs thereof, especially with regard to encouraging self-sufficiency by utilizing wood, solar energy, wind, and water to supply alternate sources of energy; and

(7) energy research and development, especially with regard to locating, identifying, developing, and providing information on alternate fuels and the potential use of energy technologies which have not been fully developed or widely utilized.

(d) The report submitted pursuant to subsection (c) shall be provided, by the Office, to the Committees on Agriculture, Interior and Insular Affairs, Interstate and Foreign Commerce of the House of Representatives, the Committees on Agriculture and Forestry, Interior and Insular Affairs, and Commerce of the Senate.

Such committees shall cooperate in publishing and making available to the public every six months a document containing the information provided them by the Office in its most recent report.

PENALTY FOR FAILURE TO SUBMIT REPORT ON TIME

SEC. 4. If the Director of the Office fails to submit to the Congress the report described in section 3(c) on or prior to the date on which the report is required to be submitted, the Director shall be assessed a civil penalty of $1,000 for each day in the period beginning on the day after the date on which the report is to be submitted and ending with the day preceding the day on which the report is submitted, except that no civil penalty shall be imposed (1) with regard to any report for which no funds have been appropriated, or (2) with respect to any day during any period specified by a resolution approved by the Committee on Agriculture of the House of Representatives and by the Committee on Agriculture and Forestry of the Senate as an extension period for the submission of the report. This subsection shall be enforced by the Attorney General of the United States through a civil action filed and litigated on behalf of the United States in the District Court of the United States for the District of Columbia against the individual who is the Director of the Office during the period for which the civil penalty is assessed. No Federal funds may be expended with regard to the payment of such civil penalty.

REGULATIONS OF OTHER AGENCIES

SEC. 5. (a) The Administrator of the Federal Energy Administration, the Administrator of the Energy Research and Development Administration, the Administrator of the Federal Highway Administration, and the Chairman of the Federal Power Commission shall submit to the Secretary of Agriculture a copy of any regulation proposed to be issued by such Administration or Commission, as the case may be, which relates to any energy matter referred to in this Act. Any such proposed regulation shall be submitted to the Secretary of Agriculture not less than 60 days prior to promulgation thereof.

(b) The Secretary of Agriculture shall submit to the Administrator or Chairman from whom any proposed regulation is received such comments and recommendations regarding such proposed regulation as the Secretary deems appropriate, taking into consideration the potential impact such regulation may have on rural areas.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 6. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

EXPIRATION OF OFFICE

SEC. 7. The Office and the provisions of this Act shall expire five years after the date of enactment of this Act.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the bill introduced by the Senator from Vermont (Mr. LEAHY) for himself and others relative to creating a Rural Energy Office within the Department of Agriculture be jointly referred to the Commitees on Agriculture and Forestry, Banking, Housing and Urban Affairs, Commerce, and Interior and Insular Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered, and the bill will be jointly referred.

By Mr. PEARSON:

S. 269. A bill to provide additional emergency credit for farmers and ranchers and to expand existing credit, and emergency credit authority available to farmers and ranchers under the Consolidated Farm and Rural Development Act; to the Committee on Agriculture and Forestry.

EMERGENCY FARM CREDIT ACT OF 1977

Mr. PEARSON. Mr. President, I introduce the Emergency Farm Credit Act of 1977 today providing additional sources of credit to farmers caught up in a severe economic crunch.

During the past few weeks I have had the occasion to talk to a number of bankers and farmers across Kansas. As a result of these conversations it is clear to me that unless some additional credit is made available very soon, the banks will find it necessary to foreclose on a significant number of farmers. I think this is quite unacceptable and I think much of it can be prevented. The legislation I introduce today addresses this problem but I am sure there are other steps and alternatives that might be considered. Whatever the case, I hope that we will be able to move ahead very quickly on this matter because if I am reading the conditions correctly, time is short.

Mr. President, title I of the Emergency Farm Credit Act of 1977 provides a new source of loan authority through 1978. Under this authority farmers would be able to obtain loans of up to $350,000. This section is patterned after the 1974 act that Congress created to provide some special help to livestock producers. However, we have made an effort to improve the mechanics of this program because I know there have been some problems in the administration of the 1974 act.

Title II of the Emergency Farm Credit Act of 1977 would make some permanent changes to the Consolidated Farm and Rural Development Act. First of all, the present ceiling of $50,000 on operating loans would be increased to $100,000. This figure much more accurately reflects the present credit needs.

Second, the maximum total real estate debt ceiling for farm ownership loans would be increased from $225,000 to $325,000. The Farmers Home Administration's share of the farm ownership loan would be increased from the present $100,000 to $150,000.

Third, the Farmers Home Administration would be authorized to make direct loans and guaranty loans to partnerships and family farm corporations. The agency is now prevented from doing this and this has been an impediment which seems to me quite unnecessary.

Mr. President, the present credit crunch facing the agriculture community stems from the longer range problem of soaring costs and falling prices. Congress will be addressing this more fundamental problem in the months ahead as we rewrite the farm program. In the meantime, I believe we must come to grips quickly with this growing credit problem before it results in bankruptcy of too many of our family farmers.

By Mr. KENNEDY (for himself, Mr. ABOUREZK, Mr. BAYH, Mr. BROOKE, Mr. CHURCH, Mr. DURKIN, Mr. FORD, Mr. HUMPHREY, Mr. JAVITS, Mr. MATHIAS, Mr. MAGNUSON, Mr. METCALF, Mr. PELL, Mr. RIBICOFF, and Mr. WILLIAMS):

S. 270. A bill to amend chapter 5 of title 5, United States Code (commonly known as the Administrative Procedure Act), to permit awards of reasonable attorneys' fees and other expenses for public participation in Federal agency proceedings, and for other purposes; jointly, by unanimous consent, to the Committees on Government Operations and the Judiciary; and the second committee to report the bill after the first committee reports said bill.

PUBLIC PARTICIPATION IN FEDERAL AGENCY PROCEEDINGS ACT OF 1977

Mr. KENNEDY. Mr. President, today Senator MATHIAS and I are reintroducing the Public Participation in Federal Agency Proceedings Act, designed to promote increased public participation in proceedings before Federal agencies. Senators ABOUREZK, BAYH, BROOKE, CHURCH, FORD, HUMPHREY, JAVITS, MAGNUSON, METCALF, PELL, RIBICOFF and WILLIAMS have joined as cosponsors of this bill. Companion legislation is also being introduced in the House of Representatives by Congressmen RODINO and KOCH.

The legislation we are proposing will encourage and support the involvement of citizens who do not have direct or substantial economic interests in the outcome of agency proceedings or in court actions for review of agency decisions, but who seek to raise significant issues of public concern which must be fully considered by the agencies and the courts. To accomplish this, the bill authorizes Federal agencies to make awards

of reasonable attorneys' and expert witness' fees, and other reasonable costs of participation, to persons the agencies deem capable of making substantial contributions to a fair resolution of the issues involved in agency proceedings, but who are financially unable to sustain the costs of such participation. The bill further authorizes Federal courts to make discretionary awards of reasonable fees and costs in lawsuits for review of agency decisions, where a plaintiff both prevails and the court determines that the bringing of the action served an important public purpose. The bill also authorizes funds to be appropriated for these purposes during the next 3 fiscal years—on an experimental basis—for the agencies and courts.

The legislation we are introducing today embodies a mechanism that has already been adopted in a number of regulatory contexts at the State and Federal levels. The Regional Rail Reorganization Act of 1973 created an Office of Public Counsel within the Interstate Commerce Commission with the authority to retain outside counsel to represent communities threatened with loss of rail service. The Magnuson-Moss Federal Trade Commission Improvement Act of 1975 authorized the FTC to provide compensation to citizens for participation in rulemaking proceedings. And, just 4 months ago, Congress authorized the Environmental Protection Agency to award fees in proceedings conducted under the Toxic Substance Control Act. Our bill would extend this authority to all agencies of the Government, to be utilized in all rulemaking, ratemaking, licensing, and certain other agency proceedings.

The bill's provisions authorizing courts to award fees in successful actions for review of agency decisions have more extensive legislative precedents. Over 50 Federal laws already provide that parties who manage to compel governmental compliance with congressionally articulated national policies should be awarded attorneys' fees. The Voting Rights Extension Act, the Freedom of Information Act amendments, the Privacy Act, the Toxic Substances Control Act, the Government in the Sunshine Act, and the Civil Rights Attorneys' Fees Awards Act are among the newest of these statutes. Each contains explicit authority for courts to make discretionary awards of attorneys' fees to successful litigants, consistent with recent Supreme Court rulings.

Extensive hearings on this proposal were conducted during the second session of the 94th Congress before the Committee on Government Operations, chaired by Senator RIBICOFF, and before my own Subcommittee on Administrative Practice and Procedures. The bill (S. 2715) was reported by the Judiciary Committee in May of last year (S. Rept. 94–863), but, regrettably, the Senate was unable to take action on it by the time we adjourned in early October.

Mr. President, no American can escape the reach and impact of the activities of the Federal Government. Federal agencies have devised regulations which touch upon virtually every aspect of our lives—in the marketplace and in the home. The Food and Drug Administration is supposed to police the safety and effectiveness of the drugs we take, and the cleanliness of the food we eat. The Department of Agriculture sets the prices we pay for many farm products. The Civil Aeronautics Board determines what airlines can fly to which cities and how much they can charge travelers. The Federal Power and Nuclear Regulatory Commissions decide whether powerplants can be built in our communities. The Department of Transportation determines where highways are built, how safe our automobiles must be, and whether supersonic airplanes are to fly over our cities. The Consumer Product Safety Commission sets the manufacturing standards for everything from bicycles, to mattresses, to fireworks. The Federal Trade Commission is supposed to prevent deceptive advertising practices and monopolistic agreements in industry. The Federal Communications Commission regulates every aspect of our communications systems; and the Interstate Commerce Commission controls how our goods are shipped, and whether rail service to our communities is to be terminated. The list is endless.

Yet most Americans feel powerless to affect the course of agency decisions. They know they have little voice in how, or even if, these pervasive regulations should be developed. They are confused, intimidated, and often angry about Government's increasing influence in their lives. Many are convinced that the regulatory system is out of hand, that the protection it affords the public from the kinds of abuses agencies were originally intended to prevent is more than outweighed by the unwarranted intrusions into their lives that have resulted. Calls for reform are being heard with increasing frequency, and from almost every segment of our society.

Congress has now begun the difficult task of reexamining the nature and scope of the administrative process, and it is likely to effect far-reaching changes in the system. Extensive regulation of certain industries may no longer be necessary or appropriate; regulation in other areas may be streamlined considerably. It is clear, though, that despite the changes which must eventually come, Government involvement in many areas will remain—and for good and valid purposes. Unless Congress acts to open up the decisionmaking processes in areas which remain subject to governmental regulation, the patterns of citizen powerlessness to affect agency determinations will continue.

The value of public involvement in agency proceedings is no longer open to debate. In the last 8 years there have been over 25 hearings in Congress focusing upon the need to foster greater public participation in the administrative process. The extensive record of these hearings and the hearings on S. 2715 conducted last year leads to one inescapable conclusion: without increased citizen participation, our regulatory system cannot function properly. Agency lethargy, unresponsiveness, conflict-of-interest, cooption by some of the very interests they are supposed to regulate, and outright hostility to the "public interests" agencies are charged with protecting—indeed, all the negative consequences of closed governmental processes—have been documented at length. While there have been some recent improvements in agency performance, the roots of these problems have yet to be addressed in a responsible and comprehensive fashion.

The agencies themselves were once thought to embody—and to provide advocacy for—the broadest interests of the general public. But this assumption is no longer valid. Eleven years ago, Judge—now Chief Justice—Burger stated the issue clearly in a case involving an FCC license renewal:

> The theory that the Commission can always effectively represent the listener interests . . . without the aid and participation or legitimate listener representatives fulfilling the role of private attorneys general is one of those assumptions we collectively try to work with so long as they are reasonably adequate. When it becomes clear, as it does to us now, that it is no longer a valid assumption which stands up under the realities of actual experience, neither we nor the Commission can continue to rely on it.

In recent years, the courts have gone to significant lengths in expanding the right to intervene in agency proceedings and to seek judicial review of agency decisions, by relaxing the stringent requirements for standing that had previously been established. No longer is it necessary for prospective intervenors to prove that they have legally protected interests or even an economic stake in the outcome of a proceeding, before they are permitted to intervene. Standing today is approached through such inquiries as to whether an intervenor is "aggrieved in fact" by a prospective agency decision, or whether it represents an interest that is "arguably within the zone of interests to be protected or regulated by the statute or constitutional guarantee in question."

These developments in the law were no accident. The courts have recognized, inevitably, that in order for Federal agencies to fulfill their statutory mandates to protect the public interest, they must have input from the public in direct and meaningful ways.

Public involvement to date, however, has been unable to provide the far-reaching Federal bureaucracy with sufficient input on matters intimately, and often adversely, affecting the public interest. The reason is clear. Even where the public has a legal right to participate in agency proceedings, its ability to do so has been severely impaired by the enormously high costs of participation. Thus, it is abundantly clear that the focus has now shifted from the judicial struggle to create a right of public intervention to the emerging congressional consensus that we must now act to make that right a reality.

In the end, however, we cannot hope to free agencies from an inevitably industry-oriented perspective unless we provide for the regular presentation of the public's views in everyday agency decisionmaking. One way to do this is through an institutional advocate—either inside or outside the agency. The

Postal Rate Commission, the Railroad Passenger Service Corporation, and the Civil Aeronautics Board have in-house public advocates. The Agency for Consumer Advocacy would promote just this kind of independent advocacy of the consumer interests before all Federal agencies. I fully support these institutional public interest representatives. In fact, 5 years ago I proposed the establishment of a Public Counsel Corporation, a wholly independent public corporation to undertake advocacy in administrative proceedings of interests not otherwise represented.

There can be no dispute as to the importance of the governmental public advocate approach in providing the kind of sustained, indepth legal and technical expertise needed for effective presentations of public views. At the same time, however, we should recognize that there are some inherent limitations to this approach. A public counsel cannot, by himself, be expected to provide advocacy for the full range of citizens' interests that are affected by agency actions. No such office or individual could have the resources or the capability of performing a task of this magnitude. As a consequence, public confidence in the ability of a public advocacy agency to protect adequately the interests of all citizens could well be diminished—and the agency's overall effectiveness curtailed—if its very existence raises expectations which cannot be fulfilled. Direct representation of citizens' interests by citizens themselves in proceedings where a public advocacy agency may not be involved is therefore an important complement to the effectiveness of that agency itself.

While S. 2715 was not enacted into law during the last session of Congress, the debate it engendered prompted several agencies of the Government to institute compensation programs of their own, modeled along the lines of the bill. In a letter to Congressman JOHN E. Moss, chairman of the Subcommittee on Oversight and Investigations of the House Committee on Interstate and Foreign Commerce, the Comptroller General expressed his view that numerous agencies—particularly the Federal Communications Commission, Federal Trade Commission, Federal Power Commission, Interstate Commerce Commission, Consumer Product Safety Commission, Securities and Exchange Commission, Food and Drug Administration, Environmental Protection Agency, and the National Highway Traffic Safety Administration—already had inherent statutory authority to provide compensation to impecunious participants in their proceedings.

In November 1976, the consumer Product Safety Commission decided to institute a compensation program to aid participants in its proceedings. In addition, the Food and Drug Administration and the Civil Aeronautics Board have recently initiated rulemaking proceedings to determine whether to establish compensation programs of their own.

Other agencies, however, have exhibited greater reluctance to assist public groups which could contribute significantly to their proceedings. The Federal Power Commission, for example, decided over a year ago that it would not provide reimbursement to indigent public intervenors in its powerplant siting proceedings unless specifically authorized to do so by Congress. That decision, however, was overturned just last month by the U.S. Court of Appeals for the Second Circuit (*Greene County Planning Board v. FPC*), which held that—

> Public hearings are integral to the functioning of an agency such as the FPC, and authorization for reimbursement of indigent intervenors who make important contributions in these hearings can reasonably be found in the agency's general statutory mandate.

The Nuclear Regulatory Commission is another agency that has sought to deny financial assistance to indigent public intervenors, especially in its nuclear plant siting proceedings. After a 2-year rulemaking proceeding, the Commission finally decided at the end of last year that it lacked the authority to provide such assistance. Citing language in a decision by the Comptroller General issued 10 months earlier, which held that awards of compensation to public intervenors in licensing proceedings are appropriate where such participation is essential to dispose of the issues involved, the Commission ruled that it was without such authority since it could always make the required determinations without public participation.

In its efforts to preclude meaningful public participation in its proceedings, the NRC was clearly grasping at straws. In an opinion issued December 3, 1976, holding that the Food and Drug Administration had the authority to provide direct financial assistance to participants in its proceedings, the Comptroller General went out of his way to clarify that part of his earlier NRC decision which the Commission had seized upon as the basis for denying applications for assistance:

> While our decision to NRC did refer to participation being "essential", we did not intend to imply that participation must be absolutely indispensable. We would agree . . . that it would be sufficient if an agency determines that a particular expenditure for participation "can reasonably be expected to contribute substantially to a full and fair determination of" the issues before it, even though the expenditure may not be "essential" in the sense that the issues cannot be decided at all without such participation.

This latest decision by the Comptroller General indicates that the test embodied in the legislation I am introducing today—the substantial contribution test—is a valid basis for determining an agency's authority to provide direct financial compensation in its proceedings.

The protracted fight over the NRC's ability to make these kinds of awards underscores the importance of enacting this legislation now. The public simply cannot be required to wait while each agency of the Federal Government undertakes lengthy rulemaking proceedings to determine whether they in fact have the authority that the Comptroller General says they already have, or how to exercise that authority. It is an unfortunate reality that those agencies who have demonstrated hostility to the concept of effective public participation in their proceedings may be able to delay adoption of compensation programs for years, and the regulations that they finally do adopt may be severely restrictive.

The Comptroller General has also stated, Mr. President, that congressional action to define clearly the types of proceedings in which direct financial assistance would be appropriate, as well as the kinds of persons which ought to receive such awards, would be extremely helpful. He is right; we should act. The legislation I propose today is designated to clarify the authority of Federal agencies to provide assistance to public participants in their proceedings, and would establish the criteria to govern such awards. Unless Congress acts to provide explicit guidance to the agencies, the present confusion will continue unabated.

The bill I am submitting embodies two primary components: Provisions governing attorney fee awards in agency proceedings, and those governing awards in civil actions to secure review of agency decisions.

Section 2 sets forth the standards and criteria for the agency component. It provides for awards of reasonable attorneys' fees, expert witness fees, and other reasonable costs of participation in any rulemaking, ratemaking, or licensing proceeding, and in certain other proceedings where public participation promotes a full and fair determination of the issues involved in the proceeding.

A person or group would qualify for fees and costs where it can substantially contribute to a fair determination of the proceeding, taking into account the number and complexity of the issues presented, the importance of widespread public participation, the need for representation of a fair balance of interests and whether or not the person represents an interest that is not otherwise adequate represented. The person would also have to demonstrate that he has a small economic interest in the outcome of the proceeding compared to the costs of participation, or that he lacks the resources to participate without compensation. The agency would decide who should receive awards, when there should be a consolidation of petitions to avoid duplication of effort, and how funds should be allocated among eligible participants when they are insufficient fully to compensate them all.

Payment of all fees and costs under this section is to be made within 90 days of any final decision or order. Special advancements may be made where a person establishes that his ability to participate will be severely impaired by failure to receive funds prior to the conclusions of the proceeding, and substantially contribute to a full and fair determination of the proceeding. Another important feature is the requirement that all awards of fees and costs be based on prevailing market rates for the kind of quality of the service rendered. The bill does, however, establish maximum limits on

the rates at which attorneys and experts may be paid.

Generally, the agency will reimburse participants eligible for compensation out of agency funds appropriated specifically for this purpose. However, in certain situations the agency may require that a participant's expenses be shifted to the other party. The agency may require a participant to pay some or all of another participant's expenses upon a determination by the agency that the participant has "acted during the course of the proceedings in an obdurate, dilatory, mendacious, or oppressive manner."

Section 3 of the bill embodies the review component. It would strengthen the judicial review provisions of the Administrative Procedure Act by providing for awards of attorneys' fees and other litigation expenses in civil actions to secure review of agency decisions. These would be allowed where the court affords a person the relief sought in substantial measure, or after the filing of such action, the agency affords the person the relief sought in substantial measure. The court must also determine that the initiation and prosecution of such action served an important public interest, and that the person meets the economic interest test set forth in section 2 of the bill, before it can award fees. The awards provided by this section are a necessary complement to the increased public participation in agency proceedings made possible by section 2.

Congress attempted through chapter 7 of the Administrative Procedure Act to insure that the rights established by Federal laws are enforced by, among other things, allowing citizens to challenge administrative actions in court. In the absence of statutory authorizations of attorneys' fees, citizens were often financially able to bring such suits only because the court rewarded them for their efforts by granting them attorneys' fees for acting as "private attorneys general." On May 12, 1975, however, the Supreme Court in the Alyeska Pipeline case severely undercut the ability of the general public to seek judicial review of administrative decisions by ruling that attorneys' fees can no longer be awarded to "private attorneys general" unless Congress specifically provides for such an award by statute. If Congress is to guarantee that the rights which we enact do not exist only in theory, then we must provide the wherewithal for citizens to step in where agencies fail to act, or to challenge agency decisions that violate the law; section 3 would achieve this objective.

Section 4 contains reporting requirements and section 5 a special authorization to provide funds to carry out the provisions of the bill.

I would also point out that the bill we are introducing today differs in several substantive respects from the one reported last year by the Judiciary Committee. I believe these changes significantly strengthen the bill, as they provide clearer directions to the agencies as to how the appropriated funds are to be apportioned among competing applicants, and eliminate the potential for abuse of the provisions of the act by individuals or groups who are not eligible to receive awards.

These changes accomplish the following:

First. Clarify the types of agency activities to which the provisions of the act are to be applied. (Sec. 558a(b)(1)(B).)

Second. Expressly state that the bill does not authorize funds for merely attending, as opposed to participating in, agency proceedings, nor for proceedings where costs are minimal. (Sec. 558a(b)(2)(B).)

Third. Eliminate provisions for funding of class actions in agency proceedings. (Sec. 558a(b)(1)(A).)

Fourth. Emphasize that the bill does not alter present agency rules governing standing. (Sec. 558a(b)(2)(C).)

Fifth. Amend the eligibility test to preclude agencies from funding groups which seek to represent interests which are already adequately represented by a participant other than the agency itself. (Sec. 558(d)(1)(A).)

Sixth. Expressly authorize agencies to require consolidation of duplicative presentations, and to select one or more effective representations, offer compensation only for certain categories of expenses, or compensate jointly persons representing identical or closely related viewpoints. (Sec. 558(f)(2).)

Seventh. Set monetary limits on the rates of compensation at which experts and attorneys can be compensated. (Sec. 558a(f)(6).)

I also want to mention that this proposal has been endorsed by a number of public, private, and governmental organizations, among them the following:

The U.S. Commission on Civil Rights.
Advisory Committee on National Growth Policy Processes of the National Commission on Supplies and Shortages.
Consumer Federation of America.
Bar Association of the City of New York.
J. C. Penney Co.
National Council of Senior Citizens.
The Attorneys General of South Carolina, New Mexico, Florida, and Texas.
The International Ladies Garment Workers Union.
The United Automobile Workers.
The Consumers Councils of Michigan, Rhode Island, Massachusetts, and Arizona.
Public Citizen.
The Oil, Chemical, and Atomic Workers International Union.
Retail Clerks International Association.
Council for Public Interest Law.
Mexican American Legal Defense and Education Fund.
Consumers Union.
Esther Peterson, Consumer Representative, Giant Food Corp.
American Association of Retired Persons.

I believe, Mr. President, that public confidence in our institutions of Government cannot be restored until the American people are able effectively to participate in the Government's decisionmaking processes and to challenge its failure to carry out the law with justice. As chairman of the Senate Subcommittee on Administrative Practice and Procedure, I have attempted over the past 8 years to promote increased citizen involvement in agency activities. Throughout, I have pressed each agency to open its doors to greater public involvement in order to remove many of the legal and procedural hurdles to public intervention. Insofar as Government secrecy makes effective public involvement impossible, I have maintained a continuous effort to remove the curtains of secrecy that surround the conduct of the people's business.

It is clear that removing barriers and opening processes are not enough. If we are really to bring the unrepresented public directly and fully into the governmental processes, we must provide for the Government to shoulder part of the cost. If we are to make judicial review of Government decisions practically available to the public, then courts must be able to shift to Government the costs of litigation. That is what this bill seeks to achieve. Its enactment would breathe life into that public interest standard which has of late grown stale from disuse, and would restore to the practice of our administrative agencies the guiding theory of our legal system.

Mr. MATHIAS. Mr. President, I am pleased again to join today with the Senator from Massachusetts (Mr. KENNEDY) in introducing legislation which would authorize the payment of fees for attorneys and expert witnesses for citizens participating in Federal agency proceedings and seeking judicial review of agency actions.

If enacted, this proposal will provide two significant improvements in the way our agencies of Government function. First, it would allow for greater participation in the administrative process by the general public. It would also move us closer toward the goal of reform of our regulatory agencies by helping to insure that all sides are heard at agency proceedings, thus increasing the responsiveness of Federal decisionmakers to the will of all our people.

In the past decade, our society has greatly benefited from a tremendous growth in the number and effectiveness of nonprofit public interest groups. This legislation will give these groups—and all other public-spirited citizens—far broader input regarding the rulemaking and other procedures of the regulatory agencies which increasingly govern our lives.

Our bill would allow participants in rulemaking, licensing, and other proceedings of Federal agencies to recover their attorneys' fees, expert witness fees, and other costs of participation, up to a reasonable amount. They would be reimbursed when and if the agency itself determines that they represent an interest which makes a substantial contribution to the proceeding.

This legislation is clearly necessary at a time when regulatory agencies exercise more intricate control over our economic life than ever before. In spite of many recent efforts to open up the administrative process to allow citizens to have some influence on Federal agency decisions, most proceedings have little or no public involvement today. The high cost of hiring attorneys and expert witnesses to penetrate the complex layers of issues under agency consideration and of preparing and duplicating materials for presentation to the agencies makes it virtually impossible for most individuals or organizations to participate. Ordinary citizens obviously cannot be expected to

make a contribution under these circumstances unless at least some of their costs are paid by the Government, as this bill would provide.

In the past Congress has frequently sought to insure that the rights established under the laws we passed are enforced by, among other things, permitting citizens to challenge administrative actions in court. In most cases, however, citizens have been able to afford to bring such suits only because the courts often were prepared to grant them attorneys' fees when their cases had merit, under the theory that they in effect acted as "private attorneys general."

More recently, the 1975 Supreme Court decision in the Alyeska Pipeline case has severely undercut the ability of the general public to seek judicial review of administrative decisions. In that case, the Court ruled that attorneys' fees can no longer be awarded to "private attorneys general" unless Congress specifically provides for such an award by statute. That decision makes the legislation we are introducing today all the more necessary. Congress fashioned a partial response to Alyeska when it enacted the Civil Rights Attorneys Fees Awards Act of 1976. But more legislation is needed.

If Congress is in fact to guarantee that the rights which we enact do not exist only in theory, this legislation is needed to assist in paying the enormous legal costs necessary to encourage citizens to step in where agencies fail to act, or to challenge agency decisions which may stray from the appropriate mandate.

This bill would also grant reasonable attorneys' fees to persons who bring civil suits for judicial review of agency action. These fees could be obtained only if the relief sought by the plaintiffs were afforded in substantial measure either by the court itself or by the agency—after the filing of such action—and if the court determined that the plaintiffs served an important public interest.

It is to be hoped, of course, that these issues can be resolved first at the agency level, without the need to resort to court action. A great deal of litigation regarding administrative actions can be avoided in the first instance if we make it easier for citizens to present their viewpoints in administrative procedings before final action is taken.

Again, however, the enormous cost of participation makes it impossible to expect the average citizen to be able to afford to give an agency the additional information that may significantly contribute to an informed and considered decision. This citizen participation is a necessity in almost all Federal agencies, since their jurisdiction and duties are so vast. As long as citizens are not afforded counsel fees for bringing to the attention of administrative agencies an independent viewpoint, there is bound to be little general public participation.

This will be likely to perpetuate one inevitable result: the only interests capable of devoting the substantial resources necessary to participate in these procedings will continue to be those with a large enough direct financial stake in the outcome—namely, the very industries which are supposed to be regulated. Nonprofit public interest groups simply do not have the resources to compete on the same ground.

Former FCC Commissioner Nicholas Johnson has observed from his own experience that citizen participation in the decisionmaking process "is virtually nonexistent," with the "necessary but unhappy result that the FCC is a captive of the very industry it is purportedly attempting to regulate." One need not imply any bad motives in this kind of situation in order to observe the likely outcome when any agency hears primarily from only one side of an issue.

A few illustrations of the difficulty of participating in administrative proceedings suggest why attorneys' fees are necessary. For example, one witness before a Senate Commerce Committee hearing last year pointed out that proceedings initiated by Southern Railway to demonstrate that its proposed rates were not unreasonable for its new "Big John" boxcars "took 4 years, covered 17,000 pages of testimony, and damaged the health of the ICC examiner involved. Many determinations take far longer. The average age of dockets in the CAB in 1960 was 32 months."

When one considers the large number of Federal agencies and the thousands of cases like Southern Railway, it becomes obvious that the average citizen or public interest group cannot be expected to make any kind of relatively important contribution without the potential of an attorneys' fee award.

Expert witnesses, as well as attorneys, are often needed to make an adequate presentation before a Federal agency. Yet they, too, may require a large expenditure of funds. For example, expert witnesses who appear before the Interstate Commerce Commission on behalf of industry representatives often cost as much as $4,000 or $5,000 in an average rate case.

This proposed legislation is modeled after a similar provision in the 1975 Magnuson-Moss Warranty—FTC Improvement Act already passed by Congress. That act authorized a fund of $1 million for participants in FTC proceedings, and the criteria for the award of such funds have now been developed in final regulations adopted by the FTC.

I should also like to stress that this legislation would not provide attorneys' fees automatically to any person or group which intervenes in any agency proceeding. Quite to the contrary, the agency itself would be authorized to determine, under the tight guidelines set down in this bill, whether the public interest was served by such intervention and to award reasonable fees only when the person or group demonstrates to the satisfaction of the agency that they would not otherwise have sufficient resources to participate.

I believe this bill represents a responsible, modest, but significant step in the direction of greater agency responsiveness, and urge my colleagues to join Senator KENNEDY and me in moving this or similar legislation through the legislative process to enactment.

Mr. ABOUREZK. Mr. President, I am pleased to join Senator KENNEDY and Senator MATHIAS as a sponsor of S. 270, the Public Participation in Government Proceedings Act of 1977. I was a sponsor of this same bill when it was introduced in the last Congress as S. 2715 on November 20, 1975, and voted to report the bill from the Judiciary Committee. I am hopeful that this Congress can take action on this important legislation.

I believe firmly that our National Government can fairly reflect the interests of the people only to the extent that the people themselves are allowed and encouraged to participate in the process of government. When citizens actively participate in their Government I do not doubt that the Government will function more effectively and that it will reflect the public interest. Conversely, if the public is not allowed and encouraged to participate, government will grow more remote and unresponsive.

This legislation will make sure that citizens will not be barred from participating in Government proceedings or challenging illegal Government action because they cannot afford the expenses of such participation or challenge.

The people of South Dakota are often frustrated by an unresponsivle bureaucracy in Washington, but do not have the funds to testify at agency proceedings or bring court actions to restrain illegal Government actions. Under this legislation, citizens who petition their Government can be reimbursed for their efforts. For example, attorneys fees could be recovered by farmers bringing suit to invalidate the existing eligibility regulations for drought relief assistance or for the emergency feed and livestock program of the Agricultural Stabilization and Conservation Service. Other farmers could be reimbursed for testifying before the Agriculture Department regarding the proposed rules now pending to implement the Beef Information and Promotion Act of 1976. Fees could also have been awarded for a suit to force the Small Business Administration to promulgate rules to allow farmers to apply for small business loans.

Several features of the bill guarantee that the compensation to be given to citizens and citizens' groups will be well spent. First, the bill allows compensation only to citizens or groups whose participation contributes substantially to a fair determination of a matter pending before the Government and who need the money in order to participate. Second, the agency before which a matter is pending is the body which will determine the eligibility for and amount of any award to a participant. Third, an express limitation on the rate of pay for an expert witness or attorney representing a citizen group before an agency is set in the bill. Fourth, the provisions of the bill will operate for a trial period of only 3 years at which time the Congress must reevaluate its implementation.

In evaluating how this money will be spent to compensate citizens or citizen groups, one must remember that special interest groups who participate in Government proceedings and bring actions challenging agency action are already partially compensated by the Government for their expenses. They simply deduct the amounts as business expense deductions and there are virtually no limits on amounts they can claim. By

compensating citizens and citizen groups for their participation, this bill allows the average citizen to participate on a par with the powerful special interests.

Every American should be encouraged to participate in Government decisionmaking. Adoption of this bill will make this democratic principle a reality for citizens who are presently frozen out of the Government process.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the bill introduced earlier by Senator KENNEDY and others relating to public participation in Federal agency proceedings be referred jointly to the Government Operations Committee and the Judiciary Committee, and that when it is reported by either one of those committees the other committee would have a period of not to exceed 30 days in which to consider it, as was done in the last Congress.

The PRESIDING OFFICER. Without objection, it will be jointly referred.

Mr. KENNEDY. I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 270

A bill to amend chapter 5 of title 5, United States Code (commonly known as the Administrative Procedure Act), to permit awards of reasonable attorneys' fees and other expenses for public participation in Federal agency proceedings, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act shall be cited as the "Public Participation in Federal Agency Proceedings Act of 1977".

SEC. 2. (a) Subchapter II of chapter 5 of title 5, United States Code (relating to administrative procedure), is amended by inserting after section 558 of such title the following new section:

"§ 558a. Attorneys' fees; fees and costs of experts; participation expenses

"(a)(1) The Congress finds that effective functioning of the administrative process of Government requires Federal agencies to seek the views of all affected citizens. In practice, access to the administrative process is frequently an exclusive function of a person's ability to meet the high costs of participation in Government proceedings.

"(2) The purpose of this section is to promote increased public participation in agency proceedings, thereby insuring more effective functioning of the administrative process by enabling all affected persons to secure the representation in agency proceedings to which such persons are entitled. The Congress intends that Federal agencies shall utilize to the fullest extent the authority and funds provided pursuant to this section.

"(b)(1) For the purpose of this section the term—

"(A) 'person' means any person as defined in section 551(2) of this title and includes a group of individuals with similar interests;

"(B) 'proceeding' means any agency process including adjudication, licensing, rulemaking, ratemaking, or any other agency process in which there may be public participation pursuant to statute, regulation, or agency practice, whether or not such process is subject to the provisions of this subchapter.

"(2)(A) This section applies to all rulemaking, ratemaking, and licensing proceedings, and, in addition, to such other proceedings involving issues which relate directly to health, safety, civil rights, the environment, and the economic well-being of consumers in the marketplace.

"(B) This section does not authorize funds for merely attending, as opposed to participating in, agency proceedings, nor for proceedings where the cost of participation is minimal.

"(C) This section does not create any new right to participate in any Federal agency proceeding which is not authorized by other provisions of law.

"(c) Each agency is authorized, in accordance with the provisions of this section, to award reasonable attorneys' fees, fees and costs of experts, and other costs of participation incurred by eligible persons in any agency proceeding whenever public participation in the proceeding promotes or can reasonably be expected to promote a full and fair determination of the issues involved in the proceeding.

"(d) Any person is eligible to receive an award under this section for participation (whether or not as a party) in an agency proceeding if—

"(1) the person represents an interest the representation of which contributes or can reasonably be expected to contribute substantially to a fair determination of the proceeding, taking into account—

"(A) whether the person represents an interest which is not adequately represented by a participant other than the agency itself,

"(B) the number and complexity of the issues presented,

"(C) the importance of public participation, in consideration of the need to encourage participation by segments of the public who, as individuals, may have little economic incentive to participate, and

"(D) the need for representation of a fair balance of interests; and

"(2)(A) the economic interest of the person in the outcome of the proceeding is small in comparison to the costs of effective participation in the proceeding by that person, or whenever the person is a group or organization, the economic interest of a substantial majority of the individual members of such group or organization is small in comparison to the costs of effective participation in the proceeding, or

"(B) the person demonstrates to the satisfaction of the agency that such person does not have sufficient resources available to participate effectively in the proceeding in the absence of an award under this section.

"(e) In any agency proceeding, the agency may require any participant to pay part or all of an award under this section if the agency determines that the participant has acted toward any other participant in an obdurate, dilatory, mendacious, or oppressive manner.

"(f)(1) Upon application for an award under this section, each agency shall make a written determination, giving reasons therefore, of the eligibility of a person for such award, and the amount and computation of such award. The determination required by this paragraph shall be made prior to the commencement of any proceeding in which application for an award is made (or as soon as practicable after such application is filed, if the application is filed after the commencement of the proceeding), unless the agency makes an express written findings that all or any part of such determination relating solely to the amount or computation of such award cannot practicably be made at the time the initial determination is made. The agency shall make such determination after consideration of the maximum amount payable for awards under this section for the proceeding and the requests or possible requests for awards under this section by other eligible participants in the proceeding.

"(2) Whenever multiple applications are submitted, the agency may require consolidation of duplicative presentations, select one or more effective representatives to participate, offer compensation only for certain categories of expenses, or jointly compensate persons representing identical or closely related viewpoints.

"(3) Payment of fees and costs under this section shall be made within ninety days after the date on which a final decision or order disposing of the matters involved in the proceeding is made by the agency, or, if the agency has not made a determination with respect to the amount and computation of an award under subsection (f)(1) of this section by the date of such final decision, within ninety days after the eligible person submits to the agency a statement of fees and costs which it has incurred.

"(4) If an eligible person establishes that the ability of such person to participate in the proceeding will be impaired by failure to receive funds prior to the conclusion of such proceeding, then the agency shall make advance payments to permit the person to participate or to continue to participate in the proceeding.

"(5) A person who receives advance payments pursuant to this section or who the agency determines to be eligible to receive a specified award pursuant to this section shall be liable for repayment of part or all of such payments actually received, or for forfeiture of part or all of the specified award for which such person is determined to be eligible, whenever the agency determines that—

"(A) the person clearly has not provided the representation for which the payments or specified award was made, or

"(B) the person has acted toward any other participant in an obdurate, dilatory, mendacious, or oppressive manner.

"(6) The amount of reasonable attorneys' fees, fees and costs of experts, and other costs of participation awarded under this section shall be based upon prevailing market rates for the kind and quality of the services furnished, except that (A) no expert or consultant shall be compensated at a rate in excess of the highest rate of compensation for experts and consultants paid by the agency involved; and (B) attorneys' fees shall not be awarded in excess of $75 per hour for any such participation unless the agency determines that special factors, such as an increase in the cost of living or limited availability of qualified attorneys for the proceedings involved justify a higher fee.

"(g) A person may bring an action in accordance with chapter 7 of this title for review of a final agency action under this section—

"(1) denying an award or failing to pay an award of fees or costs or both, or

"(2) granting an amount of fees or costs, or both, which is insufficient to enable such person to participate effectively in a proceeding, or

"(3) reimbursing an amount of fees or costs, or both, which is insufficient to compensate adequately such participation

in the appropriate court of the United States having jurisdiction of an appeal from the proceeding in which such person participated or sought to participate, except that no order to stay the proceeding in which application for payment of fees and costs under this section was made shall be entered by that court in such an action.

"(h)(1) Each agency shall, within ninety days after the date of enactment of this section, propose regulations to carry out the provisions of this section. Such regulations shall be adopted by the agency and take effect no later than one hundred and eighty days after the date of enactment of this section.

"(2) The head of each agency to which this section applies shall prepare and transmit to Congress on the date of submission of the President's budget an annual report with respect to the nature and disposition of all pro-

ceedings in which grants of fees and costs pursuant to this section were sought, and which report shall include the amounts sought and awarded in each such proceeding, the computation of such amounts, and the identity of each applicant and recipient.".

(b) The analysis of chapter 5 of title 5, United States Code, is amended by inserting immediately after the item relating to section 558 of such title the following new item:

"558a. Attorneys' fees; fees and costs of experts; participation expenses.".

SEC. 3. (a) Chapter 7 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 707. Attorneys' fees; fees and costs of experts; litigation expenses

"(a) For the purpose of this section, the term 'person' means any person defined by section 551(2) of this title and includes a class of individuals and any individual member of such class.

"(b) Notwithstanding any other provision of law, any party or party intervenor in a civil action or other proceeding for judicial review of agency action under this chapter shall be entitled to recover reasonable attorneys' fees, fees and costs of experts, and other reasonable costs of litigation, including taxable costs, from the United States if—

"(1) the court affords such person the relief sought in substantial measure or, after the filing of such action, the agency affords such person the relief sought in substantial measure;

"(2) the court determines that such action served an important public purpose; and

"(3)(A) the economic interest of the person is small in comparison to the costs of effective participation in the action by that person, or whenever the person is a group or organization, the economic interest of a substantial majority of the individual members of such group or organization is small in comparison to the costs of effective participation in the action, or

"(B) the person demonstrates to the satisfaction of the court that such person does not have sufficient resources available to participate effectively in the action in the absence of an award under this section.

"(c) Reasonable attorneys' fees, fees and costs of experts, and other costs of litigation awarded under this section shall be based upon prevailing market rates for the kind and quality of the services furnished.".

(b) The analysis of chapter 7 of title 5, United States Code, is amended by adding immediately after the item relating to section 706 of such title the following new item:

"707. Attorneys' fees; fees and costs of experts; litigation expenses.".

SEC. 4. The Administrative Office of the United States Courts shall, in accordance with such rules as the Judicial Conference of the United States may prescribe, prepare, and transmit to Congress an annual report on awards of attorneys' fees and litigation expenses against the United States under section 707 of title 5, United States Code. Such report shall contain a list of all civil actions in which such awards were sought, and shall include the amounts awarded in each such action and the identity of each recipient.

SEC. 5. (a) In addition to the sums authorized under subsection (b), and in addition to any funds otherwise available for supporting public participation in agency proceedings, there are authorized to be appropriated for the purposes of carrying out the provisions of the amendment made by section 2 of this Act the sums of $10,000,000 for the fiscal year 1978, $10,000,000 for the fiscal year 1979, and $10,000,000 for the fiscal year 1980. All funds for any fiscal year which are not expended during such year shall remain available for expenditure in succeeding fiscal years for awards of fees and costs in proceedings commenced during such fiscal year.

(b) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of the amendments made by section 3 of this Act for each fiscal year prior to October 1, 1980, and there are authorized to be appropriated, for the fiscal year 1981 and succeeding fiscal years, such sums as may be necessary to satisfy court awards of fees pursuant to the amendments made by section 3 where the action was brought prior to the end of fiscal year 1980.

SEC. 6. The provisions of this Act shall take effect on the date of its enactment, except that—

(1) the amendment made by section 2 shall take effect one hundred and eighty days after such date, but the provisions of the amendment made by such section shall apply to the proceedings in which regulations are required to be issued under section 558a (h)(1); and

(2) the amendments made by section 3 shall apply to any civil action brought after such date of enactment.

By Mr. RANDOLPH:

S. 271. A bill to provide authority to institute emergency measures to minimize the adverse effects of natural gas shortages and curtailments, to provide authority to allocate propane, and for other purposes; to the Committee on Commerce.

S. 272. A bill to require, to the extent practicable, that electric powerplants and major fuel burning installations utilize other than natural gas as their primary energy source in compliance with applicable environmental requirements, and for other purposes; to the Committee on Interior and Insular Affairs.

EMERGENCY NATURAL GAS LEGISLATION

Mr. RANDOLPH. Mr. President, on November 10, 1976, the Federal Energy Administration announced that "natural gas curtailments to end-users under normal weather conditions for the coming winter are estimated at 1.84 trillion cubic feet, an increase of 424 billion cubic feet, or 30 percent over curtailments actually experienced last year."

No curtailments of residential customers was projected for the heating season. However, "some curtailment of commercial customers is projected and—as was the case last year—industrial and electric utility users are expected to receive the largest increases in curtailments."

Commercial curtailments are expected to increase from 4 percent of requirements to 6 percent, industrial curtailments from 19 to 25 percent and electric utility curtailments from 45 to 51 percent.

The final impact on end-users will depend also upon the availability of alternate fuels, supplemental gas, or emergency gas used to offset the curtailments.

Inventories of middle distillates and propane are high as the Nation enters the heating season. But primary stocks of heavy fuel oils are 9 percent lower than last year.

However, projections also show that a prolonged cold weather period could place a temporary local strain on delivery capabilities affecting the availability of propane in Arizona, Georgia, Kentucky, Maryland, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia. Such a situation could also affect availability of middle distillates in Arizona, Kentucky, Tennessee, and West Virginia.

In our State of West Virginia natural gas supplies 21 percent of our energy needs. Over 69 percent of the homes use natural gas. Last year's actual curtailments were 8.1 percent of normal usage. This year, with the unprecedented cold weather across the Nation, conditions have worsened.

Many industries dependent on natural gas have experienced severe curtailments, the largest in the State's history. Among these are the steel and glass industries, which have been forced to lay off workers during the winter months. Further curtailments seem highly probable as set forth in the same letter from Federal Power Commission Secretary Plumb:

Impact of a curtailment of natural gas service upon an industrial user will depend upon whether the user has operational alternate fuel facilities and upon the availability of alternate fuel sources in the area.

The resultant adverse consequences on the economy and employment in West Virginia and Appalachia are obvious. In addition, there are the significant secondary impacts on other industries which depend on manufacturers within this region for materials and supplies.

The FEA anticipates that some customers with no alternative fuel capability in Ohio, Iowa, North Carolina, and Indiana could have problems this winter.

But the major impact of incremental gas curtailments this winter over last winter will be higher costs for alternate fuels used to replace gas curtailment volumes. These additional costs relative to last year, could be from $550 to $650 million across the Nation.

These estimates anticipated normal weather conditions this winter: however, according to the National Oceanic and Atmospheric Administration signs through middle-December indicate a colder than normal winter for the industrial northeast. Early December was 40 percent colder than normal for the Northeast and 60 percent colder than the same period last year. Because of their concern the Federal Power Commission Commissioners wrote the 28 major interstate pipelines emphasizing the "colder than normal" temperatures observed through the middle of December "throughout most of the Nation may have an adverse impact on underground storage controlled or owner operated by interstate pipelines."

The latter requested the pipeline companies to document the following information:

The average systemwide level of curtailments to customers on an actual basis per day in Mcf for the previous 2 weeks and projections for the coming two weeks with a notation of the end-use priority status of the customers being curtailed;

Estimates of underground storage and deliverability including comparisons with last winter, comparisons of actual levels with anticipated levels and withdrawal levels;

Information concerning any significant contingencies which affect supplies;

Surveys of direct industrial and distribution customers on each system to gauge significantly adverse problems such

as production or employment losses brought about by end-user curtailments, and

Suggestions from the pipeline to help alleviate individual systematic emergencies.

As the Federal Energy Administration noted:

The curtailments of natural gas deliveries are symptomatic of a fundamental problem—declining supplies of domestic natural gas. Natural gas production reached its peak in the United States in 1973 when a total of 22.6 trillion cubic feet was produced. Since then, production has declined at a significant rate.

In 1974, natural gas production dropped by 5 percent to 21.6 trillion cubic feet. In 1975, the decline accelerated to 7 percent. And production reached a level of only 20.1 trillion cubic feet. Preliminary data from the Bureau of Mines indicate that a further decline to between 19.5 and 19.9 trillion cubic feet can be expected this year.

Because the existing and potential demand for natural gas is and will be much larger than available supplies, shortages thus will continue to grow. As the December 1974 staff report of the Federal Power Commission concluded:

A significant point that emerges from our analysis is that conventional U.S. gas production has reached its peak and will be declining for the indefinite future. This reverses a long historical record of growth and introduces a new dimension to the gas shortage. It is no longer simply a matter of gas supply failing to meet increased requirements. It means that from here on we must make do with less gas in absolute terms. We see this as inevitable regardless of the size of the U.S. undiscovered natural gas resource base.

The factors contributing to this critical situation were reviewed in my Senate statement on September 13, 1976. The controversy centers on what national price is reasonable for new interstate natural gas production. However, the recent decision by the Federal Power Commission in opinion No. 770 may have rendered legislative action by the Congress on price unnecessary. This recent action represents an exercise of the FPC's authority over interstate natural gas prices, as provided for by law. But emergency legislation still is needed to enable the Federal Power Commission to better cope with anticipated winter curtailments.

On October 22, 1975, the Senate passed S. 2310, the Natural Gas Emergency Standby Act of 1975, by 58 to 32. The Natural Gas Emergency Standby Act of 1975, S. 2310, as passed by the Senate on October 22, 1975, contained the necessary authorities to cope with anticipated shortages. In order to mitigate the anticipated adverse impact on employment similar standby emergency provisions should be enacted at this time. For the most part price relief has been provided by the recent decision of the Federal Power Commission.

A reason for the shortage is that interstate pipelines cannot as a practical matter buy natural gas, except on the Federal domain, because intrastate natural gas can sell at the higher prices. Surplus gas is available in the intrastate market in sufficient quantities to mitigate shortages that would otherwise cause widespread additional unemployment. Legislation needs to provide a priority for the interstate pipeline systems in distress to buy the gas on equal terms with intrastate purchasers. Emergency legislation also should assure maximum production and delivery to essential users and do so without inflating the price of natural gas.

The essential minimum features essential for such legislation were outlined in my September 13, 1976, Senate statement to include the following provisions:

STATEMENT BY SENATOR JENNINGS RANDOLPH

First, the interstate pipelines experiencing curtailments of customers that cannot use alternative fuels, should be given a priority to buy natural gas in the intrastate market, at the same price as intrastate purchasers. All other interstate pipelines also should be able to purchase natural gas at the same price as intrastate purchasers if a priority interstate pipeline is not in a position to purchase the gas.

Second, an interstate pipeline that is not initially determined by the FPC to be a priority purchaser should by application be able to become a priority purchaser if it can demonstrate that without such designation its essential users will be without necessary natural gas supplies.

Third, high priority consumers of interstate natural gas, who are being curtailed, should be authorized to purchase natural gas from intrastate sources at market prices and arrange for its shipment through interstate pipeline systems. This would aid end-users which are unable to secure natural gas at regulated prices for high priority uses from their pipelines. While these end-users might pay more than the regulated interstate price, this authority would provide them with an alternative to shutting down due to lack of gas. Under such an arrangement, the pipeline would operate as a "common carrier" without owning the natural gas.

Fourth, authority should be provided under the Energy Supply and Environmental Coordination Act of 1974 to require electric powerplants and major industrial installations with the capability to use other than natural gas to switch to coal or to oil if environmental requirements permit. The released natural gas can be made available to priority purchasers. In addition, consideration should be given to have the ultimate user of the released natural gas compensate the powerplant or industrial installation for extra costs required to switch and the affected pipelines for possible losses.

Fifth, new natural gas contracts by electric power plants and major industrial installations for boiler purposes should be prohibited.

Sixth, natural gas needed for essential agriculture production should be made available consistent with the goal of substantially limiting overall unemployment and maintaining gas supplies to residential users and to hospitals and services vital to public health and safety.

Seventh, withholding of gas should be discouraged by requiring maximum production and providing that any gas withheld could never be sold at a price higher than that permitted during the emergency period.

Because these authorities are of an emergency character the provisions of the Natural Gas Emergency and Conservation Act of 1977 would be available to grant emergency relief this winter—through March 1977. Such emergency legislation is needed to provide necessary relief for the pipelines in distress. The gas supply posture of the other interstate pipeline systems would be strengthened for the reason stated in the Commerce Committee staff report on S. 2310:

First, at present none of the interstate pipelines are able to purchase natural gas in the intrastate market in competition with intrastate purchasers. Pipelines in distress would be given a priority over other pipelines for buying as in the intrastate market at the same price as intrastate purchasers. But other interstate pipelines also would be able to enlarge their opportunities for buying more natural gas where there is no priority interstate purchaser in position to purchase the gas.

Second, the provisions for maximizing production would enlarge the available supply for all pipelines.

Third, the only diversions of existing supply would be the gas supply for electric utilities who could in fact obtain other alternative fuels. The customer receiving the diverted gas would thus be required to pay any extra costs incurred by the utility required to switch, and any losses incurred by affected pipeline;

Fourth, diversion of natural gas from one pipeline system to another would be permitted except for boiler uses as specified.

These are urgently needed provisions that could be implemented this winter. They would minimize unemployment and assure full domestic food production if enacted.

Unemployment could increase drastically this winter as natural gas curtailments cut into industrial requirements where no substitute fuels are available. Projections for last winter of 6.5 million workers out of work might well be exceeded if we have a cold winter.

Our country cannot afford delay in taking the necessary steps to offset natural gas shortages expected this winter. For these reasons I introduce S. 271, the Natural Gas Emergency and Conservation Act of 1977.

Because of my concern for the wasteful consumption of natural gas for major boiler uses I also introduce S. 272, the Natural Gas Conservation Act of 1977. This provision of the emergency legislation deserves priority consideration; it passed the Senate in the 94th Congress on two occasions in S. 2310 and S. 622, but did not receive final congressional approval.

The measure would amend the Energy Supply and Environmental Coordination Act of 1974 to provide authority to require electric powerplants and major industrial installations with the capability to use other than natural gas to switch to coal or to oil if environmental requirements permit. The released natural gas then could be made available to priority purchases.

Mr. President, I ask unanimous consent that these two bills be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 271

A bill to provide authority to institute emergency measures to minimize the adverse effects of natural gas shortages and curtailments, to provide authority to allocate propane, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 101. This title may be cited as the "Natural Gas Emergency and Conservation Act of 1977".

FINDINGS AND PURPOSES

SEC. 102. (a) The Congress finds and declares that the Nation will suffer severe shortages of natural gas during the heating season from the date of enactment through March 1977. The Congress further finds and declares that such imminent shortages in our Nation's natural gas supply constitute an emergency which can be alleviated by providing for limited exemptions from regulation of natural gas and for the prohibition of the use of natural gas as boiler fuel.

(b) The purpose of this Act is to grant the Federal Power Commission authority to allow natural-gas companies which transport natural gas in interstate commerce with inadequate quantities of natural gas to meet the requirements of their high priority consumers of natural gas to purchase natural gas from sources not in interstate commerce and from other such companies on an emergency basis free from the provisions of the Natural Gas Act (15 U.S.C. 717 et seq.), except for the reporting requirements of such Act; to grant the Federal Energy Administration authority to prohibit the use of natural gas as boiler fuel; and to provide the President with standby authority to allocate propane during periods of actual or threatened severe shortages of natural gas.

DEFINITIONS

SEC. 103. For the purposes of this Act—

(a) The term "natural-gas distributing company" means a person involved in the distribution or transportation of natural gas for ultimate public consumption for domestic, commercial, industrial, or any other use but such term does not include a natural gas company as defined in section 2(6) of the Natural Gas Act (15 U.S.C. 717a(6)).

(b) The term "high priority consumer of natural gas" means an essential user whose supply requirements cannot be served by an interstate pipeline which is a priority interstate purchaser as determined by the Commission.

(c) The term "independent producer" means a person, as determined by the Commission, (1) who is not affiliated with a person engaged in the transportation of natural gas in interstate commerce, and (2) who is not a producing division of such a person engaged in the transportation of natural gas in interstate commerce.

(d) The term "boiler fuel use of natural gas" means the use of natural gas as the source of fuel in a generating unit of more than 25 megawatts rated net generating capacity or in any unit which is part of an electric utilities system with a total net generating capacity of more than 150 megawatts for the purpose of generating electricity for distribution.

(e) The term "propane" means (1) the chemical C_3H_8 in its commercial form whether recovered from natural-gas streams or crude oil refining, (2) C_3H_8 component of raw domestic mixtures containing more than ten percent of such component by weight, and (3) commercial propane-butane mixes containing by weight more than ten percent of propane and not more than five percent of constituents other than propane or butane.

(f) The term "United States" means the States, the District of Columbia, Puerto Rico, and the territories and possessions of the United States.

(g) The term "Administrator" means the Administrator of the Federal Energy Administration.

(h) The term "Commission" means the Federal Power Commission.

(i) The term "essential user" means a user, or a class of users, who satisfies criteria to be established by the Commission, by rule, as indicative of a user for which no alternative fuel is reasonably available and whose supply requirements must be met in order to avoid substantial unemployment or impairment of food production or the public health, safety, or welfare.

EMERGENCY EXEMPTIONS

SEC. 104. Section 7(c) of the Natural Gas Act (15 U.S.C. 717f(c)) is amended by designating the two unnumbered paragraphs thereof as paragraphs (1) and (2), by deleting the period at the end of paragraph (2) as designated hereby, and inserting in lieu thereof the following: ": *Provided further*, That within 15 days after the enactment of the Natural Gas Emergency and Conservation Act of 1977, the Commission shall by regulation exempt from the provisions of this Act, except for reporting requirements, any activities, operations, facilities, or services relating to the transportation, sale and delivery, transfer, or exchange of natural gas from any source, other than any offshore Federal lands, by an independent producer, a natural-gas company which transports natural gas in interstate commerce, a person who transports natural gas in other than interstate commerce, or a natural-gas distributing company to or with a natural-gas company which transports natural gas in interstate commerce which does not have or which under reasonably foreseeable circumstances may not have, a sufficient supply of natural gas to meet the requirements of its high priority consumers of natural gas and which is curtailing during the heating season from the date of enactment through March 1977 pursuant to a curtailment plan on file with the Commission. Exemptions granted pursuant to this proviso shall be for periods of no more than 180 consecutive days. Persons who are exempt under section 1 (b) or (c) of this Act shall not have their exempt status affected in any way by making the sales or deliveries contemplated by this subsection: *Provided further*, That the Commission shall have no power to deny, in whole or in part, recovery by any natural-gas company in its jurisdictional rates of the amount paid by it for natural gas delivered to it pursuant to sales and contracts as described herein, except to the extent that an interstate transporter purchases natural gas from an affiliate at a rate in excess of the price paid by the transporter to nonaffiliated sellers in comparable sales transactions: *Provided further*, That natural gas sold and delivered or transported pursuant to any exemption granted under section 104 of the Natural Gas Emergency and Conservation Act of 1977 shall not be or become subject to the jurisdiction of the Commission because of such sale and delivery or transportation whether or not such sale is a sale for resale in interstate commerce or such transportation is in interstate commerce: *Provided further*, That any contractual provision prohibiting sales or transportation entitled to any such exemption or terminating any other obligations of any gas supply or sales contracts as a result of such sales or transportation shall be unenforceable in respect to any such sale or transportation: *Provided further*, That it shall be a violation of the Natural Gas Act (as amended) for any natural-gas distributing company to charge residential users and small users (as defined by the Commission) rates which reflect any costs incurred by an interstate transporter as a result of purchases of natural gas made pursuant to an exemption granted under this section: *And provided further*, That no first sale of natural gas after enactment and prior to expiration of the Natural Gas Emergency and Conservation Act of 1975 shall be made at a price which exceeds the highest wellhead price (as determined by the Commission) at which natural gas was sold during the period of June 1, 1975, through August 1, 1975, in the State in which such first sale is made.".

PROHIBITION OF USE OF NATURAL GAS AS BOILER FUEL

SEC. 105. (a) The purpose of this section is to continue the conservation of natural gas and petroleum products by fostering the use of coal by powerplants and major fuel burning installations, and if coal cannot be utilized, to provide authority to prohibit the use of natural gas when petroleum products can be substituted.

(b) Section 2 of the Energy Supply and Environmental Coordination Act of 1974 (88 Stat. 246) is amended by—

(1) redesignating subsections (e) and (f) as subsection (f) and (g), respectively;

(2) inserting after redesignated subsection (g)(1) the following new sentence: "Authority to issue orders or rules under subsection (e) of this section shall expire at midnight September 30, 1980.".

(c) Inserting after subsection (d) the following new subsection (e):

"(e)(1) The Administrator may, by order, prohibit any powerplant or major fuel burning installation from burning natural gas if—

"(A) The Administrator determines that:

"(i) such powerplant or installation had on June 30, 1975 (or at any time thereafter) the capability and necessary plant equipment to burn petroleum products;

"(ii) an order under subsection (a) may not be issued, with respect to such powerplant or installation;

"(iii) the burning of petroleum products by such powerplant or installation in lieu of natural gas is practicable;

"(iv) petroleum products will be available during the period the order is in effect;

"(v) with respect to powerplants, the prohibition under this subsection will not impair the liability of service in the area served by the plant; and

"(B) the Administrator of the Environmental Protection Agency has certified that such powerplant or installation will be able to burn the petroleum products which the Administrator has determined under subparagraph (A)(iv) will be available to it and will be able to comply with the Clean Air Act (including applicable implementation plans).

"(2) An order under this subsection shall not take effect until the earliest date the Administrator of the Environmental Protection Agency has certified that the powerplant or installation can burn petroleum products and can comply with the Clean Air Act (including applicable implementation plans).

"(3) The Administrator may specify in any order issued under this subsection the periods of time during which the order will be in effect and the quality (or rate of use) of natural gas that may be burned by a powerplant or major fuel burning installation during such periods, including the burning of natural gas by a powerplant to meet peaking load requirements.

"(4) Conversion to petroleum products pursuant to an order issued under this subsection shall not be deemed to be a modification for the purposes of paragraph (2) and (4) of subsection 111(a) of the Clean Air Act, as amended.

"(5) The Administrator shall exempt from any order issued pursuant to this subsection the burning of natural gas for the necessary processes of boiler startup, testing, flame stabilization, and control uses by a facility.

"(6) The Administrator shall modify or suspend any order issued pursuant to this subsection to the extent necessary to alleviate or prevent any short-term air quality emergencies directly affecting public health, safety, or welfare which would result from electric power outages.

"(d)(1) Within one year of the date of enactment of this title, the Administrator, in conjunction with the Federal Power Commission, shall submit to the Congress a national plan formulated and designed to prohibit or discourage, to the maximum extent practicable by January 1, 1985, the use of natural gas other than for essential uses for which there is no feasible raw material or fuel substitute. Such plan shall include a report and recommendations regarding any

additional statutory authority necessary to prevent such nonessential uses by January 1, 1985.

"(2) In developing such plan, the Administrator shall include an estimate of the increased demand for coal and other alternative fuels that would be the result of the prohibition of the boiler fuel use of natural gas, and shall identify by geographic region of the United States, the location of users currently burning natural gas as a primary source atnd location of users that would be required to use coal or alternative fuels in lieu of natural gas as a result of the prohibition of boiler fuel use of natural gas.".

PROPANE ALLOCATION PROGRAM

SEC. 106. Notwithstanding the provisions of section 4(g) or any other provision of the Emergency Petroleum Allocation Act of 1973, as amended, the regulations promulgated by the President under section 4 of such Act and the authority of the President under such Act shall, with respect to propane and butane, remain in effect until midnight April 4, 1978.

EMERGENCY PURCHASES BY CURTAILED CONSUMERS

SEC. 107. (a) The purpose of this section is to allow curtailed high priority consumers of natural gas to purchase natural gas from the intrastate market by enabling them to arrange for the transportation of such gas by regulated interstate pipeline companies.

(b) The provisions of the Natural Gas Act shall not apply to the use of the facilities of a natural gas distributing company for the transportation of natural gas produced by an independent producer from lands, other than any land or subsurface area within the Outer Continental Shelf as defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)), and sold by such a producer directly to a high-priority consumer of natural gas: *Provided*, That the rates applicable to the use of such facilities for the transportation of natural gas described in this subsection are subject to regulation by a State commission. The transportation of natural gas exempted from the provisions of the Natural Gas Act by this subsection is hereby declared to be a matter primarily of local concern and subject to regulation by the several States. A certification from such State commission to the Commission that such State commission has regulatory jurisdiction over rates and service of such person and facilities and is exercising such jurisdiction shall constitute conclusive evidence of such regulatory power or jurisdiction.

(c) Pursuant to the substantive and procedural provisions of this section the Commission may in its discretion issue a certificate of public convenience and necessity upon filing of an application by a natural-gas company to transport natural gas produced by independent producers from lands, other than any land or subsurface area within the Outer Continental Shelf as defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)), and sold by such producers directly to existing high-priority consumers of natural gas whose current supply of natural gas is curtailed due to natural-gas company curtailment plans on file with the Commission: *Provided, however*, That in issuing a certificate pursuant to this subsection, the Commission need not review or approve the price paid by a high priority consumer of natural gas directly to an independent producer.

EXPIRATION DATE

SEC. 108. (a) This Act shall expire on midnight April 4, 1978.

(b) The expiration of this Act and the authority granted under this Act shall not affect any action or pending proceedings not finally determined on the date of such expiration, or any action or proceeding based upon any act committed prior to such date.

S. 272

A bill to require, to the extent practicable, that electric powerplants and major fuel-burning installations utilize other than natural gas as their primary energy source in compliance with applicable environmental requirements, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 101. This Act may be cited as the "Natural Gas Conservation Act of 1977".

SEC. 102. (a) Section 2(f) of the Energy Supply and Environmental Coordination Act of 1974 (88 Stat. 246) is amended by inserting after subsection (d) the following new subsection (e):

"(e)(1) The Federal Energy Administrator may, by order, prohibit any powerplant or major fuel-burning installation from burning natural gas if—

"(A) the Administrator determines that—

"(i) such powerplant or installation had on June 30, 1975, or at any time thereafter, the capability and necessary plant equipment to burn petroleum products;

"(ii) an order under subsection (a) may not be issued, with respect to such powerplant or installation;

"(iii) the burning of petroleum products by such powerplant or installation in lieu of natural gas is practicable;

"(iv) petroleum products will be available during the period the order is in effect;

"(v) with respect to powerplants, the prohibition under this subsection will not impair the reliability of service in the area served by the plant; and

"(B) the Administrator of the Environmental Protection Agency has certified that such powerplant or installation will be able to burn the petroleum products which the Federal Energy Administrator has determined under subparagraph (A)(iv) will be available to it and will be able to comply with the Clean Air Act (including applicable implementation plans).

"(2) An order under this subsection shall not take effect until the earliest date the Administrator of the Environmental Protection Agency has certified that the powerplant or installation can burn petroleum products and can comply with the Clean Air Act (including applicable implementation plans).

"(3) The Federal Energy Administrator may specify in any order issued under this subsection the periods of time during which the order will be in effect and the quantity (or rate of use) of natural gas that may be burned by a powerplant or major fuel burning installation during such periods, including the burning of natural gas by a powerplant to meet peaking load requirements.".

PROHIBITION OF NATURAL GAS FOR BOILER FUEL USES

SEC. 103. (a) Within one year of the date of enactment of this title, the Administrator, in conjunction with the Federal Power Commission, shall submit to the Congress a national plan formulated and designed to prohibit or discourage, to the maximum extent practicable by January 1, 1985, the use of natural gas other than for essential uses for which there is no feasible raw material or fuel substitute. Such plan shall include a report and recommendations regarding any additional statutory authority necessary to prevent such nonessential uses by January 1, 1985.

(b) In developing such plan, the Administrator shall include an estimate of the increased demand for coal and other alternative fuels that would be the result of the prohibition of the boiler fuel use of natural gas, and shall identify, by geographic region of the United States, the location of users currently burning natural gas as a primary source and the location of users that would be required to use coal or alternative fuels in lieu of natural gas as a result of the prohibition of boiler fuel use of natural gas.

By Mr. RANDOLPH (for himself, Mr. HUDDLESTON, Mr. HUMPHREY, and Mr. JACKSON):

S. 273. A bill to require, to the extent practicable, that new electric powerplants and new major fuel burning installations, in categories to be determined, be constructed with the capability to utilize and utilize other than natural gas or petroleum as their primary energy source in compliance with applicable environmental requirements, and for other purposes; to the Committee on Commerce.

GREATER COAL UTILIZATION

Mr. RANDOLPH. Mr. President, a national coal policy in support of greater coal utilization is needed, urgently needed, to remove the present uncertainties regarding coal's future. The Natural Gas and Petroleum Conservation and Coal Utilization Act of 1977, which I introduce today, provides this by firmly expressing as national policy the goal of using domestically produced coal to the greatest extent practicable. In the absense of such a policy commitment, the forces which have led this Nation to its current reliance on oil and gas will continue to act as impediments to greater reliance on our largest domestic energy resource.

Many of us have known that America must make greater use of coal to meet its energy needs. Following the inauguration, we will be fortunate in having in the White House a man who shares this belief.

On August 14, 1976, in Charleston, W. Va., candidate Jimmy Carter stated his commitment to coal. He said:

> The future of West Virginia Appalachian coal is indeed bright if we can have a government policy that recognizes this valuable resource.

In an interview a month later, candidate Carter said "a shift from oil to coal" is a key part of his proposed energy program for our Nation. He has several times reaffirmed his commitment to the fullest utilization of coal.

President-elect Carter has given me opportunities to discuss this subject with him on three occasions. I anticipate that we will have an administration aware of the importance of coal and determined to use this vast resource. This is essential to creation of an orderly energy policy and the reduction of our perilous dependence on foreign sources of energy.

Energy conservation can minimize the economic impact of greater energy independence, but its influence on growth of energy demand is yet to be realized in any adequate degree. Energy savings since the 1973 embargo generally have resulted from our economic recession, higher energy prices, and the 55-mile-per-hour speed limit. We must have a

renewed sense of the urgency for conservation of energy.

But even should major conservation efforts reduce the rate of growth of energy consumption, our country's energy future would depend on greater coal utilization for at least the next 100 years.

Renewable energy resources offer significant potential, but it may take 50 years to harness them. Solar heating is an exception. In my judgment, this is an unnecessary gamble. These technologies are unproven as sources of bulk energy supply.

In the interim, only the vastly expanded production and utilization of coal can reduce the United States long-term dependence on unreliable foreign oil.

As natural gas and oil become more scarce and increasingly expensive, their advantages over coal will diminish. The role for coal as the natural successor to oil and natural gas thus will be established. Bulk energy supplies, such as industrial steam and electric power generation, thus will convert to production from coal. Cost, rather than the conveniences of oil or gas, is the prime consideration for these large-scale users.

The cost of electricity is very sensitive to increases in the cost of primary energy, such as the increase in international oil prices over the last 3 years. Since these prices can be expected to continue to rise, it would be in the consumers' and the national interest for utilities to convert to coal.

To encourage greater coal utilization, I introduced S. 1777 in the 94th Congress. This measure would have required new electric powerplants and other major fuel burning installations to be constructed with the capability to use coal where consistent with environmental policies.

On June 10, 1975, 5 days of hearings were convened to receive testimony from Government officials, industry spokesmen, environmentalists, labor, and other affected parties. During the hearings verbal testimony was received from 19 witnesses and 40 other statements were submitted for the record. The printed record in its 2,400 pages clearly delineates the national issues attendant to greater coal utilization.

Mr. President, I ask unanimous consent that a summary of this hearing record be printed at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF HEARINGS ON S. 1777

NEED FOR THIS BILL

The Industrial Revolution was built on coal. For more than a century, American industry depended on it almost exclusively for energy. For half a century, it supplied the raw material for the Nation's fledgling organic chemicals industry. At its peak in the 1940's, the coal industry employed some 600,000 workers.

Since the discovery of major oil fields in the Southwest at the beginning of this century, coal's role has been declining. In 1920, it provided some 80 percent of the Nation's energy. By the end of World War II, its share had dropped to 50 percent. By 1970, it had dropped to less than 20 percent and last year (1975) supplied only 18.5 percent of the U.S. total energy needs.

The pattern of coal consumption has changed significantly since 1945, as shown in table 1. At the end of World War II, the two biggest markets were railroads and manufacturing industries (primarily chemical), with home heating third and coking plants for the steel industry running fourth. Coking operations are still major coal consumers, but the railroads have disappeared as a coal market, the home heating market has almost disappeared, and the chemical industry has switched almost completely from acetylene (made from coal-derived calcium carbide) to ethylene (made from natural gas liquids and petroleum fractions).

TABLE 1.—YEARLY CONSUMPTION, BY CONSUMER CLASS, OF BITUMINOUS COAL

[In millions of tons]

Year	Electric power utilities	Bunker foreign trade	Railroads (class I)	Beehive coke plants	Oven coke plants	Steel and rolling mills	Cement mills	Other manufacturing and mining industries	Retail dealer deliveries	Total
1935	30.9	2.3	77,109	1.5	49.0	16.5	3.5	94.5	80.4	356.3
1940	49.1	3.0	85,130	4.8	76.5	14.1	5.6	107.8	84.6	430.9
1945	71.6	3.2	125,120	8.1	87.2	14.2	4.2	126.5	119.2	559.5
1950	88.2	2.0	60,969	9.1	94.7	10.8	7.9	95.8	84.4	454.2
1955	140.5	1.5	15,473	2.9	104.5	7.3	8.5	89.6	53.0	423.4
1960	173.8	.9	2,101	1.6	79.3	7.3	8.2	76.4	30.4	380.4
1961	179.5	.8	(1)	1.5	72.3	7.4	7.6	77.2	27.7	374.4
1962	190.8	.7	(1)	1.3	72.9	7.3	7.7	78.7	28.1	387.7

The loss of these three markets has changed coal from a broad-spectrum basic raw material into almost a one-market product. That one major market is electric utilities, since metallurgical coke must be low-sulfur, and much of the remaining industrial demand is for in-plant steam generation, for which the competition is similar to that in the utilities market.

Coal exports, have been a relatively minor factor, but also have been rather erratic. Somewhat under 30 million tons in 1945, coal exports have fluctuated between 25 million tons and 80 million tons, and were about 66 million tons in 1975. The majority of exported coal is high quality metallurgical or coking coals used in steelmaking. These coals are normally low in sulfur content and premium priced.

In contrast to railroad, chemical, and retail use of coal, the general pattern of consumption by the electric utility industry has reflected a rapidly increasing demand. While at the end of World War II annual coal consumption by the electric utility industry was about 72 million tons (about 13 percent of total coal consumption) it jumped to 174 million tons in 1960 (46 percent to total coal consumption), and to 404 million tons in 1975 (72 percent of total coal consumption).

However, while the total tonnage of coal used for generation of electricity has shown these rather dramatic increases, coal's relative share as a primary fuel for the utilities market has failed to increase and has even declined in the last decade (table 2). In 1945, 52 percent of the total kilowatt hours of electricity produced was generated from coal, compared to about 4 percent from oil and 9 percent from gas. In 1960, coal was still the primary fuel, accounting for 52 percent of electricity generated compared to 6 percent for oil and 21 percent for gas. Ten years later, 1970, coal's relative share, while still the largest had slipped to 45 percent of total electric power generation. Oil was at 13 percent, gas 24 percent, and nuclear had entered the picture at less than 2 percent. Last year, 1975, coal was at 44 percent, oil at 17 percent, gas at 16 percent, and nuclear at 8 percent. Increasingly, much of the new generating capacity in the last 20 years has turned to oil or gas for fuel, rather than coal, because of lower price (including the regulated price of interstate gas) and most recently because of air pollution control (primarily sulfur) requirements. During this same period, hydroelectric power declined from 35 percent to 15 percent of total electric power generation as total electric generation increased but few new hydroelectric plants were built.

TABLE 2.—ENERGY INPUT TO ELECTRIC SECTOR

[Percent]

Year	Coal	Oil	Gas	Hydro-power	Nuclear
1945	52	4	9	35	
1950	45	13	13	29	
1955	53	8	18	21	
1960	52	6	21	20	1
1965	53	7	21	18	1
1970	45	13	24	16	2
1971	44	14	24	16	2
1972	43	15	23	16	3
1973	43	18	19	15	5
1974	43	18	17	16	6
1975	44	17	16	15	8

INDUSTRIAL ENERGY SUPPLY

Although electric utilities have received the most attention with respect to potential for conversion to coal. American industry consumes more energy in total and about as much in primary fuels as the utilities do. In 1975, for example, the utilities sector consumed 20.1 quadrillion Btu, while industry consumed 18.9 quadrillion Btu in primary fuels plus 2.7 quadrillion Btu in electricity. Of industry's 18.9 quadrillion Btu in primary fuel input, 22 percent was from coal, 47 percent from gas (down from 52 percent in 1974), and 30 percent from petroleum. (The remainder was hydropower.)

Thus, in 1975, industry consumed about 38 percent of total U.S. energy input, including about 42 percent of total electricity. About 10 to 12 percent of the energy materials used directly by industry (other than coking plants) go to feedstocks, the rest for fuel. The fuel is used for direct process heat (about 40 percent) and for steam (about 60 percent). About 30 percent of the steam is used to generate electricity.

Although industry does generate some electricity for its own use, the amount is small compared to its total need for electricity (one recent estimate shows it to be about 14 percent). This reliance on utility electricity by industry is the result of a long term trend. At the beginning of this century, industry generated most of its own electricity. By 1960, self-generation accounted for 21 percent of its consumption, compared to the 14 percent estimated for 1974.

The basic reason for this shift is the economic advantage of electricity generated in large central power plants compared to smaller ones. Hence industry has turned more and more to purchased electricity while continuing to generate steam internally, using units designed specifically for that purpose. Other factors are also involved, of course, including the tax structure which makes operating expenses (buying electricity) advantageous compared to capital expenditures (generating electricity), shorter work weeks (more idle time for industrial powerplants), and management attitudes that managing a power generating facility distracts management attention from the company's primary activities of producing and marketing products.

The result of these trends was the installation of a large number of gas- or oil-fired industrial boilers for steam—about 30 percent oil-fired, and 55 percent gas-fired—in the period 1968 to 1972. These "packaged boilers" have relatively low thermal efficiencies but are relatively inexpensive and require a minimum of operating know-how and attention.

Most of these packaged boilers have firing rates of 50 million to 200 million Btu per hour and there are tens of thousands of them. About half of all industrial steam is generated in only 400 or so large boilers (300 million Btu per hour or higher) and about two-thirds in some 6,000 boilers of 250 million Btu or higher.

Most of these plants operate at temperatures and pressures too low for by-product electric power generation, and most cannot be converted to coal. A 1973 survey by National Association of Manufacturers showed that only about 20 percent of its survey respondents could convert from oil or gas to coal, with about 44 percent of that 20 percent already using some coal in their fuel mix.

FUTURE ENERGY SUPPLIES

While the U.S. economy in general, and the utilities and industry in particular, have been increasing their relative dependence on oil and gas over the years, the U.S. resource picture has been pointing in a different direction. Reserves of oil and gas are rapidly being depleted, while our much larger reserves of coal remain largely undeveloped.

Domestic production of natural gas peaked in 1973 at 22.65 trillion cubic feet (tcf), declined to 21.6 tcf in 1974 and to 20.1 tcf in 1975. Net additions to gas reserves have been smaller than annual production since 1968, except for the one year, 1970, when the Alaska fields were added. Currently proven reserves represent only about a 10-year supply at current production rates.

Estimates of undiscovered recoverable reserves have varied widely over the years, as is expected when addressing the unknown. It is significant, however, that in 1975 two respected authoritative sources, the U.S. Geological Survey and the National Academy of Sciences, each issued reports revising sharply downward their earlier estimates of how much natural gas remains to be discovered. USGS changed its estimate from over 1,000 tcf to under 500, while NAS estimated slightly more than 500 tcf.

Domestic petroleum production has been declining since 1970 at about 1 percent per year. Currently proven reserves represent only about 12 years of production at current levels, while estimates of recoverable undiscovered petroleum range from a low of 55 to a high of 458 billion barrels. But as with natural gas, the most recent reevaluations of undiscovered recoverable reserves by NAS and USGS represent sharp cutbacks from earlier optimistic estimates.

In contrast to the picture of oil and gas, U.S. coal reserves are vast—434 billion tons classified as mineable under today's technology and economics, more than a trillion additional tons already identified, and some 1.6 trillion tons beyond that estimated to be present but not yet located. According to the U.S. Department of the Interior, this vast coal resource base constitutes about one-third of the world's recoverable coal reserves. It rivals—in fact some claim it outstrips—the Middle East in available Btu's.

Yet despite the tremendous reserves of coal and the relatively limited reserves of oil and gas, most forecasters of energy supply and demand do not consider that the trends of the past 30 years away from coal will be reversed in the next 10 years. Within a projected overall energy demand growth of somewhere between 2 and 4 percent per year, the growth trends are expected to favor imported oil and nuclear energy. Coal consumption by 1985 is forecast to hit somewhere between 800 million and one billion tons (Ford Energy Policy project. National Petroleum Council, National Academy of Engineering), with one (Shell Oil) pessimistic at 700 million tons and the updated Project Independence slightly optimistic at 1.04 billion tons under the "business as usual" scenario. A recent analysis by Congressional Research Service estimated 900 million tons and even hedged that estimate with disclaimers that it might be too optimistic.

These discouraging estimates of the rate at which the Nation's energy consuming industries will turn to coal are confirmed by testimony before our committees in hearings on this bill. The electric utilities individually and collectively expressed grave doubts about the ability of the coal producing industry to guarantee availability of the necessary coal in terms of both tonnage and sulfur content. Leasing delays in the West, transportation problems, and availability of capital were important components of their reasons for concern.

S. 1777 provides the necessary Federal push toward greater coal utilization. It requires that all future utility and industrial fossil fuel-fired boilers be designed to use coal and use it unless the coal is not available. Small boilers and combustion gas turbines used for peak power generation are excepted. The bill also requires that existing gas-fired units be converted to oil as rapidly as feasible, hopefully within 5 years, and that all oil firing be terminated within the following 5 years.

Individual facilities can petition for relief from these requirements on the basis of scheduled retirement or other factors that would cause adverse economic or other effects. Although the ultimate impact of S. 1777 cannot be predicted with confidence, because of the large number of factors that must be considered in each case, some 6,300,000 barrels per day of oil equivalent projected for consumption in 1985 are at stake.

GENERATION OF ELECTRICITY

Electricity generation is one of the fastest growing segments of our economy, with a growth rate of 6.7 percent per year from 1965 to 1974. Although electricity consumption did not increase in 1974 and has increased only 1.6 percent in 1975, it is expected to resume its historic growth rate in 1976 and to continue to grow at between 5 and 7 percent per year through the next two decades.

Current utility industry plans include a heavy reliance on coal and on nuclear power to provide this growth in electric generating capacity. The latest study of coal demand for electricity generation by Federal Energy Administration, completed in August 1975, shows an increase of some 150 million tons of coal demand by 1980. Planned powerplants whose fuel has not yet been selected could add another 70 million tons, should coal be the fuel of choice.

Licensing delays, rapid escalation of capital costs, and concerns over safety and theft of nuclear materials may prevent current plans for nuclear generating capacity from reaching fruition. Should this occur, and demand grow as forecast, there will be additional need for fossil fuel-fired powerplants which could add up to 100 million tons of coal demand.

Existing and planned oil- and gas-fired electrical generating capacity, were it fueled by coal, would require some 400 million additional tons of coal per year, but it would release over three trillion cubic feet of natural gas per year for other uses, many of which cannot use anything other than gas, and some 1.5 million barrels of oil per day which could be subtracted from imports. It is unreasonable to expect that all of this capacity could be converted to coal. Much of it is for equipment that cannot operate on coal; some is for equipment so near to the end of its useful life that to convert it would constitute economic waste. And some of it is located at plants that cannot be modified to accept coal deliveries, handle ash disposal, or meet environmental requirements.

INDUSTRIAL PROCESS HEAT

According to testimony from the American Boiler Manufacturers Association, there are some 42,000 oil- or gas-fired boilers in industry consuming some 3.2 million barrels of oil equivalent per day. Over the period 1968–72, 85 percent of all new indusrial boilers were oil- or gas-fired—two thirds being gas-fired. More recently, a smaller proportion of new boilers are gas fired, but in cases other than large field-erected boilers there is no shift toward coal.

AVAILABILITY OF COAL

Current shortages of natural gas, high oil prices, and announced plans for coal utilization lead to expectations that coal demand over the next decade will increase sharply to at least 900 million tons (1975 production is estimated at 640 million tons) and possibly considerably more. But these projections could easily grossly overstate the demand greatly. Most existing and planned fossil fuel-fired boilers can also burn oil or gas and will do so if supplies are available and relative prices make them economically attractive.

Despite current interest in coal-burning capability, there is no certainty that circumstances will continue to support greater use of coal. The potential change of greatest significance would lie in the realm of oil pricing by the Organization of Petroleum Exporting Countries, which could at any time reduce oil prices and lead American fuel users to even greater dependence on imported oil.

This uncertainty about future oil prices, coupled with the environmental concerns and costs associated with coal use and the greater ease of use of oil and gas, are reflected in coal industry production statistics and plans for expansion. Despite all the concern over security of oil supply, the current higher price of oil, and the continuing national debate over energy independence, coal production is at almost the same level it was three years ago, and demand has softened to the point where spot market prices have returned to normal and many small producers are suspending operations.

Mr. RANDOLPH. Mr. President, the bill I introduce would further our efforts to facilitate the greater use of coal.

Under the present program set forth in the Energy Supply and Environmental Coordination Act of 1974, as amended in December 1975 by the Energy Policy and Conservation Act, the FEA Administrator is empowered:

First, to order existing powerplants and major fuel burning installations with the capability to burn coal to do so. This authority to issue orders expires on June 30, 1977, while the authority to enforce such orders expires on December 31, 1984;

Second, the FEA Administrator is empowered to issue construction orders to electric powerplants in the early planning process to require them to be designed with a capability to use coal. This authority expires on June 30, 1977; and

Third, the FEA Administrator is provided similar construction order authority for major fuel burning installations in the early planning process. This authority also expires on June 30, 1977.

The FEA Administrator was given total discretion, without any congressional guidance, to issue the aforementioned construction orders. By comparison, detailed conditions were set forth in the 1974 act to be applied by the FEA when ordering existing plants to utilize coal.

The Natural Gas and Petroleum Conservation and Coal Utilization Act of 1977 emphasizes new electric powerplants and new major industrial installations. In summary, the measure would:

First, prohibit the construction of new electric powerplants unless they are designed with the capability to use other than natural gas or oil as their primary energy source in compliance with applicable environmental requirements. If such facilities were constructed to use coal, they would satisfy the purposes of this act; however, the use of geothermal energy, or solar energy, also would do so;

Second, the FEA Administrator is authorized to include under the prohibition on natural gas or petroleum use categories of new major industrial installations. Because this authority is discretionary, the FEA authority to issue construction orders to new major fuel burning installations is extended until September 30, 1980. This would enable the issuance of orders to individual installations where a category designation is not warranted;

Third, general authority for compliance date extensions is provided in those instances where the new electric powerplant or new major industrial installation has demonstrated that despite good faith efforts compliance is not possible;

Fourth, authority is provided for exemptions where the powerplant or installation demonstrates that adequate coal—or fuel other than natural gas or petroleum—supplies are not available or transportation facilities for such fuels are not available;

Fifth, an exemption is also provided for new powerplants or installations which are constructed to be operated solely as peak load facilities. Such facilities are by definition restricted to powerplants or installations which operate less than 1,500 full load hours or less per year;

Sixth, general authority to issue rules and regulations is provided, modeled after the FEA Act;

Seventh, enforcement authority and penalties are provided, modeled after similar provisions in the Energy Supply and Environmental Coordination Act of 1974—Title I; and

Eighth, the authority to issue prohibition orders under the Energy Supply and Environmental Coordination Act of 1974 is extended until September 30, 1980, and expanded to include restrictions on the conversion of existing electric powerplants and major fuel burning installations from coal to natural gas or oil.

Mr. President, this vital measure is cosponsored by Senators HUMPHREY, HUDDLESTON, JACKSON, and myself. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 273

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 101. This Act may be cited as the "Natural Gas and Petroleum Conservation and Coal Utilization Act of 1977".

SEC. 102. (a) Section 2(f) of the Energy Supply and Environmental Coordination Act of 1974, is amended (1) by striking paragraph (1) and inserting in lieu thereof:

"(1) Authority to issue orders or rules under subsections (a) and (b) of this section shall expire at midnight, September 30, 1980. Authority to issue orders or rules under subsection (c) of this section to any powerplant shall expire ninety days after the effective date of regulations implementing sections 205 and 206 of title II of this Act. Authority to issue orders or rules under subsection (c) of this section to any major fuel burning installation shall expire at midnight, September 30, 1980. A rule or order issued under subsections (a), (c), and (d) of this section may take effect at any time before January 1, 1985.".

(2) By striking out paragraph (2) and inserting in lieu thereof:

"(2) Expiration pursuant to paragraph (1) of this subsection shall not affect or impair the Federal Energy Administrator's authority to amend, repeal, rescind, modify, or enforce such rules or orders.".

(b) Section 2(d)(2) of the Energy Supply and Environmental Coordination Act of 1974 is amended by striking out "this Act" and inserting in lieu thereof "this title and as required to permit compliance with the requirements of section 211 of title II of this Act.".

(c) Section 2(c) of the Energy Supply and Environmental Coordination Act of 1974 is amended by inserting after the words "combined cycle unit" and before the ")" the words "except as provided for in title II of this Act".

(d) Redesignate subsections (c) and (f) of the Energy Supply and Environmental Coordination Act of 1974 as subsections (g) and (h) respectively and substitute therefor new subsections (e) and (f) as follows:

"(e) The Federal Energy Administrator shall by rule prohibit any powerplant or major fuel burning installation which, upon the date of enactment of this subsection, burns coal as its primary energy source from thereafter burning natural gas as a primary energy source.

"(f) The Federal Energy Administrator shall by rule require the issuance of a permit to authorize the burning of oil as a primary energy source by any powerplant or major fuel burning installation which, after the date of enactment of this subsection, burns coal as its primary energy source."

SEC. 103. Section 11(g)(2) of the Energy Supply and Environmental Coordination Act of 1974 is amended by adding after the phrase "The provisions of this section expire" the phrase ", except to the extent necessary to carry out the purposes of section 203 of title II of this Act,".

SEC. 104. The Energy Supply and Environmental Coordination Act of 1974 is amended by inserting "TITLE I" before "SECTION 1. SHORT TITLE; PURPOSE." and adding the following new title:

"TITLE II

"TABLE OF CONTENTS

"Sec. 201. Findings and purposes.
"Sec. 202. Definitions.
"Sec. 203. Disclosure.
"Sec. 204. New facilities.
"Sec. 205. Temporary exemptions.
"Sec. 206. Exemptions.
"Sec. 207. Environmental requirements.
"Sec. 208. Disruption of supply contracts.
"Sec. 209. Rules and regulations.
"Sec. 210. Enforcement and penalties.
"Sec. 211. Emergency powers.
"Sec. 212. Federal facilities.
"Sec. 213. Reports.

"FINDINGS

"SEC. 201. FINDINGS.—(a) The Congress finds that the protection of public welfare and the preservation of national security require—

"(1) the furtherance of national energy self-sufficiency consistent with applicable environmental requirements;

"(2) the capability to use indigenous energy resources of the United States in lieu of imported energy supplies by the substitution of coal and other fuels for natural gas and petroleum products as the primary energy source for new electric powerplants and new major fuel-burning installations;

"(3) the conservation of natural gas and petroleum for uses other than the generation of electricity or boiler fuel, for which uses there are no feasible alternative fuels or raw material substitutes; and

"(4) the construction of new electric powerplants and new major fuel burning installations, with the capability to utilize fuels other than natural gas and petroleum as their primary energy source, and the utilization of such fuels by such powerplants or installations except in those circumstances provided for herein.

"(b) The Congress finds that any new electric powerplant or any new major fuel-burning installation shall be deemed in compliance with the purposes of this title if such powerplant or installation has the capability to use coal and utilizes coal as its primary energy source in conformance with applicable environmental requirements.

"DEFINITIONS

"SEC. 202. For the purposes of this title:

"(a) The term 'Administrator' means the Administrator of the Federal Energy Administration established by the Federal Energy Administration Act of 1974; except that if such Administration ceases to exist such term means any officer of the United States designated as Federal Energy Administrator by the President for the purposes of this title.

"(b) The term 'person' includes any person or individual; (2) any corporation, company, partnership, association, firm, society, trust, joint venture, or joint stock company; (3) the Federal Government, including corporations, departments, Federal agencies, and other instrumentalities; and (4) any State or political subdivision thereof, including the District of Columbia, or other government entity, which owns, leases, operates, or controls any new electric powerplant or new major fuel-burning installation.

"(c) The term 'natural gas' includes (1) dry natural gas and casing-head gas; (2) synthetic gas derived from natural gas liquids; and (3) synthetic gas derived from coal, but does not include synthetic gas derived from coal where such synthetic gas is produced by a person for use by an electric powerplant or a major fuel-burning installation regulated pursuant to section 204 of this title.

"(d) The term 'petroleum' includes crude oil, residual fuel oil, refined petroleum products, liquid petroleum gas, and synthetic gas derived from petroleum, but does not include process waste gases, carbon monoxide, and waste gases and other liquid and solid by-products of refinery operations within the United States, which have no commercial significance.

"(e) The term 'coal or other fuel' means coal and any fuel other than natural gas or petroleum, including, without limitation, (1) coal derivatives, including (A) synthetic liquid or solid fuels which are derived from coal, (B) low British thermal units synthetic gas derived from coal, and (C) synthetic gas derived from coal where such gas is produced by a person for use by an electric powerplant or a major fuel-burning installation regulated by section 204 of this title; (2) petroleum coke; (3) combustible municipal, industrial, or agricultural solid wastes; and (4) wood or other bio-mass, but does not include coal derivatives where such derivatives are produced by a person for the primary purpose of use as other than a fuel.

"(f) The term 'electric powerplant' means a fossil fuel-fired electric generating unit, including a gas turbine unit or a combined cycle unit, that is by design capable of being operated at a fuel heat input of one hundred million British thermal units per hour or greater, or a combination of more than one such units at the same site which in the aggregate is by design capable of being operated at a fuel heat input of two hundred and fifty million British thermal units per hour or greater, that produce electric power for the purposes of sale or exchange: *Provided, however,* That the Administrator may include in the definition of electric powerplant any such electric powerplant or a combination of more than one such unit, which is by design capable of being operated at lower fuel heat inputs where the Administrator finds the inclusion of such powerplant in such definition to be in the public interest.

"(g) The term 'major fuel burning installation' means a major industrial installation, other than an electric powerplant, that contains a fossil fuel fired boiler, a gas turbine unit, combined cycle unit, or diesel engine, that by design is capable of being operated at a fuel heat input of one hundred million British thermal units per hour or greater, or a combination of more than one such units at the same site which in the aggregate is by design capable of being operated at a fuel heat input of two hundred and fifty million British thermal units per hour or greater: *Provided, however,* That the Administrator may include in the definition of a major fuel burning installation, a major fuel burning installation, or combination of more than one such unit, which by design is capable of being operated at lower fuel heat inputs where the Administrator finds the inclusion of such installation in such definition to be in the public interest.

"(h) The term 'new'—

"(1) when used to modify 'electric powerplant' means—

"(A) any electric powerplant that—

"(i) as of ninety days after the effective date of regulations implementing sections 205 and 206 has not commenced the driving of the foundation piling, or another appropriate structural event, as determined by the Administrator, in accordance with approved final drawings or an equivalent design document for the main boiler; or

"(ii) as of the date of enactment of this title, has not been contracted for in whole or in part or cannot be canceled, redesigned, or rescheduled without adversely affecting electric system reliability; or

"(B) an electric powerplant that has been issued an order under section 2(c) of title I of this Act; and

"(2) when used to modify 'major fuel burning installation' means any major fuel burning installation which was in the early planning process ninety days after the effective date of regulations applicable to the category of installations to which such installation belongs as identified pursuant to section 204(b) of this title, or which thereafter enters the early planning process. Such regulations shall define the term 'early planning process' as it applies to each category of installations.

"(i) The term 'primary energy source' means the fuel used by a new electric powerplant or a new major fuel burning installation for normal operation, but does not include the minimum amounts of fuel required (1) for boiler startup, testing, flame stabilization, and control uses; (2) to implement enforceable air pollution control emergency requirements; and (3) to alleviate or prevent any emergencies directly affecting the public health, safety, or welfare which would result from electric power outages.

"(j) The term 'applicable environmental requirements' includes any Federal, State, or local governmental standard, limitation, or other requirement applicable to emissions of environmental pollutants (including air and water pollutants) or disposal of solid waste, residues resulting from the combustion of coal or other fuels or operation of air pollution control equipment, and includes without limitation, any standard, limitation, or other requirement established pursuant to the Clean Air Act, the Federal Water Pollution Control Act, or the Solid Waste Disposal Act.

"(k) The term 'peakload' when used to modify an electric powerplant or a major fuel burning installation means such a powerplant which operates the equivalent of one thousand five hundred full-load hours or less per calendar year.

"(l) The term 'cost' means total costs (both operating and capital) incurred over the estimated useful life of a new electric powerplant, discounted to present value, taking into account any change in the utilization of existing powerplants in the relevant dispatching system and other relevant economic factors that are included in planning for the production, transmission and distribution of electric power within such system.

"DISCLOSURE

"SEC. 203. The Administrator shall require the disclosure of the extent, characteristics, and productive capacity of coal reserves held by any private, corporate, public, or Government owner, or interest-holder in such reserves, as necessary, pursuant to section 11 of title I of this Act, and shall publish a summary of such information: *Provided,* That the Administrator may exempt small reserves from the requirements of this section where the Administrator finds that the imposition of the requirements of this section would impose an unreasonable economic burden on the owner or would not be of significant aid to achievement of the purposes of this title, except for emergency operations authorized or subsequently approved by the Administrator pursuant to section 211 of this title.

"NEW FACILITIES

"SEC. 204. (a) Except as provided for in sections 205 and 206, any new electric powerplant, or any new major fuel burning installation in a category identified pursuant to subsection (b) of this section, shall be constructed with the capability (including the necessary auxiliary equipment and facilities) to use coal or another fuel other than natural gas or petroleum as its primary energy source in compliance with applicable environmental requirements.

"(b)(1) The Administrator, in consultation with the Administrator of the Environmental Protection Agency with respect to the availability and applicability of pollution control technologies to comply with applicable environmental requirements, may, by rule, from time to time, identify categories of new major fuel burning installations which shall be subject to the requirements and prohibitions of subsections (a) and (d) of this section. In identifying such categories of major fuel burning installations two-digit classification, within the manufacturing division of economic activity set forth in the Standard Industrial Classification Manual: *Provided,* That the Administrator shall consider for such identification at least the ten most energy-consumptive categories of major fuel burning installations as identified by such classifications.

"(2) In identifying categories of major fuel burning installations pursuant to this subsection, the Administrator shall take into account any special circumstances or characteristics of the category of such installations that will be subject to the rule.

"(c) Except as provided for in title I of this Act and sections 205, 206, and 211 of this title no new electric powerplant, nor new major fuel burning installation in a category identified pursuant to section 204(b) of this section shall utilize natural gas or petroleum as its primary energy source.

"(d) The Administrator may establish criteria consistent with sections 205, 206, and 211 of this title by which a person may apply for an exemption, a temporary exemption, or a stay for a new electric powerplant or a new major fuel burning installation in a category identified in subsection (b) from the requirements of section 204 of this title, but not including applicable environmental

requirements. Such exemptions or temporary exceptions may be granted at the discretion of the Administrator for such period of time as the Administrator determines.

"TEMPORARY EXCEPTIONS

"SEC. 205. (a) COMPLIANCE DATE EXTENSION.—The Administrator, upon application of the person owning, operating, constructing, or proposing to construct a new electric powerplant, or new major fuel burning installation in a category identified pursuant to section 204(b) of this title, may, for such powerplant or installation, grant a temporary exemption, in accordance with subsection (b) of this section, to the deadlines for compliance with the requirements of section 204(c) of this title if—

"(1) such person prior to the effective date of any prohibition pursuant to section 204 of this title, has submitted a compliance plan to the Administrator containing a compliance schedule for such powerplant or installation which the Administrator has approved pursuant to this section; and

"(2) the Administrator finds that such person has demonstrated that, despite good faith efforts of such person, one or more of the following items is not available for operation of such powerplant or installation in compliance with section 204(d) of this title:

"(A) sufficient quantities of coal or other fuel of the quality necessary to achieve compliance with applicable environmental requirements or conformance with boiler design requirements;

"(B) adequate transportation facilities for such coal or other fuel;

"(C) pollution control abatement equipment or devices, including flue gas desulfurization equipment and electrostatic precipitators, necessary to assure compliance with applicable environmental requirements; or

"(D) such other equipment or facilities as the Administrator determines are necessary for the reliable operation of such powerplant or installation; or

"(3) such powerplant or installation will comply with the requirements of section 204(d) of this title by the use of synthetic fuels derived from coal or innovative techniques for utilizing coal or other fuel.

"(b) The temporary exemption granted in subsection (a) of this section shall be for a period of time and upon such terms and conditions as the Administrator deems reasonable and necessary for the removal of the impediment to compliance with the requirements of section 204(d) of this title, upon which the requested extension is based.

"(c) The Administrator shall exempt from the penalties provided for in section 210 of the title any electric powerplant or major fuel burning installation granted a temporary exemption pursuant to subsection (a) of this section for the period of such exemption.

"(d) In no event may the action of the Administrator on a request for an extension under this section result in any delay in compliance with any applicable environmental requirement.

"EXEMPTION

"SEC. 206. (a) The Administrator, upon application by a person owning, operating, constructing, or proposing to construct or operate a new electric powerplant, or new major fuel burning installation in a category identified pursuant to section 204(b) of this title, proposing to use petroleum as its primary energy source shall, within one year of such application, grant an exemption with respect to petroleum from the requirements, prohibitions, and penalties of sections 204 and 210 of this title, if the Administrator finds that such person has demonstrated that—

"(1) despite good faith efforts (A) an adequate and reliable supply of coal or other fuel is not expected to be available during a majority of the first five years of operation or a majority of the useful life of such powerplant or installation; or (B) physical factors, and legal factors which cannot reasonably be expected to be overcome by diligent good faith efforts by the applicant; preclude compliance with the requirements of section 204 of this title because of site specific limitations, such as access to coal or other transportation facilities; and

"(2) in the case of a powerplant, despite good faith efforts, there is no reasonable alternative site—

"(A) at which an adequate and reliable supply of coal or other fuel allowable as a primary energy source pursuant to sections 204(a) and (c) of this title is or would be available during a majority of the first five years of operation or the majority of the useful life of such powerplant;

"(B) at which the other resources, facilities, etc., necessary for operation of the powerplant are expected to be reasonably available during a majority of the first five years of operation and a majority of the useful life of such powerplants;

"(C) at which neither the location of such alternative site nor the time schedule for construction will impair reliability of service;

"(D) at which a powerplant can be constructed and operated in compliance with applicable environmental requirements; and

"(3) in the case of a powerplant, there is not an alternative supply of power which can be obtained during the majority of the useful life of such powerplant from another source without impairing reliability of service;

"(4) the cost of using coal appreciably exceeds the cost of using imported petroleum.

"(b) The Administrator shall upon application by a person owning, operating, constructing, or proposing to construct or operate a new electric powerplant, or new major fuel-burning installation in a category identified pursuant to section 204(b) of this title grant an exemption with respect to the use of petroleum for such powerplant or such installation from the requirements, prohibitions, and penalties of sections 204 and 210 of this title, if the Administrator finds the applicant has demonstrated that—

"(1) such powerplant or installation is to be constructed and operated solely as a peakload powerplant or major fuel-burning installation; or

"(2) as of the date of effectiveness of the prohibitions and requirements of section 204 of this title, such powerplant or installation was in an advanced stage of construction such that imposition of such prohibitions or requirements would impose an unreasonable economic burden.

"(c) Any person proposing to construct a new powerplant, or new major fuel-burning installation in a category identified pursuant to subsection 204(b) of this title, may apply to the Administrator for an exemption under this section from the requirements of section 204 of this title and the Administrator may grant such an exemption upon a finding that compliance would not be in the public interest or would not be of significant value in serving the purposes of this title. The Administrator shall publish his findings within 12 months after filing of the application for exemption. If the Administrator's findings support an exemption, that exemption shall be granted upon publication of the findings.

"ENVIRONMENTAL REQUIREMENTS

"SEC. 207. For the purposes of sections 205, 206, and 211 of this title in order to ascertain environmental control equipment and fuel requirements necessary to comply with applicable environmental requirements, the Administrator shall consult, as appropriate, with the Administrator of the Environmental Protection Agency or appropriate State and local authorities.

"DISRUPTION OF ENERGY SUPPLY CONTRACTS

"SEC. 208. (a) Whenever the application of any of the provisions of this title to any new electric powerplant, or any new major fuel burning installation in a category identified pursuant to section 204(b) of this title, would result in prohibiting the use of natural gas or petroleum under contract as of the date of enactment of this title by any facility as its primary energy source, the sale, exchange, or other transfer of such natural gas or petroleum by any such powerplant or installation shall not be prevented or otherwise impaired by the force majeure or other clauses of any contract under which, but for the application of the requirements of section 204(c) of this title, such natural gas or petroleum products would have been provided to such powerplant or installation.

"(b) COMPENSATION.—(1) Whenever the application of the requirements of section 204 of this Act to any new electric powerplant or any new major fuel burning installation would result in prohibiting any person from utilizing intrastate natural gas which such person contracted for prior to the date of enactment of this title, then such person shall be eligible for just compensation from the person or persons (designated by the Administrator) to whom such gas is subsequently delivered. The person or persons to whom such natural gas is delivered shall make payment of just compensation to the person to whom the prohibition applies and to any person who but for such prohibition would have transported such natural gas to such facility. The person or persons who pay such just compensation shall, upon payment thereof, be entitled to assume any contractual rights which the person to whom the prohibition applies may have with respect to such natural gas. If the charges for transportation or sale of natural gas delivered pursuant to such a contract were not regulated under the Natural Gas Act prior to its assumption under this subsection, the assumption of such contract under this subsection and transportation or sale of such natural gas under such contract after its assumption shall not be subject to the Natural Gas Act.

"(2) For purposes of this subsection, the term 'just compensation' means compensation for—

"(A) increased fuel costs, if any, incurred by the electric powerplant or major fuel burning installation to which the prohibition applies; and

"(B) loss of revenue, if any, incurred by the person who transported gas to such powerplant, to the extent such loss would not have occurred but for such prohibition.

"(3) The amount of such compensation shall be determined on the record after agency hearing by the Administrator. A prohibition on the use of natural gas under this title may take effect before the amount of such compensation is finally determined by the Administrator. The Administrator may order any person to pay the amount of compensation established by the Administrator or to adjust rates of payment to reflect underpayments or overpayments.

"RULES AND REGULATIONS

"SEC. 209. (a) The Administrator shall promulgate such rules, regulations, and procedures as may be necessary to carry out the functions and powers vested in the Administrator by this title.

"(b) Nothing in this title or in any rule promulgated or order issued pursuant thereto shall impair any requirement, prohibition, or duty imposed pursuant to title I of this Act or any authority covered thereby.

"ENFORCEMENT AND PENALTIES

"SEC. 210. (a) It shall be unlawful for any person to violate any provisions of this title or to violate any rule, regulation, requirement, or order issued pursuant to this title.

"(b)(1) Whenever, on the basis of any in-

formation available, the Administrator finds that any person is in violation of any provision of this title or any rule, regulation, requirement, or order issued pursuant to this title, the Administrator shall issue notice of such violation and may issue an order requiring compliance with such provision, rule, regulation, requirement, or order.

"(2) Any order issued under this section shall be in writing and shall state with reasonable specificity the nature of the violation and specify a time for compliance which the Administrator determines is reasonable, taking into account the seriousness of the violation and any good faith efforts to comply with applicable requirements of this title.

"(c) (1) Any person who violates any provision of this title shall be subject to a civil penalty of not more than $10,000 for each violation. Each day that such violation continues shall be deemed a separate violation.

"(2) Any person who willfully violates any provision of this title shall be fined not more than $25,000 for each violation. Each day that such violation continues shall be deemed a separate violation.

"(3) Whenever it appears to the Administrator or any person authorized by the Administrator to exercise authority under this title that any person has engaged or is engaged in acts or practices constituting a violation described in subsection (a) of this section the Administration or such person may request the Attorney General to bring a civil action to enjoin such acts or practices, and upon a proper showing, a temporary restraining order or a preliminary or permanent injunction shall be granted without bond. In such action, the court may also issue mandatory injunctions commanding any person to comply with any provision, the violation of which is made unlawful by subsection (a) of this section.

"(4) Any person suffering legal wrong because of any act or practice arising out of any violation of subsection (a) of this section may bring a civil action for appropriate relief, including an action for a declaratory judgment of writ of injunction. United States district courts shall have jurisdiction of actions under this paragraph without regard to the amount in controversy. Nothing in this paragraph shall authorize any person to recover damages.

"(d) The owner, operator, or lessor of any new electric powerplant or new major fuel-burning installation, granted an exemption under section 206(b)(1) as a peakload electric powerplant or major fuel-burning installation, which, for any consecutive 12-month period operates in excess of 1,500 equivalent full-load hours, shall be liable for a civil penalty of up to $10 per barrel of oil or $3 per thousand cubic feet of natural gas, used in excess of the equivalent of one thousand five hundred full-load hours, except (1) as provided for in sections 202(k) and 211 of this title or (2) in the case where the owner, operator, or lessor can demonstrate that operation in excess of one thousand five hundred hours was necessary to meet peak load demand or where other peak load electric powerplants within the system were unavailable for service due to unit or system outages, provided that the combined use of the affected peak load units or installations on the system does not exceed the equivalent of one thousand five hundred full load hours for all such affected units in any calendar year. In such a case, the owner, operator, or lessor of such a peak load power plant or major fuel-burning installation shall be liable for a civil penalty of up to $10 per barrel of oil or $3 per thousand cubic feet of natural gas should his equipment be used in excess of the equivalent of one thousand five hundred full-load hours, average use, of all affected peak load electric powerplans within the utility system.

"(e) For purposes of this section, the term 'person' shall not include the Federal Government, including corporations, departments, Federal agencies, and other instrumentalities.

"EMERGENCY POWERS

"SEC. 211. (a) The Administrator may stay or otherwise exempt for such period as the Administrator deems appropriate, the application of the requirements, prohibitions, and penalties of sections 204(d) and 210 of this title—

"(1) in the event of national, regional, or statewide shortages of coal or other fuel supplies or of coal transportation facilities or other necessary facilities which may or will affect reliability service of new electric powerplants subject to such requirements and prohibitions; or

"(2) otherwise as necessary to alleviate or prevent any emergencies directly affecting the public health, safety, or welfare, which would result from electric power outages.

"(b) The Administrator shall stay the application of the requirements and prohibitions of section 204(d) of this title for such periods as necessary to implement enforceable air pollution requirements.

"(c) Any allocation of coal or coal transportation must be documented and a report stating the need, justification and results of such allocation must be filed with the Administrator and available as public information.

"FEDERAL FACILITIES

"SEC. 212. Each department, agency, and instrumentality of the executive, legislative, and judicial branches of the Federal Government having jurisdiction over any new electric powerplant, or new major industrial fuel-burning installation in a category identified pursuant to section 204 (b) of this title shall comply with the requirements and prohibitions of this title. The President may exempt any such powerplant or installation of any department, agency, or instrumentality in the executive branch from compliance with such requirement or prohibition, if the President determines it to be in the paramount interest of the United States to do so. No such exemption shall be granted due to lack of appropriation unless the President shall have specifically requested such appropriations as a part of the budgetary process and the Congress shall have failed to make available such requested appropriation. The President shall report each January to the Congress all exemptions granted under this section from the requirements and prohibitions of this Act during the preceding calendar year, together with his reason for granting each such exemption.

"REPORT

"SEC. 213. Beginning one year after the date of enactment of this title, the Administrator shall report annually to the Congress on the implementation of this title.".

Mr. HUDDLESTON. Mr. President, I am pleased to join my distinguished colleague from West Virginia (Mr. RANDOLPH) in cosponsoring a bill designed to encourage the increased utilization of coal.

The measure would require, to the extent practicable, that new electric powerplants and new major fuel burning installations utilize other than natural gas or petroleum as their primary energy source in compliance with applicable environmental requirements. Further, it would extend until Septemer 30, 1980, the Federal Energy Administration's authority under existing law to require conversions of existing facilities where possible. As a complement to this, I am also cosponsoring the Coal Substitution Incentive Act—introduced by the distinguished Senator from Minnesota—to provide limited, temporary assistance for the purchase of pollution abatement equipment by firms converting to coal.

The concepts behind these proposals are not new. Rather, these bills are an incorporation of many of the best recommendations which have emerged in extensive hearings and debate on similar proposals in previous congresses.

Indeed, we have known for a long time that economic considerations and national security require the development and use of fuels other than oil and natural gas. Yet, these two fuels continue to account for approximately 75 percent of our total domestic energy consumption as our domestic reserves dwindle and costly and largely unreliable imports increase. In 1976, 41 percent of our petroleum requirements were imported at a cost of over $34 billion—11 times what we spent for such imports in 1970, and $160 for every man, woman, and child in America. Further, the Federal Energy Administration projects that this percentage will increase to 46 percent by the end of this year and over 50 percent by 1985. We cannot afford to let that happen.

Coal and synthetic fuels from coal are an attractive alternative. Recoverable coal reserves are estimated at about 219 billion tons—enough for more than 300 years at the present rate of consumption. And, that coal can be liquefied or gasified into relatively clean fuels which would require minimal change in fuel distribution and use patterns. But coal—our most abundant and versatile fossil fuel—accounts for only 19 percent of our energy consumption.

It is time to end the huge disparity between domestically available energy resources and our current mix of fuels utilization. Coal, which fueled the industrial revolution that made the United States a world power, can help to keep us one if given the boosts it needs to reassume its rightful place as a major energy source.

Since the Arab oil embargo, significant strides have been made toward that goal. Coal's share of the Federal energy research and development budget has increased substantially. Coal gasification and liquefaction plants—five of them in my own State of Kentucky—are gaining approval and funding. Under existing authorities to be extended by the bill being introduced today, 74 existing powerplants have been identified as candidates for conversion from oil and gas and almost half have actually started burning coal.

Clearly, coal production is up and use is increasing—but not enough. A lot remains to be done, and we can ill afford to wait for another embargo or crisis to jolt us into doing it.

The national interest will be well served by the swift passage and implementation of these measures.

By Mr. CANNON:

Senate Joint Resolution 8. A joint resolution proposing an amendment to the Constitution of the United States providing for the election of the President and the Vice President of the United States; to the Committee on the Judiciary.

Mr. CANNON. Mr. President, I intro-

duce for appropriate reference a joint resolution to amend the Constitution of the United States with respect to the election of the President and Vice President.

This resolution provides for the proportional casting of electoral votes in each State and the District of Columbia in exact ratio to the popular votes cast for each candidate for President and Vice President at the polls throughout the Nation on election day.

It is a matter of great familiarity to all Members of the Senate, I am sure, that today's method of electing the highest officers in the United States is antiquated and inequitable. The winner of the popular vote in any given State receives all of the electoral votes and the loser receives none. This winner-take-all system may not appear to be unfair when an election is won by a clear majority of all the votes cast. But when an election is hotly contested and the margin of victory is narrow, then the electoral votes in each State are extremely important. The swing of electoral votes in a few large States, or even in a number of smaller States, could change the results of an election.

Mr. President, my bill would eliminate the winner-take-all factor and would insure the fair and accurate apportionment of electoral votes among the candidates for President and Vice President.

The popular votes in each State and the District of Columbia would be counted and certified to the Congress where each person for whom votes were cast would be credited with the proportion of the electoral votes he would be entitled to in direct ratio to the popular votes cast for him in each State and the District of Columbia. Electoral votes would be reduced to fractions down to one one-thousandth of an electoral vote. This precise method would insure to the people a kind of guarantee that the candidates of their choice would receive the votes cast for them.

Another benefit of this bill would be the elimination of the unfaithful elector—one who is charged with casting an electoral vote for the winner of the presidential election in a given State, but who violates his trust and votes for some other person. Thus, a bona fide candidate is denied an important electoral vote. That practice must be prohibited. It would be impossible under my bill since proportional electoral votes would be given to each candidate without the services of presidential electors.

Finally, but of equal importance, my bill would preserve the electoral votes, if not the electors, as provided for in the U.S. Constitution. In principle, the electoral votes were intended to impart some balance among the States by giving each, one electoral vote for each U.S. Senator, and to reflect the population of each State, an additional electoral vote is given for each Representative.

If all electoral votes were cast on the basis of popular votes, the existing system would still be most desirable, but when losers receive nothing or when electoral votes are cast facetiously, then it is time for a change to a better, more equitable system.

I hope that this bill and others like it will be given early consideration so that in the next Presidential election, we will have a truly fair and accurate method for counting and apportioning votes cast for presidential and vice presidential candidates.

By Mr. JAVITS (for Mr. BROOKE, for himself, and Mr. GLENN, Mr. HART, Mr. HASKELL, Mr. HUMPHREY, Mr. MAGNUSON, Mr. CHURCH, Mr. HATFIELD, Mr. KENNEDY, Mr. WEICKER, Mr. JAVITS, Mr. MCGOVERN, Mr. CASE, Mr. STAFFORD, Mr. STEVENS, Mr. WILLIAMS, Mr. STEVENSON, Mr. PERCY, Mr. CLARK, Mr. PELL, Mr. METZENBAUM, Mr. DECONCINI, Mr. BAYH, Mr. CULVER, Mr. MCINTYRE, Mr. STONE, Mr. ABOUREZK, Mr. BUMPERS, Mr. LUGAR, Mr. PEARSON, Mr. BELLMON, Mr. CRANSTON, Mr. GRAVEL, Mr. DANFORTH, Mr. DOLE, Mr. JACKSON, Mr. PROXMIRE, Mr. MATHIAS, Mr. GRIFFIN, Mr. NELSON, Mr. EAGLETON, Mr. MATSUNAGA, Mr. BURDICK, Mr. BIDEN, Mr. MUSKIE, Mr. HATHAWAY, Mr. SCHWEIKER, Mr. RIEGLE, Mr. FORD, Mr. SARBANES, Mr. HUDDLESTON, Mr. RIBICOFF, Mr. HEINZ, and Mr. WALLOP):

Senate Joint Resolution 9. A joint resolution designating January 15 of each year as "Martin Luther King Day"; to the Committee on the Judiciary.

MARTIN LUTHER KING DAY

Mr. JAVITS. Mr. President, tomorrow, January 15, marks the 48th anniversary of the birth of Dr. Martin Luther King, Jr. It is a most appropriate time to honor this great man and the dream he articulated for all Americans.

The year of his death, 1968, seems very far behind us today. In large part, passions have cooled and the flames of anguish, bitterness and frustration that consumed the Nation in that tumultuous year have died away. What is left to us, in the perspective of history and of our image of ourselves as a Nation and a people is the vision that Martin Luther King lived for, the dream for which he died.

That vision was not just for black Americans, or for oppressed minorities, or even just for the poor. It embraced all Americans in the quest to bring to full fruition our fundamental principles, that "all men are created equal," and with an equal right to "life, liberty, and the pursuit of happiness." Dr. King's vision was an America purged of racial prejudice, hatred, and fear; at peace with itself and united by new bonds of Christian brotherhod and reconciliation.

In the face of every threat to his life and safety, and those of his friends and family, and despite all the violence and humiliation to which he and his followers were subjected, Dr. King held to his belief in nonviolence.

Some have said that Dr. King had a naive optimism in nonviolence. But his militant nonviolence accomplished more in his short lifetime than all the violence of the racists, black or white. He set the civil rights movement on a new course in the United States, and it will yet prevail. He helped to unify the races by showing what one man could do by believing in brotherhood. Others are continuing and will continue, his work. The dream of true equality of rights and opportunities without regard to race is nearer because of Martin Luther King.

In this Bicentennial era, I can think of no man whose life better symbolizes the principles on which this Nation was founded—the principles of freedom for which generations of Americans have fought and died—for which Martin Luther King fought and died.

Today, Mr. President, as one way of insuring renewed dedication to his goals of freedom and equality, I would like to introduce, as I did in 1968, 1969, 1971, 1973, and 1975, a resolution making the birthday of Martin Luther King, Jr., January 15, a national day of commemoration. This day of commemoration will always remind us of how we must respect and understand one another if we are ever to realize the principles upon which this Nation was established.

I am very pleased that a majority of the Senate has cosponsored this resolution. And I am hopeful that this overwhelming support is an indication of how expeditiously we will consider and pass this important legislation.

I ask unanimous consent that the text of this resolution be printed at this point in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 9

Designating January 15 of each year as "Martin Luther King Day"

Whereas the United States of America was deeply grieved by the vicious and senseless act which ended the life of the Reverend Dr. Martin Luther King, Junior, this country's apostle of nonviolence;

Whereas the United States of America, and its Senators and Representatives in Congress, recognize and appreciate the immense contribution and sacrifice of this dedicated American;

Whereas the American people are determined that the life and works of this great man shall not be obscured by violence and anger, but rather that they shall remain a shining symbol of the Nation's nonviolent struggle for social progress;

Whereas it is incumbent upon us to recognize that violence, hatred, and national division do no honor to the man who has been taken from us;

Whereas mutual respect and a firm commitment to the ideals of nonviolence for which he labored will be the most lasting memorial to the life of the Reverend Doctor Martin Luther King, Junior;

Whereas it is fervently hoped that his death may serve to reconcile those among us who have harbored hatred and resentment for their fellow Americans, to the end that our country may at last realize the ideal of equality set forth in our Constitution: Therefore, it is hereby

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, in honor of the Reverend Doctor Martin Luther King, Junior, who was born on January 15, 1929, January 15 of each year is hereby designated as "Martin Luther King Day". The President is authorized and requested to issue a proclamation each year calling upon the people of the United States to commemorate the life and the service to his country and its citizens of the Reverend Doctor Martin Luther King, Junior, and to observe that day with appropriate honors, ceremonies, and prayers.

By Mr. ABOUREZK:

Senate Joint Resolution 10. A joint resolution to extend the period of time in which the American Indian Policy Review Commission must submit its final report and to increase the authorization of appropriations for such Commission; to the Committee on Interior and Insular Affairs.

Mr. ABOUREZK. Mr. President, on November 23, 1976, the members of the American Indian Policy Review Commission, which I chair, voted to extend the time in which the American Indian Policy Review Commission must submit its final report to Congress by 3 months. Since the original submission date was set forth in Public Law 93–580, which provided for the establishment of the American Indian Policy Review Commission, such extension requires an amendment to the authorization. This amendment which in effect establishes May 18 as the final date for submission of the Commission report will not extend or alter the expiration date of the American Indian Policy Review Commission as established in section 5a of Public Law 93–580, which is June 30, 1977. The 3-month extension will also necessitate an increase in the appropriations. Since the full amount authorized for the American Indian Policy Review Commission, $2,500,000, has been appropriated, I am requesting that an additional authorization of $100,000 be provided to complete the important work of the American Indian Policy Review Commission.

By Mr. STONE (for himself, Mr. ROBERT C. BYRD, Mr. JACKSON, Mr. RANDOLPH, Mr. CHILES, Mr. NUNN, Mr. HATFIELD, Mr. MELCHER, and Mr. DANFORTH):

Senate Joint Resolution 11. A joint resolution providing for a National Leadership Conference on Energy Policy to be held during 1977; to the Committee on Interior and Insular Affairs.

NATIONAL LEADERSHIP CONFERENCE ON ENERGY POLICY

Mr. STONE. Mr. President, I am today introducing, with several other Senators, a resolution which calls upon the President of the United States to convene a national leadership conference on energy policy. On August 27, 1976, the Senate passed an almost identical resolution, Senate Joint Resolution 206. Unfortunately, the same resolution introduced by Congressman HARLEY STAGGERS, chairman of the Interstate and Foreign Commerce Committee, was not acted upon by the House of Representatives before the 94th Congress adjourned. I am introducing this resolution again because the country does not as yet have a comprehensive, national energy policy. This is the case despite the fact that our dependence on foreign sources of energy is increasing and our vulnerability to any future embargo is greater than ever before.

The dangerous situation we are in was recently dramatized by the ability of the Organization of Petroleum Exporting Countries to increase yet again the price of crude oil. Even though Saudi Arabia and the United Arab Emirates will apparently keep this price increase less than expected, the fact remains that our country and other industrial countries must pay whatever price the OPEC nations decide to set. This is certainly an intolerable situation.

Mr. President, the new administration has a unique opportunity to lead the Nation toward the development of an effective national energy policy. Certainly, a fresh approach is needed and I am confident that President-elect Carter will provide that approach. In my opinion, the National Leadership Conference on Energy Policy, as called for by this resolution, would be of considerable assistance to the new President in this respect. I have presented the suggestion of a National Energy Conference to President-elect Carter and his energy advisers. The introduction of this resolution today is in the spirit of suggestion and with the belief that such a conference can help the President and the Congress to come to grips with the continuing energy problem.

In directing the President to convene a National Leadership Conference on Energy Policy, this resolution seeks to renew the public's concern and attention with respect to the Nation's energy crisis and to stimulate the development, adoption, and implementation of a comprehensive national energy policy.

The resolution sets forth a list of individuals, institutions, organizations, and citizens groups which shall be represented at the conference, including Members of Congress and other Government officials; representatives of energy industries, public utilities, industrial and financial trade organizations; representatives of environmental, conservation, agricultural, and consumer organizations; representatives of organized labor; and individual citizens with particular academic, scientific, or other special expertise in the energy field.

The 1973 embargo on petroleum exports imposed by the Organization of Petroleum Exporting Countries shocked the economies of the United States and other industrialized countries. In this country, inflationary pressures were dangerously exacerbated and the recession was deepened. Unemployment increased dramatically in sectors of the economy particularly dependent on energy consumption. America's national security interests and position within the community of nations were adversely affected. The OPEC embargo dramatized how precariously dependent America had become on foreign sources of energy. It also underscored how wasteful America had become in its consumption of energy.

Before, during, and after the embargo, the 93d Congress took a number of significant actions in the energy field, including the enactment of the Emergency Petroleum Allocation Act; the establishment of a major energy research and development program; and the creation of the Federal Energy Administration to administer allocation and pricing programs, collect energy information, and develop new energy policies.

Although the end of the embargo alleviated some of the immediate problems facing the country, the fundamental problems of increasing dependence on foreign energy sources and increasing energy demand remain. Energy prices have quadrupled in 3 years and are increasing. Our economy and our national security are more dependent than ever before on unreliable sources of energy.

With this situation in mind, the 94th Congress considered and debated numerous legislative proposals dealing with various aspects of the Nation's energy crisis. Countless days of public hearings were conducted by many different committees of the Senate and House of Representatives. A number of significant measures were enacted including the Energy Policy and Conservation Act, the Naval Petroleum Reserves Production Act, and the Energy Conservation and Production Act. These measures provide, among other things, for the development of a Strategic Reserve System, the administration of domestic energy pricing policies, and the establishment of major conservation programs.

Despite the enactment of these and other statutes, Mr. President, experts and Government leaders remain divided and uncertain as to the contents of an effective national energy policy and the public appears to have become indifferent. Energy demand, having leveled off for 2 years following the embargo, is rising again as economic recovery proceeds. Although the short-term supply situation appears secure, America's dependence on foreign sources of energy continues to increase and OPEC continues to raise its prices for petroleum and petroleum products.

We remain today—as we were at the time of the 1973 embargo—dangerously dependent upon OPEC for our vital energy supplies. Until this situation is corrected, our national security—as well as our economic well-being—will to a large extent be subject to decisions made beyond our shores and over which we have no control.

I respectfully suggest, Mr. President, that we have come to a point of national indifference toward America's energy supply. As a people we seem to prefer the illusion of short-term comfort to the reality of dealing with our fundamental energy problems. Ironically, this apathy is increasing as the country begins to recover from the economic recession and has a higher demand for energy. If the recovery continues—as we hope it would—demand for more energy must be expected to rise in tandem.

An example is the increased demand for motor gasoline. For the month of September 1976, demand for motor gasoline was 7.08 million barrels per day. Compared to the same period in the last 3 years, demand was up 5.2 percent over 1975; 10.8 percent over 1974; and 7.6 percent over 1973. Motor gasoline demand for the year 1976 to date—ending in September—was up 4.6 percent over the same period for 1975; 7.2 percent over 1974; and 4.1 percent over 1973.

In order to rekindle our national resolve and to focus our thinking about energy, I propose that the conference should convene soon enough to lay the groundwork for a Presidential and congressional energy policy initiative early this year. The recommendations of the conference should provide a springboard

for the President and the Congress to achieve a truly comprehensive energy program for the country.

As set forth in section 2 of the joint resolution, the conference would consider alternative policies available to the United States in resolving the energy problems confronting us. The conference would review our present situation, analyze our opportunities and difficulties, and construct proposals which would form the basis for an immediate national energy policy. In this process, the conference would consider the development of reliable sources of energy, the need for meaningful energy conservation, the economic, environmental, and international as well as domestic impact of specific energy proposals.

Section 3 of the joint resolution directs the President to establish a conference committee, composed of 15 individuals representative of conference participants, to plan the conference pursuant to Presidential guidelines. It provides for the staffing of the conference under the authority of and direction of the conference committee. The conference committee should be directed by the President to consult with interested citizens, organizations, and associations at every stage of planning and structuring the conference, in order to assure that the format and focus of the conference reflects the whole range of concerns and viewpoints regarding energy.

Section 6 of the joint resolution provides for the authorization of such sums of money as are necessary to carry out the provisions of the resolution. The Conference Planning Committee would have control over the cost of the energy conference, but it could be and should be as inexpensive as possible. As in the case of past Presidential conferences, I anticipate that most of the particants would pay their own way in order to present their views at such a crucial symposium.

The main focus of this conference is to be the development of a near-term energy policy. While we have much to accomplish in the area of research and development for new energy sources and improved technology, the Nation's most urgent need is to put into place an energy policy which will assure reasonable economic growth, encourage meaningful conservation, and safeguard the environment over the next 10 years. The conference should concentrate on what should be done now to encourage greater domestic production of oil, gas and coal recognizing that the American economy and standard of living will continue to require enormous amounts of energy.

We need to review and analyze the impact of present Government policies including oil and gas price control, Federal coalmining regulation, and Federal tax provisions—to determine their impact on America's energy situation. Although the 94th Congress enacted the Energy Policy and Conservation Act of 1975 and worked hard on other legislation affecting energy, we do not have either a clear understanding of the resulting impact of the present energy legislation or the proper future role of Government regulation in the energy field.

The conference should give attention to at least five areas which bear upon the formulation of a national energy policy. These areas are: the worldwide energy situation, energy resources in the United States, the social, economic, and political implications of energy policy options, the environmental implications of energy policy options, and energy conservation. All of these areas interrelate and these relationships should also be explored.

Most Americans realize that there can be no consideration of America's energy needs without reference to the international energy situation. The OPEC cartel controls crucial production and pricing levels. To a great extent, the economics of the industrial West and Japan and the survival and development capabilities of the Third World are tied to OEPC supplies. The possibility of changing this control seems remote; therefore, we have to review the international situation carefully in the process of developing a national energy policy.

The conference will want to study our own American resources. Our highly developed technological capabilities and our abundant natural resources give the United States a unique position among industrialized nations in meeting future energy needs. Taken together and properly fastened, we may have sufficient sources of oil, gas, coal, and nuclear power to meet our energy needs in the near future. How wisely we use these resources and this technology will in large part determine our future economic development and national security.

There is a price to be paid for new energy development or the lack thereof. The impact of alternative energy policies on our way of life must be recognized. It is incumbent upon us as a people to chart a course somewhere between ill-considered development and no development at all. The conference must address these matters.

There is a strong sentiment that energy development in this country must not be undertaken without first carefully considering the impact on the environment. We have already paid a high price for the random energy development practices of the past. Only the orderly and intelligent use of the Nation's energy resources can provide for continued economic development without ruining our precious natural heritage. The National Leadership Conference on Energy Policy should review carefully the relationship between the need for energy development and the imperative of preserving the environment.

Additionally, Mr. President, the conference must look to energy conservation. No nation wastes more energy than the United States. A significant amount of our consumption is mindlessly lost without purpose. As yet, neither the Federal Government nor State governments have implemented an effective energy conservation program. Consumption levels must be reduced, however, without undue disruptions to the essential requirements of our economy and standard of living. What we need, and what the conference should work toward, is a practical and equitable conservation program for the country that will have the support of the American people.

Mr. President, we need a comprehensive energy program now. Waiting earns us nothing and may cost us plenty in lost jobs, another round of inflation, and low national morale. Our energy problems are serious—and they are not going away by wishful thinking. Let us marshal our resources—our advanced technology, our material abundance, our diplomatic skills, and our "can do" spirit—and direct them toward our most critical continuing dilemma—energy. To do less is to invite disaster.

For all these reasons, Mr. President, the resolution I have submitted today, calling for what amounts to a summit conference on energy, should be agreed to and implemented.

Mr. President, I would like to include in the RECORD a chart of U.S. petroleum imports for the period of January through September 1976. I ask unanimous consent that this chart, some other articles, and the text of the joint resolution be printed at this point in the RECORD.

There being no objection, the joint resolution and material were ordered to be printed in the RECORD, as follows:

S.J. RES. 11

Whereas the United States continues to face critical problems relating to energy, despite enactment in 1975 of the Energy Policy and Conservation Act;

Whereas because of insufficient development of reliable domestic energy sources, such as oil, gas, and coal, and insufficient energy conservation programs, United States dependence on unreliable foreign energy sources continued to increase during 1976;

Whereas the Nation's security, economic vitality, and environmental well-being depend upon the adoption of a comprehensive energy policy to resolve these problems; and

Whereas the successful development and implementation of such a policy requires the active support of the American people and the cooperation of all levels and branches of government: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President shall call a National Leadership Conference on Energy Policy (hereafter in this joint resolution referred to as the "Conference") to convene in Washington during 1977. The President shall, not later than April 1, 1977, announce the beginning date of the Conference.

SEC. 2. (a) It shall be the purpose of the Conference to consider alternate policy approaches available to the United States with respect to energy. In particular, the Conference shall develop specific proposals to increase the supply of energy from reliable sources with minimum impact on the environment, and decrease domestic energy demand in ways not harmful to America's economic recovery, which shall form the basis for the development of a national energy policy to be implemented during 1977 and thereafter.

(b) The Conference shall be composed of, and bring together—

(1) Members of the Congress and Federal, State, and local government officials with responsibility over energy policies and programs;

(2) representatives of energy industries;

(3) representatives of public utilities;

(4) representatives of environmental and conservation organizations;

(5) representatives of consumer organizations;

(6) representatives of industrial and financial trade associations;

(7) representatives of organized labor;

(8) representatives of the academic and scientific communities;

(9) representatives of agricultural groups; and

(10) individual citizens with particular expertise in the energy field.

SEC. 3. (a) Within thirty days after January 22, 1977, the President shall appoint a committee which shall make all necessary arrangements and preparations for the Conference. The committee shall consist of fifteen members and shall, insofar as possible, be representative of members of the Conference. The President shall designate one of the members of the committee to serve as chairman and one to serve as vice chairman.

(b) The committee shall prepare and make available background materials for the use of members of the Conference.

(c) The committee is authorized—

(1) to request the cooperation and assistance of other Federal departments and agencies in order to carry out its responsibilities, and

(2) to employ such personnel as may be necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive civil service, and without regard to chapter 51, and subchapter III of chapter 53 of such title, relating to classification and General Schedule pay rates, but no individual so employed may be paid compensation at a rate higher than the annual rate of level V of the Executive Schedule under section 5316 of such title.

(d) Each Federal department and agency is authorized and directed to cooperate with and provide assistance to the committee upon its request.

SEC. 4. Members of the Conference and members of the committee shall, when attending the Conference or when attending to the business of the committee, as the case may be, and away from their homes or regular places of business, be allowed travel expenses, including per diem in lieu of subsistence, as may be authorized under section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

SEC. 5. A final report of the Conference, containing such findings and recommendations as may be made by the Conference, shall be submitted to the President not later than sixty days following the close of the Conference, which final report shall be transmitted to the Congress and made public.

SEC. 6. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this joint resolution.

[From the St. Petersburg Times, Aug. 2, 1976]

OIL TIME BOMB

The 200th year of American independence is also the third year of Project Independence—1980, the resolute but fleeting national commitment to make the United States invulnerable to any future Arab oil embargo.

Its purpose, said Richard Nixon in November, 1973, was "to insure that by the end of this decade, Americans will not have to rely on any source of energy beyond our own." "Our independence," he said, "will depend on maintaining and achieving self-sufficiency in energy."

After those first exuberant months, the goal for achieving self-sufficiency was set back to a more realistic 1985. And since then, with gasoline plentiful at the pumps, it has effectively disappeared from official exhortation, and from the public consciousness.

Meanwhile, our dependence on foreign oil has increased, not diminished; imports have risen steadily since 1974 and in March crept above the level of 8-million barrels a day for the first time in history. At that level, oil imports exceed domestic production.

As long as Middle East oil is available, the principal effect of such heavy imports—serious enough—is financial. But what if events in that part of the world lead to another Arab embargo, as in 1973–74? The answer given by Elliott Richardson, U.S. Secretary of Commerce, is chilling.

The economic consequences, said Richardson last week, "would be literally catastrophic . . . Pressures would mount for a prompt international 'solution'. Some, no doubt, would argue for abandonment of our traditional support of Israel. Others would demand forceful intervention against the Arabs. Either course of action could fundamentally destabilize the international balance of power—and threaten ultimately to involve the United States in a major military struggle."

Few knowledgeable people disagree with this grim assessment.

Real progress toward energy independence calls first for strong, effective conservation measures. Too much of our energy consumption is recklessly wasteful. It requires, also, greatly expanded research and development of alternative sources, including utilization of solar energy.

Only government can supply the necessary funds for research and the leadership for conservation. The leadership must be not only truthful, but believable. In a recent survey, 32 per cent of those questioned believed that the gasoline shortage of three years ago was unreal and contrived.

Given confidence that the government knows what it is doing, and that it is telling the truth, an overwhelming majority would respond.

[From the Washington Star, Sept. 16, 1976]

ENERGY POLICY OUT OF STEAM

(By James J. Kilpatrick)

What ever became of a national energy policy? It hasn't been heard from lately. An uneasy impression will not go away that in terms of both conservation and development, we are drifting.

Here in Washington, one listens for the impact of hard decisions; and one hears mainly the soft shuffle of papers. The several agencies concerned with energy appear to be laboring mightily; whatever shortages one hears about, there is no shortage of statements, reports, speeches and miscellaneous publications. Talk is in over-supply. But of action, one perceives very little.

Two or three years ago, it appeared that a small sense of urgency was beginning to take root. The oil embargo that began in October of 1973 had some good effect: For the first time, great numbers of our people became aware of certain truths that should have been evident all along. These were truths about the nature of the world, and about the nature of energy. We had never thought much about them.

Suddenly there was recognition that the United States, which depends upon oil for its economic life, was criticaly dependent upon oil from foreign sources. It began to sink in that conservation and development were problems not only for America, but for the world. The think-tank experts had been warning for 30 years that time was running out on "cheap energy." Now the warnings were being heard. The government leaped to its saddle and rode off in all directions.

The embargo ended in mid-March of 1974. What happened to the fired-up sense of urgency? The steam leaked out. Little remains of the conservation programs of 1974. Our cities are brilliantly lighted by night. The 55-mile speed limit is universally disdained. Nobody even talks much about conservation anymore.

The American Petroleum Institute has the most authoritative figures on the oil picture. This is the sobering fact: We are now importing 41 per cent of our demand. In the period immediately before the embargo, imports from the Arab nations averaged 1.1 million barrels per day. That figure is now 2 million barrels per day. Despite significant improvements in automobile engines, demand keeps rising steadily.

Urgency has faded not only on the conservation side, but on the development side also. We ought to be far along in the drilling of test wells in promising offshore areas; progress is exceedingly slow. The development of nuclear power plants is hobbled by endless red tape. We ought to be investing billions in bold programs—space age programs—to harness infinite sources of energy in the sun, the wind, the tides, and in the convention of hydrogen. Some interesting and promising work is being done, but we are working mostly nine to five.

What will it take to revitalize the effort? Another embargo? Massive brownouts? Rigorous restrictions upon consumption? No ready answers are forthcoming. Once they get good and galvanized, the American people are the greatest bunch of three-shift, full-throttle miracle workers in the world. It takes a lively shock to get them going. Mere exhortations accomplish little; and statistics are a bore.

So we muddle along. The Alaskan pipeline should be in operation in another 15 to 18 months, bringing in 600,000 to a million barrels per day. Four or five years hence, offshore wells may make an important contribution. If a free market were permitted to operate an oil and gas prices, sharp price increases might have a useful shock effect on the development of competitive sources.

It is all pretty iffy, hohum, and may-and-might. When it comes to an energy policy, the image of America is the visage of Mad magazine's Alfred E. Newman. Who? Me worry? It's no way to lead the free world.

[From the Florida Times-Union, Oct. 6, 1976]

THE PRICE OF GAS

When the Arab oil embargo plastered "oil crisis" headlines across the U.S. (and created long lines at service station pumps) the U.S. took the leadership (in the person of Secretary of State Henry Kissinger) in forming the International Energy Agency.

The IEA, in theory, was to be the Western counterforce to OPEC (Organization of Petroleum Exporting Countries). The IEA members then set about devising some effective conservation measures directed at lowering the dependence of the industrial West upon the OPEC oil producers.

A set of conservation policies was worked out, put into effect, and in general seemed to work—everywhere, except in the U.S., which started the whole thing.

This spring, for example, this nation, for the first time in history, imported more oil than we produced. Our domestic production, in fact, was a million barrels a day down from the 1970 (non-crisis) era.

Contrarywise, most European members of IEA have made great strides in conservation, in new resources (such as the exploitation of North Sea oil) and developing alternate energy resources (France is way ahead of the U.S. in nuclear energy).

And our European allies have not hesitated to point out from time to time that it is the U.S.—the guiding light in founding the IEA—which is most dragging its feet.

Accordingly, a current bit of gratuitous advice from our IEA allies, in the form of a recent IEA report, is likely to fall upon deaf ears in the U.S. Their (rather unappealing) appeal: We should double the price of gasoline (by increased taxation) to encourage conservation.

Such a proposal—add 60 cents new tax to the current 60 cents average price of U.S. gas—will hardly draw applause from U.S. motorists. But, before snorting at "such a dumb idea," the aforementioned average U.S. motorist might do well to listen to the IEA's rationale. As reported by Jim Browning of the Christian Science Monitor from the IEA Paris headquarters:

" 'Beginning in 1985,' says one analyst, 'we know that demand for oil is going to start exceeding capacity to produce. Then, prices are really going to go up. What we must do now is convince people that energy prices must go up, so that they will begin reacting and preparing....' "

It is not necessary that the U.S. take IEA's specific remedy and double the price of oil. But we would be remiss not to accept the basic underlying point: that the world of even relatively cheap energy will not last much longer.

The point remains that, despite the warning issued by the Arab oil boycott more than two years ago, this nation still has no comprehensive national energy program at work. Continuing this procrastination could well lead to future disaster.

[From the Orlando Sentinel Star, Oct. 24, 1976]

CONGRESS INACTION ADDS UP TO LITTLE CHANGE ON ENERGY

(By Representative JIM WRIGHT)

WASHINGTON.—The 94th Congress was no model of energy efficiency. Hundreds of proposals, thousands of words and hours of debate on the nation's energy problems added up to little positive change in the nation's production or consumption of fuel.

"Since the Arab oil embargo three years ago, we have tried to do a few timid things to reduce consumption, but they have not been very successful," said Rep. Jim Wright, D-Tex. a few days before the end of the 1976 session.

"We have dabbled with oil and gas pricing. We have made more money available for long-range research, for things like solar energy, that may help us 30 or 40 years from now. But as far as doing anything practical to increase the supply of energy and reduce our dependence upon foreign sources in the foreseeable future, we have done nothing."

A Congressional Quarterly study of 16 key House and Senate votes on energy issues during the 94th Congress bears out Wright's verdict. These votes show that when Congress faced a tough energy decision it usually failed to take any positive action, thereby preserving the existing situation.

One major exception to this trend came early in 1975, when the House and Senate agreed to repeal the tax depletion allowance for major oil and gas producers. But critics argued that this action aggravated the nation's energy problems, by absorbing into the federal Treasury dollars that the industry would otherwise invest in further exploration.

In other energy key votes, the 94th Congress:

Deadlocked over whether to lift federal controls on the price of natural gas. The Senate and the Ford administration decided in favor of such deregulation; the House opposed it.

Refused to increase gasoline taxes, demonstrating its lack of stomach for imposing tough or unpopular conservation measures. The House rejected such a tax, the keystone of the congressional Democrats' energy package, by a margin of 5 to 1; the Senate later rejected a smaller tax, 3 to 1.

Rejected an effort to require industry to share equally with the federal government in the burden of cost overruns on the controversial nuclear breeder reactor project. This joint government-industry project is now expected to cost about $2-billion, up from the initial estimate of just below $700-million.

Upheld President Ford's veto of a strip mining control measure.

Defeated a move to break up the nation's major oil companies.

Gave unenthusiastic approval to a massive but watered-down energy policy bill, the major energy legislation enacted during the 1975–76 sessions.

President Ford won a surprising number of these key votes, considering the overwhelming Democratic majorities in both chambers.

Part of the secret of his success was the fact that the Democrats found themselves badly divided when the subject of energy arose. Economic, philosophical and regional differences overrode party loyalty to produce an unusual number of close votes.

Late in the session, by a four-vote margin, Ford won defeat of a bill to revise the way in which federal offshore oil is leased for development. But he saw Congress, by even narrower margins, kill his proposals for transferring the uranium enrichment business to private industry and for providing new forms of aid for developing synthetic fuels.

A number of significant energy-related votes came on environmental matters, clean air requirements in particular. But again, the outcome was inconclusive.

Electric utilities and other industries suffered a setback when Congress refused to strike out of clean air law the protection extended to pristine air, barring any degradation. The auto industry, backed by the Ford administration, was more successful, winning House approval of a delay in auto emission deadlines and defeating a Senate move to force earlier compliance with those standards.

All these votes, however, were nullified on

the last day of the session. The Senate choked the clean air bill to death by a filibuster.

[From the Washington Post, Dec. 21, 1976]

USEFUL OIL PRESSURES

(By Joseph Kraft)

The Saudis are throwing their full weight against an open door when they use oil policy to press the United States into pushing Israel to negotiate for a settlement in the Near East. For the present Israeli regime, as the latest political developments make plain, is actually eager to negotiate.

As a result, the incoming Carter administration now enjoys a double opportunity. It has the leeway to accommodate this country's interest in a just settlement in the Near East with its interest in a serious energy policy.

The Israeli eagerness to negotiate springs from the inner necessities of domestic politics. The dominant labor party of Prime Minister Yitzhak Rabin faces so much trouble—in the form of inflation, strikes and internal division—that the only card it can play with public opinion is that of potential peacemaker.

Mr. Rabin has announced this fact in many different ways over the past few weeks. First he told visitors, including this columnist, that he intended to go to the country on the peace issue in the elections due next year.

Next he passed the word discreetly to both the Ford administration and senior foreign policy officials of the incoming Carter administration. That job was done by a supposed Israeli hawk, defense minister Shimon Peres.

Mr. Peres met with Secretary of State Henry Kissinger in Washington on the afternoon of Dec. 11. That evening he met with Secretary of State-designate Cyrus Vance and Mr. Carter's appointee as national security adviser. Zbigniew Brzezinski, at the home of Warren Manshel, a New York banker and publisher. Mr. Brzezinski came away from that session convinced that the internal competition in Israel was to be a peacemaker, not a hawk.

Finally, there has been the break with the coalition parties most opposed to concession of territories—the national religious parties. That cleared the way for Mr. Rabin's resignation and an early election in which he can go to the country asking for a mandate to make concessions.

In these circumstances the pressure to negotiate from Saudi Arabia is no great worry. For one thing, the Saudis' terms, as discussed by Ambassador Alireza with Secretary of State Henry Kissinger, are not so far from the Israeli notions.

Moreover, the oil policy selected by the Saudis as a means of pressure on Washington is by no means unwelcome. In order to impress the United States, the Saudis have split with other countries in the oil-exporting cartel known as OPEC. While the other OPEC countries decided to raise oil prices by 10 per cent now and 5 per cent in 90 days, the Saudis and their proteges, the United Arab Emirates, have elected to increase prices by only 5 per cent now.

The immediate upshot is a slightly smaller price increase than otherwise would have been obtained. That, in itself, is a slight gain.

The gain can be made a good deal bigger, given present circumstances in the United States. My strong impression is that this country, after a couple of years of infighting, has finally achieved a general consensus that something needs to be done about dependence on foreign oil.

Furthermore, it is already clear that the Democrats can take one vital step which they would not let the Republicans take. Because they are not suspected of being finks for industry, the Democrats can allow prices to rise. The price increase will go a long way—on top of measures already taken—to foster energy conservation in the U.S.

One final, and all-important, step is also open. President-elect Carter can flash to the world that he is dead serious about putting together a coherent energy policy. He can do that by naming former Defense Secretary James Schlesinger as energy czar, with the all-out mandate Mr. Schlesinger seeks as a condition for taking the job.

The United States would then be in a strong position to make the most of the double opportunity. It could foster Saudi moderation on price by going for the serious negotiations which the Israelis want anyhow. It can use Saudi moderation on price to prevent the OPEC hawks from imposing truly devastating rises. The gradual rises which are inevitable are merely a spur to the one thing this country most needs in the energy field—a coherent long-term program.

Managing all this, to be sure, is not going to be simple, especially for new boys. Progress, far from coming overnight, will have to be strung out over months and years. But for the first time there is maneuvering room, leeway to play the oil-Middle Eastern hand as it should be played.

[From the Miami Herald, November 26, 1976]

NO MATTER WHAT ARABS DO, U.S. NEEDS AN ENERGY POLICY

The Arab oil producing nations are meeting in Kuwait to decide on a price policy to take to OPEC when all the producers meet in mid-December. It is not whether prices will be increased, but how much, ranging from 10 per cent to 25 per cent.

Since the rest of OPEC consists mainly of No. 3 Venezuela and No. 9 Indonesia, the Kuwait decision will be seminal. Iraqi talk of a 25 per cent hoist has sent shivers up and down Western backs, to say nothing of Japanese.

We cannot believe that the major and dominant producer, Saudi Arabia, which is a friend of the United States and produces four times as much oil as Iraq, would listen to this patent Arab holdup.

Should it do so, Britain for one well might be driven over the brink of fiscal disaster, and others would suffer relatively. British North Sea oil is not due on line for another two years.

Unless we are wrong, the United States would be driven at least to much, much higher domestic gas taxes to cut down on consumption (rather than pay the same taxes to OPEC) and at most to some severe but historically unworkable form of rationing.

The trouble lies, of course, in the absence of any ongoing, honest, effective energy program at the same time that more and more foreign oil has had to be imported.

We need not blame the OPEC countries unduly: they are reacting not wholly out of greed, but also of the high degree of rise in prices in the things they import from the West. But that doesn't heat homes or move traffice in the United States. To do both since 1973 has caused a rise in oil imports from 35 per cent of all U.S. consumption to 42 per cent this year and probably to 46 per cent next year.

Trusting that the moderation of Saudi Arabia will prevail over the impetuous Iraqis, we still urge that Americans respond with an energy program that is just, innovative and doable. This could be, and probably will be, the new President's first major challenge when he takes office, for that seems to be the word from Kuwait. There is reason to believe that Jimmy Carter understands this, and that he will be an energy take-charge President.

ADDITIONAL COSPONSORS

S. 7

At the request of Mr. METCALF, the Senator from South Dakota (Mr. ABOUREZK) and the Senator from Wisconsin (Mr. NELSON) were added as cosponsors of S. 7, the Surface Mining Control and Reclamation Act of 1977.

S. 38

At the request of Mr. MCCLURE, the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 38, to repeal the Gun Control Act of 1968.

S. 45

At the request of Mr. MCCLURE, the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 45, to amend chapter 44 of title 18 of the United States Code (respecting firearms).

S. 57

Mr. MUSKIE. Mr. President, I ask unanimous consent that the Senator from West Virginia (Mr. RANDOLPH), the Senator from Alaska (Mr. GRAVEL), the Senator from South Dakota (Mr. BURDICK), the Senator from Iowa (Mr. CULVER), the Senator from North Carolina (Mr. MORGAN), the Senator from Vermont (Mr. STAFFORD), and the Senator from New Mexico (Mr. DOMENICI) be added as cosponsors of S. 57, a bill to amend the Federal Water Pollution Control Act Amendments of 1972.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STAFFORD. Mr. President, I am glad to support the efforts of the senior Senator from Maine to act quickly on needed water pollution authorizations. The proposed allocation formula is not, perhaps, the best that could be devised if more time were available. I agree, however, that immediate action is needed to assist those States which will run out of sewage treatment plant construction funds this year.

I do intend to offer an amendment to S. 57 to provide that no State will receive less than one-third of 1 percent of the total allotment. I believe this minor modification of S. 57 is necessary to do equity to States, like my own, whose proportionate shares are being reduced below their 1975 allocation.

I do not propose to delay action on this simple extension, and will offer my amendment in the most expeditious manner possible. It is important, however, to insure that in our quick action we not do harm to orderly State programs already underway.

S. 76

At the request of Mr. STONE, the Senator from Florida (Mr. CHILES), the Senator from North Dakota (Mr. BURDICK), and the Senator from South Dakota (Mr. MCGOVERN) were added as cosponsors of S. 76, to amend title XVIII of the Social Security Act.

S. 78

At the request of Mr. STONE, the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 78, a bill to amend title II of the Social Security Act.

S. 87

At the request of Mr. BUMPERS, the Senator from Minnesota (Mr. ANDERSON),

the Senator from Maryland (Mr. MATHIAS), the Senator from Vermont (Mr. LEAHY), and the Senator from Nevada (Mr. CANNON) were added as cosponsors of S. 87, to amend title II of the Social Security Act.

S. 141

At the request of Mr. FORD, the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 141, for the relief of Dr. Orlando Fusilero Bravo.

S. 146

At the request of Mr. GOLDWATER, the Senator from Oregon (Mr. HATFIELD, the Senator from Louisiana (Mr. JOHNSTON), the Senator from Alaska (Mr. STEVENS), the Senator from South Carolina (Mr. THURMOND), the Senator from Nevada (Mr. CANNON), the Senator from Rhode Island (Mr. PELL), the Senator from Kansas (Mr. DOLE), and the Senator from Washington (Mr. MAGNUSON) were added as cosponsors of S. 146, to repeal the earnings limitation of the Social Security Act for all workers age 65 and over.

S. 174

At the request of Mr. CLARK, the Senator from Rhode Island (Mr. PELL), the Senator from New Jersey (Mr. CASE), and the Senator from Iowa (Mr. CULVER) were added as cosponsors of S. 174, to amend the United Nations Participation Act of 1945.

S. 189

At the request of Mr. THURMOND, the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of S. 189, to amend title II of the Social Security Act.

S.J. RES. 2

At the request of Mr. BUMPERS, the Senator from Alabama (Mr. ALLEN), the Senator from Florida (Mr. STONE), and the Senator from North Carolina (Mr. MORGAN) were added as cosponsors of Senate Joint Resolution 2, proposing an amendment to the Constitution of the United States calling for a balanced budget except in time of war or national emergency.

S. RES. 18

At the request of Mr. HELMS, the Senator from Utah (Mr. GARN) was added as a cosponsor of Senate Resolution 18, relating to amnesty for certain draft evaders.

At the request of Mr. ALLEN, the Senator from New Mexico (Mr. DOMENICI), the Senator from Utah (Mr. HATCH), and the Senator from Idaho (Mr. MCCLURE) were added as cosponsors of Senate Resolution 18, supra.

S. RES. 25

At the request of Mr. BUMPERS, the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of Senate Resolution 25, amending Rule III of the Standing Rules of the Senate.

SENATE RESOLUTION 32—SUBMISSION OF FOUR RESOLUTIONS RELATING TO CONFEREES ON THE PART OF THE SENATE

(Referred to the Committee on Rules and Administration.)

Mr. HANSEN (for himself, Mr. CURTIS, Mr. DOMENICI, Mr. GARN, Mr. HELMS, and Mr. SCHMITT) submitted the following resolution:

S. RES. 32

Resolved, That rule XXVII of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"4. Conferees on the part of the Senate may not consider any motion (other than a motion to adjourn) in a meeting of a committee of conference unless the written text of the motion, or a written explanation of the substantive effect of the motion, has been furnished to each conferee on the part of the Senate prior to its consideration. It shall not be in order to consider the report of a committee of conference if any motion was considered by the conferees on the part of the Senate in violation of this paragraph.".

Mr. HANSEN (for himself, Mr. CURTIS, Mr. DOMENICI, Mr. GARN, Mr. HELMS, Mr. SCHMITT, Mr. STONE, Mr. FORD, and Mr. MCCLURE) submitted the following resolution:

S. RES. 33

Resolved, That rule XXVII of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"5. No Senate member who is not an appointed member of a committee of conference may participate in or vote at any meeting of a committee of conference unless he is first appointed to the committee of conference in place of a previously appointed member; in which event the member he replaces shall not be permitted to participate in or vote at any subsequent meeting of the committee of conference. The appointment of a new Senate member to a committee of conference in place of a member previously appointed must be announced on the Senate floor when the Senate is in session and appropriately entered upon and printed in the Senate Calendar of Business before such newly appointed members shall be permitted to participate in or vote on any matter before the committee of conference. If a conference report is ordered reported and any newly appointed Senate member of the committee of conference participates in the committee of conference, other than in conformity with the procedures provided in this paragraph, a point of order may be made against the conference report and if the point of order is sustained, the report shall be recommended to the committee of conference.".

Mr. HANSEN (for himself, Mr. CURTIS, Mr. DOMENICI, Mr. GARN, Mr. HELMS, Mr. SCHMITT, Mr. FORD, and Mr. MCCLURE) submitted the following resolution:

S. RES. 34

Resolved, That rule XXVII of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"3. When the Senate has agreed to a motion for the Presiding Officer to appoint conferees on the part of the Senate, if the matter or matters which are to be considered by the committee of conference were referred to and considered by more than one committee of the Senate, the Presiding Officer shall not appoint conferees on the part of the Senate until he has received the recommendation of the majority leader in consultation with the minority leader, and the chairman and ranking minority member of each of such Senate committees with respect to (1) the Senators to be appointed and (2) if Senators are to be appointed from more than one committee, that portion of the matters in conference with respect to which the Senators appointed from each committee are to serve as conferees.".

Mr. HANSEN (for himself, Mr. CURTIS, Mr. DOMENICI, Mr. GARN, Mr. HELMS, Mr. SCHMITT, Mr. STONE, Mr. FORD, and Mr. MCCLURE) submitted the following resolution:

S. RES. 35

Resolved, That rule XXVII of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"6. Senate conferees shall not conduct conference business or vote on any committee of conference unless a quorum consisting of a majority of the appointed Senate conferees, including at least one Senate conferee of the minority party, may agree that a Senate quorum for the purposes of a meeting of a specific committee of conference shall consist of less than a majority of the appointed Senate conferees: *Provided, however,* That a majority of the appointed Senate conferees must be present at a meeting of a committee of conference to agree upon the final text of a conference report in order to order it reported. If, pursuant to the procedures provided in this paragraph, a Senate quorum of less than a majority of the appointed Senate conferees is agreed upon for a specific conference, such an arrangement will be in order during a specific conference only upon the announcement of such an arrangement on the Senate floor when the Senate is in session and only after such announcement has been accompanied by the printing in the Congressional Record of a letter addressed to the President of the Senate, subscribed to by a majority of the representatives of each party appointed to the conference announcing that such an arrangement has been agreed upon. If a conference report is ordered reported other than in conformity with the procedures specified in this paragraph, a point of order may be made against the report, and if the point of order is sustained, the report shall be recommitted to the committee of conference.".

Mr. HANSEN. Mr. President. I am reintroducing resolutions that would considerably reform a very important aspect of the legislative system: the conference committee. The measures, I believe, make conference committee procedures more equitable for all persons involved.

I. THE IMPORTANCE OF CONFERENCE COMMITTEES

Often called the third House of Congress, the conference committees compromise and adjust the differing and conflicting versions of legislation passed by the two Houses. Since few, if any, of the important bills ever pass both Houses in identical form and since the final shape of legislation must be determined in conference, the importance of conference committees should not be underestimated.

Eleven to twelve percent of all public laws enacted during recent Congresses have gone through conference. But number alone cannot provide a proper index of the importance of the central role that conference committees play in the legislative process. Submitted to these House-Senate negotiations are most of the important measures before Congress, including most appropriations bills.

Once a conference report reaches the floor it is almost impossible to defeat. A report is of the highest priority and may be brought up at any time except when the Journal is being read or when the Senate is dividing. As of August 30 of last year, 182 conference reports have

been filed in the 94th Congress and only 7 have failed.

It is not in order to amend a conference report and it must be voted up or down in its entirety without debate. This, combined with the difficulty of reconvening or calling a new conference greatly enhances the power of conferees, especially near the close of a session.

II. THE IMPORTANCE OF CONFERENCE COMMITTEES TO THE COMMITTEE SYSTEM

When a bill reaches the conference stage of the legislative process, it has generally passed through subcommittee, full committee, and achieved floor passage in both Houses. Often there have been hearings on the bill and much committee time has been devoted to its consideration. And then, when it reaches the conference table, in the space of a few minutes, conferees can change the most important provisions of the bill. A former U.S. Senator, Albert Gore, commented on conference committees:

It is here . . . that a few men can sit down and undo the most painstaking work of months of effort by several standing committees and the full membership of both Houses.

Conference committees have the potential to waste the investment of valuable time, energy, and work of committee members.

The Committee on Committees is considering reform of the committee system. The objectives include reforms in jurisdictions, referrals, numbers and sizes, and limitations on assignments, but reform of the committee system without reform of the conference committee is incomplete. There is a saying that a chain is only as strong as its weakest link and I believe the conference committee to be the committee system's weakest link.

From my experience as a conferee on dozens of bills, I see the need for reform more clearly in the conference committee than anywhere else. Solving the problems of overlapping jurisdictions, bill referrals, and the like will help the Senate perform its general legislative duties more effectively, but if we are not represented well in conference, our effectiveness will be severely limited.

III. THE CONFERENCE COMMITTEE AS THE "WEAK LINK" IN THE COMMITTEE SYSTEM

Many times I have felt the frustration of coming out of conference knowing that the Senate position was not upheld as well as it should have been. We are no match for House conferees who seem to be able to uphold their Chamber's position on the most important provisions of a bill. Comparing the representatives from each Chamber it is easy to see that House conferees are usually far better organized. The Senate conferees, in contrast, come less prepared, if they come at all, and conduct business in an almost haphazard way; one might be hard pressed to realize that they are representing a common cause.

The difference between the two Houses in conference has not gone unrecognized. Richard Fenno, who studied the House Ways and Means Committee, commented on the differences in his book, "The Power of the Purse":

By general agreement, the House conferees are better prepared, better organized, better informed, more single-minded in their interest, and employ a more belligerent bargaining style.

David Paretz, one of the few contemporary political scientists to study conference committees, also noted the disparity between the House and Senate conferees:

Burdened by more committees, more subcommittees, ordinarily larger constituencies, greater demands by the mass media, and other conference committee responsibilities, Senators are frequently less diligent in their attendance, less informed and less involved in a conference than Representatives.

No doubt that when the Reorganization Committee finishes its work and its recommendations are implemented in the Senate, many of these problems will be mitigated. However, due to the nature of the differences between the House and Senate conferees, I cannot hope that we will be able to come to conference on equal footing with the House unless we reform the conference committees themselves.

My staff and I have worked together on what seem to be the most pressing problems facing Senate representatives in conference and as solutions to the problems we have isolated the need for rules governing conference proceedings. At present, there are few rules relating to the internal workings of a conference. The publication containing the Senate rules and relevant provisions of the Legislative Reorganization Act is 181 pages long. Only seven paragraphs, or slightly more than a full page, are devoted to conferences. Of the seven paragraphs only two are devoted to the actual conference itself. The remaining five paragraphs pertain to the handling of conference reports on the floor.

The lack of rules seems to favor the House conferees. Business is conducted in such a manner as to leave the Senate conferees confused, divided, and resultingly unrepresentative of the strengths of the Senate position. Granted that there is a need for flexibility in conference in order to work out interchamber differences and that rules are generally inflexible but, at present, flexibility is the ability to recede to the House position.

There are four specific areas where reform in conference committees would help Senate conferees uphold their Chamber's position: Rules governing conference proceedings in the areas of: First, attendance at conferences; second, the manner of proposing amendments during conference; third, the voting limitations of conferees from different committees; and fourth, the substitution of conferees.

IV. ATTENDANCE AT CONFERENCE

The Senate attendance at conference is markedly worse than that of the House. Typically in conference all of the appointed House Members end up facing only one or two Senators across a long green table. The House conference chairman, with a full contingent of conferees to support him, can become a very persuasive bargainer.

Poor Senate attendance gives the House a big advantage in conference. On a bill with many titles it is important to have the Senators present who have developed an expertise on a particular title. And it is not enough to have each Senator present only during the consideration of his particular titles. Tradeoffs, bargains, and concessions have to be made, all of which require a knowledge of the entire bill. An absent Senator can only entrust his proxy to a colleague who may not be as interested in his particular issue and its relevance to the bill as a whole.

A quorum requirement would go a long way toward lessening these disadvantages in conference. At present, there is no such requirement and one Senator may conduct business in the name of his entire Chamber. If the conference committee is to function as a viable and representative institution then it requires participation and rules governing participation.

A third paragraph as an amendment to rule XXVII of the Standing Rules of the Senate would solve the problem. It would require that a majority of the appointed conferees be present in order to conduct business at any committee of conference.

The proposed amendment also provides for the suspension of the quorum requirement if agreed to by a majority of the Senate conferees. This would give the conferees a degree of flexibility at conferences on unimportant bills with no major disagreements between the two Houses. These conferences serve only to hammer out the final language of a bill—often a tedious process which requires the presence of only one Senator.

V. THE MANNER OF PROPOSING AMENDMENTS

A second problem with conferences is that the details of the legislation being considered are such as to make it impossible to avoid significant errors in judgment. Although this problem is not limited to the conference stage of the legislative process, it is more pronounced here than anywhere else. When amendments are being rapidly thrown back and forth across the conference table, it is difficult to be aware of the ramifications of a particular amendment.

Here again, the House has an edge in dealing with the problem. The average House Member who sits on only one or two committees is more likely to be an expert in the subject under consideration and to have done the legislative work himself. Senators, by contrast, sit on three to five committees and are sometimes unaware of the specific provisions of a bill. When they propose amendments, they often do so in vague and very general terms, working with the result that the staff members, who must draft the language for the conference report, have little idea what the amendment's proponent had in mind.

House conferees usually present amendments in writing for all conferees to read, or at least dictate amendments from notes for all conferees to write down and think about before discussion and voting. If we could follow the House example, we could better avoid errors in judgment and improve our position

relative to the House in conference. A requirement that Senate conferees have in writing, the proposed amendment in front of them for a certain time period, would serve this purpose. It would give the Senate conferees a time to seriously study the proposals in front of them and make intelligent decisions on behalf of the Senate.

VI. VOTING LIMITATIONS ON CONFEREES FROM DIFFERENT COMMITTEES

The appointment of conferees from several standing committees causes yet another problem for the Senate conferees. Each conferee is limited, somewhat arbitrarily, to voting only on the particular title of a bill that comes out of his committee. It is often unclear exactly who has jurisdiction over what issues and when he is allowed to vote. Amendments added on the Senate floor and issues only addressed in the House bill compound the problem. It is difficult to fit a particular title of a bill under the jurisdiction of a few of the conferees without some kind of discussion and clarification.

The disorganization which often has disastrous effects for the Senate conferees, could easily be avoided by defining the role of each conferee before coming to conference. A formal agreement between the various committee chairmen and ranking minority members in consultation with the majority and minority leaders of the Senate would serve the purpose.

The Senate conferees would come to the conference table knowing exactly what their areas of jurisdiction are. There would be time to prepare for a particular issue and the initial confusion would disappear.

VII. THE SUBSTITUION OF CONFEREES

The fourth area of reform in conference pertains to the substitution of conferees. I have noticed, on several occasions, that Senators who are not duly-appointed conferees will attend and even vote in the name of absent conferees. There are certainly times when Senators who are not members of the conference committee can and should be invited to attend and address themselves to an issue before the conference, but such participation should be formalized.

Senators who are not conference members, voting in the name of an absent Senator, will only increase the confusion on the Senate side of the bargaining table. Substitute Senators will have to be brought up to date on all of the proceedings which takes a lot of time and, even then, they may still not be aware of all the issues at stake. New participants in a conference are more easily taken advantage of and serve to weaken the Senate position.

This highly irregular practice also violates the entire intent of having the Senate appoint conferees to represent it at conference. It establishes the frightening precedent that, in the absence of a duly-appointed conferee, any other Senator may represent the Senate without its knowledge or acquiescence. The regular method of appointment, which was established to choose conferees who represent the strengths of the Senate position is easily circumvented by this procedure.

Accordingly, the fourth reform I propose will codify what is usually thought of as a standard Senate practice, that only Members who are duly appointed may participate as Senate conferees in committees of conference. First, it would prohibit a Senator who is not a duly-appointed conferee from participating in or voting at any meeting of a conference. Second, it would provide that new Members may be appointed in place of Members already appointed as conferees if properly announced on the Senate floor when the Senate is in session and entered upon and printed in the Senate calendar.

SENATE CONCURRENT RESOLUTION 5—SUBMISSION OF A CONCURRENT RESOLUTION RELATING TO DIPLOMATIC RECOGNITION OF VIETNAM

(Referred to the Committee on Foreign Relations.)

ACCOUNTING FOR THE MIA'S

Mr. GRIFFIN. Mr. President, today I am introducing a concurrent resolution concerning those members of our Armed Forces who are still missing in action or unaccounted for in Indochina.

Some facts are clear:

About 2,300 Americans remain missing in action or otherwise unaccounted for—4 years after U.S. forces were withdrawn.

The Communist Government of Vietnam has a moral as well as a legal obligation to assist in accounting for these men.

By its own admissions, the Government of Vietnam has information about our MIA's which it has refused to make available.

Ignoring its humanitarian and legal obligations, the Government of Vietnam—the Socialist Republic of Vietnam—has regarded and treated the MIA information it has as a bargaining chip which it seeks to use to extort money or other concessions from the United States.

President Ford has consistently and persistently demanded that Hanoi live up to its legal and humanitarian obligations to account for the MIA's as a precondition to consideration of other matters. To this end, he has refused to grant diplomatic recognition to Vietnam, and on three different occasions he has directed our Representative to the Security Council to veto Vietnam's application for U.N. membership.

President-elect Carter has expressed support for our MIA's, and has indicated that a satisfactory resolution of this matter should precede normalization of relations. Accordingly, this is a bipartisan as well as a humanitarian cause.

Unfortunately, as Ambassador Scranton noted in his November 26, 1976, statement to the U.N. General Assembly:

> Vietnam apparently persists in its efforts to play upon the anguish of the families of these men (the MIA's) for political and economic advantage.

It seems to me that one of the first orders of business of this Congress ought to be the adoption of a resolution to demonstrate the concern and solidarity of all Americans on this humanitarian issue. Such an action would serve to dispel any expectation that time and a change in administrations may lessen our resolve. Furthermore, it would strengthen President Carter's negotiating hand as he endeavors to deal with the situation.

It is with this in mind that I offer this resolution and urge its speedy approval.

Mr. President, I ask that the text of my resolution be printed at this point in the RECORD.

There being no objection, the concurrent resolution was ordered to be printed in the RECORD, as follows:

S. CON. RES. 5

Whereas approximately 2,300 Americans remain missing or unaccounted for in Indochina, despite extensive efforts of the United States Government to secure an accounting;

Whereas on numerous occasions representatives of the Socialist Republic of Vietnam have acknowledged that they possess additional information pertaining to American servicemen and civilians listed as missing in action in Indochina, and the existence of such information is confirmed by the United States intelligence agencies;

Whereas the heinous refusal of the Socialist Republic of Vietnam to provide detailed information on the fate of these men has caused untold suffering for their relatives and friends;

Whereas the refusal of the Socialist Republic of Vietnam to cooperate in this matter is a flagrant violation of humanitarian principles embodied in the Charter of the United Nations, and directly conflicts with the resolution adopted by the United Nations General Assembly on November 6, 1974, by a vote of 95–0, which called upon "parties to armed conflicts, regardless of their character or location, during and after the end of hostilities and in accordance with the Geneva Conventions of 1949, to take such action as may be within their power to help locate and mark the graves of the dead, to facilitate the disinterment and the return of remains, if requested by their families, and to provide information about those who are missing in action"; and

Whereas article 8(b) of the 1973 Paris Agreement on Ending the War and Restoring Peace in Vietnam provided that: "The parties shall help each other to get information about those military personnel and foreign civilians of the parties missing in action . . . and to take any such other measures as may be required to get information about those still considered missing in action": Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress of the United States that, until such time as the Socialist Republic of Vietnam cooperates in securing a satisfactory accounting for those Americans missing in action and unaccounted for in the territory under its control, the United States should—

(1) continue to oppose membership in the United Nations of the Socialist Republic of Vietnam; and

(2) continue to deny diplomatic recognition to the Socialist Republic of Vietnam.

AMENDMENTS SUBMITTED FOR PRINTING

APPOINTMENT OF ADDITIONAL DISTRICT COURT JUDGES—S. 11

AMENDMENT NO. 18

(Ordered to be printed and referred to the Committee on the Judiciary.)

Mr. ABOUREZK. Mr. President, on Monday, together with Senator MCCLEL-

LAN and several of my colleagues, I cosponsored legislation to provide additional district judges for our overworked and understaffed Federal judiciary. That bill, S. 11, provides 45 additional Federal judges, the number approved by this body during the last session when we passed S. 287.

It is my understanding that another bill, representing the recommendation of the Judicial Conference of the United States, will be introduced in the near future. The Judicial Conference bill represents data compiled from the conference's 1976 quadrennial survey of the needs of the federal system, whereas S. 287—and consequently S. 11—represents recommendations based upon the 1972 quadrennial survey. The Judicial Conference will ask the Congress to approve a greater number of district judges than that recommended in S. 11. I believe that the greater number of judges is not only justified but urgently needed, and I intend to join in sponsorship of that legislation at the appropriate time.

I am cosponsoring the legislation introduced by Senator MCCLELLAN to underscore my belief that we must provide the Federal judiciary with some assistance and we must do it now. This bill makes an initial step in that direction.

I am also introducing an amendment to S. 11 to provide an additional district judge for the district of South Dakota. South Dakota came very close to meeting the criteria used in recommending judgeships under S. 287 during the last session, however, that criteria was based on the 1972 quadrennial survey of the Judicial Conference. I have been working closely with the judges and State bar in South Dakota, as well as with the staffs of the Judicial Conference of the United States and of the Subcommittee on Improvements in Judicial Machinery, in order to compile as completely as possible the data demonstrating the need for another Federal judge in my State. The most recent caseload statistics, compiled by the Judicial Conference in its 1976 quadrennial survey, substantiate the position that the district of South Dakota urgently requires an additional district judge.

The Judicial Conference will include South Dakota among those districts requiring an additional judge in the proposed legislation which the Conference will soon submit to the Congress. Rather than merely wait for that legislation, however, I am proposing this amendment today, to insure that any consideration of the manpower needs of other districts in the Federal judiciary includes the needs of South Dakota as well.

Let me briefly describe to my colleagues the reasons why I believe South Dakota so urgently requires an additional Federal judge. While South Dakota is a relatively small State in terms of population, it is quite large in area. In fact, its 77,000 square miles make it the 16th largest State in the United States. Despite its large size, South Dakota has only two district judges: One sits in Sioux Falls in the southeastern corner of the State, the other sits 360 miles away in Rapid City. These two locations are logical choices for a district court seat, as they are the two largest cities in the State. Yet for many of the litigants and lawyers of the State, trial in the district court has become very costly, time consuming, and physically difficult task. It is not uncommon for a litigant in South Dakota to travel 200 miles for a single routine court appearance. I think that those who have practiced and appeared in the district courts in the more urbanized sections of the country have difficulty in appreciating the enormous hardships which this situation entails.

Our two district court judges have striven manfully to relieve this burden, periodically holding court in other cities. But a rotating, "circuit rider" approach to justice fails to meet the continuing needs of South Dakota citizens, and also imposes an unnecessary burden on the inadequate time available to the two judges in the first place. I believe that the total cost to the system, in terms of manhours as well as dollars, would be less if a third, permanent judgeship were established centrally in Pierre, than under the current system, where at least five temporary district judges have been brought into the State during the past 2 years, to alleviate the burdens on the two overworked judges.

If travel problems were the only reason for providing an additional judge for South Dakota, then perhaps other solutions would be satisfactory. But that is not the case, as statistics reflecting the caseload in the district also demonstrate the need for an additional judge. The most important statistic used by the Subcommittee on Judicial Improvements in recommending judgeships in S. 287 was filings per judge. For fiscal year 1975, South Dakota fell just under the 400 filings used by the subcommittee as its standard. However, if another judge is not provided to the district, its per-judge caseload will reach 465 in the next 3 years, according to the projection by the Judicial Conference. In fact, since 1970, total filings within the district have increased 92.9 percent—the largest increase in the eight circuit and eighth largest in the entire Nation; yet no judgeships have been approved.

Adding to the mere numerical burden is the fact that an unusually large proportion of the South Dakota case filings are criminal cases. In 1975, the district ranked eighth in the entire Nation in total criminal filings. This results largely from the fact that a large portion of our State is covered by Indian reservation land. Under Federal law, much of the serious crime that would be handled by the State system elsewhere must be handled by the Federal system in South Dakota, because the crime was committed on a reservation. Thus the high criminal caseload does not mean that South Dakotans are more criminal than citizens of other States; it simply reflects the manner in which Federal law allocates criminal jurisdiction in States such as South Dakota. Since the Federal system has imposed this unusual burden on my State, there remains a Federal responsibility to see that adequate resources are provided to meet that burden.

The Administrative Office of the U.S. Courts has a special statistical category for those crimes which take up an inordinate amount of a judge's time. This heavier-than-average category consist of forgery and counterfeiting, fraud and embezzlement, and homicide, robbery, assault, and sex offenses. Fifty-one percent of the criminal filings in South Dakota for fiscal year 1975 fell into this special category. This compares to the national average of 33 percent heavier-than-average criminal filings per district. That gives South Dakota the largest heavier-than-average caseload per judge—107.5—of any district in the entire country. Only one other district has more than 100 heavier-than-average cases per judge—that district, the eastern district of California, will receive two judges under S. 11—and no other district has more than 70 such cases per judge. Implementation of the Speedy Trial Act of 1974, which states that court congestion is not a valid justification for lengthy delay of criminal cases, will thus impinge on the district court of South Dakota more heavily than on any district in the country, absent an additional Federal judge. While this statement may surprise those who think mainly of urban areas when they think of crime, it reflects an unpleasant reality to the citizens of my State, who deserve personnel and resources adequate to the criminal justice needs of the Federal courts in our State.

In summary, Mr. President, I am cosponsoring S. 11 because it meets the basic, minimum needs of an overworked Federal judiciary. I will also cosponsor legislation designed to meet the current needs of the judiciary as recommended by the Judicial Conference, when that legislation is introduced in the near future. And, in conjunction with both pieces of legislation, I intend to vigorously press my case to provide an additional judge for the overworked and understaffed district court bench in South Dakota.

OPPOSITION TO PRESIDENTIAL PARDON OF DRAFT EVADERS—S. RES. 18

AMENDMENT NO. 14

(Ordered to be printed and to lie on the table.)

Mr. ALLEN submitted an amendment to the motion to refer to the Committee on the Judiciary the resolution (S. Res. 18) to express the sense of the Senate in opposition to a general Presidential pardon by proclamation or Executive order of Vietnam era draft evaders, and for other purposes.

NOTICES OF HEARINGS

MONOPOLY SUBCOMMITTEE OF THE SMALL BUSINESS COMMITTEE

Mr. NELSON. Mr. President, the monopoly Subcommittee of the Senate small Business Committee will hold 2 days of hearings on competition and other marketing problems in the eyeglass industry. These hearings will begin each day at 9:30 a.m., February 1 and 2 in room 1318 of the Dirksen Senate Office Building. Additional days of hearings on this subject will be held subsequently. Witnesses will be announced at a later date.

COMMITTEE ON INTERIOR AND INSULAR AFFAIRS

Mr. CHURCH. Mr. President, I wish to announce for the information of the Senate and the public the scheduling of

a public hearing before the Subcommittee on Energy Research and Water Resources of the Senate Committee on Interior and Insular Affairs.

The hearing is scheduled for Monday, January 24, 1977, at 10 a.m. in room 3110 of the Dirksen Senate Office Building. Testimony will be received from various individuals and committees that have participated in the investigation of the failure of the Teton Dam. This hearing is intended to receive the information gathered by each of these groups. In addition, it is anticipated that the subcommittee will receive testimony from the Bureau of Reclamation and the Corps of Engineers regarding procedures utilized in the construction of dams.

For further information regarding the hearing, you may wish to contact Mr. Ben Yamagata, counsel for the Subcommittee on Energy Research and Water Resources, at (202) 224–1076, or room 3106, Dirksen Senate Office Building, Washington, D.C. 20510.

SUBCOMMITTEE ON THE HANDICAPPED

Mr. RANDOLPH. Mr. President, as chairman of the Subcommittee on the Handicapped, I announce that the subcommittee has scheduled hearings on a review of programs for the handicapped. The hearings will be held on Monday, February 7, 1977, and Tuesday, February 8, 1977, in room 4232, Dirksen Senate Office Building starting at 9:30 a.m.

Persons wishing to testify should contact Mrs. Patria Forsythe, professional staff member, 10–B Russell Senate Office Building, (202) 224–9075.

ADDITIONAL STATEMENTS

PERFORMANCE OF SECRETARY CARLA HILLS AND THE DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Mr. TOWER. Mr. President, at the January 10, 1977, hearings held by the Senate Banking and Urban Affairs Committee to consider the nomination of Patricia Harris as Secretary of the Department of Housing and Urban Development, Senator PROXMIRE, in his position as chairman of the committee, released a statement which criticized the Department's recent accomplishments as being "pitfully inadequate." He further stated that—

HUD is in a shambles . . . morale is low . . . and (both recent Secretaries) were failures.

These characterizations are both inaccurate and unfortunate. The record speaks for itself.

Regarding assisted housing, the following facts attest to HUD's record over the past 22 months. From the inception of the public housing program in 1937 to the enactment of the new section 8 rental assistance program in 1974, approximately 1,100,000 units were set aside for occupancy by low-income families in federally subsidized public housing projects—an average of 30,000 families per year. In 1976, the number of needy families occupying decent housing under the new rental subsidy program increased by approximately 140,000; more than 4½ times the annual average on the old program, and over 300 percent higher than the best year (1952) ever recorded for public housing.

Additionally, HUD surpassed its goal for authorizing new assisted housing units. As Secretary-designate Harris indicated, many additional units were approved during 1976, thereby insuring a continuation of the impressive occupancy record. At the beginning of the fiscal year, a high-priority goal was set to secure up to 400,000 such approvals by September 30, 1976. Nine months ago, Senator PROXMIRE expressed great skepticism that the goal could be attained, and ridiculed HUD's performance on the program through February 1976. In actual fact, the number of approvals came to more than 490,000 units by the target date, exceeding the goal by more than 20 percent.

Regarding new units started, HUD has set a record for the most starts under the shortest time period, for any new public housing program. Since the section 8 rental assistance program was only passed by the Congress in the summer of 1974, the 40,000 construction starts cited by Senator PROXMIRE for 1976 comes as no surprise to parties who are familiar with the housing industry. Ignoring HUD-required processing steps for the moment, just the length of time required by the developer to select and acquire an acceptable site, prepare suitable architectural and engineering plans, secure appropriate financing, obtain all of the environmental and other clearances associated with a multimillion-dollar project and negotiate firm construction contracts takes up to a half year.

Additional safeguards, which are essential to protect both the taxpayer's dollar as well as the interests of low-income and elderly tenants who will eventually occupy the units, make the processing cycle understandably longer for a federally subsidized project. In this context, it is most clear that the 40,000 units started is not "incredibly pathetic" as alleged by Senator PROXMIRE. If anything, it is exemplary. By comparison, in the 2 years immediately following the enactment of the turnkey public housing program in 1965, only 4,800 starts had been achieved.

Regarding community development, the HUD record has been outstanding. Senator PROXMIRE stated that "HUD is sound asleep" at a time when our cities constitute perhaps our greatest social-economic problem. This is not the case at all. Armed with the enlightened strategy developed through the cooperative efforts of the Congress and HUD, and reflected in the Housing and Community Development Act of 1974, the Department provided $2.69 billion to over 3,100 communities during 1976, 33 percent more than that provided in the peak year of 1973 under the restrictive, categorical programs that preceded it. Senator SPARKMAN, chairman of the committee at the time of enactment, praised the act as "the most important legislation on community development since the passage of the Housing Act of 1949."

Two years later, Mayor John Poelker of St. Louis testified on behalf of the U.S. Conference of Mayors before the Senate Subcommittee on Oversight—also chaired by Senator PROXMIRE—that:

To date, the Community Development Act has been successful . . . overall community development strategies and local capacity have significantly improved . . . long term planning and priority setting have become more pragmatic and concrete . . . the housing assistance plan can in fact establish a link between community development and housing as well as between the public and private sector . . . application processes have been streamlined, and local governments are realizing a reduction in bureaucratic redtape.

With regard to the effectiveness of the program in the area of nonmetropolitan communities, Margaret Thorpe, an official in the department of local affairs and development from Senator PROXMIRE's State of Wisconsin made the following statement:

As a state official who is as guilty as any other state official of regularly using the federal government as a scapegoat, I am pleased to come here this morning to say that, for once, the federal government has done something right. The Title I Community Development Block Grant program of the Department of Housing and Urban Development, created in the 1974 Housing and Community Development Act, has, in general, been of effective use and service to the communities of non-metropolitan Wisconsin.

Mayor Poelker's comments on streamlined processing are not without foundation. The average length of time to review and act on the more than 1,300 entitlement applications came to only 61 days, thereby bettering the legislatively mandated goal of 75 days by a comfortable margin. This achievement becomes even more remarkable from a historical point of view—the average total time required for the preparation, review, approval, and contract execution on a CDBG application is approximately 9 months. Under the old urban renewal program, the comparable time was 31 months. As for the qualitative job done by HUD's staff, the comment made by Administrator Thorpe in her testimony speaks for itself.

In Wisconsin, the community development staff of the HUD Area Office has done an outstanding job of utilizing limited funds to serve a variety of types of needs and a variety of communities. The program managers have judged applications on the need of the community and the quality of the program presented, not upon the size of the town or the slick graphics and paper of a consultant.

HUD has also exceeded its goal regarding the closeout of urban renewal projects. The closeout of old urban renewal grants through September 30, 1976, came to 447; 16-percent higher than the ambitious goal set at the beginning of the fiscal year, and more than double the prior record achieved in 1973 despite a reduction in available staff due to the phase-in of the new block grant program.This is especially significant in view of the fact that the interest paid by the Federal Government on open urban renewal loans comes to more than $300,000 per day.

Many other examples can be cited which contradict the statements made by the chairman.

Fair housing: The backlog of title VIII complaints in excess of 150 days old was reduced from 684 at the start of the fiscal year to only 70 by September 30, 1976.

Sales of acquired property: More than 70,000 single family properties and approximately 200 multifamily projects were sold out of HUD's inventory of foreclosed properties from the start of fiscal year 1976 to the start of fiscal year 1977—an all-time record for both. More importantly, it returned badly needed units to the marketplace where they can benefit people in need of shelter. The single family inventory now stands at the lowest level since August 1971, and acquisitions due to defaults on FHA-insured mortgages have been reduced from an annual rate of 45,523 in December 1975 to 31,452 at the beginning of December 1976.

New communities: A goal was set at the beginning of the fiscal year to develop detailed business plans for each of the federally guaranteed New Communities. The goal was achieved with a few weeks to spare.

Flood insurance: At the beginning of fiscal year 1976, a goal was set to complete 924 detailed rate studies in conjunction with the flood insurance program. By the end of the year, 1,091 had been completed.

This list of accomplishments is not intended to be all-encompassing. Many additional examples are available for those who care to examine the facts. To ignore these facts and unfairly demean the performance and motivation of those thousands of people who work so hard to produce the results is a grave injustice to them, to the Congress and to the American public.

Mr. President, I think that Secretary Hills and the employees at HUD should be commended for the outstanding job they have done during the past 22 months. Their efficiency and productivity have saved the taxpayers millions of dollars while at the same time, providing much needed shelter to the very neediest of families.

At the nomination hearing of Mrs. Harris to be the HUD Secretary, Senator PROXMIRE quoted from testimony given by Ms. Cushing Dolbeare at the nomination hearing of Carla Hills. At that time, Ms. Dolbeare opposed the nomination of Secretary Hills on the grounds that she was an amateur, and inexperienced to carry out the important functions of Secretary of HUD. These are the same reasons Senator PROXMIRE used in his opposition to Mrs. Harris at her nomination hearing.

After 22 months as HUD Secretary, however, after seeing what Secretary Hills has accomplished at HUD, Ms. Dolbeare, who was head of the National Rural Housing Conference, thought that Secretary Hills had done such an outstanding job, that the Carter-Mondale transition group considered renominating her as the HUD Secretary. I request that a copy of the January 11, 1977, letter from Ms. Cushing N. Dolbeare to Senator WILLIAM PROXMIRE and a copy of a letter from Secretary Hills to Senator PROXMIRE, be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

PHILADELPHIA, PA.,
January 11, 1977.

Hon. WILLIAM PROXMIRE,
Chairman, Committee on Banking, Housing and Urban Development, U.S. Senate, Washington, D.C.

DEAR SENATOR PROXMIRE: I write both to urge your support for the nomination of Patricia Roberts Harris as Secretary of HUD and, since you quoted me in your statement yesterday, to set the record straight with regard to my own views of the current administration of the Department of Housing and Urban Development.

Given my choice, I would far rather have a Secretary of HUD with commitment and understanding of low income housing needs than one with a background, professionally, in housing. Ms. Harris demonstrated that commitment and that understanding yesterday. Since, in my view, the programs that HUD has had available to it have never provided more than a token opportunity to deal with low income needs, having a technician at the helm may be desirable—provided that technician cares about results—but it is not essential.

With respect to HUD, I have been impressed with a number of factors. First and foremost, HUD's subsidized housing program was, I think, the only major discretionary program serving low and moderate income people that did not have its program level cut back by President Ford in his proposed budget for the current year. While I am unfamiliar with the details, I find that evidence of effective advocacy at OMB and the White House. Ironically, it was the Congress which chose to cut back the appropriation for public housing/Section 8 to less than 80 percent of the Administration's request.

Furthermore, while I am sure that I do not need to enumerate for you my numerous policy disagreements with HUD and with the Secretary, the morale and the quality of operation at HUD seem to me to be vastly better than they were two years ago. Clearly, had she had experience in housing, I think Carla Hills would have done a better job. On the other hand, had I known then what I know now, I would not have opposed her nomination. Indeed, I suggested more than once to the Carter-Mondale Transition Group that they consider renominating her.

I am sure you know how completely I agree with you about the importance of sensitivity to housing needs and the economic potential of housing programs. I hope that both Ms. Harris and the Carter Administation will move forward on these matters. I also hope that you will give them your strong support when it comes to providing the appropriations and budget authority necessary to make adequate low income housing programs a reality.

Sincerely,

CUSHING N. DOLBEARE.

THE SECRETARY OF HOUSING AND URBAN DEVELOPMENT,
Washington, D.C., January 11, 1977.

Hon. WILLIAM PROXMIRE,
Chairman, Banking, Housing and Urban Affairs Committee, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Your statement made yesterday at the hearings on the nomination of Patricia Roberts Harris to be the Secretary of the Department of Housing and Urban Development demonstrates total ignorance of what HUD has accomplished over the past 22 months on an intentional distortion of the facts.

Every knowledgeable person in housing is aware of what the people at HUD have produced, and produced brilliantly, over the past 22 months. On almost every score they have done better than they promised. Let me point out a few facts:

In Housing we said we would reserve 400,000 units of rental assistance by September 30—and we reserved 492,000.

In Community Planning and Development we said we would achieve 386 Urban Renewal closeouts, and we closed out 447.

In New Communities we said we would have a Business Plan setting forth a work-out schedule for each of the 13 New Communities by the end of Fiscal 76, and we did so with a couple of weeks to spare.

In Property Disposition we said we would sell 57,501 single-family homes by June 30, and we beat that goal by 411.

We said we would launch a successful Urban Homesteading program, and we did—one with coordinated neighborhood strategy.

In Equal Opportunity we said we would obtain 62 areawide Affirmative Marketing Agreements by the end of the Transitional Quarter—and we obtained 77.

We said we would complete 924 Food Insurance rate studies by June 30, and we completed 1,091.

I could go on and on.

Your saying that HUD is in shambles does not make it so. The record demonstrates to the contrary. But your insistence on ignoring the record and publicly belittling this Department is grossly unfair and counterproductive.

Your saying that HUD's morale is low does not make it so. The quantity of communications that I have received in the past few months not only from HUD employees but from all kinds of people dealing with HUD, including homebuilders, developers, consumers, and mortgage bankers, vividly demonstrates to the contrary. Morale is higher than it has been in many years. There is real excitement and pride about what the HUD team, pulling together, was able to accomplish for the American people.

We are handing over a strong and shiny piece of equipment to the new Administration. Programs, work measurement standards and tracking mechanisms are firmly in place. I believe that the current condition of HUD will enable Pat Harris with her demonstrated concern for people to do an outstanding job, despite your criticism of her lack of experience.

You and I differ on some policies. For example, you would artificially stimulate the production of 2.6 million or more housing starts per year, which I believe would create overproduction in many markets, cause abandonment and waste of existing stock and thus blight, generate a disequilibrium in the market by borrowing forward and thus cause another disastrous housing cycle. Many urbanologists and economists who have spent a lifetime in study of housing markets agree with my assessment.

But these policy differences cannot in fairness or in truth be said to tarnish the fine record built by HUD personnel carrying out the programs set forth in the Housing and Community Development Act of 1974.

Even comparing the production record of the rental subsidy program, which subsidizes people not bricks and mortar, with the most popular public housing program, turnkey public housing, our record is spectacular. Two years after the 1965 enactment of turnkey public housing there were 4800 starts and 2300 in occupancy, whereas in the same period the rental subsidy program had approximately 40,000 starts and over 140,000 in occupancy.

Moreover, in the single-family market, 1976 will rank as the third best year in this nation's history for both production and sale of new homes, and the highest year on record for the sale of existing homes.

Also, homeownership has never been higher. Today, seventy-five percent of American families own their homes.

A Chairman of a Senate Committee as important as the Senate Banking, Housing and Urban Affairs Committee has an obligation to the public to understand—not grandstand. I hope the facts supplied herein

will help you in the future to assist, not falsely ridicule, the dedicated people at HUD.

Sincerely,

CARLA A. HILLS.

Mr. TOWER. Mr. President, I hope that this partially sets the record straight as to what has been happening at HUD over the past 22 months. Secretary Hills, by her leadership and by the purpose she has instilled in the employees at HUD during her tenure, has turned the original doubters into active supporters. It is unfortunate for us on the Banking Committee who have worked closely with her, and especially for the American people, that she will be leaving HUD. She has left a proud record, and has laid the groundwork for the effective utilization of our resources to provide housing for those who need it most.

THE CONTRADICTION OF OPPOSING THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, a resolution approving the Convention on the Prevention and Punishment of the Crime of Genocide was adopted by the United Nations General Assembly in December 1948, by a vote of 55 to 0. Two days later, the United States signed the treaty. President Harry S Truman then submitted this convention for Senate ratification. Briefly, the convention stated that genocide was a crime under international law and defined it as the commission of specified acts, in the time of peace or in the time of war, with the intent to destroy, in part or in whole, a racial, religious, ethnic, or national group.

Soon after Truman's submission of the treaty to the Senate, a Senate Subcommittee on the International Convenion on the Prevenion and Punishment of the Crime of Genocide was created. Over 80 nations have ratified the document yet the United States has refused to do so despite the extensive deliberations by the subcommittee.

It can be seen by these actions that a common goal among all nations is that of world peace and harmony. The United States has always been active in protecting human rights. Why stop now?

I stand before you once again to ask that you consider my proposal. Let us not waste any more time. Let us show that all past efforts in fighing for human rights were sincere.

Mr. President, our continuing failure to ratify this treaty is a handicap in our dealings with other nations as well. During any kind of negotiation or meeting, how can we effectively argue in favor of human rights and dignity, freedom or peace, when we consistently oppose the freedoms and rights offered by the Genocide Convention?

Mr. President, I urge the Senate to take the initiative, without any hesitation, and ratify this convention at once!

KENNETH LAZARUS LEAVES POST AS ASSOCIATE COUNSEL TO PRESIDENT

Mr. McCLELLAN. Mr. President, in August 1974, I made a favorable recommendation to President Ford regarding Kenneth Lazarus, at that time minority counsel to the Senate Judiciary Committee and a candidate for appointment to the White House staff. Shortly thereafter, in September 1974, Mr. Lazarus was appointed as associate counsel to the President. At that time he was the youngest of the original group of appointees to the White House staff.

During the past 2 years, Mr. Lazarus has participated in the development of a number of legislative items in the area of law enforcement and the administration of justice.

Recently, he submitted his resignation to the President in order to accept a partnership in the law firm of Bierbower and Rockefeller here in Washington. I wish Mr. Lazarus every success and happiness in his future endeavors.

PATRIOTIC HOLIDAYS

Mr. THURMOND. Mr. President, I have recently read an excellent editorial written by William C. Plowden, Jr., of New Zion, S.C., for the South Carolina Legionnaire, and reprinted in the January 10, 1977, Marlboro Herald Advocate of Bennettsville, S.C.

Mr. President, Bill Plowden is one of the most devoted American patriots I have ever known. His statement on "Patriotic Holidays" deserves the thoughtful attention of all Americans as we begin our next 100 years.

Mr. President, in order to share this excellent statement with my colleagues, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

PATRIOTIC HOLIDAYS

(By William C. Plowden)

As our Bicentennial year comes to a close, and as we begin another 100 years of our history, we should answer this question:

What are patriotic holidays and what do they mean?

At periodic intervals it becomes necessary for a people to reassert loyalty and renew dedication to their country. Unless this is done, love of country can weaken and the great ideals upon which the nation was founded can grow dim.

The noblest days in national history are those in which citizens, young and old, rekindle the fires first set by their forefathers. If a time comes when neglect and even aspersion are accorded to America, or when patriotism is depreciated, then it is time for all of us to fervently say, "I pledge allegiance—"

How can we help? By praising our great country and doing our best to make it even better. Care enough about it to preserve our freedom. Don't take it for granted. Care enough about it to preserve its beauty, its history, its tradition.

If we observe and promote, our patriotic holidays our young people will understand the real meaning of them and learn to appreciate America and its heritage. Are you sure someone has taught them what our holidays really mean to America?

In his book Heritage and Destiny, Dr. John Mackay has a chapter heading which says: "The road to tomorrow leads through yesterday." On each of our patriotic holidays we should once more travel through yesterday and discover once again the heritage of freedom left to us by preceding generations. Perhaps the reawakened interest in yesterday and its heritage will open a new pathway to tomorrow.

The price of liberty was, and still is, great. We must remember the sacrifices of all Americans who stood tall and straight, unwavering in their quest for freedom, not only for themselves but also for future generations.—SC Legionnaire.

BOYCOTTS

Mr. ABOUREZK. Mr. President, I thought it would be interesting to Members of Congress, both Senate and House, to learn that there are several boycotts by various countries against various other countries. While for obvious reasons, most of the publicity has centered on boycotts by Arab countries against Israel, strangely enough Israel also has a boycott against the Arab countries.

I ask unanimous consent to have printed in the RECORD an article by Stephen M. Aug which appeared in the Washington Star on December 14, 1976, which discusses this boycott.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CALIFORNIA LAW BRINGS IT TO LIGHT—ARABS ARE NOT THE ONLY ONES; ISRAELIS ALSO HAVE A BOYCOTT

(By Stephen M. Aug)

Although most recent publicity surrounding international economic boycotts has involved the widely known Arab boycott of Israel, a lesser-known Israeli boycott has begun causing a few difficulties as well.

A recent cable from the U.S. Embassy in Tel Aviv to the State Department here—a copy of which The Washington Star has obtained—says the Wells Fargo bank in San Francisco has refused to process letters of credit on behalf of a firm which was to ship walnuts to Israel.

The reason was the bank's interpretation of a new state anti-boycott law in California. The law forbids California firms to comply with foreign economic boycotts.

The cable asked for further information about the California anti-boycott law because it had received a number of inquiries concerning it.

Meanwhile, sources say, an Israeli contractor, in an initial contract with a U.S. firm, apparently had included a clause that specifically excluded people of Arab origin from taking part in the work covered by the agreement. The clause reportedly was later eliminated.

The new California law, effective Jan. 1, apparently interferred with a number of overseas contracts because several California banks declined to process the necessary letters of credit. The banks were uncertain as to how the law should be applied, although they had evidently decided to begin adhering to the law before it went into effect.

Clifford Churchill, president of the Churchill Nut Co. of Hollister, Calif., said that after Wells Fargo bank refused to process a letter of credit involving $178,567 for about 165,000 pounds of walnuts, he tried several other banks, but the results were spotty and eventually none would allow the letters to be processed.

The situation continued for several weeks, he said, with bankers saying they would have to consult their lawyers. Then, several days ago, he said, the letters began flowing again.

The clause in the letter of credit said Israel would not accept shipments unless it could received certification that the vessel transporting the merchandise would not enter territorial waters of Egypt, Yemen, Jordan, Saudi Arabia, Iraq, Lebanon, Syria or Kuwait before it unloaded in Israel. Federal regulations do not require such a clause to be reported to the Commerce Department because it is not considered to constitute a boycott.

George Caulfield, a vice president at Wells Fargo, said the provisional view of the bank's lawyers "was that all clauses were covered by this new law. Therefore, in anticipation of this new law becoming effective Jan. 1, we started to phase out all letters of credit involving clauses of any type."

He said three primary types of clauses involved certifications of country of origin, the question of whether a vessel is owned by Israel or Arab groups, or whether vessels called first at Arab or Israeli ports.

Caulfield said the bank began processing letters, including these clauses, after California Atty. Gen. Evelle Younger ruled recently that primary boycott clauses were not covered under the new law.

Warren Abbott, a deputy attorney general who has been deeply involved in the new anti-boycott law, said the California law was designed to prohibit so-called secondary and tertiary boycotts.

In a primary boycott one country simply refuses to import goods from another country. Such boycotts are traditional when involving nations that are at war with one another.

But a secondary boycott involves, for example, an Arab country refusing to do business with a California corporation unless the firm stops doing business with Israel. In a tertiary boycott, for example, an Arab nation would say to a California firm it will not deal with the company as long as the company continued doing business with another firm that is on the Arab blacklist.

Abbott said the state attorney general issued the opinion clarifying the situation after the California secretary of commerce questioned the meaning of the law. He said one of the questions involved the type of clause Israel uses routinely involving ports of call for fear that goods destined for Israel might be confiscated if the ship called in an Arab port first. "We concluded that the legislators did not intend to prohibit such clauses," Abbott said.

Abbott also said the attorney general has decided the new law, which "would on its face appear to prohibit any participation" in any boycott, did not intend to prohibit participating in a primary boycott. As a result, California firms will still be able to certify that goods they are shipping to the Arabs were either made in the United States or did not come from Israel.

The Israeli Embassy reportedly approached the Commerce Department shortly after it drafted its boycott regulations in 1965 and contended Israel's policy was not intended to restrict trade, but was merely cautionary to protect the security of goods. Israeli officials said they do not permit their own exports to be shipped on vessels that later stop at Arab ports. As a result, the regulations were amended to exclude that type of clause as a restrictive trade practice.

MILWARD L. SIMPSON

Mr. HANSEN. Mr. President, the senior Members of the Senate will remember one of their colleagues from the early sixties, Milward L. Simpson.

Milward Simpson was elected to this body in 1962 from my home State of Wyoming to continue his public service, which included serving in the Wyoming State Legislature, and later as Governor of that great State.

Milward Simpson brought with him to Washington the integrity, honesty, and public-mindedness he propounded throughout his service in and to Wyoming.

In 1966, Senator Simpson retired from this distinguished body because he had learned he had Parkinson's disease. Doctors told him then that he had maybe 1,000 steps left, and so he returned to Wyoming.

Today, Governor Simpson, now 79 years of age, is still lending his spirit and character to the people of Wyoming, as was recently pointed out in an article from the Denver Post of October 31, 1976.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Denver Post, Oct. 31, 1976]

MILWARD L. SIMPSON

When Milward L. Simpson of Cody served Wyoming as legislator, governor and U.S. Senator, he stood 6 feet tall and weighed 185 pounds. Age—he will be 79 in 2 weeks—and illness has shrunk him to 5 feet 9 and 165, and he needs an arm crutch to walk.

But neither crippling arthritis nor Parkinson's disease have shriveled his gift for pungent phrases or his fierce dedication to what he believes is right for Wyoming, and for America.

"I got the name 'Fiery Petrel' when I first went to the state legislature because I was always pointing out the right and wrong of things," he says. "The name was a takeoff on the stormy petrel, the bird that is supposed to bring storm warnings."

These days, when Simpson makes a public appearance, he is usually addressed as "Mr. Wyoming" or "Mr. Republican."

But old-timers still call him "Simp" or "Simpy," though most folks address him as "Senator."

Simpson prefers to be called "Governor."

"The 100 senators ride off on their horses in 100 directions," he explains. "But a governor is top gun in his state.

"I think my best work for Wyoming was done as governor. Nowadays, people seem to feel the same.

"I didn't do anything spectacular in the Senate. I was elected in 1962, and early in 1966, while walking through a Senate corridor, I fell flat on my ding-dong and couldn't get up. I had to crawl.

"That's when the doctors told me I was doomed by Parkinson's disease, that I had maybe 1,000 steps left. New drugs since gave me a lot more steps, but I didn't know that then. So I retired. I was damned if I would ask the people of Wyoming to send a handicapped man to Washington!"

Simpson was a few months short of qualifying for a $22,000 annual senator's pension. He notes with indignation that some "phonies" thought he should conceal his illness, run again and then quit when he had the pension cinched. (Gov. Simpson does not draw a pension from any of his elected posts.)

"I could never consider something so dishonest," he declares. "I knew senators so senile or paralyzed they could not work or find their way home.

"I have always refused to compromise my principles for possible personal benefit. Such compromises are dangerous—they just take you to a lesser value. And the only values worth having are the ones God gave us."

That sentiment is more than rhetoric: Gov. Simpson is a former lay preacher in the Episcopal Church.

He prays every morning in his Cody home at the big living room window which frames a view of the high cross atop Christ Episcopal Church against Cedar and Rattlesnake Mountains.

He also says grace at every meal, even in restaurants, and after asking the blessing for the food, adds: "God bless America and keep her free from discord and confusion."

Yet he can cuss a streak; he notes cheerfully that piety and earthliness come naturally to a man "whose father was a cowpuncher and whose mother attended church for a century."

The governor was born Nov. 12, 1897, at Jackson, Wyo., the youngest of the three children of Margaret Burnett and William Lee Simpson. His father, a native of Fort Lyon, Colo., trailed cattle into the Jackson Hole area in 1884 and stayed to become a prominent attorney before his death in 1940. His mother, whose family settled in the South Pass area in 1865, was 100 years old when she died in 1974.

Young Milward spent his first years in Lander, where his father was Fremont County prosecutor. (He was the only prosecutor, the governor proudly notes, who ever managed to convict famed outlaw Butch Cassidy.)

Later, the family moved to Meeteetse, then Cody.

Simpson graduated from Cody High School in 1916 and enrolled at the University of Wyoming at Laramie. When America entered World War I, he quit school to become an infantry officer. After the war, Simpson returned to Laramie, earning his B.S. in 1921.

He went to law school at Harvard University but dropped out in his third year.

"People take it for granted that because I am a lawyer, I have a law degree," he says. "But I received special dispensation from the state district court to start practicing without a degree and before taking the bar exam."

The reason was dramatic. In 1924 his father stood trial for murder.

"We were living in Thermopolis then," the governor says, "but this happened in Cody. Some guy my father had beaten in a lawsuit attacked him on the street, hitting him on the head with a rock. My father shot the man. It was self-defense and my father was acquitted, but he had to drop his practice because of his injuries. The court allowed me to take over."

Simpson passed the bar exam with high marks in 1926, and that same year, at age 29, was elected to the Wyoming Legislature.

"I was the only Republican elected in Hot Springs County," he says. "Folks knew me pretty well, not only because of my father, but because I was a hot semipro baseball player.

"I played for Keene, N.H., while I was studying in the East, and I played centerfield for Red Lodge, Mont., when I was home. Even had an offer to go to the big leagues but my father made an impassioned speech to me about ball players' legs only lasting five years, so I never tried out.

"My father, one of the most convincing orators I ever heard, talked me into becoming a Republican.

"My parents were terrific Democrats and I blatted the Democratic cause all through high school. But when I was 21 and about to cast my first vote, my dad made one of his speeches. He convinced me that Democrats are fine, but Republicans always win, so I registered as a Republican.

"I have stayed on that side of the fence ever since because I like the GOP philosophy."

When a leader of the Women's Christian Temperance Union (WCTU) demanded to know if the freshman legislator was "wet" or "dry," Simpson replied:

"Ma'am, I'm so wet if you blew on me, I'd ripple."

The WCTU lady stalked off before he could explain: "You can't legislate morals into people. I think Prohibition was one of the blackest periods in American history."

Besides, Simpson admits with a laugh: "In those days I drank. They made a fine apricot brandy around Cody for $5 a pint."

One of Simpson's more-publicized legislative efforts was a bill reducing the residency required for divorce in Wyoming from a year to four months.

"People pilloried me for attacking marriage.

"Heck, I wasn't even married then. I just wanted to bring some divorce business to Wyoming. But the only thing I accomplished was scaring Nevada into lowering its divorce residency requirement to three months."

Simpson did not run for re-election to the legislature because his father recovered his health and moved his practice to Jackson. The governor moved to Cody, which has been his home ever since.

But there was another reason: Being a legislator in Cheyenne put him too far away from "a darn pretty blue-eyed brunette" named Lorna Kooi (pronounced *Coy*), who lived in Sheridan and who had finally said, "Yes."

"I'd been courting her for darn near three years," Simpson recalls. "Her father operated the coal mines at Kooi (now a ghost town) near Sheridan.

"We met at a wedding in 1926, and after that I arranged an awful lot of ball games in Sheridan. Most of the time she was off on round-the-world cruises with her parents, meeting all kinds of rich fellows. But I was persistent. I sent her a cable and a bouquet of roses at every port."

They were married in June 1929. Nearly 48 years later, Lorna and Milward still hold hands, cuddle and call each other loving names.

After his marriage, Gov. Simpson devoted most of his time to his growing law practice in Cody.

He became well-known for his sharp wit. Old-timers chuckle over Simpson's advice to the GOP on how to elect a handsome but inarticulate candidate.

"Just braid his tail and mane like a stud horse and run him up and down the platform."

(Simpson was right: The candidate won. But the man's relatives have not spoken to him since.)

In 1940 Simpson ran for the U.S. Senate: "I was unhappy with President Franklin D. Roosevelt's give-away philosophy and the trend toward social democracy."

He was defeated, by a wide margin, by Democrat Joseph C. O'Mahoney.

The following year, America's entry into World War II put a temporary halt to his political activity.

Simpson, 44, tried to rejoin the Army for "three good reasons—my wife and my two sons."

"I was told to report, so I practically gave away my law practice. Then, at the last minute, I was turned down," he says.

Simpson stayed in Cody, acting as caretaker for various businesses whose owners had gone to war.

"We managed a newspaper, a motel, a building and two drug stores. Lorna and I even changed sheets at the motel," he recalls.

"It seemed I was working 24 hours a day. I couldn't sleep, I couldn't eat, but I was a husky guy and figured I could last. But the exhaustion and the anxiety of those years took their toll later."

When the war ended, Simpson remained "up to my navel in everything, like an idiot."

Besides his flourishing law practice, he worked for a variety of civic organizations. Among other posts, he headed the board of trustees for the University of Wyoming and served on the National Executive Council of the Boy Scouts. (The governor holds the Silver Beaver Award, the highest honor given in Scouting.)

But he "stayed quiet in politics" until Dwight D. Eisenhower ran for the presidency in 1952.

"I met Ike in Denver before he announced his candidacy," Simpson says. "I told him I was worried about immorality in government and the lack of religious faith in some of our leaders. He took out a coin that had a cross on one side and the flag on the other. And he told me he didn't see how a person could live without faith, or how a country could either.

"I became Eisenhower's representative in Wyoming. Ike won 60 percent of the Wyoming vote—the biggest landslide in state history. And he gave me part of the credit.

"In 1957, President Eisenhower offered me the post of secretary of interior. I was halfway into my term as governor, and I told him I couldn't do it. I had campaigned on the promise that I would be governor for four years. We'd had a couple of two-year governors who quit in midterm to run for the Senate. Ike understood I had to keep my promise, but he didn't forget. Years later, when I was running for the Senate, he gave me a big boost by revealing publicly that I had turned down a job in his cabinet because I wanted to keep my word to the people of Wyoming."

Simpson's decision to run for governor was personal; he told the GOP he intended to run.

"I wanted to be governor of the state I loved."

Simpson beat William (Scottie) Jack in the 1954 election by 1,100 votes to become the first native son governor in the state's history.

The big, bald governor then proceeded to stand Wyoming on its ear. He had promised such things as efficiency, economy, equality and "Wyoming for Wyomingites." Probably few voters realized he meant every word.

He irked state workers by cutting down on their coffee breaks and state-supplied Christmas cards. He upset veterans by eliminating their special tax exemptions while modernizing the state tax structure. And he closed the saloons and wide-open gambling joints in the Jackson Hole area, which annoyed Wyomingites.

"I was a veteran. And I used to gamble in Jackson myself," Simpson says. "But when I became governor I swore to uphold state law, and people were riled because I did just that."

Ironically, about the only popular move he made was one that failed: He tried to buy the concessions at Yellowstone National Park for Wyoming.

In spite of his stormy administration, Simpson felt he did a good job. He was crushed when he ran for reelection in 1958 and lost to Joseph J. Hickey by 2,500 votes.

"And when we came home to Cody," the governor says ruefully, "some old boy who walked around in bib overalls said to me, 'Simp, where the hell have you been? I ain't seen you for four years!' "

Like his father before him, Simpson became city attorney of Cody. But he itched for a return to politics.

He got his chance when Gov. Hickey appointed himself to the U.S. Senate in 1960 to fill a vacancy. The GOP took a poll to see which Republican should oppose Hickey in 1962, and Simpson's name led the list.

"That time," Simpson chortles, "I beat the pants off old Joe. I won by 19,000 votes."

When he retired from the Senate Simpson returned home expecting to die.

"My wife wouldn't let me," he says with tears in his eyes. "She kept me alive.

"By 1967 I couldn't walk, my hands shook, my head shook, I lost my voice and the sight of my left eye. But Lorna insisted on giving me therapy every day to keep my circulation and my muscles going. She also made the doctor try the drug L-Dopa on me in 1968. It was still experimental but I turned out to be one of the lucky ones who could tolerate it.

"Within weeks I went from a wheel chair to a slow walk, and my voice came back. I improved so much the doctors did surgery on my right hip bone and gave me a new steel ball.

"My right leg still goes out now and then, my left hand shakes and I get around mostly by stagger, but I'm too old to go dancing anyhow!"

In recent years, Simpson has been showered with honors; streets and stadiums and university chairs have been named for him.

"People are trying to make me feel warm before I die," he grumbles, but adds with a grin:

"I enjoy it. Gives me a chance to make speeches. I still have three good reasons for hanging on to this existence—and six grandkids, too."

His son Peter Kooi Simpson, 46, who stands 6 feet 5, is assistant to the president of Casper College in Casper, Wyo., and a well-known educator. Peter and his wife Lynne have three children.

Alan Kooi Simpson, 45 and 6 feet 7, is a lawyer in Cody. He has been a state representative for 10 years, and is majority leader of the Wyoming House. Alan and his wife Ann have three children.

"The kids are mighty good to me," Gov. Simpson says. "They act like they like the old man. So do a lot of people in Wyoming, including some that called me names.

"Makes me want to hang on and see what happens next. Besides, I still have a hell of a lot to say on how Wyoming and America ought to be run!"

Simpson likes to tell a story to illustrate "how little some of those Eastern bureaucrats know about the West." He claims it really happened:

A Wyoming sheep rancher was summoned to Washington, D.C., by a government official.

"Can't come," wired the rancher. "It's lambing time."

Back came an order from Washington: "Postpone lambing!"

Simpson uses that anecdote to warn against possible federal misuse of the West's lands and resources. He points out that the federal government owns 52 percent of Wyoming's land and 36 per cent of Colorado's.

"Twenty years ago I said we ought to put a fence around Wyoming to keep people out. I was called an isolationist. But the federal government could come in and strip Wyoming bare.

"No Western state can afford to let its resources be dissipated without a return. Coal, oil, underground water are limited resources, but the federal government could take them out and not leave a dime behind.

"We should tax things like the coal removed from Wyoming soil, and impound the money for Wyoming's future. Otherwise one day the coal will be gone and we'll have nothing to show for it but scarred land.

"We can't lock up our natural resources, but we can prevent people from working our resources until they peter out and then just walking off."

Simpson still receives about a dozen letters a day.

"My old cronies keep me posted. And I also get mail from plain folks in Wyoming who want my help."

Some of the letter writers get answers they may not like. He is vehement about some things, like paying back debts.

"I never took a bankruptcy case," he says, "because I believe people should work off what they owe.

"I've been in debt, but I have always paid. Being governor was costly. Lorna and I went $150,000 into the red; the governor's annual salary then was $10,500. But we paid it off a little at a time.

"Our national budget is a joke. We put out money for wild expenditures like studying the aggressions of fish, and we're spending ourselves into insolvency.

"Wyoming has no debts. Why should the people of this state have to bail out the federal government?"

Gov. Simpson thinks the chief hope of balancing the U.S. budget lies with the Congress. He says: "Congress must reassert its fiscal responsibility and retain control of the money it votes."

But he has little hope that will happen, adding: "It is hard to respect members of the Congress when they sneak in a permanent 40 percent raise for themselves.

"I remember an argument I had with a liberal senator about some outrageous boondoggle. I told him we had to be realistic about money to protect the country. You know what that bastard told me? He said,

"You go on being realistic, I'll go on being re-elected."

"I have always operated on the advice my father gave me when I first went to the legislature: 'I can't tell you how to succeed but I can tell you how to fail—just try to please everybody.' I never did. I voted my conscience and I have no regrets."

He opposed two of the most famous legislative actions of the 1960s: The Nuclear Test-Ban Treaty of 1963, in which the U.S. and the Soviet Union, along with many other countries, agreed to ban nuclear tests above ground and below water, and the Civil Rights Bill of 1964, which forbid discrimination in public places and led to the school busing controversy.

"I think I have been proven right," he says.

"The Soviets have used that test-ban treaty to outstrip us in military power. As for the civil rights bill, anyone who could think would have known it was going to cause trouble and confusion. Trying to force civil rights by threatening communities which wanted to maintain their own schools with loss of funds, or threatening people with jail, could only create dissension. I still feel we should have let integration come naturally. Without the bill, it might have taken a generation longer, but it could have been done with love instead of resentment on both sides."

Seated in his red leather chair, holding on to his arm crutch, his hazel eyes flash, his voice grows stronger and he is obviously enjoying himself. "That's the nicest part of living long enough to be called an 'elder statesman,'" he jokes. "You're allowed to talk."

Gov. Simpson has almost as low an opinion of environmentalists as he does of "Eastern bureaucracts" and "liberals."

"I think environmentalists do good things," he says, "and I have helped them with legislation designed to protect the environment. But they have become arrogant with success.

"Now they are trying to lock up the West and make every day Sunday. If they succeed, it will make for long clear days, and bitter black nights, because people cannot afford to stay where there is no work, and if you clean up the air by eliminating industry, you also eliminate people.

"What's really insulting to every Westerner born is the environmentalist idea that nobody took care of the land before. Some industries take better care of the land than those ecology-spouting newcomers do.

"The sheep and cattle ranchers are in a bind. They run private operations, but with the help of federal land. So some government type that never saw a cow starts telling the ranchers what to do in their private businesses, right down to whether they can poison a coyote or put up a fence.

"The liberals can talk all they want to about how bad things are here. Well, maybe we divide capital unequally, but socialism divides misery equally.

"Our system of government is the best damn thing that ever happened in the world. Ask any Westerner!"

A PLAN FOR REAL TAX REFORM BY RUSSELL E. TRAIN

Mr. PELL. Mr. President, at this time of new beginnings, in a new year with a new President and a new Congress, I believe it is timely to take a fresh look at one of the most difficult problems confronting our Nation—our Federal income tax structure.

The Honorable Russell E. Train, currently serving as Administrator of the Environmental Protection Agency, has offered a plan for comprehensive tax reform that I believe offers a promising path out of the existing jungle of our Federal tax code.

Mr. Train, who has had extensive Federal tax experience on congressional tax committees, in the Treasury Department and in the U.S. Tax Court, argues convincingly that real reform of the existing tax code through modifications and amendments is hopeless. Mr. Train makes a compelling case that the goals of equity, fairness, and simplicity in our tax law can best be achieved by abandoning completely our present code and substituting a single flat rate income tax with few permitted deductions, and an increased personal income exemption.

I believe Mr. Train's proposal is an excellent one that deserves serious attention and study by the Congress. Mr. Train presented his tax proposal in an article in the Washington Post on October 24, 1976, shortly after the 94th Congress had adjourned. I ask unanimous consent that the article entitled "A Plan for Real Tax Reform," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 24, 1976]

A PLAN FOR REAL TAX REFORM

(By Russell E. Train)

Every year or so—particularly around election time—there is a great deal of talk about the need for tax reform. The rhetoric is familiar. Once again, the long-suffering American taxpayer-voter, always hopeful that help is on the way at last, responds favorably to the reform effort. And once again, when the smoke clears, a few old loopholes have been closed or modified, some new special treatments have been added and a whole new dimension of exception and complexity has been introduced. The only certainty in the entire process is that every time we go through the so-called reform, the law becomes more complex and more impossible for the average citizen to work with and understand.

Nearly 20 years' experience with our tax laws—in the writing of the laws themselves, in their administration and, finally, in their interpretation as a judge—has convinced me that the present federal individual income tax structure is beyond essential reform. It can be tinkered with; it can be patched here and there. No doubt some improvements can be made. However, it is fundamentally beyond repair. The sooner we understand and accept this fact, the sooner we can get on with the job of real tax reform.

I truly believe that real reform of the present tax system is hopeless. I equally firmly believe that real tax reform is not only possible but fully within our reach—and long overdue. And I should make clear that the views I express here are entirely personal and are in no way intended to represent administration policy.

The answer, as I see it, is to abandon the progressive net income tax and substitute a single flat rate tax on adjusted gross income—that is, on an individual's total income, less personal exemptions, less allowable business expenses but before any personal deductions. In fact, personal deductions (including the deduction of charitable contributions) go out the window under this approach. Personal exemptions (which should be increased to at least $1,000) should still be provided to cushion the burden at the bottom of the income scale (but, of course, should be extended, as now, across the board). Special treatment of capital gains would be eliminated as no longer necessary, thus removing one of the greatest sources of complexity and potentials for abuse in the entire system. The tax exemption of interest on state and municipal securities would be eliminated as to future issues.

What sort of tax rate would be involved? I estimate that a tax base such as I have described would require an across-the-board rate of no more than 13 per cent and probably closer to 10 per cent to produce approximately the same revenue as produced by the present federal individual income tax. This compares with a first bracket rate today of 14 per cent and a top bracket rate of 70 per cent. I seriously doubt that the tax burden on lower incomes would be any greater than today and could well be lower.

It may seem that I am proposing more favorable treatment for business deductions than for personal deductions. The fact is that they do require different treatment in most cases. To disallow business expenses as a deduction would in many cases result in a tax on negative income. For example, the farmer should not be taxed on the proceeds from the sale of his crop without first deducting the cost of his seed, fertilizer, pesticides, labor, equipment, etc. Any individual with business income should have the same right.

The major exception I would make in the field of business expenses would be to disallow quite broadly deductions for entertainment, meals, gifts and travel. Some deductibility of travel would doubtless have to be allowed where it is integral to the operation of the business, but this should be the exception rather than the rule. Some hardship would undoubtedly result, but the abuses in this whole area are so great that the hardships would be a small price to pay for their elimination. And at a flat rate of about 10 per cent, nondeductibility isn't such a tremendous penalty in any event.

AN ILLUSORY ADVANTAGE

The major objection to such a plan would be its apparent regressivity.

There are basically four answers to this objection. The first is that the supposed progressivity of the present income tax is largely illusory and mostly window dressing. Whether it operates progressively or not is very much a hit-or-miss proposition, varying according to the happenstance of the particular taxpayer. While the rate structure creates the appearance of strong progressivity, the plethora of special treatment means that the reality is often quite different. Second, I believe current economic analysis has in fact concluded that the present overall system, taking into account the social security tax, is quite definitely regressive in effect in any event. Third, there being so little honest progressivity in the present system, its preservation hardly justifies continuance of the present morass of complexity and special treatment. Fourth, if it were decided to build more real progressivity into a system such as I propose, this could be done quite easily and without inviting a repetition of the kind of mess we now have.

For example, it would seem to make sense to explore merging the employee share of the social security tax into the overall income tax structure. This approach could be considered as part of a comprehensive review of the present funding of the social security system.

A promising new possibility for consideration as part of any restructuring of the tax structure would be a consumption tax. Such a tax on expenditures above a certain amount could be utilized both to provide a portion of the revenue which would be otherwise raised by the income tax (and thus permit a further lowering of the income tax rate) and to eliminate any possible problem of regressivity in the tax system that I have proposed. A flat rate consumption tax could introduce significant new equity into our tax structure, without the disadvantages of a progressive tax on incomes.

As for the corporate income tax, its problems are quite different. However, the dif-

ferences in rates between corporate and noncorporate income lead to many of the complexities of the Internal Revenue Code. I have the strong impression that the corporate income tax operates in effect as a hidden sales tax. If that is correct, the corporate income tax is passed on as part of the cost of goods sold and gets paid in the final analysis by the consumer. Such an effect must be strongly regressive since the passed-on tax must enter into the price of everything we buy—without exemptions. It must also be inflationary since the amount of tax must be assumed to be "pyramided" through markups at the successive stages of the distribution and marketing system.

While it is politically far more palatable to tax corporations than to tax individuals, any basic overhaul of our tax system should not overlook the interrelationship between the corporate and individual tax systems. If the rates of the two taxes could be brought into greater parity, one of the major causes of complexity in our tax structure would be largely eliminated.

THE COSTS OF COMPLEXITY

The overly complex nature of the present system has another effect: it makes it practically impossible for our government and, particularly, the Congress to deal rapidly and efficiently with the need to adjust revenue in response to the nation's fiscal needs. Inevitably, the congressional effort gets bogged down in the political issue of how to distribute the tax increase or the tax relief, as the case may be, and inevitably issues of special treatment arise. Inevitably, any tax revision program brings out a horde of special pleaders—seeking either to secure new benefits or to protect the benefits they already enjoy. What should be a relatively straightforward process for raising or lowering tax receipts (which is, after all, what the tax system is supposed to be all about) becomes a legislative morass. Accordingly, two years is about par for a congressional response to the need for a revenue change. And the outcome is totally uncertain up until the last moment.

Such delay is intolerable when our government should come to grips effectively and promptly with budget needs and economic policy requirements. It is a delay that contributes to the growing public sense of the incapacity of government to govern. A simple flat rate income tax such as I propose would be a far more useful and efficient instrument of fiscal policy. A simple increase or decrease of the basic rate by a percentage point or two, or even by a fraction of a point, would be all that would be involved. I do not pretent that such a decision would necessarily be an easy one but, at least, policy makers would be able to focus on the gut issue: Should revenues be raised or lowered, and by how much? Frankly, under the present system, it is pretty hard to tell what the Congress is up to. I suspect that that is a judgment that most members of Congress would share.

The fact is that tax matters today are largely the province of experts. These experts, primarily in the legal and accounting professions, constitute a sort of priesthood on whom the rest of us must rely for interpretation of the holy mysteries. The priesthood even has its own private language and vocabulary.

This is bunk, and it is dangerous bunk in a democratic society. It is the kind of nonsense that contributes to the alienation of people from government. If we believe that greater public participation in the processes of government is vital to the restoration of confidence in government, then we had better insist that the basic governmental processes are susceptible to common understanding. A good place to start on such a course is the present tax system. Since one of the causes of the American Revolution was to get control of taxation into our own hands (or those of our own representatives), it might be fitting in this bicentennial year to stage another tax revolt—this time to take taxation away from the experts. My proposal makes this possible.

The present tax system helps erode the credibility of government. There is a widespread feeling that the system is not fair, that the other guy is getting away with something—and he very likely is. That is not a healthy atmosphere, and it can have a corrosive effect on our institutions generally. It can have a disastrous effect on our tax system itself.

The American income tax is fundamentally a "self-assessed" tax. Were it not for the basic good will and honesty of our taxpayers, even an army of policemen could not make it work. Unfortunately, there is considerable evidence today that this spirit of cooperation is wearing thin. Unless we restore confidence in the basic fairness of the system, we run a real risk of undermining our ability to support our government.

While outright tax evasion is a crime, tax avoidance is usually treated as a virtue. In the great game of taxation between citizen and government, the citizen is expected and even encouraged to take advantage of every legal way to minimize his taxes. Given the stakes involved, it is not surprising that there is a good deal of stretching of the technical legalities. In my opinion, the individual income tax has done more than any other single device, with the possible exception of Prohibition, to promote disrespect for the law, encourage cheating and put a premium on corner-cutting in our relations with government and our fellows.

WHOSE OX IS GORED?

Since the benefits of such a fundamental tax reform seem overwhelming, who could possibly be against it? The answer, alas, is: practically everyone.

The beneficiaries of existing loopholes would fear and probably resist their elimination, despite the low rate that would be substituted.

There would be the politicians and others who would demagogue over the apparent lowering of rates on the wealthy, while continuing behind the scenes to play the game of special tax benefits.

Many tax lawyers and accountants would oppose such a basic change—some doubtless because of the potential loss of a highly remunerative occupation but more generally, I suspect, because of a strong mind-set against getting away from the familiar. It is for this latter reason that I would urge that, if any public commission were to be set up to recommend changes in our tax structure, tax professionals be excluded from its membership. Tax reform is too important to be left to the experts.

State and local governments would oppose the change because of the elimination (albeit prospectively only) of the tax exemption of interest on municipal bonds. This element of the plan would unquestionably lead to a rise in the cost of state and local borrowing at a time when these governments are already hard-pressed in the financial markets. An appropriate answer to this problem would seem to be a direct federal subsidy outside the tax system. The present tax exemption is already a subsidy, hidden perhaps but nonetheless real in terms of lost federal revenue. A comparable effect could be achieved by the federal government paying some percentage of the interest cost of future borrowing to state and local governments—a percentage designed to be roughly equivalent to the rate advantage previously enjoyed. It should cost us about the same.

Churches, private educational institutions and other exempt organizations generally referred to as "charitable" would presumably oppose the change for fear that the nondeductibility of their contributions would dry up their support. There would undoubtedly be some reduction in very large gifts by upper bracket taxpayers made relatively painless today by tax deductions.

Tax considerations would no longer represent a moving force behind gifts. Actually, there are many reasons, aside from taxes, why people give their money away—a sense of social responsibility, simple charitable impulse, a feeling of affection or gratitude toward the institution concerned, religious conviction, a desire for a personal memorial, etc. These would all continue absent tax deductibility. Who knows, nontax donations might even take on a new vitality. Moreover, the low flat rate I propose should result overall in more disposable income being left to individuals out of which to satisfy their charitable impulses. And at the proposed low level of tax, nondeductibility should not result in any significant disincentive to charitable gifts.

If my proposal for substantially eliminating deductions for business entertaining, meals and travel were adopted, there would be strong opposition from those service industries that benefit from expense account spending. The uproar from restaurants, theaters, night clubs and convention centers in many areas would be considerable, to say the least. Moreover, customers might even start insisting on decent service, inasmuch as they would be paying out of their own pocket.

ADJUSTMENT PROBLEMS

All of this leads to the plain conclusion that, whatever the merits of the "Train plan," there would be adjustment problems in its implementation. The significance of these adjustment problems is an indication of the very real extent to which the present tax system has already influenced ("warped" might be a better word) the patterns of behavior of our society. I believe we can only benefit by eliminating this influence and by making the federal tax bite essentially neutral to our personal decisions. The withdrawal pains will be considerable. Thus, some transitional device, such as phasing in the new system over five years, might be desirable.

I do not hold out my proposal as being technically perfect—far from it. There are doubtless many technical difficulties. However, I am confident that, if a minute fraction of the time and effort that we have spent over the years in developing our present Rube Goldberg tax structure were put into perfecting the kind of plan I have put forward, we would readily solve any technical difficulties.

If we are serious about tax reform, a completely fresh start is required. We can in fact have a simple, fair, understandable and effective tax system if we want it and are willing to make the hard political choices which are involved. I frankly doubt that we are.

ADDRESS BY DR. ANN ACKOUREY

Mr. BAKER. Mr. President, I would like to take this opportunity to share with my colleagues in the Senate an address presented recently to the Southeastern Regional Conference on International Education by a distinguished Tennessee educator, Dr. Ann Ackourey, executive vice president of Cumberland College in Lebanon, Tenn.

Dr. Ackourey stresses the importance of internationalizing education as we attempt to put all of our resources to work in seeking solutions to global problems confronting all nations today.

Mr. President, I ask unanimous consent that Dr. Ackourey's address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SOUTHEASTERN REGIONAL CONFERENCE ON INTERNATIONAL EDUCATION—BROAD INTEGRATED APPROACHES TO THE CONTEMPORARY WORLD

Recently I attended an international symposium organized by the American Council of Learned Societies, the American Studies Association, and the Smithsonian Institution. Those of us representing education had as our task along with politicians, economists, and artists, to examine the role of American culture in other world societies. The answers that resulted can be summarized by saying most foreign educators liked the idea of what our educational system maintained: equality of opportunity, experimentalism, comprehensiveness. But they were apprehensive about the effect American education and culture might bear on their respective societies. Let me select some revealing statements to show you how they felt.

Alexander Kwapong, Vice Rector of the United Nations University in Tokyo, felt invaded by American cultural and educational practices.

William Armytage, Professor of Education at Britain's University of Sheffield, noted that the University of London was established, in part, on the American model dating to the day of Jefferson's University of Virginia.

Sahair El Calamawy, Professor of Modern Arabic Literature at Cairo University, found American educators—the early missionaries—brought fundamental changes to Egypt in the 19th century as well as offered education to women.

Ivan Boldizsr, a Hungarian writer, speculated on what the reaction would be back home when he told his colleagues he had spent time in the United States discussing comic books; political reform and jazz were other aspects of the American culture discussed at the Conference.

Torsten Husén, Director for the Study of International Problems in Education at the University of Stockholm, commented at the conclusion that he had always been intrigued by the type of masochism found in American education.

What implications do these professional exchanges have for us here today? These will become apparent to us if we stop a minute to examine further some population predictions and their concomitant effects.

According to the most recent edition of the *United Nations Demographic Yearbook,* the world's population of 3.89 billion will double by year 2012 if the latest annual growth rate of 1.9 percent is held. Problems likely to surface to a much greater extent than present according to members of the National Association of Science at their recent world conference will be:

(1) food and health.
(2) environment.
(3) resources and energy.
(4) arms control and nuclear technology.

Many international experts claim these major global problems will be with us for the next quarter century. We in higher education, then, have a significant opportunity to join forces within our institutions, our communities, our states, our nation, and with other nations to provide some real solutions. These solutions could include the development of a globalized curriculum on our campuses, formal courses using two or more related disciplines, or linking understandings in the social or behavioral sciences with those in the arts, humanities, and sciences. Whatever broad, integrated approach we use to align with our contemporary world we should concentrate first on the needs and purposes in educating people on an international basis.

In the areas of food and health—we need our colleges and universities, the technical community, and society-at-large to apply our present technological tools in search for new ones.

In the area of the environment—we need colleges and universities to monitor, assess risks, and communicate what we know so the proper decisions can be made with the minimization of uncertainties.

In the area of resource and energy—we need our colleges and universities to develop a storehouse so that options of one material substituted over another can be made.

In the area of arms control and nuclear proliferation—we need our colleges and universities to increase the cognizance of the disarmament issues by scientists all over the world and how involvement in the arms race can be affected by the political process.

If we are to provide the linkages to internationalizing and opening more doors to global-type education, we shall need to do four things:

1. Improve the process for generating and managing the introduction and evolution of technology with the human element.

2. Maintain new standards of scientific research and apply them to problems of widespread public significance.

3. Disseminate research findings throughout the world and especially among developing nations.

4. Fortify the framework of decision making of issues related to global issues.

Whatever route we take in higher education we should subscribe to values which are not culture bound. We will have to be cognizant in whatever approach we select that what is humanly valuable may be found in foreign cultures as well as in our own.

This brings us next to the range of practical tasks which appear to face us in higher education as we aspire toward the paradoxical concepts of unity and diversity. These tasks can be divided into two attempts:

1. the intramural—to widen the college curricula, faculty, and exchange.

2. the extramural—to direct internationalization and to educate our governments and citizens concerning the role and value of higher education in international affairs.

In curriculum, the business of extending education of the rising generation beyond what George Santayana once called "the frontiers of Christendom and respectability" remains in the main, unfinished. In some quarters though the case for an internationalized curriculum has been noteworthy. At the present I suggest that colleges which wish to move farther in this direction do two things:

1. Find ways to enable the faculty in social science and in the humanities to add a degree of specialized knowledge of non-Western societies and cultures. Two-year sabbaticals in mid-career might be an effective means to this end.

2. Nationals from non-Western societies should be included in faculties to expand the curricula.

These approaches could ward off future unemployment trends with the proper balance of staff, expanded fields of offerings, and for the student, longer periods in school to master the ever-growing field of knowledge. We need to be concerned about these. A survey of 23 nations conducted by the International Labor Organization indicated that the jobless reached 18 million last December. Over 7 million or 41 per cent of the unemployed were persons under 25 years of age. Even though this age group represented 22 per cent of the total labor force in the nations surveyed—18 European countries outside the Soviet Bloc, the United States, Canada, Japan, Australia, and New Zealand, the problem could be alleviated to some extent by our educational institutions studying and recommending solutions.

Another approach to internationalizing education involves collaboration of scholars and scientists of other societies. It would be salutary for one and all if the knowledge each society had of itself were to be shared with others. Think of the contributions already made to the understanding of our own society by such foreign observers as Alexis de Tocqueville in the nineteenth century and Gunnar Myrdal in the twentieth.

However broad the approach, selective, carefully skilled collaboration in comparative research among national and other scholars and scientists drawn from countries having comparable problems would seem most promising. The proper scaling and casting of collaborative research and curriculum developments must come from the host colleges, host scholars, and scientists and not the non-national researcher or funding agency. And if doors to international education are to remain open the colleges must make the case for the internationalization of education and must manage its further realization. This means the colleges and universities will have to debate and clarify the issues with tenacity in order to persuade themselves and their financial supporters that their values to society are to expand the national consciousness, not simply to reinforce it.

In summary, then, we have said that in integrating the broad approaches to international education we need to know the objectives, the needs, the assessments. The guidelines presented were based on the rationale that development assistance is no longer regarded as the export and application of ready-made technology but as presenting a deep intellectual challenge. Several colleges and universities have met this challenge by broadening subjects and recognizing that different countries go about them differently. And last, but not least, internationalism in higher education needs to be grounded in the very idea of a college or university—this idea to be focused on a universal view of knowledge and respect for different values.

To illustrate this last critical point let us take the traditional Middle East tale of Nasrudin Mulla.

A man saw Nasrudin searching for something on the ground.

"What have you lost, Mulla?" he asked.

"My key," said Mulla.

So the man went down on his knees, too, and they both looked for it.

After a time, the other man asked:

"Where exactly did you drop it?"

"In my own house."

"Then why are you looking here?"

"There is more light here than inside my house."

All of us concerned with the international linkages to education know that there are many doors to open. Like Nasrudin Mulla we, too, frequently look for solutions to problems in places where it may be easiest and most convenient to look, but not in the places where the roots of the problem lie.

Most of us charged with the responsibility of meeting broad integrated approaches to international education must go back inside to develop a strong foundation to share with and wherever appropriate the contributions of education for a better world.

KEN MACDONALD RETIRES FROM DES MOINES REGISTER AND TRIBUNE

Mr. CULVER. Mr. President, on January 1, one of the Nation's most eminent editors and publishers retired after 50 years of service from the Des Moines Register and Tribune.

In his long tenure, Ken MacDonald won many distinctions for himself and his newspapers and brought an impressive number of young newsmen along to Pulitzer Prize caliber.

But what is really unique about Ken MacDonald is the image of integrity and courage he has carried throughout his

life and career with unvarying kindness and civility toward all with whom he came in contact.

A gentleman who looks the part, Mr. MacDonald has exerted a half-century of leadership in a sometimes stormy profession without finding it necessary to raise his voice. He possesses perhaps the rarest and most precious of all human qualities—genuine humility.

He once said:

The real reason our times are out of joint is that we have moved ahead much more rapidly in natural and physical sciences than we have in the humanities, the behavioral sciences, in politics, in the art of governing ourselves.

Our knowledge has increased faster than our understanding.

I would like to share the story of Kenneth MacDonald's life and career with my colleagues. For I think it restores all of our souls to know that there are persons of this quality and wisdom among us.

I ask unanimous consent that the editorial and news story of Mr. MacDonald's retirement in the January 2, 1977, issue of the Des Moines Register be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Des Moines Sunday Register, Jan. 2, 1977]

GENTLEMAN OF THE PRESS

Kenneth MacDonald's name is missing from the masthead above these columns for the first time in decades. The absence, and his retirement, are a source of sadness to those privileged to work with him.

A newspaper's executives tend to be less well-known to its readers than by-lined reporters and columnists, but editors shape a publication by determining its character and philosophy. We have been fortunate to have had a person of Ken MacDonald's breadth and integrity imprinting his values on The Register and Tribune for so many years.

Ken MacDonald's contribution has been to journalism, not just to our newspapers. He has fought for freedom of the press and for responsibility in journalism, and he is recognized by his peers as a major national figure.

James Flansburg's article elsewhere in today's paper leaves little more to say about Ken MacDonald, except for the one word—"gentleman"—that comes insistently to mind when we think of him. Our dictionary objectively defines "gentleman" as "a polite, gracious, or considerate man with high standards of propriety or correct behavior." We are being objective when we say there is no more fitting description of our colleague.

[From the Des Moines Sunday Register, Jan. 2, 1977]

KENNETH MACDONALD RETIRES FROM R AND T

(By James Flansburg)

Kenneth MacDonald retired Saturday from The Register and Tribune.

Now 71, he was with the newspapers for 50 years, and he was head of the newspapers' news operations for nearly 40 years. At his retirement he was editorial chairman and a vice-president of the company.

For 10 years—from 1960 to 1970—MacDonald also was publisher and chief operating officer of the newspapers. He relinquished those titles to David Kruidenier in 1970, and he turned over the title of editor to Michael Gartner a year ago.

Relinquishing titles of power is unusual, but it is typical of MacDonald. He is a man of little ego in a business of egocentrics. He is a man whose power is derived from his integrity and intelligence, not from titles or trappings.

But no matter what his title, MacDonald has always been a center of power in the newspaper here, in the newspaper industry and in the community. Though David Kruidenier is president and publisher and, according to The Sunday Register, the second most powerful man in town, it is unlikely he would do anything that MacDonald counseled vigorously against. Though Michael Gartner is editor and has wrought many changes, none has been made without first clearing with MacDonald.

Indeed, this story—its length and its tone—represents one of the few times MacDonald has been outvoted by his colleagues.

THIRD EDITOR

MacDonald was only the third man to be editor of these newspapers since the Cowles interests bought them in 1903. Under him, the papers have grown in size and stature. During his tenure, 12 staff members won Pulitzer prizes. But given a chance, he would credit the readers for these successes.

"Without a literate, alert, progressive community, no newspaper can endure," he once said.

He is a generalist in an age of specialists, interested, it seems, in virtually every subject. That trait led The Register and Tribune to be among the first general circulation newspapers to look at such diverse things as conservation, education, medicine, utility regulation, religion and the arts as regular sources of news.

Register and Tribune readers were among the first in the country to learn of the energy crisis, the dangers of weed and insect sprays, lipstick dyes, untested tranquilizer drugs and poorly designed automobiles.

Under MacDonald, The Register became the country's premier daily newspaper in American agriculture and one of the few provincial newspapers whose voice was heard in Washington.

MacDonald held a number of civic positions—among them, president of the Greater Des Moines Committee, vice-president of the Greater Des Moines Chamber of Commerce, chairman of the Board of Simpson College and a director of Iowa Lutheran Hospital—and several important national positions: President of the American Society of Newspaper Editors, member of the board of the Associated Press, member of the Columbia University advisory board on the Pulitzer Prize awards.

TARGET OF IRE

But none of those duties ever caused him to take his hand off the tiller guiding Register and Tribune news and editorial policy. In his view, authority but never responsibility can be delegated. When the newspapers turned the glare of publicity on the activities of friends or associates, MacDonald held himself responsible—even though, under his system of hiring talented people and giving them great freedom, he may have known nothing about it beforehand.

"You don't have any business being in this field unless you expect to be in trouble about half the time," says MacDonald.

"An editor had better be prepared to lose most of his friends temporarily because sooner or later you're going to irritate or aggravate anybody you know."

MacDonald's view is that proper newspaper presentation of a controversy can end the controversy because it gives each side a chance to see what the other really looks like and how both look to the rest of the world.

Nevertheless, the calm, dignified man, whose patrician appearance and manners brought to mind the fictitional George Apley, often ended up in the center of raging battles and was the target of appeals about his own aggressive news policies.

"The most difficult thing I've encountered is to get the public to understand what the real function of a newspaper is," he says. "It's extremely difficult to get people to understand and accept the concept that the real function of a newspaper is news coverage and that it isn't to be for or against anything.

"One of the reasons they fail to understand is that a newspaper is also a business, and it's extremely difficult for many to understand that you can make a decision that isn't strictly a business decision.

"Of course, if we weren't a successful business, we couldn't be a responsible newspaper. And I think it's an article of faith that a democratic society can't exist unless it has a competent, responsible form of communication, so that people can understand the type of community they live in."

This is a philosophy inherited from the Gardner Cowleses—senior and junior—and now shared by MacDonald's successors as publisher and editor.

SELLING INFORMATION

The Register and Tribune's business has been selling information—not ideology—to the community of Iowa, MacDonald says. Numbers support the concept. Since MacDonald joined the newspapers upon his graduation from the University of Iowa in 1926, The Sunday Register's circulation has grown from 150,038 to 444,197, the morning Register's from 88,240 to 237,938 and the evening Tribune from 87,739 to 98,366—and that's during a period when the state's population has remained fundamentally static.

MacDonald's usual approach was the Socratic method—asking questions until the student finds the answer—delivered with the command presence of a five-star general and the demeanor of one who has seen the grail; in 50 years with the papers, he has never been known to pound a desk or raise his voice in anger. But he has been unyielding to those who pound and yell at him.

His principle was to get the news into print, rather than hold things until they're tidy, so that the readers can make their own decisions. "Give the reader the information that he or she needs in order to exercise some control over his own existence," he says.

THE STATEWIDE ISSUE

"The reader" question was dominant in a policy decision of some impact: That The Register should continue to be a statewide newspaper, gathering and disseminating news in all corners of the state, rather than concentrating on a tiny section surrounding Des Moines, as some countinghouse types recommended.

In those discussions, the Socratic teacher was replaced by the hard-hitting editorial writer:

"There is a need for a newspaper that covers this state, not just a city. I don't need to explain to any of you that there are many areas of vital concern to Iowans where we are the only newspaper with the staff, the resources, the competence to provide quality coverage."

Like all successful stewards, MacDonald is a futurist, interested in constructing a firm foundation today for tomorrow.

"He's an old turk always pushing for change," Michael Gartner once said, and nowhere was this more evident than in the design changes of the papers' format in the past three or four years.

MORE USEFUL

MacDonald's purpose was to make the papers "more attractive to the eye, easier to read, more useful, more convenient so that readers can find and identify whatever they are looking for."

The same philosophy prevailed when The Register and Tribune converted to an electronic editing system. It was tailored to meet the needs and habits of Iowa readers, although a standardized system would have saved the company hundreds of thousands of dollars.

The Register may be the country's sole surviving big-state statewide newspaper, and

that curious role—serving Des Moines and Iowa—has given it a residual strength not seen in most newspapers.

Undoubtedly, that strength bolstered the intellectual bent of the papers' owners and managers in battles with advertisers and community leaders who wanted to suppress some news development.

MacDonald regularly stood fast when advertisers pulled out their business because of unhappiness with news and editorial pages. The Register and Tribune, if it gave in to advertisers' whims, he would say, would no longer be an effective sales medium because readers would sense they were not getting all the news.

The same principle held when Des Moines community leaders put enormous pressure on the papers to quit publishing advertisements for massage parlors and X-rated movies.

MacDonald himself wrote the editorial saying that The Register and Tribune will accept advertising for any product or service that may legally be offered for sale.

"We don't think newspapers should decide who is permitted to operate a business in the community and who is forbidden to operate," it said. "In a democratic society that is a function of the community's elected officials, the police and the courts."

EXCELLENT SITUATION

Thus MacDonald had the same latitude from the newspapers' stockholders that he gave to his employees.

"I can't imagine an editor having a better situation than I've had here," he said, singling out Gardner (Mike) Cowles, the former publisher, president and for many years the papers' most prominent shareholder.

"I've never had an occasion when Mike Cowles or Dave Kruidenier or any member of the Cowles family insisted that I do something that I didn't think the paper should do."

Except for editorials, MacDonald wrote very little for publication. His prose, nevertheless, is a model for young reporters to follow, and there have been times when young reporters were sent to the files to study articles MacDonald wrote after a 1957 tour of Europe, the Mideast and India, and a 1963 visit to South America.

So a picture begins to emerge: A statesman in an unstatesmanlike profession and yet a craftsman whose professional skills exceed those of most of his colleagues.

THE STRONGEST TRAIT

But the strongest trait of all was finding and holding men and women of talent by giving them the latitude, authority and protection to do a superior job of gathering and presenting the news.

"It's the only way to get things done," he said, as he mulled over the names of some of those he has sent off to battle.

Pulitzer Prize winners James Risser, Frank Miller, Clark Mollenhoff, Lauren Soth, Richard Wilson, and on and on.

Behind them was a platoon of highly talented but unsung editors, the people who each day take the millions of words, stories and pictures that come rushing in and weave them into something that resembles sense and order.

MacDonald has been described as a renaissance man—well read, a formidable hiker (3 miles daily before going to the office), a pianist, carpenter and picture-framer, a man who taught himself to sail at age 67 or 68—but he does have gaps. One points up his strength as an editor because it would never be spotted by a Register reader.

He knows next to nothing about sports, and yet under him The Register has come to have a sporting page that is known and admired across the country.

MacDonald was born (Sept. 3, 1905) and reared in the Iowa town of Jefferson, the son of a farmer-banker, and after finishing public schools there, he entered the University of Iowa in Iowa City.

Like most journalists, he has no concrete idea of why he ended up in the field, but in any case he was drawn toward the Daily Iowan, where he met a couple of youngsters from Newton, Frank Eyerly, who served as MacDonald's managing editor for nearly a quarter century, and Richard Wilson, who upon becoming the papers' Washington correspondent in 1933 led them to a dominance in agricultural news that they have never relinquished.

The three gravitated to Des Moines and The Register—for a time they took rooms together at the old Hotel Victoria—stood up to the constant jibes about being journalism school dandies, and were quickly caught up in the intoxicating whirl of daily journalism.

A DIVIDING POINT

It was a dividing point between eras—today's professionalism and yesterday's tramp printer and editor who bummed from paper to paper.

It was before radio news and television. Newspapers were the only purveyor of daily news, and, as the 23-year-old city editor in 1929 (he'd taken the job on the condition that Wilson be hired back from the St. Louis Globe-Democrat), MacDonald brought off a feat that is still mentioned by the old timers.

Long after the city edition had gone to press, MacDonald got word that several persons had been killed in a fire at the Hotel Kirkwood. He rousted out a staff and produced what was called an "extra" that went on the streets for sale to readers as they went to work that morning.

(There was a flaw: Everybody got the word except the man in charge of carrier boys. But that didn't daunt MacDonald and his crew. They grabbed bunches of papers and hawked them through Des Moines' early morning streets.)

For about three years—1930 to 1933—MacDonald was The Register's news editor, Eyerly was telegraph editor and Wilson was city editor—a formidable trio whose imprint will remain on the paper and Iowa journalism for a long time.

For one thing, they recognized that the role of the newspaper was changing. The radio—news reports and entertainment programming—became a competitor for the readers' time.

A NEWS STORY

Unlike other papers, which tried to pretend that radio didn't exist (to the point of refusing to publish program schedules), The Register and Tribune treated radio for what it was: One of the big news stories of the day.

Perhaps that led to Eyerly's definition—"News is the authentication of human experience."—and MacDonald's philosophy that anything is grist for the newspaper's mill.

History repeated itself some 20 years later with the advent of television. Other editors were figuratively hiding under their beds while The Register treated it as a significant news story—sometimes even reviewing programs on the front page.

"It seemed to me that it was a great boon to newspapers," recalls MacDonald. "Because it exposed many people to things that they'd never seen or heard before, and, therefore, they were more interested in reading about it."

There is, however, much more to the art of editing a newspaper than identifying and capitalizing on trends. An editor has to focus the resources of his paper so he can tell the reader what makes his community tick.

Register reporter Arnold Garson's study of the power structure in Des Moines a few months ago is an example. So was a statewide survey nearly 15 years ago showing that Iowa liquor laws were a farce. So in a larger sense were James Risser's stories on grain inspection, Nick Kotz's examination of dirty meat packers, reports on the dubious practices of Parsons College, the Teamsters Union, the secrets of the Yalta Conference, the financial finagling of stock salesmen, and on and on. Fully 20 years before the Pentagon Papers, The Register published secret government documents to bring the Harry Dexter White spy case to a head.

Probably hundreds of screams of outraged, and usually baseless, anguish have been aimed at MacDonald. Visiting Des Moines once, then Vice-President Hubert Humphrey nearly frothed at the mouth over a Register report about Democrats being padded on a deprived-youth payroll. Often as not the target of the anger, the reporter, heard nothing from MacDonald.

A COMPLIMENT

"It goes on all your professional life," says MacDonald. "You take it as being an unrecognized compliment. People think it is their paper. If they didn't give a damn, they wouldn't say anything about it."

He was talking about, it should be noted, the flak an editor takes even when a report is correct. An erroneous report produced a quick reaction: A correction and an apology. Former reporters can provide other details.

It is in this quite touchy area that MacDonald has also been a leader. He has long been an advocate of national and local press councils to look into complaints about the press.

Many of his fellow editors fear such an inspection, arguing that it could abridge freedom of the press. About three years ago, MacDonald took to the podium at a meeting of the American Society of Newspaper Editors to argue his case.

"I can readily understand why a newspaper or a news service might find cooperation with a press council time-consuming or frustrating or uncomfortable or, perhaps, embarrassing," he said. "But I don't see how a newspaper's freedom would be endangered providing the council has no connection with government and no power to compel newspapers to do anything."

He added: "We may be producing the best newspapers in history, but if readers in sizable numbers continue to suspect otherwise, freedom of the press eventually will be abridged."

In conversations about MacDonald with his friends, colleagues and employes, integrity is a word that comes up early. His stand on press councils—a willingness to be publicly judged—is a better example than dozens of quotes that can be gathered.

Courage is another term that comes up, and in a large news organization—about 250 editors, reporters and other at The Register and Tribune—it is not enough for the top man to have courage. He, aided by ownership and management, must create an atmosphere to permit that delicate plant to flourish, an atmosphere where a person has no more fear of saying, "I was wrong," than he does of saying, "I am right."

M'CARTHY DAYS

In the dark days of McCarthyism in the early 1950s, MacDonald presented a paper to the Prairie Club in Des Moines. "Why Are We Afraid?" was the title, and he listed the phobias that dominated the day, adding:

"Just as a child afraid of the dark can hear an enemy in every whisper of the wind, so those who suffer from this affliction, or who use it for their own selfish ends, can see a Red conspiracy everywhere they look.

"This is a fear which warps our political judgments, divides our citizens, confuses the naive, panics the faint-hearted, encourages the demagogues and threatens to sap our national vitality."

He noted sentiment in the country against even debating recognition of Red China.

"If we are afraid to debate recognition of Red China, how can we conceivably know what the wise course is with respect to that issue?" he asked, contending that a nation could move so far to secure its freedoms

that it would no longer have the thing it was trying to secure.

"If we want absolute security," he said, "we shouldn't permit road maps. They would be of inestimable value to an enemy in the event of an invasion."

Many people at the time were thinking the same things, but few were saying them because they feared being damaged by the hysteria of the day.

But at The Register and Tribune, MacDonald's historical perspective created a calm island in an angry sea. Small wonder that not much later, while others were calling for bomb shelters, Editorial Page Editor Lauren Soth wrote his Pulitzer Prize-winning editorial inviting Nikita Khrushchev and his Russians to come to Iowa to learn about agriculture.

Hindsight shows that the resulting agricultural exchanges and the Khrushchev visit marked the beginning of the end of the dreadful tensions of the Cold War.

IN THE VANGUARD

While MacDonald's body of writing is not very great, he did speak fairly often and a perusal of those speeches shows that time and again he ran in the vanguard of American thought.

Ten years ago, in a speech to the Prairie Club, he talked about the interdependence that has enveloped the world because of instant communications and the threat of mass destruction.

"The real reason our times are out of joint," he said, "is that we have moved ahead much more rapidly in the natural and physical sciences than we have in the humanities, the behavioral sciences, in politics, in the art of governing ourselves.

"Our knowledge has increased faster than our understanding."

The thirst for understanding the old and seeing the new has been with MacDonald for years. At the end of World War II, he and some fellow Naval intelligence officers wanted to visit Shanghai, and so they searched around until they found a good reason to go there: Map the China coast while things were in such an uproar that no one would object.

Over the years, MacDonald was the recipient of several honorary degrees, was a member of the American Council of Education for Journalism, a national accrediting organization for journalism schools. He was named a "master editor-publisher" by the Iowa Press Association, is a member of the University of Iowa's Iowa Journalism Hall of Fame.

In retirement, MacDonald and his wife (the former Helen Inman) will continue to live in Des Moines at 3412 Southern Hills Drive. MacDonald plans some writing, will remain a member of the board of directors of the Des Moines Register and Tribune Company, and he plans some travel including a visit to their son, Stephen, in New York City, and to a magnificent old inn that the MacDonalds discovered in Maine a year or so ago.

WYOMING'S MALCOLM WALLOP

Mr. HANSEN. Mr. President, the people of my State have a new champion in Washington to help advance their causes in the Congress and before the agencies of Government. He is U.S. Senator MALCOLM WALLOP. I am proud to welcome him to the Senate and enthusiastic about working with him in behalf of the citizens of the Equality State.

Senator WALLOP has served notice on Washington that he will vigorously fight attempts to increase the Federal Government's influence in and control of the lives of Wyoming citizens. At least one Washington resident has already acknowledged the message. He is George Will, a distinguished political writer, who said in a recent column about my State's newest Senator:

Wyoming, for its part, has sent Wallop to Washington with this message: Wyoming's master hasn't been born yet.

Mr. Will is so right, and I predict that Government officials are going to be hearing from Senator WALLOP.

Mr. President, I ask unanimous consent that Mr. Will's January 13 column from the Washington Post about Senator WALLOP be printed in the RECORD for the benefit of my colleagues.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

WYOMING'S MASTER HAS NOT BEEN BORN

(By George F. Will)

An Englishman visiting a Wyoming ranch in the 1880s asked the foreman, "Is your master home?" and the foreman replied, "The s.o.b. hasn't been born yet." Another Englishman (or perhaps the same one) was mentioned in a cowboy's letter to a ranch owner wintering in the East:

"Deer sur, we have brand 800 caves this roundup we have made sum hay potatoes is a fare crop. That Inglishman you lef in charge at the other camp got to fresh and we had to kill the s.o.b. Nothing much has happened since yu lef. Yurs truly, Jim."

I hope, gentle reader, that you will pardon the pungency of Wyoming expression. Westeners are said to believe that "swearing takes the strain off the liver," a medical opinion you should not ridicule in the presence of Jim.

Western lore includes many stories about Englishmen because in the 19th century the West, and especially Wyoming, attracted a lot of English investments and investors. They produced ambitious land and cattle enterprises, many of which went smash because of the blizzard of 1887.

But a lot of cattle and a few Englishmen survived, so the new junior senator from Wyoming is Malcolm Wallop.

Some names are perfect. Captain Marvel, Mr. Keen, Tracer of Lost Persons, Senator Wallop, Wyoming Republican. He runs a modest spread of 15,000 acres near Sheridan, and probably can roll a cigarette while breaking a mustang.

Wallop's grandfather came from England about 100 years ago, and was the only person to serve in both the House of Lords and the Wyoming legislature. One of his sons (Wallop's uncle) returned to England and is the Earl of Portsmouth. Now Wallop has come to Washington as an ambassador, of sorts, from his state, and from a state of mind called the Mountain West.

The Mountain West is like the Old South in this sense: More than any other region, the Mountain West has a sense of regional identity, pride in the superiority of its values, and a dark and well-founded suspicion that the nation's other regions may try to impose their will on it.

Wyoming's population is under 400,000, fewer than four people per square mile, but it always has had a sophisticated electorate. Wyoming pioneered women's suffrage (and had the first woman governor) because Wyoming's pioneer women were full partners in planting civilization in one of the nation's harshest climates. Today Wyoming voters know they must defend, against the federal government, their right to make decisions that, made poorly, can ruin the state.

Eighty-six per cent of the Wyoming electorate voted in 1976. Few electorates have such a stake in government. The federal government owns 50 per cent of Wyoming's land, 86 per cent of the minerals. Two of the state's most important problems are water and coal. It has too little of the former and may have too much of the latter.

Draw a north-south line through the nation passing along the Kansas-Missouri border. Only one-third of the water in the continental United States is west of that line, and two-thirds of that one-third is in the Columbia River drainage.

Thirteen Western states (including Wyoming) that comprise half the land mass of the continental United States have only 12 per cent of the water. Today water flows, in effect, through Washington, especially through Congress and the Army Corps of Engineers.

Wyoming, like Montana and other states in the region, is sitting on huge deposits of coal. The issue is not whether to mine it, but how, and with what land-reclamation commitments. The danger is that the rest of the nation will try to solve its energy problems by treating the Mountain West as a "utilities wasteland," mining it ruthlessly and planting it thick with generating plants.

The 1890 Census declared the frontier closed. In 1976, for the first time, the population of the South and West exceeded that of the rest of the nation. But most of the Mountain West has been spared the very mixed blessings of industrialization and remains, if not a frontier, an enclave of the special values that made the West such an important part of the American experience and spirit.

Wyoming, for its part, has sent Wallop to Washington with this message: Wyoming's master hasn't been born yet.

WILLIMANTIC CHRONICLE OBSERVES A CENTURY OF NEWSPAPER PUBLISHING

Mr. RIBICOFF. Mr. President, the Chronicle of Willimantic, Conn., is observing its 100th anniversary this month. The Chronicle is one of the best newspapers, in my State of Connecticut. It enjoys a well-earned reputation for enterprise, accuracy, constructive, and independent commentary and high public service. On this occasion, congratulations are certainly in order for the Chronicle's publisher, Mrs. Lucy Bartlett Crosbie, the management and staff and other personnel associated with this outstanding newspaper.

Mrs. Crosbie wrote two fascinating articles about the Chronicle and about the northeastern section of Connecticut which her newspaper serves. The articles are entitled, "1877 * * * The Way It Was," and "The Crosbies: We Came as Babes in the Woods." The articles appeared in the January 4, 1977, special centennial edition of the Chronicle. Mr. President, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

1877 * * * THE WAY IT WAS

(By Lucy B. Crosbie)

It was a gentle subdued era, the decade in which The Chronicle was born.

The Civil War was still a vivid, painful memory.

The health of the 7,000 inhabitants of the borough of Willimantic was precarious in 1877. Illness and epidemics were distressingly common, sanitation, medical care and public health services were distressingly inadequate. There would be no hospital until 1907, but there was a "Pest-House" on Pleasant Street where victims of smallpox and diphtheria epidemics were quarantined and isolated for treatment at borough expense.

But even though times were hard, the

local spirit remained undaunted, asserting itself in the quiet but cherished distractions of the day.

The lack of telephones didn't seem to hamper the flow of "news" and gossip. Willimantic was still a place where almost everyone knew everyone else.

The wooden sidewalks and the dirt streets were alternately dusty or muddy. The Willimantic Gas Company had been organized in 1853 but it would be 10 years before electricity for lighting and power would be introduced into Willimantic.

The borough had just completed laying iron water pipes through the principal streets. The mill companies along the river agreed to furnish power for pumping the water in return for a rebate of one-half of their taxes to the borough.

There were three fire alarm boxes—one at the corner of Main and High Streets, one at Main and Church Streets and one at the corner of Union and Jackson Streets. The ringing of these alarm boxes simultaneously started the pumps in the three mills which furnished water for the fire department. The keys to the three fire alarm boxes were "distributed to responsible persons in the immediate vicinity of their location", according to the borough report for 1877.

One hoped the "responsible people" were in the vicinity of the location when you needed them. The Baptist Church bell was also used to call out the 100-man volunteer fire department.

Within nine years, six miles of pipe would be laid for what the borough burgesses called "Willimantic's Splendid Sewer System" with final disposition of the flow into the Natchaug River.

In 1877 other conveniences now taken for granted were then luxuries. Even indoor plumbing was still considered novel.

There can be no doubt that the everyday routine of living was considerably more demanding in 1877 than in 1977. For the working man, whether he clerked in the general store or labored in the mill, hours were long, pay low, and benefits non-existent. Women and children toiled in these same occupations but at lower wages.

Women ran a household without machinery and conveniences now taken for granted, doing everything laboriously by hand from scrubbing clothes with homemade soap on Monday morning to plucking the chicken for Sunday dinner.

It is difficult to work up much nostalgic longing for an outdoor privy on a January morning or the plague of flies endemic to a horse-drawn society.

By all appearances, Willimantic was a town entirely typical of its time and place.

The horse was still king and every town accommodated to that fact. On page one in the first edition of The Chronicle on January 4, 1877, the editor deplored that "fast driving on Sunday is still indulged in."

At the center of much activity was the railroad depot, a favorite gathering place. Three railroad lines and fifty trains a day passed through Willimantic and The Chronicle printed the schedule of all of them.

Willimantic was a lively place and was the market town for an area more than double its population. Willimantic hotels, The National, The European, The Brainerd, The Windham, and the soon-to-be-completed Hooker House, were jammed with drummers and salesmen. The hotels advertised sample rooms for display of the commercial travellers wares and goods. There were four billiard parlors in the borough, numerous saloons and six temperance societies.

Descendants of the founding families, joined by newcomers, many of them immigrants from Ireland, England and Eastern Europe, found employment in the mills and factories. In 1877, sixty thousand spindles at the Willimantic Linen Company turned out over twenty-four million yards of thread each day. The Windham Cotton Manufacturing Company consumed 12,000 pounds of cotton in producing 70,000 yards of print cloth per week.

As the era of the "Gay Nineties" approached, Willimantic began to bustle and the general tempo of life for the average citizen was picking up speed. The population of Willimantic borough would increase 63 per cent between 1870 and 1880, the largest increase in population in any decade since. The population in 1870 was 4,048; in 1880, 6,612.

The family was still the primary focus of social life for both young and old. The piano and games, Bible readings and church bazaars, and berrypicking were activities that were shared by children as well as adults. Major social events were structured around family events and the church.

A growing immigrant population swelled the rolls of the newly built St. Joseph's Roman Catholic church, but most Willimantic residents worshipped at one of the borough's Protestant houses.

In the summer, people from miles around flocked to the Willimantic Camp Ground, established by the Methodist Church in 1860.

For the most part, it was an era of quiet worship—very little of the grand revivals and fire-and-brimestone preaching that earlier and later swept over the area.

There were two free libraries in Willimantic, one owned by the borough and located in the front room of the second floor of the Union Block over what was Wolmer and Case, Jewelers, when the Union Block was demolished by urban renewal in 1976.

The American Linen Company maintained the Dunham Library in a portion of the company store at the junction of lower Union Street and South Main Streets. The first day the Dunham Library opened, 400 of the 600 volumes were checked out by patrons.

"The lack of places like this is what has seriously affected the morals of our manufacturing towns," reported the Hartford Courant in describing the Dunham reading room as "well lighted with gas, and the sight of it is a temptation to sit down and enjoy it. . . . Adjoining is another room for smokers. . . . And all of this is free."

Like so many other characteristics of small-town living, most of life's pleasures were simple and local but no less pleasurable. People went for walks and buggy rides and bicycle tours; they fished and camped out and swam in rivers and nearby lakes. They picknicked and played croquet. Annual clambakes, birthday parties, Easter and Christmas festivities gave the city a gala touch. The highlight of the summer was the Fourth of July.

In winter they went for sleigh rides, ice skated, tobogganed and a few even tried iceboating.

Long before the automobile, before inventions of radio and television, the fun and entertainment of Willimantic in the 1870's was simple and moderate, though by no means puritan.

Despite a scarcity of cash, common in that day, the various halls and the Loomer Opera House at the corner of Main and North Streets drew large crowds, enjoying cultural affairs such as Italian operas, as well as minstrels shows and the often bawdy jokes of traveling shows such as The Blond Horse Excelsior and Old Dan Himself. There were amateur theatricals and frequent concerts. The Fireman's Ball was a popular winter event in Willimantic.

The rank-and-file resident of Willimantic had little reason to consider their environment either barren or sterile.

In the east end of the borough, at what is now Recreation Park, the spacious grounds of the Willimantic Fair Association with its half-mile track for trotters attracted huge crowds.

There were railroad excursions from Willimantic to Rocky Point in Rhode Island and others that connected with steamboats to Watch Hill and to Nantasket Beach.

Games and activities vary with the years, but laughter and smiles aren't dependent on the time of the century. Children laughed then as they do now. Rosy-cheeked boys and girls held hands, couples courted and the grownups—regardless of social or economic status—still found reasons to smile.

As with people of any age, those who wanted to have fun, did.

In 1877, there was a comfortable rhythm to the pattern of daily life in Willimantic that bred confidence in the natural order of things.

There was also a special mood that enveloped many Americans, especially small-town Americans, like people in Willimantic, in this era that historian Vincent Seidel Canby termed "The Age of Confidence."

"They really believed all they heard on the Fourth of July or read in school readers," he wrote. "They set on one plane of time, and that the present, the Declaration of Independence, the manifest destiny of America, the new plumbing, the growth of the factor system, the evening paper, and the church sociable. It was all there at once, better than elsewhere, their own and permanent . . . They had just the country they wanted . . . and they believed it would be the same, except for more bathtubs and faster trains, forever . . ." And he concludes, "for the last time in living memory everyone knew exactly what it meant to be an American."

It is probably true that figments of wishful thinking have embellished the Good Old Days, if they ever did exist. Someone has written that 1880 was a great time to be living . . . unless you had a toothache.

Still, if the Good Old Days ever did exist, if they marked a time when tranquility, individuality, decency and peace of mind were the common currency of daily living . . . then one place they were surely found was in the Willimantic of January, 1877, when The Chronicle was founded . . . a full century and several life styles ago.

THE CROSBIES: "WE CAME AS BABES IN THE WOODS"

(NOTE.—Lucy Bartlett Crosbie has been Chronicle President and Publisher for 22 years. Mrs. Crosbie, 47, went to work at the Chronicle on her sixteenth birthday in May, 1945, one week after the death of her father, G. Donald Bartlett, Chronicle publisher. His step-grand father, John A. McDonald, was the first publisher and so Mrs. Crosbie is the fourth generation of her family to have that title.

(A junior in boarding school when her father died, she worked summers at the newspaper becoming a fulltime employee in 1950 following graduation from Boston University School of Management. She completed her degree in Business Administration in three years because she was in such a hurry to get back to The Chronicle, she recalls.

(In 1952 she married Arthur W. "Bud" Crosbie, who was then a Lieutenant Commander in the U.S. Navy. A World War II veteran, he had been recalled to active duty during the Korean War and the Crosbies spent the next year living in Norfolk, Va., until his discharge in 1953.

(In November 1953, they returned to Willimantic and began a partnership of management at the newspaper that lasted 23 years, until his death Sept. 23 last year at age 56.

(She tells this story of the Chronicle.

(We were babes in the woods in the newspaper business in 1953. There was so much to learn and we had a long way to go. We made a lot of mistakes, suffered endless frustrations, worked like dogs and had lots of fun.)

With almost no training or experience we became, all at once, reporters, editorial writers, photographers, advertising salesmen, motor carrier drivers, bookkeepers and production 'experts'.

In 1953 there was no advertising depart-

ment or salesman at the newspaper. If you wanted to advertise, you came in to the office and handed your ad over the counter. Bud and I divided up the town, went out on the street and sold advertising.

If you lived outside the area served by newsboys, you got your paper by mail. Bud and I started two motor routes and drove them ourselves in the beginning. My mother, Teresa Bartlett, and my sister, Joan, who was then a student at Willimantic State College, drove the third and fourth routes.

We had no facilities for printing local pictures in the paper then. If someone brought in a picture we had to send it to The Norwich Bulletin to have an engraving made.

Bud bought a camera and became the first Chronicle photographer, I can remember the frantic rush to get home at five to cook dinner as fast as possible so he could be off on the evening assignments. We had no darkroom so the Camera Centre used to develop the pictures overnight for us.

The Fairchild Scan-A-Graver, an electronic engraving machine designed for the smaller newspaper came on the market then and we were able to make our own engravings. We built a darkroom and hired a photographer. But for years later people would still call our home at night to see if Bud could run over to such and such a place to take a picture of the installation of officers of some club "because we forgot to call the office during the day."

When we came to the paper Rick Downer was the editor and the two reporters, Charlie Curran and Jim Malone, and Rick performed miracles in turning out and editing all the copy they did. Bud and I took turns helping write obituaries, going to accidents and fires and covering meetings at night. We began to write local editorials.

We installed a fire-police radio in our kitchen which we monitored nights and weekends. Bud would rush out at night to cover the accidents. By then we had two children, Vincent, born in 1955 and Kevin, in 1960. They grew up knowing the fire and police codes.

If there was a "working fire" Bud would stay home and baby sit and let me go to the fire since anyone who knows me well knows I am a fire buff par excellence . . . a sort of closet fireman.

I still monitor the fire-police radio and still go to the fires although we have long since had reporters and photographers who regularly staff this beat.

As the paper expanded and we hired more people, Bud's and my area of supervision sort of fell into a natural division. I supervised the business office and editorial department and he handled advertising, circulation, and production.

Bud insisted that I retain the title Publisher to keep the title in direct descent in the Bartlett family. He was the general manager and he said if people questioned why the wife had the "higher title" that was their problem.

That we were able to work together all day and go home friends most evenings, was a testimony to the close relationship that developed between us in almost 24 years of 24-an-hour-day association.

Of course we didn't always agree and in fact used to have some terrible rows. My office had a glass wall so everyone could see us as we sat in conference. If we were arguing I would keep saying to him "keep your voice down" and SMILE so people won't know we are fighting. But I'm sure we didn't fool anyone.

Bud became fascinated with the revolutionary technological developments in printing composition and presswork that started in the mid 1950's. The last twenty years have seen more change in printing techniques than in the whole span between Gutenburg's invention of moveable type and Ottmar Mergenthaler's Linotype machine.

Bud was intrigued with the possibility of getting greater production in typesetting by installing Teletypesetter operating units on the linecasting machines. Operators could punch paper tapes on typewriters and feed the tapes into the linotypes, one of which could set the type electronically from several operators. In 1956 the Chronicle installed teletypesetter units and Bud and I learned, along with the operators how to punch stories into perforated tape. In 1967, we installed a computer which operated the linecasting machine automatically, wordspaced the type, hyphenated words and justified the right-hand margin. The computer doubled the speed of the tape perforator operators.

Bud's interest in photocomposition, called "cold-type" led him to become something of an expert on the filmsetting machines that were being developed to set type photographically and entirely eliminate the use of hot metal type.

He was quick to catch what became known in the trade as "offset fever" as newspapers began converting from letterpress to offset printing.

He was far ahead of most of us in the trade in seeing the possibilities for faster production, better reproduction and cleaner, more comfortable working conditions in photo composition and offset printing. He studied every machine and system and we visited printing plants, factories and trade shows all over the country.

I was much slower to become excited probably because I was terrified at the prospect of converting to offset and having to scrap every piece of equipment we owned, buying all new equipment, learning a whole new method of production and building a new plant.

Bud sort of dragged me into the new world of technology all the while I was muttering to him that if my great-grandfather had wanted an offset paper he would have started one in 1877.

I soon caught Bud's offset fever and he taught me the confusing new technology.

We had outgrown the Church street building and spent the summer of 1970 searching for a new location, selecting equipment and sketching plant designs and layout.

We were able to make the move and conversion in three months because we found an existing building, the Daole Hatchery Plant . . . a single-floor structure with wide open expanses which would lend itself to smooth production flow.

By then John Sweeney, former publisher of the Journal-Inquirer in Rockville, who had been through offset conversion had been hired as a consultant. Instead of hiring a team of professional newspaper engineering consultants, John, Bud and I designed and supervised every step of the change-over and acted as our own contractors.

As soon as we got the chicken crates, incubators and other debris out of the hatchery plant and had the place cleaned up, we began chalking lines in the floors to indicate walls, machines, and work-flow. Soon the place looked like a giant hop-scotch patch because we each had our own ideas.

Somehow we put it all together and in January 1971 the newspaper moved locations overnight and simultaneously converted from hot metal letterpress to photo-offset lithographic reproduction without interruption in publication or without missing a deadline.

Renovation of the building, installation of new equipment, retraining of personnel—the total conversion to offset took less than three months.

On Friday, January 22, 1971, the moving vans arrived at the Church street plant just after the press stopped at 1:30 in the afternoon. We moved overnight and went to press Saturday with the new equipment in a whole new technology. And we went to press on time.

Of course everyone stayed up almost all night long to do it. When the first offset press run was completed we were literally so exhausted we could not stand upright. We all sat or stretched out flat on the floor and drank champagne and then took Sunday off to recuperate and start all over on Monday.

The key to this successful conversion was the time Bud and John spent on careful planning and on proper training of employees. Chronicle employees, some of whom had worked in hot metal for nearly fifty years, made the transition successfully because of their determination to make it work.

Since 1970, Bud's enthusiasm for new ways to generate typeset characters continued unabated. Soon we began to hear him talk about the use of CRT's and VDT's and now I had to learn about cathode ray tube typesetters and video display terminals. We have them in operation in the Chronicle plant today.

The day Bud died he had been explaining to me enthusiastically that afternoon the exciting possibilities of magnetic disk drives and something called "floppy disk units" and magnet cassette readers that would eliminate paper tape. He saw the future and he always tried to provide for it. My challenge now is to keep up with all the advances in technology and typesetting trends as he would have.

Bud died of a massive coronary attack the evening of September 23, 1976 which occurred as I was driving us along Prospect street. By the time we reached the hospital three blocks away it was too late.

I came back to work the day after his funeral because I had to. I'm grateful for this busy job which keeps me occupied and involved . . . and for my two children, Vincent, 21 and Kevin, 16 . . . and for my association with the Chronicle staff—my 'other' family.

Someone (probably a newspaper publisher whose telephone rings night after night with the complaint calls I get) once said that the only friend a newspaper publisher can have is another newspaper publisher. And some days I think that is true. Especially when you publish a newspaper in a small community where everyone knows who you are and how to get to you with what seems like an endless stream of complaints and requests.

You have to have a thick skin and sometimes I think my skin isn't tough enough. Then I remember Harry Truman's advice about getting out of the kitchen if you can't stand the heat and I'm right back in the kitchen standing over the stove again.

A newspaper is an imperfect institution no matter what the best of publishers may tell you. It is produced by imperfect human beings. It is read and perceived by imperfect human beings, which makes perfect understanding impossible even if one had a perfect newspaper to start.

I'm proud of this newspaper and impressed by the way the men and women of the past who have worked on it left something behind that made The Chronicle that much better for their having been involved.

The ties that bind a newspaper to the community are unique.

We feel confident in the future of the region the newspaper serves and it is to this community that we owe a debt of gratitude for the support of The Chronicle these past 100 years.

MILITARY UNIONISM—A HOAX AND DECEPTION

Mr. GOLDWATER. Mr. President, it is my considered opinion that we have taken far too long in discussing the possibility of military services being organized by the unions. The idea is ridiculous on its face and should be treated that way by the President, the Defense Department, and the Congress. Already, the discussion about military unionism has created too much confusion and now threat-

ens to have a serious impact upon the morale of our Armed Forces.

Mr. President, recently the Association of the U.S. Army suggested a three-pronged course of action to handle this problem. First, it said the President should immediately issue an Executive order that would prohibit service personnel from joining a union. Second, the Defense Department should promulgate service regulations that would prohibit service personnel from joining military unions, bar organizing activities on military installations, and prohibit commanders from dealing with unions. Congress should enact promptly legislation redefining these prohibitions in clear language so there can be no misunderstanding about the intent of Congress and the attitude of Government on this subject. Mr. President, I agree with the association's approach, however, I believe that Congress should move ahead on its own to promptly enact legislation that would settle this problem once and for all. I ask unanimous consent to have the association's position paper entitled, "Military Unionism—A Hoax and Deception," printed in the RECORD.

There being no objection, the paper was ordered to be printed in the RECORD, as follows:

MILITARY UNIONISM—A HOAX AND DECEPTION

For almost the past two years the Services and the Congress have been "viewing with alarm" suggestions by one or more unions that they might try to organize military personnel into unions and take strong action to better the lot of uniformed personnel. There has been a great deal of rhetoric, confusion and general milling around—at a rate controlled by spokesmen for the union who decide on their own when they would like to stir the pot. The situation for a nation of our stature is both incredible and intolerable and needs to be brought promptly to a halt for the good of the country.

The whole concept being bandied about, principally by the American Federation of Government Employees, is a cruel hoax and deception. Implicit in all of their fanfare is the concept that by some magic means the union could obtain for the serviceman increased compensation, better working and living conditions and a much stronger voice in the management of the Armed Forces. Such proposals display either little respect for the intelligence of the individual serviceman or a complete ignorance of our governmental system, our Constitution and the body of law which governs our society.

This divisive issue impacts seriously on the morale of those who serve and, if for no other reason, should be stopped now.

We urge several courses of action. First, the President should immediately issue a new Executive order that would prohibit service personnel from joining a union. He already has the authority as Commander in Chief of the Armed Forces to do so.

Secondly, the Department of Defense should issue a directive to be promulgated into Service Regulations that prohibit service personnel from joining military unions, bar organizing activities on military installations and continue the prohibition of Commanders from dealing with unions.

Third, the Congress should enact promptly legislation redefining these prohibitions in clear language so that there can be no misunderstanding of the intent of Congress and the unanimity in the Government on this subject.

Finally, the Services need to insure that wide publicity is given to all ranks explaining more clearly existing grievance machinery and insuring that all in the chain of command understand fully their responsibilities.

There will be those who will challenge the prohibition against joining a union as an infringement of the Constitutional rights of the individual serviceman. We recognize that military personnel enjoy the protection of Constitutional rights. However, those rights in this case, as they do in others, must yield to the unique role of the military. The need for discipline, obedience and unswerving loyalty is an absolute military necessity. These precepts could be seriously eroded were military personnel permitted to join servicemen's unions. By finding the needs of the military to be paramount, this situation need never arise. Moreover, there have been a variety of cases in which the Supreme Court has recognized this unique role of the military. ". . . the rights of men in the Armed Forces must perforce be conditioned to meet certain overriding demands of discipline and duty." United States Ex Rel. *Toth v. Quarles*, 350 U.S. 11 (1955). See also: *Orloff v. Willoughby*, 345 U.S. 83 (1953); *Parker v. Levy*, 417 U.S. 733 (1974) which states in part:

"The fundamental necessity for obedience, and the consequent necessity for imposition of discipline, may render permissible with the military that which would be constitutionally impermissible outside it."

For many years the Supreme Court was reluctant to review actions arising out of military activities. They and other Federal courts now do so regularly. However, the Supreme Court in such review has recognized that, because of the unique role played by the military, Congress and the executive branches of government are better equipped to govern the military than are the courts. Because the framers of the Consitution entrusted to Congress and the President the responsibility of running the military, the courts have been hesitant to interfere unless clearly defined judicial matters are involved (Orloff v. Willoughby, supra, and Burns v. Wilson, supra).

One of the very purposes for which the Constitution was ordained and established was to "provide for the common defense," and the Supreme Court over the years has on countless occasions recognized the special constitutional function of the military in our national life, a function both explicit and indispensable. (Citations omitted.)

In view of the judicially recognized necessity of discipline and obedience within the military, any activity reasonably calculated to degrade such discipline and obedience must yield. An organization which espouses collective bargaining between soldiers and the Government and which purports to represent and negotiate for soldiers with the chain of command on matters pertaining to pay, personnel practices, grievances and working conditions is inimicable, *per se*, to the maintenance of discipline and obedience. Obedience to military orders cannot be the subject of negotiation or bargaining. Accordingly, membership in such a union by soldiers must yield to the greater national need. This would be so even though the union claims no right to strike; first, because the ultimate bargaining tool of any union, contrary to any representations made, is a work slowdown, job action, or strike (e.g., "illegal" postal strike in 1970); second, because the insertion of a third party between the soldier and his chain of command would, of necessity, degrade the authority of the latter over the former, at least as perceived by the soldier.

It would appear that the mechanics of the problem could be solved promptly by Presidential Executive Order augmenting Executive Order 11491 which covers the administration of labor management relations in the Federal Government, recognition of units, negotiation of contracts, rights and conduct of management, labor unions and employees. It already prohibits striking or bargaining for wages by federal unions or employees. It also prohibits collective bargaining *National Security Organizations*, specifically the Federal Bureau of Investigation and Central Intelligence Agency.

It scarcely seems credible that it should be necessary to specifically identify the Armed Forces as "National Security Organizations." But if that is a hang up, we urge the President, in the new Executive Order, to make that point clear.

In our view, the Department of Defense should now issue a directive which the Services could pass downward in the form of regulations that would prohibit uniformed personnel from joining military unions.

We would urge as well prompt passage of legislation along the lines of that proposed by Senator Strom Thurmond and others during the last session of Congress which would prohibit servicemen from joining military unions. This legislation would clear up that gray constitutional area between the Congress and the Executive Branch with respect to specific controls of the military.

The Chief of Staff of the Army has quite rightly made the point that he is the principal ombudsman for the Army. And he has pointed up clearly that the chain of command functioning properly will consistently reflect the morale and concerns of those who serve. If the system functions efficiently, soldiers will look to the chain of command for problem solving. There is no substitute for leadership in these matters. A commander who successfully instills unit pride and sense of mission accomplishment, who makes sure his troops know he is concerned about their welfare, who eliminates petty harassment and senseless details will have no prospects for union membership in his command.

For those instances where the chain of command falters, and there will be instances, the soldiers must know that the existing grievance machinery—beginning in the lowest unit and working up formally through the Inspector General will work fairly and impartially—and that any who seek to impede it will be dealt with harshly. These are areas which the Chief of Staff of the Army is currently giving great emphasis—and they will help immeasurably.

There will continue to be a perception among some, both serving and retired, that the concerns and needs of the military require vigorous support beyond that which is available officially. They want assurance that those concerns and requirements are being fairly presented and getting full consideration at those levels of the government empowered to take corrective action, i.e., the Department of Defense, Office of Management and Budget, the White House and Congress. Moreover, they want to have a sense that their accomplishments and problems have the sympathetic understanding amongst the broad reach of our citizenry.

This is a job that the Association of the U.S. Army and similar associations of the other Services are now performing—and more effectively than any union could. There are a variety of reasons for this.

AUSA and its sister associations enjoy sizeable memberships in their Services across a broad spectrum. Organizationally, with Chapters or similar units throughout the country, they have excellent grass-roots participation. Most of these organizations have in recent years increased their coverage and dissemination of information on the needs of the military—through position papers, fact sheets, testimony, newspaper columns, movies and T.V. shows.

These organizations have been active in the military field for long periods of time, most over a quarter of a century. So they are knowledgeable in the complexities of the needs of military people.

Perhaps one of the most significant advantages that these organizations enjoy is the fact that they have the respect and confidence of those who are in a position to make the decisions that affect the welfare of those

who serve. Not infrequently they are called upon to help suggest solutions. This role should be broadened.

These organizations perform these useful, even essential functions, without disrupting the chain of command or undermining in any way existing military authority.

Obviously, the costs to the career soldier who wants to support this effort are far less through an association than even minimal union dues.

AUSA's views as expressed above could fairly be termed self-serving because we are the Army—those who serve and those who support them. Our whole reason for existence is to support the Army which is, after all, people. Making the Army a better place to live and work has been our principal effort for the past quarter of a century.

We can be fairly criticized for doing an inadequate job of advertising our wares. In those areas where we have done a good job of publicizing what we do, people use and support AUSA—both as an ombudsman and as an external spokesman for their concerns. This is undoubtedly true of the principal associations of the other Services. But much more needs to be done to publicize the activities and accomplishments to make clear the important role that AUSA and other organizations already play. More public recognition of these association efforts by the Services, the Administration and the Congress would help assure those in uniform that they have strong support for their concerns—in addition to that evidenced in the chain of command.

We are persuaded as we stated publicly last May, that there is no useful role for unionism in the military. Events in the intervening months have strengthened that view. The time to lay this delusion to rest is now. The Administration and the Congress should act promptly so that all can get on with the important work that needs to be done.

BROADCAST JOURNALISM: SERVING THE DEMOCRATIC PROCESS

Mr. PROXMIRE. Mr. President, several days ago I introduced S. 22, the First Amendment Clarification Act of 1977, which is designed to give the people of the United States the full benefit of a free press, electronic as well as printed.

In America today, the preferred source of news for 76 percent of our people is radio and television. Yet, because of the Fairness Doctrine, the equal time rule, and other governmental controls, broadcasters are not on a par with publishers regarding first amendment rights.

My proposal, S. 22, would restrict the Federal Communications Commission's present power over what television and radio can say by limiting FCC regulation of the broadcast media to the policing of channels in order to prevent technical interference.

Enactment of S. 22 would result in the repeal of section 315 of the Communications Act of 1934, which contains both the equal time rule and the authorization for the FCC's Fairness Doctrine.

The equal time rule requires that when a candidate for public office is given or sold broadcast time, any other candidate for that same office must be given an equal opportunity. That sounds great. But the equal time rule is an abridgment of the first amendment. It is governmental control over a part of the free press.

Under the Fairness Doctrine, broadcasters are required to afford reasonable opportunities for the presentation of contrasting viewpoints on controversial issues of public importance.

Unlike the equal time requirement, the Fairness Doctrine does not call for each viewpoint to receive the same amount of air time. Neither does it require that the other viewpoints be given in the same program.

Again, all this sounds fine. But the trouble is, even if it were constitutional, the Fairness Doctrine is applied case by case with only the particulars of past cases to use in judging its applicability.

Mr. President, it is not my present intention to recite all the arguments in favor of S. 22 and against the Fairness Doctrine, the equal time rule, and other governmental controls on the broadcast media.

But I would like to share with my colleagues some pertinent passages from a copy of a speech I received in today's mail. Having just introduced S. 22 some fews days ago, I was especially pleased to read the text of "Broadcast Journalism: Serving the Democratic Process," an address given by Julian Goodman, chairman of the board of the National Broadcasting Co., at Ithaca College in New York on October 22, 1976.

Mr. Goodman's impressive statement represents a spirited defense of the need for full first amendment rights for broadcasters. What he has to say about Presidential debates is particularly interesting and enlightening.

The 1960 Kennedy-Nixon debates, Mr. Goodman reminds us, could not have taken place but for congressional suspension of the equal time rule. And in 1976 the same obstacle stood in the way of similar debates. This time Congress did not act to suspend the equal time provision. Rather, the Ford-Carter, as well as the Dole-Mondale, debates were held under a new FCC interpretation of section 315, which exempted Presidential and Vice-Presidential debates from the equal time provision if they were held in the context of a news event.

To qualify, the 1976 debates had to take place under the aegis of a nonbroadcaster. We know, of course, that the League of Women Voters fulfilled that role and performed that service. All Americans are grateful to that excellent organization for doing so.

But, as Mr. Goodman points out, the crucial point remains that the very existence of section 315 prevented broadcasters "from any special news coverage outside of regularly scheduled news and news-interview programs without the risk of supplying equal time to all the minor parties." And, according to the Federal Election Commission, there were at least 18 minority party Presidential nominees and 23 independents.

Again, enactment of my proposal, S. 22, would do away with this unwise and unwarranted restriction on broadcasters. But if we do nothing, as Goodman indicates, "The public loses the opportunity to know about the contenders for their votes."

What is at stake here is well put by Goodman:

> The principle that a journalist must be free to do his job.

And as he further explains:

> News coverage—if it is to meet its obligation to the public—cannot be controlled, directly or indirectly, by the people who are being covered, or by any intermediary.

Mr. Goodman has many valid and thoughtful points to make about section 315 and the 1976 Presidential and Vice-Presidential debates. All of what he says, it seems to me, supports the need for prompt congressional approval of S. 22.

Perhaps the best summation of Goodman's general point of view, and one to which I fully subscribe, is this passage from his Ithaca speech:

> At the heart of all this is the continuing denial of full First Amendment status to broadcast news. Such restrictions as the equal-time rule and the Fairness Doctrine apply only to electronic journalists, and through them the journalists and the public are deprived of basic free-press rights. These rights can never be adequately restored unless broadcasters are given permanent relief from Section 315.
>
> The lesson we keep learning over and over again in broadcast journalism is that you can't read the First Amendment two different ways. You can't have a news medium that operates half-free and half-controlled.

Mr. President, Mr. Goodman's excellent speech makes clear that broadcast jouralism can do an even better job in serving the democratic process if it receives the same full measure of first amendment freedom enjoyed by other media. Enactment of my First Amendment Clarification Act of 1977 would achieve this result.

So that my colleagues can have the opportunity to read the full text of Mr. Goodman's address, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

BROADCAST JOURNALISM: SERVING THE DEMOCRATIC PROCESS

(By Julian Goodman)

I understand that many of you here are looking forward to careers in broadcast journalism.

I have spent more than 30 years in that profession, and I can tell you that it has its rewards and its exciting moments.

One of its highlights for me was 16 years ago. I was Vice President of NBC News then, and I had the responsibility for producing one of the four televised debates between John Kennedy and Richard Nixon. That was the first election in which we had such a confrontation between the Presidential candidates of the two major parties before a nationwide television audience.

I have a vivid memory of going by the rooms where the candidates were waiting before the broadcast—in separated areas of the building—and finding each one standing in a quiet corner by himself, in what seemed to be an attitude of prayer.

I felt like a little praying myself. It was not only a tough test for the candidates. It was a test for NBC and for television. The medium had a chance to make an unprecedented contribution to the American electoral process. And it did.

The 1960 televised debates drew an audience of about 135 million people, and the turnout on Election Day set a record that hasn't been equaled since.

It is generally agreed that 1960 was a high-water mark for television's effectiveness in helping the nation choose its political leadership. It is no wonder that in the three national elections since 1960, broadcasters have sought the opportunity to broadcast Presidential debates again. We've urged this before the Congress, the Federal Communications

Commission and in other public forums, without success.

This year that did indeed come about. We have face-to-face debates between the Presidential and Vice Presidential candidates, and the network news organizations have once again brought them to the people—and to tonight's conclusion.

It should follow that the public, as well as the network news managements, would be delighted and grateful. But neither seems as enthusiastic as might have been expected. In fact, before the Ford-Carter debates could go forward at all, there were difficult negotiations in which the networks raised a series of objections. At one point the arguing became so heated that the head of one network news organization left the meeting and suggested his network might not carry the debates.

There has been a good reason for these reservations but, unfortunately, the reasons may not be thoroughly understood. I'd like to talk a little about that today.

There is a basic difference between the current televised debates and those of 1960. That difference is in the legal and regulatory framework that made the debates possible.

To put campaign debates on the air, the broadcaster has to overcome a tough obstacle, namely a provision of Section 315 of the Communications Act—the so-called equal-time rule.

The rule says that if a broadcaster makes time available to one candidate during an election campaign, he has to provide equal opportunity to any legally qualified opponent. And here the equal-time rule has a discouraging effect, because if the broadcaster offers free time for the appearance of major-party candidates, he is legally accessible to a flood of requests from minority-party candidates, most of whom have very little popular support, and even less prospect of being elected.

To make way for the 1960 debates, Congress suspended Section 315 for Presidential and Vice Presidential candidates. This year Congress has not suspended the equal-time provision. The fact that it remains in effect makes the significant difference.

The debates this year are being held under a new FCC interpretation of Section 315. That interpretation says that Presidential and Vice Presidential debates are exempt from equal-time requirements if they are held in the context of a news event. The FCC has said that to qualify, these events must take place under the auspices of somebody who is not a broadcaster. The non-broadcaster who is filling that role in this campaign is the League of Women Voters.

And that's the basis for the networks' reservations.

It is not—as some have speculated—a question of whether cameras could cut away from the speakers to the audience, over who was to choose the reporters to ask the questions, over having pool coverage instead of each of the three networks providing unilateral coverage. It is not a question of the networks wanting to have their own way.

Let me make it clear that NBC—and I believe the other networks—are happy to cooperate with the League of Women Voters. The League has performed a distinct public service in stepping forward to provide a needed national forum. But it would be a mistake to conclude that because the debates exist the problem is solved. Not only is it not solved but it may be obscured—because the most publicized fact is that we are permitted to cover debates between Presidential candidates of the two major parties, and between Vice Presidential candidates. Beyond that, however, the existence of Section 315 prevents us from any special news coverage outside of regularly scheduled news and news-interview programs without the risk of supplying equal time to all the minor parties. The Federal Election Commission lists at least 18 minority party Presidential nominees and at least 23 independents.

And why does this archaic restriction stay with us? Well, first of all, it would take action by the Congress to eliminate it. And the conventional wisdom tells us that the incumbent—the present holder of office—loses some of his edge if his opposition receives significant exposure on television. That is because it is assumed the incumbent is better known than the opposition. Since the practical effect of 315 generally is to limit the exposure of all candidates, for all offices, we come up to a classic, Catch 22, situation. The incumbent member of Congress is reluctant to vote for something—in this case the elimination of the equal-time requirement—that would allow his opposition to get wider attention. So Section 315 stays with us, and that situation is not likely to change in the foreseeable future.

Who loses? The public loses the opportunity to know about the contenders for their votes.

What is at stake is not camera shots or studio lighting. It is a principle. The principle that a journalist must be free to do his job.

News coverage—if it is to meet its obligation to the public—cannot be controlled, directly or indirectly, by the people who are being covered, or by any intermediary.

If the 1976 debates are news events, they should be televised as news, by news professionals. Otherwise the whole principle of independent journalism is in jeopardy. That is an article of faith with NBC News, as it is with every responsible journalist. The public stands to get a better and more truthful view of events if the press functions with maximum freedom. When rules and formulas are imposed on news coverage the public is deprived of a Constitutional right.

At the heart of all this is the continuing denial of full First Amendment status to broadcast news. Such restrictions as the equal-time rule and the Fairness Doctrine apply only to electronic journalists, and through them the journalists and the public are deprived of basic free-press rights. These rights can never be adequately restored unless broacasters are given permanent relief from Section 315.

The lesson we keep learning over and over again in broadcast journalism is that you can't read the First Amendment two different ways. You can't have a news medium that operates half-free and half-controlled.

First, as I've suggested, restrictions have led to the creation of a news event that is being kept at arm's length from the news media themselves. And second, because the debates are based on a complicated FCC reinterpretation of the law, broadcasters could easily be caught up in a tangle of new equal-time demands by additional, minor candidates.

The problem I'm describing goes far beyond the question of the joint appearances of candidates Ford and Carter. What is more important is that our reporting on the entire election process is hampered. The result has been a lack of dimension in campaign coverage down the line, from the first New Hampshire primary to the eve of Election Day. Television and radio are severely inhibited in their ability to present the candidates directly, in the kind of journalistic context voters might find most useful.

It has been charged by some who fail to take the full picture into account that the network news organizations have not done a full and proper job in informing the public adequately on the candidates and the issues during Presidential election campaigns. A prime example of this is in a recent book called "The Unseeing Eye" by two gentlemen from Syracuse University, Thomas Patterson and Robert McClure. My colleagues in NBC News have tried to read it with an objective eye, although we believe our medium does a far better job than the authors give it credit for. But what is most frustrating about such studies of television news is their failure to acknowledge the effects of equal-time restrictions on campaign coverage. As in criticizing the piano-playing of a man in a straightjacket, you have to make a few allowances.

I think we would all agree, however, that television—the medium most Americans rely on more than any other for news and insight—is not fulfilling its potential in election campaigns. That potential is considerable. And it goes well beyond the presentation of debates.

While this year NBC News has provided more campaign coverage than either of the other networks and more than any time in its history, programs, outside of regular news and news-interview presentation, have had to avoid inclusion of the candidates themselves.

Without regulatory curbs, a variety of formats might be used to present the candidates and issues. For instance, NBC this year proposed to Congress and the FCC that, if Section 315 were suspended, we would offer four half-hours, free, to each of the major parties, in addition to the debates. We made similar proposals for every election going back to 1960. We would also have provided opportunity for candidates to appear in a series of campaign specials. Unfortunately, Section 315 has stayed in effect, and we could not follow through on this. I think the electoral process, and the public, were the losers.

But within the limitations imposed on us we do try, and try very hard. NBC has never mounted so large an effort of election reporting as in this Bicentennial year. Our coverage has stretched over a record number of 30 primary contests, two national conventions, and every step of the Presidential campaign itself. We've had more special election programming than ever before, and we've deployed a small army of reporters, technicians and producers along the campaign trail. We've also tried to put our reporting on a more scientific footing—with public polling, voter analysis and computer projections. Whatever works to inform and involve the voter—NBC is using it.

Beyond this, we're proposing political broadcasting—the sale of time to candidates. New election-financing rules—added to the increasing reliance on primary contests by candidates this year—have complicated the problem of finding space in the prime-time schedule to accommodate the candidates' needs.

We have suggested that before the 1980 Presidential primaries, the three television networks set aside an ample but fixed reserve of five-minute and half-hour periods in prime time. The national committees of the parties could serve as the clearinghouses for such a system, and some order can be brought to an area that's now very confused.

There are, of course, much larger questions concerning the electoral process that Americans should be thinking about. We hope to make a contribution there, too.

Next March, in Washington, before this election has faded from everyone's mind, NBC will conduct a major symposium on the whole electoral process and what needs to be done to make it more vital and effective. The meeting will be called the NBC Forum. It will be attended by political leaders, campaign specialists, former candidates, students of politics and journalists. It will study the most basic questions about our electoral process—from reforming the primary system to choosing a Vice President. And, of course, it won't ignore that perennial issue—the role of the media in elections. The Forum's findings will then be summarized and reported by NBC News on television and radio.

What I've been saying to you today can probably be summed up fairly simply: Television does serve the democratic process. It

can do an even better job for the public and the voters of this country if given the same freedom to report on elections and politics as enjoyed by other media. We're trying to bring that about, and I hope that by the time you are broadcasting the news, we'll have made the job a little easier.

SENATE COMMITTEE SYSTEM REORGANIZATION

Mr. SCHMITT. Mr. President, because of my strong belief in the necessity of congressional reform and reorganization of the Senate's committee system, I was pleased to testify before the Committee on Rules and Administration in support of the recommendations of the select committee and Senate Resolution 4.

There is an urgent need to apply more efficient management techniques to the operations of Congress if the Members are to meet effectively their responsibilities as the people's representatives. In my opinion, enactment of the select committee's reorganization plan would eliminate overlapping jurisdictions, improve legislative oversight, maximize manpower resources and skills, and provide a more equitable distribution of responsibility and workload among Senators and Senate committees. It is my hope, therefore, that the Senate, recognizing the legitimate needs and interests of the Republican minority, will approve the thrust of the committee's reforms and pass Senate Resolution 4.

In light of the general interest of my colleagues in Senate reorganization, I ask unanimous consent that my statement before the Rules Committee be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF HON. HARRISON A. SCHMITT, A U.S. SENATOR FROM THE STATE OF NEW MEXICO

Senator SCHMITT. Mr. Chairman, members of the Committee on Rules and Administration, I greatly appreciate this opportunity to speak to you concerning the Select Committee's proposed reorganization of the Senate committee system.

As a newly-elected Senator, my experience with the structure and operation of the Senate is obviously very limited, and I must defer in most areas to your judgment and that of the Select Committee whose recommendations are now under discussion.

On the other hand, my experience outside the Senate may offer a few new perspectives to your deliberations. My background is in science, technology and management, and as NASA's former Assistant Administrator in charge of energy programs, I have appeared before Senate committees on numerous occasions.

At the outset, I wish to compliment Senator Stevenson, former Senator Brock, and the members of the Select Committee for their outstanding efforts in the face of many difficulties and pressures. I fully support their general recommendations as set forth in the Select Committee's report.

I might add my other suggestions I may have are merely suggestions, and I will, in fact, support the reorganization effort if it appears in roughly its present form on the Senate floor.

The specific aspects of the Select Committee's recommendations to which I wish to address myself today are, first, the urgent need for more efficient management of the United States Senate; second, the desirability of systematic utilization of sequential referrals of proposed legislation; and, third, the necessity of reducing the fragmentation of legislative jurisdiction in the field of Science and Technology.

Before making these specific points, however, I wish to emphasize the critical need to insure that the Minority Party's—whichever party that may be in the future—that the Minority Party's ability to perform as the "loyal opposition" is not impaired by this reorganization.

At least one-half of the people of this country expect this party to present ably alternative views in the consideration of national legislation and policy. The assignment of committee jurisdictions, memberships and staff allowances for investigative purposes must always take this fact into account.

The elimination of the bipartisan nature in the investigation of matters of ethics must also be approached very carefully by this Committee and by the Senate.

In the area of efficient management, on those occasions when I had reason to testify before committees of the Senate, I became aware of the unfortunate consequences and deficiences of the existing committee structure and scheduling system.

I am sure that you believe me, Mr. Chairman, when I say that there is nothing more discouraging to a witness than to appear at the appointed hour in a committee's chambers in order to learn that there is nobody present initially to listen; then to find that, as a result of schedule conflicts, the members arrive late, going into and out of the hearing room one at a time, very often in the middle of the testimony; to see the chairmanship continually change as one member must leave and be replaced by another; to find that there are prolonged points during which no Senators are physically present; and even, on some occasions, to have one's testimony postponed or canceled altogether at the last minute.

Moreover, it has been my experience that a witness must frequently proceed from one subcommittee to another and appear at different times before different committees, repeating the same testimony, making the same points over and over again, to different groups of Senators.

Unfortunately, this system is, in large part, responsible for the widespread criticism of the Senate and public condemnation and disrespect for the institutions of this body generally.

During my recent election campaign, I heard many voters criticize the Senate for its failure to solve pressing problems or to make positive accomplishments.

Obviously, many of these criticisms are undeserved, but nevertheless the perception by the public is there. The taxpayers of New Mexico, like Americans elsewhere, are angered by what they regard as waste and extravagance in government, and they do not isolate the Senate as an exception.

My own experience with testimony before the Senate Committees has convinced me that the taxpaying public could be saved large sums of money if witnesses were not required to prepare duplicate testimony and appear before nearly empty chambers with few Senators to hear or question that testimony.

Mr. Chairman, I, and most, if not all freshman Senators, sincerely hope that the 95th Congress will take positive steps to improve vastly this situation. In my opinion, the Select Committee, in its recommendations and the sponsors of Senate Joint Resolution 586, as modified, have made great strides toward resolving the kinds of difficulties that I and many others have experienced in dealing with the committees of the United States Senate.

The Senate is a body of 100 persons, all of whom are deemed equals. It must tackle, during the course of a Congressional Session, a wide diversity of complex and controversial issues of public importance. It is clear that the management structure for such a body must provide for an equitable distribution of responsibility and powers. The management of the Senate must also insure that individual members can utilize their time efficiently among many areas of responsibility with the certainty that those areas will be covered in ways appropriate to their priorities.

Mr. Chairman, I would like to suggest to you that the management problem that now faces us as Senators is not unlike that of keeping 70 astronauts, most of whom are assigned to specific missions, working efficiently and within their areas of responsibility. Most astronauts consider themselves first among equals even though some become commanders, some merely pilots. Each has an opinion on everything related to space flight, much as Senators have an opinion on everything related to legislative and public issues.

Most opinions are well-reasoned and well-informed, and should be considered. They must work, not only with respect to the training for their mission, but with respect to their interface with essential elements of mission planning and mission engineering.

In this case, Mr. Chairman, I find an interesting parallel between my previous profession and my new responsibilities in the Senate.

During my astronaut days, we actually did much of what, in terms of management, has been proposed by the Select Committee. We were dependent on clearly-defined jurisdictions between missions and within mission planning and engineering responsibilities.

We were also required to maintain an efficient and visible scheduling operation so that everyone could be where he needed to be at a given time, and all the essential work of the group would be accomplished according to the master schedule.

Of course, in the Congress, a master schedule has now been created—at least in part—for us to follow as a consequence of the Budget Reform Act of 1974. We might even consider defining other milestones by which major national problems will have real solutions; however, that is a matter best left for another time.

I realize that the opposition to many of the Select Committee's proposals will be formidable. There are interest groups in the country who feel that they will be hurt through the elimination of committees specifically identified with their interests. They believe that there will be a loss of attention to their special interests, needs and problems.

I submit that, with the more efficient operation of all of the committees and the more equitable distribution of workload among the Senators, the needs of all interests in the country will receive much greater attention than they have under the present system.

As one interest is incorporated with the interests of other groups, the whole, I believe, will receive better informed consideration and more intelligent treatment than has been possible previously. If this does not occur, in fact, as a consequence of the changes envisaged by the Select Committee, I pledge—and I am confident that all of you would promise—to re-examine what we have achieved in order to assure that no legitimate concerns and interests of the citizenry of this country are ignored by the operation of the Senate committee system.

In my study of the Senate Select Committee's report, I attempted to search out those areas in which, maximum potential conflict of jurisdiction might occur, either expressed or implied.

I am pleased to acknowledge that I found few such areas of conflict. In those areas where conflict might occur, they generally would occur only between two committees. Most of these conflicts are documented by the Committee report. Some of them are il-

lustrated in the attachments to my testimony.

Where major conflicts do develop, I believe that the problem will be resolved if proposed legislation is referred sequentially to the two committees in question, with instructions for the first to report to the second by a time certain.

With some reservations, I also support the Select Committee's proposal for establishing ad hoc committees to consider proposed legislation falling within the jurisdiction of two or more committees provided this device is used sparingly. Such an ad hoc committee could serve best as a kind of conference committee of limited life to iron out any major differences that may arise between two standing committees.

However, a proliferation of such ad hoc committees could result in further confusion and abuses that could seriously undermine the very reforms we are now trying to achieve.

I shall speak briefly about the area of science and technology, an area of my special expertise.

Science and technology are the unquestioned mainstays of the modern United States, in national security, industry, health, agriculture, balance of trade and space, among many other areas.

The intent of the Select Committee clearly was to place general oversight and legislative jurisdiction for science and technology in the new Committee on Commerce, Science and Transportation.

Unfortunately, I find that legislative jurisdiction for major areas of research has been assigned to several other committees. For example, agricultural research would come under the Agriculture and Small Business Committee; biomedical research under the new Human Resources Committee; energy and earth resources research under the Energy and Natural Resources Committee; environmental and weather research under Environment and Public Works; military research under the Armed Services Committee; and jurisdiction over ocean research would remain extremely fragmented, falling under three separate committees.

I strongly suggest that the Committee reconsider the split jurisdictions over basic research in science and technology, and see that if, at least, some of them should not be recombined under a very strong Committee of Commerce, Science and Transportation.

In particular, I recommend that legislative responsibility for biomedical, earth resources, oceanic and meteorological research and very basic research in general, be included under the Committee on Commerce, Science, and Transportation. I also recommend that the Committee be particularly diligent in its oversight responsibilities to insure that synergism can occur between all areas of science and technology.

For many years I have been involved in science and technology in an extremely wide range of fields and with scientists and engineers who are presently conducting the fundamental research that forms the foundation upon which we move into the future.

My experiences have led me to conclude that if overall jurisdiction for basic scientific and technological research is not combined under one committee that is deliberating national policy, we will run the risk of missing the synergistic effect that comes from one science interacting with another and from one technology interacting with another.

To illustrate the magnitude of this risk of loss, I wish to point out the great potential transfer of technology developed in our space program to the energy field; what we have learned and developed in aerospace and research and development can be applied to satisfying our nation's future needs for energy self-sufficiency and independence.

In addition, many of the greatest advances in modern times in biomedical research have come about as a consequence of this synergism, because physicists, chemists, and others have taken their art and their knowledge into the field of biomedicine and have contributed to a medical revolution in our country. We are now able to prolong and ease life and to make life far more than just a matter of chance.

With that, of course, will come the problem of increasing health costs, which we must also treat.

Mr. Chairman, I have one final comment to make about this matter.

Realizing that the proposed committee reorganization represents a snapshot of the needs of the United States Senate in the mid 1970s and will require future modifications, I would submit to you that one area of potentially great national involvement seems to have been underemphasized by the Select Committee. I am referring to space exploration and the use of space, science and technology for the benefit of mankind.

Obviously, this is a parochial view of mine, but let me add a little to that.

At the present time, this great country of ours is embarked on developing a space transportation system which, if successful in its development, will be the first major step toward opening up the space environment for use and service to mankind, including use by commercial enterprises and for national security purposes.

The newspaper this morning, or at least the Washington Post, did make mention of some of the problems of national security now facing us in this new environment. Even though the present outlays allocated for the exploration and utilization of space are less than one percent of the total annual budget of the Federal Government, it nevertheless represents one of our principal investments in the long-term future of this country and of mankind.

If I may make a prediction, I believe that, within ten years, some of us will be meeting before the Committee on Rules and Administration of the United States Senate to discuss a proposal that a new committee be formed with legislative jurisdiction over the commerce, science, and transportation of space.

Mr. Chairman, we have seen, in the last two decades, the beginning of a revolution in man's thinking and attitudes toward the environment surrounding his earth. That change is reflected in many ways, most obviously in his analysis and prediction of weather, in his use of satellite communications and in his intellectual view of the planet Earth, his view of the Moon as a sister planet to that Earth, of the other planets of the solar system in which we now live, of the Sun from which we draw our sustaining energy for life and human activity, and of the cosmos itself wherein may lie the great intellectual revolutions in science and philosophy for succeeding generations.

I can speak with certainty from my recent political campaign and experience as an astronaut that the next generation of leaders in this country, who are young people in the high schools and colleges of America, are looking toward a future that will involve many of them in the Commerce, Science, and Transportation of Space.

Thank you very much. I will be very happy to answer any questions.

The CHAIRMAN. Thank you very much for a very fine statement.

As you say in your statement, you do support the resolution as it is now proposed?

Senator SCHMITT. Yes, sir.

All I am offering is a suggestion on how it might be improved.

The CHAIRMAN. Thank you very much.

Senator Hatfield.

Senator HATFIELD. Very excellent statement. I have no questions.

The CHAIRMAN. Senator Pell.

Senator PELL. No questions.

Fine statement.

Senator SCHMITT. Thank you, sir.

The CHAIRMAN. Senator Griffin.

Senator GRIFFIN. I want to join in the commendation of this very excellent statement. I think that especially coming from one of our newly-elected Senators, it gives some indication of the caliber and the quality of this new freshman class. And I find it very, very interesting, very useful, very helpful.

Thank you very much.

Senator SCHMITT. Thank you.

PHILIP HART: THE GENTLE WAY

Mr. McINTYRE. Mr. President, we have read many eloquent testimonials to our late, beloved colleague from Michigan in recent days, and I am certain a number of those tributes will be placed in the RECORD.

Because those kind words about Philip Hart were so richly deserved, it is sadly ironic that they did not appear in print until after his death. For though I know how much his family and his countless friends appreciated what was written about Phil, he, himself, did not have the satisfaction of reading how truly esteemed he was.

Fortunately, however, one of the most moving of all tributes was published before Phil Hart's death; indeed it appeared in the Washington Post almost a year ago.

I saved that tribute because it was so moving and because I felt it captured the Phil Hart we all knew and loved as well as anything I have heard before or since.

I ask unanimous consent that Colman McCarthy's column of February 2, 1976, a column appropriately titled "Philip Hart: The Gentle Way as the Effective Way," be printed in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Feb. 2, 1976]

PHILIP HART: THE GENTLE WAY AS THE EFFECTIVE WAY

(By Colman McCarthy)

A few years ago a Washington journalist wrote a book in which he called Sen. Philip Hart "a man widely regarded as the gentlest and kindest in the Senate." The galleys of the book were sent to then-Sen. Paul Douglas of Illinois, who had been asked to review the book for The Washington Post. He read the reference to Hart but was troubled. It took Douglas several phone calls to track down the author, who was at his vacation retreat. Talking with him, Douglas explained that he knew it was unusual for a reviewer to call an author before the book came out, but he had a suggestion for a galley change. Must it say that Senator Hart is "widely regarded" as the Senate's gentlest and kindest man? Couldn't the book just state "he is," and avoid the cop-out qualifier?

This story is not one of the vintage political tales that float to the top of the air currents in Congress, so many of the stories flavored to put down another member or raise up the teller. But the solicitude of Sen. Douglas—authentic feeling, not the hollow "my distinguished colleague" kind—suggests that nothing less was due Philip Hart than unqualified esteem. The session of Congress now beginning is Hart's last. His recent retirement announcement has prompted a number of Michigan politicians to seek to replace him. They can stop now. The seat will be replaced, but not the man.

In his 18 years in the Senate, Philip Hart

has practiced as pure a style of politics as that body has ever seen, elevating not only the level of thought but also the vocation itself. In a profession often trivalized by fitful hacks who think political impact is made by the raised voice or eyebrow, Hart has remained loyal to the Greek meaning, politikos: of the citizens. What concerns the citizen? What possibilities can he be drawn to, or to what form of humanized service can the politician, the server, give himself?

Before a politician can adopt this cast of mind, he has to think first of keeping his job. From the record, it could seem that Hart has represented not Michigan at all, but a territorial outback whose citizens sent him to Washington with a moral compass, not a political one: point the needles not merely to our wishes back home, they instructed, but also to honesty and fairness. We will be served that way. Thus, with the auto industry as Michigan's largest employer, Hart has persisted in attacking the monopoly practices of the Big Three. He began or supported every major safety or environmental regulation involving Detroit. The state has the nation's second largest hunting force, but no one in the Senate has called for stronger gun controls. He supported busing in Michigan (because he believed in his the rightness of it in the South) when other Democrats ran for pillows to make the issue more comfortable for fence-sitting.

Electoral risks put senators on slide rules, moving them along exponentials that make the conscience a variable. The issues, like logarithms, are said to be complex. Perhaps. But Hart has remained the still point in the middle of complexity. Situation ethics make as little sense as situation politics. He was the only senator to speak out in 1972 against Sen. James Eastland's becoming president of the Senate. The courage of Hart's stances has been perceived by the voters. He has never had a close re-election race; in 1970, he received as many votes as Gerald Ford in Ford's home district.

How is it possible for a man to be in the Senate 18 years, a defender of periphery causes, and yet be held in deep affection by most other members? It is assuredly something more than Hart's soft voice or the merry Irish twinkle in his eye that does it. One explanation is that he has a style of personal humility that keeps his convictions from being crushed with either blowhard or diehard righteousness. He is known, much to staff impatience, for spending as much time examining an opposing position as in presenting his own.

"You never know your own motive most of the time," he said recently, "but most people are always assuming they know the motives of everyone else. But it's hard. It's hard for a politician looking at another politician. It's even more difficult for the public looking at the votes and the positions taken by a politician to determine what motivated that man. I am sure that there are people in Michigan, for example, who believe that the reason I have a voting record that conforms generally with the labor movement is because labor gave me money. And certainly in the liberal group, there's much too much of the assumption that the reason some conservative around here is conservative is because some company or corporate officials fund him. We liberals don't credit conservatives with what we credit ourselves. I say I vote in a way that finds approval with labor because it happens that I believe that this is the best for the people. Our goals are common, but we arrive at them independently. The liberal is apt not to give the conservative credit for the same thing. A conservative may conclude quite independently of constituent pressure that the program of, say, the National Manufacturers Association makes good sense."

If Hart can look at liberals dispassionately, he also sees his own role in the Senate with a measure of restraint. "There's a terrible tendency here to think that everything we do and say, or omit to do, is of world consequence. But you know full well that you can go across the street and the bus driver couldn't care less." If caring is present, it must come from within the man. "I remember the expression that the politician is the lay-priest of society. The corporate works of mercy are part of the business of how the government runs. A solid case can be made that whatever the venality that attaches to the profession, politics is still a high vocation. . . . I have regarded it as an opportunity to make a more humane life for everybody."

Hart's humanism was shaped by what he calls a typical education within the church school system; the Sisters of Mercy for eight years, the Christian Brothers for four, the Jesuits (at Georgetown) for four. At a moment when politicians and their families are being examined, Hart says of his children: "I won't try and guess what my own children may have felt about my being in politics or about me as a father, but I think my strong love for them has been reciprocated."

Little of Hart's Senate work has made him a national figure. He caught the glare during the ITT scandal when he was in the Senate contingent that went to Dita Beard's bedside, and he was on the committee that Richard Kleindienst deceived. Instead, he has been committed to the hidden and unshowy work of the hearing room. He came early and has stayed late on such issues as pesticide poisoning, lead gas fumes among inner city children, amnesty, no-fault insurance, decriminalization of marijuana, freedom of information, divestiture of the oil and auto companies. He will be gone before these matters are resolved in a way that citizens deserve, and others will likely be on hand to take winner's credit. But those who have watched closely will know who began the bold struggles.

Hart has no bitterness that his issues have attracted little press attention. "It is hard to expect reporters to sit through unglamorous economic or antitrust hearings he says, when at the same time in the next room you have some hoodlum invoking the fifth amendment." For the occasional reporter who does cover the unnoticed hearing, Hart has special feelings. He speaks of one Washington journalist: "he has excitement in his stories simply because he is able to describe the way certain private interests have been able to twist debate or cause decisions to be made that disserve the general interest. But more often than not, this man is reporting the important issue though it is relatively heavy and unexciting."

In recent months, Sen. Hart has been hospitalized for cancer. On the subject of death and dying, he is as gently candid as on anything else: "When the doctor walks in and says it's cancer, and they chase around for weeks trying to find the original source and still can't, you'd have to be a very insensitive fellow not to be shaken up. Sure you think about it. (Death) becomes not something vague that everyone knows is going to happen. It's something that not only is on schedule . . . but is in motion. And you do review the bidding and test the faith. I think now I'm prepared."

For the rest of this session, news reports will tell of other members of Congress retiring. Careers will be reviewed and testimonies given. It is likely to be different for Philip Hart. The public won't fully know how valuable and towering he has been in the Senate until next year, when he is not there.

FEDERAL EDUCATION ASSISTANCE PROGRAMS—1976

Mr. GOLDWATER. Mr. President, for the past few years, and particularly during the last Presidential campaign, much was said about cutting our defense budget. In the face of a rising Soviet military superiority, this vocal minority has advocated deep cuts in defense spending and then transferring this money to so-called social welfare programs. The ironic thing about this is that the liberals, who consistently push this approach, have yet to show that they can control, let alone manage, the huge expenditures already being made in the name of "social welfare."

As proof of this, one has only to take a look at a new catalog entitled "Federal Education Assistance Programs—1976," which, I am sure, arrived in every office on Capitol Hill last week. This inch and a half thick book lists all the money and services available from the Federal Government for educational purposes only, for the past 3 years. While it probably can be argued that some expenditures in the name of education are worthwhile, a glance at this newest catalog reveals some rather mindboggling statistics. Generally, these figures do not reveal the administrative costs so, whatever that sum is would have to be added to the cost of Federal education programs.

A brief look at these costs shows that during fiscal year 1974, the Federal Government doled out more than $8.1 billion in the name of education. In fiscal 1975, that figure had doubled to more than $19.3 billion. By fiscal 1976, the yearly dole had jumped to more than $22.1 billion. All in all, in just 3 short years the Federal Government has spent almost $50 billion. Based on a population of approximately 215 million people, the Federal Government alone has managed to spend $230,000 for every man, woman, and child in this country in the past 3 years. Let us face it, at that rate this country should be the best educated in the history of mankind. And all of this for what? In spite of the billions we continue to throw at the problem, we have only succeeded in creating a whole generation of "Johnnies who can't read" and "Marys who can't balance a checkbook."

In other words, we have enriched the educational tinkerers at the expense of our children who are, functionally, illiterate. If we would apply the defense budget yardstick of "the biggest bang for the buck" then, our education budget has got to be the biggest "dud" of all time.

On top of the obvious problem, one of the worst features of the whole program is the ever-increasing financial dependence of the local schools on the Federal Government. In far too many cases, this dependence has led to the ultimate of having the Federal Government dictate the methods and operations of the local schools in complete disregard of local wishes. For the middle-income homeowner who is footing the bill, the combination has proved almost intolerable and, it is no small wonder they are beginning to revolt. If we are ever going to restore confidence in our system, we had better be willing to scrutinize our social welfare budgets as thoroughly as we pick apart the defense budget.

EQUAL OPPORTUNITY IN EMPLOYMENT IN THE CARTER TRANSITION

Mr. PROXMIRE. Mr. President, a few weeks ago, I had an opportunity to thumb through a copy of the "U.S. Government Policy and Supporting Positions," booklet. These are the policy positions available to the new administration not subject to civil service.

What an excellent opportunity it provides for us to focus on the right to equal opportunity in employment. I see this right as an essential feature in the Carter transition and as a commitment to our fellow citizens. Many hopes are rekindled. While résumés are being collected, sorted, classified, and neatly stacked just a few blocks away from this forum, we are presented new challenges and opportunities to propose qualified individuals who in the past have been passed over in too large numbers because there were blacks or women or Latin Americans or some other group seeking its place in the sun. And the new administration has an equal opportunity to appoint qualified individuals who have been passed over.

Simply stated, the essential elements of my interest in equal opportunity in employment are: First, the right to get a job; second, the right to keep a job; and third, the right to progress on the job, without arbitrary discrimination. My interest is present at all stages of the employment relationship from the initial step of recruitment to the final step of discharge.

There is no need for me to spell out the historical types of discrimination for they are obvious. I am interested, however, in the professional fields where the use of quota systems for minorities and women, and the exclusion of certain minorities from professional associations may be typical. We should ask questions as to the extent freedom from discrimination will be recognized as a legal right and determine what remains to be done to make such freedom from discrimination a universal fact—starting with the opportunities we have during this period of transition. I believe the people of the United States expect us to take new initiatives. I believe we ought to take a close look at the appointment ratios, to insure that there will be a change from pretransition-benign neglect to post-transition democracy and fair play.

I believe that those involved in the stages of the employment and assignment processes, should take a critical look at the kind and quality of all personnel, both majority and minority individuals. There need not necessarily be a single emphasis on placing minorities and women only in the No. 1 positions. There are certain advantages to those concerned to also have opportunities in a variety of professional positions throughout the executive branch. Longevity is one advantage which immediately comes to mind, for in these professional positions such professionals would not be replaced with the changing of the guard. These professional positions also provide real opportunities to influence actual policies of any administration. And, let us not forget the Federal court systems which could affect the implementation of administration policy.

I do not intend to make specific recommendations as to how the personnel job hunt ought to be conducted. I will defer to the judgment of those involved. Nevertheless, we should take an aggressive posture and judge the results, after the fact, as having vindicated our feeling of good faith and confidence in the sensitivity of the new administration.

MANPOWER PROBLEMS

Mr. GOLDWATER. Mr. President, defense manpower requirements are gradually assuming an ever higher proportion of our preparedness budget and problems arising from this fact are growing more important every day. I am sure all the Members have read statements by various officials concerning how we should handle this problem in the future. Recently the Association of the U.S. Army adopted a series of resolutions on manpower problems as they affect the Army. Because of the importance of this subject, I ask unanimous consent that these resolutions be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

1976 RESOLUTIONS

1976 RESOLUTIONS COMMITTEE

Chairman: Col. Richard H. Duea, USAR Ret., East Bay Chapter.

Chairman, Subcommittee A: Col. Kurt W. Messmer, USAR Ret., Seattle Chapter.

Members: Mr. B. M. Beck, Central Texas-Fort Hood Chapter; Col. B. L. Dukes, In-ARNG, Indiana Chapter; Mr. Fred K. Guest, Tennessee Valley Chapter; Lt. Col. David E. Lain, USA Ret., Braxton Bragg Chapter.

Chairman, Subcommittee B: Mr. Richard L. Thiessen, Fort Riley-Central Kansas-1st Infantry Division Chapter.

Members: Col. Duane H. Bartrem, MiARNG, Southwestern Michigan Chapter; CSM Warren A. Paulk, USA Ret., Columbus-Phenix City-Fort Benning Chapter; Lt. Daniel P. Ragsdale, USA Ret., Alamo Chapter.

PREAMBLE

The hallmark of a great nation is its ability to assess its strengths and weaknesses and to act accordingly.

Discussions of social issues—welfare programs, unemployment and a balanced budget—tend to cloud the fact that there is little room for maneuver in the fields of foreign policy and national defense, if national interests are to be preserved. The problems impacting most heavily on foreign policy and national security are externally created and difficult to control. The Soviet Union continues to expand its overall ambitions. Overpopulation, a worldwide shortage of foodstuffs, dwindling energy resources, the maldistribution of strategic raw materials, the exploitation of resources from the seas, and nuclear proliferation all contribute directly to global tensions and unrest. Further, the discontent present in many of the emerging nations, the distrusts of centuries-old antagonists in the Mid-East, racism in Africa, the remaining vestiges of colonialism through parts of the world, and the instability of many national governments also hinder the progress of peaceful endeavors. In the last year and a half, the head of government has changed 35 times in 30 countries. Such instability not only makes our efforts in international negotiation most difficult but provides the constant threat of armed conflict.

The bedrock of our foreign policy and principal focus of our national interest continues to lie with our NATO alliance in Europe. In spite of all its stresses and strains, NATO continues to serve the cause of world peace and prosperity. For the past twenty years, there have been great efforts to establish a European economic and political community; however, progress has been painfully slow. It is difficult to forecast when our strong NATO military presence in Europe can be safely terminated. The United States has reduced its military participation substantially and should not tempt fate by further reductions.

The Pacific doctrine for the United States enunciated last year seeks to buttress our non-Communist allies and at the same time increase our cooperation and communication with the leadership of the Chinese Peoples Republic. United States military forces support our overall security objectives in the Pacific and are generally a stabilizing element. As such, they are important to Japan's sense of security, and to our avowed obligation to provide such security. Unfortunately, the United States projects a diminishing military profile in the Far East. Congress has indicated that the Department of Defense should look at further reductions of our forces in Korea which now include only one division with supporting troops, air defense forces, and some Air Force units. A withdrawal at this time would produce an unwise and unnecessary risk.

The civil war in Lebanon, the confrontation in Cyprus, the instability of Africa, and the Panama Canal negotiations will take a high degree of diplomatic and political skill to solve satisfactorily. All have the ingredients for potential trouble serious enough to necessitate the availability of credible United States deterrent forces.

A recent poll of our citizens showed that seventy-one percent believe that promoting the security of the United States should be the most important pillar of our national policy. What is needed to support that pillar? Simply stated:

We need the capability, in conjunction with our allies, to deter warfare at all levels and to defend our interests should deterrence fail.

We need to maintain United States technological superiority over the Soviet Union.

Above all, we need to provide the strength upon which further peace negotiations can be pursued.

In addition to how much defense is needed, the United States must decide on what type—especially in view of current strategic nuclear equivalency. Most thoughtful observers agree that given the present strategic nuclear arsenals of the Soviet Union and the United States, the least likely form of conflict for the immediate future would be a major nuclear war. The prospect will continue to be true as long as our nuclear arsenal remains viable, modern and credible. This is one area where costly investments in strategic weaponry have provided national insurance that all can understand and for which most are willing to pay. Of greater concern is the growing list of countries developing a nuclear capability. They especially must believe our strategic arsenal is credible.

Since 1945, there have been literally hundreds of armed conflicts between and within nations. The United States has been involved to a varying degree in only a dozen. All were fought with conventiondal weapons, although the United States had an overwhelming nuclear capability. It follows that the United States must be certain that its conventional forces remain capable of adequately supporting our national objectives. This means an Army and Marine Corps manned and equipped to effectively respond to this wide spectrum of potential troubles; a modern

Navy to keep sea lanes open and to transport and support any necessary projection of land forces; and an Air Force sufficiently strong in conventional weapons to provide air supremacy, support for the ground battle, movement of men and equipment and other strategic capabilities.

There are those who will advance the premise that land forces are no longer essential. Wars are fought for the control of land areas and their inhabitants. Although land, sea and air forces are complementary, Army forces possess capabilities which set them apart. The Army provides the ultimate decisive act of entering, securing and occupying those land areas necessary to the achievement of our national objectives. The Army is required to maintain fulltime comprehensive control over the land, its resources and its people. In peacetime, this power is the basis of the stability, law and order essential to a free society.

In its deterrent role, the political impact conveyed by a military force is as important as the sheer destructive power that it can wield. In this era of nuclear stalemate, the role of the Army has taken on even greater importance. It emerges as the significant balance of employable power and has profound effect on the military relations between nations.

The United States has serious shortfalls in all of its conventional forces in equipment, munitions and aircraft. But beyond the provision of hardware, it is essential that the nation maintain a deep concern for the compensation, welfare and conditions under which the men and women of its armed forces must serve. People constitute the basic strength of our nation's defense and they must be accorded continuing consideration commensurate with their service and responsibilities.

In developing our defense budgets, it has been popular to consider reordering priorities. To many this means taking money from allegedly "fat" defense budgets for other programs. This is exactly what we have been doing for the majority of the last 22 years. Defense spending is at its lowest level since the immediate post World War II period in terms of purchasing power, the national budget and the Gross National Product. The study, "Significant Features of Fiscal Federation—1976 Edition," prepared by the Advisory Commission on Inter-governmental Relations, indicates that during the past two decades the rapid growth in domestic spending has been financed half by taxes and deficits and half by a shift from defense to civilian programs. Obviously, the priority reordering has already taken place and further shifts are not feasible if we are to have a credible defense. It will require *real growth* defense budgets over a period of years to provide the credible deterrence to support our national policy.

It is imperative that our adversaries, as well as our friends and allies, continue to recognize our country as the viable fulcrum in world power on the side of peace. They must see, as we do, that the Age of America is not declining. John F. Kennedy enunciated a goal that is worth remembering. What we really want, he said, "is a peaceful world, that is fairly safe for diversity."

It is to this end that the Association of the United States Army pledges its full resources and adopts the following resolutions.

1. THE NATIONAL COMMITMENT TO THE VOLUNTEER ARMY

The Army, with the support of Congress and an informed American public, is successfully meeting the challenge of an all volunteer force in a non-draft environment only by an exceptional effort on the part of all of its personnel. Neither the Army, the Congress, nor the people can waver in their effort.

Although great strides have been made in improving the attractiveness of service life in order to retain high quality people, the maintenance of these conditions is essential to the volunteer Army. Unfortunately, there exists a widespread perception among soldiers that the commitment of the nation to their welfare is declining.

In view of the unique mission of the Armed Forces, the Association continues to believe that mission accomplishment would be seriously jeopardized should the Armed Forces become simply a place to earn a living. Men and women do not remain committed to the Army and to the inherent burdens and dangers involved for financial rewards alone or, for that matter, solely because of patriotism. Rather, this commitment is developed through a sense of belonging to an institution which is uniquely different from any other way of life in the nation. The Army, in providing on-post housing, medical care, commissary, post exchange and recreational facilities for its members and their families, reinforces the opportunity for total identification and commitment. Thus, these so-called fringe benefits are an essential element of this unique way of life so necessary for participation in battle or even for a high degree of combat readiness, particularly during periods when the full support of the American people is not in evidence.

As manpower costs continue to absorb an increasingly large part of the Defense budget, there has been a definitive effort on the part of the Administration to reduce these fringe benefits. The twice-rejected effort to establish self-sufficient commissaries and the fair market rental government housing proposal are examples. In addition, there are pressures to subject commissary and exchange sales to state taxes. The rationale to support these changes is based on theoretical military pay comparability.

Compensation is governed by two principles—competitiveness and equity. It should be recognized that the pay raises of the last several years have gone far toward making military pay comparable, but, according to the results of the Defense Manpower Commission study, pay is not yet competitive. Equity is another matter, as it involves rewards and obligations undertaken. Equal obligations do not exist in the civilian sector. Equity would suggest additional compensation for additional obligations. In addition to the community commitment that fringe benefits obtain, they may be looked upon as additional compensation for placing the needs of the service above family and self—for assuming unlimited obligations.

Removal of real or perceived benefits can produce Service reactions far out of proportion to the savings involved. Presumed savings then become illusory; trained personnel who might have been motivated toward a career leave the Service at the first opportunity; and those who have chosen a military career feel that the Government has broken faith with them. The investment in recruiting, training and experience of all those lost may well exceed any savings originally contemplated. The adverse impact on the morale of those remaining should be obvious and a cause for deep concern.

The Association agrees with the Defense Manpower Commission recommendation that a "Bill of Rights" be enacted specifying the benefits that accrue from military service. This Bill of Rights would provide that such benefits would only be changed or eliminated prospectively and changes would not apply to those already in the Service.

In view of the announced intention by the American Federation of Government Employees to represent military personnel in those areas where it is now legally permissible to do so, it is important to the national interest that the Executive Branch, the Congress, the public and, most importantly, the men and women of the Army, recognize the Army Chief of Staff as the representative of the interests of Army personnel at the seat of government. At the same time, the national civilian leadership of the Army—the President, Secretary of Defense, Secretary of the Army and, most particularly, the Congress—must be aware that they and their staffs shape public attitudes toward service in the military by their words, actions and attitudes.

We Therefore Resolve to reaffirm our support of the volunteer force and of those measures designed to:

Improve the attractiveness of a military career, both active and reserve, in order to obtain and retain high quality people.

Enhance professionalism.

Expand citizen support for the men and women of the volunteer Army.

We Further Resolve to strongly urge the development of a Service "Bill of Rights."

We Further Resolve to urge the continued exemption of commissary and exchange sales from local taxes.

2. STRENGTH OF THE ARMY

A strong Army of the United States with a high state of materiel and personnel readiness is essential, if the Army is to make its assigned contribution to the protection of our national interests. Military and civilian officials continue to state their firm belief that the current combined strength of the active Army, the Army National Guard and the United States Army Reserve, supported by a corps of highly professional civilian employees is barely adequate for the accomplishment of the Army's assigned missions.

Through stringent personnel economies and Congressional support for stable manpower and budgetary authority, recently the Army has markedly increased its combat strength without an increase in authorized manpower levels. Affiliation and round-out programs for the Army National Guard and Army Reserve, coupled with expanded roles and missions, have further improved total force capability and readiness.

We Therefore Resolve to continue to vigorously support a strength for the active Army of approximately 790,000, a paid Army National Guard of not less than 400,000, and a paid United States Army Reserve of not less than 259,000, supported by a civilian work force of approximately 403,000.

We Further Resolve that these strengths continue to be stabilized on a long-range basis so that commanders at all levels can attain the readiness posture required for national security.

3. ORGANIZATION OF THE ARMY

The best measure of relative military power under conditions of nuclear parity is conventional force capability. The USSR has responded to nuclear parity by increasing its army manpower by some 400,000—creating 20 new divisions—and fielding an array of sophisticated new weapons which significantly improve the firepower, air defense and mobility of its ground combat forces.

The Joint Chiefs of Staff have stated that a force of more than 30 Army divisions is needed to meet U.S. strategic commitments with minimum risk. In their best judgment, competing national priorities preclude maintenance of this force and a smaller force with a greater level of risk must be accepted. In terms of the Army, the minimum prudent risk level that can satisfy national security requirements is a force of 24 divisions (16 Active and 8 National Guard), all at maximum combat readiness. These provide the best balance between necessity and cost.

To accomplish this within current manpower strengths, greater reliance has been placed on the reserve components by including many of their units among the immediately available combat forces and requiring them to attain increased readiness. As the active Army has reduced its support capabil-

ity in order to increase its combat strength, the reserve components have been assigned increased immediate support missions. This new role places special emphasis on the requirement for fully manned, highly trained and adequately equipped Army National Guard and Army Reserve units capable of rapid mobilization. Recent Congressional action to grant the President authority to call up a limited number of selected reservists for a restricted period without the declaration of war or national emergency adds credibility to the reserve component's mission.

In the past, individuals—primarily draftees—completing their six-year service obligation, constituted a large reservoir of trained manpower in the Individual Ready Reserve (IRR), part of the Army's rapid response capability. With the end of the draft, this pool has rapidly decreased to the dangerous point of failing to meet the Army's general mobilization requirements for trained fillers by some 150,000 men, primarily in the enlisted combat arms areas. Proposals to remedy the situation by extending future reserve obligations to age 28 and, for the first time, including women in the six-year obligation will, in the first instance, be counter productive to Army National Guard and Army Reserve recruiting and, in the second instance, while valid, will not solve the combat skills shortage.

AUSA again suggests that new initiatives be explored to include consideration of a program that would allow individuals to enlist voluntarily for the IRR basic and advanced individual training in shortage skills to be conducted by reserve training divisions. Upon completion of this training, volunteers could have the option of enlisting for service in the active Army or in the reserve components. In any case, the volunteer would incur a six-year obligation, any inactive portion of which would be served in the IRR.

We therefore resolve to reaffirm support of a ready Army Total Force of 16 Active and 8 National Guard divisions, including all support forces, as the minimum force essential to meet national security requirements.

We further resolve to continue to urge new initiatives to solve the IRR shortfall.

4. ARMY BUDGETARY SUPPORT

The Association of the United States Army applauds the Administration for its submission of the Fiscal Year 1977 Defense Budget reflecting a modest increase to compensate for the loss of buying power of the dollar as well as a modest increase for program growth. We further applaud the Congress for taking a positive attitude toward our national defenses by adopting the 1977 Defense Budget reflecting these modest increases.

The overriding requirement to achieve the planned 24-division Army Total Force is long-range stability in terms of manpower and money. The Army requires a stabilized manpower authorization and continued appropriations support. The Army Budget must continue to reflect appropriate adjustments to compensate for inflation, cost of known pay increases and for program growth.

We therefore reaffirm our continued support for subsequent Army budgetary action to provide for proper inflationary safeguards and, further, to provide for program growth.

5. RESEARCH, DEVELOPMENT, MODERNIZATION AND PRODUCTION BASE

The 1973 Middle East War revealed the extent of Soviet efforts to improve their conventional forces through the development and deployment of new Soviet tanks, infantry combat vehicles, helicopters, and antiaircraft and antitank missile systems. The USSR's conventional warfare capabilities are continuing to improve through organizational changes which, when coupled with new equipment, will increase the armored firepower and mobility of combat units.

In this period of minimal United States military manpower authorization, the combat effectiveness of both men and equipment in the Total Force must be maximized. Thus, funding for Research and Development must be increased to prevent strategic surprises by the communist bloc countries. It is also necessary that our current Total Force be equipped with modern weapons, equipment and adequate logistical support.

This points to the urgent need for the five major items now in the Army's development program:

A field army air defense system.

An improved tactical utility helicopter.

An advanced attack helicopter.

A main battle tank.

An armored infantry fighting vehicle.

Deployment of these weapons, together with modern command/control/communications and battlefield surveillance systems, will ensure the continued reequipping of the Army with superior equipment. The DOD imposed delay in the selection of the future main battle tank, with its promise of a significant improvement in this critical area of our ground combat capability, without consultation with the users, is of deep concern.

The new Soviet trend to add sophistication to its already massive quantitative superiority makes it imperative that this nation continue to modernize its ground forces equipment and pursue those potentially rewarding new areas of technology which may, in the future, prove to be the decisive factor.

The United States is extremely vulnerable with virtually no deployed air defense and no ballistic missile defense. In view of the rapidly increasing Soviet first strike offensive forces and of the strategic offensive and defensive forces being developed by other countries, we also feel that a reappraisal of continental defense requirements is needed.

The requirement to provide the Army's Total Force with the most modern equipment highlights the need to broaden the United States production base for Armed Forces materiel.

We Therefore Resolve to continue to urge that sufficient budgetary support be provided to:

Ensure adequate research and development to reduce the risk of technological surprise and to provide advanced weapons to compensate for our lack of numerical superiority.

Expedite development of the Army's big five equipment program and deployment with additional support equipment necessary to guarantee an efficient combat capability.

Provide adequate logistic support for the Army in a high-attrition conflict, and develop and maintain a modern production base for replacing equipment and supplies.

Equip our Total Force with adequate levels of modern equipment.

We Further Resolve to urge a reappraisal of U.S. continental defense requirements.

6. CHEMICAL WARFARE CAPABILITIES

The Soviet Union today is better equipped militarily and psychologically for chemical warfare, especially with nerve gas, than any other nation. The Red Army organizational structure, doctrine, training and emphasis on individual and unit proficiency in chemical warfare indicates readiness to fight in such an environment.

USSR seriousness about the use of chemicals in combat is demonstrated by the fact that their chemical warfare troops number nearly 80,000—one tenth of the strength of the entire U.S. Army. By contrast, there are about 2,000 U.S. Army chemical warfare troops. The Soviets have chemical warfare personnel organic in their military organizations down to regiment—the equivalent of a U.S. Army brigade, which has none.

The Soviets can deliver chemical munitions with rockets, missiles, aircraft and large caliber artillery. In their field maneuvers, they constantly practice realistic offensive and defensive chemical warfare. Large-scale decontamination exercises are held regularly in addition to regular training exercises. As was learned from vehicles captured during the 1973 Israeli War, their personnel carriers, tanks and command post vehicles are designed to fight in a chemical environment with minimum personnel losses.

The current U.S. position renouncing all but defensive development and use of chemical weapons places U.S. forces at a serious tactical disadvantage.

We therefore resolve to strongly urge all actions necessary to achieve a viable chemical warfare capability, to include realistic offensive and defensive training and the establishment of a binary chemical munitions production facility.

7. FORWARD DEPLOYMENT

The overseas deployment of well balanced United States military forces is essential to our national security. These forces must be adequate, not only as a deterrent force, but sufficiently strong to absorb with our allies the first shock of conflict should it occur. Above all, they must provide, to our allies and adversaries alike, a clear and credible signal of national resolve to meet our international commitments.

Slow progress in the Mutual and Balanced Force Reduction (MBFR) negotiations, together with the continued Warsaw Pact force build-up over the past ten years, emphasizes the need for continued deployment of United States NATO-committed forces so as not to weaken our negotiating position and Allied confidence in our commitment. There should be no unilateral reduction. This is particularly true in view of the Soviet Union's modernization developments in the past decade, which have resulted in a dramatic increase in their production of combat equipment. All Pact forces have improved mobile firepower. The variety of antiaircraft guns and surface-to-air missiles currently in their ground forces can provide multiweapon air defense coverage at all altitudes likely to be used by NATO tactical aircraft. Although some equipment shortfalls remain, on balance the Pact ground forces are now maturing as a modern force with sophistication comparable to Western armies.

The recent deployment of two U.S. combat brigades to Europe at no increase in overall troop strength will contribute to reassuring our Allies of our determination to keep the peace in Europe and will improve our MBFR bargaining position. Similarly, the continued presence of American forces in Asia and the Pacific is essential to the stability of that area in which our national interests are so deeply involved.

We Therefore Reaffirm our strong opposition to any unilateral reduction of United States forces in NATO and our strong support of the retention of United States military land forces in the Far East.

We Further Resolve to continue to support efforts by the Administration to induce our NATO allies to continue to increase their share of the NATO defense.

8. STRATEGIC MOBILITY

AUSA continues its strong concern that United States strategic reaction forces do not presently have adequate air and sea lift resources to react promptly, with substantial conventional forces, to possible aggression. Increased strategic mobility is essential if the Army is to perform adequately its assigned defense missions.

Without an apparent and convincing capability to rapidly deploy and sustain adequate conventional forces wherever required to support our national policies and commitments, the United States forfeits a principal deterrent to aggression and diminishes the credibility of its announced goals and policies.

Implementation of the urgent strategic mobility requirement includes procurement of additional military strategic airlift aircraft (to include the projected Advanced Medium STOL Transport), providing aerial refueling capabilities for all strategic airlift aircraft in inventory, improvement of the Civil Reserve Air Fleet (CRAF) program by modification of wide-bodied, long-range aircraft, and by revitalizing the National Defense Reserve Fleet.

We Therefore Reaffirm strongly our support for the prompt development of a demonstrable capability to quickly deploy and sustain required combat forces overseas, with particular emphasis on the CRAF modification to accept outsize cargo and revitalization of surface bulk cargo resupply capabilities.

9. CIVIL DEFENSE

Due to a massive build-up of new Soviet strategic weapons which threaten the survivability of America's strategic retaliatory force, the conscious governmental decision over the past decade to downplay U.S. civil defense measures is of serious concern.

Conversely, the Soviet Union has made enormous, all inclusive preparations for civil defense over the past 25 years, with increased emphasis since the signing of SALT I in 1972.

These two facts—improved Soviet weaponry and a protected civilian population—would tend to destabilize the balance of nuclear power and encourage the Soviet Union to pursue higher-risk policies in future international crises. Many Americans believe that nuclear war is unthinkable and, therefore, seek strategic stability. The Soviet leaders certainly wish to avoid nuclear war but, if it comes, are preparing to fight and win.

Spending one billion dollars annually, or approximately ten times the U.S. effort, on urban planning, underground shelters, extensive dispersal and hardening of new industrial sites, storage of critical machinery, fuel, water and food, and detailed civil defense training of school children and every adult, the Soviet Union is taking affirmative action to protect its people and to provide the capability to recover from a nuclear exchange.

We Therefore Resolve to request the Administration and the Congress, as a matter of national urgency, to revitalize U.S. civil defense measures and reevaluate America's policy of strategic stability.

10. SELECTIVE SERVICE SYSTEM

AUSA has long suported the need for the retention of a viable, operating Selective Service System and the continued requirement for Presidential induction authority. The Selective Service System—the only agency authorized to provide non-voluntary manpower when a voluntary effort is unable to fill emergency manpower needs—has been emasculated by the Administration to a standby posture, neither registering nor classifying individuals for possible service. The lack of Presidential induction authority has further impaired the ability of the degraded Selective Service System to respond to a national emergency in a timely manner.

The changes in the Selective Service System do not comply with the spirit or intent of the Military Selective Service Act which requires "an active standby organization, with a complete registration and classification structure capable of immediate operation in the event of a national emergency, and personnel adequate to reinstitute immediately the full operation of the System."

AUSA agrees with the Defense Manpower Commission's observation that it is "less than prudent to allow a major underpinning of our Total Force (the Selective Service System) to be less than immediately available and of use."

We Therefore Reaffirm our strong support for:

Sufficient funding to provide a viable Selective Service System based on the functioning of local boards, registration upon attaining age 18 and timely classification procedures.

The reestablishment of Presidential induction authority.

11. UNIONIZATION OF THE MILITARY

The American Federation of Government Employees, a union affiliated with the AFL–CIO, has amended its constitution to make all employees of the federal government, including military personnel of the Armed Forces, eligible for membership.

There exists the distinct possibility that attempts will be made to create collective bargaining units for the purpose of bargaining with duly constituted military authority on matters concerning military life. The creation of such bargaining units and their authority to engage in collective bargaining would erode completely the military ethical standards of the United States Army, thereby compromising and destroying discipline.

The training and discipline of Armed Forces is predicated on the essential requirement in combat for immediate response to orders from the chain of command. In peacetime—training for war—the leadership chain must be exercised. Any action which interferes with commanders' ability to deal directly with matters affecting the welfare of their subordinates will impact adversely on the military effectiveness of their units.

We Therefore Resolve to reiterate the Association's unalterable opposition to any effort to unionize the military personnel of the Armed Forces.

Be It Further Resolved that AUSA urges the Congress of the United States and the President to take measures against the unionization of the Armed Forces.

12. MILITARY COMPENSATION

It has long been the Association's belief that military compensation is not fully understood both by Congress and the recipients to whom it should provide a clear incentive for service. We further believe that the piecemeal approach used over the years to develop the total package has contributed to this lack of understanding, as well as to the inequities which now exist. The current Quadrennial Review of Military Compensation provides an opportunity to ensure the development of a competitive, visible and dynamic system and, at the same time, to correct existing inequities, which include:

Lack of severance pay provisions for enlisted personnel when subjected to reduction in force.

Variance in quarters allowance between married and single service personnel.

Lack of dependent PCS travel transportation entitlements for junior enlisted personnel.

Variance in subsistence allowance between enlisted and officer recipients.

Discriminatory prohibition on *enlisted* band members which precludes off-duty civilian hire in their primary skill.

Enlisted retirees, unlike officers, do not receive credit for inactive reserve duty prior to 1 July 1958.

Provisions of the Dual Compensation Act discriminate against the retired Regular Army officer.

Older retirees of all ranks bear the brunt of the 1958 legislation that discontinued recomputation of retired pay, a decision made before either the rapid increase of military base pay over the last ten years or the alarming inflation of the general economy was foreseeable.

However, the successful achievement of a professional Army worldwide depends largely on measures and conditions which will attract and retain qualified men and women. Of paramount importance are housing, medical and dental care, educational opportunities and pay.

Troop and transient government housing, worldwide, is limited. There is a critical shortage of adequate and acceptable family and bachelor quarters for all ranks. Much of the desirable off-post housing cannot be rented by service personnel due to limited availability, excessive cost and landlord policies. Of concern, despite Congressional disapproval during FY77 Budget deliberations, are indications of continuing Administration efforts to institute a Fair Market Rental plan for on-post housing, including metered utilities. We believe this will ultimately encourage individuals to live off-post, thus disintegrating the military community, so vital to morale and esprit.

While the shortage of military general practitioners appeared to have been resolved by the Armed Forces Health Benefit (AFHB) scholarships, the taxation of future recipients on the value of the scholarships will seriously detract from the attractiveness of the program. Further, uniformly adequate dental care does not exist although the recently announced decision to use reserve forces dentists and technicians for weekend dependent care is applauded. Quality medical and dental care for all classes of beneficiaries must be maintained.

A primary area of service benefits has been the ability of the serviceman and veteran to pursue his education with government aid. In addition, the G.I. Bills of World War II, Korea and Vietnam have been a significant benefit to the country through the increased general level of education of the veteran population. Approved legislation under the Veterans Education and Employment Assistance Act of 1976 continues to provide educational benefits for currently serving personnel. Post-Vietnam Era Veterans Readjustment Assistance, a cost share program, provides assistance to those entering service after 1 January 1977. This legislation provides significant enlistment incentive at a time when recruiting goals are critical to the maintenance of the required numbers and quality of personnel. However, the Pre-discharge Education Program (PREP) will no longer be available to new personnel under the "G.I. Bill." We believe a replacement DOD funded program is required.

We Therefore Resolve to:

Continue to urge the Quadrennial Military Compensation Review Board and the legislative and executive branches of the government to stop the piecemeal approach to military compensation matters and to develop a total package which is easily understood, eliminates inequities within the service and is equitable in terms of competitiveness and obligations.

Continue to strongly support additional worldwide troop, bachelor, family and transient housing programs, and urge that special efforts be made to undertake leasing or similar arrangements in areas where construction of government housing is neither desirable nor feasible.

Oppose the Fair Market Rental proposal for on-post housing.

Reaffirm our opposition to any action which wouldd weaken the military medical system, including Champus, and our support of quality medical and dental care for all classes of beneficiaries.

Urge an exemption from taxation of the AFHB scholarship.

Continue to urge action to provide equal and adequate dental care to all classes of military health care beneficiaries through a combination of military facilities and a modified CHAMPUS program with minimum contributory costs.

Reiterate our support for the continuation of a DOD funded enlistment incentive similar to the Pre-discharge Education Program (PREP).

13. RESERVE COMPONENT INCENTIVES

National policy has placed heavy responsibility on the National Guard and Reserve forces for the defense of the nation. A high

overall state of readiness for the Army elements of the reserve components is mandatory. Much is being accomplished in the equipment and training area, but a basic requirement is the maintenance of full strength units with particular emphasis on increased enlistments of non-prior service personnel and increased retention of first term enlistees.

The level of effort demanded of commanders to recruit and retain personnel reduces seriously the time available that can be devoted to essential training, administration, supply and maintenance. Recruiting and retention personnel must be authorized, funded and organized to permit the commander to devote full time to training for mobilization readiness. In addition, other incentives are also required and as suggested by AUSA these must include:

Educational assistance for first and second term enlistees.

Enlistment and reenlistment bonuses.

Shorter initial enlistment commitment.

Broadened military medical care to include injuries incurred on inactive duty training and during annual training periods.

Upward revision of the current inactive duty annual retirement point ceiling in recognition of increased training assembly requirements.

Revised reserve retirement plan to permit full retirement annuity at age 55 with 30 years service and actuarily reduced annuities as early as age 50 with at least 20 years service.

Granting exchange/commissary privileges to and developing an equitable means of participating in the Survivor Benefit Plan for reserve personnel upon attainment of retired status in all aspects except the drawing of retired pay.

We Therefore Resolve to support most urgently the provision of reserve component incentives to include educational assistance, enlistment and reenlistment bonuses, improved medical care, increased retirement point credit, shorter enlistment commitment, a revised reserve retirement plan, and benefits to retired reservists before age 60 and their spouses.

We Further Resolve to continue to urge employers—civil as well as local and federal government—to support, without discrimination, all Guardsmen and Reservists who voluntarily devote their time to the national defense.

14. ROTC PROGRAM

The Reserve Officers' Training Corps program, revitalized by Congress in 1964 as a means by which highly qualified Reserve officers and career-minded Regular officers might be procured, has been the Army's largest single source of officer personnel. With the commendable assistance of campus administrators, the declining Senior ROTC enrollment trend following the Vietnam war has been reversed. However, additional incentives are required to ensure that leaders of the highest potential are encouraged to participate.

The Junior ROTC program, voluntary participation in the development of citizenship, respect for authority, character building and self-discipline, exerts a positive influence toward all forms of military service but particularly toward the Senior ROTC.

While it is noted that the Congress increased the authorized number of Junior ROTC units as urged by AUSA, there is evidence of reduced DOD commitment to the program as an integral part of the defense establishment.

In order to more closely integrate the Reserve Officers' Training Corps program with the ultimate users of its graduates, use of active, reserve and national guard units to support ROTC activities is suggested, when such support also furthers the units' own training.

We Therefore Resolve to:

Continue to actively support increased ROTC recruiting, including publicity efforts designed to identify qualified candidates.

Urge an increase in Army Senior ROTC scholarships to 10,000.

Urge the DOD to continue active support of the Junior ROTC program.

Encourage the use of military units of all components to support ROTC programs when such support also furthers the units' training mission.

15. DEPENDENT EDUCATION

School districts which include significant numbers of children of federal civilian and military personnel require known federal funding levels early in their own budgetary process. Annually, school administrators continue to remain uncertain as to federal support. This uncertainty affects the morale and welfare of military families and is of deep concern to AUSA.

Overseas federal dependents have long been subjected to substandard educational facilities as compared to generally accepted CONUS standards. The great disparity in available facilities, teaching aids and materials causes overcrowding and an atmosphere not conducive to proper learning.

We Therefore Resolve to actively urge the federal government to provide the necessary funding under Public Law 815 to construct and modernize school facilities on military installations for the education of dependents of military personnel who reside on military installations.

We Further Resolve to reaffirm our view that the federal government must recognize its responsibility for quality primary and secondary education of dependents of federal military and civilian personnel, and provide the necessary long-range committed budgetary support of Public Law 874 to federally impacted school districts and to DOD overseas dependent school systems.

16. DEFENSE OFFICER PERSONNEL MANAGEMENT ACT

Professionalism, an essential ingredient of any viable armed force, requires the most efficient use of the best qualified personnel. The active Army's current dual system of career reserve and regular officers with its temporary and permanent promotions and the greater vulnerability of career reserve officers to reductions in force, does not fully meet this criterion.

The Defense Officer Personnel Management Act (DOPMA) would provide a one component officer program (beyond eleven years of service) with a single promotion system and the career opportunities to attract and retain the number of high caliber officers needed in the active Army.

We therefore reaffirm our continued support of a single component officer system as proposed in the Defense Officer Personnel Management Act as a key to increased professionalism in the active Army.

17. SURVIVOR BENEFIT PLAN

The Survivor Benefit Plan, enacted into law in 1972 and recently amended by the Congress to improve its attractiveness, provides much needed protection for the surviving dependents of military retirees. However, the 100% Social Security offset, at age 62, of military service benefits to which the widow/widower is entitled remains unchanged. It is AUSA's considered view that this offset should be reduced to 50%—that portion of the benefit attributable to the Federal Government's contribution to the retirement account—and should be eliminated completely if the beneficiary is eligible for equal or higher Social Security benefits as a result of his/her own employment.

We Therefore Resolve to continue to urge that the Social Security offset be reduced to 50% of that benefit attributable to military service, eliminating the offset when the beneficiary is entitled to equal or greater Social Security benefits due to his/her own employment.

18. U.S. MISSING IN ACTION

Despite the efforts of the federal government, the Democratic Republic of Vietnam has failed to live up to Article 8(b) of the Paris Agreement on Ending the War and Restoring Peace in Vietnam, which provides:

"The parties shall help each other to get information about those military personnel and foreign civilians of the parties missing in action, to determine the location and take care of the graves of the dead so as to facilitate the exhumation and repatriation of the remains, and to take any such other mesures as may be required to get information about those still considered missing in action."

We Therefore Again Reaffirm our call upon the executive and legislative branches to revitalize their commitment and efforts, including such new initiatives as might be necessary, to ascertain the status of American servicemen and civilians missing in action in Southeast Asia.

19. AMNESTY

AUSA reiterates its opposition to general amnesty for servicemen in a desertion or AWOL status and/or pardon for those individuals who deliberately avoided draft.

It has been the consistent position of AUSA that each violator of civilian or military law should, with rights fully protected, be adjudged within the applicable judicial system on a case-by-case basis. To do otherwise would erode the nation's system of justice and be prejudicial to good order and discipline within the military service.

Those who deserted or evaded the draft knowingly broke the law. As a nation of laws, we cannot permit citizens to select which laws they will obey. To condone such action is to invite anarchy.

Those who failed to carry out their military obligations during the Vietnam conflict required other law abiding citizens to take their places. In our view, condoning any general amnesty action would impair any future induction program necessitated by national emergency.

We Therefore Reaffirm our opposition to general amnesty or pardon of either military deserters or draft evaders and strongly urge the nation's elected representatives to evince faith in the established judicial system for such matters.

THE OUTLOOK—REVIEW OF CURRENT TRENDS IN BUSINESS AND FINANCE

Mr. HARRY F. BYRD, JR. Mr. President, some economists believe that in the rush to provide stimulus to the economy, those advising the President-elect are neglecting a very real threat of renewed inflation. I am in agreement with the economists—concerned about inflation.

An expression of this view, well documented with numerous economic statistics, appeared in the January 10 edition of the Wall Street Journal. In this article Alfred L. Malabre, Jr., observes:

The good news about the business outlook is that it has grown increasingly clear that the economy will keep expanding as the new year unfolds, very possibly with exceptional vigor. The bad news is that the danger of worsening inflation appears greater than at any time in some three years.

Mr. Malabre buttresses his statement with a recitation of such indicators as

raw material prices and growth in the money supply, broadly defined to include currency in circulation plus deposits in checking and savings accounts. He also notes that at present only 20 percent of U.S. plant capacity stands idle—only slightly more than the percentage which prevailed just before the 1973–74 price spiral.

In testimony at his confirmation hearing before the Senate Finance Committee, the designee for Secretary of the Treasury, W. Michael Blumenthal, conceded that the Federal deficit for the current year, including the Carter stimulus package, will be around $75 billion. That is $9 billion more than last year and is the largest in the history of the United States, including the World War II years.

The inflationary force of this deficit, added to the trends which Mr. Malabre has spotted in the private sector, suggest to me that we are running a serious risk of high-level inflation in the next year or so.

I ask unanimous consent that Mr. Malabre's column in the Wall Street Journal be printed in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Jan. 10, 1977]

REVIEW OF CURRENT TRENDS IN BUSINESS AND FINANCE

The good news about the business outlook is that it has grown increasingly clear that the economy will keep expanding as the new year unfolds, very possibly with exceptional vigor. The bad news is that the danger of worsening inflation appears greater than at any time in some three years.

The good news can be glimpsed, among other places, in the behavior of various economic statistics that tend to foreshadow broad business trends. As recently as Nov. 22, it was noted in this space that these indicators of future economic activity had switched from green and were ominously "flashing yellow." The next few months, the column went on, "should tell whether the yellow switches to a recessionary red."

Now, as mid-January approaches, it is plainly apparent that the yellow has switched not to a recessionary red but safely back to green.

Take, for instance, the performance of a particularly farseeing percursor of business activity. The indicator is actually a ratio of two other indexes—a composite of so-called coincident indicators, such as employment, that normally move up or down concurrently with general business activity and a composite of lagging indicators, such as business loans, that tend to trail the overall economic trend.

During the post-World War II era, this ratio has signaled approaching recessions, through declining decisively, by an average warning-time of 18 months. In August, after a long climb from the 1973–75 recession, the ratio reached a recovery high of 101.9. It fell in September to 100.9 and in October to 100.5. A third straight decline would have seriously suggested a recession by early 1978. However, the ratio rose sharply in November, the latest month available. It climbed, in fact, to a new recovery high of 102.

A similar improvement is apparent in most other statistics that usually warn of approaching recessions. A case in point is the recent upturn, after a period of decline, in the composite index of leading economic indicators. This index receives far more publicity than the ratio of coincident to lagging indicators, no doubt because it is the subject of a monthly government press release.

While signs of a possible recession have diminished in recent weeks, the danger of reaccelerating inflation has risen.

This bad news, paradoxically, relates in part to the aforementioned good news. Economic history helps to explain the paradox. It shows that inflationary pressures eventually build as economic expansion periods lengthen. The current expansion is already some 21 months old. If it persists through 1977, as seems most probable, it will match the average length of 28 previous expansion periods charted in history books of the U.S. business cycle. It will exceed by seven months the average length of all previous peacetime expansions.

A closer look at the record shows that after expansions are under way for more than a couple of years price increases usually grow larger. A rare exception is the long 1961–69 expansion. Even then, however, inflation began to accelerate after three years.

Indeed, the current expansion seems remarkable in that price increases generally remain smaller than those posted way back in the spring of 1975, when the business upturn was starting.

While there is nothing in the record to suggest a rerun of the corrosive, double-digit rates of inflation that prevailed in much of 1973–74, business-cycle experience unmistakably teaches that inflation should shortly begin to worsen.

Relatively obscure price gauges that often presage broad trends on the price front also indicate worsening inflation. One such measure is an index compiled weekly by the Federal Reserve Board. It reflects changes in price levels of some two dozen key materials used in industry. These range from metals to rubber to textiles. In the past, this index has moved up or down as long as a year before such broad inflation yardsticks as the consumer price index have followed suit.

During much of last year, the Fed's index remained nearly level. In fact, it declined slightly between April and October. However, since then the trend has been markedly upward. If the recent rise continues for another month or two, the index will exceed its record level of 233.8 (a base of 1971 equals 100) reached in April of 1974. Only two months ago, the index was below 210.

Still another sign that inflation is likely to intensify can be detected in figures involving the nation's money supply.

The money supply, broadly defined to include currency in circulation plus deposits in checking and savings accounts, has climbed about 12% in the past year. Studies show that such a rate, continuing over so long a period, is likely to generate substantial inflationary pressure. The U.S. economy's capacity to grow over the long term is put by most economists at an annual rate of less than 4%. Quite obviously, monetary growth of 12% annually will eventually tend to overburden that capacity.

The prolonged surge in the money supply would appear less worrisome if the economy were operating far below its potential. But this is no longer the case. Some slack remains from the 1973–75 recession. But the amount has shrunk a great deal.

Recently revised government estimates show that less than 20% of U.S. plant capacity now stands idle, down from about 30% in early 1975. A further drop of several percentage points would bring the rate down to levels that immediately preceded the 1973–74 price spiral.

To the many purely economic indications that inflation may soon worsen must be added disturbing political considerations. These include the ability of Mideastern oil producers to command ever-higher prices and the perennial penchant of U.S. policymakers to overspend. That penchant is visible in Jimmy Carter's apparent plan to stimulate further an economy that already is briskly on the rise.—ALFRED L. MALABRE, Jr.

LIBRARY OF CONGRESS EXHIBIT "BEGINNINGS"

Mr. CANNON. Mr. President, on November 9, the Library of Congress marked the opening of an exhibit "Beginnings" with a dinner honoring many of its friends whose generosity has made it possible for the Library to be one of the greatest repositories of man's cultural heritage in the world. This exhibit, which only whets one's appetite with respect to these treasures, features such unique items as the first map of Manhattan Island (1639), Morse's first telegraphic tape, Alexander Graham Bell's drawing of the telephone, Orville Wright's diary, Sigmund Freud's letters to Carl Jung, and Whitman's manuscript of "Leaves of Grass." Many of the items on view are from the 14th and 15th centuries.

I ask unanimous consent to have printed in the RECORD the remarks made that evening by the Librarian of Congress, Daniel J. Boorstin, and the response made by the Chief Justice of the United States.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY DANIEL J. BOORSTIN

Our theme tonight is beginnings. We can never be sure when we have seen one, when there has been one, or when there will be one. The origin of this robust Anglo-Saxon word is itself shrouded in mystery. "Begin" seems to have the same root as that from which we get our word "to yawn." Yawning, too, is a kind of opening.

Beginnings have always inspired awe. The Bible begins with "in the beginning," and "in the beginning was the Word." Everything is a beginning, though it has taken most of human history to make this discovery. To discover this truth is to discover history—that the life of our species is not mere repetition, but is full of novelty, full of beginnings. The capacity for beginnings makes us human and keeps us human.

The exhibition which opens this evening will help us grasp and witness again and again the mystery of beginnings. In the *natural* world if we know the seed we can predict the fruit. But, never in our human world—the world of thought and science and art. What makes our beginnings human is precisely their unpredictability. Copernicus would bear an exotic harvest—new religious sects, a new sense of time, a new universe of travel. Emerson's encouraging letter to Whitman and Whitman's own new accents fructified a new sense of what was American, a new sense of the poetic. The human miracle, which we celebrate here tonight—perhaps what those have meant who say that God created man in his own image—is that man seems able to create new kinds of everything.

Here, with these treasures spread before us, we can learn to distinguish the real beginning from the annual model. In our age countless items proceed from novelty to obsolescence without ever having become new beginnings. Hula-hoops and Edsels obsolesce without innovating. Overnight sensations, headline makers, full-page-ad fillers are not necessarily beginnings. Today as never before we need a place like the Library of Congress where we can distinguish the debris of still unrecycled annual models which only disfigure the landscape—from the epoch-markers and epoch-makers, the accumulating works of intellectual beginnings

from all past ages, which can brighten our vistas and widen our vision.

This Library is a treasury of beginnings. Here we can sample their mysteries and their promise. What beginnings are most fertile of other beginnings? How does Samuel de Champlain's map of northeastern America, or Alexander Graham Bell's telephone, or Sigmund Freud's idea of the subconscious, or Albert Einstein's concept of space-time relations—how do all these become opening chapters for later adventures into the unknown?

Ours is not a teaching institution. But it is a learning institution. Successful teaching imposes special limitations. There must be a curriculum with disciplined channels of study—and then tests of achievement, and badges of achievement, grades and honors and degrees. Teaching institutions obviously depend on teachers whose services are irregular and discontinuous, whose teachings are channelled and curricularized. Teachers are mortal, they seek better posts elsewhere, they go on vacation, they lose their elastic step, their clear, articulate voice. The stimulus of the classroom depends, too, on the qualities of fellow-students.

A *learning* institution like ours does not provide the teacher, the curriculum, or the classmates. Our opportunities are not narrowed by a curriculum nor by the rhetoric of any particular professor. Our offerings do not vary with the season, the semester, or the sabbaticals of the teaching staff.

Here in this *learning* institution, the learner—call him a student or whatever you will—is supreme. His interests and desires, even his whims, *are* the curriculum. Here everyman makes his own university.

We are the most traditional of educational institutions. We offer the classics, the great books, the heritage of learning. Yet we are the most progressive of educational institutions. John Dewey need not preach here. We already open vistas of uninhibited self-discovery. Here the only complaint of the learner may be that of the proverbial progressive school student, "Do I really *have* to do what I want to do?"

In a country of great teaching institutions how can we make this the best possible learning institution? Congress and the American people have endowed us here with learning resources unexampled in human history, unparalleled in the world today. Our collections of books and periodicals, of maps and atlases, of photographs and the graphic arts, of motion pictures, of musical recordings, musical scores and librettos, incunabula and rare books, manuscripts, Braille books and talking books—each of these collections shines by comparison with any similar collection past or present.

We reach into all past ages and touch all nations on all continents. Here we get the word from ancient Egypt and Chaldea, from earliest China and Korea and Greece and Rome. Here we learn not only about Islam and Christianity and Judaism, but also about Buddhism and Shinto and Tao, about tribal religions and how people have sought and found their gods.

Our unexcelled collections about everything American—our culture, our literature, our economy, our geography, our politics, our technology, our science, our achievements and frustrations in war and in peace—make us a national library. We are a national library too, by our service to all the nation's libraries. Over three quarters of a century we have distributed more than two billion two hundred million cards, along with immeasurable economies of time and money, and other benefits that reach to the smallest libraries in the remote corners of our nation. During this period we have actively shared our resources through some seven million interlibrary loans.

Of course, our primary function is to be the Congress' and the Nation's library. It is less noted that in a sense, we are also the world's library. We have *had* to become an international library in order to serve the needs of the Congress and of the Nation, in order to be a truly national library for the United States in the 20th century. This year we Americans have been reminded again and again, that we are, in Whitman's words, a nation of nations. "Our blood is as the flood of the Amazon," Melville explained, "made up of a thousand noble currents all pouring into one. We are not a nation, so much as a world." It may suffice for national libraries of other nations to confine their major collections to their own language and their limited territory. If we are to be a national library for these United States we have no choice but to be world-wide in our interests, catholic, multi-lingual, fully human in our collections. It should not be surprising, then, that some two-thirds of our 17.5 million books, of our total of eighty million items, are in languages other than English. In this Library we catalogue in some 468 languages. The competence of our staff now reaches some 120 living languages. This kind of Congressional library has required an outreach to people in far places. Keeping these comprehensive collections up to date—in the service of the Congress, of scholars, and of an enlightened citizenry—requires that our staff be versatile, vigilant, efficient, enterprising, and imaginative.

Of course, we have our problems. Problems of space. Where to put and how best to preserve our accumulating treasurers. Problems of service. How to find promptly from our millions the one particular item wanted by a member of Congress, by a scholar, by any interested reader here, or by the reader in another library. We are working at these and other problems with the aid of an able task force from our staff and of advisory groups from the whole nation. Our problems are the price of our prosperity.

Our problems come from the vast extent of our treasure, from its constant increase. We receive 1½ items every working second, and we would not have it otherwise. Our problems come also from the welcome, ever-increasing demands of a nation of learners. Our problems, like our treasures, are a measure of our opportunities.

Now we will have the new opportunity to draw together collections from a dozen locations into the magnificent James Madison Building across the street. We will remove the unsightly partitions which have defaced this building, will provide our staff with a more acceptable working environment and finally will give the treasures now crowded into this building the living-space they need and deserve. At long last we can restore this grand building to its intended grandeur—the grandeur of civilization itself.

In our new age this building, the symbolic heart of our Library, will play a special role. Details for the fulfillment of our hopes will have to be worked out under the guidance and in close consultation with the Joint Committee of the Congress, in collaboration with the inspired Architect of the Capitol and his able staff, in cooperation with the nation-wide communities of our constituents, and, of course, with the peerless staff of the Library.

In a nation replete with great and effective centers of teaching, what are the special—not only the residual, but the unique and remarkable—roles of this grand center of learning?

These past decades in the United States have seen the multiplication of schools and colleges and universities, of learned societies and specialized publications. In my own field of history alone we see countless new societies and new journals—for interdisciplinary history, for psycho-history, for cliometrics, along with periodicals focused on the needs and problems, the arts and literature and economy and politics of every part of the world. New "disciplines," new categories of information, new ways of gathering facts, and then of interrelating facts in one category to those in another—all these multiply with the seasons.

World War II more than any world event before dramatized the crucial place of research and development in the nation's survival. R&D entered our jargon. Research institutes have multiplied. The first known national estimate of trends in expenditure for research and development was made by Dr. Vannevar Bush as recently as 1945. The first such figures appear in our Historical Statistics (Bureau of Census) in 1953, when funds expended in the USA for Research and Development amounted to $5.2 billion. By 1970 the figure reached 26.5 billion (55% were Federal funds). The titles of books published in the United States increased from some 11 thousand in 1950 to some 40 thousand this year. Every year, the new periodicals started somewhere in the world number about 17,000. And I have not even mentioned that for any single year (1970 for example) there may be copyrighted as many as eighty-odd thousand musical compositions, two thousand maps, 25 hundred motion picture films, along with thousands of still photographs, and miscellaneous other items which must be counted among sources of knowledge.

This overwhelming bulk has led other institutions to become increasingly selective. Inflation and lack of community support have forced libraries to limit their scope. But even our best efforts to help other libraries meet their financial needs will not enable them to be fully comprehensive in their collections. Their limits and their specialization inevitably mean the separation of one kind of knowledge from another.

We must not allow our nation's success, our intellectual ferment and creativity irreparably to fragment our culture. Someone somewhere must make the effort to be comprehensive. Where is that place?

It is here! Certain parts of this task have been undertaken by the National Library of Medicine and the National Agricultural Library. But the essential task of comprehensiveness remains ours, right here in the Library of Congress. For decades we have been working at this assignment, and have, on the whole, been remarkably successful.

We must be fertile and comprehensive, not only in our collections, but in our use of our treasures. We must enlist more scholars to explore here. We must have a Center for the Book to help us understand the history of the book and the place of the book in history. The Engelhard lectures on the Book, begun this year, are a new start. We must be a nursery of scholarship and music, and the graphic arts. We must find ways to display them—by traveling exhibits and other means to perform them, and to encourage their performance. We must be a home for a comprehensive American culture for the benefit of Americans everywhere.

In this increasingly necessary, ever-more-urgent task this Library of Congress Building is our focus. This, our central building will be our Encyclopedia. "Encyclopedia" originally meant the circle of knowledge of the arts and sciences essential to a liberal education. An Encyclopedia, in Sir Thomas Browne's phrase, offers "the round of knowledge." For this purpose the shape of our grand reading room, which I would like to christen the Hall of Knowledge, is not merely symbolic. It will be functional. From our central Hall of Knowledge any serious comer should be able to survey the sweep of knowledge—to see vistas in all directions. From here the learner will be guided into more specialized learning rooms, some (on this floor) for particular disciplines—the social

sciences, the humanities, the physical sciences—some (on the floor above) for particular civilizations, defined by language and by geographic area. And then on to our vast specialized collections—on economics, on Orientalia, on aeronautics—where he can settle down to work in depth. At each of these points we hope to aid him with human guides from the widely and deeply learned staff of this library who know the intellectual landscape because they have been there themselves.

Earlier ages have been oppressed by ignorance. It would be ironic if ours should be victimized by the excess of knowledge. Our Library exists to help us prevent that unnecessary tragedy. Therefore, we must provide not only an Encyclopedia, but an Index. We must not only help any willing person to survey the wilderness of knowledge, we must help him find his way.

This central Hall of Knowledge must be a headquarters for exploration. There the learner seeks a guide, from there he will be introduced to others of our great corps of guides elsewhere in the Library. The central Hall of Knowledge will provide not merely the traditional apparatus of catalogue cards, but the magical new apparatus of the computer, to offer the most modern most usable index to the knowledge of all times and places.

Today the drift of American civilization must impress on us the need for institutions where Americans may explore for themselves. Even while knowledge is extended and while our arts become more adventurous and more varied, the channels of popular communication (which dominate our lives more than ever) somehow become narrower. While colleges offer us "curricula" (a word appropriately derived from Latin "currere," to run, as along a race-course) which change with the seasons, broadcasting offers us channels. Competition on the airwaves—a hallmark of our free society—seems itself to reduce the reality and the range of our choices. Every season there seems less difference between what the different channels offer us.

Meanwhile, in the word of book publishing, the annually increasing titles make us desperate to escape from the bewildering multitude of apparent choices, and so dig deeper the channels of best-sellerdom. The pressures toward celebrity—in books, as in people—become ever more overwhelming. Just as the celebrity-person who dominates our news is someone well-known for his well-knownness, so too, the celebrity-book which dominates our reviewing media sells because it is (or is reputed to be) a best-seller.

Our world of channels needs this Library. Libraries remain islands of choice in a world of channels. And this great Library of Congress is a vast continent of choices.

We can remain a temple of autonomy, where the free autonomous individual can think and explore and read and see and hear as he wishes. Those who still wish to swim in the swiftly changing current of best-sellerdom can do so here. Those who wish to become refugees from an over-channelled world can find their refugee here. Those who wish to grasp the latest fragment of news or the newest information in literature, in politics, in economics, in the sciences, can find those fragments here. Those who wish to reach back across the channels and across the centuries can delight in the world that was news to Copernicus or Champlain or Alexander Graham Bell or Orville Wright. Those who wish to enjoy the latest product—in maps, in photographs, in movies, in prints, in phonograph recordings and tape-recordings—find their treasure here. So, too, those who wish to enjoy a page of Caxton, a Beethoven manuscript, a print by Blake, a medieval Book of Hours.

Some of our opportunities for new beginnings are dramatized here tonight in the exhibition which surrounds us. This building was intended to be not only an Encyclopedia, an Index to civilization and to civilizations, but a showplace for the human, and especially the American, achievement. With the opportunities now offered us—foreshadowed in the renovation (I almost said the denovation") of this great hall and the circumambient halls—we will witness a renaissance of our exhibits, a grand reopening of our American treasury. We want more Americans to come here to see what they did not know was their own. Our exhibits will, we hope, be irresistible appetizers. We will try to make them as dramatic, as enticing (as suggested by the invitations each of us received for this evening), as our wondrous treasures deserve.

We must point the way from everyone's special territory to all neighboring territories. We must keep the frontiers open so that people can freely move back and forth—without need for tuition, entrance examination, or other academic passport—from the world of incunabula to the world of news, from books to maps, from the printed word to the imprinted image and the recorded sound.

This central building, we hope, will be, more than ever before, a place of beginnings for millions of voyages of exploration and discovery, each uniquely designed by and for each new explorer. Here is the point of departure for countless expeditions—each a party of one. This building is the new Independence—like the old Independence, Missouri—from which every intellectual pioneer can find and move into his very own new West.

We must provide here a fellowship of adventuring learners. We must, in this very building, provide a beautiful, congenial home where explorers can delight in one another's work, exchanging tales of their adventures. This can be an explorers' club open to all.

Here is a great treasury of the known, but an even richer treasury of the unknown. We must find new ways to help each of us, each American, learn again and again to be a beginner.

THE CHIEF JUSTICE OF THE UNITED STATES—NOVEMBER 9, 1976

Dr. Boorstin, distinguished guests, ladies and gentlemen, I am not on the program—no one is on the program but the distinguished Librarian of Congress—but I have in a sense been drafted, in the way these drafts will occur in an assembly of this kind, to express a word or two about the distinguished Librarian of Congress. This office, this position, has been occupied over a period of many years by many remarkable, outstanding scholars and the present incumbent of the office as a scholar and historian is no exception to that. As a lawyer, it troubles me a little that so often in a recital of background, it is often completely overlooked that he was not only trained as a lawyer but functioned as a lawyer, and is a member of one of the great—one of the four great Inns of Court in London—something which I am happy to say I share with him. His status as a lawyer thus being denigrated suggests something about his status as a scholar. What he has said here tonight has indicated something of what the future holds under his stewardship of this office and this institution which is unique in the world. As an historian and scholar—and then I must add parochially as a working lawyer—he brings to this office something perhaps distinctive that has never been here in quite the same way that it is today. He will, I suggest, bring to the Library of Congress something of what Cardinal Newman did so many years ago in his essay on the great conception of the idea of a university. And Dr. Boorstin will bring a new dimension to the idea of a Library of Congress, a world library, a world institution of learning and of knowledge. And had I had the wit to bring a glass with me, which I did not (but I will borrow my wife's), I would ask you to join me in raising a glass, any glass, in a toast to Dr. Boorstin and his colleagues at the Library of Congress and the future of this great institution.

DEFENSE POLICIES

Mr. GOLDWATER. Mr. President, the United States today "confronts the Soviet drive for military superiority with fragmented will and purpose." That quotation was taken directly from a statement of policy adopted by the Air Force Association at its 30th anniversary convention. The policy statement gives an excellent appraisal of Soviet military activities and underlines a need to rethink this Nation's foreign and defense policies. One of the most important comments in the statement goes as follows:

In our kind of democracy, the dedication and excellence of our military forces and the superiority of the arms they bear cannot alone provide national security. Our strongest bulwark is, and always will be, America's national will to bear the burdens of freedom. We believe it is time to lay before the American people all the facts about the threats they face. Given the facts, this great nation, today more than ever mankind's last best hope, will respond as it always has in past moments of grave danger.

Mr. President, because of the extreme importance of preparedness at this time in our history, I ask unanimous consent that this statement of policy and two policy papers adopted by the Air Force Association on "Force Modernization and Readiness" and on "Defense Manpower Issues," be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AFA'S 1976–77—STATEMENT OF POLICY

(Adopted unanimously by delegates to AFA's Thirtieth Anniversary National Convention, Sept. 20, 1976.)

As the SALT I accords enter their fifth year and as the national political cycle emphasizes the need to rethink the nation's foreign and defense policies—and the linkage between them—misconceptions about security issues abound. There is widespread misreading of the meaning of limited accommodations with the USSR. And there is a woeful lack of information, understanding, and concern regarding Soviet efforts to develop and acquire the means for surviving and winning nuclear war. As a result, inadequacies in US national policies and military capabilities—and in the national resolve to oppose aggression—are developing. In time, they could lead to political and military impotence.

The United States confronts the Soviet drive for military superiority with fragmented will and purpose. The majority of Americans who support strong defenses is opposed by vocal minorities advocating limited deterrent forces, isolation, or reliance on the goodwill of the Kremlin. We do not question the right or the motives of those who hold these views. But we assert our own right and responsibility to challenge misstatements, misunderstandings, and false economies that jeopardize national security.

We see no evidence that SALT has caused the Soviet Union to slow its prodigious program of arms development and deployment. Nevertheless, the SALT negotiations should be pursued vigorously for reasons of morality

and self-interest. But they must be shielded from the pressures of political expedience and political deadlines.

We do see clear-cut evidence that new weapons to bolster the USSR's strategic offensive, strategic defensive, and theater war capabilities are being developed, and many of them are being deployed. Second-generation Soviet intercontinental ballistic missiles (ICBMs)—the SS–16, SS–17, SS–18, and SS–19—are being introduced into the inventory at a rate of some 200 a year. This family of missiles is about three times as accurate and has throwweights up to four times greater than the ICBMs they are replacing. Hopes that the SALT I Interim Agreement would freeze Soviet deployment of destabilizing weapons have proved false. To the contrary, Soviet counterforce capabilities that threaten our ICBMs are being developed through larger, more accurate, MIRVed missiles at a steadily accelerating rate that permits but one interpretation: The USSR seeks a first-strike posture and is willing to stretch the SALT terms to the breaking point. SALT I ambiguities provided the Soviets vast advantages and facilitate the USSR's present maneuvers. Now a third generation of Soviet strategic missiles is emerging, consisting of at least six distinct designs, some or all of which can be expected to reach operational status within two or three years.

Equally destabilizing, and a circumvention of at least the spirit of SALT, is the deployment of the SS–20 mobile missile. Ostensibly of intermediate range and hence not counted against the number of strategic offensive weapons permitted by SALT, it is clearly capable of intercontinental range and is, in fact, the world's first operational mobile ICBM. In the NATO area, that system also extends Soviet regional nuclear force superiority, described by the US Arms Control and Disarmament Agency as growing "like a towering, dark cloud over Europe and Asia."

We also are concerned by Soviet activity in antiballistic missile (ABM) defense that stretches, if it does not break, the SALT I ABM accord by deploying key ABM elements that might be combined rapidly to achieve full operational status. The relentless Soviet drive toward comprehensive military superiority is manifest also in the flight-testing of new advanced MIRVable, submarine-launched, ballistic missiles that have even more range and throw-weight than the 4,200-nm-range SS–N–8, which recently became operational. Under construction in the Soviet Union are several ballistic-missile submarines of a new type that may be larger than the Trident, the newest US SSBN now under development.

Soviet stategic offensive capabilities in space are being refined through improved, quick-reaction killer satellities that could destroy essential US space-based systems while they are out of sight of US tracking stations. These space interceptors can be launched, can rendezvous with, and can destroy US spacecraft in less than one orbital revolution.

Soviet strategic air defenses, consisting of some 555,000 troops, more than 5,000 early warning and ground control intercept radars, some 2,600 fighter-interceptors, and almost 12,000 strategic surface-to-air missiles, dwarf those of the U.S. These massive defenses lessen the superiority of the US strategic bomber force over that of the USSR.

Among the most destabilizing strategic gaps between the USSR and US is the survivability of people, industry, and the national command structure. The Soviet lead is awesome, and it is widening.

Industrial operations essential to survival are dispensed and hardened. Grain stored in hardened underground silos is to provide reserves to feed the entire Soviet population for about a year. The Russian people, protected by an elaborate civil defense system, are told that a US nuclear attack would kill "only" from seven to eleven million Soviet citizens, half the Soviet losses in World War II. There is a massive hardening program for the Soviet command and control structure.

Capping the Soviet drive for nuclear superiority is a research and development program of unprecedented size and staggering cost. Its emphasis is on achieving technological breakthroughs, such as ballistic missile defense with laser and charged particle beam weapons. Unless countered by expanded US R&D and acquisition programs the Soviets could achieve dominance of deployed military technology within four or five years, according to senor Defense Department officials. Our strategic nuclear forces could then be unable to deter a counterforce strike by the Soviets; unable to provide minimum retaliation against Soviet attacks on our cities; unable to deter limited nuclear attack; and unable to support US military operations against conventionally armed forces.

The picture is equally grim in terms of theater warfare capabilities, with the Soviet Union developing a range of new tactical nuclear weapons from the MIRVed SS–20 ballistic missile down to one-tenth-kiloton artillery shells. At the same time, the production and stockpiling of biological and chemical warefare weapons are at extraordinary levels and increasing.

Soviet tactical aircraft production is close to twice that of all US military services. The USSR's tactical aviation is undergoing a marked shift toward offensive capabilities with the introduction of several new, nuclear-capable fighter-bombers that have twice the range and greater speed and payload than the aircraft they replace, and include such advanced features as terrain-avoidance radars, laser rangefinders, and comprehensive hardening against nuclear effects.

Soviet airlift capabilities have increased manyfold over the past decade and now, because of shorter distances, roughly match the tonnage that US airlift could deliver to such potential trouble spots as the Mideast and Southern Africa.

This Association believes that the unparalleled Soviet military buildup, especially in the strategic sector, mandates nonpartisan reassessment of the geopolitical and military threats facing this nation and how we must respond in terms of national policy in general, and defense policy in particular.

The starting point must be the US position at current and future Strategic Arms Limitation Talks. A nonnegotiable minimum is the principle of "balanced capabilities" for both parties, defined in terms that are unambiguous, capable of verification, and that reduce "breakout potential"—meaning intrinsic advantages to one party in case a SALT accord is either abrogated or permitted to expire. The principle of "balanced capabilities" also requires that SALT eventually be broadened to take into account all capabilities and weapons that affect the strategic balance to preclude imbalances developing outside of narrowly negotiated areas.

We believe it is imperative to modernize the strategic triad. We must develop capabilities at least equal to those of the Soviet Union—from limited options to assured destruction—and with reliable provision for adequate survivability and the ability to penetrate advanced defense systems. Key elements are deployment of the B–1 and Trident and accelerated engineering development and early production of the M–X large-throw-weight ICBM and the Air-Launched Cruise Missile. These actions, in concert, are necessary to prevent the Soviet Union from attaining a credible first-strike posture.

To support these central actions, secure and survivable command and control capabilities must be developed in space, air, and on the ground by exploiting all available technological opportunities to provide rapid, unmistakable warning and attack assessment to our national leaders in a form that can be acted on intelligently and quickly. Providing such capabilities, and signaling their existence by exercising them presents formidable evidence to the Soviets that a surprise attack is neither possible nor profitable. We see this as a means for buying effective deterrence at bargain-basement prices.

Two glaring deficiencies in US strategic capabilities are air defense and civil defense. In the case of the latter, we view as a minimum essential the development of civil defense capabilities to provide protection against fall out where major population centers are near concentrations of strategic targets. Growth of the Soviet's Backfire strategic bomber inventory makes indispensable the rapid revitalizing of continental US air defenses.

Key to keeping the nuclear threshold high are US and NATO general-purpose and theater warfare capabilities. We take pride in the family of superb new USAF aircraft that is entering the inventory and that will revolutionize this nation's tactical air capabilities. Two factors are essential if the full potential of these aircraft is to be realized. They must be acquired in the programmed quantities and manned, maintained and supported by an adequate number of the world's top aerospace professionals—the men and women of the United States Air Force. This force, reduced to barebones levels, cannot sustain further cuts without major impact on readiness, and basic effectiveness, conditions that apply equally to USAF's strategic, tactical, airlift, and other forces.

We deplore congressional actions that tend to deepen cracks in the vital southern flank of NATO, and we urge both the Administration and the Congress to take all possible steps to heal those rifts and shore up this area. Similarly, we urge that no effort be spared to resolve the Panama Canal issue, without either compromising fundamental US defense interests or good relations with our Latin American neighbors.

In our kind of democracy the dedication and excellence of our military forces and the superiority of the arms they bear cannot alone provide national security. Our strongest bulwark is and always will be, America's national will to bear the burdens of freedom. We believe it is time to lay before the American people all the facts about the threats they face. Given the facts, this great nation, today more than ever mankind's last best hope, will respond as it always has in the past moments of grave danger.

AFA Policy Paper: Force Modernization and Readiness

(Adopted unanimously by delegates to AFA's Thirtieth Anniversary National Convention, Sept. 20, 1976.)

Compared to potential adversaries, this country's population is limited and the costs of maintaining its military manpower are high. It is our creed that wars involving American forces must be waged with the lowest possible loss of American lives. It follows, then, that we must rely on technical superiority to make up for what we lack in numbers, be that people or equipment. Force modernization—both the acquisition of systems needed now and research and development for the weapons of tomorrow—and force readiness—to permit the effective, sustained use of these weapons—clearly are the dominant needs.

Failure to provide for these twin requirements would give the Soviet Union a decisive lead in military capabilities that could be exploited aggressively. The primary measure of the adequacy of U.S. force modernization is whether or not there is broad equivalence with Soviet capabilities and forces. Subordinating force modernization to the budget demands of domestic causes could, over the

long run, lead to a fatal shortchanging of both. Congressional actions to date that have reduced the Defense Department's RDT&E and acquisition accounts by some $2.7 billion for FY '77 point up this danger.

In acquiring and developing strategic systems, the governing factors, in our view, are these: The Soviet Union does not consider nuclear war unthinkable, does not accept the premise of mutual destruction, and consequently can no longer be deterred through the threat of assured destruction alone.

The SALT agreements now in effect give the Soviet Union major quantitative advantages in intercontinental ballistic missiles, including more than a fifty percent lead in sheer numbers and a throw-weight advantage as high as four to one. This combination of factors creates a number of urgent needs in terms of USAF's strategic and general-purpose systems.

B–1

First, the B–1 strategic bomber must be produced and put into operational service. A viable bomber force is fundamental to credible, flexible deterrence and can be attained most cost-effectively through a mix of B–1, B–52, and FB–111 aircraft. The strategic bomber continues to be the least destabilizing, least provocative US deterrence tool and the best antidote to rapid, irreversible escalation of crises.

The central element of this bomber mix must be the force of 244 B–1s, tailored to penetrate future, advanced air defenses around Soviet high-value targets. The B–1 is optimized for this mission through improved payload, unequaled electronic warfare systems, reduced radar cross-section, high penetration speed at low altitude, and high survivability through shorter takeoff, faster escape speed, and high structural and electromagnetic hardness.

Progress of the B–1 program has been highly satisfactory so far. To date the B–1 has passed more development and preproduction analyses and tests than any previous military or civilian aircraft at a comparable program phase. There are no technical reasons that justify delay. At best, the first B–1 will not enter SAC's operational inventory until 1980, and the entire force will not be operational until a decade from now. It is the right and duty of any incoming Administration to reexamine critically all national policies—including the commitment to triad that has provided effective nuclear deterrence during the past sixteen years. We are confident that the B–1 program can and will stand up under the most rigorous, objective review.

CRUISE MISSILES

Modernization of the nation's strategic bomber force must, in addition to the B–1, extend the utility of the B–52 by fitting the newer models with the versatile air-launched cruise missiles now being developed and tested. These new weapons—small, hard-to-find, cost-effective, and with a range of more than 1,000 miles—can expand the B–52's target coverage and increase its survivability. We see compelling reason for developing cruise missiles employing integral rocket ramjet propulsion technologies to provide great range with high supersonic speed essential for the penetration of advanced air defense systems.

These versatile strategic weapons are made possible by technologies in which this country clearly leads the Soviet Union; thus they contribute to perceived equivalence with our principal adversary for some time to come. This US advantage must not be bargained away for anything short of an unequivocal concession of equal value.

ADVANCED ICBMS

The intercontinental ballistic missile (ICBM)—with its speed, accuracy, low operational cost, constant high readiness, and short flight time to target—represents this nation's principal means for exercising flexible strategic options, especially against time urgent, hardened targets, and, thereby, a means for terminating nuclear conflict below the level of assured mutual destruction. But this option remains open only as long as these weapons can cope credibly with the increasing threats that advancing Soviet technology and proliferation of warheads bring to bear on them. The need, therefore, is to move resolutely toward full engineering development and subsequent deployment of the M–X, an advanced ICBM that provides both the increased throw-weight and accuracy required to deal with hard Soviet targets and the intrinsic option of fixed silo basing plus an alternate, more survivable basing mode. The M–X program schedule is conservative. But the speed-up of Soviet ICBM development and deployment programs that underlies the need for M–X militates against slowing or halting the M–X effort because of budgetary politics.

This Association is particularly concerned about the tendency in the Congress to specify basing modes for the system without full coordination with the Defense Department and the Air Force.

MINUTEMAN UPGRADING

Programs to upgrade the Minuteman force must be continued, including deployment of the improved-yield MK 12A warheads and the option to increase the number of Minuteman III's beyond the current total of 550.

WARNING AND ATTACK ASSESSMENT

While the strategic forces continue to be the central factor of our national defense capabilities, the ability to control these forces in real time and in step with changes in the battle situation also is of pervasive importance. Essential here are programs to improve that part of the national Early Warning System known as attack assessment, encompassing rapid detection and transmission of information about impending attacks by Soviet ICBMs, SLBMs, and bombers, and involving sufficient precision and detail to permit immediate formulation of counteraction by the National Command Authorities. Cobra Dane, Pave Paws, OTH–B, and the Joint Surveillance System rank high on this list of program priorities.

We see an urgent need to improve our warning systems and their associated command control and communications systems to obtain comprehensive raid characterization information leading to appropriate and controlled responses, retargeting, and the ability to selectively execute or withhold strikes to control escalation. Such a capability, of itself, constitutes persuasive deterrence by quashing a potential aggressor's hopes of staging a successful first strike against USAF's ICBMs; no matter how great the attacker's warhead accuracy or their number, he must reckon with the high probability that his weapons will be attacking empty silos. Equally vital are command control and communications systems that permit rapid and reliable execution of responses to enemy attack, even when exposed to the effects of nuclear weapons and countermeasures.

E–4 AND AFSATCOM

Primary here are the E-4 Advanced Airborne Command Post, the World Wide Military Command and Control System and its subnets, and the Air Force Satellite Communications System (AFSATCOM I and II). Together, improved early warning, attack assessment, and survivable command control and communications capability multiply the effectiveness of our strategic forces to a degree not attainable by other means. We see a pressing need to maintain a strong R&D program within DoD to preclude technological surprise in ABM defenses.

The Soviet Union's modernization of its strategic bomber force through the introduction of Backfire warrants reassessment of this country's extremely limited air defense capabilities. Some sixty Backfire supersonic intercontinental bombers, the most modern operational bombers in the world, are now in the inventory of Soviet Long Range and Naval Aviation. We endorse USAF's recognition of the need to modernize and improve US air defenses, particularly as the Backfire threat increases, and we believe that the time to begin is now.

USAF'S COLLATERAL MISSION

Other crucial elements of US deterrence, and probably the most likely to be tested in future conflicts, are forward-based nuclear and conventional theater forces. The effectiveness of both, in case of sustained engagements, is impaired by limitations in available airlift and jeopardized by increasing Soviet threats to the US Navy's ability to keep the sea-lanes open. The Air Force's collateral mission of supporting the Navy in the sea-control mission thus takes on added urgency. USAF's intrinsic ability to assist in maritime search and identification; electronic warfare; attack against hostile naval surface and air units; and aerial minelaying must be developed fully and rapidly.

AIRLIFT ENHANCEMENT

Full implementation of the Air Force's multifaceted Airlift Enhancement Program, including improvements of the C-141 and C-5 aircraft, and modification of the aircraft of the Civil Reserve Air Fleet (CRAF), must not be delayed further. We also endorse acquisition of the Advanced Tanker/Cargo Aircraft (ATCA) as well as development and eventual acquisition of the Advanced Medium Short Takeoff and landing aircraft (AMST) to modernize tactical airlift in the 1980s.

NEW TACTICAL AIRCRAFT

Nowhere are the erosive effects of declining USAF purchasing power more evident than in the procurement of Air Force aircraft, which plummeted from a Korean War high of more than 8,000 aircraft per year, and an annual rate of more than 1,000 at the peak of the Southeast Asian war, to fewer than 200 for each of the past five years. The FY '77 buy sought by the Air Force is for 239 aircraft, reflecting a modest recouping of lost ground. The Soviet tactical aircraft fleet now exceeds the equivalent US force by some thirty percent. This condition is exacerbated by the increasing offensive capabilities and higher quality of Soviet late-model aircraft, able to perform deep strikes against NATO targets without prior forward deployment. Since 1968, the tactical aircraft of the Warsaw Pact forces (mainly Soviet) available for deployment against NATO have increased by 1,300, to an overall total of about 5,000. The danger, then, is that we soon may lose our qualitative lead while at the same time suffering the consequences of aircraft age creep, obsolescence, and an ever shrinking force structure.

Coming into the Air Force inventory now are aircraft and capabilities of unparalleled scope and versatility, i.e., the F–15, F–16, A–10, EF–111, F–4G Wild Weasel, AWACS, etc. The need is to acquire these weapons in the necessary quantities and on schedule to assure maximum return on these investments. As these aircraft enter the Air Force's active inventory, other, still-capable aircraft, such as the F–4 and the A–7 as well as some production A–10's, must replace obsolescent combat planes in the Air National Guard and Air Force Reserve forces to improve the combat capability of the Total Force.

Tactical combat forces must be trained and exercised under realistic, warlike conditions. Improvement and development of tactical training ranges in accord with relevant Air Force programs are of vital importance to the combat readiness of this nation's tactical airpower.

FOREIGN MILITARY SALES

In this context, the Air Force Association notes with concern the impact on legislative policy of poorly reasoned and doctrinaire opposition to Foreign Military Sales. Judicious export of US weapon systems to allies under the direct control of the appropriate US government agencies is beneficial to the nation in a number of ways. Foreign sales of USAF weapon systems reduce unit costs to the Air Force and sustain the vital defense industry at a time when the profitability of defense business is marginal. Equally important, every efficient weapon system in the arsenal of our allies contributes directly to the Free World's total force strength, fosters equipment standardization, broadens USAF's logistics support base, and thus adds to force readiness.

RESEARCH AND DEVELOPMENT

This Association recognizes the impracticality of matching the Soviet Union aircraft for aircraft and missile for missile. But as the Soviets get bigger and bigger, we must be smarter. US exploitation of defense technology must concentrate on high payoff areas, exemplified by systems that multiply the effectiveness of the existing force, such as AWACS, the NAVSTAR Global Positioning System, and the Space Shuttle. Most important, we must be ready with concepts and technologies that can neutralize the massive Soviet investments. But this will not happen if we let our technology continue to slip. This year USAF's budget allocates only four percent of its total funding to advanced and basic technology programs.

Basic research, combined with exploratory and advanced development, form the bedrock of future US national security years hence. There is a clear need, for example, to pursue vigorously such programs as the X–24C hypersonic research aircraft. Our technological bedrock began to erode in the late 1960s and early 1970s when the USSR pulled ahead of the US in level of effort, a lead she has been permitted to maintain ever since. This imbalance, until recently, was aggravated by the tendency to pay for unforeseen, immediate R&D needs out of funds allocated to maintain the national technology base. Either of these trends represents a mortgaging of the nation's future, primarily in the sense of national defense and survival, secondarily, in terms of lowered productivity and industrial capability and, indirectly, through reduction of the US standard of living.

The level of net effort supporting the military technology base dropped by almost forty percent between FY '67 and FY '75 even though the range of technological options burgeoned during that period. As a result, innovative projects involving higher risks and high payoffs were either canceled or deferred in favor of conservative, low-risk undertakings. Yet during this period the Soviet Union changed her R&D direction toward high-risk, high-payoff areas until now some advanced Soviet programs are beyond the ken of US science and technology, a condition that can be expected to become more prevalent. Of itself, the clearly stated Soviet goal of technological superiority over the US probably represents the single-most ominous external threat this country faces; if the danger is multiplied by our inability to understand the specifics of that threat, and thus the ability to counter it, the consequences become intolerable. Consequently, we categorically oppose the transfer of US and other Free World technologies that expand the USSR's technology base, especially in the areas of guidance systems, high-speed computers, and advanced aircraft engines.

The central need is for a sustained commitment to assure the adequacy of the military technology base over the long pull. We see as a minimum requirement a real, net increase in the overall level of research effort by ten percent per year through FY '80. Continuity of effort at a moderately increasing level is more productive, and far more economical, than spasmodic crash programs, conceived and executed in haste. Neither the national security nor the national economy deserves any less than the RDT&E funding requested in DoD's five-year budget proposal.

AFA POLICY PAPER: DEFENSE MANPOWER ISSUES

(Adopted unanimously by delegates to AFA's Thirtieth Anniversary National Convention, Sept. 20, 1976.)

We sense a pervasive uneasiness among military people who fear erosion of benefits to which they feel they are entitled. More and more men and women of the armed forces question whether the axiom "We take care of our own" is losing its meaning. The threat of piecemeal hacking at the complex system of compensation is cited to justify their concern.

Interest in a military union is a visible manifestation of the current disquiet. We already have expressed our "unalterable opposition to unionization of the military" by calling upon the Administration to "exercise its authority and prohibit it." Our opposition to unionization of the military remains solid.

Yet, we recognize the underlying—and potentially undermining — dissatisfaction which breeds talk of such action. And we believe it must be addressed quickly and fairly by leadership at all levels.

We join the Defense Manpower Commission in its recommendation that military compensation be examined and dealt with as a system. Tampering with it part by part will, in our opinion, only tend to increase apprehension.

Because people in uniform have no firm contractual claims to specific benefits, we endorse the concept of the Defense Manpower Commission's proposed "Bill of Rights" for military people. As the Commission noted, "Removal of real or perceived benefits, regardless of the reason, can and frequently does produce service reactions out of proportion to the savings involved. The Commission believes that a 'Bill of Rights' should be enacted specifying the benefits that accrue from military service. The Bill of Rights would provide that such benefits would only be changed or eliminated prospectively and in the service."

We endorse this concept because we feel it will provide an essential sense of stability for those in the armed services. But we also caution that military life is, by its very nature, unstable. Changes over which no leader has control must be accepted as part of military life. The military profession always has been marked by sacrifice and a sense of cause before self.

We do not question that the lot of the military person is significantly better than it was ten years ago. Indeed, we take great pride in the fact that the Air Force Association was at the fore in achieving a reasonable level of compensation for our citizens in uniform—particularly lower-ranking officers and enlisted people.

But military service is not just another job. Few civilians are called upon to uproot their families involuntarily every few years . . . to endure twenty-four-hour alert duty assignments . . . to work overtime without additional compensation . . . to serve in remote and isolated areas . . . to forfeit certain freedoms and rights . . . to risk injury, personal disability, even death in battle.

One union official has said of today's volunteer force, "People are selecting a military career as a means of livelihood, and not for patriotic reasons."

If this is true, then the nation must reconsider the draft or universal military training.

Today's social and economic environment places a great burden on our military leaders and those they lead. The pinch on the defense budget is severe at a time when it is essential that we modernize our strategic and tactical forces. The increasing portion that manpower costs are taking from the budget cannot be ignored.

This, then, is the twin challenge: To maintain freedom and security through dedicated and selfless efforts by our citizens who serve in our armed forces; and through courageous and articulate leadership that demonstrates a sincere concern for human values.

Against this background, the Air Force Association adopts the following positions:

COMPENSATION

Pending the results of the Quadrennial Review of Military Compensation and other current studies on this subject, we support the present system of military and federal employee compensation.

We oppose a military and federal employee "pay cap" in the fear that such action again will put military and other government people behind the cost-of-living curve.

We support:

Travel reimbursement for dependents of junior enlisted people.

Increased per-diem allowances for enlisted people.

Repeal of the restriction that prohibits enlisted band members from the same off-duty employment opportunities available to all other members of the armed forces.

Variable allowance to equalize compensation for military and civilian people assigned to high cost-of-living areas.

Enlistment and reenlistment bonuses for members of the active force, Air Force Reserve, and Air National Guard.

Tuition assistance for members of the Air Force Reserve, and Air National Guard.

Amendment of the DoD Joint Travel Regulations (JTR) to eliminate discrimination against mobile home owners.

Removal of the tax on reimbursement to military people for the cost of moving their household goods.

Federal employee reimbursement of moving/travel expenses, upon retirement or death, to home-of-record (or equal distance) if the move was for the convenience of the government.

SPECIFIC BENEFITS

Commissaries

While urging improved management to reduce military base commissary store subsidies, we oppose any action that would reduce the benefits of this service to active military people and their dependents, retirees, eligible widows, and disabled veterans.

Medical health care

We support:

A medical health care system that will fully serve the needs of active and retired military people, and their dependents.

Bonuses for military physicians.

Upgrading Air Force Physician and Dental Assistants to at least equal status with their counterparts in the other military services.

Dental care for dependents of all military personnel.

A change in the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), which would provide lifetime coverage for the military retiree; remove current nonavailability certificate requirements; and restore original procedures of determining allowable reimbursements.

Survivors' benefits and insurance

We support amendments to the current Survivors' Benefit Plan (SBP), which would:

Remove the provision requiring a military retiree to continue paying for this coverage for life, even if the designated beneficiary dies.

Remove the provision whereby survivors eligible for Social Security benefits must have their SBP benefits offset by proportion-

ate amounts of their earned Social Security benefits.

Establish a provision that would permit survivors of Reservists and Guardsmen who die before reaching the established retirement age to receive a proportionate amount of the retirement annuity the Reservist or Guardsman would have received at retirement.

We support:

An amendment to the Veterans' Special Life Insurance (VSLI) program which would permit Reservists who are in a nonpay but active status to participate fully in the program.

An amendment to the Federal Employees Group Life Insurance (FEGI) program which would permit federal employees to contribute after retirement, with continued coverage.

The goals of the Air Force Enlisted Men's Widow's and Dependents Home Foundation.

Retirement

We believe that any new nondisability retirement plan must guarantee no reduction in benefits for military and federal employees serving at the time of enactment.

We support:

A new nondisability retirement plan on a reduced annuity basis for Reservists and Guardsmen.

A reduction in the retirement penalty for federal employees under age fifty-five to one percent for each year.

Lump-sum payments immediately upon retirement for those federal employees retiring for disability.

A lifting of the sixty creditable training point ceiling for retirement purposes for Reservists and Guardsmen.

Recomputation to provide equalization of retired pay.

Removal of dual-compensation limitations for retired regular officers.

PERSONNEL POLICIES

We support:

Enactment of the Defense Officer Personnel Management Act (DOPMA).

The Airmen Education and Commissioning Program.

Direct commissioning of qualified enlisted people.

Graduate education for officers, and more efficient use of these graduates.

Award of E–3 rank to Junior ROTC graduates entering the active Air Force, Air Force Reserve, or Air National Guard.

The same tax advantage for federal employees who sell their homes when assigned to overseas duty as that provided military personnel.

Retired pay for federal civilian employees who continue service that is at least equivalent to those who have retired earlier in the same grade and with the same years of service.

A proposal for the testing of rescheduling working hours of federal employees in place of the statutory eight hours per day, five days per week schedule.

We continue to oppose arbitrary end strength restrictions placed upon the civilian manpower structure.

RESERVE OFFICER TRAINING CORPS (ROTC)

In our suport of vigorous and stable Air Force ROTC programs (Junior and Senior), we urge an increase in the number of USAF Junior ROTC units, equitable with that of other services.

COMMUNITY COLLEGE OF THE AIR FORCE

We support the mission of the Community College of the Air Force (CCAF) and its goal of granting Associate Degrees to qualified Air Force enlisted people.

CIVIL AIR PATROL

We support Civil Air Patrol and we favor increasing CAP's capability to perform its search and rescue mission.

SELECTIVE SERVICE

We are alarmed at the virtual dismantling of the Selective Service System. We support a viable system that retains at least the essential elements at federal and state levels, and that can deliver draftees within thirty days.

AMNESTY

We oppose blanket amnesty or pardon for those who unlawfully avoid military service; and we endorse the principle that each case should be examined and adjudicated individually according to existing laws and regulations.

MIAS/POWS
(Southeast Asia)

We urge the government to vigorously pursue its attempt to resolve, as quickly as possible and to the maximum attainable degree, the status of all Americans identified as Missing in Action or Prisoners of War in Southeast Asia. We support and urge a U.S. veto to admission of Vietnam in the United Nations until such accounting has been satisfactorily accomplished.

DISABLED VETERANS

We support:

The tax exemption applied to military disability retired pay.

Continuation of the "sick pay" exclusion from federal income tax, without a reduction based on adjusted gross income, for federal retirees receiving disability retirement benefits.

Passage of legislation allowing disabled veterans, who are retired from the service on a longevity basis, to receive full military pay and VA disability compensation.

ATTORNEY FEES IN IRS CASES

Mr. ALLEN. Mr. President, unfortunately during adjournment some misunderstanding has arisen over the effect of an amendment I offered to the Civil Rights Attorney's Fees Awards Act of 1976, Public Law 94–559. As Senators will recall, during the debate of this measure in the Senate several amendments were proposed which were designed to allow a taxpayer to recover attorney's fees in disputes with the Internal Revenue Service. The Senate eventually adopted an amendment I offered designed to permit a court to award attorney fees to a prevailing taxpayer in a dispute with the Internal Revenue Service regarding the taxpayer's tax liability.

I regret to say that several commentators in reviewing the new law, and in particular in analyzing my amendment, have failed to give it a correct interpretation. I believe the difficulty has occurred in part because of statements inserted in the RECORD by certain Senators after passage of the amendment and after the actual debate regarding the meaning of the amendment had been concluded. Had the inserted statements actually been uttered on the floor, I would have made a point of explaining further the scope of my proposal.

We all know that the individual taxpayer or the small businessman is no match for the IRS and the vast resources of the Tax Division of the Justice Department of the United States. We have all heard countless stories of Internal Revenue Service intransigence, stubbornness, and willingness to expend vast amounts for legal costs in order to force settlement of disputed tax claims. Against that backdrop the Congress did see fit finally to adopt a provision which would help a taxpayer facing the vast array of resources available to the Government, but the provision would only apply if the taxpayer's position were proven correct. The chief object of the provision we adopted is to encourage taxpayers to seek a vindication of their position and to discourage the Government from needlessly litigating disputes for the purpose of forcing settlement notwithstanding the actual merits of the controversy.

My amendment is meant to cover, for example, cases in which a relatively small tax liability is at issue, legal precedent on the subject clearly favors the taxpayer, yet the Government persists in litigating an issue which has been previously resolved or which is fairly obviously going to result in a decision in favor of the taxpayer. In such cases, my amendment will permit a court in its discretion to award attorney fees and costs to a taxpayer who elected to "go to the mat" with the Government rather than to cave-in when faced with the prospect of protracted litigation and substantial attorney fees over an issue involving a relatively small sum. But, Mr. President, the court need not determine that the Government has harassed the taxpayer nor need the court determine that the Government has in some way acted in bad faith. The amendment adopted mentions neither harassment nor bad faith, but for some reason commentators have implied that such conduct would be a necessary precondition to an award of fees to a prevailing taxpayer. No, Mr. President, a court in exercising its discretion should focus rather on the relative resources of the parties and on the perseverance of the taxpayer in vindicating his position.

I believe, Mr. President, that the misunderstanding with respect to the need for harassment or bad faith is a result of the unfortunate RECORD insertions I mentioned earlier. Also I might say that I am not surprised that the issue did become somewhat confused since, during debate of the act in the Senate over some 2 weeks, the Senate conducted 38 rollcall votes and considered 19 different amendments, several of which also related to IRS proceedings.

On September 22, 1976, I offered an amendment to the measure which would have permitted the award of attorney fees and costs only in the event the IRS was shown to have acted against a taxpayer in a frivolous or vexatious fashion. That amendment was clearly designed to require harassment on the part of the Internal Revenue Service before an award of fees and costs could be made to a prevailing taxpayer. But, Mr. President, my first amendment was soundly defeated by a rollcall vote of 47 to 39.

The next day, on September 23, my distinguished colleague, the senior Senator from Arizona, offered another Internal Revenue Service fee award amendment, which was also severely limited in application and which permitted fees and costs only in cases of obvious harassment in which the Internal Revenue Service had conducted a second audit of a taxpayer prior to asserting the tax liability in dispute. This narrow proposal of Senator GOLDWATER's was adopted when

offered as an amendment to the bill itself, but when offered as an amendment to the substitute it was rejected.

Senators will recall that the distinguished assistant majority leader had by that time indicated that the substitute would be the vehicle used by the majority for final passage and therefore amendments to the bill were meaningless while amendments to the substitute were critical. Hence, in effect Senator GOLDWATER's narrow proposal was rejected by the Senate.

As debate continued, several days later, on September 29, I drafted and presented to the Senate a new amendment greatly broadening the scope of the two earlier unsuccessful amendments. My second proposed IRS fee amendment was drafted to permit the award of fees and costs to a prevailing taxpayer entirely at the discretion of the court with no requirement whatsoever that the IRS be shown to have acted frivolously, vexatiously, or in bad faith. I deliberately excluded any reference to those terms so that it would be clear that the matter would rest entirely within the discretion of the court.

Moreover, I inserted the word "proceeding" in my new amendment specifically to include administrative proceedings or audits so that fees and costs in connection with audits or other IRS agency proceedings could be awarded by a court on application of a prevailing taxpayer. I also included the term "proceeding" so that it would be clear that in any case involving a disputed tax, the court would be free to award attorney fees so long as the taxpayer prevailed and the court felt that a fee award was appropriate considering all factors in the case and notwithstanding the formalistic characterization of the taxpayer as plaintiff or defendant or as appellant and appellee.

Incredibly, Mr. President, some commentators have suggested that my amendment would only apply in cases in which the Internal Revenue Service brought an action to recover an alleged overpayment of a tax refund. I find that suggestion ludicrous. Certainly that could not have been in the mind of any Senator here when we adopted my proposal. No, Mr. President, that interpretation of my amendment would make our action meaningless and would require a highly formalistic—indeed, almost 18th century—reading of the words used. Mr. President, the idea is simple, and I believe it was reasonably clearly expressed.

The idea simply is that in any proceeding in which the Government asserts a taxpayer's liability for a tax and the taxpayer asserts that he is not liable for the tax and thereafter prevails, then a court may award fees to the taxpayer as the court sees fit. The form which the action takes is not of consequence. Since all tax disputes boil down to the Government asserting a liability and a taxpayer denying it, the formal position of the two parties is immaterial. The problem my amendment corrects does not relate to procedural formalities; it relates instead to the substantive imbalance in resources available to the Government and to a taxpayer when the two dispute an issue of tax liability. Thus, differing standards with respect to a plaintiff or a defendant, which a court might for policy reasons apply in litigated controversies in other areas of the law, have no proper application in tax disputes.

There is only one kind of tax dispute regardless of who is a named plaintiff or a named defendant, or who is an appellant or an appellee, or who is an auditor or an auditee. A tax dispute is inherently a taxpayer asserting that he is not liable for a tax and the Government insisting that he is. The reasons of public policy which would make proper a discretionary award of fees are thus present or not present in a given tax controversy regardless of the formal position of the parties.

Mr. President, I make these remarks because confusion did arise in the press as to the meaning and impact of my amendment and because I believe my amendment properly interpreted will have far-reaching, beneficial effects on the Government's treatment of small taxpayers and on the present somewhat tarnished public image of the Internal Revenue Service.

AN OPEN LETTER TO PRESIDENT-ELECT CARTER

Mr. GOLDWATER. Mr. President, Vice Adm. Gerald E. Miller, USN, retired, in the December 1976, issue of Armed Forces Journal writes an open letter to President-elect Carter addressing the excessive number of civilians serving in the Office of the Secretary of Defense—OSD—Admiral Miller points out that—

> We have expanded OSD from a modest staff under Secretary Forrestal, which dealt strictly in policy, to an organization embracing more than 2,000 permanent civilian positions, to be paid from funds available to the Secretary of Defense.

He further points out that those positions do not include supporting agencies such as the Joint Chiefs of Staff, Defense Intelligence Agency, and others.

Some 24 flag and general officers serve in deputy or assistant positions to the 26 civilian appointed officials. Then, Admiral Miller says that backing up this array are 181 flag-officer-equivalent civil servants, 37 of whom are of 4-star equivalence.

It is hard to fully comprehend why a civilian force of this size is required, especially when similar-type structure are found in each service.

Many harp continually about the need to reduce the number of flag and general officers. I do not object to that when it can be properly justified, but it seems to me that there should be some paring down in the high-ranking DOD civilian force before any more military reductions are in order.

The new administration has an excellent opportunity to begin by not filling all of these executive-level positions.

Mr. President, I ask unanimous consent that the open letter, an accompanying chart, and a biographical sketch of Admiral Miller be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AN OPEN LETTER TO PRESIDENT-ELECT CARTER

(By Vice Admiral Gerald E. Miller, USN-Ret.)

DEAR MR. CARTER: As you come to the Washington arena to grapple with the bureaucracies and the promises you made to the electorate, the Department of Defense (DoD) is going to occupy much of your time. The pressures for reducing the defense budget will be great and the proponents for reductions, for the large part, will be concentrating on expensive weapons systems such as the B–1 aircraft and the TRIDENT submarine. There will be some suggestions that you reduce manpower and the costs associated therewith. Some will suggest that you get rid of most or all of the admirals and generals.

It is doubtful, however, that you will receive any suggestions that you pare down the number of civilian officials in the Office of the Secretary of Defense who are in fact the real authority in DoD. I suggest that you examine that area as a starter. The salaries involved are incidental. If you got rid of all the admirals, generals, and high-level civilians, you wouldn't save much. It is the bureaucratic support that each official represents and the programs his individual operation generates that represent the real targets for cost reduction. In short, may I suggest that you take a look and see who is in charge?

It may be well to remember that in World War II we had no Secretary of Defense; the Secretaries of Navy and War held cabinet rank and reported directly to the President; and the military heads of the individual services also had direct access to the President. But with the so-called unification of the Armed Services and the creation of the Department of Defense, we began to have some changes.

Coincident with the Korean and Vietnam campaigns, and particularly because of the advent of nuclear weapons, we have experienced ever-increasing pressure for more civilian authority and control over the military. People become frightened at the erroneous idea that the commanding officer of a TRIDENT submarine can blow up the world by deciding independently to launch his boatload of nuclear-tipped missiles. Somehow the idea has developed that if we place enough civilians in the DoD, we can prevent future Koreas, Vietnams, and nuclear destruction.

And so we have experienced a mushrooming of the office of the Secretary of Defense (OSD). According to the FY 77 budget, we have expanded OSD from a modest staff under Secretary Forrestal, which dealt strictly in policy, to an organization embracing more than 2,000 permanent civilian positions, to be paid from funds available to the Secretary of Defense. I emphasize that the positions relate to OSD, not to any of the supporting agencies such as the Joint Chiefs of Staff, the Defense Intelligence Agency, and so on. Those and other Defense agencies have additional top-level management structure, exclusive of OSD.

The composition of leadership in OSD is interesting to note. According to the budget tables, there are a total of 26 executive-level positions, sometimes referred to as civilian appointed officials. I hope you don't replace all of them too rapidly, for their knowledge and sphere of control is considerable. Rapid replacement could be disruptive, although they are supported by a total of 24 flag and general officers from the mili-

tary ranks. However, it is a rare occasion when any of these military gentlemen is in charge of anything. They sit in deputy or assistant positions to the 26 civilian appointed officials, and you know that little authority is vested in an "assistant" or "deputy."

Backing up this interesting array is a group of high-level civil servants. The budget table shows a total of 181 flag officer equivalent civil servants in OSD. Of these, 37 are of four-star equivalence. In passing, I suppose I should mention that there are also 322 civil servants of the captain/colonel equivalent rank. Not included in the above are numerous scientific and professional positions, established under various U.S. Codes. Nor have I touched on all the analytic think tanks such as the RAND Corp., Institute for Defense Analysis, etc., that contribute to the direct support of OSD.

Please don't get the idea that action to eliminate many of these positions would save large sums of money by itself. The budget says that although it takes $2.7 billion to operate and maintain activities and agencies of the Department of Defense, it only takes $79.6 million to administer the immediate office of the Secretary. Over the long haul, however, elimination of some of these positions might create savings through elimination of some of the bureaucratic structures that exist to support them.

A possible alternate to reducing the staff in OSD would be the reduction or elimination of some of the supporting staffs in the individual Services. If we are to have such a large civilian control structure in OSD, maybe we don't need civilian control structures in each Service.

For instance, the budget shows that in the Army, Navy, and Air Force combined, there are a total of 23 executive level (civilian appointed) officials, backed up by a considerable number of military and civilian personnel. Maybe we don't need a Secretary for each Service anymore. If a military chief of a service must take his case to OSD for approval, what capabilities is he lacking that are provided by a civilian secretariat? Maybe there is need for a key civilian research counselor or financial manager, but do we really need a Secretary for each Service now that OSD is so well staffed? Personally, I liked the idea of a civilian Secretary for each Service, but with the escalation of OSD and the transfer of authority to the Secretary of Defense, his two Deputies, and a multitude of Assistants and Deputy Assistants, it is becoming apparent that if you want any action in the Pentagon, you bypass the Service secretariat. Again, you would not save much directly with this alternative in the way of pay and allowances, but you might eventually streamline and improve the decision-making process. That usually has a beneficial effect on the financial health of an organization.

While I'm at it, I might also address the military staffs. Years ago we created a Joint Staff under the Joint Chiefs of Staff. The functions have expanded and the numbers of personnel have increased over the years, with minor exceptions, however, we have never really reduced the functions or roles of the individual Service staffs. They still review every significant proposed action, plan, or thought from an individual Service point of view. Maybe it is time to see if the Joint Staff could be trusted to produce joint solutions to problems dealing with strategy, requirements, policy advice, operations, etc. At least the elimination of such a parochially-oriented review process might provide fewer waffled compromises and more hard guidance for the civilian masters. Maybe this smacks of a general staff concept, which some say is to be avoided at all costs. But perhaps we already have a general staff in the form of civilian appointed officials and don't even know it. I suggest it might be worth looking into.

Perhaps the greatest good that could come from your study of who's in charge in DoD, is a realization that authority in the military profession has been seriously eroded since you wore the Navy Blue. Had you remained in the Navy and progressed to the rank of admiral (any grade), you would have expected considerable authority to go with the responsibility you were handed with your flag officer commission. I believe that you would be surprised at how that authority has evaporated today, under the guise of civilian authority and control, and because of the vacuum created by waffled, compromised counsel provided to the civilian masters as a result of parochial differences within the military.

A young man or woman entering the military today can look forward to a pleasant, rewarding career—up to a point. That point comes when he reaches senior rank, captain/colonel or admiral/general. At the time he expects to be in charge of his profession, he finds the authority in the hands of others. If he really wants to have power and authority in DoD with some significant impact on his own profession, he might better do ten years as a commissioned officer, resign, go to graduate school, get a doctoral degree, and come back to DoD as an Assistant Secretary of Defense. He can reach the goal in fewer years and be more effective.

A serious defense problem you'll face during your administration will be the growing interest and pressure for military unions. Eminent military historians and sociologists have explained how the military profession is in a state of transition from one of "calling" to that of an "occupation." Whereas duty, honor, and country were the key words, we now find them being replaced by expectations of an eight-hour workday, equal rights under the Bill of Rights, and a union to negotiate with management. Most old pros are against the concept of military unions, but the evidence is mounting. We will have to come to grips with the problem, sooner or later. The American Federation of Government Employees will be interesting to watch as it expands its interest in the military.

It is obvious to the military professional that he should not need a union to negotiate for him. That is the responsibility of the leaders of the military profession. But those leaders must have authority. They must be perceived by members of the profession as being the voice of the profession—the fighters for the safety, morale, and general welfare of those in their charge. That is not a function or responsibility of the civil authority.

If you study the command structure of the Pentagon and you decide as the Commander-in-Chief that more authority should be restored to the military professional, you may have taken a long step towards heading off the union problem. And you might save some money as well.

So I'm suggesting that you study DoD and find out who is in charge. If you can determine the answer to that question, you will probably be well on the road to building a better defense for the United States, at less cost. Our record with such expanded civilian authority and control is not particularly impressive. Maybe we overdid it.

May the wisdom of our forefathers guide you in the most difficult task of preserving the proper division of power, among the many competent seekers of that power. Your task won't be easy—but you wouldn't have wanted it any other way, I'm sure.

DEFENSE AGENCIES

Consolidated schedule of permanent positions paid from funds available to the office of the Secretary of Defense

BIOGRAPHICAL SKETCH

Vice Admiral Gerald E. (Jerry) Miller, USN-Ret, served in cruisers in the Pacific in WW II, commanded a jet fighter squadron in Korea and a carrier division in Vietnam. He commanded the Second Fleet in the Atlantic and Sixth Fleet in the Mediterranean. Admiral Miller served 10 years in the Pentagon, and two tours at Strategic Air Command headquarters in Omaha, targeting nuclear weapons. He is currently a private consultant to government and business.

FEDERAL PAPERWORK

Mr. McINTYRE. Mr. President, on November 18 and 19 of last year the Commission on Federal Paperwork, on which I serve as cochairman, held hearings in Miami, Fla.

These hearings are part of the continuing work by the Commission to try to deal with this overwhelming problem.

Mr. President, I ask unanimous consent that an editorial concerning these hearings from the November 18 Miami Herald be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

AND PAPERWORK THAT WILL NOT QUIT

One of the better shows opening this week in Miami will have only a two-day run, but the public should enjoy it thoroughly. It pays to enjoy this one.

The Commission on Federal Paperwork will hold hearings today and Friday at the new Howard Johnson Hotel in Dupont Plaza, taking testimony on expensive and excessive red tape involved in the fields of Medicare, welfare, pension programs and equal employment opportunity. We predict there will be enough evidence to qualify this as a horror show.

The cost of federal paperwork is estimated at $40 billion a year and there is testimony already before the commission that at least 30 per cent of that amount could be saved by getting rid of needless forms. The favorite example is the paperwork that must be done by the estimated 200,000 citizens who make wine at home. More serious is the entanglement of applications and files involved in the administration of 41 separate welfare agencies. A minimum of $6 billion a year could be saved if that paper mess could be cleared up.

One of the wise decisions made by Congress in the establishment of this paperwork commission was to mandate that it go out of business in two years, with one year additional for review of compliance with its recommendations. The commissioners agree with this wisdom, Chairman Frank Horton noting that the purpose of it all is to demonstrate that the finest programs devised by Congress can't have a hope of achieving their purpose if they become entangled in red tape.

In addition to saluting the fine high purpose of the commission, we want to note that its own trumpeting of achievements in the just concluded first year was held to only three pieces of paper eight by 10 inches. And both sides of the paper were used.

We have seen press releases from most federal agencies and commissions that run 20 pages and say nothing of value to the taxpayers who footed the bills.

OIL TANKER INCIDENTS

Mr. MUSKIE. Mr. President, we are all aware, I am sure, of the many recent incidents along our coast involving oil tankers, incidents with results varying from the inestimably disastrous, as with the *Argo Merchant* off Nantucket, to narrow escapes in the Delaware River. These events have created a renewed and heightened concern by the public and the Congress that we act promptly and meaningfully to deal with the problem.

I was happy to be able to contribute my thoughts regarding our approach to these problems in a hearing of the Administrative Practices Subcommittee chaired by Senator KENNEDY immediately after the *Argo* tragedy. I would like to share the statement I made at that time with my colleagues and request unanimous consent that it be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

REMARKS BY SENATOR MUSKIE

Thank you Mr. Chairman for the opportunity to add my comments to the proceedings here today.

I congratulate you for your prompt action in scheduling this hearing to review the capabilities and actions of the federal government in responding to the tragic oil spill off Nantucket, which threatens to despoil the beaches and waters of both our states and to disrupt and destroy our marine resources to an as yet undetermined extent. The immediate consequences of this disaster can be seen in the oil soaked gulls and ducks struggling to shore and in the traces of oil already appearing on some beaches. But we may never fully appreciate the long range consequences of the tons of oil globules sinking into some of the richest fishing grounds in the Atlantic to continue mixing for the foreseeable future with the basic microscopic nutrients vital to marine life. This toxic mixture may pose the greatest threat to Maine fishermen from the long range damage to herring spawning grounds.

It is difficult in the midst of massive disaster such as this to chart a reliable course out of the immediate confusion and difficulties in a direction which will avoid future reoccurrences but it appears to me that we need to explore four basic approaches.

1. We have to assure that the full resources of federal, state and local governments are brought to bear on the immediate problem of limiting the extent of the disaster.

2. An immediate investigation should be conducted to determine the direct consequences of the spill to our fishing industry and to our coastal communities to assess the potential damage and identify the need for assistance.

3. We should launch a long range intensive study of the total consequences of this type of spill on maritime ecosystems to help us as we continue to shape energy policy which will necessarily involve difficult judgments about the risks of oil spills and discharges into our oceans.

4. We should recognize the inadequacy of present international regulation and proceed to establish U.S. jurisdiction over pollution in the area of most direct concern to the United States—the 200 mile zone off our shores. And make clear to polluters that they will be held accountable for their activities within that zone.

This tragedy occurring 28 miles off our shores dramatically affects our interests and demonstrates again the inadequacy of limiting our attentions to the contiguous zone from 3 to 12 miles. It exposes the need for an adequate Law of the Sea Treaty which recognizes that pollution control is as vital an area of international concern as navigation and economic exploitation. And the failure of the Law of the Sea Negotiations to seriously consider pollution control suggests that we in the United States should proceed to establish our own pollution control zone beyond the twelve mile contiguous zone to protect our vital coastal interests and hopefully stimulate international actions addressing the global aspects of this problem.

In that regard I introduced, in March of 1975, a bill to amend the Federal Water Pollution Control Act Amendments of 1972, and the Ports and Waterways Safety Act of 1972, to extend U.S. vessel pollution control of jurisdiction 200 miles from shore.

The Federal Water Pollution Control Act Amendment of 1972 and the Ports and Waterways Safety Act of 1972 affirm our country's jurisdiction over pollution from vessels in our territorial seas, which presently extend 3 miles to 12 from our coastline.

The Ports and Waterways Safety Act mandates the Secretary of Transportation to promulgate design and construction standards with which all vessels of certain cargoes must comply for the purposes of reducing the pollution of our territorial seas and our coastline.

The Federal Water Pollution Control Act gives the Administrator of the Environmental Protection Agency authority to establish liability and penalty limits for discharges of oil and hazardous substances into the navigable waters of the United States. It also gives the Environmental Protection Agency authority to establish standards of performance for vessels to control the discharge of sewage into the navigable waters of the United States.

The bill which I introduced would extend these same jurisdictions to a limit of 200 miles. It would continue to require the Secretary of Transportation to promulgate regulations to achieve the objectives of the Ports and Waterways Safety Act, and it would require the Administrator of the Environmental Protection Agency to set limits of liability for discharges of oil and hazardous substances and standards of performance controlling the discharge of sewage from vessels in the 200 mile zone, just as he presently has that responsibility out to the 3–12 mile limit under the Federal Water Pollution Control Act.

It is ironic that at the international level, we are still applying 19th century navigational standards and cargo safety principles to the 20th century maritime industry with its massive tankers and ultra hazardous cargoes. The technology to achieve improved control is available and we can rapidly improve navigation and cargo safety practices in the maritime trade to the high standards we have applied to airborne commerce if we recognize the urgency of the need and make a real commitment.

Pollution of our coastal waters, our coastline, and the oceans from myriad sources continues at an accelerated rate. There is no need to detail the increasing threat that oil pollution from vessels poses to the marine coastal environments of this Nation. The significance of this threat is underscored by a study of the National Oceanic and Atmospheric Administration which recently found that "oil globules—in massive proportions infect nearly 700,000 square miles of blue water from Cape Cod to the Carribean Sea".

The spill you are examining today will add thousands of tons of additional oil globules to that grim scene on our sea beds. The waters surrounding the United States and the U.S. coastline continue to be polluted by discharges of oil, hazardous substances, and sewage from vessels, creating substantial hazards to the resources of the marine and coastal environments including fish, shellfish, wildlife, marine and coastal ecosystems, and recreation and scenic values.

The spill off Nantucket is less than one week old but it is already a matter of history and we will never be able to fully exert the consequences. I encourage the Coast Guard and other involved agencies to continue their efforts to control the dispersion of this oil and encourage them to proceed with all their vigor. No resource should be spared in mitigating the damage.

Our next real task now is to launch an immediate intensive study of the oil discharged from the ARGO, to trace its dispersion, evaluate its immediate and potential

interaction with sea water and try to anticipate the impact of the spill on the marine life and coast lines in the area. Our fishermen and coastal residents have an immediate interest in knowing to what extent a spill of these proportions will disrupt their day to day fishing activities. We have reports already of some vessels and gear encountering problems with the slick and shellfish smeared with viscous oil which has settled to the bottom, but we know far too little about the varying reactions of different marine life forms and know far too little about the character of the spill to give our fishermen adequate advise or reassurances as to the immediate future of their industry or to determine what type of assistance might be appropriate. Our coastal communities likewise are anxious about the potential damage to beaches and coastal marine activities. We have an obligation to provide the best possible information to both those groups, and that clearly requires a commitment of resources by the federal government through the Coast Guard, Environmental Protection Agency and the National Oceanic and Atmospheric administration.

Along with an intensive evaluation of the immediate consequences for our fishing industry and coastal communities we should seize this occasion to conduct an intensive study of the long range ecological consequences of this type of spill on marine life systems. The spill from the ARGO is now the largest in United States history but our growing dependence on oil tankers and the general inadequacy of regulation in their tanker transport industry suggest that it may not hold that dubious distinction for long. The debate over controls will be given new impetus by this disaster but unless we gain from this occurrence a more solid understanding of the total consequences of oil spills in our oceans that debate may flounder without achieving a consensus for meaningful actions.

The Coast Guard, EPA and NOAA should commit all available resources to this task and be prepared to advise Congress of additional resources which might be necessary in this undertaking.

I have today written to EPA Administrator Russell Train, to request that this process be commenced immediately. A copy of that letter is attached for the record.

The appropriate total response to avoid future occurrences needs greater definition but it seems clear that we have to exert jurisdiction over the areas of greatest potential harm to our coastal interests and that is perhaps best defined as our continental shelf or for simplicity a 200 mile coastal zone. We have to make clear immediately to those who dispoil our waters in this area that they will be held accountable for the full extent of damages to all the interests concerned. I believe the 200 mile pollution control legislation which I introduced in the last Congress gives us this necessary first step.

The legislations did not gain broad support in the last Congress, but I will be introducing a similar bill in the 95th Congress and expect that incidents such as the spill we now face will add impetus to the review and enactment of this proposal. I urge you to join me in supporting that legislation.

REFORMING AIRLINE REGULATION

Mr. KENNEDY. Mr. President, the Federal Government is shortchanging our Nation's air travelers and airlines. By rigidly setting the prices of airline tickets and by preventing new and existing firms from offering additional air service at lower prices, Federal airline regulation forces existing airline firms to compete with each other in wasteful, costly, and uneconomic ways. Instead of competing in price, airlines compete in service—more food, more drink, more frills, and more flights. While prices are skyhigh, airline profits are sometimes at rock bottom. Meanwhile, the notion that regulation is responsible for providing air service to some small communities that otherwise would not receive service has been shown to be a myth. Rigid regulation seems to inhibit—not encourage—efficient service to small communities. The fact is that airlines in California and Texas—who operate free of Federal regulation—provide air service at prices 30 to 60 percent lower than CAB regulated carriers, and they serve large and small communities with modern jet equipment, convenient scheduling, and unblemished safety records.

The agency responsible for Federal airline regulation is fortunate to have as its chairman an enlightened public servant who recognizes that Federal regulation must be drastically reduced if we are to keep air fares low and provide airlines with the profits needed to provide service, purchase equipment, and employ 300,000 people. John E. Robson, Chairman of the Civil Aeronautics Board, lucidly presented the case for less regulation in a recent article in the New York Times. I would urge my colleagues to read Chairman Robson's remarks and ask unanimous consent that they be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

ON AIRLINE REGULATION

(By John E. Robson)

WASHINGTON.—Defenders of current aviation regulation warn of a "naive and dangerous" idea: reforming the 1938 Federal regulatory laws to make air transportation more competitive.

The reforms contemplate fewer restrictions against entering the airline business and more freedom to lower or raise fares and expand or contract service. They are embodied in legislation supported by President Ford, Congressional aviation leaders of both parties and the Civil Aeronautics Board.

Because airline fares have historically risen less than the consumer price index, opponents of reform argue that fares cannot be considered "too high." In the highly competitive electronics business, a technological revolution made hand-held calculators available to the consumers at a fraction of their introductory price. In 1959, jet aircraft brought a technological revolution to the airlines. Yet from 1958 to 1966—while airlines enjoyed spectacular operating-cost savings and the consumer-price index inched up at an annual average barely over 1 percent—regulated airline fares were basically static. Even the historically favorable comparison to the general price index has recently disappeared, despite airline complaints that the C.A.B. unconsciously suppresses fare levels.

If airlines fly fewer empty seats, fares can be lowered or stabilized. Yet, even during the dramatic airline-passenger growth of 1960–1970, "load factors" declined. ("Load factor" is the percentage of seats flown occupied by passengers.) The reason was that the airlines went on an overscheduling binge, mounting many more flights than were needed to handle the traffic.

Indeed, a pernicious airline tendency under current regulation is to compete by trying to outfly or out-gimmick the other guys instead of beating their basic price.

There is a dizzying variety of "discount" air fares, customarily restricted to particular markets or time periods and by other conditions. But no Federally regulated scheduled airline ever sought to reduce regular coach fares throughout its route system.

Under the existing regulatory structure, a limited number of airlines are authorized to fly each route and price cutters can't jump it. So incumbent airlines have little incentive for basic price competition. Instead, they compete with more flights or other enticements. Too many flights and "freebies" raise costs and, ultimately, fares. One airline official called the current New York-to-Florida airline war being waged with complimentary lox, bagels, drinks and movies a "giveaway scramble" that will "be passed on to the customer."

But there are notable examples outside the Federally regulated scheduled air system where carriers provide excellent, low-fare service and can make money at it.

In a genuinely competitive system, limited instances of short-run over-capacity might occur. But, in the long run, the efficient carriers will set the competitive benchmarks and no airline could long afford wasteful forms of competition. To argue, as some deregulation opponents do, that airlines would pursue long-term self-destructive competitive practices seems a most damning assessment of the industry.

Defenders of the status quo claim that America's air system would wither without Federal regulation. What built and sustains our air system is not regulation but the tremendous demand for air travel in a geographically immense, affluent, travel-minded nation. The C.A.B. doesn't make people buy airline tickets. And reducing C.A.B. regulation would not curb either the public's appetite for air travel or the airlines' motive to furnish it.

In recent years the financial bloom has been off the airline industry's rose. And, during the last quarter-century the airlines earned the currently authorized return on investment only three times. With their subpar historical earnings record and a need for greatly improved future earnings if they hope to attract adequate capital, one wonders why the airlines cling so doggedly to the old regulatory regime.

The regulatory laws were passed in 1938 when air transportation was an infant industry. It is now mature. And many see the airlines' future economic environment as much less salubrious than the past: more modest traffic growth, rapidly rising costs and limited productivity gains. These changes require changes in the regulatory system.

Advocates of a more competition-oriented regulatory system have not promised magic. We maintain that, in the long term, it should foster a more efficient air-transportation system that can be reflected in fare levels, can stimulate growth, can enable airlines to attain more consistent profitability, and meet the demands of the flying public.

Admittedly, the transition from the present protective regulatory system to a more competitive one poses uncertainties for the airlines. Nonetheless, the potential benefits seem strongly to warrant the change. It is relevant that, following the Northeast railroads' financial collapse, Federal rail regulation was relaxed to stimulate a more competitive climate.

JENNINGS RANDOLPH

Mr. JAVITS. Mr. President, I understand that certain undocumented charges had been made against my good friend and colleague, JENNINGS RANDOLPH from West Virginia in a criminal trial in

Mississippi. There never was any suggestion in the trial that Senator RANDOLPH was involved in any way in that particular case nor was there any further substantiation of the statements made about Senator RANDOLPH during the course of the trial.

On the contrary, the Legislative Audit Committee of Mississippi and the attorney general of the State of Mississippi who were jointly responsible for the investigation which led to the embezzlement conviction made clear that they had traced all of the embezzled funds involved and that there was no evidence implicating anyone else.

But I feel it is my public duty to speak of the character of Senator RANDOLPH. I have worked with JENNINGS RANDOLPH for many years on the Labor and Public Welfare Committee and also have had close contact with him in his capacity as chairman of the Senate Public Works Committee. In both areas I have found him to be a man of high integrity and character and with a foreground and life-long concern for the social and human values of the people of his State and Nation. I do not believe that Senator RANDOLPH's career needs to be defended by anyone as his record is so distinguished, but for my friend I feel compelled to speak.

PROSPECTIVE NOMINATION OF CYRUS VANCE TO BE SECRETARY OF STATE

Mr. SPARKMAN. Mr. President, on January 11, the Foreign Relations Committee conducted a public hearing on the prospective nomination of the Honorable Cyrus Vance to be Secretary of State.

Mr. Vance had no prepared statement, but his extemporaneous answer to the first question put to him by the distinguished Senator from Idaho (Mr. CHURCH) was so eloquent that it might well have served as a prepared statement. I shall ask unanimous consent that the text, taken from the transcript of the Foreign Relations Committee, be printed in the RECORD at the conclusion of these remarks.

I should also say that the complete hearings will be available in printed form to Senators and the public next week.

Finally, I want to note that this morning in public session the committee voted 15 to 0 to report the nomination of Mr. Vance, when received. I hope that the Senate will act propmtly on that nomination when it is received.

Mr. President, I ask unanimous consent that the text from the transcript be printed in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

Senator CHURCH. Mr. Vance, we have just come through an election campaign in which there was a lively debate on foreign policy matters. I think as a result of the election there is the expectation that the new President will be initiating changes in American foreign policy.

I wonder if you might headline for the committee what you think some of those changes may be, and what your own view may be respecting that.

STATEMENT OF CYRUS VANCE, NOMINATED TO BE SECRETARY OF STATE OF THE UNITED STATES OF AMERICA

Mr. VANCE. Thank you very much, Senator Church. I would be very happy to do that.

First, let me start by briefly sketching what I would consider to be the fundamental policy principles which one could expect to guide the development of foreign policy during the next administration.

Let me say that in doing this I run the risk of vastly over-simplifying the problem. But with that caveat at the outset, let my try.

The first principle is the maintenance of peace. This depends upon healthy alliances, American strength, creative efforts to facilitate the resolution of regional disputes, as, for example, the problems of the Middle East. In this connection I think we must remember that American strength and leadership abroad proceed first from a strong America at home—strong in our economy, strong in our cohesiveness, strong in our confidence and our commitment to fundamental values.

The second principle is a public confidence in our foreign policy requires confidence in how those policies are made. This, in my judgment, has at the heart of it a close and cooperative relationship between the Executive Branch and the Legislative Branch. I do not believe that we can develop or properly implement American foreign policy without the closest cooperation between these two branches of the government.

I pledge myself and this administration to that end.

Next, I believe that we must have openness, and toward that end all that can properly be disclosed in open sessions should be disclosed in open sessions. There will obviously be times when things cannot be, but the guiding principle will be that we will try and be as open as possible. I know that the President-elect intends to communicate openly with the American people through the process of fireside chats in discussing foreign policy as well as domestic policy.

I intend to meet once a month with the press, if not more often because of special circumstances, and hold a press conference to discuss with them whatever questions they may have.

The third principle is the need for clear, easily understood, substantive priorities that will contribute to building the world that we want to live in. I have four particularly in mind.

First is a strengthening of cooperation among our allies. This is central to everything else.

Second, East-West relations are critical because they affect the question of world peace. In my judgment we should pursue the lessening of tensions with the Soviet Union in an active and aggressive way, particularly in th area of the reduction and control of nuclear weapons.

Further, I believe that we should seek a clearer understanding between the U.S. and the Soviet Union on the meaning of détente so that we understand better how each of us perceives the process to operate. I think this is possible and can be done. In saying this, I do not believe that we will not continue to have political competition. I think indeed that we will have political competition with the Soviet Union. But I do think it is important to have a better understanding of what the ground rules are and what we can expect of each other.

Let me note that I do not think that the preoccupation with these vitally important issues should so dominate our foreign policy that we neglect other critical issues which are growing increasingly important.

Let me turn to them.

These I consider to be of cardinal importance: I believe we must keep our eyes fixed on long-term objectives as well as on immediate political crises. These long-term objectives include control of nuclear arms and nuclear proliferation, economic development and the dignity of the developing world, energy, food, population, environment, and conventional arms transfers.

These are the global issues which will determine how the next generation lives, and even whether it lives.

I note, as all of you know better than I, that foreign policy is increasingly intertwined with economic policy. These sets of intertwined issues in my judgment are going to be some of the most important and complex issues with which we will be dealing in the years ahead. Indeed, I believe as we look over the next five to ten years, we may find that these issues will be replacing many of the security issues which have so dominated the foreign policy agenda in the last ten or twenty years as the most important issues with which we have to deal.

Finally, we must have policies based upon fundamental values. In particular, we must stand for human rights. Without being interventionist I believe we can make this concern a major focus of our foreign policy calculations.

I apologize for the condensation of these many and complex problems. But perhaps this will serve as a basis from which to start our discussion.

LETTERS OF PROTEST TO THE FRENCH AMBASSADOR

Mr. CRANSTON. Mr. President, I ask unanimous consent that a statement of Senator HASKELL and attachments be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR FLOYD K. HASKELL

LETTER OF PROTEST TO THE FRENCH AMBASSADOR

Mr. HASKELL. Mr. President, like countless other Americans and people throughout the world, I felt a deep sense of outrage at the decision of French authorities to release suspected Black September terrorist Abu Daoud from custody. Daoud is accused of masterminding the massacre of 11 Israeli athletes at the 1972 Munich Olympic games, an incident in which a total of 17 persons were killed. Decency demands that Daoud stand trial for his alleged role in that act of barbarism. Instead he is a free man in Algeria, transported there first-class with the complicity of the French government.

I am proud that President-elect Carter and Secretary of State Kissinger publicly expressed their strong disapproval of the French action, and that a formal diplomatic protest was lodged. I felt compelled, however, to convey my own dismay regarding Daoud's release directly to the French Ambassador to the United States. I am grateful that 43 of my colleagues in the Senate have joined me in signing the letter, and am also honored that four Members of the House indicated their desire to sign the letter.

The Congress of the United States has made its point strongly and succinctly by conveying to the French the disgust which a great many Members feel at the decision to capitulate to political pressures and terrorist threats. My hope is that such a shameful incident will not recur.

Too many people have already suffered and died at the hands of ruthless political terrorists. Yet those individuals and organizations which resort to terrorism in pursuit of political ends can only take renewed encouragement from the French action.

I can only hope that we in the Congress and the executive branch will redouble our

own efforts to combat terrorism as a result of this outragous and disgraceful action.

Mr. President, I ask unanimous consent that the text of the letter to the French Ambassador be printed in the RECORD along with two editorials from the Washington Post and the New York Times.

U.S. SENATE,
Washington, D.C., January 12, 1977.

His Excellency M. JACQUES KOSCIUSKO-MORIZET,
Ambassador of France, Office of the Embassy, Washington, D.C.

DEAR MR. AMBASSADOR: We deplore and deeply regret the decision of French authorities to release Abu Daoud from custody and allow his departure to Algeria.

Abu Daoud is strongly suspected of masterminding the massacre of eleven Israeli athletes participating in the 1972 Olympic games in Munich. A total of seventeen human beings were killed in that savage act. Abu Daoud should stand trial for his alleged role to their slaughter.

All governments, moreover, must cooperate in a genuine effort to expunge the scourge of political terrorism from the world. All too many people from many countries have suffered and died at the hands of ruthless political terrorists. The release of Abu Daoud can only mean renewed encouragement to those individuals and organizations which resort to terrorism in pursuit of political ends.

We trust you will convey our very deep dissatisfaction and dismay at this action to your government.

Sincerely,

Floyd K. Haskell, Hubert H. Humphrey, Clifford P. Case, Jacob K. Javits, Abraham Ribicoff, William Proxmire, Richard Stone, Birch Bayh, Jim Sasser, H. John Heinz, III, Lee Metcalf, Dale Bumpers, Edmund S. Muskie, Henry M. Jackson, Adlai E. Stevenson, III, Howard W. Cannon, John L. McClellan, Dennis DeConcini, John Melcher, Harrison A. Williams, Jr., Robert P. Griffin, Howard Metzenbaum, Thomas Eagleton, Dewey Bartlett, Wendell Anderson, William D. Hathaway, Wendell H. Ford, Richard S. Schweiker, Gaylord Nelson, Gary Hart, John Danforth, Alan Cranston, Walter D. Huddleston, Frank Church, Edward M. Kennedy, John H. Chafee, Daniel Patrick Moynihan, S. I. Hayakawa, Joseph R. Biden, Lloyd Bentsen, Russell B. Long, J. Bennett Johnston, Bob Packwood, Strom Thurmond.
U.S. Senators.

Jonathan Bingham, Dante Fascell, Abner J. Mikva, Sidney R. Yates,
Members of Congress.

[From the Washington Post, Jan. 11, 1977]

LA BELLE FRANCE

Abu Daoud, alleged leader of the Munich Olympic massacre, is in Algeria today, courtesy of the government of France. He had slipped into Paris last week to attend a slain colleague's funeral. French officials knew exactly who he was, he was even received at the Foreign Ministry. They admitted him out of the familiar considerations which led France some years ago to mortgage its foreign policy to Arab oil and Arab markets—no matter that the actual fruits of this bootlicking policy are nonexistent. In fact, it was only by inadvertence that Mr. Daoud was even briefly inconvenienced. A "Black September" colleague, the mysterious "Carlos" had murdered two officers of a French police branch in 1975 and the branch, tipped off by the Israelis, thought Mr. Daoud was fair game under the law. He was arrested. Within a few days the French government, moving with a haste that preempted German and Israeli extradition requests, arranged for a court to let him go free.

The wonder is not that a suspected terrorist was sent off to plan who knows what other crimes—oh, how the French will pine if the future victims are Israelis. (One past victim of Mr. Daoud's organization was the American ambassador in Khartoum; he was killed while being held hostage against the release of Mr. Daoud from a previous incarceration, in Jordan in 1973). The wonder is that he was arrested and held at all. As it was, the Arabs had only to crook a finger at this formerly self-respecting nation, one which in its Gaullist years had elevated sovereignty virtually to a religion, to induce it to consummate its own humiliation. France wished to avoid complicating its relations with its Arab friends. It also wished to slough off the burden of holding a prisoner whose comrades might be tempted to take additional hostages to free him. All this seemed more important to Paris than acting with dignity.

Say what you will of the French government—it is not easily shamed. Counterattacking against the criticism it expected to receive (and is receiving) for releasing Mr. Daoud, it suggests that Israel had a suspect motive in wanting him arrested and publicly tried. That motive was not simply to combat terrorism, the French suggest, but to tar all Palestinians with a terrorist brush and thereby to blunt the building pressures to seat the Palestinians at a Geneva peace conference. The suggestion overlooks, however, the larger reality that there is nothing contradictory—indeed, there is much that is consistent—between fighting terrorism and searching for peace. France may have opted out of both activities. There is little reason to think it will be sorely missed.

[From the New York Times, Jan. 11, 1977]

THE FRENCH ABJECTION

Three things stand out from the fog of extradition legalisms swirling in Paris concerning Abu Daoud, a Palestinian accused of planning the terror killings of Israeli athletes at the Olympic Games in Munich in September 1972.

1. He is clearly a leader in the Palestinian terror movement. He once admitted, on television, to a role in the Munich massacre. His release from prison in Jordan in 1973 was important enough to that movement to generate the terrorist attack in which the American Ambassador to the Sudan was killed.

2. He was released yesterday, and with confounding haste. Both Israel and West Germany sought to extradite him for prosecution. French law would have permitted his detention for 18 days pending perfection of the extradition requests. Yet after a hearing yesterday, he was rushed to a first-class seat on a plane bound for Algeria.

3. Especially recently, the French Government has taken an increasingly hard line concerning terrorists. It acted decisively and sternly against Croatian hijackers of an American plane last year. It recently agreed to a Common Market accord on extradition of terrorists. It has advocated severe anti-terror measures.

Laws concerning extradition are often subjective, government policy often can and should affect judicial views. So the detached or legalistic explanations so far offered can hardly explain these dismaying contradictions. Without more, the French Government leaves a sad but unmistakable impression—of a great nation willing to look foolish, abject, even cowardly, at the thought of blackmail by terror.

SENATOR PELL INFLUENTIAL IN HIGHER EDUCATION

Mr. KENNEDY. Mr. President, during the 94th Congress and now in the 95th, Senator CLAIBORNE PELL, chairman of the Senate Subcommittee on Education, has handled, and will continue to handle, the complex legislation dealing with our Nation's schools and universities. Education is not a subject that receives a great deal of public attention and when it does, that attention is usually focused on the negative aspects of the field.

However, there is no field that Federal law covers that is as important to our Nation in the long run, and that makes the efforts of the Subcommittee on Education in the area extremely important. Not only does the subcommittee's work concern the millions of students studying today, but it directly concerns the future of our country.

I want to praise Senator PELL for his leadership in the field of education, for his unswerving drive to provide educational opportunity to every student, and for his dedication to improve the quality of our educational system. With his quiet manner, directness, and integrity, he has set the course for education legislation since 1969 and his hard work has often been the key element in arriving at the laws we have produced.

I ask unanimous consent to have printed in the RECORD an article from Change magazine which illuminates the distinguished Senator from Rhode Island. It relates the strong work he did last year and the year before regarding higher and vocational education.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SPEAK SOFTLY AND CARRY A SMALL STATE

(By C. Fraser Smith)

Claiborne DeBorda Pell of Rhode Island has made self-effacement the touchstone of his style in the United States Senate. With a calculated grip on obscurity, the quiet and gracious millionaire from Newport has sponsored landmark legislation in a variety of fields. In an institution famous for high profiles and concrete issues, the modest Pell succeeds with programs that sometimes seem frothy and abstract. And he stands apart from, though not above, the politics of touch and whisper. Partly as a result of his style and interests, he is perceived as a man of certain limitations and eccentricities. But one suspects he has cultivated those perceptions and turned them to his advantage.

Last year, the 57-year-old Pell was voted one of the 44 most influential people in American higher education, the result of his work on the Senate Subcommittee on Education. He succeeded Wayne Morse as its chairman in 1969, and three years later produced the Basic Educational Opportunity Grant (BEOG) program, widely regarded as one of the most important pieces of education legislation since the Morrill Act of 1862. He is also the original Senate sponsor of the Sea Grant College Act (which provided funds for research in marine biology, pollution of the world's oceans, and aquaculture), and of the 1966 law establishing endowments for the arts and humanities. In 1974 he cosponsored modifications in the Family Educational Rights and Privacy Act, the so-called "Buckley Amendment." Working jointly with Senator James L. Buckley, Pell helped to amend the amendment in response to severe criticism from colleges and universities of the original law—which gave students access to their education records.

Somewhat awkward, somewhat enigmatic, and more than somewhat wealthy (his forebears once owned much of Westchester County and the Bronx, and one of his grandmothers became, in 1903, sole heir to the P. Lorillard tobacco fortune), Claiborne Pell

has been content to see the spotlight fall on others. That has been one of the luxuries of his life, and it has given him latitude to pursue objectives that call for discretion. His chief interest is undeniably foreign affairs (he is on the Foreign Relations Committee), but he also thinks of himself as a "far thinker," a futurist and planner. In the mid-sixties, for example, his book, Megalopolis Unbound, helped to put the need for high-speed rail service on the legislative agenda. And he has been pushing for 12 years to move the United States to the metric system—an effort that resulted this year in a law providing funds for gradual conversion.

"There is in our society and in the very structure of our democratic system of government a strong bias against thinking, planning, and adopting policies that look ahead more than three or four years," Pell says. But he has survived that bias not only in the Senate but three times at the polls in Rhode Island. Charming and unassuming, he has also been able to overcome the presumed reaction against wealth and privilege in an overwhelmingly blue-collar state. By appearing to be something of a babe-in-the-woods, he has escaped much of the opprobrium traditionally associated with his occupation, although he is probably a better politician than anyone gives him credit for—a perception that meets his needs well.

Indeed, there is a genuine folklore chronicling his fumbling encounters with the real world that pictures him as a man who seems to be visiting from a different planet discovering, as he did inadvertently last fall, that the World Series is an event involving two *baseball* teams. "I never watch football on TV," he told a political reporter who had enlisted him in a prayer for the Boston Red Sox.

During an earlier campaign he was caught unprepared in a downpour. Word went out that the candidate needed a pair of rubbers. An aide purchased and delivered them. "Where did you get these?" Pell inquired. "Thom McAn's," was the reply. At day's end, the millionaire peeled off the rubbers, handed them to the aide, and said politely, "Give these back to Tom and thank him very much."

Some who have heard such stories without knowing the man have labeled him a blue-blooded lightweight. But colleagues and friends say he is a man of worrying intelligence, tireless determination, and visceral independence who can be forgiven his foibles on the grounds that he is involved with matters of greater import than galoshes. Some may think this is a case of the senator's new clothes, but his record, which must be the final arbiter, speaks for itself.

In a recent interview in his Capitol office below the Senate floor, Pell offered a politician's explanation for the eroding stature of education as a priority in the Congress. It is not, he seemed to think, a matter of leadership. His bill on basic opportunity, and the bills of his predecessor, Senator Morse, are proof that leaders are available when needed. "Education has slipped a little bit from the political viewpoint," he says, "because people are disappointed in it. They find no direct relationship between college and a job, particularly in this period of unemployment. They had the idea that with education you could unlock the door to paradise. They have not yet learned that education doesn't always do this—or that it can make life more enjoyable and jobs more easy to switch."

They have learned the negative but not the positive side, perhaps because American dreaming has led both consumer and producer to promise what is not possible at the expense of what is. Moreover, the melancholy truth, says Pell, is that many people who come out of the educational system cannot "read comprehensively, write grammatically, or add accurately. I think it's due to the unrest of the sixties, which caused a decline in the demands of the curriculum. Performance is lower now than it was 10 years ago. Lower standards for staying in college, the pass/fail system, less discipline have lessened the quality of our scholarship."

This year, Pell's primary effort in education seemed directed at staving off attempts to rejigger the formulas for determining how much money a student could get under the basic grants program. "It takes several years for a country like ours to absorb and understand," he says. "If we change it around, it'll be several more years before it's fully understood. I think we should stick with what is basically a good program." The facts appear to bear him out: In only its third year, the BEOG program has given as much as $1,400 to each of 1.2 million students—77 percent of those considered eligible for what Pell unabashedly hopes will become known as "Pell grants"—in the last academic year.

Still, the grant formula remains a bone of contention between Pell and the institutional aid proponents, many of whom can be found among the education associations at One Dupont Circle in Washington. One such proponent says the formulas now "short-sheet the private institutions" by failing to provide enough aid to low-income students who want to attend. According to this view, the grant program tends to channel the poor into public, relatively low-cost schools by limiting the maximum grant to no more than half the cost of tuition. But both sides made a tacit agreement this year to leave the formulas alone. "Unless there were a lot more money," one observer explained, "somebody's ox would get gored."

The truce in this area may be partially the result of increasing sophistication at One Dupont Circle, according to observers both on the Hill and among the associations. Last January, for example, apparently feeling sanguine before his latest round of hearings, Pell told an educational journal that "I and my staff have received much valuable information from the associations as we have begun to extend and amend the 1972 legislation. . . . The end result has not been an inflexible position such as that which the higher education community presented in 1972. Rather, we have been exposed to what I believe is a healthy clash of issues and ideas."

But if the associations are more willing to do what Pell wants, they have not yet, in his view, progressed far enough. "You go down to that One Dupont Circle," he said recently, "and each one of these groups has an ax to grind and they really do not work together much." Pell is also irked at what he regards as an unwillingness to testify briefly before him and to save the detailed positions for written presentation. "They come in and read in a monotone," he says. "There's no statement that can't be done in five or six minutes."

And last May he told the Education Funding Research Council that "education is a group endeavor, but educators don't work as a group. Any community suffers if it is weakened by dissension, and education is." Educators, he said, must at least agree among themselves on the general outlines of their work and stop bringing their fights—public versus private, secular versus sectarian, four-year versus two-year institutions, academic versus vocational—to Congress. "If we could do that," he said, "then there would be one voice speaking for education, loud and clear. The alternative to this is typical: federal intervention. That is something I would like to avoid, for I would rather see Washington sponsor good education than mandate and regulate its way to a poor imitation." Such language reflects the belief, long held by the Pell team, that "the only way you teach the higher education crowd is by banging them over the head."

Roger W. Heyns, president of the American Council on Education and a man whom Pell singles out as an especially effective advocate for education in Washington, doesn't "believe there was ever any hostility toward Pell and certainly if there was it has long since disappeared." As for speaking as one, says Heyns, "If he's got an idea about how to solve that, I'd like to hear it. It's true that the more consensus we can generate the more we can pursue government objectives. But there has been a great deal of consensus in the last couple of years. On the other hand, we're not famous for consensus in any sector of our society."

Pell is sensitive to the charge that the proliferation of government initiatives, each with its own regulations and reporting requirements, has made institutional administration unnecessarily difficult. He is not likely to propose additional federal controls. But his determination to have some more coherent view of what the education establishment wants should be taken seriously. In 1972, according to virtually everyone concerned, the political and educational communities in Washington did not take Pell or his proposals seriously at all. And they learned a lesson. Pell was new to the job, and his idea of education as a matter of right was regarded by some as a pipe dream. It was, again, a good climate for the Pell approach.

When the Senate committee held its hearings, few of the witnesses would even discuss his basic grants proposal. For the most part, they wanted the money to flow to the institutions themselves through existing campus-based programs. They were fearful that new programs would inevitably siphon off money from the others. In short, they tried to ignore the chairman. One of Pell's associates remembers him, heels firmly planted, saying, "I don't mind legislating in ignorance if they won't give me the information I need." Slowly, as Pell's purpose began to bang them about the head and shoulders, a program was developed. With some changes in the formula—which Pell originally had keyed to the income tax return—the committee had a bill.

Then began the famous House-Senate conference committee hearings. Here, behind pre-sunshine era closed doors, Pell exerted extraordinary force to get what he wanted. All the while, some influential conferees still assumed that Pell would give in and give up on his grants program. Not the least of these was former Representative Edith Green. Pell and Green quite simply did not get along. As the proceedings continued, Pell reluctantly and unofficially authorized a negotiating team to work outside the formal conference—and the influence of Green.

Pell had both Democratic Congressman Carl Perkins and Republican Congressman Albert Quie as allies in his desire to have a student-oriented aid program, but there nevertheless remained some serious differences with Quie. A general strategy evolved: Quie and Pell should not discuss the bill lest they expose the incompatibility in their basic philosophies and one or the other balk. "Easy" provisions should be taken before "hard." In this way, the bill would gradually become something of value, worth compromising for. Important members of the committee would find they had a stake in the outcome.

In 1972, a major part of these negotiations was handled by Stephen J. Wexler, counsel to the education subcommittee and a close personal adviser to Pell. Wexler was known on the Hill and among the Washington education establishment as one of the Senate's most effective operatives. He had a reputation for being both brilliant and brutal in

his attention to the needs and desires of his boss. "Stephen made Pell his reason to live," a friend says. "They were alter egos, as different as two people could be in many ways. Pell can be a little lazy, but Stephen found a way to make him do what a senator should do. Stephen didn't make many mistakes and Pell put a lot of confidence in him."

This relationship ended tragically last fall when Wexler was killed in an accident near his Maryland home. Two drag-racing drunks hit him as he rode his motorcycle. (One other Pell staff member was killed recently in a similar accident, moving Pell to propose legislation that would both deal harshly with drinkers who drive and treat alcoholism itself. The bill is given little chance, but Pell is reportedly determined to prove the forecasters wrong and to have a federal law.)

Shortly before the accident, Richard Smith, the man credited with writing the 1972 bill and knowing "every jot and tittle in it," resigned to become a lawyer-lobbyist for various education groups in the city. The jobs that Wexler and Smith held are now handled by one person, Jean Frolicher, formerly a lawyer with HEW. She is regarded as a first-rate attorney, but there is some feeling that no single person could handle the work done by two persons as dynamic as Wexler and Smith.

Of more immediate consequence, these same observers suggest, is the absence of Wexler's take-the-heat assistance as the senator moves through the broken field of politics. A case in point is the tempest over how to treat the National Endowment for the Humanities and its director, Ronald Berman. Pell's desire to restructure the endowment and fire Berman has shoved both the senator and his program into the hot kitchen of cultural-intellectual politics. This probably would not have happened had Wexler been around to engineer a quiet, staff-level solution. "Stephen would never have allowed it to get public," a top Pell aide concedes.

Pell believes Berman has been less than outstanding in the job and should not be retained. He has failed, Pell says, to give humanities the kind of grass-roots foundation Nancy Hanks (Berman's counterpart in the National Endowment for the Arts) has achieved.

Pell's solution is to turn much of the allocation process over to the state-level humanities committees and to begin a program under which average citizens might qualify for small grants. (Both proposals are embodied in the legislation recently passed by Congress extending the life of NEH for another four years.) Berman and a number of national columnists who have come to his aid oppose these proposals as philistinism. They believe the program should continue to support high scholarship and broadly appealing entertainment like *The Adams Chronicles*. They are not moved by Pell's charge that the humanities are now run by Washington-based czars.

Some points may be made to clarify Pell's position. At one time, he did suggest that there might be some bards among the lumberjacks or classical scholars clerking in Mom-and-Pop stores. But these were examples, extremes used to make a point, and not a suggestion that the endowment go into the business of discovering a nation of Eric Hoffers.

Pell's approach also has the advantage of involving the people who pay the bill, an objective his more political colleagues would warmly embrace. At any rate, it seems entirely consistent with his basic philosophy as illustrated in the basic grants: arts and humanities for all as a matter of right, not a passive but a participatory right; money to the people as well as to the foundations and the scholars.

Whatever the merits of the arguments on each side, it is generally agreed that the Pell proposal will result in decreased NEH funding for academic enterprises. And he has had his way: Berman's nomination to a second four-year term as chairman of the endowment has been shelved by the Senate Committee on Labor and Public Welfare, and it is unlikely that his name will be resubmitted when Congress convenes for its next session.

A further exposition of Pell's conception of the humanities in the national life may be found in his recent thoughts about education in the year 2000. He is concerned about the future state of education if people single-mindedly demand more meaningful and job-oriented programs. "If this trend continues," he cautions, "we will be turning our colleges and universities into trade schools, turning out a work force with degrees but not, to my mind, educated. . . . I fear a system that overly emphasizes the relevant and timely while disowning the intellectual content of education. There is a place for great literature as well as occupational training in the education of each individual."

Pell looks forward or into the past with equal facility. While making the future a hallmark of his legislative career, he has enshrined family lore in his personal life. His father, Herbert Claiborne Pell, a one-term congressman from the Silk Stocking District of Manhattan, exerts an influence on his son that runs far beyond the senator's use of inherited belts and suits. The father set a tone of public service assiduously emulated by his son, though the senior Pell was as flamboyant and colorful as his son is cautious and gray.

A portrait in the senator's dining room in Georgetown shows Herbert Pell wearing a pince-nez and high-collared black cape gathered at the neck. "His standards, his objectives, and his sense of always learning, always studying, were very important to me. He was never concerned—he was lucky because he was independent—he was never concerned with himself. He was always concerned with others. He was blessed with less energy and more intelligence than I have. He was a brilliant man. But he was a one-term congressman and I've been a three-term senator, which perhaps makes me more pragmatic."

Just inside the door to his office in the old Senate Office Building, Pell has hung a framed clipping from the *New York Times* reporting a vote by his father on the proposed veterans' bonus after World War I. He might have voted "aye," knowing the bill would not be enacted. He chose instead to vote his convictions. He was a one-term congressman.

Pell says the story is there to remind him to vote his convictions, a practice he almost always follows. But, he says, "There are times when the state's interest or a political consideration might shade my judgment." He makes it clear he would be "more pragmatic" if faced with his father's dilemma. Grand gestures do not further the cause of tactical obscurity.

FAVORABLE ATTITUDE OF SMALLER EMPLOYER PLANS TOWARD ERISA

Mr. WILLIAMS. Mr. President, as chairman of the Senate Labor and Public Welfare Committee and the coauthor of the Employee Retirement Income Security Act of 1974—ERISA, I have been very concerned about reports that administrators and trustees of smaller pension and welfare plans had developed a negative psychology regarding the new law.

There was good reason for this in the months immediately following enactment of ERISA, when the Federal agencies' failure to take positive action created paperwork problems that were a burden, particularly for the smaller plans. And some of them gave up and terminated.

Our committee immediately became aware of this unfortunate situation, and through our oversight function began prodding the Federal administrators of the law. We asked them to simplify compliance procedure and to apply reporting and disclosure requirements to all plans in a fair, reasonable, and flexible manner.

Shortly thereafter, a turnaround began to occur, and the agencies began to issue regulations which significantly reduced the amount of paperwork required to be prepared and filed by smaller employer plans. I approved of these new regulations, because they struck a proper balance between the participants' right to know about their plan provisions and the plan's ability to operate without suffocating paperwork requirements.

But I was puzzled as to why this effort to reduce paperwork burdens for smaller employer plans was not being publicized. Smaller employers were complaining to our committee as if the situation was as bad as it had been in the early days following enactment of the new law.

I was very pleased, therefore, to read in the January 12, 1977, edition of the Wall Street Journal that the attitude of smaller employers toward ERISA is changing for the better. According to the article, smaller plans are having "second thoughts" about ERISA. As one employer is quoted as saying: "We're seeing a little blue sky." This turnaround is welcome.

Of course, the article points out, there are some employers who will never be satisfied with ERISA—those who believe that the "Government should keep its nose out of pension plans." I hope that in time even those employers who feel that way will come to recognize the true value of this reform law.

Mr. President, I ask unanimous consent that for the benefit of my colleagues the Wall Street Journal article I have described be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MANY SMALL CONCERNS LEARN THEY CAN LIVE WITH PENSION REFORM

(By Roy J. Harris Jr.)

To many small companies, the Employe Retirement Income Security Act, the new pension-reform law better known as ERISA, has been a textbook example of governmental good intentions gone awry.

Unable to meet its stiffened requirements and complaining bitterly about the mounds of paperwork ERISA entails, more than 10,000 concerns, often employing fewer than 100 workers each, have canceled their pension plans since the 200-page legislative behemoth took effect 28 months ago.

Many in Congress, where ERISA originated, are alarmed. "I can't think of another issue since Watergate that has stirred so much correspondence," says an aide to Rep. Bill Archer, a Texas Republican who recently led more than 100 of his colleagues in seeking a General Accounting Office study of ERISA's

impact. Others on Capitol Hill are mulling an overhaul of the act.

Yet even as criticism of ERISA continues to mount, there is growing evidence that many companies who ended their pension plans in ERISA's wake now are having second thoughts. Some, stung by the angry reaction of long-time employes, are searching for new forms of retirement benefits. Others are discovering that recent changes in ERISA itself make compliance easier. But whatever the reason, their change of heart seems likely to dampen the controversy threatening to gut what backers and detractors alike agree is the boldest attempt ever to regulate the nation's $200 billion private pension system.

THE LAW'S INTENT

In one sense, of course, controversy was what ERISA's congressional sponsors had in mind. They designed the law to safeguard the rights of participants in private pension plans, keep pension administrators honest, and prevent reoccurrence of such debacles as the 1964 collapse of the Studebaker Corp. plan in which pension benefits of some 8,500 workers were virtually erased by a plant closing.

Even so, to most large companies with sophisticated, long-standing pension plans, ERISA hasn't been much of a bother; there are reports that some big concerns have used ERISA's minimum benefit standards as justification to tighten up, not liberalize, their pension plans' coverage.

But many small employers have found ERISA more a burden than a blessing. Typical of such feeling is John Morse, a Virginia dairy farm owner who ended his plan rather than try to comply with ERISA. The law, he contends, is "atrocious," and its complexity and cost of compliance make it "virtually impossible" for small plans like his to survive.

However, the law's sponsors and its joint administrators, the Labor Department and the Internal Revenue Service, say the evidence is now otherwise. They point to recent studies showing that ERISA may not be as difficult to live with as many of its detractors claim. One survey of companies dropping pension plans, for instance, indicates that a majority expects to find new plans that meet the law's standards.

A NEEDED SHAKE-OUT?

Champions of ERISA also contend that while the rate of private pension plan terminations has about doubled since the law took effect, the recent recession may be more to blame than ERISA. Then, losses or sharply reduced profits made retirement benefits an unaffordable fringe at many companies.

What's more, these proponents say, many of the recently canceled pension plans probably shouldn't have existed in the first place. Sen. Jacob Javits, the law's co-author, asserts that the termination figures include "a shake-out of those plans which in any event may well have been unable to meet their obligations to participants and beneficiaries." Indeed, adds William J. Chadwick, administrator of the Labor Department's pension division, one goal of ERISA is to weed out shaky programs.

ERISA's supporters also interpret the small size of the canceled plans as another indication that criticism of the law is misplaced. For while 10,000 defunct plans may seem like a large number, they represent around 320,000 workers, or less than 1% of the 35 million Americans covered by the country's 500,000 pension plans.

Few small businessmen quarrel with ERISA's aims; many even laud such innovations as the Pension Benefit Guarantee Corp., established by the law to insure that members of certain canceled plans don't lose all their accumulated benefits. Rather, they argue that among other things, the law simply fails to recognize that without expensive legal counsel and professional consultants, little companies often can't begin to understand, let alone comply, with its requirements.

"NO ONE ASKED"

On this point, even some of ERISA's supporters acknowledge that the act was drafted without much consideration for the views of small business. For instance, James D. Hutchinson, who headed the Labor Department's pension benefits unit when ERISA was passed, says that "no one asked" for testimony of small company officials during hearings on the legislation.

Making matters worse, the early attempts to administer ERISA proved as confusing to pension experts as they were to small businessmen. Mr. Hutchinson recalls that the initial draft of the required "Plan Description Form" was a lengthy, 22-page document demanding detailed written answers. (For companies with under 100 workers, the form has since been cut to six pages containing mostly boxes to be checked.)

Once small companies began feeling the pinch of the new law, however, Congress did take note. Sen. Gaylord Nelson's small business committee held hearings on the matter and, acting upon the House members' request, the GAO began its investigation. Soon, ERISA's impact on small business appeared to be almost as big an issue as pension reform itself had been.

The result so far has been a concerted effort to simplify ERISA's requirements for the small company. The Labor Department combined some reporting forms and exempted small plans from independent audits of annual financial statements. And the IRS recently ruled that the annual report it gets from a plan can be submitted at the same time the Labor Department report is filed. That time-saving change has been urged by the Commission on Federal Paperwork.

There's also been considerable activity in the so-called "pension industry," loosely comprised of consultants, insurance men, actuaries and others. Consulting firms are drawing up model plans so companies can choose a program without commissioning one from scratch. In California, Home Savings & Loan Association, Union Bank and Professional Services Inc., a Texas-based retirement plan administrator, have drawn up a package called PACER, or Pension Administration for Corporate Employe Retirement, designed to provide uncomplicated, inexpensive plans.

The IRS also is coming out with a model plan, and that agency is considering specific exemption requests from small companies. "We're making every effort to let them keep their plans," says Fred Ochs, director of the employe plans division.

Talks with a number of small companies that have criticized ERISA in the past indicate that these recent modifications are indeed making the law more palatable.

A. I. Schepps, owner of Schepps Grocery Co., Houston, used to make loans out of the company's pension fund to the small grocers that are his customers. "We never lost a penny," he says. "In fact, our return has been 9% or 10%," higher than that earned from the stocks and bonds into which the fund was diverted recently. The diversion came after ERISA set up investment standards to prevent abuse of employe money. Now that the pension law has become more established, however, Mr. Schepps thinks he may be able to resume the old investment policy once he proves his good record. "We're seeing a little blue sky," he says.

Another Houston concern, NSW Corp., a maker of hydraulic power wrenching systems terminated its pension plan because ERISA would force it to invest the fund in conservative, less liquid securities, according to president Christy Neill. The law's reporting requirements also contributed to the decision. "This just isn't for us, as small as we are," Mr. Neill says.

Lately, however, the company has been spreading bonuses among its 55 employes and recommending they place the money in Individual Retirement Accounts, or IRA's. (Such plans have become increasingly popular lately; like company pension plans they offer a tax deferral, although IRA's are limited to contributions of $1,500 a year.)

"One of the big problems we have here is that two giant agencies (Labor and IRS) are trying to handle the same program," complains John R. Phillips, treasurer of Interstate Drop Forge Co., a Milwaukee forgings maker. It has maintained its 250-member profit sharing plan for union employes and a defined benefit plan, which guarantees a specific annuity, for 100 salaried people. The executive figures the cost of compliance was $38,260, resulting in part from the "rewriting of the ERISA regulations almost quarterly" that forced constant reevaluations of the plans by the company.

Government studies of the cost of ERISA to small concerns still are underway. But while some companies estimate that pension administration costs have about doubled since the law took effect, Mr. Phillips, and executives of other companies with pension plans, say they see some signs that administrative problems and costs will taper off this year.

There are, of course, private company owners who will never be satisfied with ERISA, because they believe that the government should keep its nose out of pension plans or any other relationship between employer and employe. "Many employers like to think of a pension as their gift to workers," says one congressional staffer who is familiar with pension plans. "But the law makes it clear that pensions are an earned benefit, and that the government agrees on tax exemptions only if the plans are fair."

Some observers, meanwhile, fear that the government may go too far toward accommodating small companies, thus nullifying the employe pension rights protected by ERISA. But James Hutchinson, the former Labor Department pension official, doubts that Congress would take such dramatic action as, say, exempting small plans from the law. "All you'd need is a handful of cases of abuse to come up afterwards, and the sponsors would be in deep trouble with labor and public interest groups," he says.

AMERICAN PARTICIPATION IN UNESCO

Mr. CASE. Mr. President, the 19th general conference of the United Nations Educational, Scientific, and Cultural Organization was very important, because at issue was the future of American participation in that organization. In 1974, Congress enacted the Case-Bingham amendment on UNESCO which in substance said that no funds should be expended or obligated to support, directly or indirectly, the United Nations Educational, Scientific, and Cultural Organization until the organization adopted policies consistent with its educational, scientific, and cultural objectives and has taken concrete steps to correct its recent actions of a primarily political character.

The 1974 congressional action was motivated by the outcry of thousands of scientists and scholars around the world who deplored strongly a number of political resolutions adopted by UNESCO. The three most controversial, sponsored by the Arab States with the backing of the Soviet Union, were directed at Israel. One excluded Israel from the UNESCO regional working group system in which national membership is essential to participate in UNESCO activities. Another condemned Israel for archeological studies undertaken in Jerusalem, even though the scholarly evidence was that the highest standards were followed in carrying out the work. A third invited UNESCO's Director General to consider giving financial assistance to the Palestine Liberation Organization, though it held no national membership in UNESCO. Cultural funds for Israel likewise were withheld.

All of these resolutions were motivated politically and twisted the truth to gain political ends. Few, if any, of the claims had substance. Adopting these resolutions opened the door to using the scientific community in political conflicts through the UNESCO organization.

As a result of the congressional cutoff of funds, there has been some modest progress at the 19th general conference, but some setbacks as well. One of the three resolutions concerning Israel—that on regional membership—was repealed, though a final decision awaits still a spring meeting of UNESCO's Executive Board which must approve this conference recommendation. In addition, the conference put off for further study a Soviet-sponsored proposal which, had it been adopted, would have sanctioned state controls on the mass media and the international press. This would be a blow for our belief in the freedom of the press and could have set back the progress made with the Soviets in 1975 at Helsinki which called for a greater exchange of ideas between East and West.

UNESCO took steps backward as well. It approved another Middle East resolution, this time on educational practices in the occupied territories, without waiting for a report from its own experts. It adopted a resolution that said that scientists from Taiwan ought to be excluded from all international organizations, both private and public. This is another outrageously political resolution which makes it difficult for scientists and scholars to support UNESCO.

Unfortunately, while the results of the UNESCO conference can only be characterized as a mixed bag, the State Department in an effort to liquidate the Case-Bingham amendment has sought to characterize the UNESCO conference as a complete success, justifying a restoration of full funding by the United States for the organization. Supports of UNESCO in the State Department appear willing to give up any leverage the United States may have had in the organization that resulted from the congressional decision to withhold funds.

I am not willing to go that far, for I believe if we give up all of our leverage no further progress will be possible in UNESCO. Even the Soviets who have backed most of the resolutions we see as obnoxiously political believe that the 19th general conference of UNESCO supported their goals. PRAVDA, the Soviet newspaper, in an article entitled "West's Attempts to 'Depoliticize' UNESCO Fail" reports as follows:

Nairobi, 1 December—A Distinguishing feature of the UNESCO general conference session, which has ended here, was its graphically expressed anticolonial and antimperialist trend.

Representatives of 141 states participated in this session, held for the first time on African soil. The resolutions adopted condemn the forces of colonialism and racism and sharply criticize Israel's flagrant violations of the rights of the population in Arab territories occupied by it, particularly in the sphere of education and culture. Representatives of the socialist and developing countries used specific examples to expose imperialism as the chief mainstay of racist regimes in southern Africa and of the Israeli Zionists.

This session confirmed the organization's adherence to the ideals of the struggle for peace and the people's freedom. Attempts by Western countries to achieve the "depoliticization" of UNESCO and reduce its activities exclusively to technical aspects of problems of education, science and culture, failed. UNESCO has always been and will remain a political organization, Amadou-Mokhtar M'Bow, its director general, declared.

The issue this Congress will face is whether to accept the State Department's judgment that all is well and approve payment of all back dues to UNESCO, or, in the alternative, to approve limited funds for UNESCO which will signal the member states that UNESCO's policies are as yet not fully consistent with its educational, scientific, and cultural objectives and that further steps remain to be taken to right the situation.

I believe we should do the minimum in giving funds to UNESCO and pay only our 1975 back dues which will retain U.S. voting rights in the organization.

The U.S. National Academy of Science stated recently that—

The search for knowledge and understanding of the physical universe and of living things that inhabit it should be conducted under conditions of intellectual freedom, without religious, political, or ideological restriction.

UNESCO has a way to go to live up to this standard, on which we base our support of that organization.

FEDERAL CAMPAIGN LAWS

Mr. BAKER. Mr. President, there appeared a short article in the January edition of the Nation's Business entitled "Will Federal Campaign Laws Make Elections More Honest?" by George D. Webster.

As the title indicates, Mr. Webster has asked some very searching questions about the supposed benefits of public financing of Federal elections. Although I do not pretend to have the answers to all the questions asked, I believed they are questions that we in the Congress must answer.

I commend, therefore, this article to the attention of my colleagues and request unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WILL FEDERAL CAMPAIGN LAWS MAKE ELECTIONS MORE HONEST?

(By George D. Webster)

Since 1907 Congress has sought to purge sin from the federal election process. The latest effort culminated with the 1976 amendments to the Federal Election Campaign Act.

Committee reports and floor speeches last year hailed the goal of legislating morality, integrity, and decency through far-reaching regulation of the election system. Such rhetoric as "reducing the influence of big money in federal elections" echoed in the halls of Congress.

The leading House sponsor and House conferee was Wayne Hays, then a representative from Ohio. Mr. Hays was strong in his endorsement of the 1976 amendments as a vehicle to bring virtue to federal officeholders and their elections.

Many of the state legislatures were seized, too, by the so-called post-Watergate morality crusade and enacted extensive new election campaign laws.

CONGRESS COULDN'T WAIT

Congress may have considered election law changes important, but it is interesting to note what happened to a 168-page set of regulations proposed by the Federal Election Commission to cover enforcement of the Federal Election Campaign Act as amended.

The regulations were to go into effect if they had been before Congress for 30 legislative days and if Congress had not taken any action on them.

However, the 94th Congress adjourned last October two days ahead of the 30-day deadline, leaving the country with no federal regulations implementing this legislative action to fight sin in politics.

Despite this, the Federal Election Commission says it will act as if the regulations are in force, moving to ensure compliance with them in court, if necessary. Many provisions in the regulations are so complex as to puzzle even lawyers and accountants. Partly because the statute itself is so complex, some provisions are impractical, and others are of dubious constitutionality.

Now, the regulations are to go before the 95th Congress, and they will go into effect if the new Congress does not reject them in a specified period. There probably will be vigorous debates over certain provisions. However, Congress only has the power to reject provisions in the regulations. It cannot rewrite them.

The serious question is: Assuming the new federal law substantially survives challenges to the constitutionality of various provisions, can it bring true integrity to the election system? Or, to put the question another way, have the knaves in federal elections been curbed? and, even if shortcuts, shenanigans, and outright corruption in the election process are curtailed, how can this operate to make the elected legislatures incorruptible and nonsusceptible to improper or qeustionable influences?

Before the law was enacted—and even before there were any federal election statutes—Presidents and members of Congress were elected who proved to possess high standards of conduct. High-minded, competent public servants obviously can come to power without restrictive federal election laws.

But the appealing and deceptive concept

of "reform" legislation to bring about purity of conduct has been a hardy perennial in our nation's history.

The failure of the "noble experiment" of the Eighteenth Amendment should never be forgotten. Emphasizing that integrity and morality could not be legislated, Franklin Roosevelt spearheaded the repeal of Prohibition.

HUMAN BEINGS ARE HUMAN

What happened under Prohibition, along with numerous other experiences, should teach us that far-flung and draconian election laws cannot bring integrity to the campaign system, contrary to the representations of the laws' sponsors.

As John James Ingalls said, "The purification of politics is an iridescent dream." Laws cannot change the hearts, minds, souls, or consciences of humans beings. The doctrine of original sin cannot be legislated out of existence. There will be rascals in every sector of our society—including the halls of Congress—long after all of us have passed to another world.

If sin could be abolished by legislation, it would be a simple undertaking. No complicated law would be needed. Congress would only have to pass a bill saying there shall be no more sin, the President would sign the bill, implementing regulations would be issued by the appropriate anti-sin regulatory commission (consisting, perhaps, of six former congressmen), and Congress would be willing to stay in session long enough to permit the regulations to become effective. Then there would be no more sin, and the knaves in politics and elsewhere would be forever curbed.

Of course, the problem of sin—in politics or elsewhere—is not that simple to solve. Leaving aside considerations of philosophical, religious, and other complex influences that shape lives, behavior, and votes, let us look briefly at two of this country's older election laws.

THE 1907 ELECTION LAW

In 1907 it became a crime to make a corporate contribution to a federal election. No person ever went to jail for violation of this provision in the first 66 years after its enactment despite literally thousands of known violations. Had the law been enforced in the 1940's, 1950's, and 1960's, the corporate violations of the 1972 campaign might not have occurred. Many of those who failed to enforce the law as originally written in 1907 became judges, members of the Cabinet, and members of Congress.

One of the original election laws on the books prohibits a contribution to a federal official being made at his office. Certainly, this provision, probably violated every day in an election year, has not brought about honesty and clearly has nothing to do with it. It is senseless.

Another example of basically futile tilting at sin was the Internal Revenue Service action in the 1960's to regulate tax deductions for expense account spending. Expense accounts have always been a fertile field for cheaters. IRS issued extensive regulations with much fanfare from the then-head of the agency about enhancing the integrity of the system. Actually, all IRS did with the regulations was to make the expense-account cheater reduce his sin to writing. Sin was not abolished; it was only written up.

Undoubtedly, many—if not most—taxpayers with expense accounts make inaccurate accounting during the course of the year. Such errors are generally inadvertent, but there is no way, even with the most careful and honest of taxpayers, to have an entirely accurate system of business expense accounting. Allocation of expenses is simply not that well-defined or possible.

PUBLIC DOLE: MORE NEUTRAL?

An important function of the Federal Election Commission, aside from its role as policeman, is to dole out money to presidential aspirants, which it did last year. Common Cause, the Washington interest group that was a prime force behind passage of last year's campaign act amendments, says the public treasury is a more neutral source of money for candidates than private donors are. Perhaps. But the federal dole certainly has a corrosive effect on political integrity. It forces the American taxpayer to put money into the campaign of an individual with whom he thoroughly disagrees.

Also, if the presidential campaign of 1976 is any example of the results of public financing, citizen participation is substantially lessened. Volunteer members in both major parties were considerably fewer in the 1976 campaign. Such reduced citizenry participation reduces overall honesty in the system.

Following the Common Cause logic of public financing would dictate this result: All lobbying efforts in Congress should be publicly financed by taxpayers, and both sides should be made even in money and time so the issues could be properly and fairly debated. For example, any money or time used by Common Cause for a legislative effort in behalf of public financing for congressional candidates would have to be made available to the other side.

The argument would also dictate that the public dole be extended to legislative efforts, and that every congressman and senator line up outside the Federal Election Commission for campaign money.

WARNING TO BUSINESS

Indeed, there undoubtedly will be attempts in the new Congress to push through legislation providing for complete public funding of campaigns for seats in the House and Senate.

If so, business had better take heed. Such legislation would shut corporations' political action committees out of congressional races, while labor unions still would be able to exhort their members to work and vote for candidates favored by union leadership.

There also could be an attempt to obtain legislation providing for partial public funding—extending public funds to House and Senate candidates on a matching basis, as is now done for presidential primaries.

This would not shut business out of the congressional campaigns, since candidates would need to obtain contributions in order to qualify for matching funds. However, some congressmen have suggested that a system of matching funds be accompanied by a reduction in the limits on contributions permitted multicandidate committees, including corporate political action committees. And such a reduction would substantially reduce the business role in politics.

IS SMALL BETTER?

The concept of legislating morality is no more valid today than it was when Franklin Roosevelt called for an end to the prohibition on liquor.

One thing the Federal Election Campaign Act has done is prevent large contributors from providing large amounts of money to one candidate. Implicit is the theory that a senator or congressman who could "be bought" for $100,000 would be less responsive to a gift of $2,000 or $5,000.

However, some members of Congress have asserted that the only contributors who in the past asked them for favors were small contributors. Also, some congressmen and senators and presidential campaign aides bitterly complain that the new contribution limits seriously hampered the financing of their 1976 campaigning. Many candidates must have been deeply grateful for lowly contributions.

Of course, few of us are so naive as to believe that handing out money is the only path to political influence.

WHY FAVORS ARE DONE

Favors are done or relief is granted in the government for many reasons. It might be because the favor-seeker is a coreligionist, whether he be Protestant, Catholic, Jewish, or even a fellow nonreligionist. There is no way that laws can eradicate the personal influence factor from the legislator's decision-making process. But most times, appropriate favors are done for the taxpayer simply because the taxpayer is entitled to them as a citizen.

Should a son of a congressman be allowed to lobby before Congress? Should a former congressman turned lobbyist to be allowed to have the use of the floor? Should a former campaign worker become a federal judge? Such practices are common. Should they now end?

Charles Dudley Warner, more than 100 years ago, gave us one of the great axioms of our system—"politics makes strange bedfellows." History is replete with examples which show that election laws cannot abolish bedfellows or alter the many facets of the human personality which influence decisions.

One way to influence an election is for a special prosecutor to raise publicly an unsupportable complaint against a candidate shortly before an election. How is this kind of tremendous influence on an election prevented? One unsupported headline, even though later corrected, can change an election result. Money has nothing to do with this—merely personal bias or ambition or mistake.

OUTLAW BUDDIES?

However, all that the so-called reformers seem to comprehend is money. So they tell us that big money should not be allowed to buy what can be secured by being a brother, a law partner, a classmate, or perhaps even a member of the same church.

If legislation could operate to bar individual influence, we certainly need a mass of new laws. A statute could probably be drawn requiring that parties at interest, relatives, classmates, roommates, campaign workers, drinking or hunting buddies, etc., should be disqualified and disassociated from the legislative and election process. Acts motivated by personal bias or greed or ambition should be outlawed.

Of course, this would take hundreds, maybe thousands, of pages, and make the voluminous 1976 Tax Reform Act seem like a one-liner. Extreme as this would be, it points up more meaningfully the shortsightedness and lack of understanding of our political processes on the part of those who urged the new "anti-money" legislation as a sine qua non for election virtue.

CONCLUSION

The enactment of voluminous and complex legislation and regulations will have scant—if any—effect in making elections more honest than they have been before. Nor does such action mean that political decisions will be reached more conscientiously and objectively, since there are so many influences in elections and the political process.

One campaign worker in a presidential primary reported recently that he witnessed 29 violations of the present federal election laws in a week. The election laws are thus now like the tax laws. Interpretations may vary, and the best that can be done, as with expense accounts, is to make an honest effort to comply with the laws.

While the election laws may be a boon to the legal profession, the public should not be deceived about their contribution to the integrity of the federal election process.

Whatever the merits of such legislation may be, the legislation clearly does not make politics or politicians more honest. Integrity is guaranteed by individuals on the basis of personal commitment—not by a convoluted and complex law.

NATIONAL HEALTH CARE ACT OF 1977

Mr. McINTYRE. Mr. President, on January 10 I introduced S. 5, the National Health Care Act of 1977. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 5

A bill to amend the Internal Revenue Code of 1954 and the Social Security Act to provide a comprehensive program of health care by strengthening the organization and delivery of health care nationwide and by making comprehensive health care insurance (including coverage for medical catastrophes) available to all Americans, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act, with the following table of contents, may be cited as the "National Health Care Act of 1977".

TABLE OF CONTENTS

Sec. 1. Short title.

TITLE I—FINDINGS AND DECLARATION OF PURPOSE

Sec. 101. Findings.
Sec. 102. Declaration of purpose.

TITLE II—PROVISIONS TO STRENGTHEN HEALTH PLANNING

SUBTITLE A—REVISIONS IN TITLE XV OF THE PUBLIC HEALTH SERVICE ACT

Sec. 201. Designation of Surplus Services.
Sec. 202. Compensation for Services Declared Surplus.
Sec. 203. Establishing a Health Data Consortium.
Sec. 204. Criteria for Certificate-Of-Need Programs.
Sec. 205. Governing Bodies for Health Systems Agencies.
Sec. 206. Funding Health Systems Agencies.
Sec. 207. Appropriations.
Sec. 208. Grants and Rate Regulations.
Sec. 209. Technical Amendments.

SUBTITLE B—PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

Sec. 210. Extending Scope of Review.
Sec. 211. Health Data Consortium.

TITLE III—PROVISIONS TO ENCOURAGE COMPREHENSIVE AMBULATORY HEALTH CARE CENTERS

Sec. 301. Amendment of purpose.
Sec. 302. Authorization of appropriations for construction and modernization grants.
Sec. 303. State allotments.
Sec. 304. Priority of projects.
Sec. 305. State plans.
Sec. 306. Recovery of funds.
Sec. 307 Loan guarantees and loans for modernization and construction of comprehensive ambulatory health care centers.
Sec. 308. Definition of comprehensive ambulatory health care center.
Sec. 309. Training for Personnel Needed in Comprehensive Ambulatory Health Care Centers and Professional Standards Review Organizations.

TITLE IV—PROVISIONS TO ASSURE A COORDINATED NATIONAL HEALTH POLICY

SUBTITLE A—HEALTH REPORT OF THE PRESIDENT; HEALTH POLICY BOARD

Sec. 401. Health report of the President.
Sec. 402. Health Policy Board.
Sec. 403. Employment of officers, employees, experts, and consultants.
Sec. 404. Responsibilities of Board.
Sec. 405. Consultation with other advisory bodies and representative groups; cooperative utilization of services, facilities, and information.
Sec. 406. Compensation of members.
Sec. 407. Authorization of appropriations.

SUBTITLE B—DEPARTMENTAL RECOMMENDATIONS AND REPORTS

Sec. 411. Statements regarding effect of department proposal on Nation's health care.
Sec. 412. Agency obligations under other Federal statutes.

TITLE V—PROVISIONS TO MAKE COMPREHENSIVE HEALTH CARE INSURANCE AVAILABLE TO ALL

SUBTITLE A—ESTABLISHMENT OF MINIMUM STANDARD HEALTH CARE BENEFITS

Sec. 501. Definition of minimum standard health care benefits.

SUBTITLE B—QUALIFIED EMPLOYEE HEALTH CARE PLANS

Sec. 511. Employers' deduction for employee health care expenditures.

SUBTITLE C—QUALIFIED INDIVIDUAL HEALTH CARE PLANS

Sec. 521. Qualified individual health care plans.
Sec. 522. Procedure for rulings on qualification of employee and individual health care plans.
Sec. 523. Regulations.

SUBTITLE D—GRANTS TO STATES FOR QUALIFIED STATE HEALTH CARE PLANS FOR THE NEEDY

Sec. 531. Grants to States for qualified State health care plans.
Sec. 532. Carrier compliance.
Sec. 533. Conforming amendments to title XVIII of the Social Security Act.
Sec. 534. Conforming amendments to title XIX of the Social Security Act.
Sec. 535. Conforming amendments regarding "reasonable costs."
Sec. 536. Conforming amendments to the Internal Revenue Code.
Sec. 536. Conforming amendments to the Internal Revenue Code.
Sec. 537. Effective date.

TITLE I—FINDINGS AND DECLARATION OF PURPOSE

SEC. 101. FINDINGS.

The Congress hereby finds that—

(a) America confronts a critical testing of its capacity to meet for all of its citizens one of the most basic of human needs, that of protecting and maintaining personal health;

(b) Every citizen of the United States of America should have access to quality health care, but too many Americans find it difficult to secure quality health care when they need it, where they need it, at prices they can afford;

(c) The Nation needs systems of health care organizations, delivery, and financing which combine the high scientific and technical competence of the medical and allied health professions; the flexibility, innovativeness, efficiency, and managerial skills of private enterprise; the legislative and fiscal capacities of government at all levels; and the potentialities of consumer and community participation in developing and maintaining such systems of health care.

SEC. 102. DECLARATION OF PURPOSE.

The Congress declares the purpose of the Act to be to improve the organization, delivery, and financing of health care for all citizens of the United States of America by establishing cost and quality controls, promoting ambulatory care, strengthening health planning, establishing national standards of health care benefits including coverage for medical catastrophes, encouraging provision of such benefits through comprehensive health care insurance, and by assisting persons of low income or in poor health to secure that insurance.

TITLE II—PROVISIONS TO STRENGTHEN HEALTH PLANNING

SUBTITLE A—REVISIONS IN TITLE XV OF THE PUBLIC HEALTH SERVICE ACT

SEC. 201. DESIGNATION OF SURPLUS SERVICES

(a) Section 1513(g)(1) of the Public Health Service Act is amended by striking the period, and substituting a comma, and adding the following wording: "including its recommendations as to which services should be designated as surplus.".

(b) Section 1523(a)(6) of the Public Health Service Act is amended by adding at the end thereof the following new sentence: "Any institutional health service found to be unneeded according to the standards applied in determining whether a proposed new service shall be granted a certificate-of-need shall be declared surplus. In making a determination that a service is unneeded, the State Agency shall take into consideration any recommendations made by the appropriate health system agency and shall indicate the date on which its designation of the service as surplus shall become effective.

(c) Section 1523 of the Public Health Service Act is amended by adding after subsection (c) the following new subsection.

"(d) When a State Agency's designation of an institutional health service as surplus under the terms of Section 1523(a)(6) becomes effective, such service shall, for purposes of the state certificate-of-need program and for purposes of Section 1122 of the Social Security Act, be considered as though it had been denied a certificate-of-need.".

SEC. 202. COMPENSATION FOR SERVICES DECLARED SURPLUS

The Public Health Service Act is amended by adding after Section 1526 the following new section:

"GRANTS FOR SERVICES DECLARED SURPLUS

"SEC. 1527(a). The Secretary shall, upon proper application, make grants to institutions which have discontinued health services pursuant to a determination by a State Agency that such services are surplus as provided in Section 1523(a)(6).

"(b) The amount of any grant under subsection (a) shall not exceed the amount of the debt incurred by the institution in developing the service declared surplus which remains outstanding at the earlier of (1) the time the institution discontinues the service pursuant to the State Agency's determination that it is unneeded, or (2) the effective date of the State Agency's designation of the service as surplus. Such grant shall be used by the institution receiving it to retire such outstanding indebtedness.

"(c) There are authorized to be appropriated to make payments under grants under subsection (a), $500,000,000 for the fiscal year ending September 30, 1978, $750,000,000 for the fiscal year ending September 30, 1979, and $1,000,000,000 for the fiscal year ending September 30 1980.".

SEC. 203. ESTABLISHING A HEALTH DATA CONSORTIUM

(a) Section 1513(b)(1) of the Public Health Service Act is amended by adding "and the health data consortium described

in section 1523(a)(7)" after "programs" in the final paragraph.

(b) Section 1523(a) of the Public Health Service Act is amended by adding after paragraph 6 the following new paragraph 7:

"(7) Establish a health data consortium to serve the common data needs of itself and the following groups authorized to operate in the State—

(A) Health Systems Agencies,

(B) Professional Standards Review Organizations (as designated under Section 1152 of the Social Security Act),

(C) hospitals,

(D) other health care institutions,

(E) hospital, medical, and other service benefit plans, and

(F) insurance companies underwriting health insurance plans.

In establishing such consortium, the State Agency shall assure that

(i) each of the six above-named groups has equal representation with itself on the governing body of the consortium,

(ii) the consortium is adequately staffed to collect, tabulate, analyze and make available to its members the minimum data specified by the Secretary pursuant to Section 1533(b)(1) plus such additional data as may be agreed to by the consortium, and

(iii) the consortium coordinates its activities with the cooperative system provided for under Section 306(e).

SEC. 204. CRITERIA FOR CERTIFICATE-OF-NEED PROGRAMS

Section 1533 of the Public Health Service Act is amended by adding after subsection (d) the following new subsection:

"(e) To assist health systems agencies carry out their functions under section 1513 (f) and State health planning and development agencies to carry out their functions under paragraphs (4) and (5) section 1523 (a), the Secretary shall issue guidelines to be used in establishing certificate-of-need programs and in evaluating the need for new institutional health services. Such guidelines shall include, but not be limited to, criteria with regard to:

"(1) institutions and facilities which should be subject to the certificate-of-need program;

"(2) administrative procedures to be followed to assure a fair hearing on an application for a certificate-of-need;

"(3) sources of information that should be considered in determining the need for new institutional health services;

"(4) necessary financial and manpower resources for operating the additional services or facilities;

"(5) conformity with the health systems plan;

"(6) factors to be considered in evaluating proposed facilities or services;

"(7) procedures for appealing by the certifying agency;

"(8) support of certificate-of-need decisions by related state agencies; and

"(9) effect on the overall cost of the health care system for the area or areas concerned.".

SEC. 205. GOVERNING BODIES FOR HEALTH SYSTEMS AGENCIES

Section 1512(b)(3)(C) of the Public Health Service Act is amended by striking the period at the end of item (ii), substituting a comma, and adding "and at least one member shall be a representative of a service benefit plan and at least one member shall be a representative of an insurance company underwriting health insurance plans.".

SEC. 206. FUNDING HEALTH SYSTEMS AGENCIES

Effective after the fiscal year ending September 30, 1977, subparagraph (A) of section 1516(b)(1) is amended to read as follows:

"(A) the sum of—

"(i) $0.70 per year per person for the first 500,000 persons,

"(ii) $0.50 per year per person for the second 500,000 persons,

"(iii) $0.30 per year per person for the third 500,000 persons, and

"(iv) $0.10 per year per person for additional persons residing in the health service area for which the health systems agency is responsible, or".

SEC. 207. APPROPRIATIONS

(a) Section 1516(c)(1) of the Public Health Service Act is amended by (1) striking "and" after "1976", and (2) striking the period after "1977" and substituting the following: ", and $200,000,000 for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980.".

(b) Section 1525(c) of the Public Health Service Act is amended by (1) striking "and" after "1976", and (2) striking the period after "1977" and substituting the following: ", and $35,000,000 for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980.".

(c) Section 1526(e) of the Public Health Service Act is amended by (1) striking "and" after "1976", and (2) striking the period after "1977" and substituting the following: ", and $25,000,000 for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980.".

(d) Section 1534(d) of the Public Health Service Act is amended by (1) striking "and" after "1976", and (2) striking the period after "1977" and substituting the following: ", and $10,000,000 for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980.".

(e) Section 1613 of the Public Health Service Act is amended by (1) striking "and" after "1976", and (2) striking the period after "1977" and substituting the following: ", and $135,000,000 for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980.".

(f) Section 1622(e)(2) of the Public Health Service Act is amended by (1) striking "and" after "1976", and (2) striking the period after "1977" and substituting the following: "September 30, 1978, September 30, 1979, and September 30, 1980.".

SEC. 208. GRANTS AND RATE REGULATIONS.

Section 1526(a) of the Public Health Service Act is amended to read as follows:

"SEC. 1526. (a) For the purpose of assisting State agencies to regulate rates for the provision of health care, the Secretary may make to a State agency designated, under an agreement entered into under section 1521(b)(3), for a State which (in accordance with regulations prescribed by the Secretary) has indicated an intent to regulate rates for the provision of health care within the State.".

SEC. 209. TECHNICAL AMENDMENTS.

(a) Section 1501(a) of the Public Health Service Act is amended by striking ", within eighteen months after the date of the enactment of this title,".

(b) Section 1526(a) of the Public Health Service Act is amended by striking "(not later than eighteen months after the date of the enactment of this title)".

SUBTITLE B—PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

SEC. 210. EXTENDING SCOPE OF REVIEW.

(a) Section 1155(a)(1) of the Social Security Act is amended by striking "the" immediately preceding "professional activities", and substituting "all", and striking "for which payment may be made (in whole or in part) under this Act.".

(b) Section 1155(f)(2) of the Social Security Act is amended to read as follows:

"(2) The reasonable and necessary expenses of the Professional Standards Review Organizations in making determinations pursuant to this part shall be passed on to the providers whose services are reviewed and shall be considered an appropriate expense of such providers in determining or approving their charges.".

SEC. 211. HEALTH DATA CONSORTIUM.

Section 1155 of the Social Security Act is amended by adding the following subsection after subsection (g):

"(h) Each Professional Standards Review Organization in a given State shall participate in the health data consortium established in that State pursuant to section 1526(a)(7) of the Public Health Service Act.".

SEC. 212. TECHNICAL AMENDMENT.

The table of contents for title XV of the Public Health Service Act is amended by adding after the entry "Sec. 1526. Grants for rate regulation" the following new entry:

"Sec. 1527. Grants for services declared surplus.".

TITLE III—PROVISIONS TO ENCOURAGE COMPREHENSIVE AMBULATORY HEALTH CARE CENTERS

SEC. 301. AMENDMENT OF PURPOSE.

Section 600(a) of the Public Health Service Act is amended by inserting ", including comprehensive ambulatory health care centers" immediately after "other medical facilities."

SEC. 302. AUTHORIZATION OF APPROPRIATIONS FOR CONSTRUCTION AND MODERNIZATION GRANTS.

Section 601 of the Public Health Service Act is amended by adding after subsection (c) the following new subsection:

"(d) $500,000,000 for the fiscal year ending September 30, 1978, and for each of the next succeeding 4 fiscal years for grants for the construction and modernization of comprehensive ambulatory health care centers, and for those administrative, operating, and maintenance costs during the first 3 years of operation of such centers as may be approved by the Secretary. No grant or grants to any institution or for any institution or for any project of funds authorized by this paragraph shall exceed $1,000,000 except that a supplementary grant or grants not to exceed an additional $1,000,000 may be made to any institution or for any project, provided that at the time the application for the supplemental grant is made the institution or project has received from non-Federal sources cash or written pledges payable within one year in an amount at least equal to the amount for which application is made.".

SEC. 303. STATE ALLOTMENTS.

Effective with respect to appropriations pursuant to section 601 of the Public Health Service Act for fiscal years beginning after September 30, 1977, section 602(a)(1) of such Act is amended to read as follows:

"(a)(1) Each State shall be entitled for each fiscal year to an allotment bearing the same ratio to the sums appropriated for such year pursuant to subparagraphs (1), (2), and (3), respectively, of section 601(a), to an allotment bearing the same ratio to the sums appropriated for such year pursuant to section 601(b), and to an allotment bearing the same ratio to the sums appropriated for such year pursuant to section 601(d), as the product of—

"(A) the population of such State, and

"(B) the square of its allotment percentage,

bears to the sum of corresponding products for all of the States."

SEC. 304. PRIORITY OF PROJECTS.

Section 603(a) of the Public Health Service Act is amended by striking "and" after subparagraph (6), by adding "and" after subparagraph (7), and by inserting after subparagraph (7) thereof the following new subparagraph:

"(8) in the case of projects for the construction of comprehensive ambulatory health care centers, to facilities located in densely populated areas where such facilities do not now exist, as determined by the Secretary.".

SEC. 305. STATE PLANS.

(a) Section 604(a)(4) of the Public Health Service Act is amended by redesignating subparagraphs (D) and (E) thereof as subparagraphs (E) and (F), respectively, and inserting after subparagraph (C) thereof the following new subparagraph:

"(D) the comprehensive ambulatory health care centers needed to provide adequate ambulatory health care services for patients residing in the State, including many services which traditionally have been rendered in hospitals, and a plan for distribution of such centers throughout the State.".

(b) Section 604(a)(5) of the Public Health Service Act is amended by inserting "comprehensive ambulatory health care centers" immediately after "outpatient facilities.".

SEC. 306. RECOVERY OF FUNDS.

Section 609(b) of the Public Health Service Act is amended by inserting "comprehensive ambulatory health care center," immediately after "outpatient facility,".

SEC. 307. LOAN GUARANTEES AND LOANS FOR MODERNIZATION AND CONSTRUCTION OF COMPRENSIVE AMBULATORY HEALTH CARE CENTERS.

Section 621 of the Public Health Service Act is amended by inserting "comprehensive ambulatory health care centers," immediately after "outpatient facilities," in paragraphs (1) and (2) of subsection (a) thereof.

SEC. 308. DEFINITION OF COMPREHENSIVE AMBULATORY HEALTH CARE CENTERS.

Section 645 of the Public Health Service Act is amended by adding after paragraph (l) the following new paragraph:

"(m) The term 'comprehensive ambulatory health care center' means a facility (located in or part from a hospital and whether or not part of a health maintenance orgnization) which is organized, equipped, and staffed so as to provide to individuals and families, on a coordinated and continuing basis, a broad range of ambulatory health services, and which—

"(1) has a staff of physicians licensed to practice medicine who provide medical and surgical care for patients not requiring hospitalization;

"(2) possesses or has reasonable access to one or more operating rooms and appropriate recovery rooms, adequately equipped and staffed, in accordance with standards promulgated by the Secretary, to perform those surgical procedures which can be safely performed on a nonconfinement basis;

"(3) is equipped to provide a broad range of diagnostic tests, including X-rays and electrocardiograms, and either has its own laboratory facilities or has reasonable access to such facilities;

"(4) maintains a unified medical record, stored in a central file, for each patient treated in such facility;

"(5) has arrangements with a general hospital and, to the extent possible, with convalescent institutions, home health agencies, and custodial care institutions to assure that services of such institutions will be available to patients of such facility when they can no longer be treated on an ambulatory basis;

"(6) provides preventive care services, including a health education program;

"(7) has a program of peer review to assure quality care and efficient utilization of services; and

"(8) has a program to utilize allied health personnel to assist its professional staff to the maximum extent practicable.".

SEC. 309. TRAINING FOR PERSONNEL NEEDED IN COMPREHENSIVE AMBULATORY HEALTH CARE CENTERS AND PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS.

(a) Section 788(d) of the Public Health Service Act is amended by striking "and" after paragraph (20), by adding "and" after paragraph (21), and by inserting after paragraph (21) the following new paragraph:

"(22) training of persons to administer and staff comprehensive ambulatory health care centers.".

(b) Section 788(e) of the Public Health Service Act is amended by adding after paragraph (2) the following paragraph:

"(3) In making grants from the sums authorized to be appropriated under paragraph (1) for fiscal years 1978, 1979 and 1980, priority shall be given to grants which carry out the purposes of paragraphs (18) and (22) of subsection (d) until the amount of such grants in each fiscal year equal $2,000,000 under paragraph (18) and $10,000,000 under paragraph (22).

TITLE IV—PROVISIONS TO ASSURE A COORDINATED NATIONAL HEALTH POLICY

SUBTITLE A—HEALTH REPORT OF THE PRESIDENT; HEALTH POLICY BOARD

SEC. 401. HEALTH REPORT OF THE PRESIDENT.

The President shall transmit to the Congress not later than July 1 of each year, beginning in 1978, a health report (hereinafter referred to as the "health report") which shall set forth (1) the status and condition of the health care system of the Nation; (2) current and foreseeable trends in the health care needs of the Nation, the organization, financing, delivery, and quality of health care services, and the effects of those trends on the health of Americans and the social, economic, and other requirements of the Nation; (3) the adequacy of available manpower and physical resources for fulfilling the health care needs of the Nation in the light of expected population pressures; (4) a review of the health programs and activities of the Federal Government, the State and local governments and nongovernmental entities, with particular reference to their contribution to the achievement of the policy set forth in title I of this Act; and (5) a program for carrying out the policy set forth in title I of this Act, together with recommendations for legislation.

SEC. 402. HEALTH POLICY BOARD.

There is created in the Executive Office of the President a Health Policy Board (hereinafter referred to as the "Board"). The Board shall be composed of three members who shall be appointed by the President to serve at his pleasure, by and with the advice and consent of the Senate. The President shall designate one of the members of the Board to serve as Chairman. Each member shall be a person who, as a result of his training, experience, and attainments is exceptionally well qualified to analyze and interpret trends in the health care field; to appraise programs and activities of the Federal Government in the light of the policy set forth in title I of this Act; and to formulate and recommend national policies to promote the improvement of health care.

SEC. 403. EMPLOYMENT OF OFFICERS, EMPLOYEES, EXPERTS AND CONSULTANTS

The Board is authorized to employ and fix the compensation of such officers and employees as may be necessary to carry out its functions under this Act. In addition, the Board may employ and fix the compensation of such experts and consultants as may be necessary to carry out its functions under this Act in accordance with section 3109 of title 5, United States Code (but without regard to the last sentence thereof).

SEC. 404. RESPONSIBILITIES OF BOARD.

(a) GENERAL FUNCTIONS AND DUTIES.—It shall be the duty and function of the Board—

(1) to assist and advise the President in the preparation of the health report;

(2) to review and appraise the health programs and activities of the Federal Government in the light of the policy set forth in title I of this Act for the purpose of determining the extent to which such programs and activities are contributing to the achievement of such policy, and to make recommendations with respect therefor;

(3) to develop and recommend procedures for the interagency coordination of Federal health programs, to propose interagency consolidations of programs and eliminations of programs to assure efficient, effective, and economic operation of all Federal health programs and to avoid waste and duplication;

(4) to develop and recommend goals for a national policy to foster and promote the improvement of the organization, financing, delivery and quality of the Nation's health care;

(5) to conduct studies, surveys, research, and analyses relating to health care in the Nation;

(6) to conduct a continuous evaluation of policies and programs related to the Nation's health care and make recommendations for the revision, expansion, and improvement of such policies and programs, including the assignment of priorities to the implementation of such recommendations in accordance with their relative urgency or desirability;

(7) to develop and recommend measures designed to assure the provision of adequate manpower, services, and facilities for the Nation's health care, including the mobilization, allocation, utilization, and retention of such manpower, services, and facilities;

(8) to develop and recommend guidelines for the allocation of funds for health care designed to furnish all citizens equal access to quality health care; and

(9) to make and furnish such studies, reports thereon, and recommendations with respect to matters of health care policy and legislation as the President may request.

(b) ANNUAL HEALTH REPORT TO THE PRESIDENT.—The Board shall submit to the President a first report not later than April 1, 1978, and an annual report not later than April 1 of each year thereafter. Each such report shall also be transmitted to the Congress supplementary to the next health report of the President.

(c) CONTENTS OF INITIAL ANNUAL HEALTH REPORTS.—In its first report and in the first of its annual reports to the President as required by subsection (b) of this section, the Board shall (1) specially report on all Federal programs which provide grants, loans, or other financial aids for the training and development of health manpower of any type; (2) appraise the adequacy of such programs to meet the health care needs of the Nation; (3) develop and recommend procedures for the consolidation, coordination, expansion, and improved efficiency of administration of such existing programs; and (4) develop and recommend measures designed to assure the wider dissemination of public information regarding the existence and purpose of such programs, the aids available there under, and the advantages and benefits of training for career opportunities in the health, nursing, and allied health professions.

SEC. 405. CONSULTATION WITH OTHER ADVISORY BODIES AND REPRESENTATIVE GROUPS; COOPERATIVE UTILIZATION OF SERVICES, FACILITIES, AND INFORMATION.

In exercising its powers, functions, and duties under this Act, the Board shall—

(1) consult with the National Council on Health Planning and Development estab-

lished by section 1503 of title XV of the Public Health Service Act, with any other advisory council or committee concerned with health required by Federal law, and with such representatives of consumer groups, providers of health care, health researchers and educators, insurers, health service organizations, public agencies concerned with health care, voluntary health and welfare organizations, and other groups, as it deems advisable;

(2) utilize, to the fullest extent possible, the services, facilities, and information (including statistical information) of public and private agencies and organizations, and individuals, in order that duplication of effort and expense may be avoided, thus assuring that the Board's activities will not unnecessarily overlap or conflict with similar activities authorized by law and performed by established agencies.

SEC. 406. COMPENSATION OF MEMBERS.

Members of the Board shall serve full time and the Chairman of the Board shall be compensated at the rate provided for level II of the Excutive Schedule Pay Rates (5 U.S.C. 5313). The other members of the Board shall be compensated at the rate provided for level IV of the Excutive Schedule Pay Rates (5 U.S.C. 5315).

SEC. 407. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as may be necessary to enable the Board to carry out its functions under this Act.

SUBTITLE B—DEPARTMENTAL RECOMMENDATIONS AND REPORTS

SEC. 411. STATEMENTS REGARDING EFFECT OF DEPARTMENTAL PROPOSAL ON NATION'S HEALTH CARE.

(a) The Congress authorizes and directs that, to the fullest extent possible, all agencies of the Federal Government shall include in every recommendation or report on proposals for legislation and other major Federal actions significantly affecting human health and the organization, financing, delivery, and quality of the Nation's health care, whether with regard to all citizens generally or only to classes or segments of the public, a detailed statement by the responsible official on—

(1) the impact of the proposed action on human health and the Nation's health care system;

(2) any adverse effects which cannot be avoided should the proposal be implemented;

(3) alternatives to the proposed action;

(4) the relative priority, if any, assigned to the proposed action (or to any similar or alternative proposal designed to fulfill the same immediate purpose or need) by the Health Policy Board established by subtitle A of this title in its most recent report to the President submitted pursuant to section 404 (b) thereof; and

(5) any irreversible and irretrievable commitments of resources which would be involved in the proposed action should it be implemented.

(b) Prior to making any detailed statement required by subsection (a), the responsible Federal officials shall consult with and obtain the comments of any Federal agency which has jurisdiction by law or special expertise with respect to any impact on human health and the Nation's health care system. Copies of such statement and the comments and views of the appropriate Federal, State, and local agencies which has responsibilities in such areas shall be made available to the President, the Health Policy Board, and to the public as provided by section 552 of title 5, United States Code, and shall accompany the proposal through the existing agency review processes.

SEC. 412. AGENCY OBLIGATIONS UNDER OTHER FEDERAL STATUTES.

Nothing in section 411 shall in any way affect the specific statutory obligations of any Federal agency (1) to accord priorities or preferences to applications for Federal financial aids in public health and health care programs and activities, based on factors required to be considered by law or regulations pursuant thereto, (2) to coordinate or consult with any other Federal or State agency, or (3) to act, or refrain from acting, contingent upon the recommendations or certification of any other Federal or State agency.

TITLE V—PROVISIONS TO MAKE COMPREHENSIVE HEALTH CARE INSURANCE AVAILABLE TO ALL

SUBTITLE A—ESTABLISHMENT OF MINIMUM STANDARD HEALTH CARE BENEFITS

SEC. 501. DEFINITION OF MINIMUM STANDARD HEALTH CARE BENEFITS.

(a) IN GENERAL.—Part VII of subchapter B of chapter 1 of the Internal Revenue Code of 1954 is amended by adding after section 221 the following new section:

"SEC. 222. MINIMUM STANDARD HEALTH CARE BENEFITS.

"(a) IN GENERAL.—For purposes of this title, the minimum standard health care benefits for a covered individual for any given benefit year shall, subject to the other provisions of this section, be equal to the sum of—

"(1) 100 percent of the category I expenses incurred by the individual in that year, and

"(2) 80 percent (50 percent in the case of items (c)(2)(C) and (c)(2)(N)) of the excess, if any, of the category II expenses incurred by the individual in that year over the deductible except that in no event shall the aggregate of the deductibles and copayments assessed in any given benefit year against the category II expenses incurred in that year by all covered members of a given family exceed an amount equal to ten times the deductible applicable to that year.

"(b) CATEGORY I EXPENSES.—

"(1) Category I expenses shall be the charges for the following services and articles:

"(A) diagnostic X-rays and laboratory tests, performed other than while an inpatient in a hospital or skilled nursing facility,

"(B) well child care, including immunizations, for children under age 5.

"(C) one oral examination per year, including prophylaxis, dental X-rays, topical application of fluoride and insertion of space maintainers, by a dentist or, at his direction, a dental hygienist, for children under age 13,

"(D) one eye refraction per year by a physician for children under age 13,

"(E) one pre-natal examination by a physician during each trimester of a pregnancy.

"(c) CATEGORY II EXPENSES.—

"(1) Prior to January 1, 1987, category II expenses shall be the charges for the services and articles described in items (A) through (L) of subsection (c)(2).

"(2) On and after January 1, 1987, category II expenses shall be the charges for the following services and articles to the extent not covered under category I:

"(A)(i) hospital board, room, and routine nursing services for other than the first day of hospital confinement in any given benefit year plus other hospital inpatient services, subject to a limit in the case of one or more confinements for one or more mental conditions to such of these services as are provided during the first ninety days of all such confinements in any given benefit year,

"(ii) hospital services and comprehensive ambulatory health care center services not otherwise described in this subsection that are rendered, on other than an inpatient basis, in connection with either a medical emergency or surgery,

"(B) professional services for the diagnosis or treatment of injuries, illnesses, or conditions, other than mental or dental, which are rendered by a physician, practicing either as an individual or as part of an organized entity, or, at his direction, by a staff of registered graduate nurses or allied health professionals,

"(C) the first twenty professional services for the diagnosis or treatment of one or more mental conditions rendered during the year by one or more physicians, practicing as individuals or as part of one or more organized entities, or, at their direction, by a staff of registered graduate nurses or allied health professionals,

"(D) drugs and contraceptive devices requiring a physician's prescription,

"(E) services of a skilled nursing facility for not more than 180 days in a year, provided use of these services commences within 14 days of the termination of a hospital confinement which lasted at least 3 days and which was for the same or a related condition,

"(F) services of a home health agency up to a maximum of 270 services in a year,

"(G) use of radium or other radioactive materials,

"(H) oxygen,

"(I) anesthetics,

"(J) prostheses, other than dental,

"(K) rental, or purchase if the carrier deems purchase would be less expensive, of durable medical equipment which has no personal use in the absence of the condition for which prescribed,

"(L) oral surgery for excision of:

"(i) partially or completely unerupted impacted teeth, or

"(ii) a tooth root without extraction of the entire tooth,

"(M) amalgam, acrylic, synthetic porcelain, and composite fillings and extractions including general anesthetic in connection therewith; injection of antibiotic drugs which are rendered by a dentist or, at his direction, by a staff of allied health professionals,

"(N) other dental services and prostheses, exclusive of orthodontia, which are rendered by a dentist or, at his direction, by a staff of allied health professionals,

"(O) services of a physical therapist,

"(P) services of a speech therapist,

"(Q) one eye refraction every 3 years by a physician for individuals age 13 or older,

"(R) one pair of eyeglasses per prescription, with a limit of one prescription per year for an individual under age 19 and one prescription every 3 years for an individual age 19 or older; with contact lenses considered as a pair of eyeglasses only when required as an integral part of intraocular surgery,

"(S) one hearing examination every 3 years by a physician or audiologist,

"(T) one hearing aid every 3 years for individuals under age 19 and one per lifetime for individuals age 19 or older,

"(U) one physical examination every 5 years for individuals age 5 years or older,

"(V) counseling on family planning and fitting of contraceptive device by a physician or an authorized member of his staff,

"(W) one Papanicolaou smear test every 2 years for women age 19 or over.

"(d) DEDUCTIBLES.—The deductible for each benefit year commencing prior to January 1, 1980, shall be $100. The deductible for each benefit year commencing on or after January 1, 1980, shall be $100 times the ratio of the Consumer Price Index for July of the calendar year next preceding the calendar year in which the benefit year commences to the Consumer Price Index for July 1978,

which product, if not an even multiple of $10, shall be taken to the next lower multiple of $10. Covered expenses incurred and actually applied toward an individual's deductible during the last 3 months of 1 benefit year shall be carried over and applied toward the deductible of that person for the following benefit year.

"(e) EXCLUSIONS.—Charges for the services and articles specified in subsections (b) and (c) do not include any of the following:

"(1) Any charge for any care for any injury or disease either—

"(A) arising out of and in the course of an employment subject to a workmen's compensation or similar law, or

"(B) for which benefits are payable without regard to fault under a coverage statutorily required to be contained in any liability insurance policy or equivalent self-insurance,

"(2) any charge for treatment for cosmetic purposes other than surgery for the prompt repair of a non-occupational injury.

"(3) any charge for travel, other than travel by local professional ambulance to the nearest health care institution qualified to treat the illnes or injury.

"(4) any charge for confinement in a private room to the extent the charge is in excess of the institution's charge for its most common semiprivate room,

"(5) any charge by health care institutions to the extent that it is determined under section 2108 of title XXI of the Social Security Act that the charge exceeds the rates approved thereunder,

"(6) any charge for services or articles rendered or prescribed by a physician, dentist, or other health care personnel to the extent that it is determined under the procedures established in section 2102(e)(1) of title XXI of the Social Security Act that the charge is unreasonable or that the services or articles for which the charge is made are not necessary,

"(7) any charge for services or articles, the provision of which is not within the scope of the license or certificate of the institution or individual rendering such services or articles, or with respect to which the State requires a certificate of need but such certificate of need had not been received at the time the service was rendered or the article furnished.

"(8) any charge for the treatment of flat foot conditions or the prescription of supportive devices therefor, the treatment of subluxations of the foot, or routine foot care (including the cutting or removal of corns or calluses, the trimming of nails and other routine hygienic care) except when the patient is being treated for a peripheral-vascular disease that is so severe that routine foot care not under the direct supervision of a physician would be hazardous to the patient,

"(9) any charge for orthoptics (eye exercises), or

"(10) any charge for custodial care.

"(F) DEFINITIONS.—In applying this section—

"(1) the term 'physician' means an individual who is licensed or certified by the State as a doctor of medicine; doctor of osteopathy; doctor of podiatry; doctor of optometry; for purposes of oral surgery, doctor of dental surgery or doctor of medical dentistry; and, for purposes of mental conditions, a psychologist who meets the conditions set forth in (2).

"(2) The term 'psychologist' means a person who is duly licensed or certified as a psychologist and has a doctoral degree in clinical psychology and at least 2 years of supervised experience in clinical psychology at a licensed hospital or community mental health center.

"(3) The terms 'skilled nursing facility,' 'home health agency' and 'hospital' (herein referred to as 'health care institutions'), and 'home health services' shall have the meanings assigned to them in section 1861 of the Social Security Act.

"(4) The term 'copayment' means the portion of category II expenses that is not payable by a qualified health care plan and which is thus the obligation of the covered individual concerned to pay.

"(5) The term 'covered individual' means an individual who is covered under a qualified health care plan, except that an individual covered under a qualified employee health care plan who is not required to be so covered pursuant to section 290(c)(5) shall not be treated as a covered individual unless he is eligible under such plan for at least the minimum standard health care benefits.

"(6) The term 'qualified health care plan' means a qualified employee health care plan (as defined in section 290(c) of the Internal Revenue Code of 1954), a qualified individual health care plan (as defined in section 213(g) of the Internal Revenue Code of 1954) or a qualified State health care plan (as defined in section 2102 of the Social Security Act).

"(7) The term 'confinement' means confinement on an inpatient basis in a health care institution.

"(8) The term 'comprehensive ambulatory health care center' shall have the meaning prescribed by section 645(m) of the Public Health Service Act.

"(9) The term 'benefit year' means a period of 12 consecutive months during which the deductible must be met.

"(10) The term 'participating physician' means a physician who then has in effect an agreement with the administering carrier of the qualified State health care plan, as defined in section 2102(a) of the Social Security Act, applicable to the State in which the physician renders the service for which a benefit is to be provided, which agreement indicates that, during its existence, the physician will not charge any patient covered under a qualified health care plan more than the prevailing charge for the service rendered, as defined in section 2102(e)(1)(A) of the Social Security Act, and as determined by the carrier of the patient's plan.

"(11) The term 'custodial care' means care comprised of services and supplies, including room and board and other institutional services, which are provided to an individual, whether disabled or not, primarily to assist him in the activities of daily living. Such services and supplies are custodial care without regard to the practitioner or provider by whom or by which they are prescribed, recommended or performed.

"(g) LIMITATIONS ON MALPRACTICE JUDGMENTS.—In any litigation in any court of the United States or any State seeking damages for injury caused by negligence or other fault in the furnishing of any service or article covered under a qualified health care plan or under any title of the Social Security Act, no damages shall be awarded for the cost of remedial services for which the injured party was or is entitled to have payment made under this Act (or for which he would have been, or would be, entitled to have payment made upon obtaining the services from a physician or health care institution)."

(b) CONFORMING CLERICAL AMENDMENT.—The table of sections for such part VII is amended by striking out the last item and inserting in lieu thereof:

"Sec. 22. Minimum standard health care benefits.

SUBTITLE B—QUALIFIED EMPLOYEE HEALTH CARE PLANS

Sec. 511. EMPLOYER'S DEDUCTION FOR EMPLOYEE HEALTH CARE EXPENDITURES.

(a) IN GENERAL.—Subchapter B of chapter 1 of subtitle A of the Internal Revenue Code of 1974 is amended by adding at the end thereof the following new part:

"Part XI—Employee Health Care

"Sec. 290. EMPLOYER'S DEDUCTION FOR EXPENDITURES FOR EMPLOYEE HEALTH CARE.

"(a) LIMITATION ON DEDUCTION.—Except as provided in subsection (b), no deduction shall be allowed for the disallowed percentage of any amount otherwise allowable as a deduction for the taxable year under section 162, 212, or 404 for any amount paid or incurred by the taxpayer for medical care of any employee of the taxpayer, the employee's spouse, or any dependent of the employee. The disallowed percentage of the amount referred to in the preceding sentence is—

"(1) 50 percent if the amount is paid or incurred in 1979,

"(2) 75 percent if the amount is paid or incurred in 1980, and

"(3) 100 percent if the amount is paid or incurred after 1980.

"(b) EXCEPTIONS AND LIMITATIONS.—Subsection (a) shall not apply to any amount paid or incurred by the taxpayer—

"(1) WHERE EMPLOYER MAINTAINS QUALIFIED EMPLOYEE HEALTH CARE PLAN.—For any portion of the taxable year during which the taxpayer has in force a qualified employee health care plan which satisfies all the requirements of subsection (c).

"(2) TAXES.—As a tax imposed by the United States, a possession of the United States, a State, or a political subdivision of the foregoing, or by the District of Columbia

"(3) MEDICAL CARE PROVIDED DIRECTLY BY EMPLOYER.—To directly provide medical care, through health care personnel who are employees of the taxpayer, principally for employees of the taxpayer, or to acquire or maintain equipment or supplies to be used by such personnel for such purpose.

"(c) QUALIFIED EMPLOYEE HEALTH CARE PLAN DEFINED.—For the purposes of this title, the term 'qualified employee health care plan' means a plan of employee health care benefits (as defined in subsection (d)(4)) which satisfies all of the following requirements:

"(1) IN WRITING.—The plan must be in writing.

"(2) ADOPTED BY EMPLOYER.—The plan must be adopted by the taxpayer employer except that trustee plans established pursuant to the Labor Management Relations Act of 1947 shall be deemed to be adopted by the employer.

"(3) COMMUNICATION TO EMPLOYEES.—The terms of the plan must be communicated by the taxpayer to his employees.

"(4) MINIMUM STANDARD HEALTH CARE BENEFITS.—The plan must provide at least the minimum standard health care benefits described in section 222.

"(5) ELIGIBILITY.—The plan must be one under which the individuals eligible to be covered include at least—

"(A) each qualified employee of the taxpayer,

"(B) any such employee's spouse, and

"(C) any such employee's dependent unmarried child who is either under age 19 or under age 25 and a full-time student at an accredited institution of learning.

"(6) COVERAGE CONTINUATION.—The plan must provide for continuation of coverage under each of the following circumstances:

"(A) Upon layoff or termination of employment other than as a result of death of the employee, the employee must be permitted to have coverage under the plan continued for himself and for his covered dependents to the end of the second calendar month following the calendar month in which employment terminated.

"(B) Upon the death of an employee, his covered dependents must be permitted to have coverage under the plan continued to the end of the second calendar month following the calendar month in which death occurred.

"(C) During an employee's absence due to illness or injury, coverage for the employee and his covered dependents must be permitted to continue for up to 30 months from the beginning of such absence.

"(D) Coverage for an employee's dependent unmarried child must be permitted to continue beyond the child's 19th birthday, if the child was covered under the plan prior to attaining age 19, became totally disabled prior to that age, and remains so disabled. The employee must not be required to contribute more for such coverage than would have been required were the child a dependent under age 19.

"(E) Any employee or dependent entitled to continuation of coverage under any of the above subparagraphs at a time when the employer changes his plan and who would thereby lose his continuation of coverage, must be eligible under any successor plan for not less than the continuation of the coverage that would have been required to be continued had the prior plan remained unchanged.

"(F) For purposes of this paragraph, a 'covered dependent' is any individual, other than the employee, who by reason of his relationship to the employee was covered as a dependent under the plan just prior to the event described in subparagraph (A), (B), or (C). A child born after the event described in subparagraph (A), (B), or (C) but before the end of the continuation period so specified, shall be deemed a covered dependent. Coverage for a covered dependent shall not be required to be continued beyond the date the dependent would have ceased to be eligible for coverage as a dependent if the event described in subparagraph (A), (B), or (C) had not occurred.

"(H) Notwithstanding subparagraphs (A), (B), and (C), coverage need not be continued for a covered individual beyond the date such individual first becomes eligible for benefits under title XVIII of the Social Security Act.

"(7) COORDINATION OF BENEFITS PROVISION.—The plan must include a provision identical with or substantially similar to the suggested model group antiduplication provision as modified and interpreted in the report of the industry task force on coordination of benefits attached to the report of the C-1 Accident and Health Protection Subcommittee as set forth in Volume I of the 1971 proceedings of the National Association of Insurance Commissioners.

"(8) OPTIONAL PROVISIONS.—The plan shall not be treated as failing to meet the requirements of this subsection by reason of the inclusion therein of any one or more of the following optional provisions:

"(A) DEDUCTIBLE.—The plan may require a lesser deductible or waive it entirely with respect to one or more items of covered expense.

"(B) COPAYMENTS.—The plan may require lesser copayments or none at all with respect to one or more items of covered expense.

"(C) ADDITIONAL BENEFITS AND COVERAGE.—The plan may provide any benefits for medical care in addition to the minimum standard health care benefits described in section 222 and may also cover any individual in addition to the individuals required under paragraph (5) to be made eligible for coverage.

"(D) EMPLOYEE CONTRIBUTIONS.—The plan may require employee contributions toward its cost; except that the maximum employee contribution shall not exceed the lesser of—

"(i) 50 percent of the premium rate currently charged under the plan for the employee's coverage for himself and his then covered dependents, if any; or

"(ii) 10 percent of the excess, if any, of the employee's wages paid by the employer during the preceding calendar month over one-twelfth of the amount specified in section 2106(g) of title XXI of the Social Security Act.

When a plan requires employee contributions, the plan must provide each eligible employee who is not then enrolled a period of at least 30 days each year in which to decide whether to enroll in the plan. An employee who elects not to enroll during any such period will not again be eligible to enroll until the next such period.

"(d) DEFINITIONS.—For purposes of this section—

"(1) EMPLOYEE.—The term 'employee' shall have the meaning prescribed by section 3121 (d).

"(2) MEDICAL CARE.—The term 'medical care' shall have the meaning prescribed by paragraph (1) without regard to paragraphs (2) and (3) of section 213(e).

"(3) DEPENDENT.—The term 'dependent' as used in this section in reference to a dependent of an employee means an individual over half of whose support, for the calendar year in which the taxable year of such employee begins, was received from such employee.

"(4) PLAN OF EMPLOYEE HEALTH CARE BENEFITS.—The phrase 'plan of employee health care benefits' as used in subsection (c) includes—

"(A) a contract or contracts of insurance (whether one or more group contracts or a group of individual contracts) covering medical care for employees;

"(B) any uninsured arrangement established by an employer to provide medical care for employees;

"(C) an arrangement to secure medical care for employees from any approved health maintenance organization;

"(D) any insured or uninsured trustee arrangement set up pursuant to the Labor Management Relations Act of 1947; and

"(E) any combination of contracts or arrangements described in subparagraphs (A), (B), (C) or (D).

"(5) APPROVED HEALTH MAINTENANCE ORGANIZATION.—The term 'approved health maintenance organization' shall have the meaning prescribed by section 2115(m) of title XXI of the Social Security Act.

"(6) QUALIFIED EMPLOYEE.—The term 'qualified employee' means, with respect to any employer, any employee who—

"(A) either—

"(i) has been such an employee for more than 2 consecutive calendar months; or

"(ii) furnishes the employer proof that on the day before he became an employee of that employer he was covered and had been continuously covered for at least 2 consecutive calendar months under either another qualified employee health care plan or a qualified State health care plan and is now no longer eligible for coverage or continuation of coverage under such qualified health care plan; and

"(B) either—

"(i) is considered to be a full-time employee; or

"(ii) is not considered to be a full-time employee, but who is expected to work at least 20 hours a week for at least the next two calendar months; or

"(iii) is not considered to be a full-time employee, but who has actually worked at least 20 hours a week for at least the two immediately preceding calendar months:

Provided, however, That, as to trustee plans established pursuant to the Labor Management Relations Act of 1947, the term 'qualified employee' means a person eligible to be covered under such trustee plan."

"(7) CHILD.—The term 'child' means a son or daughter of the employee including a legally adopted son or daughter."

(b) CONFORMING CLERICAL AMENDMENTS.—(1) Section 162(h) of the Internal Revenue Code of 1954 (relating to cross references) is amended by adding at the end thereof the following new paragraph:

"(3) For limitation on employer's deduction for employee health care, see section 290."

(2) Section 404 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new subsection:

"(h) CROSS REFERENCE.—

"For limitation on employer's deduction for employee health care, see section 290."

(3) Section 212 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following cross reference:

"CROSS REFERENCE.—

"For limitation on employer's deduction for employee health care, see section 290."

(4) The table of sections for — of subchapter B of chapter I of subtitle A of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new item:

PART XI—EMPLOYEE HEALTH CARE

"SEC. 290. EMPLOYER'S DEDUCTION FOR EXPENDITURES FOR EMPLOYEE HEALTH CARE."

(c) EFFECTIVE DATE.—(1) Except as provided in paragraph (2), the amendments made by this section shall apply to taxable years ending after December 31, 1978.

(2) CERTAIN COLLECTIVELY BARGAINED PLANS.—In the case of any plan providing benefits for medical care of employees which was established by an employer taxpayer pursuant to an agreement which resulted from collective bargaining between the employer and representatives of his employees and which has not expired at the time specified in paragraph (1), the amendments made by this section shall not apply to such employer taxpayer until the first taxable year beginning after the last date such agreement is in effect or the date two years after the time specified in paragraph (1), whichever such date occurs first.

SUBTITLE C—QUALIFIED INDIVIDUAL HEALTH CARE PLANS

SEC. 521. QUALIFIED INDIVIDUAL HEALTH CARE PLANS.

(a) UNLIMITED DEDUCTION FOR MEDICAL INSURANCE EXPENSES OF INDIVIDUAL COVERED BY QUALIFIED HEALTH CARE PLAN.—Section 213 (a) (2) (relating to individual's deduction for medical insurance expense) of the Internal Revenue Code of 1954 is amended to read as follows:

"(2) the sum of—

"(A) an amount (not in excess of $150) equal to one-half of the expenses (other than those deductible under subparagraph (B)) paid during the taxable year for insurance which constitutes medical care for the taxpayer, his spouse, and dependents (as defined in section 152); and

"(B) in the case of a taxpayer who at any time during the taxable year is covered under a qualified health care plan (as defined in section 222), an amount equal to all the expenses paid during the taxable year for any insurance (whether provided under such qualified health care plan or otherwise) which constitutes medical care for the taxpayer, his spouse, or dependents (as defined in section 152), and which constitutes coverage during such portion of the taxable year as the taxpayer is covered by such qualified health care plan.".

(b) DEFINITION OF QUALIFIED INDIVIDUAL

HEALTH CARE PLAN.—Section 213 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new subsection:

"(g) QUALIFIED INDIVIDUAL HEALTH CARE PLAN DEFINED.—For purposes of this title, the term 'qualified individual health care plan' means insurance which covers medical care referred to in subparagraphs (A) and (B) of subsection (e)(1), as modified by paragraphs (2) and (3) of subsection (e), and which satisfies all of the following requirements:

"(1) MINIMUM STANDARD HEALTH CARE BENEFITS.—The plan must provide at least the minimum standard health care benefits described in section 222.

"(2) CONTRACT REQUIREMENTS.—Each contract of insurance forming a part of the plan must contain provisions—

"(A) which obligate the insurer to renew the contract until the earlier of—

"(i) the date on which the individual in whose name the contract was issued first becomes eligible for coverage under title XVIII of the Social Security Act, or

"(ii) July 1 of the year in which the insurer shall have given at least 120 days prior notice that it is nonrenewing all contracts issued in that State that either then qualify under subsection (g) or previously have so qualified and that it will no longer issue such contracts, and which also reserve to the insurer the right to adjust premium rates by classes in accordance with its experience under the type of contract involved;

"(B) which, if issued prior to January 1, 1987, enable the individual in whose name the contract was issued to secure on January 1, 1987, without evidence of insurability, the minimum standard health care benefits then effective; and

"(C) which, upon the death of the individual in whose name the contract was issued, permit every other individual then covered under the contract to elect (within such period as shall be specified in the contract) to continue his coverage (under the same or a different contract) until such time as he would have ceased to be entitled to coverage had the individual in whose name the contract was issued lived.

"(3) OPTIONAL PROVISIONS.—An insurance contract shall not be treated as failing to meet the requirements of this subsection by reason of the inclusion therein of any one or more of the following optional features:

"(A) INSURANCE WITH OTHER INSURERS.—The contract may contain a provision coordinating its benefits with any other contract if such provision is approved by the appropriate regulatory authority of the State of issue.

"(B) DEDUCTIBLES.—The contract may require a lesser deductible or waive it entirely with respect to one or more items of covered expense.

"(C) COPAYMENTS.—The contract may require lesser copayments or none at all with respect to one or more items of covered expense.

"(D) ADDITIONAL BENEFITS.—The contract may provide any benefits for medical care in addition to the minimum standard health care benefits."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after December 31, 1978.

SEC. 522. PROCEDURE FOR RULINGS ON QUALIFICATION OF EMPLOYEE AND INDIVIDUAL HEALTH CARE PLANS.

In exercise of the power to issue rulings which is vested in him under section 7805 of the Internal Revenue Code of 1954, the Secretary of the Treasury (or his delegate) may accept the determination of the State insurance regulatory authority that a plan of health care benefits filed with and approved by such authority is a plan satisfying all requirements for qualification either as a qualified employee health care plan (as defined in section 290(c) of the Internal Revenue Code of 1954) or as a qualified individual health care plan (as defined in section 213(g) of the Internal Revenue Code of 1954).

SEC. 523. REGULATIONS.

Any regulations promulgated by the Secretary of the Treasury (or his delegate) with regard to amendments of the Internal Revenue Code of 1954 made by subtitle A, B, or C of this title shall be promulgated in final form not less than 120 days prior to the first day of the calendar year during which they will apply. Such regulations shall be effective only if (a) promulgated in final form within the time prescribed in the preceding sentence, and (b) notice of such regulation in proposed form and of opportunity for public hearing thereon shall have been published not less than 60 days prior to the date of promulgation thereof in final form.

SUBTITLE D—GRANTS TO STATES FOR QUALIFIED STATE HEALTH CARE PLANS FOR THE NEEDY

SEC. 531. GRANTS TO STATES FOR QUALIFIED STATE HEALTH CARE PLANS.

The Social Security Act is amended by adding after title XX the following new title:

"TITLE XXI—GRANTS TO STATES FOR QUALIFIED STATE HEALTH CARE PLANS

"Sec. 2101. Appropriations.
"Sec. 2102. Qualified State health care plan definition.
"Sec. 2103. Eligibility for enrollment.
"Sec. 2104. Determination and review of premium rates.
"Sec. 2105. Procedure for enrollment.
"Sec. 2106. Individual and family contributions and State premium payments.
"Sec. 2107. Extension and termination of coverage.
"Sec. 2108. Approval of institutional rates of reimbursement by State health care institutions cost commissions.
"Sec. 2109. Review of levels of institutional rates of reimbursement by Secretary of Health, Education, and Welfare.
"Sec. 2110. Operation of the qualified State health care benefits pool.
"Sec. 2111. Furnishing of information by other agencies.
"Sec. 2112. Payments to States.
"Sec. 2113. Eligibility of those now covered under certain State or Federal programs.
"Sec. 2114. Premium taxes.
"Sec. 2115. Definitions.
"Sec. 2116. Protection against insolvency.
"Sec. 2117. Regulations.
"Sec. 2118. Underwriting and reinsurance facilities.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 2101. For the purpose of providing comprehensive health care insurance to needy individuals and families in a manner which will enhance personal dignity, there is authorized to be appropriated for each fiscal year a sum sufficient to carry out this title. The sums appropriated pursuant to this section shall be used for making payments to States which have qualified State health care plans which have been approved by the Secretary of Health, Education, and Welfare.

"QUALIFIED STATE HEALTH CARE PLAN DEFINITION

"General Rule

"SEC. 2102 (a) A qualified State health care plan shall be a contract or other agreement between a State and an administering carrier designated by the State with the approval of the Secretary, which provides for payment to practitioners, health care institutions, and other providers of health care, on behalf of the individuals and families required under section 2103 to be made eligible therefor, of the minimum standard health care benefits described in section 222 of the Internal Revenue Code of 1954, subject to the modifications specified in (d) of this section, and which requires the administering carrier to make and publish agreements with physicians desiring to be participating physicians as defined in section 222(f) of the Internal Revenue Code of 1954.

"Option To Elect Coverage Under an Approved Health Maintenance Organization

"(b) An individual or family eligible for enrollment in the qualified State health care plan under section 2103 may, upon written request, submitted to the administering carrier with his enrollment application, elect coverage, if available, under an arrangement between the administering carrier and an approved health maintenance organization (as defined in section 2115(m)), in lieu of coverage under the qualified State health care plan: *Provided, however,* That the charges made to the State through the administering carrier for such alternative coverage shall not exceed the average charge that would have been made to the State had the individual or family not made such election and had enrolled instead in the qualified State health care plan.

"Reinsurance Condition

"(c) The contract risk under a qualified State health care plan shall be reinsured, through the qualified State health care benefits pool described in section 2110, by all carriers (profit and nonprofit) licensed in or otherwise authorized by the State to issue coverage for one or more items of health care, by all approved health maintenance organizations doing business in the State, and by all other persons in the State who provide uninsured plans that are qualified employee health care plans (as defined in section 290 of the Internal Revenue Code of 1954).

"Deductible

"(d)(1) The amount of the deductible for any given policy year shall be the figure shown in the first column of table A corresponding to the applicable adjusted gross income shown in table A for the size of family concerned.

"TABLE A

Deductible	Adjusted gross income		
	Single individual	Family of 2	Family of 3 or more
$10	Less than $1,000	Less than $1,500	Less than $2,000.
$20	$1,000 but less than $1,500	$1,500 but less than $2,250	$2,000 but less than $3,000.
$30	$1,500 but less than $2,000	$2,250 but less than $3,000	$3,000 but less than $4,000.
$40	$2,000 but less than $2,500	$3,000 but less than $3,750	$4,000 but less than $5,000.
$50	$2,500 but less than $3,000	$3,750 but less than $4,500	$5,000 but less than $6,000.
$60	$3,000 but less than $3,500	$4,500 but less than $5,250	$6,000 but less than $7,000.
$70	$3,500 but less than $4,000	$5,250 but less than $6,000	$7,000 but less than $8,000.
$80	$4,000 but less than $4,500	$6,000 but less than $6,750	$8,000 but less than $9,000.
$90	$4,500 but less than $5,000	$6,750 but less than $7,500	$9,000 but less than $10,000.

"(2) At such times as the operation of section 2103(a)(4) may cause individuals or families with adjusted gross incomes in excess of those shown in table A to become eligible for the qualified State health care plan, the deductible applicable to such individuals or families shall be determined by adding to $90—

"(A) $10 for each $500 or fraction thereof by which the adjusted gross income of a single individual exceeds $5,000,

"(B) $10 for each $750 or fraction thereof by which the adjusted gross income of a family of two exceeds $7,500, or

"(C) $10 for each $1,000 or fraction thereof by which the adjusted gross income of a family of three or more exceeds $10,000.

"(3) For the purpose of this subsection, the adjusted gross income to be used shall be that for the last taxable year preceding April 1 of the calendar year in which the policy year commences.

"(4) Covered expenses incurred and actually applied toward an individual's deductible during the last three months of one policy year shall be carried over and applied toward the deductible of that person for the following policy year.

"(5) The limit on the aggregate of deductibles and copayments assessed in any one policy year shall be ten times the amount of the deductible determined for that policy year.

"Limitations

"(e)(1)(A) No charge for a benefit otherwise described by this section, other than charges by a health care institution, shall be reimbursed to the extent that it exceeds a reasonable charge. In determining the reasonable charge for a given health care service or article there shall be taken into consideration the charge for the service or article when rendered under comparable conditions, which is customarily made by the physician, or other person furnishing such service or article, but in no event shall the payment be in excess of the prevailing charge in the locality for the service or article. The prevailing charge in a locality for the period from July 1 of a given calendar year through June 30 of the following calendar year shall be the amount which the administering carrier determines to be the seventy-fifth percentile of a low to high distribution of the actual charges made for similar services or articles by all physicians in the same locality during the calendar year immediately preceding the given year. However, if the percentage increase in the prevailing charge (so determined) from one period to the next would be greater than the percentage increase in the Consumer Price Index during the preceding calendar year, then the prevailing charge for such next period shall be that used for the prior period increased by the same percentage increase as had occurred in the Consumer Price Index. When for any reason in any given period this method of calculation shall produce a prevailing charge for any service or article which in the opinion of the administering carrier is unreasonable or inequitable, the prevailing charge for that service or article in that period shall be determined by the administering carrier in accordance with regulations specified by the Secretary for this purpose.

"(B) No charge by a physician (as defined in section 222(f)(1) of the Internal Revenue Code of 1954) for a benefit otherwise described by this section shall be reimbursed to the extent that it is for health care services or articles rendered by the physician or at his direction and determined not to be necessary according to utilization guidelines that have been established by physicians deemed competent by their peers. Payment for health care services or articles beyond such guidelines may be made only if approved by the health professional staff of the administering carrier of the qualified State health care plan, after review by a professional standards review organization established by the physicians of the locality, if such exists, pursuant to part B of title XI of the Social Security Act.

"(C) No charges for care rendered in any health care institution shall be reimbursed if it is determined, in accordance with and subject to the provisions of section 2108, that the health care institution is not complying with the prospective rate approval conditions established by section 2108.

"(2) No charge for a benefit otherwise described by this section shall be reimbursed to the extent it is a proper reimbursement or would be in the absence of this title under any other insurance plan providing health care benefits, including, but not limited to, benefits provided under title XVIII of the Social Security Act.

"Optional Election of Services of Christian Science Practitioner

"(f) An individual or family eligible for enrollment in a qualified State health care plan under section 2103 may elect, in writing, at the time the individual or family makes application for enrollment, to have the term 'physician' mean 'a Christian Science practitioner' listed as such in the Christian Science Journal current at the time the practitioner provides the service' in lieu of the meaning set forth in section 222(f)(1) of the Internal Revenue Code of 1954. Such election shall not apply to any service or article furnished in connection with a pregnancy or any complication thereof.

"ELIGIBILTY FOR ENROLLMENT

"Needy Individuals and Families

"SEC. 2103. (a) Every individual or family (as defined in section 2115(1))—

"(1) who is a resident of the State;

"(2) who is not eligible to enroll (through either spouse in the case of a family) in a qualified employee health care plan (as described by section 290(c) of the Internal Revenue Code of 1954);

"(3) who, if eligible to enroll in the supplementary medical insurance program for the aged described in part B of title XVIII of the Social Security Act, is, in fact, enrolled in said insurance program; and

"(4) who meets one of the three following conditions—

"(A) whose adjusted gross income for his or its last taxable year preceding April 1 of the calendar year in which the policy year, for which eligibility is being determined, commences was less than—

"(i) $5,000 times the ratio specified in item (5) for a single individual,

"(ii) $7,500 times the ratio specified in item (5) for a family of two, or

"(iii) $10,000 times the ratio specified in item (5) for a family of three or more; or

"(B) who does not meet condition (A) but who furnishes the administering carrier satisfactory evidence that his or its adjusted gross income was less than one-twelfth of the dollar limit applicable to the policy year concerned—

"(i) under item (a)(4)(A)(i) for a single individual,

"(ii) under item (a)(4)(A)(ii) for a family of two, or

"(iii) under item (a)(4)(A)(iii) for a family of three or more;

for each of the last 2 calendar months, who agrees that his or its continued eligibility during that policy year will be contingent upon furnishing satisfactory proof that his or its adjusted gross income for each succeeding calendar month is below the applicable amount specified above and who furnishes such proof prior to the last day of the calendar month next following the month with respect to which proof is furnished; or

"(C) does not meet either condition (A) or (B) above but is a Federal cash recipient as defined in section 2115(1),

shall, in accordance with, and subject to the other provisions of this title, be eligible to enroll in the qualified State health care plan;

"(5) the ratio referred to in item (4)(A) is the ratio of the Consumer Price Index (all items—United States city average as published monthly by the Bureau of Labor Standards of the Department of Labor) for July of the calendar year next preceding the calendar year in which the policy year concerned commences to the Consumer Price Index for July, 1978, which ratio, if not an even multiple of 10 percent shall be taken to the next lower multiple of 10 percent.

"Time for Determining Eligibility

"(b) For the purpose of applying the conditions of eligibility under this section, all determinations shall be made on the day application for enrollment for the policy year is made.

"DETERMINATION AND REVIEW OF PREMIUM RATES

"General Rule

"SEC. 2104. (a) The premium rate to be charged under a qualified State health care plan for each policy year shall be actuarially established in each State for each of the risk categories—

"(1) single individual,

"(2) family of two, and

"(3) family of three or more.

"Composition of Premium

"(b)(1) The premium rate for a given risk category to be charged for the initial policy year shall be determined by the administering carrier on the basis of the sum of only the following factors:

"(A) the arithmetic average of the separate estimates of incurred claim costs for that risk category for the first policy year filed with the insurance regulatory authority of the State pursuant to requests by such authority to two nondomestic insurance companies licensed to issue health care insurance in the 50 States and the District of Columbia, two domestic insurance companies licensed to issue health care insurance in the State, one domestic nonprofit hospital expense indemnity organization, and one domestic nonprofit medical expense indemnity organization;

"(B) the charge for administration as set for the policy year by the administering carrier; and

"(C) a risk charge in an amount mutually agreed upon from time to time by the insurance commissioner, the administering carrier, and three members of the American Academy of Actuaries with experience in health care insurance, two of whom are appointed by the Governor of the State and one by the administering carrier.

"(2) The premium rate for a given risk category to be charged for each subsequent policy year shall be determined by the administering carrier on the basis of the sum of only the following factors:

"(A) the incurred claim costs for that risk category for the prior policy year;

"(B) an amount equal to any projected increase or decrease in incurred claim costs for that risk category for the policy year;

"(C) an amount, if needed, to repay in full any pool losses (described in subsection 2110(c)) of prior years borne by the reinsurers of the pool and not yet recovered by them;

"(D) the charge for administration as set for the policy year by the administering carrier; and

"(E) the risk charge established pursuant to subsection (b)(1)(C).

"Review of the Premium Rates

"(c)(1) The premium rates determined for each State for each policy year pursuant to subsection (b) and the utilization and other assumptions underlying the rates are to be filed by the State with the chief actuary for the Social Security Administration, and if, within ninety days after such filing, the chief actuary determines that the rates are unjustifiably high for the State, he shall recommend to the Secretary a commensurate reduction in the Federal health care percentage described in section 2112(d). The Secretary, to the extent he concurs in and

adopts such recommendation, shall advise the State of the reduction he proposes to promulgate.

"(2) The State may request a hearing within 30 days after receipt of notice of the proposed reduction pursuant to paragraph (1). In such event, the Secretary shall, upon request by the State for a hearing and within 30 days thereof, appoint a hearing board of three actuaries, each of whom shall be a member in good standing of the American Academy of Actuaries, including one actuary who shall be appointed with the concurrence of the Governor of the State, and one actuary who shall be appointed with the concurrence of the administering carrier.

"(3) If a State does not request a hearing, or if the hearing board appointed pursuant to paragraph (2) concurs in the finding that the rates are unjustifiably high, the Secretary shall promulgate the proposed reduction in the Federal health care percentage, which shall apply throughout the period that the rates on which the hearing was based remain in effect.

"(4) If the hearing board appointed pursuant to paragraph (2) determines that the rates are not unjustifiably high for the State, the Federal health care percentage shall not be reduced.

"PROCEDURE FOR ENROLLMENT

"General Rule

"SEC. 2105. (a)(1) The appropriate State agency shall enroll each Federal cash recipient, required under section 2103 to be made eligible therefor, in the qualified State health care plan, and shall file his application with the administering carrier on forms to be provided by the administering carrier.

"(2) All other individuals, or the member of a family who provides the family's chief support, otherwise required under section 2103 to be made eligible therefor, may enroll in a qualified State health care plan upon filing an application with the administering carrier on a form to be provided by the administering carrier.

"Information Required of Each Applicant

"(b) Each eligible applicant described in section 2103 shall provide the administering carrier all information and evidence required to make an eligibility determination, and provide or certify any other essential information required under regulations prescribed by the Secretary, including but not limited to—

"(1) certification of his eligibility as a Federal cash recipient;

"(2) certification of his, or his family's adjusted gross income;

"(3) certification that he and his applicable family members, if eligible for the supplementary medical insurance program for the aged described in part B of title XVIII of the Social Security Act, are enrolled thereunder; or, if not then eligible, certify that he and his applicable family members who may become eligible during the policy year for the insurance program described in part B of title XVII will enroll in such program; and

"(4) permission for the administering carrier to confirm his, or his family's, adjusted gross income with the Internal Revenue Service.

"Enrollment Periods

"(c) Applications for enrollment in a qualified State health care plan shall only be made and filed during an open enrollment period which shall be the calendar month of April of each year for coverage commencing for the policy year beginning the following July 1, except applications for enrollment—

"(1) shall be made by the appropriate State agency on behalf of an individual or family who establishes (other than during an open enrollment period) that he is a Federal cash recipient eligible for enrollment pursuant to section 2103(a), but not then enrolled; and shall be filed with the administering carrier by the appropriate State agency within thirty days following the day on which the State receives satisfactory evidence that such individual or family has established eligibility as a Federal cash recipient; or

"(2) may be made by an individual or family who is not a Federal cash recipient and who is currently eligible for enrollment pursuant to section 2103(a) but was not so eligible at the time of the last open enrollment period and, if so made, shall be filed with the administering carrier by the individual or family within 30 days following the first day, after the last open enrollment period, on which such individual or family so became eligible.

"Effective Date of Coverage

"(d) Qualified State health care plan coverage for an individual or family eligible to enroll shall commence on the first day of the third calendar month following the calendar month in which application for enrollment was filed with the administering carrier, except that—

"(1) coverage shall not commence unless and until—

"(A) any contribution required of the individual or family pursuant to section 2106 has been paid, and

"(B) the applicable premium has been paid by the State;

"(2) as to an individual or family eligible pursuant to subsection 2103(a)(4)(B), coverage shall commence on the first day of the calendar month following the 2 calendar months whose wages are used as the basis of such eligibility provided application for enrollment is filed and contributions and premiums paid within 30 days of such date; and

"(3) as to an individual or family who is a Federal cash recipient, coverage shall be retroactive to the first of the month in which the individual or family became eligible as a Federal cash recipient, and the State shall pay the appropriate premiums for the period of retroactive coverage, as well as the premium for the next month, at the time application for enrollment is submitted to the administering carrier.

"INDIVIDUAL AND FAMILY CONTRIBUTIONS AND STATE PREMIUM PAYMENTS

"Individual and Family Contributions

"SEC. 2106. (a) Individuals and families enrolled in a qualified State health care plan shall be required to contribute toward the cost of the plan for any given policy year, by paying to the administering carrier, for each month for which coverage is provided, an amount limited as follows:

(1) In the case of an individual or family whose eligibility is based on having met the conditions set forth in section 2103(a)(4)(A), the contribution for each month is one-twelfth of 10 percent of the excess of the adjusted gross income of such individual or family for the taxable year on which eligibility is based over the applicable amount specified in subsection (g); *Provided, however,* That the amount so determined shall be reduced (but not below zero) by the total premium, if any, paid for such month by the individual or family to the Social Security Administration for enrollment in the supplementary medical insurance program for the aged described in part B of title XVIII of the Social Security Act.

(2) In the case of an individual or family whose eligibility is based on having met the conditions set forth in section 2103(a)(4)(B) the contribution for each month is one-half of 1 percent of the dollar limit applicable to the policy year concerned—

"(A) under 2103(a)(4)(i) for a single individual

"(B) under 2103(a)(4)(A)(ii) for a family of two, or

"C) under 2103(a)(4)(A)(iii) for a family of three or more.

(3) No contribution shall be required of an individual or family whose eligibility is based on having met the conditions set forth in section 2103(a)(4)(C).

"State Payment of Contributions on Behalf of Certain Individuals and Families

"(b) As to any month of a policy year that an individual or family has established that he or it is a Federal cash recipient, any contribution required for that month pursuant to subsection (a) shall be paid by the State on behalf of that individual or family.

"State's Share of the Premium

"(c) Each State which has a qualified State health care plan shall pay the administering carrier an amount equal to the excess of the sums of items (1) and (3) over item (2)—

"(1) the total premium cost for the policy year,

"(2) the total amount of contributions actually paid to the administering carrier by the individuals and families as provided for in this section,

"(3) the total amount refunded pursuant to subsection (e)(5).

"Nonvariability of Contributions and Premiums

"(d) The amount of contribution and the amount of premium shall be established by family size category on the day application for enrollment was made, and shall not change as a result of a change in family size thereafter.

"Due Date of Contributions and State Premium Payments

"(e)(1) Except as otherwise provided in this subsection, any contribution required of an individual or family, or of the State on behalf of a Federal cash recipient, for a given month of a policy year shall be due and payable—

"(A) in advance of the first day of that month, or

"(B) in the case of the initial contribution by an individual or family whose coverage may commence retroactively to the first of the month pursuant to the exception permitted by subsection 2105(d)(2), on the date application for enrollment is made.

"(2) As to any individual or family whose monthly contribution would, in the absence of this paragraph, be less than the administering carrier's cost of billing and collecting such contributions, the administering carrier shall require contributions to be paid quarterly, semiannually or annually in advance, whichever is necessary in order to first bring such cost below the amount of the less frequent contribution.

"(3) Any individual or family member who is required to make contributions for his coverage other than in accordance with (2) above and who is an employee (as defined in section 3121(d) of the Internal Revenue Code of 1954) may require his employer to make periodic deductions from his wages, and remit each contribution to the administering carrier on or before the due date specified in subsection (1).

"(4)(A) At least 15 days prior to the first day of a given calendar month, the administering carrier shall estimate the excess of the total premiums due that month over the total contributions that will be paid by enrolled individuals and families that month and shall bill the State for such estimated excess. If payment by the State of any such billing is not received by the first day of the month it is due, the administering carrier shall not be liable for benefit payments thereafter.

"(B) After the end of any given policy year, the carrier shall determine the amount required to be paid by the State in accordance with subsection (c), and shall—

"(I) charge the State with any excess of the amount so determined over the total of the estimated monthly payments made by the State with respect to that policy year; or

"(II) credit the State with any excess of the total of the estimated monthly payments made by the State with respect to that policy year over the amount so determined.

Any such charge shall be paid by the State within 30 days of receipt of written notice from the administering carrier.

"(5) If at the end of any given policy year an individual or family covered for all or part of that policy year furnishes the administering carrier satisfactory evidence that his or its adjusted gross income for his or its last taxable year preceding April 1 of the calendar year in which that policy year ended was less than the applicable amount specified in (g), then the administering carrier shall refund to that individual or family the total amount of contributions he or it paid with respect to that policy year, and such refund shall be a valid charge to the State by the administering carrier.

"State Payment of Premiums for Part B Medicare Benefits

"(f) Each State which has a qualified State health care plan shall make available and pay premiums for, supplementary medical insurance benefits under part B of title XVIII of the Social Security Act to any individual or family member who is enrolled in that State's qualified State health care plan, who is eligible for such supplementary medical insurance benefits and who either—

"(1) has established eligibility as a Federal cash recipient at the time his application for enrollment in the qualified State health care plan is made; or

"(2) had adjusted gross income for the taxable year on which eligibility is based less than the applicable amount specified in (g).

Such benefits shall be made available pursuant to an agreement entered into under section 1843 of the Social Security Act, or by reason of the payment of premiums under such title by the appropriate State agency on behalf of the individuals.

"(g) for purposes of (a)(1), (e)(5), and (f)(2) of this section and for purposes of section 290(c)(8)(D)(ii) of the Internal Revenue Code of 1954, the applicable amount shall be 40 percent of the dollar limit applicable to the policy year concerned—

"(A) under section 2103(a)(4)(A)(i) for a single individual,

"(B) under section 2103(a)(4)(A)(ii) for a family of two, or

"(C) under section 2103(a)(4)(A)(iii) for a family of three or more.

"EXTENSION AND TERMINATION OF COVERAGE

"General Rule

"SEC. 2107. (a) Except as provided in subsection (d), subject to timely payment as specified in section 2106(e) of any contribution required under section 2106 by the individual or family and subject to timely payment of the State's share of the premium as specified in section 2106(e), qualified State health care plan coverage shall remain in force—

"(1) with regard to an individual or family made eligible under section 2103(a)(4)(A), for the balance of the policy year;

"(2) with regard to an individual or family made eligible under section 2103(a)(4)(B), until the end of the calendar month following the first calendar month with respect to which the individual or family fails to furnish satisfactory evidence that his or its adjusted gross income was below the applicable amount specified in section 2103(a)(4)(B) or the end of the policy year if earlier; and

"(3) with regard to an individual or family made eligible under section 2103(a)(4)(C), until the end of the third calendar month following the calendar month in which eligibility for public cash assistance ceased or the end of the policy year if earlier.

"Extended Coverage

"(b) Qualified State health care plan coverage shall immediately extend to any child born to, or adopted by, any eligible family member subsequent to the day the application for enrollment was made, and shall continue in force until the date the family's coverage would otherwise terminate in accordance with this section.

"Continued Coverage

"(c) Qualified State health care plan coverage during the policy year shall not be terminated because an individual who was an eligible family member on the day the application for enrollment was made ceases to be an eligible family member subsequent to the date of application.

"Termination of Coverage

"(d)(1) Qualified State health care plan coverage shall terminate as of the first day of any calendar month if any contribution due with respect to that month has not been paid by the applicable due date specified in section 2106(e).

"(2) If qualified State health care plan coverage is terminated in accordance with paragraph (1) and a request for reinstatement is made within 30 days following the day coverage terminated, the individual or family will be extended continuous coverage upon payment of the overdue contribution and all remaining contributions due during the balance of that portion of the policy year that coverage would have remained in force pursuant to subsection (a) had timely payments been made plus a service charge of $10.

"(3) If qualified State health care plan coverage is terminated in accordance with paragraph (1) and the individual or family fails to request reinstatement as provided for in paragraph (2), the individual or family shall not be eligible for any coverage under the qualified State health care plan for the balance of the policy year concerned, and if such individual or family is eligible and desires to enroll for the next policy year, he or it must first pay a service charge of $10.

"APPROVAL OF INSTITUTIONAL RATES OF REIMBURSEMENT BY STATE HEALTH CARE INSTITUTIONS COST COMMISSIONS

"State Commission

"SEC. 2108. (a) In the operation of a qualified State health care plan no charge for services rendered or supplies furnished by hospitals, skilled nursing facilities, or home health agencies (herein collectively referred to as 'health care institutions') shall be reimbursed to the extent that such charges exceed the rates approved by a State health care institutions cost commission. Such commission shall be a State agency designated by the Governor of each State for the purpose of performing the functions described in this section. Such commission shall operate with the advice of a council appointed by the Governor. The council shall include at least two consumer representatives, one hospital representative, one skilled nursing facility representative, one home health agency representative, one hospital service organization representative, one insurance company representative, and one representative of the State health planning and development agency established pursuant to section 1521, Title XV of the Public Health Service Act. One of the representatives shall be designated as chairman of the advisory council.

"Review of Budgets and Charges

"(b) The commission shall review budgets and proposed charges for the health care institutions in the State in order to establish prospectively approved charges which shall be applicable without discrimination to all purchasers of services and supplies from health care institutions irrespective of whether the purchasers are insured pursuant to any provision of this title and irrespective of type of underwriter which may provide insurance to a purchaser. Once each year, each health care institution shall file its budget and proposed charges with the commission. The commission may approve the use of a single charge for all of a group of services commonly rendered a class of patients or a single all-inclusive daily charge for all inpatient services of the health care institution. Filed charges shall be deemed approved unless disapproved by the commission within 60 days after filing.

"Standards for Health Care Institutions

"(c) In reviewing the proposed charges of health care institutions in the State, the commission shall require at least the following standards of each such institution—

"(1)(A) an active review committee of qualified physicians and other personnel that effectively determines whether the services rendered are—

"(i) of good quality,

"(ii) needed for the proper treatment of the patient, and

"(iii) provided only as long as necessary within the health care institution; and

"(B) management that takes effective and prompt action with respect to adverse findings;

"(2) utilization of a standard system of accounting and cost finding established by the commission;

"(3) utilization of the approved charge for all patients; and

"(4) a budget of its expenses for each fiscal year, using the approved standard system of accounting and cost finding, and charges for its services, both reasonably related to the cost of efficient production of such services.

The commission shall also take into consideration economic factors in the health care institution's geographical area, costs of comparable institutions providing comparable services, capital requirements, and the need for incentives to improve service and institute economies which might be secured from the sharing of joint services with other health care institutions.

"Amortization of Capital Costs

"(d) In reviewing that portion of a health care institution's charges which results from financing costs and depreciation relating to prior capital expenditures, the commission shall accept the determination, if any, of the appropriate health systems agency (as defined in section 1512 of the Public Health Service Act) that the construction of such facility was consistent with the health needs of the area, but in no event shall the commission approve charges that would finance services, equipment, or facilities which required but were denied a certificate of need pursuant to section 1523(a) of the Public Health Service Act or section 1122 of the Social Security Act.

"Appeal by Health Care Institution Following Disapproval by Commission

"(e) If the budget submitted by a health care institution reveals significant operating inefficiencies or if the proposed charges otherwise appear to be unjustifiably high, the commission shall disapprove the proposed charges. If the proposed charges are disapproved, the affected health care institution may request consideration of the advisory council constituted by virtue of subsection (a). Upon receipt of such request, the council shall hold a hearing at which the interested parties may appear to present the facts which support the commission's decision and the facts which support the affected health care institution's position. Follow-

ing such hearing the council shall advise the commission of its recommendation, and the commission shall thereupon render a final decision.

"Federal Payment for Cost Commission's Expenses

"(f) The Secretary shall pay to any State which has a qualified State health care plan an amonut equal to 75 percent of the reasonable amounts expended by the State each quarter as found necessary by the Secretary for the proper and efficient administration of the State's health care institutions cost commission and its advisory council except that there shall be no reimbursement by the Secretary for the cost of any institutional audits that may be conducted by the commission.

"REVIEW OF LEVELS OF INSTITUTIONAL RATES OF REIMBURSEMENT BY SECRETARY OF HEALTH, EDUCATION, AND WELFARE

"Filing With the Secretary

"SEC. 2109. (a) Annually on a date specified by the Secretary, each State health care institutions cost commission shall file with the Secretary, on a form prescribed by him, a report of the level of rates of institutional reimbursement approved by the commission for such categories of health care institutions as shall be established by the Secretary. The categories shall take into consideration the type and size of the institutions and differing economic characteristics by geographic areas within each State so that each category will include institutions with similar conditions of operating cost.

"Review by the Secretary

"(b) In the event the Secretary determines that the level of rates approved for a given category of health care institution in a State is unjustifiably high in relation to those of other States, he shall order a reduction for that State in the Federal medical assistance percentage (as defined in section 1905(b) of title XIX of the Social Security Act), and a reduction in the Federal health care percentage (as defined in section 2112(d)) to compensate for the excess cost resulting from the unjustifiably high level of rates for that category of health care institutions in the State. The Senate may appeal the Secretary's decision, and upon receipt of an appeal, the Secretary shall appoint a hearing board of three members which shall hold a hearing at which the interested parties may appear to present the facts which support the Secretary's decision and the facts which support the appellant State's position. The members of the hearing board shall each be knowledgeable with respect to the costs of operating health care institutions of the category concerned and may not be an employee or an owner of any of the health care institutions concerned. Following such hearing the hearing board shall advise the Secretary of its recommendation, and the Secretary shall thereupon render a final decision. There shall be no further right of appeal or review by the State. If the State, whose Federal percentages have been reduced, takes action to correct the situation which produced the unjustifiably high level of rates for the category of health care institutions, it may so notify the Secretary and request restoration of the full amount of the Federal medical assistance percentage and the full amount of the Federal health care percentage. If the Secretary is satisfied that corrective action has been taken, he shall restore the Federal percentages to their full amount for that State as of the date he deems the corrective action to have eliminated the unjustifiably high level of rates.

"OPERATION OF THE QUALIFIED STATE HEALTH CARE BENEFITS POOL

"General Rule

"SEC. 2110. (a) The qualified State health care benefits pool (hereinafter in this section referred to as the 'pool') shall be administered by the administering carrier.

"Fiscal Operation

"(b)(1) The premiums collected pursuant to this title, the service charges described in section 2107(d) and the reimbursements for pool losses described in subsection (c)(2) shall be paid into the pool.

"The pool shall be available—

"(A) without fiscal year limitation to pay all qualified State health care plan benefit claims certified by the administering carrier;

"(B) without fiscal year limitation to pay premiums to approved health maintenance organizations (as defined in section 2115(m));

"(C) to pay the risk charges specified in section 2104(b);

"(D) to repay to pool reinsurers the losses, if any, specified in section 2104(b)(2)(C);

"(E) to pay the administrative charges of the administering carrier described in section 2104(b); and

"(F) to pay any other charges for which the pool has a liability.

"(2) The moneys in the pool shall be invested and reinvested in interest-bearing obligations, which may be sold for the purpose of the pool. The interest on, and the proceeds from the sale of, such obligations become a part of the pool.

"Experience Accounting

"(c)(1) At the close of each policy year, an experience accounting for the pool for the policy year shall be prepared by the administering carrier and submitted to the Secretary, to the State, and to all reinsurers specified in section 2102(c).

"(2)(A) All reinsurers shall participate in any pool losses in accordance with a formula, designed by the administering carrier and approved by the Insurance Commissioner of the State, that equitably allocates pool losses to carriers and approved health maintenance organizations in proportion to their total health care business and to uninsured plans in proportion to their benefit payments under qualified employee health care plans. The aggregate pool losses for any policy year to be apportioned among the pool participants shall be limited to such percent of the qualified State health care plan premiums collected by the pool for the year as shall be mutually agreed upon from time to time by the insurance commissioner, the administering carrier, and three members of the American Academy of Actuaries with experience in health care insurance, two of whom are appointed by the Governor of the State and one by the administering carrier. Losses in excess of this limitation shall be borne by the State.

"(B) The State shall collect the uninsured plans' share of the pool losses, and remit such amount together with the State's payment for its share of the losses to the administering carrier within 45 days after the experience accounting has been submitted. The other reinsurers shall remit their share of the loss to administering carrier within 31 days after the experience accounting has been submitted.

"(3) If the experience accounting reflects a gain (computed after deduction of the reinsurers' risk charge described in section 2104(b)) for the policy year, the gain shall be retained in the pool and used to minimize future premiums to be paid by the State.

"FURNISHING OF INFORMATION BY OTHER AGENCIES

"General Rule

"SEC. 2111. (a) The head of any Federal or State agency shall furnish such information as the administering carrier needs for purposes of spot auditing eligibility for the qualified State health care plan, or verifying other information with respect thereto.

"Carrier's Liability

"(b) A reliance by the administering carrier on information furnished by any Federal or State agency shall relieve the carrier from liability for failure to charge sufficient contributions, overpayment of benefits, or any other erroneous act resulting from the carrier's reliance on such information.

"PAYMENTS TO STATES

"Premiums

"SEC. 2112. (a) From the sums appropriated therefor, the Secretary shall pay to each State which has a qualified State health care plan an amount equal to the product obtained by multiplying the total premiums for the qualified State health care plan paid by a State to the administering carrier by the Federal health care percentage defined in subsection (d). In applying the preceding sentence, the amount used as total premiums paid by a State for a qualified State health care plan shall not include any portion thereof that is determined by the Secretary to be attributable to benefits provided under the plan which are in excess of the minimum standard health care benefits then required by section 2102(a) to be provided.

"Pool Losses

"(b) From the sums appropriated therefor, the Secretary shall pay to each State which has a qualified State health care plan an amount equal to the product obtained by multiplying the excess pool losses paid by the State to the administering carrier (as provided by section 2110(c)(2)(A)) by the Federal health care percentage defined in subsection (d). For the purpose of this subsection, the Federal health care percentage shall be as determined before any reduction thereof provided for under section 2104(c)(3), or section 2109.

"Condition for Payment and Compliance

"(c) The amounts authorized to be paid a State under this title shall not be paid by the Secretary unless the State annually certifies to the Secretary, on a date or dates set by the Secretary, that—

"(1) it has established a qualified State health care plan the administering carrier of which has been approved by the Secretary;

"(2) it has authorized the insurance commissioner of that State (as defined in section 2115(a)) to review the premium rates of the qualified State health care plan pursuant to section 2104(c)(1);

"(3) it has authorized a State agency to enroll Federal cash recipients in the qualified State health care plan pursuant to section 2105(c)(1);

"(4) it has authorized the State Treasurer or other appropriate official to make the payments required of the States under sections 2106, 2108, and 2110;

"(5) it has authorized a State agency to perform the functions of the State health care institution cost commission described in section 2108;

"(6) the insurance commissioner of that State is carrying out the duties with regard to protection against insolvency as prescribed by section 2116;

"(7) it has caused to be establish and has implemented regulations governing the operation of a facility to make available minimum standard health care benefits to all eligible individuals, families, and groups of less than 50 employees or members to whom such benefits would not otherwise be available, such facility to be established and operated in accordance with section 2118 below;

"(8) it has not reduced the scope of its State laws concerning workmen's compensation as to types of employment covered, types of accidents or diseases covered, or types of medical expenses covered; and

"(9) it is carrying out the remaining administrative and other duties specified in title XXI.

Such certification shall, after 60 days from the date of receipt by the Secretary, be deemed acceptable unless prior thereto the Secretary notifies the State, in writing, that the certification has not been accepted.

"Federal Health Care Percentage

"(d) The term 'Federal health care percentage' for any State shall be 100 percent less the State percentage; and the State percentage shall be that percentage which bears the same ratio to 45 percent as the square of the per capita income of such State bears to the square of the per capita income of the continental United States (including Alaska and Hawaii); except that (1) the Federal health care percentage shall in no case be less than 70 percent or more than 90 percent, and (2) the Federal health care percentage for Puerto Rico, the Virgin Islands, and Guam shall be 70 percent. The Secretary shall promulgate the Federal health care percentage for each State as soon as possible after enactment of this title, which promulgation shall be conclusive for each of the 4 quarters in the period beginning July 1, 1979, and ending with the close of June 30, 1980. Thereafter, the Federal health care percentage for any State shall be promulgated in accordance with the provisions of section 1101(a)(8)(B) of title XI of the Social Security Act.

"ELIGIBILITY OF THOSE NOW COVERED UNDER CERTAIN STATE OR FEDERAL PROGRAMS

"Federal Programs

"SEC. 2113. (a) Any class of individuals or families, other than employees of the Federal Government and their families, whose members at the time of enactment of this Act, are receiving all, or substantially all, of their medical care under a Federal program, other than a program pursuant to the Social Security Act, shall not be eligible for coverage under a qualified State health care plan unless—

"(1) all members of the class who are resident in the State are enrolled in the plan;

"(2) the Federal Government pays the premium for supplementary medical insurance benefits under part B of title XVIII of the Social Security Act for all such members of the class as are eligible therefor;

"(3) the Federal Government arranges for the enrollment of such individuals and families in the qualified State health care plan and pays the full premium therefor on behalf of such persons without requiring any sharing by the State; and

"(4) the Federal Government agrees to pay the State that proportion of any excess pool losses, charged to the State pursuant to section 2110(c)(2)(A), which the average number of such persons enrolled in such plan during the policy year bears to the average number of all persons enrolled in such plan during that year. In applying section 2112(b), the amount of such payment shall reduce the excess pool losses to which the Federal health care percentage would otherwise be applied.

"State Programs

"(b) Any class of individuals or families, other than employees of a State or local government and their families, whose members, at the time of enactment of this Act, are receiving all, or substantially all, of their medical care under a State program of medical care, other than a program pursuant to the Social Security Act, and who are not otherwise eligible for enrollment in the qualified State health care plan, shall be eligible for coverage in a qualified State health care plan provided—

"(1) all members of the class who are resident in the State are enrolled in the plan;

"(2) the State pays the premium for supplementary medical insurance under part B of title XVIII of the Social Security Act for all such members of the class as are eligible therefor;

"(3) the State arranges for the enrollment of such individuals and families in the qualified State health care plan and pays the full premium therefor on behalf of all such persons; and

"(4) the State agrees to absorb, without any sharing by the Federal Government, that proportion of the excess pool losses, charged to it pursuant to section 2110(c)(2)(A), which the average number of such persons enrolled in such plan during the policy year bears to the average number of all persons enrolled in such plan during that year. In applying section 2112(b), such amount shall reduce the excess pool losses to which the Federal health care percentage would otherwise be applied.

"PREMIUM TAXES

"SEC. 2114. In order to be eligible for Federal appropriations pursuant to this title, a State (or any political subdivision thereof)—

"(1) may not impose any tax of any kind on or with respect to any premium, benefit, income, or other transaction or occurrence connected with any qualified State health care plan, qualified State health care benefits pool, or underwriting and reinsurance facility provided for under this title, and

"(2) may not impose any tax or fee on any domestic carrier which provides health care insurance in the State with respect to any premium or other income received or any benefit provided, or on any other transaction or occurrence, in connection with any health care insurance contract, unless any such tax or fee is applied equally to all domestic carriers which provide health care insurance in the State.

"DEFINITIONS

"SEC. 2115. As used in this title the term—

"(a) 'Insurance commissioner' means the public official charged with the regulation of insurance in each State.

"(b) 'Secretary' means the Secretary of Health, Education, and Welfare.

"(c) 'State' shall include each of the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, and Guam.

"(d) 'Administering carrier' means either—

"(1) a carrier licensed to issue health care insurance in each of the 50 States and the District of Columbia,

"(2) a carrier licensed to issue health care insurance in at least one of the 50 States or the District of Columbia which has one or more affiliates or wholly owned subsidiaries licensed to issue health care insurance, if in each of the 50 States and the District of Columbia the carrier or at least one of its affiliates or wholly owned subsidiaries is licensed to issue health care insurance, or

"(3) a domestic carrier, or an assemblage of domestic carriers operating as one administering unit, which the insurance commissioner of the State finds will perform its obligations as administering carrier efficiently and effectively and will meet such requirements as to financial responsibility, legal authority, and other matters as he finds pertinent.

"(e) 'Underwriter' means a carrier, an approved health maintenance organization, or the person who provides an uninsured plan.

"(f) 'Policy year' means a period beginning any July 1 and ending the close of the following June 30.

"(g) 'Carrier' means an insurance company, hospital service or hospital expense indemnity organization, a medical service or medical expense indemnity organization, dental service or dental expense indemnity organization, fraternal benefit society or other similar organization or society which provides coverage for one or more types of health care.

"(h) 'Uninsured plan' means a plan provided by a person (other than a carrier or an approved health maintenance organization) having an arrangement which has been communicated or described in writing to covered individuals, and which covers at least 26 individuals at least 26 weeks of the calendar year, and which provides, pays for, or reimburses the whole or any part of the cost of the health care of such individuals, but shall not include the Federal Government with report to programs established by it.

"(i) 'Federal cash recipient' means an individual or family who has established eligibility for public cash assistance under a program financed in whole or in part by Federal funds.

"(j) 'Adjusted gross income' shall have the meaning set forth by section 62 of the Internal Revenue Code of 1954.

"(k) 'State of domicile' means the State in which an underwriter, other than an insurance company, maintains its principal place of business. For an insurance company which is an underwriter, 'State of domicile' means the State in which it is incorporated.

"(l) 'Family' means an individual and his spouse if not legally separated under a decree of divorce or of separate maintenance and each of their dependent (as defined in the introductory clause of section 152(a) of the Internal Revenue Code of 1954) unmarried children who have not attained the age of 19.

"(m) 'Approved health maintenance organization' means an organization which meets the definition of a qualified health maintenance organization contained in section 1310(d) of the Public Health Service Act or which has been licensed or certified as a health maintenance organization pursuant to the applicable statute of the State in which such organization is located.

"PROTECTION AGAINST INSOLVENCY

"Definitions

"SEC. 2116. (a) As used in this section, the term—

"(1) 'NHI' means pertaining to one or more qualified health care plans (as defined in section 222(f)(6) of the Internal Revenue Code of 1954).

"(2) 'Premium' means the premium, enrollment fee, or such other comparable fee or periodic charge of an underwriter for NHI coverage.

"Capital and Surplus Requirements

"(b) An NHI underwriter shall have a combined capital and surplus of not less than the greater of: (i) $1,500,000 or (ii) 2 percent of the gross premium income of the underwriter for its immediately preceding fiscal year of operation. In lieu of holding such capital and surplus, an underwriter may, subject to the approval of the insurance commissioner of the State of domicile, either secure a performance bond issued by a company licensed to issue such bonds in the underwriter's State of domicile in an amount that is the greater of: (i) $1,500,000 or (ii) 2 percent of the gross premium income of the underwriter for its immediately preceding fiscal year of operation; or, secure a written contract, from one or more carriers authorized to write NHI contracts in such State and having at least $15,000,000 of unassigned surplus, which provides that the contracting party will, in the event that, and as of the date that, such underwriter ceases to be authorized to provide NHI coverage, provide without qualification NHI coverage for all individuals or families so affected.

"Reserve Requirements

"(c) Each NHI underwriter shall—

"(1) Maintain NHI reserves in an amount not less on any day than—

"(A) the total amount of its liability for unearned premiums, future contingent benefits, and amounts not yet due on claims,

"(B) the total amount of its liability for due and unpaid claims, claims in course of settlement, and incurred but unreported claims, and

"(C) 12½ percent of the total amount of

its NHI claims paid during the preceding calendar year but not more than $25,000,000, which amount shall be called the NHI Contingency Reserve (hereinafter 'NHICR') and may be maintained either directly or as a portion of the underwriter's surplus: *Provided, however*, That such 12½ percent requirement shall be applied to the total amount of an approved health maintenance organization's premium during the preceding calendar year. The underwriter may, subject to the approval of the insurance commissioner of its State of domicile, credit against its NHICR the value of those of its contracts with providers of health services as guarantee the delivery of the contracted services even in the event of insolvency of the underwriter.

"(2) Maintain NHI reserves, including the NHICR, in assets qualified as legal investments for life insurance companies of the same size by the laws of the State of domicile.

"(3) Submit an affidavit, executed by its chief executive officer or by a member of the American Academy of Actuaries or another actuary approved by the insurance commissioner of the State of domicile, to such insurance commissioner within 90 days after the end of each calendar year that its NHI reserves comply with the requirements of this section. Such affidavit shall be accompanied by a financial report for the prior calendar year on a form prescribed by the insurance commissioner describing its NHI business including but not limited to—

"(A) information substantiating the adequacy of its NHI reserves;

"(B) disclosure of the manner in which its NHICR was computed;

"(C) balance sheet; and

"(D) income statement.

"(4) Submit an affidavit to the insurance commissioner of each State in which the underwriter does NHI business within 90 days after the end of each calendar year showing the amount of NHI premiums paid for lives in that State during such calendar year. For an uninsured plan, such NHI premiums shall be the greater of:

"(A) the deduction for a taxable year under section 162, 212, or 404 of the Internal Revenue Code of 1954 claimed by a person having such arrangement with respect to benefits provided under NHI coverage plus the amount of any contributions collected from its members for NHI coverage with respect to the year concerned, or

"(B) 105 percent of NHI claims paid by the uninsured plan during the calendar year.

"State Supervision

"(d) An underwriter not otherwise subject to the supervision of its business by the insurance commissioner of its State of domicile shall, as a condition to providing NHI coverage, file with that insurance commissioner a notarized affidavit agreeing to subject its NHI business to his supervision and to pay any assessments duly levied pursuant to this subtitle D.

"Procedure To Prevent Impairment

"(e)(1) Any NHI underwriter whose NHICR fails to meet the requirements of this section shall be impaired for purposes of this title and promptly shall—

"(A) cease issuance of any new group or individual NHI policies: *Provided, however*, That such NHI underwriter may continue to issue coverage under an existing group plan; and

"(B) provide the insurance commissioner of the underwriter's State of domicile with:

"(i) an appraisal by a member of the American Academy of Actuaries or an actuary provided by the insurance commissioner of the capacity of the underwriter to pay claims on its outstanding NHI coverage; and

"(ii) either a plan for reinsurance of its NHI obligations with an NHI carrier, or a plan for reconstituting its NHICR.

"(C) advise the obligor under the performance bond, if such bond was purchased pursuant to subsection (b), of the NHI underwriter's possible financial inability to meet its obligations under this Act.

"(2) An insurance commisioner, upon receipt of such information, shall—

"(A) determine whether the proposed reinsurance carrier has NHI reserves adequate to comply with this section after accepting the proposed reinsurance and, if he approves the proposed plan for reinsurance, notify the impaired underwriter to execute such plan within 60 days. If the plan for reinsurance is not approved, the insurance commissioner shall notify the impaired underwriter that the plan for reinsurance has not been approved and that a plan for reconstituting its NHICR must be submitted within 30 days; and

"(B) if an impaired underwriter submits a plan for reconstituting its NHICR, appoint a committee to supervise the reconstitution of the NHICR. The committee shall be chaired by the insurance commissioner of the impaired underwriter's State of domicile. The members of the committee shall include the insurance commissioner of the impaired underwriter's State of domicile, a representative of the insurance commission of one of the States in each National Association of Insurance Commissioners zone in which the impaired underwriter issued NHI coverage and at least one officer from five NHI carriers other than the impaired underwriter.

"(3) The committee's responsibilities shall include—

"(A) approval or disapproval of the impaired underwriter's plan for reconstituting its NHICR;

"(B) if such plan is approved, the committee shall provide the insurance commissioner with periodic reports concerning the execution of such plan and the need for any additional protection for NHI policyholders, members, or participants of the impaired underwriter; and

"(C) if the plan for reconstituting the impaired underwriter's NHICR is disapproved, the committee shall determine whether an assessment is necessary to meet the impaired underwriter's NHI obligations.

"(4) If the committee determines that an assessment is necessary, it shall be made according to the following formula where NHI premiums are net after reinsurance:

"(A) the total assessment shall be allocated among the States in which the impaired underwriter issued NHI coverage in proportion to the ratio of the impaired underwriter's NHI premiums paid in the State to the total of its NHI premium paid in all States for the last completed calendar year; and

"(B) a State's share of the assessment, as determined in subsection (A), shall be allocated among NHI underwriters in that State in proportion to the ratio of each underwriter's NHI premiums paid in that State for the last completed calendar year to the total NHI premiums paid in that State for that year by all NHI underwriters other than the impaired underwriter: *Provided*, That if the impaired underwriter is an insurance company, then the portion of a State's assessment that would be so charged to Blue Cross plans and Blue Shield plans shall instead be assessed on the remaining insurance companies which are NHI underwriters in proportion to their shares of that State's assessment, and if the impaired underwriter is a Blue Cross plan or a Blue Shield plan, then the portion of a State's assessment that would be so charged to insurance companies shall instead be assessed on the remaining Blue Cross plans and Blue Shield plans which are NHI underwriters in proportion to their shares of such assessment.

"(5) The insurance commissioner of each State in which the impaired underwriter did NHI business shall furnish NHI underwriters in the State with—

"(A) a copy of the committee's report;

"(B) the total amount of the assessment upon all NHI underwriters;

"(C) the underwriter's share of the assessment produced under the formula; and

"(D) a demand that payment of the assessment be made within 3 months, or such longer period of time as the insurance commissioner may authorize if such payment would, in the opinion of the committee, endanger the ability of the assessed underwriter to fulfill its contractual obligations.

"(6) Failure to make timely payment of the assessment shall be cause for withdrawal of the underwriter's privilege to conduct NHI business.

"(7) Any assessment made upon and paid by an NHI underwriter under this section shall be deductible from any other assessment made under a State insolvency law or other requirement which relates to the NHI underwriter which was deemed impaired pursuant to this section.

"REGULATION

"SEC. 2117. Any regulations promulgated by the Secretary with regard to this title shall be promulgated in final form not less than 9 months prior to the first day of the policy year during which they will apply. Such regulations shall be effective only if (i) promulgated in final form within the time prescribed in the preceding sentence, and (ii) notice of such regulation in proposed form and of opportunity for public hearing thereon shall have been published not less than 60 days prior to the date of promulgation thereof in final form.

"UNDERWRITING AND REINSURANCE FACILITIES

"SEC. 2118. PRINCIPLES OF OPERATION OF THE UNDERWRITING AND REINSURANCE FACILITIES TO ASSURE AVAILABILITY OF MINIMUM STANDARD HEALTH CARE BENEFITS TO THE UNINSURABLE.—(a) The State insurance commissioner shall be responsible for assuring the establishment and regulation of a facility to underwrite or reinsure minimum standard health care benefits for individuals, families, and groups of less than 50 employees or members to whom such benefits would not otherwise be available. He shall name an administering carrier as defined in section 2115 to operate the facility.

"(b)(1) If the State has established by law a duty upon carriers to offer a qualified health care plan to all individuals and groups, then the facility shall reinsure contracts for a qualified health care plan issued by carriers and may, at the option of the State, also issue its own contracts providing a qualified health care plan, upon request by a carrier.

"(2) If the State has established no such duty upon carriers, then the facility shall issue its own contracts to provide a qualified health care plan and may, at the option of the State, also reinsure contracts providing a qualified healh care plan issued by carriers.

"(3) The facility shall design only one form of qualified individual health care plan and one form of qualified employee health care plan, each providing no more and no less than the minimum standard health care benefits specified in section 222 of the Internal Revenue Code of 1954. No plan other than the one individual and one employee health care plan designed by the facility shall be issued or reinsured by the facility.

"(c) The effective date of any coverage issued or insured by the facility shall be the first day of the month following the month in which application was made except that when application is made within 31 days of cessation of prior qualified health care coverage the effective date shall be the day following the date of such cessation of coverage.

"(d) Any coverage issued or reinsured by the facility shall provide that during the first 6 months of coverage, benefits will not be paid on account of any condition that had been diagnosed or treated within the 6 months preceding the date of application for coverage. However, time covered under a qualified health care plan immediately preceding application shall be counted in determining whether six months of coverage have elapsed.

"(e) If State law provides or if subsection (b) above requires that the facility issue its own contracts for qualified health care benefits, then

"(1) every individual—

"(A) who is a resident of the State;

"(B) who is not eligible to enroll (through either spouse in the case of a family) in a qualified employee health care plan (as described in section 290(b) of the Internal Revenue Code of 1954);

"(C) who is not eligible to enroll in the insurance program described in part B of title XVIII of the Social Security Act; and

"(D) who is not eligible to enroll in a qualified State health care plan because he fails to meet any of the conditions specified in section 2103(a)(4); and

"(2) every group—

"(A) which is a valid group for the purposes of obtaining group health care insurance under the laws of the State, and

"(B) which contains fewer than 50 employees or members, and

"(C)(1) all of whose members reside in the State, or

"(2) in the case of an employee group, has its principal place of employment located within the State

shall, in accordance with and subject to the other provisions of this title, be eligible to apply for a qualified health care plan from the facility.

"(f) If State law provides or if subsection (b) above requires that the facility reinsure contracts for qualified health care plans issued by carriers, then only such contracts as have been issued to eligible individuals and groups as defined in subsection (e) above shall be eligible for reinsurance in the facility.

"(g) The State insurance commissioner shall appoint a committee of five actuaries who are members of the American Academy of Actuaries and who have experience in the field of health care insurance. The duties of this committee shall include the determination of expense allowances to carriers for reinsured risks, claim reserve formulas, and other actuarial functions, as well as the recommendation of premium rates for the facility. In recommending premium rates, the committee shall take into consideration the additional morbidity expected on contracts issued or reinsured by the facility, anticipated administrative expenses of the facility, reasonable expense allowances to ceding carriers, and the level of rates charged by carriers to standard risks for coverage similar to that embodied in the health care plan designed by the facility.

"(h) Following the close of each fiscal year of the facility, the administering carrier shall determine—

"(i) with respect to contracts issued by the facility—

"(A) earned premiums less allowable expenses of the facility, and

"(B) incurred losses for the year.

"(ii) with respect to contracts reinsured by the facility—

"(A) earned premiums less administrative expense allowances to carriers,

"(B) the expenses of the administering carrier pertaining to the reinsurance operations of the facility, and

"(C) incurred losses for the year.

Any excess of items (i)(B), (ii)(B), and (ii)(C) over (i)(A) and (ii)(A) shall be assessed against all underwriters in proportion to their share of the total NHI premium paid in the calendar year during which the fiscal year of the facility began. Any excess of items (i)(A) and (ii)(A) over (i)(B), (ii)(B), and (ii)(C) shall be held at interest by the administering carrier to offset future losses or to reduce future premiums. For uninsured plans, the term 'NHI premiums' shall have the meaning specified in section 2116(c)(4)."

SEC. 532. CARRIER COMPLIANCE

Nothing contained in antitrust legislation enacted by the Congress of the United States or by the legislatures of one or more of the several States shall be construed as limiting or in any other way applying to carriers in any activity undertaken in compliance with or in any effort to comply with any provision of this Act.

SEC. 533. CONFORMING AMENDMENTS TO TITLE XVIII OF THE SOCIAL SECURITY ACT.

Title XVIII of the Social Security Act is amended—

(1) by adding after section 1837(h) the following new subsection:

"(i) Notwithstanding the provisions or limitations of subsections (a), (b), (c), (d), (e), and (f), there shall be a general enrollment period during the month of April in each year for individuals who were enrolling for the first time in a qualified State health care plan described in title XXI of the Social Security Act."; and

(2) by adding after section 1843(h) the following new subsection:

"(i) The Secretary shall, at the request of a State, enter into a modification of an agreement entered into with such State pursuant to subsection (a) under which the covered group described in subsection (b) and specified in such agreement is broadened to include individuals who are described in section 2106(f) of title XXI of the Social Security Act."

SEC. 534. CONFORMING AMENDMENTS TO TITLE XIX OF THE SOCIAL SECURITY ACT.

Title XIX of the Social Security Act is amended by adding at the end thereof the following new section:

"EXCLUSION FROM COVERAGE

"SEC. 1911. Notwithstanding any other provision of this title, no payment under this title may be made (a) for any expenses incurred for services or articles (1) which are covered under a qualified State health care plan (as defined in title XXI), (2) which are incurred after July 1, 1979, and would have been covered under a qualified State health care plan had the State adopted such a plan, or (b) for any copayment required under a qualified State health care plan."

SEC. 535. CONFORMING AMENDMENTS REGARDING "REASONABLE COSTS".

Wherever reference is made in titles V, XVIII, and XIX of the Social Security Act to making payments to a provider on the basis of "reasonable costs" or "reasonable charges", with regard to any amount paid after June 30, 1979, that payment shall not be considered reasonable to the extent that it exceeds the amount which would be determined to be reasonable and necessary under section 2102(e)(1) of title XXI of the Social Security Act.

SEC. 536. CONFORMING AMENDMENTS TO THE INTERNAL REVENUE CODE.

(a) Section 115 of the Internal Revenue Code of 1954 is amended by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; or" and by adding after paragraph (2) the following paragraph:

"(3) interest, or any other item of income, derived from any investment by a qualified State health care benefits pool (as defined in section 2110 of title XXI of the Social Security Act) or by an underwriting and reinsurance facility (as defined in section 2118 of title XXI of the Social Security Act).".

(b) Section 501(c)(8) of the Internal Revenue Code of 1954 is amended by the addition of the following item:

"(C) For purposes of this paragraph, payments made directly or indirectly to a qualified State health care benefits pool (as defined in section 2110 of title XXI of the Social Security Act) or to an underwriting and reinsurance facility (as defined in section 2118 of title XXI of the Social Security Act) by a fraternal beneficiary society, order, or association under provisions of the National Health Care Act shall not in any way disqualify such group from its tax-exempt status under this section.".

SEC. 537. EFFECTIVE DATE.

The amendments made by this subtitle shall become effective on the date of enactment of this Act, except that a qualified State health care plan provided for under new title XXI of the Social Security Act shall not provide benefits before July 1, 1979.

ORDER FOR THE PLACEMENT OF PROGRAM IN THE RECORD

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that for the remainder of the 95th Congress the statement of the program each day, regardless of when it may be presented, appear in the RECORD immediately prior to the motion to adjourn or recess, whichever is the case.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPEASING AGGRESSION: THE UNLEARNED LESSONS OF MUNICH

Mr. GRIFFIN. Mr. President, earlier this week French authorities released a man who claims to have masterminded the Munich Olympic massacre in 1972. Like many of my colleagues, I am shocked by this turn of events.

Twice in the last half-century Munich has been associated with opportunities for the world to learn important lessons. Ironically and tragically on both occasions the opportunity has been lost.

It was in Munich on September 30, 1938, that leaders of Great Britain and France caved in to Adolf Hitler and allowed him to claim the Sudetenland. As we know, the hopes they harbored then that appeasement would somehow buy peace quickly soured, and that action led to a holocaust.

It was in Munich almost exactly 34 years later that eight Black September terrorists—reportedly under the leadership of Abu Daoud—invaded the Israeli dormitory at the 20th summer Olympic games. When the shooting was over, 10 Israeli athletes, 1 German policeman, and 5 Arab terrorists lay dead.

The Munich massacre was not simply a crime against Israel—it was a heinous crime against all humanity. Allowing the man who claims responsibility for this senseless and brutal act to go free is a new act of appeasement that can only lead to further tragedy.

No wonder the widow of Yosef Romano, one of the Israeli athletes murdered at Munich, has said:

We have nothing but disgust for people who sell blood for oil.

I recognize that France—like most Western nations—is dependent on Arab

oil for energy. I understand also that France is engaged in delicate negotiations with Egypt for the sale of 200 Mirage jet fighters.

I know not the extent to which economic and political considerations may have entered into the French decision. But one thing is clear: The battle against terrorism around the world has been dealt a staggering blow.

The United States has pursued a firm policy of refusing to negotiate with terrorists and has refused to pay international blackmail. Indeed, some able and courageous American officials have died as a result of this policy.

Mr. President, it is most unfortunate that all nations do not recognize that terrorism will not be ended unless we have an international cooperative effort to capture and punish all terrorists regardless of their cause or their country of origin.

We have heard a lot of rhetoric in the United Nations and from world capitals in recent months and years to the effect that terrorism cannot be tolerated. Many of those speeches have a very hollow ring now that Daoud has been released.

Let us hope that this is only a temporary setback in the continuing battle of freedom and justice against the dark forces of terrorism.

I yield the floor.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the pending motion before the Senate is a motion to proceed to the consideration of Senate Resolution 18, both the resolution and the motion by Mr. ALLEN, the motion to table that motion to proceed having failed. It will be in order again, when the Senate meets, for Mr. ALLEN to renew his motion at some point, inasmuch as the motion he has made will die with the adjournment of the Senate today.

Mr. President, the program for Tuesday next is as follows:

The Senate will convene at 1:45 p.m., following an adjournment.

After the two leaders or their designees have been recognized under the standing order, Mr. TALMADGE will be recognized for not to exceed 15 minutes, because his was the first order entered, to be followed by Mr. HATFIELD, by unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Each will be recognized for not to exceed 15 minutes.

After the recognition of Mr. HATFIELD, the Vice President of the United States will be recognized, under the order entered, to address the Senate.

Following his address, the distinguished Republican leader and I will be in control of the time, not to exceed 30 minutes, to be utilized by Senators who may wish to respond to the Vice President.

Following such responses, there will be not to exceed 2 hours, again under the control of the distinguished Republican leader and myself, for the purpose of tributes to President Gerald Ford.

Upon the expiration of that time, the Senate will proceed under an agreement entered to consider the resolution that was reported from the Foreign Relations Committee today, the Case-Humphrey resolution, I believe, is the way it is referred to. There is a 30-minute limitation for debate on that resolution. A vote may occur on the adoption of that resolution, and it may be a rollcall vote. There could be other rollcall votes in relation to the resolution. I do not know that there will be.

Following the disposition of that resolution, Mr. ALLEN may wish to renew his motion to proceed to the consideration of Senate Resolution 18. Another motion to table that motion to proceed will then be in order, and other motions would be in order, any of which could necessitate rollcall votes.

I believe that pretty well sums up the program for Tuesday next.

ADJOURNMENT UNTIL 1:45 P.M. TUESDAY, JANUARY 18, 1977

Mr. CRANSTON. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 1:45 p.m., Tuesday, January 18, 1977.

The motion was agreed to; and at 4:24 p.m., the Senate adjourned until Tuesday, January 18, 1977, at 1:45 p.m.

HOUSE OF REPRESENTATIVES—*Monday, January 17, 1977*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Depart from evil and do good, seek peace and pursue it.—Psalms 34:14.

Almighty God, our Father, help us to come before You worthily, to pray earnestly and to seek Your will diligently that we may be good to ourselves and do good to the people of this free land. Enlighten our understanding, purify our thoughts, confirm every high purpose and quicken our wills to make Your way our way in these troubled times.

By Your Spirit may we build our lives and the life of our country upon the firm foundation of truth, justice, and good will. In all our daily duties give us the strength to "depart from evil and do good, to seek peace and pursue it;" to the glory of Your holy name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Marks, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a joint resolution of the Senate of the following title in which concurrence of the House is requested.

S.J. Res. 12. Joint resolution to authorize the United States Secret Service to continue to furnish protection to certain former Federal officials or members of their immediate families.

The message also announced that the Vice President, pursuant to Public Law 94–304, appointed Mr. DOLE as a member, on the part of the Senate, of the Commission on Security and Cooperation in Europe, vice Mr. Buckley, resigned.

The message also announced that the Vice President, pursuant to the provisions of sections 42 and 43 of title 20, United States Code, appointed Mr. GOLDWATER as a member, on the part of the Senate, of the Board of Regents of the Smithsonian Institution, vice Mr. Scott of Pennsylvania, resigned.

APPOINTMENT AS MEMBERS OF JOINT COMMITTEE ON CONGRESSIONAL OPERATIONS

The SPEAKER. Pursuant to the provisions of section 401(b), title 4, Public Law 91–510, the Chair appoints as members of the Joint Committee on Congressional Operations the following members on the part of the House:

The gentleman from Texas, Mr. BROOKS, the gentleman from Connecticut, Mr. GIAIMO, the gentleman from Minnesota, Mr. OBERSTAR, the gentleman from New Hampshire, Mr. CLEVELAND, and the gentleman from Ohio, Mr. ASHBROOK.

OPPOSITION TO BLANKET PARDON FOR DRAFT EVADERS AND MILITARY DESERTERS

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, on behalf of the some 120 Members of the House who have publicly opposed a blanket pardon for draft evaders, I have sent a telegram to President-elect Carter this past Saturday requesting that any pardon proposal be handled on a case-by-case basis. I also requested that no action be taken in regard to military deserters and those with less than honorable discharges. These two categories should also be handled on a case-by-case basis under presently established procedures.

I was greatly concerned by news reports over the weekend indicating that

Senator KENNEDY is not only suggesting a full pardon for deserters, but also restoration of their VA benefits. It is also disturbing that two former officials of the President's Clemency Board are proposing an across-the-board pardon that could affect up to half a million persons.

Mr. Speaker, I am firmly convinced that a majority of the American people are opposed to a blanket pardon for draft evaders, as well as military deserters. We respectfully request that he go no further than a case-by-case review and drop any suggestion of a blanket pardon and also that he meet with veterans groups on this highly controversial issue.

CUT REDTAPE AND PAPERWORK

(Mr. STEED asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEED. Mr. Speaker, as I continue my discussion on the need to reduce paperwork burdens the Federal Government inflicts on the American people, I shall cite statistics and data indicating the immensity of the paperwork problem facing this Nation.

However, in order to give an overview today—a capsule of things to come—I shall list some of the more astounding facts about paperwork:

Government agencies print about 10 billion sheets of paper a year to be filled out by U.S. businessmen—enough to fill more than 4 million cubic feet. Paperwork stemming from Federal, State, and local governments average about 10 forms for every man, woman, and child in the United States.

Official records stored around the country total 11.6 million cubic feet, or an amount 11 times larger than the volume of the Washington Monument. Paperwork generated by Washington alone in 1 year would fill Yankee Stadium from the playing field to the top of the stands 51 times.

The frightening aspect of this avalanche of paper is that its rate of growth is not stabilizing, much less diminishing. Paperwork since 1952 has more than doubled.

Small businesses spend a disproportionate amount of time filling out all the questionnaires, reports, and forms required by the Federal Government. Without access to data processing, the amount of time and effort spent by small business in complying with all these information requests becomes intolerable.

Colleges, universities, and school districts are turning down some Government grants because the costs and bother of complying with all the paperwork requirements outweigh the value and benefits of the grant.

Large corporations and small businesses find it not only very difficult and expensive to respond to all paperwork requests, they find it nearly impossible to identify and understand the mountains of directive, regulations, Executive order, statute, and amendment which describe what information must be provided.

Mr. Speaker, paperwork proliferation and its costs are clearly no laughing matter. The jokes have been told and retold, but the mood of the Nation, the reform declarations of the incoming administration, and the determination of the Congress—all indicate that the time has come to take very seriously our responsibility to cut back unnecessary paperwork and redtape—"To get the government off the backs of the American people."

"VOYAGE OF THE 'HOKULE'A' ": A SHOW WORTH WATCHING

(Mr. VAN DEERLIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VAN DEERLIN. Mr. Speaker, I am sure many of our colleagues remember Norris Brock, the tall cameraman who worked the radio-TV galleries for the Time-Life stations in the mid-1960's. He stood out then as now.

Mr. Brock has just completed a personal odyssey, which is of interest to me both in my capacity as chairman of the Communications Subcommittee and as a personal friend from the days when he was filming "talking heads" in the congressional galleries.

For the past 9 years Mr. Brock has been associated with noncommercial television station WQED in Pittsburgh. His career there got off to a rocky start when he was hospitalized for injuries sustained while he was covering a riot. Of late, his evolvement has been more peaceful, as he has honed his skills as a documentary photographer while also branching out into theatrical filmmaking.

Last year, Mr. Brock completed the kind of adventure most of us can only imagine when he spent 34 days on the Hawaiian sailing canoe Hokule'a filming the re-creation of an ancient Polynesian voyage from Hawaii to Tahiti—a distance of some 3,000 miles.

Mr. Brock spent nights on the double-hulled, 60-foot vessel trying to catch some sleep, not an easy proposition when you are six-foot-five and your berth is only five feet long. The cuisine was primitive, the same that sustained the ancient Polynesian seafarers.

Whatever the hardships, the efforts of Mr. Brock and his colleagues have resulted in a stunning documentary, "Voyage of the Hokule'a," which is to be aired Tuesday night over the Public Broadcasting Service. This will be the second in a new season of the acclaimed specials produced by the National Geographic Society and WQED, with the help of a grant from the Gulf Oil Corp. "Voyage of the Hokule'a," which incidentally is the first of these programs to run as long as 90 minutes, is narrated and hosted by the distinguished actor, E. G. Marshall.

But the real stars are the rugged crew and the ship herself, sailed without navigational aids.

For Mr. Brock, the voyage represents another milestone in an interesting career which has taken him a long way from his former beat in the Capitol. I congratulate Mr. Brock and public broadcasting for this success.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
January 14, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 12:12 P.M. on Friday, January 14, 1977, and said to contain a message from the President wherein he transmits a governing international fishery agreement between the United States and the People's Republic of Bulgaria, in accordance with The Fishery Conservation and Management Act of 1976 (P.L. 94-265, 16 U.S.C. 1801).

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, U.S. House of Representatives.

GOVERNING INTERNATIONAL FISHERY AGREEMENT BETWEEN UNITED STATES AND PEOPLE'S REPUBLIC OF BULGARIA—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95-46)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Merchant Marine and Fisheries and ordered to be printed:

To the Congress of the United States:

In accordance with The Fishery Conservation and Management Act of 1976 (P.L. 94-26-265; 16 USC 1801), I transmit herewith a governing international fishery agreement between the United States and the People's Republic of Bulgaria, signed at Washington on December 17, 1976.

This Agreement is significant because it is one of a series to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this Agreement at an early date. Since 60 calendar days of continuous session as required by the legislation are not available before March 1, 1977, I strongly recommend that the Congress consider issuance of a joint resolution in order to bring this Agreement into force by that date.

GERALD R. FORD.

THE WHITE HOUSE, *January 14, 1977.*

AUTHORIZING PROTECTION BY U.S. SECRET SERVICE OF FORMER FEDERAL OFFICIALS OR MEMBERS OF THEIR FAMILIES

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 12) to authorize the U.S. Secret Service to continue to furnish

protection to certain former Federal officials or members of their immediate families, and I ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. SYMMS. Mr. Speaker, reserving the right to object, will the gentleman from Texas (Mr. WRIGHT) please explain whom all this includes and why we need it.

Mr. WRIGHT. Yes; Mr. Speaker, if the gentleman will yield.

Mr. SYMMS. I shall be happy to yield to the gentleman from Texas.

Mr. WRIGHT. Mr. Speaker, last Friday morning the President, Mr. Ford, asked the leadership at a meeting at which the gentleman from Arizona (Mr. RHODES), the minority leader, was present, among others, if we would perform this act as a courtesy to him and the Secret Service.

The Secret Service Director, Mr. Knight, was present and testified to its need.

This would permit having, for not more than 6 months and at the option of the new President, continued Secret Service protection for the President's family; for the Vice President and his family; for the Secretary of State, Dr. Kissinger, and any other member of his family who has been covered through protection by another agency, and for the Secretary of the Treasury, Mr. Simon.

As I have said, Mr. Speaker, it would extend for 6 months. The Secret Service Director indicated to us that there was reason to believe that need exists for this continued protection for this period of time.

Mr. SYMMS. Mr. Speaker, I thank the majority leader for his explanation.

All I know about this is what I read in the Washington Post—I believe it was this morning's paper—which said that Secretary Simon had already refused the Secret Service protection and that he did not want it.

Mr. Rockefeller normally in his life has been used to hiring his own, so it looks as though Dr. Kissinger supposedly is going to make several million dollars on his memoirs. Therefore, I am wondering whether we are establishing a precedent here that is going to go on and on and on and then pretty quickly we are going to have to have protection for everybody in this country. That is my concern.

Mr. WRIGHT. Mr. Speaker, would the gentleman yield further?

Mr. SYMMS. I would be happy to yield to the majority leader.

Mr. WRIGHT. I thank the gentleman for yielding. It is not an entirely unprecedented action. When called upon by the Secret Service in cases which they believed to be meritorious, the Congress on previous occasions has voted for limited periods of time of additional protection. This, I would remind the gentleman, is at the option of the President—the new and incoming President. If it should be, as the gentleman indicates he has read in the newspaper, that one or more of the recipients of this authorized assistance would decline and not desire it, I would assume that the President under those circumstances would not extend it to them.

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. SYMMS. I will be happy to yield to the gentleman from Arizona, the minority leader.

Mr. RHODES. I thank the gentleman for yielding.

The facts are that those portions of the Government responsible for this sort of thing are always fairly well aware as to whether there is an immediate danger or a possible immediate danger to people who would ordinarily become the target of plots against the lives of public figures. I am informed and I believe that the protection which is sought by this is absolutely necessary.

Mr. SYMMS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the Senate joint resolution as follows:

S.J. RES. 12

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States Secret Service, in addition to other duties now provided by law, is authorized to furnish protection to a person who (a) as a Federal Government official has been receiving protection by the United States Secret Service for a period immediately preceding January 20, 1977, or (b) as a member of such official's immediate family has been receiving protection by either the United States Secret Service or other security personnel of the official's department immediately preceding January 20, 1977, if the President determines that such person may thereafter be in significant danger: *Provided, however,* That protection of any such person shall continue only for such period as the President determines and shall not continue beyond July 20, 1977, unless otherwise permitted by law.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

THE BUDGET—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95-28)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

The budget is the President's blueprint for the operation of the Government in the year ahead. It records his views on priorities and directions for the future—balancing the American desire to solve every perceived problem at once with the practical reality of limited resources and competing needs.

The thirty budgets I have either shaped or helped to shape are a chronicle of our lives and times. They tell us what we have aspired to be and what we have been in fact. They tell us about the growing complexity of our society, about the changing and growing role of our Government, and about new problems we have identified and our attempts to solve them.

In shaping my budgets as President, I have sought to renew the basic questions about the composition and direction of the Government and its programs. In my reviews of existing and proposed programs and activities I have asked:

—Is this activity important to our national security or sense of social equity?

—Is this activity sufficiently important to require that we tax our people or borrow funds to pay for it?

—Must the Federal Government raise the taxes or borrow the funds or should State or local government do so?

—Should the Federal Government direct and manage the activity or should it limit its role to the provision of financing?

—How has the program performed in the past? Have the benefits outweighed the costs in dollars or other burdens imposed?

—Have the benefits gone to the intended beneficiary?

—Does this activity conflict with or overlap another?

As a result of these reviews I have proposed to reverse some trends and to accelerate others.

I have proposed, and repropose this year, a marked slowdown in the rate of growth in Government spending. Over the last three decades, Federal, State, and local government spending has grown from 18% of GNP to 34% of GNP. Federal spending growth has averaged 10% per year over the last decade. And even these percentages do not tell the whole story. As the budget documents illustrate, there has been a trend over the last few years toward so-called "off-budget" spending. This is an undesirable practice because it obscures the real impact of the Federal Government and makes it more difficult for any but the most technically knowledgeable citizens to understand what their Government is doing. Therefore, I am calling for legislation to halt this practice so that our

budget system will fully reflect the financial activities of the Government.

In a related attempt to gain greater control over the rate of growth of Government spending I have given special attention this year to spending plans for fiscal year 1979, the year after the budget year. For the first time, the Federal budget shows detailed planning amounts for the year beyond the budget year. This innovation grows out of my conviction that our only real hope of curbing the growth of Federal spending is to plan further in advance and to discipline ourselves to stick to those plans.

From the standpoint of deficits of most recent years the 1978 budget I present shows us fairly close to balance in 1979 and shows balanced budgets thereafter. The effects on 1978 and 1979 spending of congressional action in the last session rejecting many of the restraints I proposed for the current fiscal year, 1977, made total balance in 1979 impossible unless I was willing to abandon, at least in part, the further immediate tax relief I have advocated since October of 1975 and, for no reason other than being able to show such a 1979 balance, cut back from program levels I feel are justified. These alternatives were unacceptable, but given the greatly reduced deficit for 1979 this budget implies, congressional cooperation on the restraints I propose and a slightly better economic performance in the months ahead than we have used in preparing this 1978 budget, it is entirely possible that when the 1979 budget is due to be submitted, a year from now, it could be in total balance as I have strived to achieve.

With restraint on the growth of Federal spending, we can begin to provide permanent tax reductions to ease the burden on middle-income taxpayers and businesses. For too long Government has presumed that it is "entitled" to the additional tax revenues generated as inflation and increases in real income push taxpayers into higher tax brackets. We need to reverse this presumption. We need to put the burden of proof on the Government to demonstrate the reasons why individuals and businesses should not keep the income and wealth they produce. Accordingly, my long-term budget projections assume further tax relief will be provided, rather than presuming, as has been the practice in the past, that positive margins of receipts over expenditures that show up in projections are "surpluses" or "fiscal dividends" that must be used primarily for more Federal spending, on existing or new programs or both.

One trend has been reversed in the past two years. After several years of decline in real spending for national security purposes the Congress has agreed in substantial part to my recommendations for increases in defense spending. The budget I propose this year and the planning levels for the succeeding four years assume a continuation of this real growth trend. My recommendations are the result of a careful assessment of our own defense posture and that of our potential adversaries. In this area as in all others, I am recommending spending I considered essential while at the same time proposing savings in outmoded or unwarranted activities. For the longer term, my recommendations recognize the simple fact that we must plan now for the defense systems we will need 10 years from now.

This same approach was reflected last year in my recommendations for the Federal Government's basic research and development programs. In spite of the financial pressures on the Federal budget, I recommended real growth. I am again proposing real growth for basic research and development programs this year because I am convinced that we must maintain our world leadership in science and technology in order to increase our national productivity and attain the better life we want for our people and the rest of the world.

I am also calling again for an end to the proliferation of new Federal programs and for consolidation of many of the programs we now have. At last count there are 1,044 programs identified in the Catalog of Federal Domestic Assistance. While our Nation has many needs, there is no rational justification for the maze that has been created.

Overlap and duplication are not the only defects of these programs; nor are they the most serious. More importantly, the current programs too often fail to aid the intended beneficiaries as much as expected, rewarding instead those who have learned how to work the Washington system. Some of these programs fail to pinpoint responsibility and accountability for performance and too many impose a managerial and operating burden on the Federal Government, diverting attention from the functions that must be performed at the Federal level and at the same time usurping the proper roles of State and local governments and the private sector.

If we could ever afford the "luxury" of this inefficiency and ineptitude, we can no longer. Federal programs for health services, elementary and secondary education, child nutrition and welfare, for example, are areas that desperately need reform. I called for action last year and prepared detailed legislative proposals. Those who truly care about the needs of our people will not let another year go by without reform. There is no excuse, for example, for the Federal Government to have 15 different child nutrition programs spending over $3 billion per year and still have 700,000 children from families below the poverty line who receive no aid. Nor is there any reason to take the money out of the taxpayers' pockets to subsidize their own children's school lunch.

It will take real courage to correct these problems and the others I have identified for congressional action without following the all too familiar pattern of the past—simply adding more programs. But, increasingly, courage is not a choice; it is an absolute requirement if we are to avoid ever larger, less responsive government.

The task ahead will not be easy because it will require some fundamental changes in our expectations for Government. As a start, we need to understand that income and wealth are not produced in Washington, they are only redistributed there. As a corollary, we need to overcome the idea that Members of the Congress are elected to bring home Federal projects for their district or State. Until this idea is totally rejected, higher funding levels for old programs and more new programs will be enacted each year as Members of the Congress seek to insure their reelection. We also need to overcome the prevalent attitude that only new programs with multibillion-dollar price tags are worthy of media attention and public discussion and worthy of being judged bold and innovative. The multitude of programs already in a budget of more than $400 billion and initiatives to do something about them are worthy of intense public scrutiny, discussion and judgment in their own right.

These changes in attitude will require leadership not only by the executive branch, but, at least equally important, on the part of each Member of the Congress. Members of the Congress must begin to share the burden of the President in saying no to special interest groups—even those in their own districts or States.

The changes that have occurred in the congressional budgetmaking process in recent years provide some basis for optimism for the future. The new budget committees have begun to provide a counterbalance to the spending and taxing committees, offering hope that the total effect of the splintered actions of the other committees will be given equal weight in the congressional process.

But more progress is needed. Just as the budget process cannot do the whole job in the executive branch, it cannot in the Congress either. No matter how streamlined and properly organized the departments and agencies of the executive branch or the committees and subcommittees of the Congress become—and there is surely room for substantial improvement in this respect at both ends of Pennsylvania Avenue—the executive branch must continue to refine and the Congress must adopt processes whereby recommendations to the President or to the House or Senate, as the case may be, on major issues are developed by task force groups representing the competing priorities of various departments and agencies and of the various congressional committees and subcommittees. The reason is simply that most major issues cut across jurisdictional lines, no matter how well drawn—energy, international affairs, and welfare reform, to name but a few examples. I urge the new administration to build on what has been accomplished in this regard in the executive branch. I urge the Congress promptly to put into place the necessary counterpart mechanisms. Such improvements in process, coupled with further

progress in the development of the budget process, will help substantially in addressing and meeting our problems and attaining the goals we have set for our Nation.

The last thirty budgets record a turbulent period in our history; wars, domestic strife and serious economic problems. In the last two years, we have laid the foundation for a positive future. We have stabilized international relationships and created the framework for global progress. At home, we have restored confidence in government while reversing the trends of inflation and unemployment. Building on this solid base, the policies and programs contained in this budget can help us to fulfill the promise of America.

GERALD R. FORD.

THE WHITE HOUSE, *January 17, 1977.*

FISCAL YEAR 1978 BUDGET

(By unanimous consent Mr. MAHON was allowed to address the House for 10 minutes.)

Mr. MAHON. Mr. Speaker, President Ford has now submitted his budget for fiscal year 1978 to the Congress.

It is a document similar to those of recent years, containing recommendations for a high deficit and an even higher increase in the public debt and proposals for program terminations and reductions. Some will attack its high deficit recommendations while others will vigorously oppose its proposed program reductions and low levels of funding.

However, there is one major, and obvious, difference between this and past budgets. It is the budget of an outgoing President and is certain to be modified in a number of areas by President Carter. For this reason, I do not plan to undertake an extended analysis of the budget at this time as the chairman of the Committee on Appropriations has normally done. After examining the budget over the weekend, I believe such an analysis would be more appropriate at a later date after the new administration has had an opportunity to make its own proposals.

I would say, also, Mr. Speaker, that as soon as the Appropriations Committee is organized, we will promptly begin our work. We have scheduled our overview hearings on the budget with the Director of OMB, the Secretary of the Treasury, and the chairman of the Council of Economic Advisors for February 1 and 2. Most of our subcommittees plan to begin their hearings on February 3.

Mr. Speaker, this will be the first year of operation of the relatively new Congressional Budget Act during which the President and the controlling majority of the Congress are of the same party. It will be a crucial year in terms of determining whether or not the new budget process will work in a meaningful and substantive manner.

An important question about the budget process will be whether it can bring a greater measure of fiscal discipline to the Congress or whether it will simply become a bureaucratic and expensive method of adding up what the various interest groups want from the Federal budget.

I believe in the past 2 years some limited progress and success have been achieved by the Budget Act but obviously only a start has been made and that much more remains to be done.

In this regard, one of the most serious problems that the Congress will face will be the timely availability of authorizations that will allow the Appropriations Committee, the Budget Committee, and indeed the entire Congress, to carry out its responsibilities. This is a serious problem and one which, if unresolved, could destroy the objectives of the Budget Act.

To meet the demanding schedule of the Budget Act will require almost superhuman efforts by the authorizing committees, the Appropriations Committees and the Budget Committees. I am confident we can meet the challenge.

Last year and in prior years, the Appropriations Committee has done a splendid job, in my opinion, in pressing successfully for the handling of appropriation measures of vital importance to the leadership and the Congress.

We have every expectation of doing a good job this year.

Mr. CEDERBERG. Mr. Speaker, I rise in support of President Ford's budget for fiscal 1978, which is today submitted to the 95th Congress. I suggest to my colleagues, and to the President-elect, that this budget contains the most comprehensive and detailed program of reform ever presented en bloc to Congress and the public.

Furthermore, the President's program provides the Congress, and the new President, with a unique opportunity to deliver a balanced budget to the American people.

Few of us are ever free from the intense political pressures which are brought to bear on a Federal budget of some $440 billion, representing approximately one-fifth of our entire gross national product. President Ford, as an outgoing President, has been able to prepare a budget based strictly on the merits of particular policies and programs.

The President-elect has said flatly that he will balance the Federal budget during his first administration. President Ford's program, presented in this budget, would balance the Federal budget in fiscal 1980.

It is a responsible program, which explicitly recommends that the budget margin in fiscal years 1980–82 be applied to permanent tax reduction and carefully selected program reductions and increases. It is based on economic assumptions which are conservative and consistent with the "baseline" assumptions of the Congressional Budget Office. In fact, the President's budget is remarkably similar to the program presented to the House a year ago by the chairman of the House Budget Committee, except that the President has made specific recommendations for application of the budget margin.

Mr. Speaker, at this point I would like to make some observations on specific aspects of the budget, which I think will be of interest to my colleagues.

BUDGET TOTALS FOR FISCAL 1978

Budget authority for fiscal 1978 is estimated and proposed at $480.4 billion, compared to $435.9 bililon for fiscal 1977.

Outlays are estimated at $440 billion, an increase of $28.7 billion, or 7 percent. Nondefense outlays are estimated at $327.7 billion, up $16.5 billion, or 5.3 percent from fiscal 1977. Defense outlays are $112.3 billion, an increase of $12.2 billion, or 12.2 percent over fiscal 1977.

Receipts are estimated and proposed at $393 billion, an increase of $39 billion, or 11 percent, over fiscal 1977.

The Federal unified budget deficit is estimated at $47 billion, down $10 billion from fiscal 1977.

TAX PROGRAM

Through his tax program, the President proposes major tax reductions, and selected increases, which would reduce Federal receipts under current law by $14.6 billion in fiscal 1978, and by $47.5 billion in fiscal 1982.

The President proposes permanent personal income tax reductions which would reduce receipts by $7.2 billion in 1977, by $22.6 billion in 1978, and by $27.3 billion in 1979. These reductions would result from: First, an increase in the personal exemption from $750 to $1,000; second, a reduction in tax rates in the lower- and middle-income brackets; third, an increase in the low-income allowance; and fourth, elimination of the $35 per capita credit, the optional taxable income credit, and the earned income credit.

He proposes permanent extension of the investment tax credit, and permanent corporate income tax reductions in the form of permanent extension of the temporary rate reductions which are scheduled to expire at the end of 1977, and a reduction from 48 percent to 46 percent in the tax rate on corporation income in excess of $50,000.

The President also recommends that for calendar years 1979–82, tax adjustments be made to eliminate the higher effective tax rates which result when wage and salary adjustments for inflation push incomes into higher tax brackets.

EXPENDITURE PROGRAM

Through his expenditure program, the President proposes a combination of increases and restraints which would reduce Federal outlays, below the level required to extend current programs, by $5.4 billion in fiscal 1978, and by $6.1 billion in fiscal 1982.

First, the President recommends a detailed and carefully justified series of expenditure reductions, which are intended to reduce or eliminate ineffective or marginal Federal programs. Significant reforms are shown below, with outlay savings for fiscal 1978 and 1979, where applicable:

Reform defense personnel procedures to terminate dual compensation, reform blue-collar pay, reduce PCS travel, and reform the senior officer grade structure and officer-enlisted ratio, —953 million.

Limit EPA waste treatment grants to highly effective facilities, and eliminate grants to marginal or ineffective facilities.

Limit highway trust fund grants to $6.5 billion, —934 million.

Limit the Federal commitment to METRO to $4.7 billion.

Provide impact aid only where parents live and work on Federal property, —764 million.

Limit medicare disbursements, place depreciation payments in escrow, and provide for coinsurance, —7,270 million.

Eliminate retroactive social security payments, change the retirement test, and eliminate student benefits, —2,697 million.

Improve food-stamp administration, and tighten eligibility standards, —1,791 million.

Require reimbursement for VA non-service-connected disabilities, and limit related travel benefits, —389 million.

Second, the President recommends selected increases in the defense budget, designed to restore our Armed Forces to a level of effectiveness which has been seriously impaired by deep congressional cuts in the defense budget during the 9 fiscal years 1968–76. Significant recommendations are shown below, with outlay increases for fiscal 1978 and 1979:

Increasing defense purchases for supplies, fuel training, recruiting, and other operation and maintenance activities, + 1,738 million.

Increase defense procurement for essential weapons systems, + 3,446 million.

Increase defense RDT & E for development of essential weapon systems, + 1,822 million.

Third, the President proposes highly significant reforms to consolidate and simplify several major programs. These reforms do in some cases save money, but their principal objective is to provide for a more responsive use of resources by the Federal Government. Specifically, the budget contains recommendations:

To consolidate many of the currently fragmented energy functions into a Department of Energy.

To provide a more flexible formula, and more State authority, under community development bloc grants.

To combine 23 elementary and secondary education programs into a bloc grant.

To consolidate medicaid and 19 other health programs into a bloc grant.

To simplify the administration of national income assistance programs.

To combine 15 child nutrition programs into a bloc grant.

To provide greater flexibility to localities in the use of housing assistance funds.

Fourth, the President proposes to increase Federal outlays for selected, high-priority domestic programs. Specifically, significant additional outlays in fiscal 1978 and 1979 are recommended for:

Nuclear and non-nuclear energy R & D, + 973 million.

Support for Northeast Corridor Development, + 455 million.

Support for U.S. exports through the Ex-Imbank, + 340 million.

Expanded Medicare coverage, and limited beneficiary liability, + 2,000 million.

Increased funding for Basic Opportunity Grants, + 856 million.

BUDGET FORMAT AND PROCEDURE

In his budget, the President proposes, supports, or continues a number of important reforms in budget format and procedure.

Off-budget agencies are shown in many of the tables.

Legislation is proposed to bring off-budget agencies within the unified budget.

Precise and practical standards for program evaluation are suggested.

The President lends support to the concept of "zero-based budgeting."

The budget shows and emphasizes budget impact in the next fiscal year—1979—and over the next 3 years, adding detail and emphasis to the attention on "out-year impact" in recent budgets.

Mr. Speaker, a logical extension of zero-based budgeting, and serious attention to out-year projections, is multi-year budgeting in the executive branch, and in the Congress. If we are to seriously examine programs "from zero," we must provide multiyear budget requests, and appropriations, so that only a manageable portion of the budget requires thorough review each year.

CONCLUSION

Mr. Speaker, this concludes my remarks on President Ford's budget for fiscal 1978. For the benefit of my colleagues, and the President-elect, I emphasize the importance of this budget precisely because it was prepared by an outgoing President. If this Congress and the President-elect move quickly and decisively, this budget provides a politically and technically responsible blueprint for program reform and budget balance.

I include the following:

EFFECTS OF BUDGET PROPOSALS

[In billions of dollars]

	1977	1978	1979	1980	1981	1982
Receipts:						
Under current tax law, extended	360.9	407.6	465.0	526.4	584.6	634.8
Proposed tax reductions	−7.2	−16.3	−17.6	−28.3	−45.4	−62.3
Proposed tax increases	.3	1.7	7.0	11.9	13.9	14.8
Budget receipts	354.0	393.0	454.0	510.0	553.1	587.3
Outlays:						
Current programs, unchanged	411.2	445.4	472.7	502.1	531.5	564.8
Proposed increases	1.2	7.0	15.7	21.1	26.7	30.1
Proposed reductions	−1.2	−12.4	−22.4	−26.6	−31.3	−36.2
Budget outlays	411.2	440.0	466.0	496.6	527.0	558.7
Margin, without the President's proposals	−50.3	−37.8	−7.7	24.3	53.0	70.0
Margin under current law and proposed changes	−57.2	−47.0	−11.6	13.4	26.1	28.6

MEMORANDUM—EXAMPLES OF POSSIBLE USE OF THE MARGIN[1]

[In billions of dollars]

	1977	1978	1979	1980	1981	1982
The President's tax program (net), exclusive of next line item	−6.9	−14.9	−10.6	−9.1	−11.9	−16.9
The President's proposal to reduce the average individual income tax rate to 1979 level				−7.3	−19.6	−30.6
Further reduction of the average individual income tax rate to 1977 level				−16.7	−26.9	−29.0
Inflation adjustments[2]		−2.1	−4.7	−7.1	−9.4	−11.5
Costs of renewal of antirecession financial assistance and other temporary programs		−2.0	−2.8	−2.0	−.7	−.5
Debt reduction (up to ½ percent of GNP)				−12.6	−13.7	−14.6
New programs and program growth				(3)	(3)	(3)
Other tax relief for individuals and tax incentives for business				(3)	(3)	(3)

[1] It is obvious that some of these alternatives are mutually exclusive if the budget is to remain in balance in 1980–82.

[2] This outlay adjustment is for inflation only in programs that were not so adjusted in arriving at the outlays shown in the table. See text.

[3] Amounts are dependent on costs of the particular initiatives undertaken.

RECENT ECONOMIC DEVELOPMENTS

(By Henry W. Moore, Minority Staff, House Committee on Appropriations)

INTRODUCTION

This report includes latest employment, unemployment and wholesale price figures. Comparisons show changes from preceding month or quarter, expressed in seasonally adjusted annual rates unless otherwise stated. Following are highlights of latest changes in U.S. economic indicators.

KEY ECONOMIC INDICATORS

1. Signs of economic recovery continued in early 1977 as total employment rose for the second successive month while unemployment declined. Business plans for capital

spending improved, industrial production and construction activities increased, retail sales gained and leading indicators point to further economic growth ahead.

2. Total employment rose again in December, up 220,000 to a new high of 88.4 million jobholders as measured in seasonally adjusted terms (or 88.494 millions unadjusted). Nearly 600,000 new jobs have been gained in the 2-month November-December period seasonally adjusted).

3. Non-farm jobs: Employment gains were entirely in non-agricultural industries, which gained 222,000 jobs in December to reach an 85.120 million level. Meanwhile, payroll jobs rose by nearly 260,000 to about 80 million, representing altogether nearly half a million new payroll jobs in the last two months.

4. The civil labor force was virtually unchanged in December at 95.9 million persons, as employment gains approximately matched the decline in unemployment. The labor force has expanded by 2.8 million workers over the last 12 months, including 1.1 million adult men, 1.5 million adult women and nearly 200,000 teenagers.

5. Unemployment fell by 210,000 persons in December to 7.6 million people, as seasonally adjusted (and 7.022 million unadjusted), while the overall unemployment rate moved down from 8.1 percent to 7.9 percent.

6. Key unemployment rates show these over-the-month changes from November to December (seasonally adjusted):

All workers down: 8.1 percent to 7.9 percent.

Household heads down: 5.4 percent to 5.2 percent.

Married men down: 4.6 percent to 4.3 percent.

Full-time workers down: 7.7 percent to 7.5 percent.

Minority workers unchanged at 13.6 percent.

Adult men down: 6.5 percent to 6.2 percent.

Adult women down: 7.7 percent to 7.6 percent.

Teenagers down: 19 percent to 18.9 percent.

7. Persons involuntarily working part-time declined by 200,000 to about 3.4 million, the first substantial decrease in this category since last June. The average workweek rose for private non-farm production or non-supervisory workers for the third straight month, edging up 0.1 hour to 36.3 hours weekly in December.

8. Retail sales gained 10 percent for the 4-week period ending January 1st compared with the comparable year-earlier period, while sales for the latest week rose 8 percent over a year earlier. Durable goods gained 14 percent while non-durables gained 8 percent in the 4-week period reported above compared with year-earlier figures.

9. The Price Outlook showed mixed trends, with wholesale prices rising more strongly than in the past two months while consumer prices rose more slowly:

a. Consumer prices rose more slowly in the latest 3 months reported, up 0.3 percent in November following 0.4 percent rises the 2 preceding months with food prices down 0.2 percent and non-food items up 0.4 percent over-month.

b. Wholesale prices rose 0.9 percent seasonally adjusted (0.8 percent unadjusted) in December, largely due to strong gains in farm products prices, up 3.7 percent, while processed foods and feeds rose 2.0 percent and industrial prices slowed sharply to an 0.3 percent rise over-month (seasonally adjusted figures).

10. Industrial production rose 1.2 percent in November, the largest gain in 9 months, according to the Federal Reserve Board Index of Industrial Production, which measures the change in output of the nation's mines, utilities and factories.

11. Gross National Product (GNP), the market value of the nation's production in current dollars, rose 8.2 percent to a record $1,709.8 billion in third quarter 1976, according to revised figures from the U.S. Commerce Department. Real output, which measures GNP in constant dollars to exclude price changes, rose 3.9 percent between quarters, modestly below the 4.5 percent second quarter gain.

12. Personal Income rose by a $15 billion annual rate in November to mark the strongest gain in 15 months, up 1.1 percent to a $1,418 billion annual rate. Wages and salaries grew $10.2 billion to a $921.5 billion annual rate.

13. Leading Economic Indicators rose strongly in November, up 1 percent over October's 0.6 percent gain (as revised), paced by a lengthening average workweek, improved factory orders, a sharp upturn in building permits and gains in selected industry prices deemed specially sensitive to economic fluctuations.

14. Capital spending by business firms is expected to rise by 11.3 percent in 1977 according to a U.S. Commerce Department survey taken in November and December, portraying a more optimistic forecast for the coming year than previously expected. The survey projects business spending of $134.95 billion on new plants and equipment in 1977, up $13.72 billion from the 1976 estimated level of $121.23 billion.

15. The Housing Construction outlook continues favorable, with highest building permit rate in nearly four years, while housing starts remain quite high despite the small October-November seasonal downturn. The October housing starts rate was revised upward to a 1.813 million unit annual rate while the November figure shows a 1.705 million annual rate, with single-family starts at a strong 1.2 million annual rate. Sales of new 1-family houses were estimated at a 696,000 unit annual rate in November, slightly below the 729,000 rate in October, while new 1-family houses for sale—estimated 13 percent above last year's level.

16. New car output is scheduled to rise 5.5 percent this week over last week, up 12.5 percent over the comparable week a year ago, while the production rise thus far in 1977 is estimated 14.3 percent over year-earlier levels. New car sales gained strongly in 1976, up 17 percent from 1975, rising from 8.6 million to 10.1 million cars annually. The 1977 outlook, according to auto executives, may range from 10.6 million to 11.25 million cars. Domestic U.S. model sales rose 22 percent in 1976, up from 7.0 million to 8.6 million cars annually, while imported models declined 5.5 percent to 1.49 million cars. December sales rose 15 percent.

JANUARY 17, 1977.

From: Henry W. Moore, Minority Staff, House Committee on Appropriations
Re: Economic Assumptions of President's Budget Compared with CBO Baseline Assumptions and Revisions [1]

1. Comparison of President's Assumptions with CBO baseline: 1976–1978: A comparison of key economic assumptions appearing in the President's 1978 budget with those of the Congressional Budget Office in Five-Year Budget Projections: Fiscal Years 1978–1982 suggests that the President's economic assumptions appear to be generally close to those of the Congressional Budget Office baseline assumptions, but somewhat more conservative for the years 1976 through 1978. The President anticipates somewhat lower GNP growth, slightly higher unemployment, and the same or a moderately higher rise in consumer prices than the CBO baseline figures.

2. Comparison of President's Assumptions with CBO revisions: 1976–1978: A later set of revised figures furnished by CBO [2] is the same as the President's for 1976, but more pessimistic in portraying lower GNP growth and higher unemployment in 1977 and 1978, although showing slightly lower price rises as well. These revisions covered 1976 to 1978 only.

3. Comparison of President's Assumptions with CBO baseline: 1979–1982: For the years following, from 1979 through 1982, the President's economic projections show higher growth for 1979–1980, then slightly lower growth than CBO baseline projections for 1981–1982.

The President's projections also show slightly higher unemployment in 1979–1980, then significantly lower unemployment in the following two years.

4. Conclusions: On the whole, the President's estimates of these key economic changes seem more promising in terms of economic growth through 1980, although accompanied by a slightly higher unemployment—declining to below 5%. However, the higher growth rate suggests higher total employment, as well.

The President's consumer price projections are also slightly higher through 1979, but drop below CBO's baseline to the 4.6% range in 1980, and become sharply lower thereafter.

It is noteworthy that CBO's revised figures are more pessimistic with respect to economic growth in 1977, than those of the recent press statement by Dr. Charles Schultze, Chairman-designate of the new Administration's Council of Economic Advisors. Dr. Schultze expects an economic growth rate above 5% this year, reaching about 6% by year's end.

EMERGENCY FARM CREDIT ACT OF 1977

(Mr. SEBELIUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SEBELIUS. Mr. Speaker, I am today introducing legislation entitled "The Emergency Farm Credit Act of 1977," legislation identical to a bill that was introduced in the other body January 14 by my colleague, the senior Senator from Kansas, JAMES PEARSON.

The purpose of this legislation is to provide an additional source of credit to farmers caught up in a most severe economic cost-price squeeze. The introduction of the bill last Friday by Senator PEARSON was most appropriate. On that same day approximately 1,500 farmers and farm wives from Kansas, Colorado, and Nebraska met in Goodland, Kans. This meeting represents a genuine grassroots movement among farmers seeking assistance. While this meeting was held within my congressional district, this most severe economic crunch is being felt by farmers through the High Plains.

For several months now I have been seeking advice and suggestions from farmers and bankers throughout Kansas who have been experiencing serious credit problems. It is clear we now face the possibility of numerous foreclosures unless some action is taken. I wish to underscore the fact that time is of the essence in regard to this problem and the emergency nature of this legislation.

Mr. Speaker, there is a recent precedent for this legislation as represented by the emergency livestock loan program in 1974. Under similar authority the Emergency Farm Credit Act of 1977 would enable farmers to obtain loans of up to $250,000.

This legislation would also make some permanent changes to the consolidated Farm and Rural Development Act. First of all, the present ceiling of $50,000 on operating loans would be increased to $100,000. I would like to point out due to increased production costs the present ceiling has been outdated for some time.

The maximum total real estate debt ceiling for farm ownership loans would be increased from $225,000 to $325,000. The Farmers Home Administration's share of the farm ownership loan would be increased from the present $100,000 to $150,000.

Finally, the Farmers Home Administration would be authorized to make direct loans and guaranty loans to partnership and family farm corporations. The agency is now prevented from doing this.

Mr. Speaker, when Senator PEARSON introduced this legislation last week he said:

> The present credit crunch facing the agriculture community stems from the longer range problem of soaring costs and falling prices. Congress will be addressing this more fundamental problem in the months ahead as we rewrite the farm program, in the meantime, I believe we must come to grips quickly with this growing credit problem before it results in bankruptcy of too many of our family farmers.

Mr. Speaker, I believe Senator PEARSON summarized the situation very well. In my view, this legislation represents the kind of response our farm wives and farmers are asking for.

HOUR OF MEETING ON THURSDAY, JANUARY 20, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns on Wednesday, January 19, 1977, it stand adjourned to meet at 10:25 a.m., not 10 o'clock a.m., on Thursday, January 20, 1977.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

INAUGURAL CEREMONIES OF THE PRESIDENT AND VICE PRESIDENT OF THE UNITED STATES

Mr. WRIGHT. Mr. Speaker, I offer a resolution (H. Res. 113) and ask unanimous consent for its immediate consideration.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 113

Resolved, That when the House convenes on Thursday, January 20, 1977, it proceed to the east front of the Capitol for the purpose of attending the inaugural ceremonies of the President and Vice President of the United States; and that upon the conclusion of the ceremonies the House stand adjourned until Monday, January 24, 1977.

The resolution was agreed to.

A motion to reconsider was laid on the table.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER. The Chair designates the Honorable GEORGE MAHON, of Texas, to act as Speaker pro tempore on Thursday, January 20, 1977.

HOUR OF MEETING ON THURSDAY, JANUARY 20, 1977

(Mr. WRIGHT asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WRIGHT. Mr. Speaker, I desire to alert my colleagues that when we adjourn on Wednesday, we will meet on Thursday at 10:25 a.m. I urge all Members to be here promptly, because the procession for Members of the House will leave in a body promptly at 10:30 a.m., so that the inaugural exercises on the platform at the East Front might start precisely at 11 o'clock. There will be no opportunity for Members to join the procession after it leaves the House Chamber.

Members must display their official tickets in order to get a seat on the platform.

The seats to be occupied by Members of the Senate and House of Representatives have no cover and the area is unheated. Members are urged to dress appropriately for the weather.

No children will be allowed upon the platform, and there will be no seats except for Members actually holding tickets for their own seats.

So, if you expect to be in the procession and get a seat on the platform, you must be in the Chamber at 10:25 a.m., on Thursday.

The procession will be headed by the Speaker pro tempore, then the chairmen of committees, and then other Members in order of seniority.

Following the inaugural ceremonies on the East Front, shuttle buses will be available on the east side of New Jersey Avenue between the Cannon and Longworth House Office Buildings, to take Members and two guests, who have purchased tickets for the inaugural parade, to the parade reviewing stands at the White House. The first buses will depart at 12:30 p.m. and the last will leave at 1 p.m., promptly. The buses will also be available to bring Members back to the Capitol after the parade.

RECOMMENDATION OF COMPENSATION INCREASE FOR JUDICIARY AND LEGISLATIVE MEMBERS AND EXECUTIVE BRANCH OFFICIALS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–47)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Post Office and Civil Service and ordered to be printed:

To the Congress of the United States:

As a part of my fiscal year 1978 Budget, I am recommending a substantial increase in the level of compensation for members of the Federal Judiciary and the Congress as well as senior officials in the Executive Branch. I have been guided in this decision by the unanimous recommendation of the Commission on Executive, Legislative, and Judicial Salaries.

At the same time, I am also strongly endorsing the recommendation of the Commission that new and strengthened codes of conduct be adopted by each branch. Like the Commission, I would not recommend the salary increases if there is not a firm commitment to a new code of conduct.

I have personally discussed this matter with President-Elect Carter and he authorized me to say that he fully supports my recommendations concerning salary levels and the need for stronger codes of conduct for all three branches as recommended by the Commission. Thus, the Executive Branch has made the commitment to the improved code of conduct. I have also spoken to the Chief Justice of the United States and he too supports the recommendations of the Commission and is committed to the code of conduct principles outlined in the report.

If the Congress commits itself to adoption of the proposed code of conduct reforms, then I believe the Congress should permit their salary increases to take effect. This will not only restore public

confidence in national leaders, but it will permit the country to be able to attract the most qualified citizens to these important posts.

Congress enacted in 1967 the current procedure which provides for a special Commission on Executive, Legislative, and Judicial Salaries to be established every four years. This Quadrennial Commission reviewed the rates of pay for the Executive Schedule and for positions at comparable levels in the Legislative and Judicial Branches and submitted recommended changes to me. I am required to include my recommendations in the next annual Budget transmitted after the Commission makes its report. These proposed rates go into effect a month later if neither the Senate nor the House disapproves.

The last increase occurred in 1969. Quadrennial adjustments proposed by the President in 1974 were denied by the Senate. Except for a 5% adjustment enacted in 1975, salaries of senior officials in the Executive, Legislative and Judicial Branches have been frozen for nearly eight years. This year's Quadrennial Commission, chaired by former Commerce Secretary Peter G. Peterson, has documented the serious problems in keeping and recruiting qualified officials.

There is also a related problem of salary compression for some Civil Service employees. Most grades of the General Schedule have continued to rise annually as a result of the upward pressure of private salary rates. But under current law no Civil Service employee can be paid more than the statutory pay rate for Executive Level V. Consequently, all senior Civil Service employees in grades GS–16 through 18 and many at the upper levels of GS–15 have reached this ceiling, so that five different levels of officials in the Executive Branch now are paid at much the same rate.

Many of the same problems apply to the Judicial and Legislative Branches. As a result of frozen compensation schedules, a number of Federal Judges have left the bench to return to private law practice, and the Chief Justice has reported to me that others are planning to do so. This represents an alarming loss of talent and experience.

The Quadrennial Commission determined that a 50 percent increase in Executive, Legislative, and Judicial pay would have been justified by economic indicators. However, the Commission members concluded that direct pay comparisons with the private sector are neither feasible nor appropriate for most of the positions covered by their report, and they recommend what they believed to be the minimum increases necessary to attract and retain the best qualified individuals for these positions. Nevertheless, I have somewhat reduced the amount of salary increases recommended by the Commission. I believe the levels contained in the Budget I am submitting to the Congress today, represents the proper balance between the need for higher levels of compensation and my determination that not one cent of the taxpayer's money should be spent unnecessarily.

The Commission's proposals for salary increases were coupled with recommendations for new "Codes of Public Conduct" in the three separate branches of Government. These would provide full public disclosure of each official's financial affairs, place tight restrictions on other earned income, apply strict conflict of interest provisions upon investments, tighten up expense allowances, place reasonable restrictions on post-service employment and provide vigorous and consistent auditing. In effect, the Commission thus recommends providing higher salaries in exchange for limitations upon other forms of income that give rise to questions concerning ethics or conflicts of interest.

In order to demonstrate a firm commitment to the code of conduct reforms, I urge each House of the Congress to take positive action—such as adoption of a resolution—supporting the code within the thirty-day period available to reject the proposed salary increases. I commend the leadership shown thus far by both Houses in moving toward code of conduct reforms and I am confident that the principles stated in the Commission's report will be adopted.

GERALD R. FORD.

THE WHITE HOUSE, *January 17, 1977.*

NINE NEW RESCISSIONS AND EIGHT NEW DEFERRALS UNDER IMPOUNDMENT CONTROL ACT OF 1974—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–48)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith propose nine new rescissions totaling $1,001.3 million and report eight new deferrals totaling $273.4 million in budget authority developed in connection with the 1978 budget. In addition, I am reporting $70.6 million in increases to five deferrals previously transmitted.

The rescission proposals pertain to programs of the Department of Commerce, Defense, State, and Transportation as well as the Small Business Administration and an International Security Assistance program.

The new deferrals involve programs of the Departments of Commerce and Transportation and the Energy Research and Development Administration while the increases to existing deferrals relate to the Departments of Agriculture, Defense, and Transportation.

I urge the Congress to act favorably on the rescission proposals.

GERALD R. FORD.

THE WHITE HOUSE, *January 17, 1977.*

CONSUMER COMMUNICATIONS REFORM LEGISLATION

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 10 minutes.

Mr. WHALEN. Mr. Speaker, in the 94th Congress, 16 Senators and 175 Representatives cosponsored legislation entitled "The Consumer Communications Reform Act." Although no action was taken in the Senate on the legislation, the House Interstate and Foreign Commerce Committee's Subcommittee on Communications held 3 days—September 28–30, 1976—of hearings on the measure. The bill, which has been the beneficiary of an unprecedented lobbying effort, appears certain to generate considerable controversy in the 95th Congress.

THE COMPOSITION OF THE TELECOMMUNICATIONS INDUSTRY

The most important telecommunications medium today is the integrated telephone industry, dominated by the American Telephone & Telegraph Co.—A.T. & T. In terms of total assets, A.T. & T. is worth $80.2 billion, more than any other corporation in the world. Total annual corporate net income is $3.2 billion.

A.T. & T. actually is a number of telephone companies. It is comprised of 23 local operating companies from coast-to-coast. In addition, A.T. & T. operates Western Electric Co., the manufacturing and supply arm of the Bell System; Bell Telephone Laboratories—a research and development operation, and the long lines department—which operates long distance and other intercity service.

Integrated into the telephone system are some 1,600 independent local phone companies concentrated in five holding companies: General Telephone & Electronics Corp., United Telecommunications, Continental Telephone Corp., Central Telephone & Utilities Corp., and Mid-Continent Telephone Corp. These five organizations own 19.9 million of the 26.8 million telephones possessed by the independents. Looking at the entire telephone industry from the viewpoint of revenues, Bell has 83.9 percent, the independents 15.6 percent, and all other companies—the interconnect companies, the specialized carriers, and the satellite carriers—have 0.5 percent of the industry's total revenue of more than $35 billion.

THE GROWTH OF COMPETITION AND INNOVATION

The Communications Act of 1934, which created the Federal Communications Commission and laid the foundation for a national communications policy, declared as its purpose to "make available, as far as possible, to all the people of the United States a rapid, efficient, nationwide and worldwide wire and radio communication service with adequate facilities at reasonable charges." Contrary to some misconceptions, the act did not mandate or approve monopolistic practices in the telecommunications industry. Nevertheless, a "natural monopoly" was allowed to develop up to the 1950's. The Bell System provided an excellent communications network, and challengers did not step forward to infringe on Bell's preeminence in the field.

Historically, Bell supplied all of its operating companies with equipment through its subsidiary, Western Electric, and prohibited customers from attaching any non-Bell equipment to its lines through tariffs enforced by the FCC and

State regulatory commissions. In effect, only what A.T. & T. supplied could be used.

In the 1950's and 1960's, companies outside of the telephone industry outpaced Bell in the development of sophisticated terminal equipment switchboards, key systems, data modems, answering sets, dialers, and telephone extensions. Moreover, they were able to market them at a lower price than Bell. Eventually, would-be competitors started to challenge A.T. & T. before the regulatory commissions and in the courts.

In the Hush-A-Phone case of 1956, the U.S. Court of Appeals for the District of Columbia overturned carrier tariffs that prohibited consumers from attaching a simple plastic cup to the mouthpiece of their telephone. The court held that the interconnection restrictions in the tariff were "an unwarranted interference with the telephone subscriber's right to use his telephone in ways which are privately beneficial without being publicly detrimental."

Although competition had been simmering in the telecommunications industry for years, it was not until 1968 that competitors were given free rein to move directly against the telephone companies. That year, in the landmark Carterfone decision, the Federal Communications Commission ruled that telephone companies could not arbitrarily deny customers the right to hook their own equipment—in this case, mobile radio units—on to Bell's lines. This opened the way to development of a thriving "interconnect" industry offering Bell customers terminal equipment in competition with Bell's own manufacturing arm, Western Electric. "Interconnect" describes the utilization of customer-owned and maintained terminal equipment, such as telephones, switchboards, data transmitting and receiving equipment, and automatic answering devices. Terminal equipment refers to devices utilized for transmission or reception of communications when interconnected with the public telephone network. This includes the common residential telephones, answering devices, dialers, facsimile devices, computer terminals, private branch exchanges—PBX's and key telephone systems.

Just as the Carterfone decision opened up the terminal market, the Specialized Carrier decision opened up private line services. Private line services refer to dedicated, point-to-point communications facilities which are constructed to meet more specialized communications needs. For example, data communications often require capabilities and features not available from the public telephone network which is designed primarily for voice communications. In 1971, in the Specialized Carrier ruling, the FCC authorized specialized common carriers to compete against Bell in providing certain long-distance service customized to the needs of individual businesses. The cream of the market here is computer data transmission, but there also is a profitable business in telecopier and voice transmission services.

THE IMPACT OF INCREASED COMPETITION ON THE MARKET

After the Carterfone decision in 1968, the interconnect companies made between $500 and $600 million in total sales between 1969 and 1974. However, during that same time, the Bell System increased its revenues from PBX and key system equipment and services by $1.046 billion. Competition clearly encouraged the entry of new firms into the interconnect business, but Bell's market share continued to be well over 90 percent by 1974.

In a telecommunications market which produced $35.3 billion in annual revenues during 1975, the telephone industry received $35.1 billion, or 99.5 percent of the total, while the competitive industry received $186 million, or 0.5 percent of the total. Considering only the private line and terminal equipment submarkets—the only areas open to competition—the telephone industry received $4.1 billion, or 97 percent, as compared to the $186 million, or 3 percent received by the competitive industry.

Although new entries to the telephone market are called competitors, much of their business is a new service, not business taken from the telephone companies. A preliminary report by the Common Carrier Bureau of the Federal Communications Commission on the economic effects of competition in the private line and terminal equipment markets concluded that "the dynamics of competition have apparently stimulated the overall demand for private line services and terminal equipment; telephone industry revenues in these markets have increased at an even greater rate in the presence of competition than before." Thus, competition has generated demand, and the Bell System has benefited from it.

The real competitive battleground, according to industry observers, is not the existing telephone service market, but rather the yet-to-be-exploited computer communications field. It is in this area that large computer companies, such as IBM, ITT, and RCA—rather than the small firms presently involved in the competitive market, are expected to challenge the hold Bell has on the market.

ANALYSIS OF THE KEY PROVISION OF THE CONSUMER COMMUNICATIONS REFORM ACT

The Consumer Communications Reform Act contains eight sections. The following is a summary and analysis of each of the five principal sections of the bill.

SECTION 2—CONGRESSIONAL FINDINGS AND DECLARATION OF PURPOSE

Summary.—In a lengthy introductory section, the bill declares it the findings of Congress that duplication of private line services and equipment interconnection are "contrary to the public interest" because they frustrate economic efficiency and violate the technical integrity of the telephone system. The findings can be summarized as follows:

First. The revenues from "integrated interstate and foreign common carrier telecommunications services" make a contribution to total revenue requirements of the telephone industry and help reduce rates for local services.

Second. The "authorization of lines, facilities, or services of specialized carriers which duplicate the lines, facilities, or services of other telecommunications common carriers"—that is, introduction of competition— absorbs revenues that otherwise would be available for contribution to reducing rates for local services.

Third. Competitors foster inefficiencies in the use of national resources because of their "unnecessary and wasteful" duplication of existing facilities.

Fourth. Competitors impair the technical integrity of the integrated telecommunications network.

Fifth. Competition "has an adverse impact on the national objectives of maintaining stability of consumer price levels, conserving national economic resources, improving productivity, and fostering an economy that will maintain adequate sources and reasonable costs of capital; and is, therefore, contrary to the public interest."

Analysis.—Supporters of the bill describe the Findings Section as a reaffirmation of congressional intent in the Communications Act of 1934. They claim that the goal of that legislation was a single integrated telecommunications system to serve the needs of the entire Nation.

Opponents of the measure assert that the findings, in effect, would establish in court proceedings a legal presumption in favor of monopoly control of technologies and services in the telecommunications industry. In a speech before the Electronic Industries Association, John Eger, Acting Director of the White House Office of Telecommunications Policy, made the following observations about this aspect of the bill:

> Where I disagree, and disagree strongly, is in the basic premise that the established telephone monopoly has put forth as their primary reason for presenting this bill to Congress: The presumption that competition in the telephone industry will ultimately serve to degrade the public telephone network and increase the cost of telephone service to the general public.
>
> (The industry) also has chosen to inject the totally unsubstantiated scare tactics of rising costs and technical harm into the national dialogue in order to preserve its own vested interests at the expense of the consuming public.

SECTION 3—CHARGES FOR SERVICE

Summary.—This section declares that "no compensatory charge for * * * communication service may be found to be unjust or unreasonable on the ground that it is too low." This permits the phone company to charge as low as it wants for its services, as long as the charges exceed the "incremental" costs of providing the service.

Analysis.—Proponents of the bill say this provision is designed to prevent the FCC from setting artifically high rates that permit inefficient competitors to stay in the market.

The measure's critics counter that incremental cost tariffs enable the Bell companies to engage in "predatory pricing" against competitors, shifting costs away from competitive products and services to monopoly activities. They assert that no one except Bell knows just what the company's costs actually are.

SECTION 4—ACQUISITIONS BY AND OF CERTAIN COMMON CARRIERS

Summary.—Upon the application of any common carrier, the FCC would be empowered to approve the acquisition of another domestic common carrier. If the Commission certified its approval of the acquisition, "thereupon any act or acts of Congress making the proposed acquisition unlawful shall not apply."

Analysis.—To protect the customers of private-line companies that go out of business under the burden of proof requirement, the bill gives the established carrier—Bell—immunity from the antitrust laws against taking over duplicating services.

SECTION 6—REAFFIRMATION OF LOCAL TERMINAL AND STATION EQUIPMENT

Summary.—This provision, aimed at the interconnect industry, "reaffirms" the jurisdiction of the States, rather than the FCC, over terminal hookups.

Analysis.—The Communications Act of 1934 did not confer such authority upon the States. The FCC and the Federal Courts continuously have held that the FCC has primary jurisdiction over terminal equipment which requires uniform Federal regulation. As the U.S. Court of Appeals for the Fourth Circuit ruled in the Telerent case in April, 1976:

. . . The (FCC's) declaratory statement of its primary authority over the interconnection of terminal equipment with the national telephone network is a proper and reasonable assertion of jurisdiction conferred by the (Communications Act of 1934).

This section clearly would favor A.T. & T. which already is responsible to the States for rate regulation. Under this provision, the interconnect companies would be forced to market equipment separately, State by State, and possibly to devise different equipment to meet conflicting State requirements. According to the North American Telephone Association, this section "would result in a 50-State crazy quilt of policies which would keep its members effectively tied up in litigation and undermine their ability to compete with the Bell System in the marketplace."

SECTION 8—FINDINGS TO BE INCLUDED IN COMMISSION AUTHORIZATIONS OF SPECIALIZED CARRIERS

Summary.—For the private line market, the bill places a burden of proof upon competing companies to show that their services would not duplicate existing or potential services of the existing company, that their prices would not cause telephone rate increases, and that their services would not impair the technical efficiency of the network.

Analysis.—This section would counter FCC decisions that have permitted the growth of companies providing private lines tailored for specific markets. These companies claim that the burden of proof would be almost impossible to meet, since A.T. & T. always could show that it had the potential to provide a proposed private line service.

THE CENTRAL ISSUE: THE ECONOMIC IMPACT OF COMPETITION

Although supporters of the Consumer Communications Reform Act have argued that the bill is necessary to preserve what they believe to be the intent of the Communications Act of 1934 in the face of the growth of competition and necessary to preserve network integrity against a proliferation of interconnect devices, the principal issue they have raised is the adverse economic impact of competition. Lobbyists for the bill contend that home phone rates will go up dramatically—perhaps as much as 79 percent by 1985—unless competition is reduced.

An A.T. & T. pamphlet urging consumers to contact their Senators and Representatives about the bill frames the issue in the following manner:

The introduction of telecommunications competition, real or contrived, involves major economic implications for tens of millions of home telephone users—*with particular impact on low-income families and those on fixed incomes* (emphasis A.T. & T.'s.)

. . . If, over a period of time all support from other services were to be lost—because of losses to competition or because of repricing to respond to competition—monthly rates for home phones would have to be increased by about 75 percent to cover full costs. Future inflation could, of course, drive rates up even further.

The reasoning here is that basic home phone service is a money loser and must be subsidized from other services, such as long distance tolls, special private lines, and commercial phone equipment. Thus, if part of that business is lost to competitors, rates to home subscribers necessarily will have to go up.

Some opponents of the bill have turned the argument around the other way. They insist that home phones pay for competitive services. A 3-year cost study of the New York Telephone Co.'s operations by the New York Public Service Commission concluded that much of the equipment leased to businesses was underpriced and actually unprofitable. These findings have been vigorously contested by A.T. & T.

The Common Carrier Bureau of the FCC has been examining the economic impact of competition. The summary of its preliminary analysis made the following determination:

The comparative size, market penetration, and financial capabilities of the telephone industry vis-a-vis its competitors appear to be such as to preclude any significant near-term effects on carrier revenues, earnings, or the rates for basic telephone services. This view is further strengthened by our findings that there is no valid support for telephone industry claims that beneficial cross-subsidization from private line services and terminal equipment leasing to basic telephone services even exists—much less, that it will be adversely affected by future competitive developments.

Most observers agree that telephone subscriber rates likely will increase in the near future—but not because of competition. With little or negligible competition in the telephone equipment market between 1970–75, the Bell System has raised the price of basic telephone services by an average of $829 million per year. According to the North American Telephone Association, in view of A.T. & T.'s needs for new capital to modernize telephone plants and to replace existing facilities over the next 5 years, Bell System rate increases will average $1.4 billion per year regardless of competition.

CONCLUSION

After having studied the Consumer Communications Reform Act for several months and after having heard from representatives from both sides on the issues involved, I have concluded that I must oppose it. Five reasons underscore this conclusion.

First, the bill would establish a legal presumption in favor of monopoly control of technologies and services in the telecommunications industry. I cannot accept the view that competition with respect to technologies and services would frustrate economic efficiency and violate the technical integrity of the telecommunications system. On the contrary, I believe that the legal enshrinement of a monopoly would stifle creativity and innovation.

Second, it would grant special exemption from the antitrust laws for the acquisition of duplicative services by the established carrier. This precedent would serve to reward takeovers based upon officially-approved monopolistic practices.

Third, the measure would overturn FCC and Federal court rulings granting primary jurisdiction to the FCC over terminal hookups. The shifting of this authority to the States only would operate to facilitate the fragmentation of new interconnect company competition and bestow an unfair advantage on the telephone company.

Fourth, the legislation would restrict the growth of specialized carrier competition by placing upon these carriers the virtually impossible burden of proving that their services would not duplicate present or potential services of the existing company.

Fifth, I do not support the premise that private line and terminal competition will be responsible for higher rates for home phone subscribers. I agree with the FCC that such a nexus between the two has not been established.

For these reasons, I would vote against this legislation if it were to reach the House floor.

COMPREHENSIVE HEALTH CARE INSURANCE ACT OF 1977

The SPEAKER. Under a previous order of the House, the gentleman from Tennessee (Mr. DUNCAN) is recognized for 10 minutes.

Mr. DUNCAN of Tennessee. Mr. Speaker, in the last several Congresses one of the more important questions has been how can the Congress write a national health insurance plan that will meet unmet national health needs, yet at the same time preserve the fiscal integrity of the Federal Treasury? That question again faces the 95th Congress.

I believe that the proposal of the Nation's physicians—the Comprehensive Health Care Insurance Act of 1977—does the best job to date in extending health insurance to every American at a cost the Nation can afford.

It controls costs by limiting Federal help to those in need by determining that level of need from income tax liability. Additional cost controls are found in its coinsurance factor—except for the poor—its provision of preventive care,

and its promotion of competition among health insurance carriers.

At the same time it provides realistic basic medical and hospital coverage and financially protects all Americans from catastrophic illness.

In short, it does about what the Federal Government can afford to do at this particular time.

It is not legislation that overpromises and underperforms.

This proposed legislation provides Federal assistance on the basis of need. The most help goes to those who need it the most. The least help goes to those who need it the least.

If NHI is to be viable, then it must be prudent—prudent enough to focus Federal resources on those areas that contain the greatest needs. To apply Federal funds broadly across the whole spectrum of health care would serve little purpose other than to dilute the Federal Treasury.

This new NHI proposal is designed to put real patient needs first and foremost on the scale of national health priorities.

Those Americans who lack financial access to quality care would no longer be faced with such barriers.

The fear of catastrophic illness that plagues even well-off Americans would be removed, for the plan provides catastrophic as well as basic coverage for the entire population.

Benefits for any 12-month period would include the following: 365 days of hospital inpatient care; 100 days of inpatient care in a skilled nursing facility; emergency or outpatient services customarily provided by a hospital;

All medical care—diagnostic, therapeutic, or preventive—regardless of where such services are rendered;

Full dental care for children, and emergency dental care for anyone;

Home health benefits;

And many other services, including psychiatric treatment, well-baby care, X-ray and lab tests, and family planning.

Certainly this comprehensive list identifies the first and foremost health needs of Americans.

And certainly it does not attempt to restructure our entire health care system. It builds upon its present strengths. At the same time, it corrects one of its major weaknesses by removing the financial barriers that in the past have denied some Americans access to the system.

Under the new proposal the great bulk of the American population would be covered under an employer-employee financial arrangement. Employers would be mandated to provide health insurance coverage for employees. Under the plan, employers would pay at least 65 percent of the premium costs for NHI. Employees would, however, not be mandated to participate in such an arrangement.

The plan remains essentially voluntary as opposed to a compulsory plan where everyone would be compelled to pay into one system, compelled to accept coverage under one system.

Patients would retain the right to choose what form of health insurance they desired.

While participation would be mandatory for employers, the system would be essentially private.

Significant options would be retained for both patients and providers.

As a consequence, a large measure of pluralism in the administration and financing of any NHI program would be preserved. It is precisely this pluralism—the creativity of the private sector supplemented, not supplanted, by the Government sector—that has made the quality of American medicine the finest in the world today.

The medical profession's NHI plan would be administered by the existing "third-part-payer" system of our insurance industry, the Blues and the commercials.

A 15-man Health Insurance Board would be established and its membership would include the Secretary of Health, Education, and Welfare and the Commissioner of Internal Revenue. The remaining members, not otherwise U.S. employees, would be appointed by the President, with the advice and consent of the Senate. The appointed members of the Board would be selected from persons specifically qualified to serve on the Board by virtue of their education, training, or experience, and would include at least seven persons who are practicing M.D.'s, one D.O., and one dentist recommended by the appropriate national professional organizations. The remaining members of the Board would be members of the general public.

The Health Insurance Board would: First, prescribe such regulations as may be necessary to carry out the act's purposes and provisions; second, establish minimum Federal standards for the use of State insurance departments in determining whether an insurance company and plan are qualified; third, in consultation with carriers, providers of services, and consumers, plan, review, and develop, where necessary, programs to provide for maintaining the quality of medical care, and the effective utilization of avaliable financial resources, health manpower, and facilities, through utilization review, peer review, and other means which provide for the participation of the insurance carriers and the providers of services; and fourth, review of the effectiveness of the program established in this act, and especially the utilization review procedures developed by the carriers and the several professional associations.

In addition to the stipulated cost control mechanisms of the Health Insurance Board, a most important control would be the coinsurance requirement—except for the poor—incorporated into the plan. Experience has shown beyond the shadow of a doubt that a health care system without some regulatory control of usage is soon overwhelmed by the "worried well" who crowd out those who truly need care.

A recent Rand Corp. study has shown that any NHI program will increase the demand for ambulatory services; and that the greater the dollar coverage for such services, the greater the demand.

Regulatory controls of usage—such as coinsurance—are of paramount importance to the fiscal integrity of any NHI program. Such controls are written into the doctors' NHI plan.

Now I am going to make some personal observations about NHI.

Any NHI plan will have, of necessity, three parts: benefits, financing, and administration.

There is no great disagreement in this Chamber, or in the Nation, on the benefit package. As a matter of fact, the plan I sponsor today has as broad a scope of benefits as any current proposal before this body.

The great division of opinion on NHI occurs in the areas of financing and administration. The two are frequently inseparable.

If the Federal Government is to finance NHI—through general revenues or payroll taxes, or a combination of both—then the Federal Government will administer the program. No ifs, ands, or buts.

If the Congress chooses to go this route—and I deplore the very thought of it—then health care in this country will be totally governed by bureaucracy—probably by the already overwhelmed and beleagured Social Security Administration. Redtape would pyramid. And Government would find itself unable to respond to individuals with any degree of sensitivity or indeed with many of the promised benefits of the program. This inability of government to respond to individual need on a one-to-one basis has been demonstrated time and time again.

Perhaps an even sadder result—if the Congress chooses to go the route of total Federal financing and administration of an NHI program—is the inescapable fact that the health care of the American people would compete within the Federal budget with defense spending and other high priority items. This has happened in Sweden and the United Kingdom. And invariably in those countries health care budgets have come out second best, or worse.

No, any NHI plan to be viable must depend heavily on the private sector for its financing and administration. The Federal Government should limit itself to the provision of funds for those Americans in need and to the establishment of the necessary authority to regulate the program at high standards.

The private sector and the governmental sector have been able to work hand in hand in the past, and must continue to do so in the future.

I commend to you, Mr. Speaker and my colleagues, careful consideration of the Comprehensive Health Care Insurance Act—a proposal to extend health insurance to every American.

ARE WE A NATION GOVERNED BY LAWS OR BY MEN?

The SPEAKER. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 15 minutes.

Mr. GONZALEZ. Mr. Speaker, the assassinations of John Kennedy and Martin Luther King shook the very foundations of our governmental structure based on the concept of the free and peaceful exercise of rightful authority and expression of opinion or belief. Indeed, they raised the question of whether or not we are a nation governed by laws or by men. Unfortunately, as a result of potentially ineffectual investigations, the answer to that question has never been fully resolved. Consequently, this House determined that it would, once and for all, decide the extent to which the fabric of our Nation's structure was torn, how, and, by whom.

Some people question whether the House can justify why these investigations should be undertaken. They do not see any possible benefit that can be gained by exploring these past events. Yet no less than the integrity of our democratic process and belief in fundamental freedoms is at stake. The House is the largest body which represents the American people; the public's faith in the integrity of our democratic process and constitutional ideals is the foundation of our authority to govern. We have a continuing obligation to justify such faith. Under such circumstances, the burden is not on the House to justify why it should investigate these assassinations, but on those opposed to the investigations to make a compelling case for why it should not.

In constituting the select committee and charging it with the responsibility to conduct a full and complete investigation, this House vested great responsibility in its committee. In fact, the integrity of the Congress in the future may rest, in some part, on the thoroughness of this investigation. Absent a thorough investigation, we will risk being subject to the same allegations of coverup, ineffectiveness, and the like that are the very reasons it is necessary that we undertake the current investigations. If we do not perform fully and effectively, we will lose the opportunity to explore the jeopardy to our governmental structure at the time of the assassinations.

We will not merely lose the opportunity to learn from a historical lesson, but possibly the opportunity to bring to justice those who have for these many years remained unpunished and unexposed. Thus, it is imperative, as the original resolution charges, that we perform our function completely so that there will be left no unresolved questions as to the past. The purpose of the House, therefore, must not be to restrict the quest for truth, but in fact, to broaden it.

To this end, the original resolution, as well as that in question today, charges the select committee to examine not only the murders of Kennedy and King, but also "any others the select committee shall determine." Much thought has been given to the inclusion of this phrase by the members of our committee and staff. We have determined that in its absence, very grave problems could befall the course of our investigation and we could be thwarted in the vital collection of evidence and testimony. Simply stated, absent this phrase, we might be confined to the investigation of facts restricted in time and place, to the deaths of these two great leaders.

It is known by the Members of this House that many persons have died since the deaths of President Kennedy and Dr. King. Whether they be witnesses, conspirators or deaths totally unrelated to the assassinations, an exploration of the circumstances and the impact of their deaths may be vital to finally answer all the questions that have been raised. Without the clause in question, we might be compelled to prove the death was related to either that of Kennedy or King before we have the authority to investigate that very issue. Courts never presume a relationship in a situation such as this, but require its proof; without broad jurisdiction in this select committee, proof may be impossible.

Most of the questions with regard to the authority and the jurisdiction of the investigation will arise when a subpena is questioned. It is my belief that without this clause, the burden of proof upon the select committee as to the intent of this House will be severely increased. Without this language, a court might narrowly construe the circumstances surrounding the deaths of Kennedy and King to those events which were directly related in time and proximity. Such a narrow construction might preclude the committee from investigating the many mysteries that have arisen concerning the deaths of others which may bear directly on the investigation. Such a narrow construction would be an error given the broad inquiry the committee and House intends to undertake but it is a possibility whose effects we should minimize.

Moreover, since this clause did appear in the original resolution, to delete it at this juncture might suggest that Congress intended to narrow the extent of the authority of the select committee. This might be fatal to the effort to obtain and analyze the evidence.

The point of this discussion is that the inclusion of this language in the resolution as a deliberate and conscious determination by this House will indicate to any court that the Congress wishes the investigation to be unfettered by a narrow delineation of authority. The purpose of embarking upon this inquiry is a full and thorough quest for the truth, and if this involves the deaths, murders, or assassinations of others that may initially appear only tangentially, remotely, or indirectly relevant to those of Kennedy and King, then I hope the committee will be able to examine the issue before it has to demonstrate or prove any relevance to the death of Kennedy or King.

In fact, so that no question should exist in the minds of others, whether they be those under subpena to testify or the courts examining our subpenas, permit me to discuss briefly the areas which this House wishes to have us explore, without narrow limitation. The "circumstances surrounding the assassination, murder, homicide and death" of Kennedy and King is meant to be a very broad scope of inquiry. It is meant to include those who may have been involved in the planning, execution or any coverup of the assassinations. It is meant to include the investigations into each assassination. It is meant to include all events that may relate to either assassination—whether they occurred within days of either death or within the past week.

It is clear that the select committee should attempt to determine the identities and motives of all persons who were in any way involved in the killings of Kennedy and King. This inquiry, of course, would include the examination of whether or not any governmental agencies, Federal, State, or local in the United States or any foreign country were involved. Moreover, the oversight responsibility of the Congress would include examination into whether or not any law enforcement or intelligence agency of the United States had knowledge of or was in any way a party to plots to murder these leaders.

It is important that the select committee determine whether or not any agency of the Federal, State, or local government engaged in the investigation into either assassination fully and effectively performed its function. In fact, was there the required degree of effectiveness in the cooperation among these agencies? Finally, did any person, agency or organization deter the course of the investigation of these assassinations by withholding, destroying, or altering evidence?

The investigation, to date, has raised many questions in the areas that I have just categorized. Although I do not mean to suggest that we have firm conclusions as to the resolution of any of these questions I have raised, there is no doubt that we have uncovered much material which gives rise to further exploration.

Before I conclude, may I take one last moment to urge upon this House that we act quickly and expeditiously to reauthorize the select committee. Any further delay could result in a serious hindrance to our investigation in its quest for truth. The obvious effect of delay would be to suggest to others that this House vacillates and is indecisive as to whether or not it wishes to pursue this cause. This will result in a critical effect on our credibility with other agencies, whether executive branch, State or local, and will suggest a lack of firmness in our pursuit of a subpena with the judicial branch. Of more acute importance, two problems immediately face the committee for we are without any legal authority whatsoever and, in law, do not exist. Thus, 13 vital subpenas for essential evidence which have been issued in Tennessee and Texas are, at present, completely unenforceable. Further, those of us on the committee have seen emergency situations arise in the past where the testimony of witnesses or the collection and custody of evidence is immediately vital, and under our current status, we could only sit helplessly in futility.

In conclusion, I ask you now, expeditiously and with full support to reauthorize the select committee. In effect, I ask you to permit us to finish the job which we have just begun. To turn our

back on this obligation now is unthinkable and would make this House the laughingstock of the world. So much has shaken the confidence of the American people in their governmental institutions in the past two decades that we find ourselves with a rare opportunity, at least in these two areas, to say to our fellow citizens that given this opportunity, we acted.

STATEMENT IN SUPPORT OF BILL TO REQUIRE FOREIGN BANK ACCOUNT QUESTION ON FORM 1040 AND OTHER TAX RETURNS

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 10 minutes.

Mr. VANIK. Mr. Speaker, over the past 2 years, the Ways and Means Oversight Subcommittee has collected evidence indicating that the Treasury may be losing billions in revenues through the fraudulent misuse of secret foreign bank accounts.

Such accounts have served as a financial underpinning of organized crime as well as white-collar crime. Narcotics traffickers, gambling operators, and others of their kind have used foreign accounts to hide enormous illicit profits from the tax collector. Foreign accounts have permitted Americans who are regarded as "pillars of the community" to evade taxes and circumvent securities regulations. They have been a channel for laundering corporate money which ends up as bribes or in slush funds. In short, many foreign bank accounts have served as an essential ingredient in frauds against the United States—frauds which cost the honest taxpayer and his Government dearly.

For more than a decade, dedicated Internal Revenue Service agents have had little more to go on than their wits, tips from a handful of informants, and a lot of luck to track down those who commit such frauds. In the past 2 years, just as their efforts were beginning to pay off, they have been hamstrung, not helped, by their IRS superiors.

One curve among many was thrown at these dedicated agents by the departing Commissioner of Internal Revenue in 1975. This official ordered deleted from the form 1040, the basic income tax return, a question as to whether the taxpayer had any interest in or authority over a foreign bank account. The officially stated reason was a lack of space on the form, when in fact space could have been found for the question. And he acted against the advice of top IRS law enforcement officials and of those charged with similar responsibility at the Treasury Department.

Late last year, after much of this chicanery had been exposed, the Commissioner and the Secretary of the Treasury retreated. They found space for the foreign bank account question on schedule B, a part of the income tax forms package which goes to every recipient of the basic form 1040. Not only that, but they found space as well for a question concerning transactions involving a foreign trust.

The question concerning foreign trust transactions is worthwhile from a law enforcement standpoint. But, like the bank account question, its placement or nonplacement on income tax returns can be determined by the flick of a bureaucrat's pen.

Mr. Speaker, we have waited too long in making sure that the fate of such important items as these two questions is not left to administrative whim. We need also to insure that each taxpayer is aware of the questions and that he or she does not cavalierly choose, for whatever reason, not to answer them. And we must make sure that the IRS uses the information derived from the questions—and that it is made available to other Federal law enforcement agencies—to track down those who abuse foreign bank accounts and foreign trusts to the detriment of our tax system.

To those ends, I am today introducing a bill requiring the Secretary of the Treasury and the Commissioner of Internal Revenue to place the foreign bank account question and the question concerning foreign trust transactions on all future income tax returns. Under this bill, the Internal Revenue Code of 1954 would be amended to require that any income tax return—individual, fiduciary, partnership, corporate, or other—contain on the first page questions with respect to whether the filer, during the taxable year—

First. Had any direct or indirect interest in any bank, securities or financial account in a foreign country.

Second. Had any legal or beneficial interest in a trust in a foreign country.

To insure compliance, a civil penalty would be imposed for failure to answer either of the questions, and anyone giving a false answer could be sentenced to a fine up to $5,000 or imprisonment up to 3 years, or both. I feel this is an essential ingredient of the legislation because of our experience under the outgoing administration. In 1974, the last year that the foreign bank account question appeared on the form 1040, a huge percentage of taxpayers did not answer the question—and the IRS did nothing to require them to answer. It is very probable that among the 38 million taxpayers who chose not to answer were several thousand tax dodgers with foreign bank accounts who realized that they could go to jail if they specifically denied having such accounts.

Another part of my bill would require the Treasury Secretary and the IRS Commissioner to place the foreign bank account question on the first page of the return. This is aimed at making sure that future IRS and Treasury administrators do not make the same mistake as their departing predecessors. When the foreign bank account question appeared on the first page of the form 1040—as it did in earlier years—almost 95 percent of individual filers answered the question either "yes" or "no." But in later years, when the question appeared on the back page of the return, almost two-thirds of those filing did not answer the question at all.

I also want to make sure that when the foreign account question and the foreign trust question are placed by law on future tax returns, the IRS and other Federal agencies concerned with white-collar fraud make the most of the information derived. Although the foreign bank account question did appear on returns for the years 1970 through 1974, the IRS did nothing, systematic or otherwise, to follow up on the data that was collected. Nothing was done to match this data with other information gathered by the IRS and other Federal agencies about Americans trying to circumvent our fraud or financial laws.

Because many fraudulent transactions involving foreign accounts are so complex and cross several jurisdictional lines, there should be no barrier to a free exchange of information among Federal agencies investigating such deals. Such a barrier now exists in section 6103 of the Internal Revenue Code of 1954. Presumably, this section would classify the information derived from the foreign bank and foreign trust questions as tax return information not subject to disclosure outside the IRS. For that reason, the bill I am presenting today would exempt taxpayers' answers to these questions from the disclosure prohibitions of section 6103.

Mr. Speaker, 5 years ago the Congress passed a law, the Bank Secrecy Act, which many thought left no doubt about where we stood on the foreign bank account question. In short, we wanted the question to appear on income tax returns—and for several years thereafter, it did. But experience has shown how administrators in the executive can undo what Congress intended.

President-elect Carter's public statements on more vigorous criminal enforcement of the tax laws are an indication that the foreign bank account question will not encounter the difficulties it has during the past few years of the outgoing administration. I believe we can count on that. But we do not know what may happen after the Carter administration leaves office. That's why it is necessary for Congress to put into law what it intended 5 years ago.

The following is the text of the bill which I have introduced today:

H.R. —

A bill to amend the Internal Revenue Code of 1954 to require taxpayers to provide on the first page of any income tax return certain information with respect to their interests in foreign bank accounts and their interests in foreign trusts.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subpart B of part II of subchapter A of chapter 61 of the Internal Revenue Code of 1954 (relating to income tax returns) is amended by adding at the end thereof the following new section:

"SEC. 6017B. INFORMATION WITH RESPECT TO INTERESTS IN FOREIGN BANK ACCOUNTS AND IN FOREIGN TRUSTS.

"(a) GENERAL RULE.—Under regulations prescribed by the Secretary, the information required on the first page of any return made by a United States person with respect to the

taxes imposed by chapter 1 for any period shall include—

"(1) information with respect to whether such person, at any time during such period, had any interest in, or signature or other authority over, any bank, securities, or other financial account in a foreign country (other than such an account in a United States military banking facility which is operated by a financial institution which is a United States person); and

"(2) information with respect to whether such person, at any time during such period—

"(A) was the grantor of any foreign trust created during such period;

"(B) transferred any money or property to a foreign trust; or

"(C) was the beneficiary of any foreign trust.

"(b) ADDITIONAL INFORMATION WITH RESPECT TO FOREIGN BANK ACCOUNTS.—The Secretary may, by regulation, require any person who had any interest or authority described in subsection (a)(1) during any period for which a return of the taxes imposed by chapter 1 is made to include with such return such additional information as the Secretary determines to be necessary to carry out the purposes of section 241 of the Currency and Foreign Transactions Reporting Act.

"(c) BENEFICIARY.—For purposes of subsection (a)(2), a person shall be treated as the beneficiary of a foreign trust for any period if—

"(1) under the terms of the trust, the income or corpus of the trust may be paid or accumulated during such period to or for the benefit of such person; or

"(2) any part of the income or corpus of the trust could be paid to or for the benefit of such person if the trust were terminated during such period.

"(d) CROSS REFERENCES.—

"(1) For criminal penalty for false statement under this section, see section 7206.

"(2) For civil penalty for failure to supply information required under this section, see section 6698."

(b) The table of sections for such subpart B is amended by adding at the end thereof the following new item:

"Sec. 6017B. Information with respect to interests in foreign bank accounts and in foreign trusts."

SEC. 2. (a) Subchapter B of chapter 68 of the Internal Revenue Code of 1954 (relating to assessable penalties) is amended by adding at the end thereof the following new section:

"SEC. 698. FAILURE TO SUPPLY INFORMATION WITH RESPECT TO FOREIGN BANK ACCOUNTS AND FOREIGN TRUSTS.

"(a) CIVIL PENALTY.—If any person fails to include on his return any information required under section 6017B, such person shall pay a penalty of $100 for each such failure, unless it is shown that such failure is due to reasonable cause.

"(b) DEFICIENCY PROCEDURES NOT TO APPLY.—Subchapter B of chapter 63 (relating to deficiency procedures for income, estate, gift, and certain excise taxes) shall not apply with respect to the assessment or collection of any penalty imposed by subsection (a)."

(b) The table of sections for such subchapter B is amended by adding at the end thereof the following new item:

"Sec. 6698. Failure to supply information with respect to foreign bank accounts and foreign trusts."

SEC. 3. Subsection (i) of section 6103 of the Internal Revenue Code of 1954 (relating to disclosure of returns and return information to Federal officers or employees for administration of Federal laws not relating to tax administration) is amended by adding at the end thereof the following new paragraph:

"(7) Information with respect to foreign bank accounts and foreign trusts.—The Secretary may disclose to the officers and employees of any Federal agency, solely for use in connection with their official duties, the following return information:

"(A) The information required to be shown on any return under paragraph (1) or (2) of section 6017B(a), including the names and addresses of taxpayers who showed on any return—

"(i) that they had an interest or authority described in section 6017B(a)(1), or

"(ii) that they were a grantor, transferor, or beneficiary of a foreign trust.

"(B) Any return information which the Secretary required to be included with a return under section 6017B(b)."

SEC. 4. The amendments made by the first three sections of this Act shall apply with respect to returns filed for taxable years beginning after the date of the enactment of this Act.

A TWO-PRICE SYSTEM FOR ENERGY

The SPEAKER. Under a previous order of the House, the gentleman from Oregon (Mr. WEAVER) is recognized for 15 minutes.

Mr. WEAVER. Mr. Speaker, my Oregon constituents, and I expect most Americans, have been poorly informed by their Government and the energy corporations on the tough energy decisions we face. We are in trouble. We are running out of cheap energy and we may not be able to afford the vastly more expensive new energy sources. Already in this winter's cold wave, many people cannot pay their fuel bills. And the price rises have just begun.

We need a massive conservation effort. Millions of people put to work retrofitting homes and buildings to use less energy; smaller and fewer cars and less reliance on energy consuming appliances, and more energy efficient industrial production methods.

We also need a two price energy system. We still have left some cheap domestic energy and each citizen should have a limited share at a cheap price. And we have expensive foreign oil—and expensive oil from domestic sources such as secondary extraction, Arctic, and offshore—and this energy should be placed in the free market at its true cost. The upshot would be that every citizen would have some cheap energy to obtain the essentials of life, and also a free choice with a strong conservationist thrust to buy or not buy expensive energy.

In price categories even higher than new oil will be the newer energy sources: nuclear, coal, and solar. I emphasize the word "category." The difference in new energy cost is not merely one of degree. New nuclear plants will have to charge 4½ cents a kWh—that is comparable to $30 a barrel for oil—just to amortize the costs of the plants. Coal will be about the same as nuclear, and solar, while probably less costly, will still be in the upper price brackets. Here the two price system is essential to allow the market to determine our real need for ultra expensive energy.

Ours is an economy based on cheap fuel. Our wage levels and pensions are set by standards of low priced essentials, food and fuel. When OPEC quadrupled the price of their oil it sent shock waves through the prices of these essentials, forcing untold millions into poverty. In Northeast States, dependent on foreign oil, there are people whose heating bills exceed their income. Yet I ask my constituents if they would rather have less gas or pay $5 a gallon for all they wanted and their immediate reaction is, we'll pay the $5. They may not have the $5.

It is highly unlikely that we can keep wage levels—much less pensions—high enough to afford the new energy. The bitterness and belligerence in the gas lines of 1973 merely illustrate what will happen as fuel costs begin to price middle income Americans out of the energy market—as they are priced out of the home market already. Civil discontent will result which will not only shake the economy but threaten our democratic institutions.

It is imperative that we enact a positive, well defined energy program to assure the people that our Nation is doing its best to grapple with the energy problem, and to rationalize the hard energy times a-coming. I believe that whatever energy policy we adopt, if it is truly fair and workable, even though it calls for sacrifice it will eventually be accepted by the citizenry.

Here I must admit that the energy companies and the past Republican administration did come forth with an explicit energy program. It is not fair and, in the long run, not good business. Their energy program is threefold.

First. Let the price of energy rise so as to accumulate the corporate capital and to make it profitable, to produce energy from new, expensive sources—but only sources that would be controlled by the energy corporations.

Second. Meld the costs of older, cheaper fuels with newer more expensive ones to disguise the difference in price categories.

Third. Government subsidies for production of new fuels.

The motivating force of this policy is "business as usual," to keep the corporations and their managers in control and doing what they have been doing even though reality is changing. That is not a good basis for a policy.

Letting a melded price rise seems to make economic sense—a melded price is used in the present oil price control law—but it has serious defects. Rationing by price a commodity essential to life is not acceptable. We must face an awesome fact. Our population and the world's has burgeoned in this century due largely to cheap energy—which means cheap food, and the ability to distribute it. We need a policy that preserves our ability to produce cheap food, even to the detriment of other sectors, or there will be trouble we can barely imagine today.

The melded price also subsidizes expensive energy production with inflated profits from the older energy sources—the northwest utilities are attempting to do this now with hydro and nuclear, a move I will oppose in the 95th Congress. Using a profitable product to subsidize an unprofitable product is not good economics. And giving the monopolistic oil

companies outlandish profits is not a good way to preserve a free economic or political system.

The third program element, Government subsidy of energy production, fails every test. If normal lenders will not lend, and energy companies themselves would prefer to use their cash to buy real estate or Montgomery Ward—fearing as they do that the public may not be able or willing to buy their new energy—then the taxpayer should not take up the risk and burden. The only excuse for Government intervention to help the corporations is Project Independence. But what independence will we have if almost all our resources go into energy production to the detriment of the rest of our economy.

The phrase most often used to sell the Ford administration program is "energy means jobs," an equation that is patently false. As the capital requirements of energy production increase per job, and energy is used to automate our economy, fewer jobs will be created. Conservation means jobs, but different kinds of jobs, and that is why any energy policy must have a built-in transition period so that job and industry dislocations are not disruptive.

What we need is a two price energy program to fit the reality of decreasing supplies of cheap fuels, and increasing costs of new energy sources. We need a policy that will provide a transition period of 10 or 20 years for our economy and our people to adjust to the new reality. And we need a policy that is perceived as fair and reasonable by the public.

If a Mideast war or other political upheaval cuts our umbilical cord to OPEC oil, a harsh new policy will be thrust upon us in a hurry. We should not wait for that to happen. And we should not fire up the maddening arms race to pay for that oil. Other nations are hoping we will develop an economy not so dependent on energy—OPEC or our own—and it is my hope that the new Democratic administration and Congress will provide the policies to accomplish this.

Such policies exist. Elements have been discussed for years. I would like to present their broad outlines and urge refinement and adoption.

We should begin with a two price system to meet the reality of the two cost categories. To assure that all our people will be able to afford essentials, we should place permanent price controls on old oil and ration that cheap energy equally to everyone. This would not be onerous, bureaucratic rationing. The Government would have to determine the availability and price, it is true, but then simply give every man and woman over 18 years low price coupons for their share of the cheap, controlled gasoline.

Other, more expensive gasoline—foreign and domestic—would be left on the free market and its price would reflect its true cost of production. This would determine the true profitability of new energy and the public's willingness to pay for it, as well as promoting efficiency and conservation. As the total supply would not be rationed, enforcement would not require an enormous compliance bureaucracy. The oil companies themselves would have an interest in seeing to it that low priced coupons were not violated or counterfeited as each coupon would mean a low price sale for them. An equalization program between companies is already in effect under present law.

One aspect of the price coupon system I particularly like is that energy savers would be rewarded. People who walk or bike or use mass transit or do not travel much at all—the needy elderly, for example—could sell their coupons on the open market. Those who wished more fuel could buy those coupons or buy the high priced gasoline. Businesses who use vehicles and engines as well as the transportation industry itself would have the same deal meted out to them.

I also advocate placing additional taxes on imported oil, and on the free market oil—but not on the price controlled gas—to pay for recycling, conservation and environmental programs, and believe this would be politically more feasible under the two-price system.

Another element of the policy would place the two-price system in effect in the utility field where it has been advocated by the slogan, "lifeline" rates. The overall supply of electricity would be determined as well as its total cost—I will discuss heating oil and regional equalization later. This supply and cost would be divided into two or more categories so that everyone would receive a certain amount of cheap power for home heating, lighting, and appliances: the rest would be very expensive. The total return to the utilities would remain the same dollar amount.

Again a strong incentive is provided for energy saving together with cheap power for eessentials. If you insulated your home, kept the thermostat down and doors and windows closed, did not use a dryer much, your monthly bill might be $40. If you were wasteful or extravagant, your bill could be not just a little higher but categorically higher, say $400.

While these policies would encourage—almost mandate—personal and industrial conservation and the development of cars, heaters, appliances and other devices more fuel efficient—both first law and Barry Commoner's second law of thermodynamics efficiencies—the Government and the private sector could move into the conservation field—with much more public acceptance and will—with low cost loans and grants. Building codes would be further revised toward energy conservation; recycling would be encouraged or mandated; and the thousands of little energy absorbing things that grew like Topsy in the time of cheap fuel would gradually begin to shrink.

These things will happen also as a melded price was rising, but the unfairness and political discontent would be vastly reduced. The well to do, for instance, could still get all the energy they wanted, but they would have to pay much more for it—the real cost of their extravagance, not a melded, subsidized cost.

As important as any of these effects if not more so, millions of jobs with low capital requirements per job would be created—home rehabilitation, installation of solar units—just the opposite of the job picture if we go hell bent for energy at any cost. A Ford Foundation study shows that the less energy we use, the more jobs, at an equivalent gross national product.

The two price system should work for industry as well. Industry would have to bear the brunt of the more expensive energy, but it will do so eventually anyway. I once had an argument with Frank Zarb on the very policies stated here and his ultimate objection was that Government would in the end determine who got energy and who did not: in other words, Government domination of industry.

I do not want that either. By leaving the higher price energy category in the free market, the free market itself would sort out which industrial products the people wanted enough to pay for and which they did not. The people would have the discretion. Now they do not. Rises in electric bills are just like taxes, you have to pay them. Heating a home is an essential. You do not say, on a night 10 degrees below zero, I guess I will not heat my home, cannot afford it. But if an aluminum beer can doubles in price—aluminum is one of the highest users of energy—you can say, I guess I will not buy one, because you do not have to have an aluminum beer can.

There is, however, one industry that a Democratic energy policy should give priority, both in supply and price. That is the only industry we cannot live without: agriculture.

We should give farmers and their suppliers the cheap fuels and fertilizers and reserve much of our remaining natural gas for agriculture. If we do not do this, food costs will soar as energy prices rise.

Energy allocation to agriculture would be good—in my opinion, essential—for the consumer. We face changing weather patterns that may bring worldwide famine. So great will demand for food become that we had better use all our resources to grow all the food we can. We should make sure it is sold to our overseas markets at the real energy costs, however.

As I mentioned earlier, there would need to be provisions to equalize conditions among different heating fuels and also between regions using different, various priced fuels. While the Northwest receives cheap hydro power, New England relies on expensive foreign oil. Other individuals use oil or natural gas to heat their homes and buildings amidst those using electricity. Price coupon allocation for heating oil, lifeline rates and cost transfers would be applied to obtain general equalization to all people and all regions. As an example, New England would receive more cost controlled oil to offset cheaper energy sources in other regions.

There will always be some inequality, and indviduals as well as businesses will adjust to these as best they can. One such adjustment, for instance, would be further migration to the warm climes as heating costs rise. This is probably to the good; it is, in effect, using solar heat-

ing from its original source and it is possible that an energy policy should encourage it.

These programs will certainly require more bureaucracy and decisionmaking by Government. Is it worth it? One can argue that countries such as Sweden and Switzerland now use much less energy per capita to maintain a higher standard of living than ours without such strict Government policies. Here again the reality is that we have a different life style. We waste energy and the system of waste is ingrown into our culture and economy so deeply that it will require Government policy to wean us out of it. Far better to have a rational and fair policy keeping essentials in the reach of all our people; and far wiser to protect the fundamentals of life and our economy than to have a nation of energy have nots and haves.

But the government bureaucracy will not be all that monstrous, and the Government decisionmaking will not be all that pervasive. The free market will operate in the area of more expensive energies and the decisions to produce or not produce, buy or not buy, will for the main be individual decisions.

Not only would we lessen our dependence on foreign oil, through decreased demand, but our economy would become tougher and more resistant to the shock of a sudden halt of imported oil. And we would already have a system ready to handle such a situation if it occurs.

For what I advocate here is a two priced system for the two costs of energy, and the rationing and price controlling of the cheaper energy to assure all the people of their ability to obtain essentials to life. Together with limited allocation and equalization and strong conservation incentives and programs, this policy will get ourselves and our economy through a transition period that will be difficult at best. It allows the market to determine the true demands of increased energy supply—it may be we will not need some of the very expensive new sources; thus this policy could save us billions of investment dollars for other more beneficial uses.

I believe we should continue—actually, speed up—research and development of alternate energy sources. The Government should help fund these endeavors: but not help fund operations and production. Let them find their place in the marketplace.

As to the political possibilities of enacting such a program, I believe the people are ready for real leadership, and with forthright, hard pronouncements, a Carter administration and a Democratic Congress can enact it. There would be some furious fights with some powerful organizations on the other side, but the votes could be there.

My constituents know something is wrong, but they have not been told the truth, or at least the full story, of our energy predicament. If they are convinced that everyone shares the sacrifices equally, that they will still be able to preserve some of their way of life at costs they can afford—and have the option to continue making their own, hard decisions about expensive energy—they will go along.

For there is one truth that is not widely perceived, and when it is we will all be much better off: The less energy we use, the cheaper that energy will be.

CARL A. S. COAN, SR.

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. ASHLEY) is recognized for 5 minutes.

Mr. ASHLEY. Mr. Speaker, on December 21, 1976, Carl A. S. Coan, Sr., the staff director of the Senate Subcommittee on Housing and Urban Affairs, died of complications resulting from minor surgery. Carl's death is a tragic loss not only to all of us who worked with him through the years, but to the whole housing industry and to the urban communities of this Nation.

Carl Coan had served on the staff of the Senate Housing Subcommittee since 1957 and from 1961 until his death had served as the staff director of that distinguished subcommittee under the able chairmanship of the senior Senator from Alabama, JOHN SPARKMAN. Prior to his service with the Senate, he had a distinguished career at the Bureau of the Census.

Having joined the House Housing Subcommittee in 1955, and now the only original member of that subcommittee still serving in the House, and during almost all of the ensuing years I had worked with Carl in the development of all of the major housing and community development legislation that emanated from the Congress during these past two decades. Not only did an excellent relationship develop during the course of our many conferences with the Senate on housing bills, but I also benefited from Carl's advice and wide ranging knowledge in the development of most of the Federal Government's housing and community development policies. I regarded Carl as not only a superb staff person but as a friend whose quiet yet sage advice was always beneficial. Carl Coan had a very natural talent that inspired the confidence of those with whom he worked from one end of the political spectrum to the other. He was a very good and gentle man whose extensive knowledge of the very complicated problems of housing the poor and downtrodden of our society inspired those with whom he worked to develop programs to provide the adequate, safe and sanitary shelter that was needed. I shall miss his advice and counsel and I extend my deepest sympathy to his wife, Flora, and to the rest of his family.

MYTHS AND REALITIES OF WELFARE IN NEW YORK

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 25 minutes.

Mr. BINGHAM. Mr. Speaker, I am sure every Member of the House is aware of the precarious financial condition of New York City. This great city has been to the brink of bankruptcy and back many times since those bleak days in December 1975 when each new financial deadline was awaited with dread to see if this time the city really would go under. Much has been said and written about New York City's financial problems. Some have spoken with knowledge of the facts, others have spoken in complete ignorance. Because of the complexity of the problems, there is much misinformation and misunderstanding.

New York is making extreme efforts to solve its fiscal problems. Funds have been cut for virtually every social service; tens of thousands of city workers have been dropped from the payroll including police, firemen, teachers, and librarians; a variety of publicly supported facilities and institutions have been forced to close or drastically curtail services; school curricula have been cut and class sizes have increased to the point that the quality of education is impaired.

At the beginning of the crisis, a task force on the New York City crisis was established under the aegis of the Community Council of Greater New York to monitor and study the problems of the city and the programs designed to deal with them.

The task force is a temporary, ad hoc coalition of 18 major, private social service agencies in New York City. It disseminates accurate, up-to-date information on the city's financial condition; analyzes the impact of the continuing fiscal crisis upon human service programs and their clients; performs a wide variety of advocacy functions in both the public and private sectors; and offers recommendations for the consideration of city, State, and Federal officials designed to maintain and improve the delivery of human services to New York City's citizens in need.

Sanford Solender, the executive vice president of the Federation of Jewish Philanthropies of New York, chairs the task force.

The task force's latest reports were issued in November and December 1976, while Congress was in recess. The quality of these reports is high, and I would like to draw the attention of my colleagues to three of them: "Myths and Realities of Welfare in New York", "Task Force Statement on Public Assistance Eligibility and Payment Levels," and "Task Force Position Statement on Medicaid Eligibility and Service Levels."

This is the first of a three-part series which I will be inserting into the CONGRESSIONAL RECORD on these three reports. I am submitting them, because I believe it is of the utmost importance that the Congress and the Nation understand some of the causes of the New York City crisis.

The first report, "Myths and Realities of Welfare in New York," was issued because of the task force's concern that there will be "* * * a concerted attempt in the near future to reduce welfare payment and/or eligibility." The reasons for such a possible cut stem "* * * from a web of confusion, misinformation, and misconceptions concerning the nature of the public assistance program and the characteristics of its participants." This report was written in an attempt to counteract some of the major misconceptions about welfare.

First, there is the widespread belief that welfare clients have it too good and

live better than some working people who do not get Government handouts. The report, however, points out that—

The maximum monthly welfare grant in New York City for a family of four not including rent allowance is $258, or $14.88 per week for each family member's basic necessities. This grant level has not risen since July 1974 when the payment amount was brought up to the standard used in 1971. The value of the welfare check in New York then, has not increased in five years, even though the cost of food has gone up by 55 percent, clothing by 22 percent, and untilities by 112 percent in the same period.

Second, the report challenges the assumption that life on welfare is attractive and appealing. The report states:

It is conservatively estimated that more than 300,000 people in the city are eligible for welfare but do not collect it because they dislike being regarded as 'free-loaders who have it too good.'

A third misconception about the New York City welfare system is that the benefits are too generous. In fact, the report states:

The maximum welfare payment in New York State to a family of four is the fifth highest in the nation . . . the New York City metropolitan area actually has the fifth highest cost-of-living standard in the country. Therefore, the grant level cannot be said to be out of line with the expense involved in living in New York City, where most of New York State's welfare recipients reside. The cash payments to welfare families account for about 80% of the total welfare budget in the state, with the rest being consumed by administrative salaries and expenses. Only a small percentage of the 350,000 families on welfare in the city cheat on their benefits or are actually ineligible to receive aid.

Fourth, many think that the reason why many welfare recipients do not work is because they do not want to work, and that they actually enjoy living at the expense of the public. The report states, however, that—

"Hard work" may be the answer to the welfare problem, but it will be so only when adequate day care is provided for mothers with very young children and full employment becomes a national policy so that everyone who wants and needs a job will be able to find one.

Finally, while much has been said about the reasons which led to the financial crisis in New York City, it is the conclusion of the task force that—

If Washington agreed to pay the full cost of welfare programs [in 1977], New York State would save about $3 billion. Property taxes that support the state's welfare budget in many upstate communities could be greatly lowered if this were to happen and in New York City, the so-called fiscal crisis which is causing so many cuts and layoffs would come to an immediate end. As things stand now, New York City has to pay the highest share of welfare costs of any city in the nation.

In other words, if legislation federalizing welfare were passed today, the New York City crisis would disappear overnight.

The task force also challenges the assumption that cutting welfare benefits is the only way to reduce the welfare burden. The task force points out that "savings in both welfare and medicaid ought to be obtained by expediting a set of management and administrative improvements, combating fraud and abuse and reforming funding patterns, rather than restricting eligibility, reducing reimbursement funding patterns, narrowing the range of services available to public assistance recipients and the medically indigent."

Mr. Solender and his entire staff are to be commended for their fine job of putting into perspective those factors most important to understanding the problems of New York City. The reports are articulate, readable, and responsible; they not only discuss the problems but also offer logical, responsible solutions.

The full text of the first report follows:

MYTHS AND REALITIES OF WELFARE IN NEW YORK

The possibility of a concerted attempt in the near future to reduce welfare payments and/or eligibility derives, in significant measure, from a web of confusion, misinformation and misconceptions concerning the nature of the public assistance program and the characteristics of its participants. Reports, commentaries and statements directed to the general public too often reflect a widespread misunderstanding of the realities of welfare. The members of the Task Force on the New York City Crisis are eager to counteract some of these major fallacies. Toward that end, you will find immediately below a description of six "myths" about welfare followed by a description of the realities with respect to each.

MYTH NO. 1

Welfare clients have it too good. They live better than working people who don't get government "handouts."

REALITY

The maximum monthly welfare grant in New York City for a family of four not including rent allowance is $258, or $14.88 per week for each family member's basic necessities. This grant level has not risen since July 1974 when the payment amount was brought up to the standard used in 1971. (The value of the welfare check in New York then, has not increased in five years, even though the cost of food has gone up by 55%, clothing by 24%, and utilities by 112% in that same period.)

A survey of welfare mothers in New York City in 1974 found that 56% were spending less for food than the cost of a nutritionally adequate diet; 86% of the families reported running out of food at the end of most check periods; and, 41% said that their families experienced varying degrees of hunger at all times.

More than 60% of the welfare clients in New York City are children under the age of 18 who do not enjoy the advantages afforded their peers in working families. These children and their mothers usually live in deteriorated housing in crime-infested neighborhoods where the schools, sanitation, and fire protection are among the poorest in the city. If welfare clients really did have it better than working people, one might expect that thousands of workers would quit their jobs and go on relief. But the opposite is true: life on welfare is such a constant struggle to survive that it is conservatively estimated that more than 300,000 people in the city are *eligible* for welfare but do not collect it because they dislike being regarded as "free-loaders who have it too good."

MYTH NO. 2

Welfare costs so much in New York because the benefits are too high.

REALITY

The maximum welfare payment in New York State to a family of four is the fifth highest in the nation (behind Hawaii, Oregon, Wisconsin and Connecticut). The New York City metropolitan area actually has the fifth highest cost-of-living standard in the country. Therefore, the grant level cannot be said to be out of line with the expense involved in living in New York City, where most of New York State's welfare recipients reside. The cash payments to welfare families account for about 80% of the total welfare budget in the state, with the rest being consumed by administrative salaries and expenses. (Only a small percentage of the 350,000 families on wefare in the city cheat on their benefits or are actually ineligible to receive aid.) Some studies place the number of so-called "cheaters" at less than 3% of the city's welfare caseload, while the problem of ineligibility usually results from errors made by the welfare department, not from a deliberate effort by the client to defraud the taxpayer. These administrative and management difficulties are the source of most of the alleged waste in the welfare budget. The city's welfare department last year announced that it was saving $57 million simply by rearranging some management procedures. Commissioners at the state and city level agree that additional millions can be saved by improving the way in which welfare programs are run. Efforts in these areas will save the taxpayer much more money than will cuts in what is already less than a subsistence income.

MYTH NO. 3

Welfare recipients are lazy. They don't want to work and actually enjoy being on the dole.

REALITY

In recent years, city, state and federal governments have experimented with a number of programs to employ welfare recipients. First of all, only 3% of people receiving welfare are able to hold a job. Most clients are young children, mothers who try to care for them, and people with severe health problems. The few able-bodied adults who do receive welfare are nearly all on the rolls because they couldn't find jobs in the first place. More than 300,000 people in New York City are trying desperately to find jobs but cannot do so because of economic conditions here and throughout the nation. When unemployment insurance expires for these jobless workers now receiving benefits, the only option left to them, short of starvation, is to sign up for welfare which will "pay" them a maximum of $94 a month per person, plus rent.

The work programs tried in the late 1960's and early 1970's ended in failure for the most part precisely because no permanent employment could be found for the few people who were forced to "work off" their welfare checks in dead-end jobs that provided no training. "Hard work" may be the answer to the welfare problem, but it will be so only when adequate day care is provided for mothers with very young children and full employment becomes a national policy so that everyone who wants and needs a job will be able to find one.

MYTH NO. 4

Welfare provides a lot of other benefits, like Medicaid. Why should these people get free medical care when everyone else has to pay for it?

REALITY

The private insurance plans available to most workers simply can't be purchased by people who don't have any kind of employment. Even if welfare clients wanted to buy a private health insurance policy, it isn't likely that many companies would sell them one. Very poor people have a much better chance of getting sick or of being hurt in an accident or crime than do most other people. The insurance companies won't write health policies for about 22 million Americans because they are risky investments or because policies can only be ob-

tained through the workplace or labor union. Medicaid does provide welfare clients (and working people with low incomes) with a wide range of services at no cost. If Medicaid didn't exist, most welfare clients wouldn't have any way of getting health care that they could afford. (Eliminating or sharply reducing eligibility to programs like Medicaid means letting poor people go without any care when illness requires them to seek medical services.)

MYTH NO. 5

Welfare, Medicaid, food stamps, etc., etc., look at all these hand-outs that I wind up paying for.

REALITY

In the national budget, welfare and similar programs like food stamps and Medicaid account for about 10% of federal spending this year, as compared with the approximately 32% chunk absorbed by defense-related expenditures. The reason why welfare costs fall so heavily on New York taxpayers is because the federal government doesn't pay its fair share for what is really a national problem, not a local one. (If Washington agreed to pay the full cost of welfare programs next year, New York State would save about $3 billion. Property taxes that support the state's welfare budget in many upstate communities could be greatly lowered if this were to happen and in New York City, the so-called fiscal crisis which is causing so many cuts and layoffs would come to an immediate end.) (As things stand now, New York City has to pay the highest share of welfare costs of any city in the nation.) If the federal government refuses to act to assume its just share of the burden, the state could provide the city and all counties with a great deal of tax relief by agreeing to pay for a larger share of the program's cost here. Finally, all taxpayers would save enormous amounts of money each year if the country decided to create jobs for people who can't find them now. That's the real solution to the problem for taxpayers and for all Americans.

MYTH NO. 6

People come to New York just so they can go on welfare.

REALITY

Studies which analyse whether the level of welfare benefits attracts families and individuals to New York City indicate that very few migrants apply for welfare soon after arriving here. Most examinations of this issue conclude that migration is *not directly* caused by varying welfare benefit levels among states. Rather, population movement to New York City from outside and inside the United States is attributed to the search for employment, improved income and better life prospects.

Enrolling in the welfare program or accepting unemployment insurance is a last resort for the vast majority of those who go on public assistance.

A SALUTE TO MARTIN LUTHER KING

The SPEAKER. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 10 minutes.

Mr. RODINO. Mr. Speaker, today we honor a great man and the even greater vision that he labored, and died, to serve.

Martin Luther King, Jr., was great because of the imperishable dream that he nurtured throughout his life. He gave it new meaning and new promise—but he realized better than anyone that the dream was not original with him.

The hope of human liberty and justice has existed throughout the history of mankind. Here, in America, it has approached its fulfillment. Dr. King saw that hope being thwarted for millions of men and women—including himself. Because he believed deeply in the American dream, he could not see this failure without acting to correct it. He paid for his dedication with his life.

We have come far since 1963 when Dr. King stood at the Lincoln Memorial and put into words what was unspoken in uncounted hearts. What made his message that August day the most eloquent of the 20th century was that he knew what was in those hearts. He understood the suffering and the deprivation—and he understood as well what would be needed to turn that dream into reality.

We who remember him have seen his efforts grow and bear fruit. We have seen that the dream can be fulfilled—for it is ours as much as it was his—and that was how he wished it. Today, we are closer than ever before to making this a nation, a society, where freedom is the unquestioned birthright of every child.

But there are grave responsibilities that go along with that dream. For if freedom is a birthright, it still can be lost, or stolen, or sold.

And that is why, as we rededicate ourselves to the memory of Martin Luther King, we must rededicate ourselves as well to continue the difficult task that he set for himself.

We have come far in the struggle for human rights. We have a long way yet to go. Dr. King's life, his devotion, and his memory have helped us mark the path.

Mr. Speaker, like many cities across America, Newark also observed Dr. King's birthday with a number of special events.

On Thursday morning, the Young Men and Women's Christian Associations sponsored a commemorative breakfast, chaired by my close friend, Ms. Connie Woodruff. About 300 persons attended this sixth annual event, including many leading State and local officials and business leaders. Bishop Joseph A. Francis, of the archdiocese of Newark, delivered a moving and inspiring address.

On Friday night, there was a rally at the Abyssinian Baptist Church in Newark. The Reverend Dr. Ralph D. Abernathy, president of the Southern Christian Leadership Conference—founded and led by Dr. King until his death—spoke not only of Dr. King but of the challenges, the hopes, and the promises that lie ahead.

Then on Saturday morning, Operation PUSH of Essex County held its third annual breakfast at which Charles Gray, executive director of the Julius Nyerere Institute in New Brunswick, N.J., was the keynote speaker.

Dr. King has been the subject of a great many tributes, but these gatherings in the name of human rights show clearly that his memory and the work he began are stronger than ever before.

Mr. Speaker, I was honored to participate in some of these living memorials to a great man and to a vision of liberty and justice which we in America must make a reality for all people.

LEGISLATION TO PERMIT SERVICE ACADEMIES TO SELECT THEIR OWN STUDENTS

The SPEAKER. Under a previous order of the House, the gentleman from Wisconsin (Mr. CORNELL) is recognized for 5 minutes.

Mr. CORNELL. Mr. Speaker, everyone who has served in this House knows the incredible variety of duties which fall upon a Member of Congress. I rise today to introduce a bill which would remove from this long list of responsibilities the role of dean of admissions for our military academies. Our bill permits the service academies to select their own students. We believe this step is overdue and that compelling reasons exist for making this change.

First of all, although each congressional office tirelessly endeavors to select the best candidates from among the applicants, it is still true that no single established standard of admissions exists to guide us. Therefore, the nominees are now being chosen in a variety of ways instead of having all applicants judged by one set standard.

Our bill eliminates the congressional role in the selection process but retains the present geographical distribution pattern so that we can continue to draw our future officers from across the entire country. This means, in short, that the number of positions allotted to the congressional districts, the States on an at-large basis, Puerto Rico, District of Columbia, Guam, Virgin Islands, Panama Canal Zone, and American Samoa remains the same but now the academies themselves will make these selections solely on the basis of merit.

Second, the existing system for naming candidates has political overtones and leads many people to believe, however falsely, that one must personally know the Member of Congress in order to have his son or daughter appointed to the military academies. This misunderstanding has undoubtedly dissuaded some qualified students from even applying. Members of Congress are also placed in the difficult position of having to break the news to the disappointed applicants who were not chosen since there are usually more candidates than vacancies. Under this bill, the Representatives will continue to make the public announcements of those chosen for the service academies but they will play no role in the decision on admission.

Third, for the Merchant Marine Academy at Kings Point, N.Y., we believe the best procedure is a purely competitive admission system. This is currently done at the Coast Guard Academy with great success. The small total enrollment at Kings Point—600—lends itself to this approach.

In order to provide an orderly transition to this new admissions policy and to insure congressional oversight over this process in the future, we have amended the duties of the now existing

boards of visitors for each of the service academies to add the charge of overseeing admissions. An annual report to the Congress would also be required.

We realize that it has become a tradition for Members of Congress to appoint students to the three service academies. We firmly believe, however, that now is the time to break with tradition and to institute a more equitable and efficient process for selecting the future military leaders of the United States.

Mr. Speaker, we are all committed to an officer corps which has superior talent, is well trained, and is reflective of the pluralism of American society. This legislation would serve all of these goals. It gives the academies a mandate to select the best qualified young men and women who show promise of serving the Nation with honor and distinction. The bill also preserves the geographical representation which the present congressional nomination insures. Like most of the Members of Congress, I believe that a geographical balance is healthy for the academies and healthy for the services. The fact of the matter is simply this: It is time to establish a single admissions standard for all candidates, and to remove any possible political overtones in the selection of cadets and midshipmen. I urge my colleagues to join us in supporting this long-overdue change.

TAX POLICY DISCRIMINATES AGAINST TENANTS

The SPEAKER. Under a previous order of the House, the gentleman from Virginia (Mr. HARRIS) is recognized for 5 minutes.

Mr. HARRIS. Mr. Speaker, approximately 36 percent of all housing units in the United States are renter occupied. Tenants rent single family homes, townhouses, garden apartments, and high rises; and, they pay property taxes on these dwelling units. However, unlike other taxpayers, tenants—who pay their property taxes through their rent—are not currently allowed to claim their property tax payments for Federal income tax purposes.

There can be no question that a portion of a tenant's rent is a property tax payment: the local government sets the tax rate, the landlord adjusts his rent to collect the tax, the tenant pays the property tax through his rent, and the landlord passes it on to the local government. The property tax collected by the landlord is not and should not be considered as taxable income for the landlord. But certainly the tenants should have the same right as other taxpayers to claim the property tax payment for Federal income tax purposes; there is no reason why our tax laws should discriminate against the taxpayer who rents.

Along with 64 of my colleagues, I have introduced H.R. 84, the tenants' tax justice bill which allows tenants to claim their share of State and local property tax payments for Federal income tax purposes. This bill in no way reduces the advantages of homeownership, nor increases the tax burden on landlords. Simply, the bill extends property tax relief to tenants.

The text of the tenants' tax justice bill and my explanation appear on page 97 of the January 4, 1977, CONGRESSIONAL RECORD. I urge my colleagues who desire additional information about the bill to contact me. The list below indicates by State the percentage of dwelling units which are renter occupied:

PERCENTAGE OF DWELLING UNITS WHICH ARE RENTER OCCUPIED, BY STATE

(The occupants of these dwelling units, unlike other taxpayers, are currently denied the opportunity to claim their property tax payment for federal income tax purposes. Because of this discrimination, the federal income tax liability for these taxpayers is greater.)

ESTATE TAX REFORM

(Mrs. SMITH of Nebraska asked and was given permission to extend her remarks at this point in the RECORD.)

Mrs. SMITH of Nebraska. Mr. Speaker, last week I introduced a bill to remove a provision from the estate tax law which will be a real burden to all farmers and small businesses; a burden which totally negates the relief provided by the other estate tax reform provisions in the Tax Reform Act of 1976. I speak of the carryover basis provision of Public Law 94–455.

Unusually complex parliamentary constraints, as well as time limitations, accompanied the conference report on tax reform to the floor last September 16, 1976. Many refused to vote to reconsider the carryover basis problem fearing that the other excellent estate and gift tax changes would be jeopardized. Since this was the first modification of the estate tax law in 34 years, I can understand that hesitancy. But, we must act now to repeal section 2005 of the Tax Reform Act of 1976 before it begins to cause costly and complex litigation and complicates the duties of every administrator or executor of a decedent's estate. From the standpoint of tax theory, the carryover basis provision soon will be an obstacle to free transfer of property and will increase capital outlays.

Before Public Law 94–455 was enacted, a beneficiary received a stepup in tax basis to the date of death for inherited property. This new basis was the fair market value of the estate when the decedent died. This meant that each upcoming generation received a new basis for capital gains taxes.

The Tax Reform Act of 1976, however, changed this equitable scheme drastically. With these changes, the basis for capital gains tax is either the value of the estate as of December 31, 1976, or the decedent's basis. Effectively, this rule postpones some of the adverse effects of section 2005 for a few years. But, eventually, every beneficiary will be locked into holding inherited property to avoid the exorbitant capital gains taxes which would come with a sale.

Nationwide, family-owned and operated farms number around 3 million. Let us take a brief look at what these people face due to section 2005 of Public Law 94–455: Imagine the case of a small rancher or businessman who has worked years to make his business productive. He dies and his surviving wife decides to sell the property and move in with her family. The business, worth $150,000 in 1977, is valued at $200,000 in 1982 when her husband died largely due to inflation. If she sells the business her husband labored to improve, she will be liable for more than $7,000 in capital gains taxes under the present carryover basis rules; this is mostly an unfair tax on inflationary increase. Under the bill I have introduced, however, this carryover provision is simply repealed and the former law is reinstated. This widow would have no tax to pay under my bill's reinstatement of the previous law. If she were struggling to pay the unanticipated debts, which accompany a sudden death, such a tax could be a death-blow to her financial future. This means additional hardship for an already bereaved family. These same facts would

apply to any property the widow might inherit—even her own home.

The present carryover basis provisions are ill-advised for many other reasons which were explored last Congress. Consider for a moment the monumental recordkeeping required to accurately determine a decedent's basis in an estate. The controversy over determination of this basis will result in countless lawsuits.

The arbitrary establishment of December 31, 1976, as the operative date for these provisions has abruptly changed a law upon which many investment decisions relied. There was inadequate warning that December 31, 1976, would be critical to estate planning.

I have already demonstrated the lock-in effect on capital due to reluctance or inability of heirs to sell highly appreciated property. The most disturbing aspect of this problm is that its impact will be felt mostly by the small farm or family-owned business which has been passed down from generation to generation. These comprise the backbone of our country. We desire to preserve family farms and businesses, and yet this carryover provision will strike at the heart of the family enterprise.

The carryover basis provision of the Tax Reform Act of 1976 was a step away from tax reform, not toward it. I urge the Ways and Means Committee to take up my bill and correct this mistake by granting each generation a fresh start for capital gains on inherited property.

A FURTHER ANALYSIS OF THE FISCAL YEAR 1978 MILITARY CONSTRUCTION BUDGET

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, the total fiscal year 1978 request for new budget authority for military construction and family housing is $2,705,600,000. This is an insufficient request. It represents a reduction of $633,159,000 from the amount of new budget authority approved for fiscal year 1977.

The fiscal year 1978 request represents a reduction of $883,574,000 from the amount approved in fiscal year 1976. Starting from a realistic base, the fiscal year 1978 construction program has been reduced by about $1.2 billion. The cut was inflicted not in the Department of Defense but by the Office of Management and Budget.

The major reduction proposed in military construction in the United States will be harmful and is based on a false premise.

While the amount of construction overseas recommended in the budget remains at essentially the same level as in the fiscal year 1977 military construction program, the amount of construction in the United States for the Active Forces is to be reduced by about $1 billion as a result of a last minute budget decision. As a consequence, the Department of Defense estimates there will be approximately 50,000 to 75,000 jobs eliminated in direct construction and perhaps twice as many jobs in work associated with construction, or about 150,000 to 225,000 jobs in all. This does not include an additional multiplier effect in the economy as a whole. In addition, the diseconomies which a moratorium in the military construction program creates are well known. Invariably such a step involves greater costs in construction and in the administration of the program and defers savings through efficiencies which construction projects could create, as well as denying facilities the military needs to operate effectively.

The appendix to the budget states on page 257:

> The requested military construction program is consistent with a special presidentially directed study to examine the current domestic basing structure. . . . Construction requested this year at installations within the continental limits of the United States includes only those projects required pending completion of the study.

The Department of Defense likewise indicated this morning that:

> A partial moratorium has been placed upon the military construction program pending a comprehensive review of long facilities and base structure needs.

However, the committee has reliable information that no such comprehensive study or review is being actively pursued within the Department of Defense and that the present administration has specifically rejected the establishment of a blue ribbon panel outside of the Department of Defense. Studies of long-range plans are always desirable. However, a nonexistent study is scarcely sufficient justification for a moratorium or deferral of $1 billion in the military construction program in the United States.

The denial of $1 billion of military public works which are needed, which have been carefully reviewed for soundness, which are in an advanced state of planning, and which can proceed rapidly and effectively within a well-administered and well-established program does not make sense. This is particularly true at a time when expanded nonmilitary public works projects are being proposed as a method of bolstering the economy and eliminating unemployment.

ABU DAOUD: THE FRENCH GOVERNMENT'S CONTRIBUTION TO A SAFER WORLD

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. MIKVA. Mr. Speaker, in a world which is yet not known for its dedication to the pursuit of justice, it is all too easy to lose one's capacity for outrage in the face of even the most blatant denials of justice.

Perhaps it was the world's tendency to moral indifference that the French Government was banking on when it released Abu Daoud only a few days after the French counterintelligence service had arrested Daoud as the suspected mastermind of the terrorist slaughter of 11 Israeli athletes at the 1972 Olympic games in Munich.

When the most vehement protests came pouring in from Israel and the United States, the French Government professed its surprise, as if exporting the mastermind of the Munich atrocity to the safety of Algiers was like exporting an only-slightly-spoiled case of French wine.

When a so-called enlightened, civilized country like France promptly frees an Arab who specializes in terrorizing the civilized world, the immediate question is why?

Could it be because of the French campaign to win the friendship of the Arab nations, to get Arab oil and Arab business?

Could it have anything to do with the French agreement with Egypt, announced the day after Daoud was freed, for a $1.6 billion deal for 200 Mirage F–1 fighter-bombers, the most advanced operational French warplane?

Or could it have anything to do with the fact that since the 1973 Arab-Israeli war, France has had multibillion-dollar customers among the Arab nations for not only its Mirages but its Aloutte helicopters, rockets, AMX–30 tanks and other weapons?

Would a civilized, enlightened nation trade economic advantage for the safe passage of a terrorist with at least 11 notches on his gun and, no doubt, room for more? One would think not, but then one ought not to confuse the trappings of civility and enlightenment with a genuine commitment to what is just and what is genuinely in the self-interest of a civilized world.

The action by the French Government in freeing Abu Daoud is an outrage of the first order. If the French Government still does not understand that a basic sense of justice demanded that Daoud be tried in a court of law, maybe it is not too late for the French to learn its lesson in the court of world opinion. The Daoud affair will not pass quickly, nor should it. There is a lesson to be learned and even after the murder of 11 Israeli athletes, the French Government has apparently not learned that lesson.

EDUCATIONAL EXPENSES TAX DEFERRAL ACT

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, I am today introducing the Educational Expenses Tax Deferral Act of 1977. This bill is intended to permit parents, who are increasingly burdened by the high costs of a college education for their children, to defer a significant portion of their Federal income tax, in an amount equal to the cost of eligible educational expenses, until after their child has finished his or her education.

Amounts deferred would be repaid over a 10-year period with no interest charged to the parents. Eligible expenses for which a deferral may be taken in-

clude tuition, fees, books, supplies, equipment, and similar items required for the pursuit of an education or training at an institution of higher education or at a vocational school.

Mr. Speaker, higher education learning and vocational training are high priorities in our society. These valuable resources must be within the grasp of all individuals and families regardless of income level. The opportunity to pursue an education at an institution of higher learning or at a vocational school must be afforded to all Americans.

In recent years, the escalating cost of higher education, coupled with the impact of our inflationary economy, has made access to post-secondary institutions increasingly difficult for far too many students. A survey by the College Entrance Examination Board shows that the average cost for a student at a 4-year public university has increased over 50 percent in the last six years. This places a heavy financial burden not only on lower-income families and individuals but also on many middle- and upper-middle income persons in our society. Unfortunately, this trend is continuing. Costs for a student at a public 4-year institution are expected to increase significantly this school year. The U.S. Office of Education has predicted that during the next 8 years there will be an 80 percent increase in the average cost of 4 years of college.

This alarming increase in the cost of higher education is not limited to public institutions. Tuition rates have increased by more than 48 percent at private 4-year institutions since 1970. Because of the private institution's heavier reliance on tuition for revenue, they have been forced to radically increase their tuition rate. Many are now at the point where they are in danger of pricing themselves out of the range of all but a very few American students.

In fact, the Office of Education estimates that the average cost of tuition and fees alone at a private school will be $2,980 for this 1976–77 school year, a cost increasingly out of reach of thousands of families.

In addition to providing assistance for higher educational expenses, the bill authorizes tax relief for reasonable and necessary expenses incurred at business, technical, trade, or other vocational schools. Such schools provide valuable training for millions of Americans in a wide variety of occupations. It certainly seems to me that such training ought to be strongly encouraged and that a tax deferral for vocational school expenses should be made available to the same extent as that for institutions of higher education. This Nation is in great need of persons skilled in all the fields for which training is provided by business, technical, and similar schools.

Mr. Speaker, the bill in brief provides the option of tax deferrals to any taxpayer—including a parent, a student, a spouse, or other person or persons—who pays certain qualified educational expenses for postsecondary education. The amount deferred must not be less than 1 percent of the taxpayer's adjusted gross income. Taxpayers may defer certain educational expenses such as tuition, fees, books, supplies, required equipment, and other items which are actually required for educational or training purposes. Payment would be made in a series of 10 equal installments.

Such payments would be due over a period of 10 years starting in the first taxable year during which the individual is no longer enrolled in a college or a vocational school or during the 10th taxable year after the first year for which the taxpayer took a deferral. A taxpayer could not defer more than $1,500 of tax otherwise due in any given year nor defer more than $10,000 per student for that student's college or vocational education.

Existing Federal programs are, of course, providing assistance to certain students in cases of need. Unfortunately, many of the guidelines that determine eligibility often exclude many middle-income families and individuals who are also truly in need of governmental assistance. Further, inequities in these programs, the lack of full funding of these programs and other reasons demonstrate why new alternatives must be made available. It is my hope that the bill I am introducing today will fill this void.

Mr. Speaker, at this point, I insert the text of the Educational Expenses Tax Deferral Act of 1977 into the RECORD:

H.R. 1961

A bill to amend the Internal Revenue Code of 1954 to permit a taxpayer to defer a portion of his income tax based upon the amount of certain expenses paid or incurred by him in connection with the education or training at an institution of higher education or a vocational school of the taxpayer, his spouse, or any dependent

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Educational Expenses Tax Deferral Act of 1977".

SEC. 2. (a) Subchapter B of chapter 62 of the Internal Revenue Code of 1954 (relating to extensions of time for payment of tax) is amended by adding at the end thereof the following new section:

"SEC. 6168. EXTENSION OF TIME FOR PAYMENT OF TAX WHERE TAXPAYER HAS PAID OR INCURRED CERTAIN EDUCATIONAL EXPENSES.

"(a) EXTENSION PERMITTED.—

"(1) IN GENERAL.—In the case of a taxpayer who has paid or incurred qualified educational expenses for the taxable year, such taxpayer may elect to defer payment of part or all of so much of the tax imposed by chapter 1 as does not exceed his qualified educational expenses for such year. Such election shall be made at such time and in such manner as the Secretary or his delegate may prescribe.

"(2) AMOUNT DEFERRED MAY NOT BE LESS THAN 1 PERCENT OF ADJUSTED GROSS INCOME.—Deferral of payment shall not be allowed under paragraph (1) with respect to any amount of tax which is less than 1 percent of the taxpayer's adjusted gross income for the taxable year.

"(b) DEFERRED INSTALLMENT PAYMENTS.—

"(1) IN GENERAL.—The amount of tax a taxpayer has elected to defer payment on under subsection (a) which is attributable to the educational expenses of any one individual shall be payable in 10 equal installments beginning on the 15th day of the 4th month of each of the taxable years following the earlier of—

"(A) the first taxable year during which the individual is not enrolled in an institution of higher education or a vocational school, or

"(B) the 10th taxable year after the first taxable year for which the taxpayer elected to defer tax under this subsection based on the educational expenses of such individual.

"(2) INTEREST.—Notwithstanding section 6601(c)(1) (relating to interest in the case of extensions), interest shall not accrue on any amount of tax deferred under this section for any period before the date such amount is required under this subsection (or subsection (c)) to be paid.

"(c) ACCELERATION OF PAYMENTS.—If—

"(1) the taxpayer dies during the taxable year, or

"(2) any installment under this section is not paid on or before the date fixed for its payment by this section (including any extension of time for the payment of such installment),

the unpaid portion of the tax payable in installments shall be paid upon notice and demand from the Secretary.

"(d) QUALIFIED EDUCATIONAL EXPENSES.—

"(1) IN GENERAL.—The qualified educational expenses of a taxpayer for any taxable year shall be the sum of the reasonable and necessary educational expenses paid or incurred by the taxpayer in connection with the education or training (on a full-time or part-time basis) of the taxpayer, his spouse, or any of his dependents at an institution of higher education or at a vocational school. The maximum amount of educational expenses which may be taken into account with respect to any one individual for any taxable year may not exceed—

"(A) 75 percent of so much of such expenses as does not exceed $1,000,

"(B) 50 percent of so much of such expenses as exceeds $1,000 but does not exceed $2,000, and

"(C) 25 percent of so much of such expenses as exceeds $2,000 but does not exceed $3,000.

"(2) AGGREGATE AMOUNT DEFERRED PER STUDENT NOT TO EXCEED $10,000.—The amount otherwise allowed to be deferred for the taxable year under paragraph (1) with respect to the education or training of an individual which, when added to amounts paid or incurred by the taxpayer in all prior taxable years with respect to such individual which were deferred under this section, may not exceed $10,000.

"(3) HUSBAND AND WIFE.—In applying paragraphs (1) and (2) in the case of a married individual filing a separate return, the $1,000, $2,000, $3,000, and $10,000 amounts specified in such paragraphs shall be $500, $1,000, $1,500, and $5,000, respectively.

"(e) EDUCATIONAL EXPENSES.—For purposes of this section—

"(1) IN GENERAL.—The term 'educational expenses' means—

"(A) tuition and fees (including laboratory, library, field study, and enrollment fees) required for the enrollment or attendance at an institution of higher education or a vocational school,

"(B) fees, books, supplies, and equipment required for courses of instruction at such an institution or school, and

"(C) other items which are actually required for the effective pursuit of an education or the training of the type and at the institution involved and the charges for which are imposed by such institution.

Such terms does not include any amount paid, directly or indirectly, for meals, lodging, or similar personal, living, or family expenses. If an amount paid for tuition or fees included an amount for meals, lodging, or similar expenses which is not separately stated, the portion of such amount which is attributable to meals, lodging, or similar expenses shall be determined under regulations prescribed by the Secretary.

"(2) ADJUSTMENT FOR SCHOLARSHIPS, GRANTS, ETC.—The educational expenses of any individual with respect to which the taxpayer elects to defer payment of tax under this section for any taxable year shall be reduced by—

"(A) the total amount of student financial aid received by such individual during that year, including—

"(i) any aid received under title IV or IX of the Higher Education Act of 1965,

"(ii) a scholarship or fellowship grant (within the meaning of section 117(a)(1)) which under section 117 is not includible in gross income, and

"(iii) any educational assistance allowance under chapter 34 or 35 of title 38, United States Code, and

"(B) any educational expense of such individual during the taxable year which is deductible by the taxpayer under section 162.

"(f) OTHER DEFINITIONS.—For purposes of this section—

"(1) INSTITUTION OF HIGHER EDUCATION.—The term 'institution of higher education' means an educational organization described in section 170(b)(1)(A)(ii)—

"(A) which regularly offers education at a level above the 12th grade; and

"(B) contributions to or for the use of which constitute charitable contributions within the meaning of section 170(c).

"(2) VOCATIONAL SCHOOL.—The term 'vocational school' means a business, technical, trade or other vocational school or institution, in any State, which—

"(A) is legally authorized to provide, and provides, within that State, a program of vocational education at a level above the 12th grade designed to train individuals for useful employment in recognized occupations; and

"(B) is accredited by an agency or association which is named in the most current list of nationally recognized accrediting agencies published by the United States Commissioner of Education under section 435(c) of the Higher Education Act of 1965 (20 U.S.C. 1085(c)).

"(3) STATE.—The term 'State' includes the several States of the Union, the Commonwealth of Puerto Rico, the District of Columbia, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

"(4) TAXABLE YEAR.—Each reference to a taxable year is a reference to a taxable year of the taxpayer.

"(g) TERMINATION.—This section shall not apply with respect to qualified educational expenses paid or incurred in taxable years beginning after December 31, 1982.

"(h) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the provisions of this section."

(b) The table of sections for such subchapter is amended by adding at the end thereof the following item:

"Sec. 6168. Extension of time for payment of tax where taxpayer has paid or incurred certain educational expenses."

(c) The amendments made by this Act shall apply to taxable years beginning after December 31, 1977.

SEC. 3. The Secretary of the Treasury or his delegate and the Secretary of Health, Education, and Welfare or his delegate shall each conduct a study of the operation and effects of section 6168 of the Internal Revenue Code of 1954 (as added by this Act), and prepare and transmit to the Congress, during the first quarter of calendar years 1980 and 1982, a report containing the results of such study with respect to the period elapsing before such quarter during which such section 6168 was in effect. Each report transmitted to the Congress under the preceding sentence shall be published in the Federal Register.

GRIGORI HESS AND THE CAUSE OF SOVIET JEWISH EMIGRATION

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. MIKVA. Mr. Speaker, during the past several years, there has been some movement concerning freer emigration of Soviet Jews. Nevertheless, the rate of movement has all too often been painfully slow and while a significant number of Soviet Jews have been allowed to emigrate, there are thousands more who have been forced to wait, in many instances for several years after applying for an exit visa.

Last year, I brought to the attention of my colleagues the plight of Grigori Hess, his wife, and two daughters. More than a year later, I must sadly report again that Grigori Hess and his family continue to languish in the Soviet Union.

Grigori Hess, an electrical engineer by training, is now 33 years old. Soon after he first applied for a visa in 1972 to emigrate to Israel, he was dismissed from his job and has been unable to find work in his chosen profession.

After his initial exit visa request was refused, he was sent to prison for a year and since his release, the Hess family has been subjected to continual harassment and surveillance by the KGB.

Recent reports indicate that the Hesses have now been threatened with more, severe reprisals if they do not desist in their efforts to emigrate.

The plight of the Hess family is, indeed, a tragic one. But the tragedy of the Hesses is compounded by the many other Soviet Jewish families who have been forced to wait for years for an exit visa, who have also suffered from official harassment and economic deprivation, who have also been separated from close relatives, as the Hesses have been from Mrs. Hess' parents who were allowed to go to Israel 6 years ago.

We must continue to keep the spotlight of world opinion on the Grigori Hess family and all the others in the Soviet Union who seek free emigration. We and freedom-loving people everywhere must continue to let the Soviet Union know that we are watching and waiting for the day when people like the Grigori Hesses can rejoin their loved ones and live without fear.

WHO RUNS CONGRESS?

(Mr. MICHEL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MICHEL. Mr. Speaker, has "the anonymous, nonelected and permanent staff bureaucracy of both the executive and legislative branches" become the dominant force in government? The Wall Street Journal recently asked that question editorially. The Journal pointed to President Ford's excellent parting state of the Union message in which he reminded the Congress that the legislative bureaucracy has been expanding to such an extent that it now costs taxpayers $1 billion a year to run the Congress. Has this legislative bureaucracy taken on a life of its own and does it, instead of the 535 elected Members, actually run the Congress while the rest of us go through the motions?

I think that is an exaggeration. I can say from personal experience that a good staff helps rather then hinders a Congressman to get the information he or she needs to make decisions. But in a city where information is power, perhaps the Journal's questions should not be casually brushed aside. My own view is that the Congress, in recent years, has taken on too many duties. There is not the faintest possibility of personal oversight by individual Members. Our staffs, of necessity, have in many cases grown too large and assumed too much day-to-day control over important matters. This is a serious matter and deserves closest attention by us all.

I think we owe a debt of thanks to President Ford for his forthright and much needed reminder of some of our problems here on the Hill. Let us take a long hard look at whether or not the people are getting their money's worth out of Congress. Let us show the people Congress is capable of the self-discipline necessary to cut back on legislation for the sake of legislation. Making and passing laws we cannot understand because of their complexity or that we have not the personal time to oversee have made Congress not more responsive to the wishes of the people, but less so.

At this point, Mr. Speaker, I would like inserted in the RECORD the editorial "A President's Goodby" from the Wall Street Journal, January 14, 1977.

A PRESIDENT'S GOODBY

Jerry Ford's parting State of the Union message was noteworthy for two things: the truth in his observation that the nation is in better shape today than when he came to power in 1974; the equal validity of his admonitions to the Congress about its own failures.

The fact that Mr. Ford could honestly report that the state of the union is good owes very little to Congress. He had, after all, vetoed 24 bills last year and it is safe to say that had he not done so, the nation would be facing a more serious danger of renewed inflation than it now faces. The economic recovery and steady expansion of jobs that are occurring as Mr. Ford leaves office owe much to his success in getting inflation under control.

Mr. Ford might well have said goodbye to his old workplace of 25 years—where he still has many friends in both parties—in a spirit of benign forgetfulness of the failings he has perceived from his White House perspective. It is a mark of his character that he chose instead to tell that body that if the federal government is to be reformed under a President of either party, the process must begin with a reformed Congress.

He took pains to observe that the legislative bureaucracy has been expanding rapidly while the federal executive has been contracting and the judiciary remains seriously undermanned. The 535 men and women he was primarily addressing now cost the taxpayers over $1 billion a year in legislative branch operating costs.

While the President did not belabor the point, Newsweek recently estimated that legislative bodies at all levels pass some 150,000 new laws every year, which along with administrative regulation are threatening to drown the country in legalities.

There are serious questions to be asked whether the elected representatives in Washington still control the legislative mill or

whether the combined power of the anonymous, non-elected and permanent staff bureaucracy of both the executive and legislative branches has become the dominant force in government. Some recent bills have suggested the latter in their length, complexity and in the sleeper provisions that seemed to surprise many Congressmen themselves after they learned what they had voted for. An example was the provision in the 1,500-page tax bill that will raise taxes so sharply for many Americans working overseas for U.S. companies as to make it impossible for them to retain their jobs.

Increasingly, the legislative bureaucracy is going public instead of working in the shadows of Congressmen. A Senate staff director was recently quoted extensively in the Times with acid criticisms of what he sees as soft federal regulation. "Perhaps the government and the corporations it is supposed to regulate are simply following the Golden Rule—whoever has the gold makes the rules," said this presumptuous spokesman for the United States Congress.

Mr. Ford complained that Congress had sidetracked most of his efforts to consolidate overlapping programs and agencies, to return more decision-making and responsibility to state and local governments and to "eliminate unnecessary red tape and outrageously complex regulations."

The President generously observed that Congress has made some efforts toward better control—the congressional budget process, for example. But he also made it clear that he will continue to be, out of office, a critic of the pervasive and pernicious spread of law and regulation. Over the next four years, it will be less easy for Congressmen to blame the problem on the "Imperial Presidency."

PANAMA, JIMMY CARTER AND THE TELEVISED PRESIDENCY

(Mr. MICHEL asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. MICHEL. Mr. Speaker, it is reported that President-elect Carter will "speed up negotiations for a new Panama Canal treaty." It is also reported that when told of congressional opposition to giving up American control of the canal, Carter said he would deliver a televised fireside chat to present his views.

The Baltimore Sun, May 21, 1976, quoted Carter as saying:

> I will never relinquish actual control of the canal by this country.

That seems clear enough. Jimmy Carter has promised the American People he would not give up "actual control" of the canal.

Then why does he see a need to go on national television to counter the opinions of those of us in Congress who also do not want to give up "actual control?" This puzzles me. Could it be that he has changed his mind—as he has on the timing of reform of welfare and cuts in the defense budget? If so, should not he tell this to the American people, right now?

And speaking of his desire to go on national television, Mr. Speaker: is this any way to begin the honeymoon each President asks for? Is the Congress, to be treated to yet another chapter in the "imperial presidency's" ability to command free network time when Carter has opposition in Congress?

If the President of the United States can get free national network time to present his views on the Panama Canal, does not the congressional opposition have the same right? Or are we a lesser branch of Government? That has never been my view, and I hope it is not Mr. Carter's. So I strongly urge him, if he is to resort to a fireside chat, to join with those in Congress who may oppose his views in urging the networks to grant equal time to us—not a week or a few days later, but immediately, while the subject is still fresh in the minds of the people.

A MEMORIAL FOR DR. MARTIN LUTHER KING, JR., IN THE CAPITOL

(Mr. BINGHAM asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BINGHAM. Mr. Speaker, I am proud to introduce today, with 157 cosponsors, including all members of the Black Caucus, a concurrent resolution to authorize the commissioning of a bust or statue of Dr. Martin Luther King, Jr., for placement in the U.S. Capitol.

I first introduced this resolution in the 92d Congress with 61 cosponsors. The 157 who join me today testify to the ever-increasing esteem in which Dr. King's memory is held.

Last year this resolution passed both Houses. It failed of final passage only because the Senate attached an extraneous amendment, and the 94th Congress adjourned before House-Senate agreement could be reached. I believe that the time has now arrived when Congress will bestow this tribute.

I am pleased that so many Members of the House feel as I do—that the absence of any statue or portrait of a distinguished black American among the 681 statues and portraits in the Capitol is a disgrace to a nation striving to correct the legacy of 200 years of racial injustice. It is not shocking that, of all the black Americans who have contributed to this Nation's greatness, not one is honored among these works of art in these national halls? It need hardly be said here that blacks have contributed greatly to this Nation's development and yet here in these halls there is no recognition of that fact.

Is it any wonder that so few black families are to be seen among the millions of tourists who flock through this Capitol each year? What could black parents tell their children about the absence of a black figure from these Halls? Children could only draw their own conclusions—either blacks have made little contribution to the building of this country or that Congress chooses to ignore that contribution. Both conclusions are destructive and hopefully the second is as incorrect as the first. A bust or statue of Dr. King would begin to right this wrong.

But I do not urge this memorial merely to remedy this serious omission. Dr. Martin Luther King, Jr., should be commemorated at this seat of government because of the life he led and the man he was. Dr. King's life was a shining example to us all. For over a decade he provided to the Nation inspiring leadership in the struggle for equal justice, equal opportunity, and equal rights. Renouncing violence he carried that struggle as far as any man or woman of this century. In 1964 Dr. King was awarded the Nobel Peace Prize.

Dr. King's place in history is secure. He was one of our greatest Americans, A memorial to Dr. King in the Capitol would allow us to celebrate his life while, at the same time, remind us that the battles he fought have not yet been won. It could inspire in us a conviction that they can be. A Capitol memorial to Dr. Martin Luther King, Jr., would honor us as much as it honors him.

In conclusion, let me say that this proposal is not an alternative to the proposal that January 15, Dr. King's birthday, be made a national holiday. Along, with many of the cosponsors of my resolution, I support the holiday proposal as well.

THE SUBSTITUTE PRESCRIPTION DRUG ACT

(Mr. MURPHY of New York asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MURPHY of New York. Mr. Speaker, today I am introducing a bill which could save consumers up to 25 percent on their prescription drug costs. In a market of more than $8 billion per year, that is a possible saving of $2 billion annually. Put in individual terms, it could result in very significant savings particularly to the elderly person, who spends up to one quarter of his medical dollar on prescription drugs, and to the family with young children.

What accounts for the high price of the drugs we buy? One very significant factor is the structure of the drug delivery system, and it is this structure that is the focus of my bill. The bill would permit a pharmacist, where the doctor did not prohibit him from doing so, to fill that doctor's prescription for a brand name product with a drug which is generally equivalent to the brand name product. The medication will have the same therapeutic effect, but will cost the patient significantly less.

Some 90 percent of all prescriptions are written by brand name, and in the majority of States substitution is prohibited by law. The antisubstitution laws were originally enacted for a purpose entirely separate from prohibiting interchange of equivalent drugs; they were virtually nonexistent when the laws were passed. The laws were written, rather, to protect the public from counterfeit drugs. These have now been all but eliminated from the marketplace by the Food and Drug Administration, but the anti-substitution laws are still on the books and are resulting in a lack of competition and consequent high prices.

The lack of competition is fostered by over promotion of brand names to physicians. Some $5,000 per year is spent on each of this country's 200,000 doctors each year in brand name promotion—a cost which is naturally passed on to the consumer. The brand names are designed to be catchy, easy to remember, and doctors tend to write out their prescrip-

tions using the name for a drug product which comes most easily to them. The 90 percent rate of brand name prescribing is most impressive.

When the rate of brand promotion is combined with the antisubstitution laws existent in so many States, the natural result is that each of the identical products available becomes a market unto itself and can command a monopoly price. In hearings last Congress, one witness told the Subcommittee on Consumer Protection and Finance of a price reduction from about $50 for each of three brand name bottles of a drug to below $10 per bottle after repeal of a State antisubstitution law. The reason was that each brand now competed with the others on the pharmacist's shelf—he could now order three times as much from the one manufacturer with the lowest price.

In addition to reducing prices of brand name products, the bill could be expected to open the market to competition from high quality drugs sold under generic labels—these are often made by the same manufacturers who supply the brand name companies, just as food packers sell to both brand name and private label retailers. Now the pattern is that the highest priced item also dominates the market, often in the range of 80–90 percent.

During the subcommittee's hearings last Congress, the chief argument made against the bill was that generic drugs are not in fact interchangeable. It was argued that giving a patient a substitute drug can be dangerous to his health because the substitute may not be precisely identical to the brand product, or because the quality control of the brand company is better than that of the substitute drug manufacturer. Neither of these contentions appears well founded. As to quality control, there is simply no significant correlation between the brand/generic distinction and the issue of quality control. The Food and Drug Administration has conducted studies which have demonstrated that. The agency found no significant difference in the recall rate for brands and generics.

Nor does the issue of "bioequivalence" appear to have much substance. Although two drugs manufactured by different companies may be slightly different, that same degree of difference may occur in two batches of the same drug by the same company. And the significant measure of effectiveness is not absolute equivalence in any case, but is rather "therapeutic equivalence," the range in which two drugs have the same curative effect in the human body.

There are indeed a few drugs which do present either actual or potential problems. These few are listed by the Department of Health, Education, and Welfare. But even in those cases, the problem is generally not the act of substitution itself but the advisability of continuing a patient on the same drug product with which he began his therapy. In these instances, the patient generally could be started on either the commonly prescribed brand name product or some other. Since those drugs are few and far between, and since they themselves can be substituted under some circumstances, their existence should certainly not justify prohibiting substitution altogether.

Nor is this by any means the first time substitution has been permitted. There is a trend in the States, although accomplished with varying degrees of success, to permit substitution. All the Federal Government hospitals routinely use generic products and have successfully for years. About 90 percent of private hospitals do the same. The HEW maximum allowable cost program under medicare—MAC—is based upon the same principle.

But the average consumer does not have the benefit of any such substitution when he gets a prescription filled at the corner drugstore. And he generally does not realize what cost savings he could achieve, and at what level of safety.

The bill I am introducing would give him the benefits of substitution. It provides that a pharmacist may substitute a generically equivalent drug for one prescribed by brand name unless the doctor prohibits substitution. If the pharmacist does substitute, he must dispense the least expensive product which he stocks—unless the consumer requests another product.

If the prescription is written generically, the bill provides—with the same caveat for consumer choice—that the pharmacist must dispense the least expensive product which he stocks.

The bill repeals State laws which prohibit substitutions and makes violation of the provisions of the bill a violation of the Federal Trade Commission Act.

Safety to the patient is guaranteed in several ways under the bill. First, if the doctor has any hesitation about the substitutability of a drug, he can prohibit substitution, specify a manufacturer or group of manufacturers, or talk to the pharmacist personally. Second, the pharmacist is trained for several years in the chemistry of drugs and their action in the body, and he is in this respect more qualified than the doctor to know the similarities and differences among drugs. Third, the patient under this bill always has the option to veto a substitution or specify a brand with which he is familiar.

In a very important sector of our economy in which differences in price of 1,000 percent are documented and differences of 200 percent and 300 percent are not unusual, every step should be taken to make the market competitive and to bring prices down to a competitive level.

THE CONSUMER FRAUD ACT TO PROHIBIT UNFAIR OR DECEPTIVE ACTS OR PRACTICES IN COMMERCE

(Mr. MURPHY of New York asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MURPHY of New York. Mr. Speaker, on Thursday, January 13, I introduced the Consumer Fraud Act. The purpose of this legislation is to protect consumers from the burgeoning number of frauds being perpetrated upon the public. The bill does this by making the knowing commission of specified consumer frauds subject to criminal sanctions.

Presently, the bulk of our law enforcement efforts are focused on the traditional common law offenses of robbery, larceny and burglary. Yet studies indicate that the loss resulting from consumer frauds may be far greater than that from common law offenses. According to a 1967 study by the President's Commission on Law Enforcement and Administration of Justice, consumer frauds cost an estimated $1.35 billion annually. In comparison, common law theft offenses cost the public about half as much: $200 million for embezzlement, $27 million for robbery, $251 million for burglary and $150 million for auto theft.

As devasting as the economic impact of consumer fraud is, its true measure cannot be taken until the personal element is considered. The President's Committee on Consumer Interests found that 1 in 30 letters it received from consumers conveyed an attitude of frustration, anger, and displeasure with the system. Said one committee member of the letters:

The most striking feature . . . is the sense of unfairness, of disregard of the individual by the organized business community, of lack of effective recourse and of a feeling that the marketplace is unethical.

According to a study entitled "The Nature, Compact and Prosecution of White Collar Crime," the principal victims of the high pressure and often sophisticated sales techniques of consumer fraud are those least able to afford it or defend themselves from it: the poor and the elderly. Compounding the victimization of these two groups is that they typically reside in inner cities where legal assistance is costly and inadequate.

The perpetrators of consumer frauds frequently prevent effective law enforcement by skipping into the next jurisdiction before charges can be preferred and by exploiting the differences between local fraud statutes. Federal prosecution under the Mail and Wire Fraud Acts (18 U.S.C. 1341, 1343) is limited because the jurisdictional requirement of use of interstate means of communication in furtherance of the fraud is often lacking in the consumer fraud context.

Although 40 States have some form of consumer fraud statute, the primary form of relief provided is injunctive in nature. Only 16 States provide for civil penalties. Even in those States in which injunctive and civil sanctions have been imposed, fraudulent operators have easily evaded them by transferring their operations to an undiscovered corporate shell and bankrupting the sanctioned company. Apparently, only substantial prison sentences will take this hard-core consumer fraud offender off the streets. As then Attorney General Saxbe stated in June 1974:

Tough criminal penalties are needed rather than civil sanctions, which too often are toothless.

Criminal sanctions will also put the fraudulent operator on notice that such conduct will no longer be tolerated. The 1967 Presidential task force report on crime and its impact concluded that, while long periods of incarceration are

probably not needed to protect the public, criminal sanctions may have a deterrent effect on at least certain types of consumer fraud offenders.

The Consumer Fraud Act would fill the current gap in consumer protection laws by defining a variety of fraudulent practices which are clearly deceptive and unconscionable. The bill proscribes seven basic kinds of fraudulent activity affecting consumers. First, bait and switch type frauds are prohibited. This type of fraud involves advertising or offering for sale goods or services knowing that such will not be sold as offered or advertised. This proscription also extends to the practice of offering goods or services with the knowledge that there is not a sufficient supply to meet reasonable public demand.

Second, the bill prohibits any person from knowingly making false or misleading statements with respect to repairs, replacement, prior ownership, grade, age, quality, style or model of goods or services. Further, false or misleading statements comparing the price or quality of goods with similar goods or services are prohibited.

Third, false descriptions respecting the sponsorship, approval, origin, ingredients, uses, features, benefits, quantities, safety or performance characteristics of goods or services are prohibited.

Fourth, the bill prohibits any person from accepting payment or refusing to return a deposit when goods or services have not been and will not be delivered or performed.

Fifth, the use of physical force or threats of physical force, in the course of a sale or the collection of a purchase price payment is proscribed.

Sixth, the bill would prohibit statements or advertisements indicating that any consumer good is original or new when the goods are deteriorated, altered, reconditioned, reclaimed, used, or secondhand.

Finally, false or misleading statements respecting the reasons for or the amount of any price reductions respecting consumer goods and services are prohibited.

Anyone who knowingly engages in any of these seven types of unfair consumer practices is subject to a fine of up to $1,000 and/or imprisonment for up to 1 year for the first offense. Subsequent offenses may be punished by fines of up to $10,000 and/or imprisonment for up to 3 years.

The Consumer Fraud Act also authorizes any consumer affected by an unfair consumer practice to void any contract or agreement which results from the fraudulent transaction.

In addition, the consumer may sue for three times the actual damages plus legal costs if it can be shown that the unfair consumer practice was knowingly committed. This treble damages remedy, borrowed from securities and antitrust law, insures that consumers will act as "private attorneys general" and will not be dissuaded from filing suit because of the legal costs.

Treble damage suits may be brought in any Federal or State court of competent jurisdiction. Federal jurisdiction is granted without regard to citizenship of the parties or the amount in controversy. Treble damage actions must be brought within 3 years of the time the unfair consumer practice was discovered or should reasonably have been discovered. Delaying the tolling of the statute of limitations until after the fraud has been discovered or should reasonably have been discovered prevents fraudulent operators from escaping liability by perpetrating well concealed frauds.

The final remedy provided by the Consumer Fraud Act is that the U.S. Attorney General, the appropriate U.S. Attorney or the appropriate State attorney general may seek to enjoin a proscribed consumer practice which has occured or is about to occur. This allows preventive action to be taken before an unfair consumer practice causes loss.

All remedies under this bill are meant to supplement and not supplant existing State or Federal law relating to unfair consumer practices.

A BILL PERTAINING TO THE GATEWAY NATIONAL PARK

(Mr. MURPHY of New York asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MURPHY of New York. Mr. Speaker, on Thursday, January 13, I introduced a bill which will expand the Gateway National Recreation Area by including one of New Yorks most renowned landmarks in the park itself. I refer to the Snug Harbor Cultural Center in Staten Island, N.Y.

While Gateway is of recent origin, Snug Harbor is not. It was but a few short years ago that I and many of my colleagues here today fashioned the Gateway Park legislation in an effort to preserve the natural beauty of the key points within New York's port area—the traditional "gateway" to America. Our work culminated in Public Law 92–592, of October 27, 1972, and combined the Jamaica Bay, Breezy Point, Sandy Hook, and Staten Island units into a national recreation area under the direction of the National Park Service.

Snug Harbor, on the other hand, has a rich history which began in the early 19th century when Capt. Robert R. Randall (1750–1801) bequeathed the 80-acre complex to a trust for the express purpose of caring for retired merchant seamen. For more than a century, the facility was put to just that use, and it was only in 1976 that the trust's diminished assets proved incapable of sustaining operations.

The Snug Harbor site has been classified as an historical landmark, and for good reason. On its grounds are Greek Revival ashlar and brick structures built between 1833 and 1880. The middle and end structures feature full-height hexastyle Ionic entrances, porticos, while others have small, one-story corridors, and there are extensive grounds, walkways, and outbuildings. Over the years, the resident mariners planted dozens of exotic plants and trees which have made the center one of New York City's most splendid tourist attraction. It is, in sum, a visual masterpiece, and one of America's historical treasures.

Who can forget the dedication to American art and history which was rekindled by Jacqueline Kennedy Onassis when she was the Nation's First Lady? Well, it was no less an art authority than Mrs. Onassis herself who remarked during a 1976 tour of Snug Harbor that, "The more attention that can be attracted to this lovely place, the better." And that is why I have drafted the legislation which has just been introduced.

The steel wrecking ball and the demolition crews stand ready to ravage Snug Harbor and sever this link with the past. The developers will make short work of its architectural splendor, and deny future generations the right to use this remarkable landmark—unless we act to save Snug Harbor in the 95th Congress.

What can be done? The bill I propose will preserve the center's facilities while opening the site for use as a center for local, visual, and performing art groups. The botanical gardens and other cultural and educational activities will make this an attraction of which all Americans will be proud.

Incorporation of the center will add a new dimension to the present Gateway Recreation Area, and such a move will be fully compatible with the history of the legislation which created Gateway which said that the park was, and I quote, to "preserve and protect for the use and enjoyment of present and future generations an area possessing outstanding natural and recreational features."

Much has been said in recent months about the Northeastern States' share of the Federal dollar. There appears to be a growing awareness that while the industrial Northeast provided the financial impetus for westward expansion over the years, the time has come to restore the declining physical plant in our great cities and deal with their problems. There could be no better way to do this than to reaffirm the proposition implicit in the law which created Gateway Park: America's wealth and beauty can be found in and around her great urban centers as well as in her more remote rivers and streams.

I look forward to taking my proposal through the legislative process. I am anxious to tell my colleagues how proud New Yorkers are of Snug Harbor, and how willing we are to share her with our fellow Americans. But more than that, I am anxious to see us take the logical next step so we can accomplish the legislative intent of the public law which created Gateway Park in 1972.

We stand on the verge of a vital decision: Will we honor our duty to future generations and pass Snug Harbor to them intact, or will we hand it over to demolition teams and thereby breach our generation's duty to preserve our artistic properties? I hope and trust it will be the former, and I introduce this legislation to that end.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BADHAM) to revise and extend their remarks and include extraneous material:)

Mr. WHALEN, for 10 minutes, today.

Mr. DUNCAN of Tennessee, for 10 minutes today.

Mr. RAILSBACK, for 5 minutes, today.

(The following Members (at the request of Mr. KILDEE) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. VANIK, for 10 minutes, today.

Mr. WEAVER, for 15 minutes, today.

Mr. ASHLEY, for 5 minutes, today.

Mr. BINGHAM, for 25 minutes, today.

Mr. RODINO, for 10 minutes, today.

Mr. LEVITAS, for 5 minutes, today.

Mr. CORNELL, for 5 minutes, today.

Mr. HARRIS, for 5 minutes, today.

Mr. WEISS, for 60 minutes, January 19.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. CEDERBERG, and to include extraneous matter, immediately following remarks of Mr. MAHON on the President's budget.

Mr. YATES, in the RECORD today.

(The following Members (at the request of Mr. BADHAM) and to include extraneous matter:)

Mr. CORCORAN of Illinois.

Mr. COHEN in two instances.

Mr. GILMAN.

Mr. BROOMFIELD.

Mr. DUNCAN of Tennessee.

Mr. LENT.

Mr. CONABLE.

Mr. CARTER in five instances.

Mr. KETCHUM.

Mr. BOB WILSON.

Mr. STOCKMAN.

Mr. ROUSSELOT.

Mr. COUGHLIN.

(The following Members (at the request of Mr. KILDEE) and to include extraneous matter:)

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. ANDERSON of California in three instances.

Mr. GONZALEZ in three instances.

Mr. BINGHAM in 10 instances.

Mr. FRASER in five instances.

Mr. LLOYD of California.

Mr. VANIK in three instances.

Mr. BYRON.

Mr. LEHMAN in two instances.

Mr. LONG of Maryland.

Mr. RAHALL.

Mr. CORNELL.

Mr. LEVITAS in two instances.

Mr. WAXMAN.

Miss JORDAN.

Mr. JONES of Tennessee.

Mr. MCDONALD in two instances.

ADJOURNMENT

Mr. KILDEE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 40 minutes p.m.), under its previous order, the House adjourned until Wednesday, January 19, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

400. A letter from the President of the United States, transmitting a draft of proposed legislation to enable the people of Puerto Rico to form a constitution and State government, to be admitted into the Union, and for other purposes (H. Doc. No. 95–49); to the Committee on Interior and Insular Affairs and ordered to be printed with illustrations.

401. A letter from the President of the United States, transmitting a draft of a proposed joint resolution to authorize the U.S. Secret Service to continue to furnish protection to certain former Federal officials or members of their immediate families (H. Doc. No. 95–50); to the Committee on the Judiciary and ordered to be printed.

402. A letter from the Secretary of Agriculture, transmitting the seventh annual report on information and technical assistance delivered by the Department of Agriculture, covering fiscal year 1976, pursuant to section 901(d) of the Agricultural Act of 1970; to the Committee on Agriculture.

403. A letter from the Deputy Director, Office of Management and Budget, Executive Office of the President, transmitting a report that the appropriation to the Southwestern Power Administration, Department of the Interior for Operation and Maintenance for fiscal year 1977, has been reapportioned on a basis which indicates the necessity for a supplemental estimate of appropriation, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

404. A letter from the Deputy Director, Office of Management and Budget, Executive Office of the President, transmitting a report that the appropriations to the Department of Agriculture for "Salaries and Expenses," Federal Grain Inspection Service, and for "Inspection and Weighing Services," Federal Grain Inspection Service, have been apportioned on a basis which indicates the necessity for a supplemental estimate of appropriations, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

405. A letter from the Acting Director, Office of Regulatory Review, Department of Health, Education, and Welfare, transmitting proposed final Teacher Corps funding criteria, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

406. A letter from the Acting Director, Office of Regulatory Review, Department of Health, Education, and Welfare, transmitting proposed final regulations governing the National Diffusion Network, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

407. A letter from the Secretary of Health, Education, and Welfare, transmitting a report covering the transition quarter on personal property donated to public health and educational institutions and civil defense organizations under section 203(j) of the Federal Property and Administrative Services Act of 1949, as amended, and real property disposed of to public health and educational institutions under section 203(k) of the act, pursuant to section 203(o) of the act; to the Committee on Government Operations.

408. A letter from the Chairman, Indian Claims Commission, transmitting the Commission's final determination in docket No. 296, The Hopi Tribe, an Indian Reorganization Act organization suing on its own behalf and as a representative of the *Hopi Indians and the villages of First Mesa (Consolidated villages of Walpi, Shitchumovi and Tewa), Mishongnovi, Sipaulavi, Shungopavi, Oraibi, Kyakotsmovi, Bakabi, Hotevilla and Upper and Lower Moenkopi*, plaintiff, v. *The United States of America*, defendant, pursuant to section 21 of the Indian Claims Commission Act (60 Stat. 1055); to the Committee on Interior and Insular Affairs.

409. A letter from the Chief Commissioner, U.S. Court of Claims, transmitting, a report on the allowance of attorney expense claims in proceedings under the Alaska Native Claims Settlement Act, pursuant to section 20(e) of the act; to the Committee on Interior and Insular Affairs.

410. A letter from the Secretary of the Treasury, transmitting the third annual report on the debt situation in the developing countries and the debt relief provided by the United States, pursuant to section 634(g) of the Foreign Assistance Act of 1961, as amended; to the Committee on International Relations.

411. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

412. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Regional Rail Reorganization Act of 1973; to the Committee on Interstate and Foreign Commerce.

413. A letter from the Administrator, Federal Energy Administration, transmitting a report on changes in market shares of gasoline during August and September 1976, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Interstate and Foreign Commerce.

414. A letter from the Administrator, Federal Energy Administration, transmitting a report on market shares for distillates and residual fuels during August 1976, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Interstate and Foreign Commerce.

415. A letter from the Administrator, Federal Energy Administration, transmitting a report covering the period July–September 1976, on imports of crude oil, residual fuel oil, refined petroleum products, natural gas, and coal; reserves and production of crude oil, natural gas, and coal; refinery activities; and inventories, pursuant to section 11(c)(2) of Public Law 93–319, as amended; to the Committee on Interstate and Foreign Commerce.

416. A letter from the Chairman, National Advisory Council on Services and Facilities for the Developmentally Disabled, transmitting an evaluation of the efficiency of the administration of the Developmental Disabilities Services and Facilities Construction

Act, covering fiscal year 1976 and the transition quarter, pursuant to section 108(c)(5) of the act (89 Stat. 500); to the Committee on Interstate and Foreign Commerce.

417. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to amend section 1114 of title 18 of the United States Code to include officers and employees of the Bureau of Alcohol, Tobacco and Firearms; to the Committee on the Judiciary.

418. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to remove the limitation on dues for U.S. membership in the International Criminal Police Organization, and for other purposes; to the Committee on the Judiciary.

419. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to amend chapter 40, title 18, United States Code, to authorize the destruction of explosive materials subject to seizure and forfeiture where it is impractical or unsafe to remove the materials to a place of storage or where such materials cannot be safely stored; to the Committee on the Judiciary.

420. A letter from the chairman, board of directors, Future Farmers of America, transmitting the audit report of the organization for the year ended June 30, 1976, pursuant to section 3 of Public Law 88–504; to the Committee on the Judiciary.

421. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the National Visitor Center Facilities Act of 1968, as amended, to facilitate the implementation of section 703 of the Railroad Revitalization and Regulatory Reform Act of 1976, and for other purposes; to the Committee on Public Works and Transportation.

422. A letter from the Administrator, U.S. Environmental Protection Agency, transmitting a report on the implementation of the Federal Water Pollution Control Act during calendar years 1974 and 1975, pursuant to section 516(a) of the act; to the Committee on Public Works and Transportation.

423. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to amend the National Firearms Act (26 U.S.C. chapter 53), to eliminate formal forfeiture procedures, both judicial and administrative, involving unregistered National Firearms Act weapons; to the Committee on Ways and Means.

424. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to amend the Tariff Act of 1930 to raise the monetary ceiling for nonjudicial forfeiture of any vessel, vehicle, merchandise or baggage seized under the customs laws, and for other purposes; to the Committee on Ways and Means.

425. A letter from the Secretary of Labor, transmitting a report on a review of the emergency unemployment compensation program and the special unemployment assistance program, pursuant to section 104 of Public Law 94–45; to the Committee on Ways and Means.

426. A letter from the Special Representative for Trade Negotiations, Executive Office of the President, transmitting a report covering the 6 months ended December 31, 1976, on reviews and hearings arising from complaints of unfair trade practices by foreign governments, pursuant to section 301(d)(2) of the Trade Act of 1974; to the Committee on Ways and Means.

427. A letter from the Comptroller General of the United States, transmitting a report on Federal efforts to help States serve mentally ill and mentally retarded persons in communities rather than in large public institutions; jointly, to the Committees on Government Operations, Interstate and Foreign Commerce, Ways and Means, Education and Labor, and Banking, Finance and Urban Affairs.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

[*Introduced January 13, 1977*]

By Mr. ECKHARDT (for himself, Mr. ARCHER, and Ms. JORDAN):

H.R. 1942. A bill to amend the definition of the term "lawful bridge" in "An Act to provide for the alteration of certain bridges over navigable waters of the United States", approved June 21, 1940 (54 Stat. 497), for the purpose of clarifying such definition; to the Committee on Public Works and Transportation.

[*Introduced January 17, 1977*]

By Mr. ASHLEY (by request):

H.R. 1943. A bill to exempt insured loans from certain limitations of section 5(c) of the Home Owners' Loan Act of 1933; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BRINKLEY:

H.R. 1944. A bill to amend title 18 of the United States Code to extend the imposition of mandatory prison sentences to certain additional offenses involving the use of firearms; to the Committee on the Judiciary.

By Mr. BRODHEAD:

H.R. 1945. A bill to amend title XVI of the Social Security Act to extend from 9 to 24 months the trial work period during which an individual who is receiving supplemental security income benefits on the basis of disability may render services for remuneration or gain without suffering a loss of or reduction in such benefits; to the Committee on Ways and Means.

H.R. 1946. A bill to amend title XVI of the Social Security Act to eliminate the 33⅓ percent reduction in SSI benefits which is presently imposed when the recipient is living in another person's household, and to provide that support and maintenance furnished the recipient in kind by such other person shall be disregarded in determining such recipient's income for SSI purposes; to the Committee on Ways and Means.

By Mr. BROOMFIELD:

H.R. 1947. A bill to require authorizations of new budget authority for Government programs at least every 5 years, to provide for review of Government programs every 5 years, and for other purposes; jointly to the Committees on Rules and Government Operations.

By Mr. COHEN:

H.R. 1948. A bill to amend the Emergency School Aid Act to extend to Franco-Americans the same benefits afforded other minority groups under that act; to the Committee on Education and Labor.

By Mr. COHEN (for himself and Mr. EMERY):

H.R. 1949. A bill to establish a program to improve U.S. commercial fisheries; to the Committee on Merchant Marine and Fisheries.

H.R. 1950. A bill to increase the subsistence payments to students at State maritime academies; to the Committee on Merchant Marine and Fisheries.

By Mr. CORNELL (for himself, Mr. MCHUGH, Mr. FISH, Mr. BRODHEAD, Mr. CLEVELAND, Mr. DELLUMS, Mr. DERRICK, Mr. EDGAR, Mr. ENGLISH, Mr. FRENZEL, Mr. HANNAFORD, Mrs. MEYNER, Mr. OBERSTAR, Mrs. SCHROEDER, Mr. STUDDS, and Mrs. FENWICK):

H.R. 1951. A bill to revise the laws governing appointments to the service academies so as to relieve Members of Congress from the responsibility of making nominations for appointments thereto, and for other purposes; jointly to the Committees on Armed Services and Merchant Marine and Fisheries.

By Mr. DANIELSON:

H.R. 1952. A bill to amend the corporate name of AMVETS (American Veterans of World War II), and for other purposes; to the Committee on the Judiciary.

H.R. 1953. A bill to amend chapter 44 of title 18 of the United States Code to penalize the use of a cutting or stabbing weapon in the commission of a felony, and to increase the penalties for the use of firearms in the commission of a felony; to the Committee on the Judiciary.

By Mr. DUNCAN of Tennessee:

H.R. 1954. A bill to amend title 38 of the United States Code in order to remove the 10-year delimiting period on educational assistance provided to war orphans and widows; to the Committee on Veterans' Affairs.

H.R. 1955. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for services furnished by physician extenders; jointly to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. EDWARDS of California:

H.R. 1956. A bill to amend the Immigration and Nationality Act to eliminate the legal custody requirement and the requirement of residence and physical presence in the United States for the naturalization of children adopted by U.S. citizens; to the Committee on the Judiciary.

H.R. 1957. A bill to amend title 38, United States Code, to provide comprehensive mental health, psychosocial readjustment services, counseling, and other services necessary or appropriate for the effective treatment, rehabilitation, or readjustment of veterans and their dependents who are experiencing psychosocial readjustment problems resulting from military service or readjustment from military service; to the Committee on Veterans' Affairs.

By Mr. FORD of Michigan (for himself, and Mr. HANLEY):

H.R. 1958. A bill to amend title 5, United States Code, to provide civilian employees of the National Guard certain rights of members of the competitive service, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. KILDEE (for himself and Mr. BRODHEAD):

H.R. 1959. A bill to amend the Internal Revenue Code of 1954 to provide for the exclusion from gross income of a certain portion of amounts received as annuities, pension, or other retirement benefits by individuals who have attained age 65; to the Committee on Ways and Means.

By Mr. LLOYD of California (for himself, Mr. MIKVA, Mr. BADHAM, Mr. BLANCHARD, Mr. DAN DANIEL, Mr. DERWINSKI, Mr. DUNCAN of Tennessee, Mr. EMERY, Mr. JACOBS, Mr. JONES of Tennessee, Mr. KETCHUM, Mr. KREBS, Mr. LAGOMARSINO, Mr. LENT, Mr. LEVITAS, Mr. LOTT, Mr. LUJAN, Mr. MAZZOLI, Mr. MCDONALD, Mr. QUAYLE, Mr. RUSSO, Mr. SIMON, Mr. SISK, Mr. CHARLES H. WILSON of California, Mr. CHARLES WILSON of Texas, and Mr. YATRON):

H.R. 1960. A bill to abolish certain Federal regulatory agencies and to bring about the abolition of certain Federal regulatory agencies or their successor agencies after a specified period of time, and for other purposes; jointly to the Committees on Government Operations and Rules.

By Mr. MIKVA:

H.R. 1961. A bill to amend the Internal Revenue Code of 1954 to permit a taxpayer to defer a portion of his income tax based upon the amount of certain expenses paid or incurred by him in connection with the education or training at an institution of higher education or a vocational school of the taxpayer, his spouse, or any dependent; to the Committee on Ways and Means.

By Mr. MITCHELL of New York:

H.R. 1962. A bill to amend the Internal Revenue Code of 1954 to provide that the special expenses incurred in maintaining a retarded or handicapped individual shall be allowable as a medical deduction without regard to the 3-percent floor; to the Committee on Ways and Means.

By Mr. MURPHY of New York:

H.R. 1963. A bill to permit pharmacists, in certain circumstances, to use substitute drugs in the filling or refilling of prescriptions made by physicians; to the Committee on Interstate and Foreign Commerce.

H.R. 1964. A bill to amend the Community Mental Health Centers Act to permit agencies which are located outside catchment areas with community mental health centers and which have received children's mental health grants before the enactment of the Community Mental Health Centers Amendments of 1975 to continue to receive such grants; to the Committee on Interstate and Foreign Commerce.

By Mr. OBERSTAR:

H.R. 1965. A bill to amend title I of the Housing and Community Development Act of 1974 for the purpose of enabling recipients of grants under such title to utilize such grants with respect to governmental buildings, and for the purpose of providing for the adjustment of geographic boundaries of standard metropolitan statistical areas; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1966. A bill to establish a pilot program to compensate persons who suffer loss or damage from predation by endangered species; to the Committee on Merchant Marine and Fisheries.

By Mr. OBERSTAR (for himself and Mr. BLOUIN):

H.R. 1967. A bill to establish a program for repairing and replacing unsafe highway bridges; jointly to the Committees on Public Works and Transportation, and Ways and Means.

By Mr. RHODES:

H.R. 1968. A bill to amend the Federal Salary Act of 1967, and for other purposes; jointly to the Committees on Post Office and Civil Service, and Rules.

By Mr. ROE:

H.R. 1969. A bill to assure that an individual or family whose income is increased by reason of a general increase in monthly social security benefits will not, because of such general increase, suffer a loss or reduction in the benefits the individual or family has been receiving under certain Federal or federally assisted programs; to the Committee on Ways and Means.

By Mr. ROE (for himself, Mr. CORRADA, Mr. SMITH of Iowa, Mr. WEISS, Mr. MURPHY of Pennsylvania, Mr. KOSTMAYER, Mr. DAVIS, Mr. TONRY, Mr. MARKEY, Mr. FLIPPO, Mr. JONES of Tennessee, Mr. APPLEGATE, Mr. BONIOR, Mr. BENJAMIN, Mr. CORNWELL, Mr. PEASE, Mr. METCALFE, Mr. SHIPLEY, Mr. SIMON, Mr. EARLY, Mr. WHITLEY, Mr. STARK, Mr. FASCELL, Mrs. SPELLMAN, and Mr. KAZEN):

H.R. 1970. A bill to increase the authorization for the Local Public Works Capital Development and Investment Act of 1976; to the Committee on Public Works and Transportation.

By Mr. ROE (for himself, Mr. FLYNT, Mrs. COLLINS of Illinois, Mr. LONG of Maryland, Mr. BARNARD, Mr. AKAKA, Mr. WHITE, Mr. DICKS, and Mr. GLICKMAN):

H.R. 1971. A bill to increase the authorization for the Local Public Works Capital Development and Investment Act of 1976; to the Committee on Public Works and Transportation.

By Mr. SATTERFIELD:

H.R. 1972. A bill to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only apply to taxable years beginning after December 31, 1976; to the Committee on Ways and Means.

By Mr. SEBELIUS:

H.R. 1973. A bill to provide additional emergency credit for farmers and ranchers and to expand existing credit, and emergency credit authority available to farmers and ranchers under the Consolidated Farm and Rural Development Act; to the Committee on Agriculture.

By Mr. UDALL (for himself, Mr. WIRTH, Mr. BAUCUS, Mr. BONIOR, Mr. LEHMAN, Mr. THOMPSON, Mr. CONTE, Mr. STUDDS, Mr. HANNAFORD, Mr. MAZZOLI, Mr. MOORHEAD of Pennsylvania, Mr. CORMAN, Mr. RANGEL, Mr. COUGHLIN, Mr. WOLFF, Mr. MITCHELL of Maryland, Mr. DE LUGO, Mr. FLOOD, Mr. WHITEHURST, Mr. CORRADA, Mr. STARK, Mr. WEISS, Mr. NIX, Ms. HOLTZMAN, and Mr. SIMON):

H.R. 1974. A bill to designate certain lands in the State of Alaska as units of the National Park, National Wildlife Refuge, Wild and Scenic Rivers and National Wilderness Preservation System, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. WALKER:

H.R. 1975. A bill to amend section 8 of the U.S. Housing Act of 1937 for the purpose of requiring the Secretary of Housing and Urban Development and public housing agencies to notify certain Members of Congress before entering into annual contributions contracts under such section; to the Committee on Banking, Finance, and Urban Affairs.

By Mr. WHALEN (for himself, Mr. CARR, Mr. QUIE, Mr. RICHMOND, Mr. SCHEUER, Mr. SHARP, and Mr. WALKER):

H.R. 1976. A bill to provide that any increase in the rate of pay for Members of Congress proposed during any Congress shall not take effect earlier than the beginning of of the next Congress; to the Committee on Post Office and Civil Service.

By Mr. YOUNG of Georgia:

H.R. 1977. A bill to amend the Social Security Act to establish a national health care program for all residents of the United States under which all existing health care programs for the aged and poor are consolidated, to provide for the administration of the national health care program and the existing social security programs by a newly established independent Social Security Administration, and for other purposes; jointly; to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. WRIGHT:

H.R. 1978. A bill to amend the Internal Revenue Code of 1954 to provide that child insurance benefits under the Social Security Act and certain veterans' benefits will not be taken into account in determining whether an individual is a dependent of another person; to the Committee on Ways and Means.

By Mr. ROYBAL:

H.R. 1979. A bill to amend the Fair Credit Reporting Act, and to create a new title in the Consumer Credit Protection Act in order to license consumer credit investigators; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1980. A bill to establish within the Department of Housing and Urban Development a program providing financial assistance to low-income individuals and families for the purpose of purchasing and installing solar heating (for combined solar heating and cooling) equipment; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1981. A bill to amend title VII of the Civil Rights Act of 1964 to protect the employment rights of the elderly; to the Committee on Education and Labor.

H.R. 1982. A bill to amend the Elementary and Secondary Education Act of 1965 to assist school districts to carry out locally approved school security plans to reduce crime against children, employees, and facilities of their schools; to the Committee on Education and Labor.

H.R. 1983. A bill to establish and protect the rights of day laborers; to the Committee on Education and Labor.

By Mr. GOLDWATER (for himself and Mr. KOCH):

H.R. 1984. A bill to protect the constitutional right of privacy of individuals concerning whom identifiable information is recorded by enacting principles of information practices in furtherance of articles I, III, IV, V, IX, X, and XIV of amendment to the U.S. Constitution; to the Committee on the Judiciary.

By Mr. KOCH (for himself and Mr. GOLDWATER):

H.R. 1985. A bill to establish restrictions on the disclosure of certain financial, toll, and credit records, and for other purposes; jointly to the Committees on Banking, Finance and Urban Affairs and the Judiciary.

By Mr. ROYBAL:

H.R. 1986. A bill to amend the Education of the Handicapped Act to provide tutorial and related instructional services for homebound children through the employment of college students, particularly veterans and other students who themselves are handicapped; to the Committee on Education and Labor.

H.R. 1987. A bill to amend the National Public Employee Relations Act; to the Committee on Education and Labor.

H.R. 1988. A bill to amend the Community Services Act of 1974, to provide for the establishment of a National Office for Migrant and Seasonal Farmworkers within the Community Services Administration, with responsibility for the coordinated administration of all of the programs of that Administration serving migrant and seasonal farmworkers; to the Committee on Education and Labor.

H.R. 1989. A bill to establish a Conservation Corps in the Departments of Agriculture and Interior, and for other purposes; to the Committee on Education and Labor.

H.R. 1990. A bill to establish an Office of Spanish-Speaking Affairs in the Executive Office of the President, and for other purposes; to the Committee on Government Operations.

H.R. 1991. A bill to amend the Public Health Service Act to provide assistance for research and development for improvement in delivery of health services to the critically ill; to the Committee on Interstate and Foreign Commerce.

H.R. 1992. A bill to ban aerosol cans in commerce unless they conform to safety standards set by the Consumer Product Safety Commission; to the Committee on Interstate and Foreign Commerce.

H.R. 1993. A bill to amend the Federal Food, Drug, and Cosmetic Act in order to provide for the registration of manufacturers of cosmetics, the testing of cosmetics, and the labeling of cosmetics, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 1994. A bill to provide for a payment by the United States for certain medical services and treatment provided to individuals suffering from physical injuries attributable to the atomic bomb explosions on Hiroshima and Nagasaki, Japan, in August 1945; to the Committee on the Judiciary.

H.R. 1995. A bill to amend the Civil Rights Act of 1964 in order to prohibit discrimination on the basis of physical or mental handicap in federally assisted programs; to the Committee on the Judiciary.

H.R. 1996. A bill to amend title 28, United States Code, to provide more effectively for bilingual proceedings in certain district courts of the United States, and for other purposes; to the Committee on the Judiciary.

H.R. 1997. A bill to amend title 5, United States Code, to include as creditable service

for civil service retirement purposes service as an enrollee of the Civilian Conservation Corps, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 1998. A bill to provide relief to certain individuals 60 years of age and over who own or rent their homes, through income tax credits and refunds; to the Committee on Ways and Means.

H.R. 1999. A bill to amend title II of the Social Security Act to increase to $7,200 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

H.R. 2000. A bill to amend section 582 of the Tariff Act of 1930 to require search warrants in connection with certain body search procedures conducted with respect to persons entering the United States from foreign countries, and for other purposes; to the Committee on Ways and Means.

By Mr. DANIELSON:

H.J. Res. 149. Joint resolution proposing an amendment to the Constitution of the United States to the election of the President and Vice President of the United States; to the Committee on the Judiciary.

By Mr. LLOYD of California:

H.J. Res. 150. Joint resolution. A bill proposing an amendment to the Constitution of the United States providing that the term of office of Members of the House of Representatives shall be 4 years, and for other purposes; to the Committe on the Judiciary.

By Mr. RAHALL:

H.J. Res. 151. Joint resolution to provide temporary authority for additional qualified individuals to hear and determine claims under title IV of the Coal Mine Health and Safety Act of 1969 as amended; to the Committee on Education and Labor.

By Mr. BINGHAM (for himself, Mr. ADDABBO, Mr. AKAKA, Mr. ANDERSON of California, Mr. ANDERSON of Illinois, Mr. ASHLEY, Mr. BADILLO, Mr. BALDUS, Mr. BAUCUS, Mr. BEARD of Rhode Island, Mr. BENJAMIN, Mr. BIAGGI, Mr. BLOUIN, Mr. BOLAND, Mr. BOLLING, Mr. BONIOR, Mr. BONKER, Mr. BRADEMAS, Mr. BRODHEAD, Mr. BROWN of Ohio, Mr. BROWN of Michigan, Mr. BROWN of California, Mr. BUCHANAN, Ms. BURKE of California, and Mr. JOHN L. BURTON):

H. Con. Res. 60. Concurrent resolution authorizing a bust or statue of Martin Luther King, Jr., to be placed in the Capitol; to the Committee on House Administration.

By Mr. BINGHAM (for himself, Mr. PHILLIP BURTON, Mr. CAVANAUGH, Ms. CHISHOLM, Mr. CLAY, Mr. COHEN, Ms. COLLINS of Illinois, Mr. CONTE, Mr. CONYERS, Mr. CORMAN, Mr. CORNWELL, Mr. CORRADA, Mr. COTTER, Mr. COUGHLIN, Mr. DELLUMS, Mr. DE LUGO, Mr. DICKS, Mr. DIGGS, Mr. DOWNEY, Mr. DRINAN, Mr. DUNCAN of Oregon, Mr. EDGAR, Mr. EDWARDS of California, Mr. EILBERG, and Mr. ERTEL):

H. Con. Res. 61. Concurrent resolution authorizing a bust or statue of Martin Luther King, Jr., to be placed in the Capitol; to the Committee on House Administration.

By Mr. BINGHAM (for himself, Mr. EVANS of Colorado, Mr. FASCELL, Mr. FAUNTROY, Ms. FENWICK, Mr. FINDLEY, Mr. FISH, Mr. FISHER, Mr. FLOOD, Mr. FOLEY, Mr. FORD of Tennessee, Mr. FRASER, Mr. FRENZEL, Mr. GAMMAGE, Mr. GIBBONS, Mr. GILMAN, Mr. GLICKMAN, Mr. HARRINGTON, Mr. HARRIS, Mr. HAWKINS, Ms. HOLT, Ms. HOLTZMAN, Mr. HORTON, Mr. HOWARD, and Mr. HUGHES):

H. Con. Res. 62. Concurrent resolution authorizing a bust or statue of Martin Luther King, Jr., to be placed in the Capitol; to the Committee on House Administration.

By Mr. BINGHAM (for himself, Mr. JACOBS, Mr. JENRETTE, Ms. JORDAN, Mr. KASTENMEIER, Ms. KEYS, Mr. KILDEE, Mr. KOCH, Mr. KOSTMAYER, Mr. LEDERER, Mr. LE FANTE, Mr. LEGGETT, Mr. LONG of Maryland, Mr. LONG of Louisiana, Mr. MCCLOSKEY, Mr. MCHUGH, Mr. MCKINNEY, Mr. MAZZOLI, Mr. MEEDS, Mr. METCALF, Ms. MEYNER, Ms. MIKULSKI, Mr. MIKVA, Mr. MILLER of California, and Mr. MINETA):

H. Con. Res. 63. Concurrent resolution authorizing a bust or statue of Martin Luther King, Jr., to be placed in the Capitol; to the Committee on House Administration.

By Mr. BINGHAM (for himself, Mr. MITCHELL of New York, Mr. MITCHELL of Maryland, Mr. MOFFETT, Mr. MOORHEAD of Pennsylvania, Mr. MOSS, Mr. MURPHY of New York, Mr. MURPHY of Illinois, Mr. MICHAEL O. MYERS, Mr. NEAL, Mr. NIX, Mr. NOLAN, Mr. NOWAK, Mr. OTTINGER, Mr. PANETTA, Mr. PEPPER, Mr. PRICE, Mr. PRITCHARD, Mr. RAHALL, Mr. RANGEL, Mr. REUSS, Mr. RICHMOND, Mr. ROE, Mr. ROSENTHAL, and Mr. ROYBAL):

H. Con. Res. 64. Concurrent resolution authorizing a bust or statue of Martin Luther King, Jr., to be placed in the Capitol; to the Committee on House Administration.

By Mr. BINGHAM (for himself, Mr. SANTINI, Mr. SCHEUER, Mr. SEIBERLING, Mr. SHARP, Mr. SIMON, Mr. SISK, Mr. SOLARZ, Mr. STANTON, Mr. STARK, Mr. STOCKMAN, Mr. STOKES, Mr. STUDDS, Mr. THOMPSON, Mr. TRAXLER, Mr. TRIBLE, Mr. TSONGAS, Mr. TUCKER, Mr. UDALL, Mr. VAN DEERLIN, Mr. VOLKMER, Mr. WALGREN, Mr. WAXMAN, Mr. WEISS, and Mr. WHALEN):

H. Con. Res. 65. Concurrent resolution authorizing a bust or statue of Martin Luther King, Jr., to be placed in the Capitol; to the Committee on House Administration.

By Mr. BINGHAM (for himself, Mr. CHARLES WILSON of Texas, Mr. CHARLES H. WILSON of California, Mr. WOLFF, Mr. WON PAT, Mr. WYDLER, Mr. YATES, Mr. YATRON, Mr. ZEFERETTI, Ms. BOGGS, Mr. ECKHARDT, Mr. GORE, and Mr. VENTO):

H. Con. Res. 66. Concurrent resolution authorizing a bust or statue of Martin Luther King, Jr., to be placed in the Capitol; to the Committtee on House Administration.

By Mr. EDGAR (for himself, Mr. TSONGAS, Mr. ARCHER, Mr. BONIOR, Mr. COUGHLIN, Mr. DAVIS, Mr. DERWINSKI, Mr. DODD, Ms. FENWICK, Mr. FRASER, Mr. GEPHARDT, Mr. GIBBONS, Mr. WHITEHURST, Mr. MCDONALD, Ms. MIKULSKI, Mr. MOAKLEY, Mr. MOFFETT, Mr. RINALDO, Mr. ROE, Mr. SIMON, Mr. STEERS, Mr. THOMPSON, Mr. UDALL, Mr. WEISS, and Mr. MAZZOLI):

H. Res. 114. Resolution condemning terrorist activities and the premature release of Abu Daoud; to the Committee on International Relations.

By Mr. GRASSLEY (for himself, Mr. BAUMAN, Mr. LAGOMARSINO, Mr. KINDNESS, Mr. MOTTL, Mr. CLEVELAND, Mr. PURSELL, Mr. TRIBLE, Mr. SEBELIUS, Mr. JACOBS, Mr. ARCHER, Mr. ERTEL, and Mr. CORCORAN):

H. Res. 115. Resolution disapproving the recommendations of the President with respect to the rates of pay of Federal officials transmitted to the Congress for the fiscal year ending September 30, 1978; to the Committee on Post Office and Civil Service.

MEMORIALS

Under clause 4 of rule XXII,

6. The SPEAKER presented a memorial of the Council of the District of Columbia relative to unpaid parking tickets written on diplomatic cars; to the Committee on International Relations.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. MICHEL introduced a resolution (H. Res. 116) to refer H.R. 1429 to the Chief Commissioner of the U.S. Court of Claims, which was referred to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

31. By Mr. SISK: Petition of the Merced County Board of Supervisors, Merced, Calif., relative to the lack of home delivery of mail in Winton, Calif.; to the Committee on Post Office and Civil Service.

32. The Speaker presented a petition of Frank W. Beckendorf, Chalnette, La., relative to the election of Rick Tonry in the Louisiana First Congressional District; to the Committee on House Administration.

EXTENSIONS OF REMARKS

IMPORTANT TAX SHELTER REGULATIONS DELAYED BY TREASURY SECRETARY SIMON

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. VANIK. Mr. Speaker, in a previous speech I pointed out the unfortunate condition of the Treasury Department's process of issuing regulations for the administration of our tax system. As I have noted, the backlog of regulation drafting projects is indefensibly large with more than 300 regulation projects pending.

Some of these projects have been outstanding for 20 years or more. Since regulations are an indispensable source of guidance in the Federal courts, the Internal Revenue Service, tax practitioners and the public, the efficiency of our tax system has been greatly hampered by these delays.

Some indication of what is wrong with the Treasury Department's approach to issuing these very important regulations can be obtained by looking at the fate of a set of proposed regulations issued January 5, only to be summarily shelved a few hours later by Treasury Secretary Simon. By this action, Secretary Simon exercised a one-man veto on the extensive work of Internal Revenue

Service professionals. Because these regulations would have partly reformed the tax shelter area, the action will be warmly received by those rich taxpayers and promoters now benefiting from the flourishing trade in tax shelter arrangements.

The proposed regulations would have straightened out the rules governing whether an enterprise constitutes a partnership or corporation. This classification determines whether an investment will serve as a shelter device for taxable income.

A tax shelter operates by creating artificial paper losses that wealthy investors can use to offset income from other sources. The enterprise's losses are only available to shelter investor's income if the organization is a partnership, since partnerships are not treated as a separate taxable entity, but rather are treated as a conduit, channeling enterprise income or losses to the individual partners. That is to say, a partnership does not report income or loss in its own name, but acts instead like a clearinghouse sorting out the appropriate amounts of income or loss to be allocated to each partner. Therefore, if the tax shelter device constitutes a partnership, the paper losses it produces belong to the investors. If, on the other hand, the shelter device is determined to be a corporation, then whatever losses were generated would belong to the corporation as a taxable entity in its own right, and could not be passed on to the investors. Thus, the valuable paper losses would remain locked inside the corporation, the wealthy investors would receive no shelter benefits, and the scheme would fail as a tax avoidance device.

The present regulations in this area are strongly biased in favor of finding a joint investment enterprise to be a "partnership." In other words, an enterprise can be structured to have many of the attributes of the corporate form of business and still be considered a "partnership." Thus, under current rules, tax shelter benefits are quite liberally available, even in organizations arranged to provide most of the very advantageous corporate characteristics while avoiding the disadvantages associated with the pure partnership form.

This situation has long been in need of reform. The January 5th unfortunately short-lived regulations were a large step to a more balanced and more realistic classification of corporations and partnerships. The veto of these proposed regulations by Secretary Simon means that reform will probably be delayed until at least the change in administration.

It is interesting to note that these very useful regulations have been in the works for over 10 years. This fact, in addition to serving as another example of the substantial delays in issuing tax regulations, raises large questions about Treasury Secretary Simon's decision to hold them back once again. Secretary Simon has explained that he regards the regulations as "controversial" and thus needing further discussion. However, the regulation has already gone back and forth between the drafting section of IRS and the policymakers in the Treasury several times and there is no need for further delay. Moreover, it is doubtful how controversial these regulations are since they were essentially an attempt to correspond the Treasury's rules to the holdings of a line of Federal court cases that the Service has already officially acquiesced in.

In the larger context, the story of the January 5th proposed regulation repeats a pattern of delay and ambivalence that has come to characterize the process of publishing tax regulations. In this connection, I am considering introducing legislation to limit the amount of time a regulation can languish unpublished within the tax bureaucracy. It is clear that such improvement is needed in this very important area. I would also strongly urge that Secretary Simon reverse his position and finally send these important regulations on their way to official adoption.

TRIBUTE TO DWIGHT CASE, A NATIVE CALIFORNIAN

HON JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. ROUSSELOT. Mr. Speaker, with respect and admiration I take this opportunity to recognize a native of California for his personal accomplishments in upholding the American political system and for his remarkable achievements in the field of broadcasting.

Dwight Case has given generously of his time, talents, and capabilities to stimulate a communication between the business and government communities both as a private citizen and in his professional role as president of RKO Radio. As a leader in a field that receives almost as much criticism as the Federal Government, Dwight Case has been exemplary in maintaining a high degree of quality in the media of broadcasting. He has earned an enviable reputation not only as a highly respected broadcast executive, but also as a civic, church, industry, and philanthropic leader. He is, for example, a member of the Committee for New Dimensions of California Lutheran College, Thousand Oaks, a lay leader at the Bel-Air Presbyterian Church, and a member of the Southern California Campaign Committee for the United Negro College Fund.

Dwight Case was born in Modesto, Calif., and graduated cum laude in 1956 from the University of the Pacific. He served in the U.S. Navy from 1949 until 1952. In 1972 he joined the RKO Radio family as vice president and general manager of KHJ in Los Angeles. Prior to that he was a succesful broadcasting executive in Stockton, Modesto, Sacramento, San Francisco, and Bakersfield. He was named vice president-western region and then executive vice president of RKO Radio before becoming president in May 1975. The company includes 13 AM and FM radio stations in Los Angeles, San Francisco, Chicago, Memphis, Washington, Boston, New York, and Ft. Lauderdale. The stations are heard daily by nearly 15 million listeners.

The general managers of RKO's stations are directed by Dwight Case to participate actively in a five-dimension public affairs program which includes the following:

First. Personally get involved in selected local community, educational, philanthropic, professional, service and youth endeavors—not simply to join but rather to become a leader;

Second. Attend one or more college business, communications or liberal arts courses annually, to broaden knowledge and perspective;

Third. International travel, 2 or 3 weeks each year, to observe, to learn, and to meet influential leaders in every aspect of living and working;

Fourth. Annual visit to Washington, D.C., as well as to the seats of local and State government, to interview public officials; and

Fifth. Prepare and articulate in-depth editorials and on-air public affairs programs in attractive time periods to challenge and educate listeners on meaningful contemporary issues.

As a result of this encouragement by Dwight Case, RKO Radio's general managers serve in such community activities as Rotary and Kiwanis Clubs, Junior Achievement, Boys Clubs, March of Dimes, Leukemia Foundation, Boy Scouts, YMCA, League of Women Voters, Chamber of Commerce, Toys for Tots, United Way, American Cancer Society, Heart Association, and Jr. Chamber of Commerce. They also sponsor scholarships, teach university broadcasting courses, and train radio interns.

Since becoming president of RKO Radio, Dwight has successfully devoted much of his time to speaking and writing throughout the United States on the importance of the American free enterprise system and the necessity for each citizen's participation if it is to survive.

In 1976 he was honored by resolution of the California State Assembly for his "illustrious record of personal and professional achievement."

Mr. Speaker, in these days so perilous to the preservation of the American free enterprise system, it is gratifying indeed to know that there are citizens like Dwight Case who will give vigorously of his talents to encourage high level management participation in civic and government affairs. The threat to America's free enterprise system is also a threat to individual freedom.

Dwight's civic and professional activities have set an example not only for the broadcasting industry, which is so influential in shaping the thinking and attitudes of our people, but also for citizen involvement in the local community.

TRIBUTE TO ELMER ADAMS

HON. DAVE STOCKMAN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. STOCKMAN. Mr. Speaker, two of the most worrisome trends in American society today are the continuing decline in political participation and the pervasive cynicism with which large portions of the citizenry view the basic institutions of our democratic process, especially our two major political parties.

Given these circumstances, it is encouraging to be reminded that such alarming patterns of attitude and belief are not universal; that there are still many Americans dedicated to doing their part to make certain our political system works effectively and that it merits the confidence of the public.

I am proud to note that one of my own constituents, Mr. Elmer Adams of Decatur, Mich., has been, for more than 50 years, one of those rare individuals who takes the responsibilities of citizenship seriously. Beginning in 1932, and for two subsequent decades, he served faithfully as the clerk of his home township. Through his competence, integrity and dedication during those years, he helped demonstrate the viability of a basic truth strongly held in our part of the country: the belief that grass roots government is the most effective and responsible form of government because it is closest to the people it is intended to serve.

During the last 20 years, Elmer Adams has also contributed heavily to the realization of another basic truth of our system: that healthy two-party competition is essential to sound government. As treasurer of the Van Buren County Republican Party, he has played a major role in keeping the party solvent, active, and effective.

Mr. Speaker, as one who has come to know and deeply admire solid, conscientious citizens like Elmer Adams, I am compelled to say that we will continue as the greatest republic history has ever known only if more citizens follow in the footsteps of Elmer Adams. While not everyone will be able to duplicate his many accomplishments on behalf of good government, we can all strive to develop the qualities and high motivation that he symbolizes.

Elmer Adams did not participate in our political system for monetary gain, for prestige and honors, or for power as an end in itself. Rather, his involvement stemmed from a selfless desire to make self-government work and to uphold those high principles of fiscal responsibility, individual liberty, and grass roots government upon which our Nation was founded and has prospered.

At this time of his retirement from active participation in public life and party office, his example is truly worthy of tribute. Elmer Adams is the kind of American without which our democracy could not endure.

THE FORD YEAR

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. BOB WILSON. Mr. Speaker, one of the most expressive tributes to President Ford was made yesterday on the editorial page of the Washington Post, a newspaper that has often been critical of the Ford administration. I am often critical of the Post editorials, but I must say this one is outstanding in its sincere approbation of our President. I personally feel President Ford's appearance here at his state of the Union message last week was truly his finest hour, and I join in congratulating one of the most honorable and true blue persons it has ever been my privilege to know. I ask unanimous consent to include the editorial as a portion of my remarks:

[From the Washington Post, Jan. 16, 1977]

THE FORD YEARS

"At no point has he shown a keen or impressive grasp of the complexities of hard questions. Pedestrian, partisan, dogged—he has been the very model of a second-level party man. It is no accident that over his quarter-century of unremarkable service in the House, he has never been put forward for the presidency. . . ." So we spoke in this space a little over three years ago upon learning that Gerald Ford was about to ascend to the office of Vice President. We do not cite our despondent appraisal because we think it was on the money, but rather because we think it was not. Having been forced to replace his Vice President, and being in not-so-secure condition in office himself, Richard Nixon had just informed a waiting world that Gerald Ford was the one. Frankly, it did not occur to us that Gerald Ford was also the right one.

But we were wrong; he was. The President who will leave office this week brought precisely the needed temperament, character and virtues to the high offices he has temporarily held. These qualities are regularly subsumed under the familiar general heading of "decency," a word that does indeed fit the man. What is so revealing about the times in which we live—and the horrendous political circumstances surrounding Mr. Ford's accession to office—is the vaguely condescending way in which this particular tribute is paid to him: *Well, you have to admit he is a decent human being . . . or . . . Don't get me wrong: Of course, I think he's a decent person . . .* and so on. Decency, in this context, becomes as an attribute something roughly comparable to good posture or punctuality. How odd that so few of us have been willing to acknowledge that decency in the White House can be regarded as a luxury or a bonus or a fringe benefit only at our peril.

It is central. And its absence was central to the sorrows this country endured in the years preceding Mr. Ford's presidency. In his first days and months, it was as if he had liberated Washington—from its personal fears and hostilities and suspicions, from the dark and squalid assumptions that people had come reflexively to make about one another and about the way things "really" worked. God knows who was (and is) still listening in on whose line or who is plotting what gruesome revenge against what political foe. Our point is merely that Gerald Ford brought to the White House an open, unsinister and—yes—decent style of doing things that altered the life of the city and ultimately of the country.

We have found many of the President's programs and positions (and lack of both in some cases) dismal news indeed. But that is yesterday's laundry list. Our summing up of the Ford presidency draws us only to the overriding legacy he leaves.

Will this city under the Carter Democrats be able to preserve that political and personal civility that Gerald Ford did so much, so unexpectedly, to revive? The Carter administration, more activist and energetic, we would guess, than its predecessor, faster-paced, more intellectually self-certain and combative, is almost by nature destined to put some of these homely, but hard-won virtues at risk. We can only hope the new administration will understand their indispensability. Mr. Ford has left it an incomparable gift in the detoxified political atmosphere of the place and the institutions it is about temporarily to inherit.

The outgoing President has also done a great deal for the honor of his party, although you wouldn't necessarily know it to listen to the samurai-like grunts and howls coming out of the struggle for party control. But Gerald Ford did in fact redeem the Nixon moral disaster. His two-and-a-half years gave point and purpose and respectability to the efforts of those innumerable straight-arrow Republicans who had come to work in Washington and who had been let down, in fact betrayed, by their own White House. And the exceptional quality of most of Mr. Ford's own high level appointments—John Paul Stevens, Edward Levi, William Coleman, to name just a few—went a long way to erase the memory of earlier indictment and disgrace.

We will leave it to others to tote up the pluses and minuses of the Ford administration in strict program and/or policy terms. We can frankly do without reviewing it ourselves. We think it is enough to point out that Gerald Ford had an all but impossible assignment—and that he did a hell of a job.

BIRTHDAY OF DR. MARTIN LUTHER KING, JR.

HON. BARBARA JORDAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Ms. JORDAN. Mr. Speaker, on January 15 we celebrated the birthday of Dr. Martin Luther King, Jr. We celebrated in his absence. His absence is a constant reminder of his exhortation:

Sooner or later, all the people of the world will have to discover a way to live together in peace and thereby transform the pending cosmic elegy into a creative psalm of brotherhood. If this is to be achieved, men must evolve through all human conflict a method which rejects revenge, aggression, and retaliation. The foundation of such a method is love.

We have tried to do our best since Dr. King's assassination. We have made some progress. But the road ahead stretches farther than the road we have traversed.

A concrete example of the progress we have made is the participation of blacks in the last election. Six million black Americans voted last November. That is 64 percent of the registered black voters.

Massive voter registration drives increased the number of black voters by 1 million last year. The black vote proved to be the margin of victory for Governor Carter in 13 States.

Dr. King fought hard for the ballot box. He said:

> Give us the ballot and we will transform the salient misdeeds of bloodthirsty mobs into the calculated good deeds of orderly citizens.

I think he would have been pleased with the turnout of voters last November. But at the same time he would have reminded us of the work that remains to be done. He would have pointed to the registered voters who did not vote. He would have pointed to the citizens who did not register. He would have urged repeal of the statutory barriers to registering and voting.

We may glory in our triumphs. In the memory of Dr. Martin Luther King, Jr., it is the work ahead of us to which we must dedicate our full energies.

PHILIP HART: A LEGISLATOR FOR PEOPLE

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. BROOMFIELD. Mr. Speaker, with the passing of Senator Philip Hart of Michigan, we have lost one of the truly great Americans who served in the other body during this century.

I knew Phil Hart for more than a quarter of a century, and I knew him well since his election as Lieutenant Governor of Michigan in 1954 when I was serving a fourth term in the Michigan Legislature. He lived in Birmingham, Mich., which I represented in the State legislature.

From the beginning and throughout his political career, Phil was a dedicated public servant whose sympathy and commitment was with people, especially the plight of working people. The driving force in his activity involved issues and legislation that touched people's lives. During his 18 years in the Senate, he was involved in nearly every major legislative effort affecting civil rights, consumers, and antitrust policy.

In addition to his substantial and enduring record of legislation to better the lives of people, the three-term Senator, who did not seek reelection this year, had enviable personal qualities. He was gentle, just, and compassionate. He had a Puritan's sense of duty. What he believed was right, he would fight for to the very end. No one was more loyal to his ideals than he was to his. He was "loyal to the royal within." Although he was completely dedicated to his own beliefs, he respected those whose views differed from his. He had the unique gift of being able to separate the person from the views. He believed in principle over expediency which was especially evident in his political campaigns. He personified truth, dignity, and integrity.

Senator Hart served the people of Michigan and the Nation with great distinction. The American consumer, working persons, and the people of Michigan have all lost a strong and tireless advocate with Senator Hart's passing. He will long be remembered and revered for his courageous efforts in behalf of people's causes. To his widow, Janey, and his children, my wife, Jane, and I extend our heartfelt condolences and deepest sympathy.

ALONG THE ST. JOHN VALLEY

HON. WILLIAM S. COHEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. COHEN. Mr. Speaker, today I am introducing legislation in the House to extend Federal educational and cultural programs for ethnic minorities to Franco-Americans. As I state in my discussion of this legislation elsewhere in today's RECORD, Franco-Americans constitute the United States' sixth largest ethnic minority, and yet this large and deserving group is seldom recognized outside its areas of greatest concentration, in New England and Louisiana.

In the January 9 edition of the Boston Sunday Globe's New England magazine, there appeared a story by the Globe's distinguished New England correspondent, Richard H. Stewart, on the largely French community along the valley of the St. John River in northern Maine. Mr. Stewart's article captures the unique spirit and character of a part of our country that is rarely visited by outsiders.

I hope many of my colleagues and their staffs will take the time to read this excellent story, and to learn about northern Maine's Franco-American community.

The story follows:

ALONG THE ST. JOHN VALLEY

(By Richard H. Stewart)

("If you answer me that you would come for a nice mess of fiddleheads cooked with salt pork, a thick stack of buckwheat 'playes' with 'griades' or chicken stew, I'll say: 'My lad, my lass, you come from the valley of the River St. John.' "—An Acadian Heritage.)

For nearly 100 of its 400 miles, the St. John River forms the natural boundary that separates the United States and Canada and traces the outline of New England's northern frontier.

Sometimes called the Rhine of North America, its waters, in apparent conflict with nature, flow north out of Maine's vast Allagash wilderness and then easterly across the top of the state before turning sharply south and spilling through New Brunswick Province to the Bay of Fundy.

In the wide valley that is its domain, the St. John courses its way in sweeping turns past plantations, tiny villages and towns unknown to and unseen by most New Englanders:

Dickey, Allagash, St. Francis, St. John, Fort Kent, Frenchville, Madawaska, St. David, Lille, Notre Dame, Keegan, Van Buren, Hamlin.

Under the bright sun, whether attired in the green vestments of summer or laden down with winter's mantle of powdery snow, the sweep of the river valley from its bordering heights offers a majestic view.

By virtue of a treaty (Webster-Ashburton) with Canada, the south side of the valley is part of New England, but it contrasts markedly from the rest of the region.

Throughout the centuries it has been isolated by distance (more than 500 miles from Boston), a vast natural forest barrier, and a heritage that links it more closely to Normandy in France than to England.

The predominant language is French, the distinctive French of the Acadians of Nova Scotia, driven from their village of Grand-Pre 200 years ago by the British for refusing to swear allegiance to the British crown.

Entire families were divided and scattered by the British mandate. A few of them made their way up the St. John River in 15 canoes to settle the village of St. David.

From St. David they spread their kin across the length of the valley. The telephone directory for the valley overflows with French names: Cyr, Daigle, Chasee, Bouchard, Sirois, Thibodeau, Plorde, Michaud, Levesque, many of them related to the original settlers.

Henry Wadsworth Longfellow used the flight of the Acadians from Grand-Pre as the backdrop for his classic poem, Evangeline, whose opening stanza has been memorized by American school children for generations:

> "This is the forest primeval.
> The murmuring pines and the
> hemlocks . . ."

More than 95 percent of the valley residents are Catholic and Catholic churches dominate the skyline in every community. There are few Protestant churches and many Protestants cross the river to Canada to worship and, in time, to be buried.

The environment is harsh and uncompromising. In winter temperatures often dip to the minus 40s and snow depths can reach five feet.

In spring the picturesque St. John, its channel choked with layers of ice, often swells from its normal course to ravage communities in lowland areas. Logging roads on which so much of the commerce of the region depends become quagmires. Winter is the time for working in the woods.

What Mark Twain once said of New England weather seems aptly suited to the valley:

"The people of New England are by nature patient and forbearing, but there are some things they will not stand. Every year they kill a lot of poets for writing about 'Beautiful Spring'."

Distances from villages to the larger towns would seem unreasonable to outsiders. But school children in some cases travel as much as 70 miles daily by bus on their round trip to school.

There is no Yankee accent here, nor the Downeast twang so often associated with Maine. Through most of the valley English is spoken with a decidedly French accent.

Only among the people on its western flank, in the Allagash region, does the valley offer a contrast with the Acadian heritage.

Here, at the confluence of the St. John and Allagash rivers, the progeny of Irish, English, and Scottish frontiersmen make their home. The accent here also is unique to New England, closer to the dialect of America's Midwest than that of the Northeast.

They are a rugged and hardy breed of men and women whose life is closely bound to the rivers and vast forests that surround them. The trend toward industry that has reached

other parts of the valley has not touched the Allagash region.

Unlike their bilingual neighbors to the East, people in the Allagash tend to be more reserved and introverted. Here, "at the end of the blacktop road," strangers are treated courteously but with a reserve that suggests an uneasy tolerance for intruders.

If they seem isolated, they do not sense it. If their environment appears harsh, they do not seem to notice.

Mary Jackson was born in the Allagash 25 years ago. She and her husband, Hushan, 30, a woodcutter, live with their two children in a spacious log cabin on the banks of the St. John. Hushan built the cabin in a year. A single wood stove heats it, the thick log walls providing more than enough insulation from winter's bitterness.

"I don't find it harsh here," she says. "I don't know; mainly it's for the kids growing up. They can grow up like my father and grandfather. They can go out and play and I don't have to worrk about them."

Her words are echoed time and again by other women throughout the valley. This is a place for raising children.

"I like having my own land. We put in a garden every year. We go to parties, baby showers, housewarmings and get together with other couples, mainly. In the summer you go camping in the woods or canoe down the river for day trips on weekends."

Most of the valley people have no desire to go to the big cities to the south. Some have never been farther away than Presque Isle.

"I went to New York City once," says Mary. "I swore I'd never set foot in that city again. Too many people . . . I didn't like the pollution. I was scared to death. I got out of there and said 'Never again'."

This is hunting and fishing country. Two deer hang on the Jacksons' front porch. The big buck was shot by Hushan. The smaller one is Mary's.

Deer and an occasional bear hang on scores of front porches in the region during hunting season. The valley is also an excellent refrigerator in season.

Farther down the forest road, perched on a small knoll that surveys the river, is the home of Lee and Melie Mullins, both in their 80s. Lee has been a woodsman and a guide for sportsmen.

Melie sits at her sewing machine working on another patchwork quilt. She has made a hundred of them. "I gave 'em all away. Never sold a one."

Although she is 81, Melie can neither read nor write. She asks Lee to spell her name for a visitor. She is not sure how.

She was born in the Allagash wilderness and didn't have much schooling.

"Her mother had 15 children," says Lee, 86, a handsome, ruddy-faced man with a thatch of white hair. "And there wasn't no doctor; just an old woman."

For most of their years the St. John was their highway as they traveled by canoe. Now, on occasions, a neighbor will drive them into Fort Kent. If they had the money, they'd like to go to Florida. But they have no regrets.

"We can catch all the fish we want," says Lee, adding with a pixie grin, "and once in a while we steal a deer," a not-so-veiled reference to hunting out of season.

"And we can see a long way along the river in both directions," says Melie.

A sense of values that many Americans yearn for has never left here.

Far out of Melie and Lee Mullins's view, 50 miles down river, is Madawaska, the valley's largest community (Pop. 6000).

Madawaska is a mill town, the site of Fraser Paper Co., a Canadian-owned firm that also operates a plant across the river in Edmundston, Canada (Pop. 16,000).

Madawaska's main street at night reflects scores of neon lights, some of which advertise the 14 bars that seem an excessive number for the population.

But Madawaska is the Fun City of the north country, not just for the Americans but also for their Canadian neighbors across the river.

(Residents have a saying: "You do your drinkin' in Madawaska and your eatin' in Edmundston." Edmundston has better restaurants.)

Madawaska and Edmundston are kissing cousins. The kissing has led to scores of across-the-border marriages and many families in Madawaska can claim relatives across the river.

They also can claim relatives in Connecticut. Hundreds of valley natives moved there during World War II to make the "big money" from the defense plants. Most of them stayed, although a few are coming back to retire in their birthplace.

These French-Americans have a love for good times. Because they work hard, they also play hard.

Unlike the custom in the rest of the country, Tuesday and Wednesday nights are the big nights in Madawaska. Those are the nights the traveling salesmen are in town with their vested suits, shiny shoes, and expense accounts.

Richard Andrews, who manages the Gateway Motel, headquarters for the salesmen, will tell you those are his two best nights.

Most of the customers come over from Edmundston and most of them are women, many of them married. They usually arrive in groups to dance and drink with the salesmen.

To the casual viewer this would appear no less than brazen hanky-panky. But that is not necessarily the case. The women who come together usually leave together.

"These are very social people," says David Willie, 23, a native and a reporter for the weekly St. John Valley Times.

"The man-woman relationship here involves a priority that, first, is a good time. In other places people think it is sex. But their husbands know it is not sexual. They may be out bowling. It's not a using of people for selfish pleasure."

This is underscored by the fact that many of the women are middle aged and beyond.

"They basically enjoy each other and when they communicate it is real communication."

The salesmen are a link to the outside world.

Louis Cyr, 55, is Madawaska's town manager, once a supervisor at the Fraser mill. He has a native pride in the town and the valley. He cringes slightly at the mention of the numerous bars.

"This is a mill town. That is typical of a mill town. We are more wide open than they (Edmundston) are. Edmundston used to be dry. People got used to coming here for night life. It's amazing how few alcoholic problems we have here."

If you prefer the country-western flavor, there is the National Hotel, where the prime attraction is Jean Boucher, a Canadian who sings country music in French. It is a culture shock to most outsiders.

However, Jean, who accompanies himself on electric accordion and a host of electrical gadgets that make him sound like an entire band, offers some songs in English.

"My Shoes Keep Walking Back to You" and "I'm Goin' To Live It Up So You Can Live It Down" are a couple of examples.

Traveling salesmen, drinking, and dancing are not the only things that attract Canadians to the larger valley communities, such as Ft. Kent and Madawaska.

There are American appliances. They are heavily taxed in Canada, as much as 33 percent for a television set.

To beat the tax, some Canadians strap the televisions to their snowmobiles—everybody owns one—and speed them across the frozen St. John River to their homes, where they are likely to watch such American programs as Columbo—in French.

The French language is about all that remains of the Acadian past, and even that is beginning to fade, slowly submerging in the overlays of time.

Few are the mothers who can still recall for their wide-eyed children the stories of the mythical Lutins, those elves of Acadian fairy tales who climbed aboard horses in the frozen night and drove them through the fields, tangling their manes.

All but vanished is the tradition of saying the Catholic Mass in French.

With each new generation the distinctive Acadian French language, which differs from the Canadian and Parisian versions, is being lost.

A short-sighted school policy is partially to blame. For many years, to hasten the learning of English, students were punished if they were overheard speaking French during school hours.

Since abolished, the policy is one of the reasons the younger generation, who usually understand French, seem reluctant to speak it.

Fr. Zenon Charette is pastor for 330 families who attend Mass at St. Luce Church in Frenchville, halfway between Madawaska and Ft. Kent.

He insists on saying Mass in French and is the only priest in the valley who conducts all of the Masses in French. His parishioners voted to support him.

"Ninety-five percent of the people here speak French," he says. "And 40 percent of them don't understand English. I rely on them. They support this church.

"In 42 years in the priesthood, all my Masses have been in French. In three more years, I'll be 70. The one who comes after me may change that."

Almost as an afterthought, he moves forward in his chair and slaps his desk:

"We must be bilingual here!"

In Madawaska, Town Manager Cyr expresses the same concern.

"My mother could not speak English. My father could, but with difficulty. My oldest kids can speak it broken."

His gaze falls on his youngest son, Jeff, a handsome boy of 10. "But Jeff doesn't (speak French) and his kids in another generation will have lost it. We have a lot of old people who don't speak English and they have to be helped at the town offices. The girls who work there have to be bilingual."

Like most of the priests in the valley, Fr. Rauol Fecteau, pastor of St. David Church, was trained at the Grand Seminary in Montreal. French has been their mother tongue.

"We are all over 65," he says, "and ready to retire. But the bishop won't let us. Who is going to replace us? No new priest will speak French."

All of the Masses at St. David used to be in French. Now only one of the four weekend Masses is offered in French.

"The young don't talk it and I fight against it," says Fr. Fecteau. "Two languages are better than one."

Land values and an American trend back to the rural life and away from the cities are luring new people to the valley.

There is a waiting list of highly qualified teachers for many of the school systems that offer a respite from the discipline problems of urban schools and a chance to live in a rural setting where "you can go hunting or fishing 10 minutes from your home."

Longfellow wrote, "Naught but tradition remains of the beautiful village of Grand-Pre . . ."

But even the traditions that remain appear to be passing away, as did the Cyrs and Daigles who first brought them to this valley.

Only the St. John River goes on forever.

TRIBUTE TO HARRY GROMAN

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. WAXMAN. Mr. Speaker, I am gratified to be able to bring to the attention of the Members the many accomplishments of an exemplary American, Mr. Harry Groman of Los Angeles. His concerns for his fellow men are well known to leaders in finance, industry, government, education, and religious endeavors.

Until 1938, Mr. Groman held positions with State and local government agencies. Since then he has been involved in a number of businesses connected with real estate and mortuaries, serving on many clubs and committees having to do with the maintenance of high standards in his fields of endeavor.

However, it is Harry Groman's involvement with community service which leads us to do him honor. He is former president of the Sunair Home for Asthmatic Children, on the board of trustees of the City of Hope, vice president of the Eddie Cantor B'nai B'rith Lodge, vice president and member of the board of directors of the Jewish National Fund, honorary member of the Jewish War Veterans Hollywood Post No. 113, member of the Beverly Hills B'nai B'rith Lodge No. 2253, and Los Angeles Lodge 487, the Criterion Club, Eastern Star Ionic Chapter, the Guardians, Jewish Big Brothers Association, Jewish Home for the Aged, Labor Zionist Order, Mt. Sinai Men's Club, Westwood Shrine Club, Wilshire Boulevard Temple Men's Club, Boy Scouts of America, Alan Catain Leukemia Fund, director of the Variety International Boys' Club and Variety Club Tent 25, member of the Elks and Eagles, Federation of Jewish Charities, the Footprinters and the Foresters. Mr. Groman is a member of the Los Angeles Association for Jewish Education, the Jewish Publication Society of America, Los Angeles Hillel Council, the Los Angeles Jewish Community Council, the American Jewish Committee and the Religious Zionists of America. He has also joined and is active in several Shrine Clubs, and is a charter member of Moose Lodge No. 29.

A number of temples claim Harry Groman's membership; he is on the board of trustees of the Stephen S. Wise Temple and on the board of directors of the Beth Sholom Temple of Santa Monica and is a sponsor of the Harry Groman Youth Forum of the Wilshire Boulevard Temple. Altogether he has joined 16 temples, and in the past has served as board member or officer of five of these organizations.

We must recognize Mr. Groman also for his contributions and donations: A campsite to the Jewish Community, a bungalow to Camp Hess Kramer, and along with William Tamkin, gave land and buildings to the Sunair Home for Asthmatic Children.

He has established the Groman Mortuaries Rabbinical Loan Fund at Hebrew Union College, given a classroom at Hillel Academy in Los Angeles, a community social room to the Farband Community Center in Dimon, Israel, a room at Mt. Sinai Hospital, athletic equipment to the Israeli Army, and planted two miles of trees in Israel near the Gaza Strip. In memory of William Tamkin, Mr. Groman has contributed laboratories to the Massachusetts Institute of Technology, Boston, Mass. He has shared so much with so many that it is almost impossible to memorialize all of Harry Groman's generous gifts. Because of the quality of his achievements in the service of his fellow men and women. I ask the Members to join me in paying tribute to this most valued citizen, Harry Groman.

THE LESSON OF THE FRENCH GOVERNMENT

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. LEHMAN. Mr. Speaker, in 1972, the world was shocked by the cruel and vicious attack on Israeli athletes at the Munich Olympics. Eleven Israeli civilians participating in the international sports competition met their deaths at the hands of Palestinian terrorists.

The individual most responsible for this horrible crime, Abu Daoud, was recently arrested in France. His extradition was requested by both Israel and Germany. Yet unbelievably, the French Government refused both requests and allowed him to return to the Arab world to plot more crimes of terror against innocent civilians.

Men and women of conscience throughout the civilized world, including many citizens of France, have joined to denounce the French Government in giving in to Arab demands for the release of Abu Daoud.

We now have news of a second act by the French Government which shows equal if not greater insensitivity to the cause of world peace and justice. I speak of the announcement that the French Government has agreed to sell 200 of its most advanced warplanes to Egypt.

When I visited Egypt 2 months ago, I found a country overwhelmed by staggering economic and health problems. The vast majority of the people live in abject poverty. These people need peace and economic development, not warplanes.

There is an important lesson to be learned from the French Government's release of the Palestinian terrorist. When faced with Arab demands, the French Government had little hesitation in ignoring its international extradition agreements and the 1976 Anti-Terrorism Treaty which it had signed.

As movement continues toward a settlement in the Middle East, both Israel and the United States will learn from this lesson the hazards of relying on international agreements and outside guarantees.

THEODODE SORENSEN WITHDRAWS AS CIA DIRECTOR-DESIGNATE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. McDONALD. Mr. Speaker, during the past 3 weeks I have made known my strong and principled criticism of the nomination of Theodore Sorensen as director-designate of the Central Intelligence Agency. I said that I believed his nomination was against the best interests of the United States, and my beliefs were reflected by many nationally recognized conservative groups and individuals, by people from the labor movement, by former members of the intelligence community, and by veterans organizations who were anxious to help me stop this nomination.

We involved ourselves in no whispering campaign; we examined Mr. Sorensen's public record and prepared testimony to be delivered in public before the Senate Select Committee on Intelligence.

In view of Mr. Sorensen's withdrawal of his name for consideration, there was no opportunity to present this testimony. The possibility exists that rumor and innuendo may be attached to our efforts; and to preclude such wrong thinking and to present the documentation of the stand we took, I attach a copy of this testimony for the information of my colleagues:

TESTIMONY OF REPRESENTATIVE LARRY McDONALD OF GEORGIA, BEFORE THE SENATE SELECT COMMITTEE ON INTELLIGENCE, THEODORE SORENSEN NOMINATION, JANUARY 17, 1977

Mr. Chairman; Members of the Senate Select Committee on Intelligence: I am Larry McDonald, Member of the U.S. Congress for the 7th District of Georgia.

I have asked for this opportunity to testify on the nomination of Theodore Sorensen as Director of the Central Intelligence Agency only after a great deal of thought. All of us on both sides of the Hill, and on both sides of the aisle naturally respect the rights of a new President to select his own team. In most cases where we have disagreed with the choice of a President it has not been appropriate to ask that the nominee not be confirmed.

However, in a case where the post is high and sensitive, such as that of Director of the CIA, and I believe the designee is both unqualified and a danger to the security of the United States, I am compelled to speak out.

The CIA serves as the eyes and ears of the President of the United States throughout the world. CIA officers and their agents provide valuable information to our government sometimes at the risk of their lives. In a complex world, faced with the activities of hostile intelligence services, our CIA plays a role in the defense of the United States.

The Director of the CIA must be a man with absolute loyalty to the U.S. and must have unquestionable integrity. He should be thoroughly experienced in the techniques and principles of intelligence gathering. The Director of the CIA should have proven administrative and leadership capabilities: It is vital that he should be a person whose appointment will improve the morale of a government agency that in recent years has suffered serious setbacks and difficulties.

I am speaking out in the case of Mr. Sorensen not merely because I disagree with him about matters of public policy, but because I believe that his confirmation would be detrimental to the best interests of our country.

Theodore Sorensen is without a doubt the least appropriate person to be proposed as Director of the CIA.

In addition to his widely recognized lack of administrative experience, he has an equally obvious lack of experience with matters relating to intelligence gathering. Further, serious questions regarding his personal integrity, his discretion and scholarship exist which further disqualify him for this post.

I must share with you the concerns of many loyal and patriotic Americans that Mr. Sorensen, before and during the Korean war, was a conscientious objector: It is my understanding that he retained this status until he had reached an age when he was no longer eligible for military service. By that time he was already on the White House staff.

As late as 1970, when the war in Vietnam was at its height, Mr. Sorensen brought suit against the U.S. Government on behalf of a man who also sought to shirk his military obligations.

Mr. Sorensen indicated at that time he was not merely serving as an attorney, but was also acting as an advocate for a program to sabotage the draft. In this endeavor he collaborated with members of the National Lawyers Guild, the Institute for Policy Studies, and the American Civil Liberties Union.

The National Lawyers Guild has been cited by the House Committee on Un-American Activities as the "foremost legal bulwark of the Communist Party;". It has openly boasted of its support for armed struggle by terrorist groups in the United States, and has been a major U.S. contact for Marxist-Leninist terrorists throughout the world.

The Institute for Policy Studies, an ultra-left think tank based in Washington, D.C., seeks to bring about revolutionary change in our country by a variety of means including political subversion and terrorism. Over the past two years I have provided evidence to my colleagues in the House concerning the role of this institute as a support apparatus for international and domestic terrorist and violence-oriented groups.

The American Civil Liberties Union, which includes both serious defenders of civil liberties and a wide range of irresponsible left-wing elements including Marxist-Leninist totalitarians, stated at the very time when Mr. Sorensen was working with them on that draft case that it had made "the dissolution of the Nation's vast surveillance network a top priority."

An example of Mr. Sorensen lending his support to those who would betray our country was shown in his 1973 testimony on behalf of Daniel Ellsberg and Anthony Russo who stole and disseminated a collection of classified government documents that came to be known as the Pentagon Papers.

In an affidavit made available to Ellsberg's lawyer, Leonard Boudin, whose firm has since 1961 continuously represented the brutal communist regime of Fidel Castro in Cuba, Mr. Sorensen made a number of highly significant statements.

He affirmed that "I removed 67 cartons of papers, documents and files of all kinds (7 cartons of which were classified) from my office in the White House upon my departure in February of 1964."

Subsequently, Mr. Sorensen used these documents to write a book for his personal profit, and to obtain income tax deductions.

Our experiences with former President Nixon, and more recently with Secretary of State Henry Kissinger, have demonstrated a strong belief on the part of the American people and their elected representatives that documents produced on government time and paid for by the government belong to the Government, and not to any private individual.

In the case of President Nixon and Secretary Kissinger, the documents concerned were produced by them: in the case of Mr. Sorensen, he has admitted that the documents were produced by others and had come into his possession by reason of his White House post.

In his Pentagon Papers affidavit, Mr. Sorensen stated that he was "very familiar with the United States Government's military, diplomatic, and intelligence operations, policies and practices . . ." He also said that "I regard myself as a devoutly loyal citizen" (and we presume he meant of the United States). Yet, Mr. Chairman, when Mr. Sorensen was called to the stand by Ellsberg's lawyer, he reviewed two pieces of one volume out of many, many parts, and stated on oath that the release of this material created no security hazard to the United States.

Mr. Sorensen was shown Volume IV, B.5 of the Pentagon Papers entitled "Evolution of the War, The Overthrow of Ngo Dinh Diem, May to November 1963." On oath, Mr. Sorensen answered "No" to the question, "Could the information in the exhibit have been used to cause injury to the United States in relation to the national defense if released in 1969."

To the further question, "Could the information in the exhibit, if released in 1969, have been used to the advantage of a foreign nation with respect to the defense of the United States," Mr. Sorensen replied, "Certainly not."

This view was not shared by either the Department of Defense or the Armed Services Committee of the U.S. House of Representatives. They deleted from the text, printed by the Committee in 1971, pages XV, XVI, XXII, XXIV, 42, 43 and 61 from the very section of the Pentagon Papers that Mr. Sorensen, as a self-proclaimed "expert" specifically considered innocuous.

But those documents contained copies of cable messages which had been transmitted in code, including some marked "Top Secret for the President's Eyes Only." A foreign intelligence service monitoring our coded transmissions could compare the coded versions with the clear text and be immensely aided in its attempts to break our cryptographic secrets and techniques.

In yet another affidavit in the Pentagon Papers case, Mr. Sorensen indicated that our country was not harmed, but actually benefited from the theft and publication of these documents. Yet Part VI, C. 1, 2, 3, and 4 of these documents were not published by the Armed Services Committee of the House of Representatives because to do so would have identified valuable technical sources behind the Iron Curtain.

In view of this, how can our country have possibly benefited by the theft and dissemination of the Pentagon Papers other than in the highly subjective view of Mr. Sorensen and his friends?

As part of his law practice, Mr. Sorensen has represented several foreign governments including Zaire, the former Belgian Congo; Iran; Sierra Leone; and the Canadian province of Newfoundland as their agent in the United States. At a press conference on December 22, 1976, Mr. Sorensen said that he had not registered as a foreign agent on the grounds that "there is an exemption for legal services under the Foreign Agent Registration Act."

However, I believe that the exemption to which Mr. Sorensen refers is related to and confined to those "who engage in the legal representation of a foreign principle." This means that the exemption is for those whose sole activity on behalf of a foreign principle is in the courts or before administrative tribunals.

Yet in August 1969, in a televised appearance on the David Frost Show, Mr. Sorensen said, "I'm not a trial lawyer; I don't get involved in that kind of problem."

Serious doubts exist regarding Mr. Sorensen's integrity. Some of the doubts were created by his own statement in his 1965 book, "Kennedy," in which he admitted inventing quotations and attributing them to our founding fathers.

Mr. Chairman, an ability to do creative writing is not necessarily an asset to the Director of the CIA. The ability to fully and truthfully report information gathered from a variety of sources would be seriously impaired by having too creative an imagination.

Further doubts on Mr. Sorensen's integrity were created as a result of his December 22, 1976 press conference in Plains, Georgia, when he said that he served on the Executive Committee of the National Security Council under President Kennedy.

However, in a 1973 Pentagon Papers affidavit, Mr. Sorensen stated, "I attended, after the Bay of Pigs, virtually all of the formal meetings of the National Security Council. I was not a statutory member but was asked by the President to sit in and observe. I rarely participated actively in these meetings but was asked by the President to give him my views in informal get-togethers at the end of the day." This is hardly holding the position of a member of the NSC Executive Committee, and indicates a lack of candor and qualifications by Mr. Sorensen.

Mr. Chairman, the entire world is watching this committee. Your decision on Theodore Sorensen will affect not only the future of the CIA, but the relationships between our country and the other nations of the free world. Confirmation of Mr. Sorensen, a man not qualified to lead the CIA and whose lack of integrity and scholarship is known to all, will erode still further the ability of friendly nations to cooperate with us in matters of mutual security

In the face of world wide terrorist activities, our country needs the cooperation of friendly intelligence services in gathering information to cope with this serious threat. If we are denied this cooperation because Mr. Sorensen had been allowed to assume this sensitive position, the Senate of the United States may be viewed to blame for not exercising its responsibility on such a vital matter.

In summation, Mr. Chairman, when considering the positive qualities required for the post of CIA Director, Mr. Sorensen lacks the assets of expertise in the principles and techniques of intelligence gathering, of any administrative experience, and of any demonstrated leadership qualities.

In negative qualities, I believe Mr. Sorensen's record demonstrates that he lacks integrity and scholarship, and that he is a highly political and partisan person who has consistently demonstrated a reckless disregard for America's needs in foreign policy and intelligence.

On these grounds I respectfully request that Mr. Sorensen not be confirmed as Director of the Central Intelligence Agency.

THE BALANCE OF POWER—PART IV (XV-a): IS THE UNITED STATES SURVIVING ON STALE STRATEGIC CONCEPTS?

HON. JOHN BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. BRECKINRIDGE. Mr. Speaker, strategy consistently takes a back seat to tactics and physical strength on Pennsylvania Avenue, in the Pentagon and at Capitol Hill. Critics contend that we overstress budgets and forces, instead of sound ideas, spending billions for items of marginal worth, while imperative interests go begging.

That unsatisfactory approach to national security may have sufficed in the past, because no foe could challenge us successfully, but current trends in the Soviet Union proclaim that a time for a change has come.

Unfortunately, fresh strategic concepts surface more by accident than design in the United States; decisionmakers routinely discard options without serious study, if they seem politically sensitive; committee solutions and compromises kill off many others.

The great national debate called for by Secretary Kissinger is not taking place in private, much less in public. Parochial interests in the Department of State and Defense, the military services and the committees of Congress play with separate pieces of strategic puzzles, but no one puts the pieces into perspective; the National Security Council, which is so charged, concentrates on crisis management, not creative planning.

This subject was first discussed contemporaneously in the public press by Henry S. Bradsher of the Washington Star, who published a two-part survey during the Christmas holiday season on December 29 and 30, when Congress was not in session. I commend it to my colleagues, and reproduce his thoughts here by way of introduction to the remainder of my series on the United States/Soviet Balance(s) of Power. The first part of Mr. Bradsher's article follows:

[From the Washington Star, Dec. 29, 1976]

IS THE U.S. SURVIVING ON STALE STRATEGIC CONCEPTS?

(By Henry S. Bradsher)

The world keeps changing. The foreign policy and military situations facing the United States today are very different from those of two decades ago.

The old simplicity of a nuclear confrontation between a Soviet-led East and an American-led West has blurred into the complications of many additional factors of international relations. Weaponry has new, more complex capabilities of nuclear implications. Vietnam and other nonnuclear wars have affected U.S. perceptions of foreign affairs as well as willingness to take actions abroad.

But one thing has changed only little, U.S. strategic concepts about surviving in the world have scarcely progressed beyond the 1950s.

There is a small, increasing circle of persons in Washington that thinks this is potentially perilous for the nation's security. Concepts that are not adapted to present realities lead to inadequate or just plain wrong policies without much awareness of the potentially dangerous mistakes.

But the policy-makers are often too caught up in immediate problems to re-examine the basic ideas that guide them. Some observers think that only strong support from the White House can encourage fresh conceptual thinking—but not guarantee it, since it takes more than just orders, it takes inspiration.

The just-disclosed revision by the U.S. intelligence community of its estimate of Soviet military intentions—crediting the Kremlin with seeking military superiority over the United States instead of wanting only parity—emphasizes the need for inspiration.

The easy reaction by the United States to this new evaluation would be to seek more and better of the same old military answers to perceived threats. In fact, however, some key pieces of the framework of strategic concepts upon which the old answers were built are being challenged by the Soviet refusal to accept the theoretical bases of American ideas.

The ideas that developed in the '50s have become part of the common language of world affairs. The balance of terror, mutually-assured destruction and other megadeath concepts are the accepted background to current thinking both within the government and among the general public.

Such ideas were developed by intellectuals with well known names like Henry A. Kissinger and Herman Kahn, while little-known ones like Thomas C. Schelling contributed to concepts of managing superpower disputes and other aspects of living with nuclear weapons. They were influential in shaping such major American policies as the flexible military response concept of the Kennedy administration, which sought to fill the hole left by the presumed unusability of nuclear weapons, and the nuclear deterrence system.

There has been a tendency in recent years in both governmental and academic circles to assume that all of the strategic thinking has been done and it is now only necessary to implement ideas from "the golden age" of the '50s and early '60s. Attention is focused on foreign political and military problems in terms of budget cycles plotted against the background of known strategic concepts, without any effort to find fresh ways to approach those problems.

Some of the great names from that golden age, like Kahn and Schelling, think that the ideas that lie behind U.S. security have gotten out of date. The author of a book on strategy who lately has begun stimulating some military and civilian minds on the subject, John M. Collins of the Library of Congress, contends that the United States is surviving on "stale strategic concepts."

It has survived so far because the competition has not been too tough, Collins says, but the military balance is shifting away from a confident American control of its destiny.

Simply buying every conceivable type of new weapon is not the answer, according to Collins. The man in the street has a vital interest in up-to-date, cohesive strategic thinking that insures his security without wasting his money on unnecessary weapons whose long-term need has not been thought out.

A member of Secretary of State Kissinger's brain trust who deals with Soviet-U.S. relations, Dr. Helmut Sonnenfeldt, says the changed situation today "calls for new integrated thinkers. The rising cost of defense, the vulnerability of land-based weapons systems, the possibility of radically new weapons like death rays, the increasing 'third world' complications to the old bipolar relationship—all these mean that we cannot rest on our intellectual oars."

A number of high-level officials say, however, that it is impossible for the government itself to come up with the theoretical approaches to military and political affairs which could become the strategic background to current policies. The government is organized to cope with obvious problems, not to originate ideas.

One official finds "a generalized ill will in the government today toward the think tanks" that played a major role in the 1950s, and, although many universities have developed programs in military and political policies during the last two or three decades, an alienation from anything tainted by nuclear holocaust thinking has developed since the beginning of the Vietnam war.

The gap has begun to bother some academics. Paul Seabury, a political science professor at Berkeley, is trying to organize a conference on strategic thinking.

"The United States has been extrapolating from strategic concerns and doctrines of the 1950s," Seabury says. "The whole concept of strategy has been hijacked" because most people associate it with nuclear weapon usage rather than its more comprehensive meaning of fitting means to political goals.

Seabury thinks a fresh approach is needed by "people who don't have the old hangups" of focusing on superpower nuclear war. He hopes to gather together some military historians, some practicing professional military people and, for balance and perspective, some foreigners.

One of the "golden age" thinkers, Albert Wohlstetter, who wrote about "the delicate balance of terror," says many of the thinkers who attended a 1960 conference had, by the time of a 1974 repeat meeting, become ideologically committed to arms control goals or weapons competitions or other things. That made them sterile as conceptual strategists.

Schelling, who contributed bargaining theory to the arsenal of U.S. strategy, says it was easier to do conceptual thinking in the '50s when the strategic effects of World War II were fresh and the need to assimilate them was generally recognized.

Vietnam turned off young intellectuals, Schelling notes, and the Nixon administration cut down the fertilizing interplay between government and academic institutions which he, Kissinger and others developed. The leak of the Pentagon papers through a research institute increased the administration's hostility toward outside thinkers.

Besides, Schelling says, "we just dealt with a rather gentlemanly duel" in thinking out Soviet-American nuclear relations in the '50s, whereas the world now is vastly more complicated.

Kahn, the ebullient "futurologist" who has delved into many fields since he was "thinking about the unthinkable" of nuclear warfare, says that in the 1950s "we were arguing concepts that tens of able people ever take strategic thinking seriously, on thousands of others" as they were being developed. But most of what passes today for strategic thinking is "top-of-the-head bull sessions," he says.

A gap in conceptual thinking about military-political problems since the early '60s is really just a return to normal, since few people ever take strategic thinking seriously, Kahn says. The only two problems that he feels have been taken seriously since the '60s are reducing the vulnerability of strategic forces so as to protect retaliatory capability and reducing chances of accidental nuclear war.

But Kahn says there are "about 200 other problems that are important." He is refocusing his thinking from civilian problems in order to work on two.

One is the concept of prewar mobilization by other countries when a situation like Hitler's military buildup for war develops. The other is the problem of living with a nuclear-armed world, since Kahn feels the ques-

tion is no longer one of preventing nuclear proliferation but of managing international relations when 10 or 20 countries have A-bombs—which Kahn expects within 13 years.

Kahn finds a "remarkable" lack of interest in "the broader issues," however. Nobody in the government cares enough about them to focus attention on seeking ways of dealing with them.

Collins argues that it takes a personal recognition by the president of the importance of strategic thinking to get any real support for it. Unless the top of the government encourages efforts to develop original approaches for old problems, nothing will happen, he says.

Collins, an Army colonel who taught at the National War College before retiring and going to work for the Library of Congress' Congressional Research Service, says U.S. defense planning has gotten its priorities backward: Military budgets and the armed forces' postures that go into them are stressed without proper examination of the strategic thinking that should shape them.

From his cramped, book-lined office, Collins is beginning to have a quiet influence. His study of the Soviet-U.S. military balance published by the Senate Committee on Armed Services last February was ignored by most media, but it had an impact on members of Congress who deal with Pentagon budgets.

While working on a broader look at the military balance, Collins has been preaching to a growing audience of key government officials, top generals and others on the need for questioning old strategic assumptions.

But the American military establishment, and the nation as a whole, is "oriented on action, not ideas," Collins says. As a result, "strategy takes a back seat while military schools teach tactics. Nonconformists are penalized, not praised, and no one, in or out of the establishment, stresses creative thinking in the field of strategic concepts."

Collins' influential study of the Soviet-U.S. military balance impressed congressmen with its comparisons of tanks and planes. But Collins tries to focus attention elsewhere. "Raw statistics . . . are significant only in context," the study says.

"What each side has is less cogent than what U.S. armed forces can do on demand, despite Soviet opposition." This begins to edge into the ignored strategic field.

There are units in the Pentagon that are trying to think ahead, particularly on future technology and its effects on American military interests. The Defense Department recognizes their limitations, however, and has sought to use outside thinkers the way Kissinger and others were used as consultants in the '50s.

A senior Pentagon official familiar with the subject says the bureaucratic system of contracting out studies fails to attack the really big conceptual problems, however.

CHUCK GRASSLEY OF IOWA PROPOSES WIND EROSION CONTROL

HON. CHARLES E. GRASSLEY

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. GRASSLEY. Mr. Speaker, on July 1, 1976, I introduced legislation to encourage the establishment of wind erosion control and wildlife habitat areas on the Nation's farms. Though time was too short to secure passage of this bill, support for the legislation was substantial and broadly based.

Valuable topsoil is lost each year due to inadequate protection from the wind and this loss translates into millions of dollars of food which could be purchased by domestic consumers or purchasers abroad. All forms of wild life could be provided homes through the establishment of such areas, which thus would insure that species of animals common to particular areas of the country are protected and continue performing their function in nature's cyclical processes. Such areas will, in particular, insure that ample numbers of predators are available to keep under control those natural scavengers that destroy a farmer's crops. My bill will thus promote the protection of a variety of natural resources so that they might continue their role in natural processes.

Each of my colleagues will shortly receive a letter urging cosponsorship of this legislation. Judging from the support my bill has received from average citizens and conservation groups, I believe passage has a good chance this year.

THE 85-PERCENT POLLUTION

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. LENT. Mr. Speaker, while the public protest over the epidemic of oil spills we have seen in the past month is well-deserved, we in the Congress would do well to mind the fact that some 85 percent of all marine pollution comes not from tanker accidents, but from routine tanker operations—the cleaning of tanks, pumping of bilges, "minor" leaks, and jettisoning of excess fuel.

In this regard, I would like to commend to my colleagues an article which appeared in Newsday on Monday, January 10, 1977, written by Mr. Jim Toedtman of Newsday's Washington Bureau:

OIL SPILLS ARE SMALL PART OF THE PROBLEM

(By Jim Toedtman)

WASHINGTON—While dramatic oil spills at sea have dominated the headlines recently, a greater threat to the environment is posed by standard operating procedures of the world's tanker fleet.

About 142 million gallons of crude oil is spilled into the oceans each year as a result of tanker accidents. By comparison, normal procedures are responsible for the discharge of 711 million gallons a year, according to the National Academy of Sciences. Capt. Herbert Lyons of the Coast Guard's Merchant Marine Safety Office characterized such routine procedures as intentional pollution.

As if that were not enough of a problem, a series of developments in tanker traffic raises the prospect of greater oil-pollution problems. The 1977 log of oil tankers that have run aground, split or sunk is a reminder of the large numbers of tankers plying the world's waterways and of the huge quantities of oil they carry.

Roughly two-thirds of the 115 to 125 billion gallons of oil produced each year is shipped by tanker. On any given day, there are about 1.3 billion to 1.5 billion gallons of oil on the high seas—300 million gallons a day arriving in U.S. ports.

The intentional pollution that Lyons mentioned most often involves tankers after they have unloaded their shipments. To balance and help stabilize the large and unwieldy craft and also to clean the emptied oil tanks, tankers pump large quantities of water on board. Then, when the ships are at sea, or about to reach their home ports, they discharge the water-oil mixture back into the ocean. (Frequent visitors to Long Island beaches are familiar with miscalculations that regularly leave long stretches of beachfront littered with oily film and globs of crude oil.)

The Argo Merchant disaster off Nantucket (7.6 million gallons of crude oil), the grounding of the Olympic Games in the Delaware River (134,000 gallons), and the apparent sinking of the Grand Zenith (8.2 million gallons and 38 crew members) south of Nova Scotia have raised anew the issue of tanker safety and pollution control. Environmentalists see the incidents as an occasion to push for new and tougher regulation of tankers, and they will have a forum in public hearings scheduled to begin tomorrow in the U.S. Senate.

Several proposals have been made—and in some instances implemented—that would require design changes, new cleaning techniques, improved navigational and communications machinery and improved training.

"The largest impact right off could be made if we eliminate the intentional discharge of oil," said Lyons. "That's what we've tackled first."

Among the proposed new regulations and procedures would be requirements for double bottoms or double hulls which would add an extra layer of protection in case ships ran aground. The extra layer would also provide ballast space.

But such regulation efforts have been caught in a maze of conflicting pressures. Environmentalists criticize the Coast Guard for not being more aggressive and for basing the regulations on program technology instead of requiring improvements in pollution control technology. Industry criticizes any regulations as having little impact on the overall problem of oil pollution.

At the same time there are several imminent developments that will add substantially to the oil transportation problem:

Alaskan oil will be transported to the West Coast by tanker.

While worldwide demand has been reduced by recession, U.S. imports continue to increase.

Tankers will be carrying the oil imported to replace that transported from Canada by pipeline. Canada has pledged to end oil exports to the United States by 1981.

According to current Interior Department projections, oil produced in the Georges Bank oil field east of Long Island will be transported by small, 18,000-ton tankers.

Approval of two deep-water ports in the Gulf of Mexico means increased traffic in United States waters by supertankers, which have already begun transporting oil to western ports.

LETTER OF PROTEST AGAINST THE FRENCH GOVERNMENT

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. LONG of Maryland. Mr. Speaker, I have joined many of my colleagues in the House in sponsoring a resolution condemning the recent action of the French Government in releasing without trial the accused murderer of 11 Israeli Olympic athletes in Munich in 1972.

However, my own deep sense of outrage at this unconscionable action has prompted me to write a letter of protest to the French Ambassador to the United States. The text of my letter is included here in full:

HOUSE OF REPRESENTATIVES,
Washington, D.C., January 13, 1977.

His Excellency JACQUES KOSCIUSKO-MORIZET,
Embassy of France, Belmont Road NW., Washington, D.C.

DEAR MR. AMBASSADOR: The release by your government of Abu Daoud, suspected in the 1972 Munich Olympics massacre, is one of the most cynical acts of a democratic republic in my lifetime. The release of this accused murderer, without trial, in the face of demands from both Israel and the Federal Republic of Germany for his extradition, defies standards of international conduct and makes a mockery of international law. Perhaps needless to say, the timing of the release to coincide with the sale of 200 Mirage jets to Egypt does nothing to enhance France's reputation as a moral leader.

It is especially disturbing that France, a signatory of the 1976 Anti-Terrorism Treaty, has so disregarded the principles of that treaty. At a very minimum this action encourages future terrorism and violence. In words which may have a colloquial counterpart in your country, the chickens France has hatched may some day come home to roost.

Sincerely,

CLARENCE D. LONG.

DEATH OF OCTAVIO GONZALES: A TRIBUTE

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. GILMAN. Mr. Speaker, on December 13, 1976, another dedicated special agent of our drug enforcement agency was slain only hours after $16 million worth of Colombian marihuana was seized in Mount Pocono, Pa. Although there is no known connection between the slaying in Colombia, and the seizure of 8 tons of marihuana in Pennsylvania, the eerie parallels between the two incidents further illustrate a fact which has been characteristic of the progress in America's war against drugs: For each step that is taken forward, there is, inevitably, a step backward, with increasing obstacles and roadblocks undermining and negating the progress of our arduous fight to curb and eradicate narcotics abuse and trafficking.

Our war against drugs is not only costly and deadly, but it is unlike any other war in which the United States has been engaged. We are fighting a nebulous, highly organized and menacing foe which threatens the very fiber of American existence, as it debilitates and cripples our youth. This war is not fought with machines and planes and guns alone, but with tender lives and minds at a cost which cannot be calculated just in dollars, or bombers lost, or ships sunk. The enemy which threatens and succeeds in its demoralization and utter negation of life has no central headquarters, operates from no solitary place, and is not indigenous to any one country. The enemy is enmeshed in a criminal network which permeates many nations, a network which knows no national boundaries, truce agreements, treaties, an enemy to which no appeal for human decency can be made.

The war on drugs claims not only thousands of young lives annually, but also claims the best law enforcement agents that our Nation produces, the finest and bravest of them. There are no medals, no purple hearts awarded in the war on drugs, and words seem to pale in describing the meritorious, valorous conduct of our agents.

There is no glamor in a drug enforcement agent's work, no quick fame, no wide acclaim. Indeed, many Americans live their lives without any recognition of the dangers and violence that such men and women come face to face with each day, and not knowing that these drug agents daily put their lives on the line, and that random, brutal deaths occur without reason, without purpose.

The death of Agent Octavio Gonzales is one such death which occurred, without purpose, seemingly without reason. Because his death was pointless, the life that Mr. Gonzales led and offered, takes on so much more significance. It was a life filled with valor, and a sense of justice, a life which assumes truly heroic proportions at a time when heroism in life too often means the consummation of life in a heroic death.

Three other DEA agents were killed in the line of duty this past year, each exemplifying the dedication and bravery of all DEA agents. These four outstanding men became victims in the treacherous drug war which claims thousands of lives yearly.

Octavio Gonzales was highly respected among his peers and his friends. The Miami Herald in its editorial of December 16 praised him as "a highly competent law enforcement officer with a worldwide reputation * * * he put more than 40 drug traffickers behind bars, received innumerable threats, and at last suffered death from a prime source about which there can be do doubt."

His wife Mariella and children that he leaves behind, Mariella, Sandra, and Catherine must be proud in a special way of the manner in which Gonzales performed his duties, of the courage with which he fought, the hard fight he waged in the protection of all Americans, and for the prevention of countless, senseless deaths. Although his death was senseless, brutal and unnecessary, Mr. Gonzales' life was not lived in vain. It is a chapter from which others can learn: about valor and dedication, about the struggle that men wage to insure the quality of life, about the subtle and unseen ways in which Americans are protected against the terrible foe called narcotics.

Mr. Speaker, I urge my colleagues to give particular note to Agent Gonzales' life and death as worthy examples of the highest of human qualities. There is so much for us to do in our war against narcotics traffickers. It is unfortunate that his death must serve as a gruesome reminder of that fact. We have seen pictures of our young Americans in the throes of drug addiction, the pictures of children and adolescents huddled in doorways, in the alleys of our cities; the pictures of mothers selling narcotics on the street with her children by her side: the pictures of the burnt-out, half-lived lives, wasted potentials, the gone talents of our youths. We have seen all of these, some of these first hand, and their memory haunts us.

It is not too late for us to act. Octavio Gonzales sacrificed his very life in this fight. Let his dedication and his spirit encourage us to devote ourselves to this noble, worthy cause of stamping out illicit drug traffic and drug abuse so that we can insure peace of body and mind to our people.

TRIBUTE TO HARRY BLAIR

HON. WILLIAM M. KETCHUM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. KETCHUM. Mr. Speaker, today I ask that my colleagues join with me in paying homage to the memory of a truly great man, my good friend, Mr. Harry Blair.

Harry's recent passing will leave a great void in the educational field of Bakersfield, Calif., and I would like to take a few moments to recognize his many contributions during his dedicated lifetime.

Harry Blair served with distinction as superintendent of schools in Kern County, Calif., for 13 years. In total, his career with the county's educational system spanned 28 years, and it may truly be said that he gained the respect and admiration of all who were privileged to know him and to work with him. His contributions to education began in 1941, when he taught fifth grade in the Reedley Elementary Schools. Harry interrupted his career during World War II, serving his country in the U.S. Army Air Force.

Harry will be remembered not only as a man who gave much to education, but also as an outstanding contributor to his community. In addition to his participation in various professional organizations, Harry served in numerous capacities with the American Cancer Society; the United Fund; the Crippled Children's Society; the Bakersfield Junior Chamber of Commerce; the American Legion; the Bakersfield Chamber of Commerce, and the Rotary Club. He was a man who was never too busy to offer his best whenever and wherever he was needed.

I offer my sincere condolences to his widow, Rosemary, and to his two sons, Paul and Harry, Jr. I know that my colleagues will join me in paying tribute to this fine man, whose shoes will be very hard to fill. I, for one, will miss him greatly.

THE DEPARTING PRESIDENT

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. CONABLE. Mr. Speaker, there is much public comment about the impending change in national administration and the stature of departing President Ford. David Broder, one of our most perceptive observers, wrote about this yesterday and I wish to submit his article for the attention of my colleagues. I share the views so well expressed by Mr. Broder:

THE PRESIDENT THE COUNTRY NEEDED

(By David S. Broder)

In an odd, inexplicable way, the truth has begun to dawn on people in the final days of Gerald R. Ford's tenure that he was the kind of President Americans wanted—and didn't know they had.

After a decade of presidential excess, they wanted a man of modesty, good character, honesty and openness. They wanted a President who was humane and prudent, peaceable but firm. Especially, they wanted one uncorrupted by the cynicism and lust for power that they had come to associate with Washington politicians.

Jimmy Carter's campaign was the successful projection of these idealized qualities of the post-Watergate President. It was also a series of promises—to reform the government, end bureaucratic waste, provide an energy policy, curb the nuclear arms race, cure unemployment, etc.

How well President Carter measures up to these character tests and how many of his goals he achieves remains to be seen.

But Gerald Ford—even while acknowledging in his last State of the Union address and in a series of valedictory interviews his disappointments in the fields of economics, energy and governmental reform—gave people a quiet reminder that he has been exactly the kind of personality they prayed to find in the presidency.

He did so in a variety of ways, large and small, not least of which was his demonstration of equanimity in the face of his first—and any politician's greatest—defeat. Both The Washington Post and the New York Times headlined the fact that Ford was "at peace" with himself and his fate, as if that were remarkable for a departing President.

And, of course, is. Two of his three most immediate predecessors had left the White House as political exiles; the third had been murdered.

Ford leaves on a tidal wave of good will, of which the cheers in the House chamber the other night were vocal testimony. As he recalled in his farewell interview with The Post, he had originally planned to wind up his public service this January by making the 94th Congress his last as the representative from Grand Rapids.

As it works out, he is leaving only 17 days "behind schedule," having served 29 months as President and with the country the better for his service.

He leaves with the nation at peace, the international scene as tranquil as it is ever likely to be, and the American people more united and confident than at any time in a decade.

Some of that is luck. Some of it is the healing effect of time on the scars of Vietnam and Watergate. But Gerald Ford also leaves the presidency itself healthier than he found it, and that is because he thought hard about what was needed there—and did it.

Take, for example, the matter of the President's relationship to his Cabinet. One central aspect of the "imperial presidency" was the subordination of Cabinet officers to the arrogant whims of the White House staff.

Jimmy Carter has talked a great deal about his desire for strong, autonomous Cabinet officers, and in the final days before his takeover, was still trying to determine what kind of White House staff arrangements would encourage that decentralization of decision-making.

Yet, as James E. Connor, Ford's staff and Cabinet secretary, pointed out to a visitor the other day, almost no one has noted the extent to which Ford himself already demonstrated how to solve that problem.

Yet it is a fact that the outgoing Cabinet has been spared interference from officious White House staff members either in their departmental decision-making or in their access to the President.

Ford cured this ill by quite conscious, shrewd strategies. He required, for example, that no communication from a Cabinet member to the President could be delayed more than five days for White House "staffing." If the staff comments weren't ready in that time, the Cabinet member's paper went into the President's reading file on its own, rather than being pigeonholed endlessly in the White House bureaucracy.

Ford himself set the example for revolution of decision-making. In the face of heavy pressure to bring all major issues to the White House, he insisted, for example, that the Secretary of Transportation should decide the Concorde landing-rights question and that the Attorney General handle the government's response to Boston's antibusing violence.

In these, and other ways equally important, he demonstrated in practice the virtues of which Carter spoke.

Oddly, neither he nor his advocates made much of this fact in the recent campaign. But Gerald Ford can leave office with some confidence that history will record that he was, in truth, the President the country needed at this time and knew that it wanted, even by another name.

THE FISCAL YEAR 1978 BUDGET—AN ARGUMENT FOR FURTHER TAX REFORM

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. VANIK. Mr. Speaker, the President's fiscal year 1978 budget which has been released today provides some interesting data on the burden of taxation in our society. The following table appears in the Special Analysis document, page 8:

TABLE A-2.—FEDERAL SECTOR RECEIPTS AS A PERCENT OF GNP

Description	1948 actual	1958 actual	1968 actual	1978 estimate
Personal tax and nontax receipts	8.2	8.2	8.6	8.7
Corporate profits tax accruals	4.6	4.0	4.0	3.2
Indirect business tax and nontax accruals	3.2	2.6	2.1	1.3
Contributions for social insurance	1.9	2.8	4.6	6.7
Total receipts	17.8	17.7	19.3	19.9

As the table shows, in 1948, the various forms of business taxes constituted 7.8 percent of the GNP while individual and social security taxes formed 10.1 percent. In 1978, business taxes are estimated to be 4.5 percent of the GNP, while individual and social security taxes have risen to 15.4 percent. The largest decline in the percentage of business taxes occurred during the past 10 years.

This table points to the need for a clearer debate in our society on the burdens of taxation and where we should be going in tax policy. For 5 years, I have conducted a study of the effective rate of tax paid by America's major corporations. The average effective rate has been declining and for America's largest corporations, it is about half the statutory rate of 48 percent. For years, I have said that many corporations are becoming "freeloaders," contributing less and less to the support and defense of the Government which protects them.

The fiscal year 1978 budget proposes a "savings" of $835 million by terminating the earned income credit. At the same time, President Ford's budget documents talk about extending the 10 percent investment tax credit, now in place through the end of 1980. I believe it is this philosophy—corporate tax relief instead of low-income family tax relief—which has created the lag in consumer demand and citizen disenchantment with their Government.

I hope that the new administration will reverse these recommendations by keeping the low-income family tax relief and reducing the highly questionable investment tax credit for corporations.

A NEW PRESIDENT OF EUROPE

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. FRASER. Mr. Speaker, when the European Community was founded in 1959 its Commission president was expected to be one of the most prestigious leaders in Europe. However, after few substantive accomplishments by the EC, he was reduced to largely administrative and ceremonial roles.

With the election of the Right Honourable Roy Jenkins, M.C., former Home Secretary of Great Britain, the Commission welcomes a new breed of Commission president; the first president who is a political leader. The decision, by the heads of state of the nine member countries, was unanimous.

High expectations have been raised by Mr. Jenkins' election, both throughout the European Community and here in the United States. He becomes president at a unique time, for in the second year of his term the members of the European Parliament for the first time will be elected directly by the voters of Western Europe.

Mr. Jenkins has an international reputation as a devoted supported of Euro-

pean unity. Key European leaders believe new political directions can be expected of Jenkins, because he is one of the few people on the European political scene capable of breathing new life into the Community.

Recently Mr. Jenkins spoke at the Massachusetts Institute of Technology on his new position as president of the Commission, giving his hopes for an expanded role for the EC and calling for greater mutual understanding and patience between the United States and the European Community. Excerpts from his speech follow:

UNITED STATES AND A UNITED EUROPE: ARE WE NOW UNCERTAIN PARTNERS?

It is not perhaps surprising that one of the basic principles of United States foreign policy, at least until 1917, and to some extent well after that, was a desire to avoid the entanglements and sophistries of European diplomacy and conflict. . . .

* * * * *

It is likewise no wonder that the United States should have become an early, enthusiastic and even impatient supporter of the process of European economic and political integration.

Many needs and motives pushed the United States in this direction:

First there was the understandable desire to avoid any repetition of what had happened in 1917 and 1941. Anything that the Europeans could do to put an end for ever to their civil wars which had so devastatingly involved the world in general and the United States in particular was obviously a prime American interest.

Secondly the Americans had their own inner faith in the advantages of union, of federal institutions, of what could be forged from the heat engendered by the mingling of peoples, traditions, customs and ways of life. In short many Americans saw a union of European States on the same lines as the union they had made for themselves.

Thirdly there was the understandable feeling that the Europeans should organise themselves to use as co-operatively and effectively as possible the massive American economic aid which was so generously provided after the end of the last war.

Finally there was the strong feeling, as strong today as ever, that if the United States was to take the risk of military involvement in the defence of Europe, the Europeans should organise themselves to make the biggest and most effective contribution of their own that they could.

* * * * *

POLITICS THROUGH ECONOMICS

. . . It is in some ways paradoxical that what was—and is—an essentially political enterprise should have been pursued by largely economic means. . . . But we should not be deceived. The European founding fathers—Robert Schuman, Adenauer, de Gasperi, Paul-Henri Spaak—were always more interested in politics than they were in products and markets. They might have echoed the sentiments of Gladstone when in his thirties he became Vice-President of the Board of Trade: "I wished to concern myself with the great affairs of men, and instead here I am set to look after packages."

But the Europeans made a good job of looking after packages, and soon realised that the loom of trade made a tissue which included supranationality, and itself became, as it remains today, one of the great affairs of men.

* * * * *

Then there was the problem of Britain. Was Europe to consist of the Six or of a larger number? In the 1950s and 60s the debate in Britain was about whether British relations with the countries of the Continent should be more akin to those of the United States with them or to their own with each other. . . . These were the days, much more than in the 20s and 30s, when the British saw themselves as the meeting point of three circles: the Commonwealth, the North Atlantic, and Europe.

This view of ourselves, however understandable at the time, represented a gross over-estimate of British power and British options, and turned out to be a source of misjudgment and misfortune for ourselves and our allies. . . .

* * * * *

ORIGINS OF THE EC

I now want to say a word about that Community and its institutions, and the way in which they are evolving. . . . In this year of 1976, Americans have probably thought more about their origins than at any time for a century, and have better separated the fact from the fantasy of what happened two hundred years ago. As much by inadvertence as by deliberate intent, . . . a group of remote colonists, . . . threw off the authority of a mother country which was itself divided by the constitutional issues at stake. The new country thus begun had more than a century in which to develop in relative peace, protected for the most part by the British Navy from uncomfortable involvement in the affairs of the rest of the world.

Contrast this with the origins of the European Community. The original Six had one unhappy thing in common: they had all been defeated, and in many cases devastated, in war. They had also been forcibly united for four awful years under the domination of Adolf Hitler. Their first thought was to unite to prevent at all costs a third European civil war. But as their prosperity returned, they became more conscious of their historical roots, their different languages, habits of thought and way of life. The recovery of Europe as a whole meant a recovery in the self-confidence of the participating states. Thus what happened was in a way the reverse of what happened in America. . . . This very diversity is one of the riches of Europe; but it has required looser, different mechanisms which cannot readily be compared with your own.

* * * * *

INSTITUTIONS OF THE EC

First there is the Commission of which I am to be President. It is the executive body of the Communities and is responsible for ensuring that the principles of the Treaty are observed and for initiating proposals for adoption by representatives of member states sitting together as the Council. * * * At its head are thirteen Commissioners, two each from Germany, France, Italy and Britain, and one from each of the other members. They are chosen by member governments, by common accord but each has to swear an oath to be guided only by the European interest rather than that of his own country. Their decisions are by majority vote.

Then there is the Council, the principal decisionmaking body which is responsible for co-ordination of the general economic policies of member states. The Council consists of representatives of each member government, and the chairmanship moves from one country to another every six months. All important decisions are by unanimity. The Commission and the Council are placed in a state of what has been appropriately called creative tension.

Next there is the European Parliament which has advisory and supervisory powers, and meets eleven times a year for about a week at a time. Its committees also meet between Sessions. At present it consists of members designated by parliaments of member states, but the firm intention is that elections to the Parliament will be by direct universal suffrage from 1978 onwards. * * * The Parliament gives opinions on proposals of the Commission, debates the activities of the Community, and reviews a general report submitted annually to it by the Commission. More important is its power to review the annual budget and to compel the resignation of the thirteen members of the Commission.

Finally there is the Court of Justice, composed of nine judges appointed for six-year terms by common accord of the member states. The primary function of the European Court is to ensure respect for the Treaty and interpret the law of the Community. Its judgments are legally binding throughout member states, and can over-ride national law and bring national states to book. Not so well-known are the powers of the Court to guarantee or improve the position of individuals, and protect fundamental human rights.

Beside these four pillars of the European Communities—the Commission, the Council, the Parliament and the Court—has grown up another more flexible institution outside the scope of the Treaty. This is European political co-operation, and represents an attempt to co-ordinate the foreign policies of the Nine member states towards the outside world. It has no permanent staff and its secretariat simply consists of national officials which change every six months with the chairmanship. Thus the caravan moves from capital to capital of the Community. Nevertheless this is a field in which considerable progress has recently been made. . . . European political co-operation is perhaps the embryo of the European Political Community without which the European Union, to which member states eventually look forward, could have no meaning.

* * * * *

A NEW DEMOCRATIC BALANCE

Hence the importance of the Council where the Commission proposes and the Council disposes. The Council meets at the level of Ministers of Foreign Affairs, but there are specialist Councils as well, where such Ministers as those of Agriculture, Finance or the Environment can come together.

* * * * *

If the Commission has sometimes been too bureaucratic and the Council too mindful of national interests, the Parliament, through no fault of its own, has not yet succeeded in achieving adequate power of democratic control.

I believe that the recent agreement on direct elections by universal suffrage will eventually give the Parliament a new and different role, although direct elections will not mean any formal increase in powers. Parliaments have always been keenly interested in the problems of financial supply and control of the budget. The role of the European Parliament in helping us to tackle the problems which now face the Community—from the size and purposes of the budget to the lack of economic balance between the member states—may prove to be crucial. But again it will not be easy. National parliaments are in no hurry to give up their powers; and a whole new balance of democratic power within the Community will eventually have to be established.

* * * * *

DIVERGENT ECONOMIES

It will be clear from all I have said that although the European Community in its various aspects has economic, political and judicial reality, it is very far from complete. . . . But the Community has faced, and now faces, very serious problems.

Tonight I shall mention only one of them: the economic capacities of the member states, far from reaching a rough equivalence, have recently become more markedly divergent than ever before. Four years ago the small countries feared the dominance of

the four large ones: Germany, France, Britain and Italy. Two years later there was fear of two large countries: Germany and France. Now Germany is alone in a position quite different from the others. A number of ideas are under discussion for righting a disequilibrium which no one wants, least of all the Germans. . . . But I do know that if this fundamental problem is not faced the effect will be that of an earth tremor on a half-built house.

* * * * *

A FEW REVEALING STATISTICS

I do not want to numb you with figures but one or two statistics about the Community and the states which comprise it will give you an idea of its scope and potentialities. In 1975 the total population was just short of 260 million, against 212 for the United States and 110 million for Japan. Its gross domestic product was $1,362 billion against $1,505 billion for the United States and $491 billion for Japan. The volume of its imports (excluding trade among its members) was $155 billion against $97 billion for the United States and $58 billion for Japan; and the volume of its exports (also excluding trade among member states) was $150 billion against $108 billion for the United States and $56 billion for Japan. Thus you will see at a glance that the European Community comprises an immense population, a gross domestic product almost as great as that of the United States, and a volume of imports and exports which make it decisively the largest trading unit in the world.

* * * * *

THE EC AGAINST EVERYONE ELSE

In Europe itself the Community has acted as a political as well as an economic magnet. The Six original members were joined by the Three nearly four years ago. Around this central nucleus is a web of association agreements with all the free countries of Europe. Greece is now negotiating for membership, and Portugal is not far behind. Spain may follow, and also Turkey. The Community has also drawn closer to such countries as Yugoslavia and those on the Southern and Eastern shores of the Mediterranean, and through its mechanisms of political cooperation is engaged in a dialogue with the Arab world, where it has still greater economic interests than the United States. It is in the process of working out new economic relations with the countries of Eastern Europe and the Soviet Union, and of course played a major role in the Conference on Security and Cooperation in Europe, which led to that charter of hope for all Europeans on either side of the post-war dividing line: the Helsinki Declaration.

* * * * *

FOR THE DEFENSE OF EUROPE

I have not so far spoken of the problems of defence . . . the defence of Europe cannot be dissociated from the recovery of Europe and the growth of the new European institutions. . . . Perhaps the fundamental point is that the proper unit of defence is not Western Europe or the Europe of the Community but the North Atlantic area as a whole. Western defence is at present organised in a way which respects the specifically European as well as the broadly Atlantic aspect. Thus there is our joint membership of the North Atlantic Treaty, a more restricted membership of that strictly practical European defence association the Euro-Group, and the still more restricted membership of the Western European Union which involves its seven signatories in the most binding commitment into which any state can enter: an automatic commitment to mutual defence. It is much tighter than the North Atlantic Treaty. If these perspectives are to change, and change they may in the years to come, I think that the main agent of change will be the need for the Europeans to integrate their own defence industries, to standardize equipment among themselves and within the Alliance, and to establish a more even partnership, each making its due contribution. with the United States.

* * * * *

AN UNEQUAL PARTNERSHIP

So far the partnership across the Atlantic has been unequal. In many respects it remains so. To that extent it remains an uncertain partnership, one with immense possibilities for the future but one which could still go wrong.

I deal first with the economic aspects. Here there is a very lopsided balance of trade in favour of the United States. . . . Unlike the Community the United States is self-sufficient in most raw materials and does much less trade with the outside world. And, foreign competition is more deeply embedded in our home market than it is in yours. Moreover we manage our agricultural market in a different way, and in certain cases give preference to agricultural products from the countries with which the Community has institutional links or come under the Generalised Preference Scheme.

* * * * *

It is sometimes said that the Community is an economic giant but a political dwarf. This is half-true, but only to the extent that the Europeans make it so. The United States, I suspect, sees no Political Community in Europe in the way that it sees an Economic Community. . . . So long as the Economic Community is a flourishing concern, there is a certain logic driving its members towards at least political cooperation and perhaps one day a Political Community; but if the Economic Community looks sick and the economics of its member states diverge, so that machinery of political co-operation looks sick too, and co-operation, let alone anything more ambitious, becomes increasingly hard to attain.

A PLEA TO BOTH

In this respect I would like to make a simple plea to Europeans and Americans alike. It is that President Carter's words to the effect that Europe would be better able to fulfill its role if it could speak with one voice and act with one will should be heeded by all. I include Americans in my plea because if the United States searches for one European voice and one European will, it will be more likely to find them than if it prefers to look for nine European voices and nine European wills. It will be interesting to see how the forthcoming economic summit meeting, recently proposed by President Giscard d'Estaing of France, and now widely supported, is organised on the European side of the triangle of United States, Japan and Western Europe.

* * * * *

. . . We are engaged on an enterprise even more difficult and complicated than your own two hundred years ago. We need understanding more than help, patience more than pressure to act in ways which may not be our own. The result can be of vast benefit, not only to us but to you. The more equal the partnership between the United States and the uniting states of Europe the better for both, and the longer it will endure.

STATEMENT ENTERED IN THE CONGRESSIONAL RECORD, JANUARY 17, 1977, BY CONGRESSMAN JIM LLOYD

HON. JIM LLOYD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. LLOYD of California. Mr. Speaker, a number of city council and public agency officials in my district have expressed dissatisfaction with the Economic Development Administration's allocation of funds under the public works capital development and investment program.

It was extremely difficult for these officials to identify the precise formula and statistical inputs used to calculate the allocation to specific projects that were approved and funded.

Beyond EDA's allocation policy, local government and public agency officials questioned the method by which project proposals were solicited by the agency. The expenditure of hundreds of man-hours were forced by EDA regulations upon cities and agencies to prepare hundreds of pages of legal and technical justification for each of the proposals submitted, and I cannot begin to calculate the cost to the local taxpayer in grant proposal preparation alone.

It is important that Congress give serious consideration to the criticism that has been directed at this program. Congress must take action to insure a more acceptable and equitable grant funding formula.

A MISCHIEVOUS BUDGET

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. VANIK. Mr. Speaker, President Ford today submitted his budget for fiscal year 1978. It is a mischievous document. It reports an artificially low level of expenditures and therefore a phony deficit level. When the Congress and the American people examine the facts behind the figures, they will realize that the costs of many programs have been understated and that certain program cuts requested by the President in this parting shot would never be acceded to—not even by his own party in the Congress. As a result, the eventual budget levels for fiscal year 1978 will be higher than provided in today's budget—and many will then claim that the Democrats are "budget busters."

For example, this budget talks about saving $835 million by repealing the earned income credit for the Nation's working poor. The earned income credit was enacted in 1975 to provide low-income taxpayers with a refundable tax credit equal to 10 percent of the first $4,000 in earned income. The provision was continued through 1977 by the Tax Reform Act of 1976. I do not believe that anyone believes there is any realistic chance of the Congress repealing this tax relief for the lowest income families.

There are other places where multi-billion dollar savings are proposed, for example, in the food stamp program and in child nutrition programs. I have no doubt that these programs could be made more efficient and that savings could be achieved—but I doubt that the Congress will cut these food programs by $1.5 billion between fiscal year 1977 and fiscal year 1978.

As another example of "funny money accounting," the budget documents provide an excellent discussion of the dangers created by off-budget agencies and the use of guaranteed loans—which generally have the same economic impact as direct loans made by on-budget agencies. The President proposes legislation to "halt this practice so that our budget system will fully reflect the financial activities of the Government." Unfortunately, this legislation will "begin with next year's budget." Therefore, the Energy Independence Authority is listed in this budget as "only" costing some $42 million—an amount equal to the estimated net losses of the Authority in its first year of operations during which it is expected to make some $3 billion in loan commitments. But when the legislation is enacted to move the activities of the Energy Independence Authority "on budget" where its impact will be more visible, it will result in a $3 billion addition to President Carter's fiscal year 1978 budget totals!

The budget also makes some impossible legislative proposals. For example, to finance a "catastrophic" health coverage plan for medicare enrollees—certainly a goal which the Congress and the public would support—the President proposes to increase the medicare coinsurance charged to retirees. To offset the $594 million cost of the catastrophic coverage, the President proposes savings in fiscal year 1978 of $603 million by making the Nation's retirees pay for this "savings" through higher out-of-pocket medical coinsurance costs. This same old idea was presented in the President's last budget and hearings by congressional committees revealed that it would increase costs for almost all retirees while providing "catastrophic" protection for only a small fraction of the medicare population. This "savings" was a catastrophic proposal last year—this year it is just a warmed over retread. It would not be worth commenting on except that it is used to "hold down" the budget by a phony $7 million in fiscal year 1978 and about a quarter of a billion dollars in fiscal year 1979.

For these and other reasons, the President's last budget is a political time-bomb—planted to make succeeding administrations and Congresses look like big spenders, when these budget figures are exceeded. I hope that the American people will realize that this budget document is not a document on which to plan—it is only a political last hurrah.

BLACK LUNG CLAIMS

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. RAHALL. Mr. Speaker, I have received numerous complaints from my constituents concerning claims for black lung benefits that the law provides. These letters express the outrage of good and decent people who have devoted most of their lives and health to the mining of West Virginia coal resources, receiving precious little in return.

And, finally, the families of these miners of deteriorated health suffer greatly, due to the loss of income which social security and retirement payments do not cover.

For a nation reputed to be kind and compassionate, I believe we all should go much further than we have in meeting the needs of the miners who have given so much of themselves in their life of work.

In talking with my colleagues, I am convinced that the problem encountered by my constituents are similar to the many difficulties faced by others who live and work in coal mining States. The fact that we are relying on coal more and more as a way to help meet our domestic energy crises serves to highlight the health problems of those who extract it from the Earth.

The Labor Department's process for reviewing black lung claims is grossly inefficient. From June 1973 to December 1976, only 3,800 black lung claims were approved out of the 104,000 submitted to the Department. At the present time, Labor Department figures show that 51,200 black lung claims have not yet been acted upon.

Mr. Speaker, because there is a national problem, I am today introducing legislation that will provide temporary authority for additional qualified individuals to hear and determine claims.

THE ANTI-DEFENSE LOBBY–II: CENTER FOR DEFENSE INFORMATION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. McDONALD. Mr. Speaker, worldwide Soviet aggression has forced American defense and intelligence analysts, under the prodding of outside experts, to at last recognize that the U.S.S.R.'s goal is global domination, the ending of U.S. influence beyond our own borders, and the isolation of America from the oil and minerals necessary for our economy by subverting countries strategically placed along the major sea shipping routes.

At the same time the Soviet military is being strengthened with 100 supersonic Backfire bombers, our B–1 production is in doubt. And to confuse the United States and our allies, the Russians have warmed up their old campaign for U.S. disarmament. Sophisticated propaganda campaigns aimed at altering "world public opinion" in line with the U.S.S.R.'s foreign policy directives have been instituted.

I have already discussed the Coalition for a New Foreign and Military Policy. Today I will examine related projects sponsored by the Fund for Peace.

Since 1972, the Center for Defense Information, a project of the Fund for Peace which has also received extensive grants from the Field Foundation, has acted in Congress and with the media as a highly vocal counterforce to the Defense Department and to almost all informed opinion on defense matters.

The CDI gives lip service to balance only in a small type statement which appears in each edition of its newsletter, The Defense Monitor. It says that CDI:

supports a strong defense but opposes excessive expenditures or forces. It believes that strong social, economic and political structures contribute equally to national security and are essential to the strength and viability of our country.

However, analysis of CDI's positions over the years indicates the organization believes any Armed Forces stationed outside the continental United States are excessive; that the costs for developing all new major weapons systems such as the B–1, Trident and cruise missiles are excessive; and that the Federal Government should transfer most defense funds to new massive social welfare programs.

To establish credibility for its positions, the CDI has attracted a number of former military officers. Chief among them is CDI director Rear Adm. Gene R. LaRocque, retired. The admiral had a distinguished naval career for some 30 years. However, as the Wall Street Journal reported in 1972 when the Center was formed:

His career had been in irons since 1968, when a task force he headed concluded that the war in Vietnam couldn't be won, even by more bombing. "That didn't endear me to the Naval aviators," says the Admiral good naturedly. One of those Naval aviators was Adm. Thomas Moorer, then Chief of Naval Operations * * *.

The admiral's mistaken conclusions endeared him to the doves and to the pro-Hanoi intellectuals.

In 1975, LaRocque wrote:

I have always felt that we must spend whatever is necessary to defend this country against attack, but only about 25% of the Defense Department budget is for the defense of the U.S. The other 75% is to maintain the capability to defend other countries, project our powers overseas, and look after U.S. interests in various parts of the world.

In other words, the admiral wants the United States to return to an antiquated isolationist position, abandon our allies, and hand them over in the long or short term to the Communist imperialists. This "neo-isolationism" is being encouraged by the Center and related organizations without their making any mention of the fact that the U.S. economy and its defense capability is intimately tied to imports of oil and minerals; or of the fact that the interests of America and our allies in many places are endangered by the U.S.S.R.

CDI's highly selected and distorted research is being used extensively by the old pro-Hanoi antiwar groups. But the CDI is also frequently cited by Radio Moscow and other Communist government propaganda instruments as a source for anti-U.S. defense material. For example, the CDI and its adviser from the Institute for Policy Studies, Earl C. Ravenal, were praised in a Russian language broadcast on February 10, 1975, for their attacks on those who:

are proceeding not from present-day realities but from a strategy devised during the cold

war years which aimed to guarantee for the United States a dominant position * * *.

It is noted that the Communist line is that in light of the realities of the Communist conquest of Southeast Asia and the former Portuguese territories in Angola-Guinea-Bissau and Mozambique, the United States should cease resisting Soviet aggression, "end reactionary cold war policies," and sell out.

As stated in the Defense Monitor, CDI's positions on major defense issues are:

On the Panama Canal: The U.S. has neither commercial nor military reasons for clinging to an outdated treaty * * *. Failure to come to an early agreement on a new canal treaty * * * could spark new violence directed against Americans in the Canal Zone—August 1976.

Actually, the United States has a vital interest in maintaining free access for shipping through the Panama Canal and for retaining the Canal Zone. All U.S. Navy vessels except for the very largest and carriers can travel through the Canal which makes it unnecessary for maintaining two fleets to protect the southern approaches to our borders. The U.S. military presence in the Canal Zone is perceived by the Cuban Communists as a direct inhibiting factor against Cuba and the U.S.S.R. pulling off another "Angola" in Latin America. And American management of the Panama Canal has been efficient and impartial. Turning such a major waterway over to a petty dictator like Torrijos who has apprenticed himself to the Cuban Communists would be a disaster. The Cuban regime is turning Guyana into a base for subversion with the wholehearted support of that government; and the Socialist government of Jamaica has formed a web of alliances with the U.S.S.R.'s Caribbean puppet:

On Spanish bases: American bases in Spain are not essential for the defense of the U.S. or Western Europe—February 1976.

Spanish bases are vital to the defense of the Mediterranean area particularly now that Turkey has withdrawn from NATO.

On Japan: American pressure on Japan to expand its military establishment * * * could prompt a nuclear arms race in East Asia and destabilize political relations in the area—November 1975.

Since the American defeat in Vietnam and the Communist conquest of Cambodia and Laos, Japan has been under constant pressure from the Soviet Union; her defense systems are being challenged; her coastal waters teem with Soviet spy ships; Japanese fishing boats have been harassed and other provocative acts committed by the U.S.S.R. In light of U.S. withdrawal from Vietnam, Japan and South Korea are left further exposed. Any destabilization of Asia has been caused by America's precipitous withdrawal from Vietnam after a decade of "no-win" policies.

On the cruise missile: A U.S. short-term advantage in cruise missiles should be traded for an agreement on ending the qualitative arms race. Accepting a range limitation on cruise missiles, and the small risks of violation [by the Russians], is a better alternative for the U.S. than the consequences of no arms control at all—September 1976.

The cruise missile, contrary to CDI's assertions, offers an advantage for a number of years until the Russians can find some method to counter it, as the U.S.S.R.'s own anticruise missile propaganda reveals. It is interesting to note the CDI is urging a strict range limit for our cruise missiles, while at the same time demanding abandonment of the overseas bases from which "limited range" cruise missiles would have to be deployed. In light of the massive record of Soviet violation of international agreements such as nuclear testing and the development of several missile systems and the Backfire since the 1974 Vladivostok agreement the Center's bald assertion of "small risks of violation" is incredible.

On the arms race: Congress and the American people are being subjected to the most extensive fear campaign since the 1960 "missile gap." * * * Acquisition of weapons and forces that are not needed, however, can only stimulate the Soviets to buy more of their own which will in turn be used to justify larger U.S. military budgets in a self-fulfilling, self-defeating cycle—May 1976.

The campaign that the American people have been subjected to by the U.S.S.R. and its allies is one of lies and deception as to the Communists' aggressive intentions for world hegemony. The disarmament and arms limitation negotiations are designed to stall the development of new weapons systems until Soviet technology can counteract them. They are intended to deceive the American people and citizens of other free-world countries into believing that the Communist imperialists have changed their plans for domination.

As the new CIA estimates point out, the Soviet Union does not want parity of weaponry with the United States: it wants absolute superiority. And the U.S.S.R. is increasing its air defenses and hardening its missile sites so that it could survive a retaliatory attack by the United States with acceptable losses. No one is asking for unneeded weapons of defense systems; and new U.S. systems will have no effect on Soviet weapons expenses, in that until the Soviet Government really reverses its aggressive policies, a technological "arms race" will continue.

Center for Defense Information staff has begun their rounds of the offices of members of the Congressional Armed Services Committees. CDI's present staff includes:

CENTER FOR DEFENSE INFORMATION STAFF

Director—Rear Admiral Gene R. LaRocque, U.S. Navy (Ret.).
Deputy Director—Brig. Gen. B. K. Gorwitz, U.S. Army (Ret.).
Staff Director—Dr. Robert M. Whitaker (Col. U.S. Air Force-Ret.).
Senior Staff:
David T. Johnson.
Dr. Stefan H. Leader.
Dr. Jeffrey D. Porro.
William J. Flannery.
Nancy Jones.
Evelyn S. LaBriola.
Cheryl Rosen.
Dr. John F. Tarpey (Capt. U.S. Navy-Ret.).
Research Interns (Sept.-Dec. 1976):
Marilyn L. Booth (Harvard).
James Firth (Colby).
Michael Ottenberg (Ripon College).
David L. Phillips (Trinity).
Cornelia J. Ravenal (Harvard).
Paul N. Stockton (Dartmouth).

The Board of Advisors of the Center for Defense Information includes:

Morris B. Abram, Jr.—Pembroke College, Oxford, England; founder and former president of Student Vote and Harvard Independent.

Doris Z. Bato—Cos Cob, Connecticut.

Arthur D. Berliss, Jr.—Captain, USNR (Ret.); former Vice-President, Allen-Hollander Co.

James R. Compton—president, J. R. Compton Development Co.; President's Council, Experiment in International Living.

Col. James Donovan, USMC (Ret.)—Author; former publisher, "Journal of the Armed Forces."

Charles H. Dyson—Chairman of the Board, Dyson-Kissner Corp.

Marriner S. Eccles—Former chairman of the Federal Reserve Board.

G. Sterling Grumman—G. S. Grumman & Associates, Inc., Members of the New York Stock Exchange.

Harry Huge—partner, Arnold and Porter; Chairman, Board of Trustees, UMWA [United Mineworkers of America] Welfare & Retirement Fund.

Stewart Mott—Philanthropist.

Paul Newman—Motion Pictures.

Lawrence S. Phillips—President, Phillips-Van Heusen Corporation.

Rudolph S. Rasin—President, The Rasin Corporation, Chicago.

Dr. Earl C. Ravenal—Former Director, Asian Division (Systems Analysis), Office of Secretary of Defense; Institute for Policy Studies.

John Rockwood—Publisher, Chicago.

Albert M. Rosenhaus—Vice President, J. B. Williams Company.

Robert P. Schauss—Metallurgical Engineer; International Consultant.

Alfred P. Slaner—Former President, Kayser-Roth Corp.

Dr. Herbert Scoville, Jr.—Former Deputy Director, Central Intelligence Agency.

Phillip A. Straus—Partner, Neuberger and Berman, Members, New York Stock Exchange.

Paul Warnke—Former Assistant Secretary of Defense, International Security Affairs.

Susan W. Weyerhaeuser—New York, N.Y.

Harold Willens—Chairman of the Board, Factory Equipment Corp.

Abraham Wilson—Attorney; Partner, Kadel, Wilson and Potts, N.Y.

UKRAINIAN INDEPENDENCE DAY

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. BROOMFIELD. Mr. Speaker, on January 22 millions of Ukrainian-Americans will mark an Independence Day devoid of the dignity, pride, and sense of accomplishment so characteristic of our own Bicentennial. Instead, they will celebrate a distant memory, a brief moment in the aftermath of World War I when the Ukraine knew independence. They will demonstrate to the world that, despite more than half a century of Soviet depression, Ukrainians have maintained a sense of ethnic identity and an undiminished yearning for independence.

It is ironic indeed, Mr. Speaker, that the Ukraine sits today as a puppet member of the United Nations, perched on the knee of the Soviet Union—the very nation that snatched away Ukrainian

freedom 54 years ago. We can get some idea of the Soviet notion of Ukrainian "independence" by comparing the parallel voting records of these two United Nations members.

The quest for an independent Ukraine is hundreds of years old; it has been frustrated for decades by Soviet imperialism, but never abandoned. The Ukraine's sense of identity, its determination to be free, is nurtured by the steadfastness of the overseas Ukrainian community. Ukrainian-Americans have made a substantial, well-recognized contribution to the freedom and vitality of the United States. However, they have never lost their sense of outrage at the sacrifice of their homeland, nor have they become reconciled to a Ukraine perpetually dominated and subverted by the Soviet Union.

In helping to mark the anniversary of Ukrainian independence, we support the dream of a better, freer future for over 47 million people. We help ensure that the world rejects the tragic consequences of Soviet expansionism. And we stand for what is noble and finest in the American experience—freedom and justice for all.

IT'S ABSOLUTELY AMAZING

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. COUGHLIN. Mr. Speaker, in a new category which I propose for the 95th Congress, titled "It's Absolutely Amazing," I enter two subjects worthy of cogitation and discussion by my colleagues: the suddent discovery that the number of poor in the Nation has been cut magically by one-half and the abrupt doubts being raised by majority Members over the financing and scope of the probe by the Select Committee on Assassinations.

The report by the Congressional Budget Office that about 5.4 million families and single individuals had purchasing power under the Federal poverty level in 1975–76 is remarkable for its disclosures and its timing. That it reduces the number of poor from 13.8 percent to 6.9 percent and comes after the Presidential election represents an amazing set of circumstances—especially since the new President will be a Democrat.

While the CBO is under Democratic control, I certainly do not mean to imply anything untoward. The report, however, enables the new President to state that he already has reduced the number of poor in the country by 50 percent without taking any action whatsoever. Indeed, if the campaign promises of Mr. Carter can be fulfilled so easily, the Congress may not even have to consider his legislative proposals.

I wish that there were, in fact, no poor families or individuals in the Nation. Perhaps, the ample and widespread governmental programs enacted over the past decades have been taking effect—without us knowing about it—and that all it takes is a new Democratic administration allied with a Democratic Congress to point this out to us.

By including the in-kind benefits that the Federal Government has been supplying, the CBO now substantiates what so many of us have been contending for years. The Government's benefits have been helping the poor and have cost us billions of dollars. I do not quarrel with the principle that we must help those who cannot help themselves, but I do not believe we are being honest if we do not acknowledge the cost to the U.S. Treasury and the American taxpayers.

CBO contends that in 10 years these in-kind benefits climbed from 6 percent of all Government transfer payments—benefit payments—to individuals to 22 percent for a total of $41.2 billion in 1975. This fantastic rate of acceleration belies the cries of those who forever complain about every other part of the U.S. budget and protest that we do too little in the social welfare fields.

It is absolutely amazing—as are the latest developments in the saga of the Select Committee on Assassinations which, by some quirk of fate, was created before the Presidential election.

I note that the distinguished majority leader of the House has publicly voiced doubts and Members are expressing reservations about the course of the investigations, the methods and the funding. Many of us on the opposite side of the aisle expressed those reservations before the Presidential election and not after it.

From questions over the abuse of civil liberties as evidenced by probe methods to the huge price tag of $6.5 million for a year's funding, I think that those doubts could have been raised previously by our colleagues on the majority side. I understand, of course, that a Democratic administration and a Democratic Congress will be joining forces shortly and the embarrassment of FBI and CIA abuses during the Kennedy-Johnson years may not be the most seemly revelations for this "new generation of leadership."

It is absolutely amazing.

BROADCASTER ON THE MOVE

HON. LIONEL VAN DEERLIN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. VAN DEERLIN. Mr. Speaker, as chairman of the House Communications Subcommittee, I encounter many leading figures in the broadcasting industry. I have come to respect and admire these people for their knowledge and insights that often transcend the complex, but occasionally mundane matters considered by the subcommittee.

However, I have been privileged to know one of our country's outstanding young broadcasters, Dan McKinnon, for many years, predating my own service in Congress. Dan owns and operates a radio station, KSON, that serves my own home area, San Diego.

Dan also is the son of a former Member, Clinton D. McKinnon, who served in the House during the 81st and 82d Congresses, from 1949 to 1953. Like his father, Dan is endowed with both a keen sense of public responsibility and some shrewd business acumen.

Dan has become a leader of the National Association of Broadcasters and recently was elevated to the presidency of the Country Music Association—a signal honor, as Dan is the first broadcaster ever to head the 5,000-member CMA.

I include at this point a perceptive column about Dan, written by Steve Casey, radio/television writer for the San Diego Evening Tribune:

DAN MCKINNON—HIS FORMULA SPELLS SUCCESS

(By Steve Casey)

Three weekends ago, Dan McKinnon was prowling through the bowels of the San Diego Sports Arena, clasping hands with redneck rock star Willie Nelson, who was appearing in a concert sponsored by McKinnon's radio station.

Two weekends ago, the owner of KSON radio was poking around his 260-acre backcountry ranch, hunting up five truant cows.

Last weekend, McKinnon was visiting the Johnny Cash family in Nashville and beginning work as president of the 5,000-member Country Music Assn., hunting up ways to help radio stations around the nation spread the gospel of country music.

From concert to cattle to Cash is not an unusual schedule for McKinnon, who became the first broadcaster in CMA's 16-year history to head that organization, the major trade group and policy setting body in country music.

People who labor behind the scenes in broadcasting are often times as vibrant as leftover oatmeal, but McKinnon is one of radio's go-go boys.

A former jet jockey and helicopter pilot, McKinnon claims a Navy record for rescues, with 62. The Navy, which doesn't keep such statistics, doesn't dispute the claim.

Son of former Congressman Clinton D. McKinnon, McKinnon the younger flirted with journalism at the Sentinel, a paper his father then owned, after leaving aviation and before taking over KSON in 1962 and trying very hard not to go broke.

"The station was bankrupt and our first month's (advertising) billing was $7,000," he said in a recent conversation. Seven thousand dollars isn't starvation for a station, but it is financial malnutrition.

"For a period of time we changed formats about every three months—we even did candlelight and poetry reading. In October of 1963 we switched to country music and it was an instant success.

"The music was formatted just like a rock station. Before, the disc jockey would take a stack of records and plan out any kind of show he wanted. We took the programing—including record selection—out of the hands of the disc jockeys and no longer does it sound like six different stations."

Then McKinnon moved into heavy promotion, an ingredient for success he finds indispensable and one which he hopes to convince other country broadcasters to use more effectively.

Today, the station combines concerts, games, drawings, billboards, belt-buckle giveaways and sundry promotional gimmicks in an effort to woo and keep listeners.

The effort in the early days was to woo listeners, to be sure, but also to convince advertisers that people who enjoyed country

music weren't all addlebrained hicks who wouldn't, or couldn't, buy products.

That paid off, for today KSON is fiscally healthy and, according to the current Pulse rating book, San Diego's top station during most of the daytime hours among its target 25 to 49 year old audience.

McKinnon is fiscally healthy as well, and one radio promotion stunt even launched two new businesses.

As a result of KSON's annual talent search, McKinnon found local performers sorely in need of management. So he started the House of Hits, which is involved in music publishing and artist management.

He sees no conflict of interest in both managing talent and playing their records, he said, since he doesn't pick the music played on the station and his clients don't get any special breaks.

Active in political and religious circles—he was local chairman of the recent Billy Graham crusade here—McKinnon lives with his wife and two children in Pacific Beach, repairing to the ranch on weekends.

LINTON SCOTT, SEARS MIDWEST TERRITORY CITIZEN-OF-THE-YEAR

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. FRASER. Mr. Speaker, the inauguration of Jimmie Carter brings to Washington people from all over these United States. It is impossible to acknowledge in our RECORD all those visiting from our districts who merit such recognition. But I would like to make special mention of Linton Scott of Minneapolis, Sears, Roebuck & Co., Midwest Territory Citizen-of-the-Year.

After reading Mr. Scott's record of community service, I think my House colleagues will agree that Linton Scott is something special. He seems to find time to devote to so many public service programs that one begins to believe he has found a secret way to increase the number of hours in a day.

I join the people at Sears in saluting Mr. Scott. The Linton Scotts of this Nation along with their families—and Mr. Scott's wife Audrey plays a major role—are the backbone of our country. It is fitting that Mr. and Mrs. Scott are here in Washington to participate in the inaugural events. Minneapolis is proud of them.

A release outlining Linton and Audrey Scott's community service follows:

CITIZEN-OF-THE-YEAR

MINNEAPOLIS, MINN.—"Faith in the ability of the poor to succeed if given the opportunity is my philosophy," says Linton Scott, warehouse worker in Sears Minneapolis retail distribution center. A lifetime spent putting this philosophy into action earned Scott the honor of Sears 1976 MWT Citizen-of-the-Year.

Announcement of the award was made by MWT Executive Vice President Charles C. Wurmstedt on Dec. 14. Scott was selected from 15 terrtiorial finalists by a panel of four non-Sears judges.

One of Scott's major efforts to open doors for the poor and disadvantaged in Minneapolis was founding of "Flight Unlimited", a non-profit oragnization which provides spiritual guidance and aviation training for minority groups and other less fortunate people. The program, begun in April 1970, recruits, encourages and finances the training of minorities seeking careers in aviation while providing an alternative to idleness, crime and violence.

Prior to entering flight training, each student attends a preparatory ground school which has an entire curriculum especially written by Scott himself, in the "inner city man's language." By teaching with materials written in language not over the students' heads, the frustration of learning for the less-educated is lessened, Scott believes.

"Flying is something a person can succeed in and those who do become catalysts in the ghetto—they are leaders, heroes, and are respected. Others then say, "If he can do it, so can I."

"Even the poorest person has the ability to do something for himself," Scott says. "With encouragement and spiritual guidance, we can provide the poor with a sense of discipline, accomplishment, and self-confidence so they may go on to be better people." Through Scott's time and effort, people who once said "I can't" have learned they can.

Today, Flight Unlimited boasts 30 licensed graduates, among them five women.

What has motivated Scott to devote a lifetime helping people better their lives and the society in which they live? In part, Scott says, the riots in the 1960's motivated him to work with angry, dissatisfied youth. Teaching that drugs and violence don't solve problems, he encourages ghetto youth to join and be active in what he has to offer. Through his flight training program, they learn how to lead success-oriented, meaningful lives. "I try to teach them the best way to cope," Scott says.

As an ordained minister, Scott produces his own radio program, "Words of Inspiration" in his well-equipped studio at home. It is heard on station KUXL in Minneapolis and on KCFI in Cedar Falls, IA. Often his wife, Audrey (who works full time as his answering service in his home) helps with the production of a Sunday service by singing spirituals. Through this, he helps promote stability in the black community by speaking of interracial marriage, violence and equal rights, and the racial situation in general.

Scott has come to know many people through his humanistic endeavors, and as a result, many people come to him for personal counseling in his home. "I seem to have a knack for talking with minority people. People trust my judgment because I am one of them." Often, Scott serves as a link between the employer and the employe who has a hard time settling down at his job. "Using simple, common sense," Scott explains, "I help the employer to see the situations as others see it"—through the eyes of less-privileged poor.

"A cultural difference exists between blacks and whites. Blacks are often not job-oriented, success-oriented. Suddenly, a poor black may find himself in a highly organized system and is not ready to handle it." By serving as a liaison between employer and employe, Scott makes the going a little smoother for everyone involved.

Early this year Scott appeared twice on WTCH-TV in Minneapolis. In the interviews, sponsored by the Minneapolis Urban League, he spoke of the honor Sears has given him to attend the Presidential Inauguration as Citizen-of-the-Year. Focusing on progress of the black community in 1976, Scott says that "blacks consider Sears award a commendation and recognition for them."

Scott, 45, a native of Kingston, Jamaica, came to the United States in 1956 to attend Minneapolis' North Central Bible College. Two years later, he received his pilot's license, and in 1961 took a post as assistant minister in a Waterloo, Iowa, church. To supplement his income, he worked as a part-time Div. 33 salesman in the local Sears store. He met his wife, Audrey, there and began his radio program. When he moved back to Minneapolis in 1962, he worked in sales, part-time, but later switched to the service center for regular hours to accommodate his busy speaking schedule. He continued with his radio program through encouragement from parishioners who didn't want to miss his Sunday sermons.

Linton and Audrey Scott have two children, Jeffrey, 11 and Jennifer, 2½. He is a resident of Minneapolis and is an associate pastor at Mount Olivet Lutheran Church.

As a member of the executive board of Viking Council Boy Scouts of America, he has helped in the founding of Boy Scout Troops in the inner city. By devoting about 20 hours a week to the scouts, he has won the confidence and respect of inner city people through active participation.

Scott recently served a 6-month term on the Hennepin County Grand Jury and is a member. Earlier, in 1973, he served a 6-week term on the Federal Jury.

In June 1976, Scott coached the Black Gospel Quintet from North Central Baptist Church in St. Paul, Minn., winning the $1,000 first prize in the 1976 Minnesota State Fair amateur talent contest. The quintet was chosen from eight other finalists selected from a field of 205 contestants.

Scott's active participation in community affairs has won him various awards, including the Good Neighbor Award of CBS affiliate WCCO, Boy Scouts of America Recognition Award, City of Minneapolis Distinguished Citizens Award, Minnesota Department of Aeronautics Recognition Award, Certificate of Commendation from the White House and the title of Mr. Aviation of Minnesota, awarded by Gov. Anderson as a testimonial dinner in June 1976.

He makes regular public appearances at the local Lion Club, Rotary Club, Kiwanis Club and church groups and speaks with inmates at Stillwater State Prison in Minneapolis each month.

Scott considers winning the 1976 Citizen-of-the-Year award a "great honor. Sears, as a major U.S. corporation, is doing something quite unusual," he said. "Instead of selecting a checklist executive to represent Sears in Washington, they toss it out among hundreds of employes. This interest in the quality of life and activities of Sears employes is unique."

Scott is grateful for the award, but says he is "not the only one who deserves it." "I will represent a lot of Sears people," he said. Sears has selected its representative in the best way, Scott thinks, by making it a wide open contest among all employes. Other companies will probably pick up the idea, he believes.

In a ceremony in Minneapolis on Jan. 13, Charles Wurmstedt presented Scott with an engraved silver bowl. Attending the luncheon with Scott were: John Hahabedian, Twin Cities Group manager, Frank Yusup, retail distribution center manager, several group staff members, and all Twin Cities Sears store managers.

Then, on Jan. 20, Scott and his wife will attend the Presidential Inauguration where they will be guests of Sears in recognition of his role as a public-spirited employe and outstanding American citizen.

A TRIBUTE TO GEN. ROBERT E. LEE

HON. HERBERT E. HARRIS II

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. HARRIS. Mr. Speaker, on April 29, 1975, I introduced a resolution to posthumously grant citizenship to Gen. Robert E. Lee, a Virginian who spent part of his life in my district. The resolution passed the House on July 22, 1975 and was signed into law by the President on August 5, 1975.

I am proud to have been given an opportunity to have taken a part in the restoration of citizenship of this great Virginian and great American. On this, the anniversary of his birthday, I would like to place in the CONGRESSIONAL RECORD some tributes to General Lee written by some citizens in my district who are members of the Creative Writing Workshop of Alexandria Community Y. Their work was published in the January issue of the Alexandrian.

The writers include photojournalist Marguerite Moncure Lamond, whose photographs enhance the written material of Margaret T. Rudd, Lolete Falk Barlow, Alice M. Coit, Helen Millspaugh Webb, Barbara B. Hutchinson, Carroll Flaten, Agnes Nasmith Johnson and Maxine Lampshire, director of the Creative Writing Workshop, coordinator of the project.

I believe this is an especially fitting reminder of the birthday anniversary of Gen. Robert E. Lee. The articles follow:

THE IRONY OF HISTORY, ARLINGTON AND LEE

(By Lolete Falck Barlow)

"No tears at Arlington," Robert E. Lee is said to have gaily comforted his daughter and a departing houseguest in the mid 1850's. "No tears at Arlington!" Ironic words in the light of history! Indeed irony seems to punctuate the story of Arlington House.

Built by George Washington Parke Custis to honor the adopted father whom he idolized, it is now a National Memorial to the son-in-law whom he was slow to accept. Parke Custis was the link between two of the most famous men in American history—George Washington and Robert E. Lee.

Custis filled Arlington House with memorabilia of Washington and delighted in displaying these treasures to all who visited there. He was a congenial and generous host, often opening the grounds for public picnics.

Growing up in Alexandria, Robert E. Lee frequently visited Arlington with his mother, a cousin of Mrs. Custis. Young Lee appreciated the heritage at Arlington House and his character was steeped in the Washington tradition. His father, "Light-Horse Harry" Lee, had served under Washington during the Revolution and later eulogized him as, "First in war, first in peace, first in the hearts of his countrymen." Robert E. Lee and the Custis's only child, Mary, played together on the Potomac hillside as children, never dreaming their lives, along with Arlington itself, would be forever linked in the pages of history.

In June of 1829, Lee graduated from West Point, second in his class and without a single demerit during the whole of his four years at the academy. By 1830 he was courting Mary, with the approval of her mother and to the consternation of her father. Mr. Custis had no personal objection to the young lieutenant except that he was poor and could never support his daughter in the manner to which she was accustomed. It was his only reluctance in consenting to his daughter's marriage. (The Lee family had a history of fiscal tragedies which produced in Robert a thrift and exactness that lasted a lifetime. Years later, Mr. Custis turned to Robert for help in untangling his own mismanaged business affairs.)

On June 30, 1831, Robert E. Lee and Mary Custis were married in the parlor of Arlington House. It has been said that when Lee married Mary he married Arlington House as well. Certainly he considered it as a cherished home for the next thirty years. Six of the seven Lee children were born at Arlington, and for the most part, all of them grew up there. Mrs. Lee, when she could not accompany her husband on his military assignments, remained at Arlington with her parents and the children—three generations in a house which venerated a fourth. To Robert E. Lee, it was where, "my affections and attachments are more strongly placed than at any other place in the world."

There is a saying that a house is not hallowed until there has been a wedding, a birth and a death. With the death of Mrs. Custis in 1853 and Mr. Custis in 1857, Arlington had all three. How much more hallowed it would become, no one could have guessed.

Mr. Custis left Arlington to Mrs. Lee for her lifetime, stipulating that it should then pass to her eldest son Custis, the only Lee child who was NOT born there. It was to his son-in-law that Mr. Custis left the responsibility for administering his complicated will and estate.

Robert E. Lee was 54 years of age, with 32 years of unblemished service to the United States Army when Virginia seceded from the Union in 1861. Praying, he paced the floor at Arlington, he ultimately made the most important decision in his life . . . to resign his commission rather than, "raise my hand against my relatives, my children and my home." Two days later summoned by the Governor of Virginia, Lee left Arlington, never to return.

Because of its strategic location overlooking Washington, Arlington was sure to be militarily occupied. Long crippled by rheumatoid arthritis, Mrs. Lee sorrowfully left her home in May of 1861, carrying with her as much as she could of the family's possessions. She believed that the sanctity of her grandfather's memorial would be respected. It was not! Much of the furnishings were pilfered until General McDowell sent what remained to the Patent Office for safekeeping, never to be returned in her lifetime. In 1862, Congress levied a tax on "insurrectionist property" which had to be paid in person. The invalid Mrs. Lee sent the $97.02 by a cousin, but it was not accepted and the government confiscated the estate.

Robert E. Lee became commander of the Army of Northern Virginia and later the entire Confederate Army while Arlington became headquarters for the army that opposed him. On Christmas Day 1861, General Lee wrote his wife regarding their old home. . . . "It is better to make up our minds to a general loss. They cannot take away the remembrance of the spot, and the memories of those that to us rendered it sacred. That will remain to us as long as life will last, and that we can preserve."

In 1864, the estate became Arlington National Cemetery. The first burials were made next to Mrs. Lee's rose garden, close to the house, purposely making it forever uninhabitable as a home. When the war was over, the Lees settled in Lexington, Virginia, where General Lee spent the remainder of his life as president of Washington College. If the decision he made at Arlington brought sorrow, he did not regret it: "I did only what my duty demanded. I would have taken no other course without dishonor. And if it were to be done over again, I should act in precisely the same manner."

He died at Washington College in 1870 at the age of 63. A man who had been hale and hearty until the last year of his life, he was survived by Mrs. Lee who had been in poor health for 35 years, and an invalid for well over a decade. She lived to see Washington College renamed Washington and Lee University, a tribute which must have pleased her greatly.

Mrs. Lee's love for Arlington was constant and she wrote, "My dear old Arlington. . . . I do not think I can die in peace 'til I have seen it once more." Three months before her death she returned, but did not get out of her carriage. To a friend, she write, "I rode out to see my dear old home but so changed it seemed but as a dream of the past."

There are no ghosts at Arlington House; it was a happy home. Today, many of the things stolen during the War Between the States, have been returned by descendants of those who took them. Gradually the Lee's belongings are returning home. Though the surrounding acres are now a cemetery, General and Mrs. Lee rest for eternity in the chapel at Washington and Lee University.

The ultimate irony is that what was intended to be the desecration of Arlington proved instead to be its consecration. Arlington National Cemetery is a monument to heroes; and there is none more worthly of the title than the quiet man of honor who once lived there. If graves in the rose garden were intended to separate his memory from the land, history has rewritten the script. The mansion on the hillside is still known as Arlington House. It is also the Robert E. Lee Memorial.

AMNESTY AND PARDON—AT LAST

(By Barbara B. Hutchinson)

On October 12, 1870, General Robert E. Lee returned home from a Vestry Meeting at the Protestant Episcopal Church in Lexington, Virginia. It was tea time when he joined Mrs. Lee and other members of their family. As he was asking the blessing, he was struck down, never to rise again.[1] The country not only lost a great statesman but a great patriot. General Lee died, still denied the right to hold any office and other rights of citizenship.

Fortunately, through perseverance of loyal Virginians, and a stroke of good fortune at noon on August 5, 1975, President Gerald R. Ford signed the document officially restoring General Lee's citizenship. Just a year ago in January, a ceremony was performed among a group of General Lee's descendants and others at Lee's old desk on the veranda of Arlington House. On this happy occasion they were not only celebrating his birth, but they also knew, in their own hearts, that the wishes of their great leader had been remembered.

The mystery of the missing Oath of Allegiance became unraveled when in 1970, Mr. Elmer O. Parker of Columbia, South Carolina, noted historian, found General Lee's signed amnesty oath buried among other Civil War documents in the National Archives. While others believed the document did not exist, Mr. Parker did, and his job as a researcher gave him the opportunity to find it. The reason Mr. Parker held on to this belief was that, since General Lee made this request of his men, then most certainly he would comply also.

Between 1971 and 1974, the Virginia General Assembly, with the aid of Senator Harry F. Byrd, started intensive efforts to have General Lee's citizenship restored. The Virginia Delegation did request General Lee be given a Presidential pardon, but it was concluded by the Counsel to the President and the Department of Justice, in a subsequent opinion, that General Lee died with no disability within the President's power to pardon as a result of the December 25, 1868 amnesty proclamation. Therefore, based on Section 3 of the 14th Amendment, congressional action would be required to remove the remaining disability set forth in that section.

In 1974, both Houses of the Virginia General Assembly unanimously passed a joint resolution urging the restoration of full rights of citizenship to General Robert E. Lee.

In the Spring of 1975, Congressman Herbert E. Harris presented H.J. Resolution 418 effective June 13, 1865, that in accordance with Section 3 of the 14th Amendment of the Constitution, General Lee was posthumously restored to full rights of citizenship.

The *Gazette* newspaper, the oldest existing daily in the United States, spearheaded the movement of restoring R. E. Lee's amnesty.

---

[1] The National Cyclopaedia of American Biography, Vol. 4, Ref. .E176, .N3

Here in his beloved city of Alexandria, 15,333 petitioners representing 43 states and some foreign countries felt it important enough to stand up and be counted when it came time to fufill one of Lee's greatest dreams. According to the Gazette, one man was particularly bitter, "as a proud Alexandrian native born, and as a proud American I submit the enclosed coupon. I hope it will count as one more voice in an attempt to right what I consider a grievous wrong."

In good faith General Lee, two months after the final battle at Appomatox, has presence to apply for amnesty and pardon and restoration of all rights as a citizen. In good conscience, he followed the request of President Andrew Johnson. This request was also favorably endorsed by Lieut. General U. S. Grant, Commanding Armies of the United States.

On October 2, 1865, General Lee took office as President of Washington University in Lexington, Virginia. On this important occasion, he took the "Oath of Allegiance" to the Constitution of the United States and to the Union. Because of bureaucratic inefficiency, this never arrived at the proper place or the proper time. It was transmitted to an unknown as a souvenir.

General Lee would have regained citizenship had he lived some 28 years longer. Congress passed a law in 1898 restoring the citizenship of ex-Confederate soldiers who were alive at the time, so that they might fight against Spain. It has no posthumous provision so that the deceased Lee was excluded.

How We Celebrate January 19, Today

(By Carroll Flaten)

How did Robert E. Lee celebrate his birthday, January 19, as he grew up? No real evidence has come to light. However, in 1977, we know that January 19 is being celebrated in Virginia and much time and effort has been put into the planning of Robert E. Lee's birthday anniversary.

At Stratford Hall, birthplace of Robert Edward Lee in 1807, observances in the past have included candlelight tours of the great house. Last year 720 visitors came to Stratford for a day-time reception and up to 200 stayed on for the burning of the *cressets* (torches) planted about the house, which cast a soft, dramatic glow on the beautiful mansion.

This year Stratford Hall will host an open house from nine a.m. to five p.m. in the reception center, including refreshments of ginger cookies, fruitcake, and punch. Hostesses in period dress will guide visitors through the "Great House", newly resplendent with a large and valued collection of beautiful 18th century furniture. The planning for this event has been done by the Robert E. Lee Memorial Association, Incorporated.

Arlington House will have a double observance of General Lee's birthday. On Sunday, January 16, at 2:30, a program of period music will feature American compositions and popular tunes of the day. Such favorites as the hymn, "How Firm a Foundation," and "Love Not" will be sung by Brad Stickley, baritone, Marion Louise Pollansch, soprano, and Betsy Miller alto, accompanied by Dorothy Peterson on the 1840 Knabe pianoforte.

On Wednesday, January 19 at 1:30, Jean Graham at the pianoforte will accompany Betsy Miller, alto, in a program reminiscent of the musicals at which Lee's cousin, Martha Custis sang for guests during the years the Lees lived at Arlington. These programs have been planned by the Period Music Volunteer Committee under the leadership of Pauline Raudabaugh. Many of the songs come from the collection of Gen. Lee's daughter, Annie courtesy of Washington and Lee University, Lexington, Virginia.

The reception is free and open to the public. It will be held in the white parlor which was decorated by the then Colonel Lee and Mrs. Lee.

In Alexandria, the Boyhood Home of General Lee, 607 Oronoco Street, will feature a candlelight tour open to the public, on January 19 from seven to nine in the evening. Knowledgeable Alexandria Historical Docents will be stationed in each room of this beautiful early Federalist home, furnished with antiques of the period. Visitors will find the many portraits of famous inhabitants, the Lees and the Fitzhughs, and their relatives, especially interesting. Among them are the five portraits of Robert E. Lee which line the staircase to the second floor and include likenesses of him at 18 when he left to enter West Point (1825), as a member of the Army Corps of Engineers (c. 1835), during the Mexican War (1845), as Superintendent of West Point (c. 1855), and as a Confederate General (1860's).

Light refreshments will be served. Admission costs are $1.50 for adults and $0.50 for children under twelve.

At Christ Church on the Sunday nearest January 19th, "How Firm a Foundation", a favorite hymn of Robert E. Lee, sung to a different tune from the familiar one, is always included in the service. Lee is specifically named in the prayers as are the departed in their several generations.

The Alexandria Chapter, The United Daughters of the Confederacy, place a commerative wreath of red and white carnations (the colors of the National Organization), on the marble tablet to the right of the chancel, dedicated to the memory of Robert Edward Lee. On the left of the chancel is an identical tablet in memory of George Washington.

Later this month, the Lee-Fendall House celebrates "Light Horse Harry's" birthday on January 29, with a candlelight reception from seven to nine in the evening. Continuously occupied since it was built in 1785, Lee-Fendall House is the home of the Society of Lees of Virginia. Docents wearing costumes ranging from the 1780's through the early 1900's will serve as guides in each room. Refreshments will be served and the public is invited. Admission charges are $1.50 for adults, $1 for children 12–18. Lee-Fendall House is located at 429 North Washington Street.

Should you wish to hold your own birthday party in a famous home, you might consider renting the Lee-Fendall House for the occasion. Telephone 548–0931 for more information.

Silver Spurs for the General

George crafted spurs with sentient pride for
one who chose the long, the losing way:
Antietam, where the blood ran blue and grey,
where boys from the North and South
lay side by side.

He curved and shaped the spur bands flat
and wide,
with buckled straps to bind the mortal
clay,
As wings to soar beyond the dying day,
the swan like heels feathered the
soldier's ride.

A silver harvest from the barren earth,
Lee's spurs today, with rowels cool and still,
Captive in glass, upon a field of blue,

Strike sparks, in lands now giving second
birth, upon the anvil of the human
will:
Echoes of ancient silver ringing true.

—Margaret T. Rudd.

Bess Truman, the Ice Pick and the Upside Down Lock

(By Alice M. Coit)

Bess Truman was locked out! She was expected. She lifted the gleaming brass knocker and rapped it down once more.

Inside, Mrs. Robert Goodale (Jo) who with her husband were owners of the Boyhood Lee home, 607 Oronoco Street, at that time, was frantically jabbing at the huge brass lock with an ice-pick. The knocking was distracting as the maid wailed in the background, "What did I do? What did I do?" Her calmness for the day had been shattered when she overheard guests say that the President's wife was expected that afternoon. Instead of opening the door, she had turned the key in the old brass lock. The mechanism finally gave in to the ice-pick. The door swung open triumphantly. And the next guest was the First Lady of the United States. Facing her, ice-pick in hand, was her hostess and open-mouthed maid.

Mrs. Truman never questioned the long delay. Her hostess quickly hid the ice-pick, hoping it was not seen.

This is one of the many stories which have come to pass in the two centuries since the Lee House was built.

The brass lock on the front door is an original, made in England, and it has always been upside-down.

Other distinguished guests of at least twenty families who have called 607 Oronoco home,—George and Martha Washington, who frequently visited the Fitzhughs, original purchasers of the house,—George Washington Parke Custis, Martha's grandson and George's adopted son, who came courting Fitzhugh's daughter,—and General Lafayette, who paid a visit to Mrs. Lee for tea,—have perhaps been locked out while the drama of the upside-down brass lock was taking place inside the stately Early Federal mansion.

The Robert E. Lee Boyhood Home, sometimes called the Fitzhugh-Lee House, is one of twin houses built between 1790–1795 by the Potts Brothers of Pennsylvania. They were friends of George Washington, who had used their home as his headquarters at Valley Forge. It sold soon after completion to William Fitzhugh. Lee married Mary Ann Randolph Curtis, Fitzhugh's granddaughter.

Oronoco Street had been known as the Oronoco Trail. Warehouse sheds stood at the waterfront end. Tobacco barrels were rolled down the trail from Washington Street to North Fairfax Street warehouses. The original name planned was Duchess, but the Oronoco usage prevailed. The Lee House was to have the entrance facing north, hence the upside-down lock.

The house is a handsome, twelve room brick structure with slate roof, all brass hardware, including that lock, and nearly every pane of glass original. Woodwork, mantles, cornices and ceiling show the influence of the Adam Brothers. It is beautifully landscaped with old brick walks and terraces and a charming garden including boxwood, camelias, dogwoods and an enormous magnolia tree. The snowball story connected with Lee may or may not be true, or else the snowball had a hard time surviving in the garden. None was there, so Jo Goodale planted one just to satisfy visitors, but none is there now!

Robert E. Lee moved with his family from his birthplace, Stratford Hall, to Alexandria at the age of four. His ailing father, "Light Horse" Harry Lee, left to recover his health in Barbados and died on the way home. Robert was eleven and hardly knew his father. Ann Carter Lee was a gentle, impoverished widow who reared her five children carefully with the help of protective Lee and Carter relatives. In "genteel poverty" Robert grew to manhood steeped in tradition and hard work. He cared for his mother during her long illnesses, did the household chores, learned to do for himself and siblings. He managed time for school and outdoor pleasures. His background gave him the selflessness that was one of his chief characteristics. His sense of duty and concern for others made him the great leader that he was.

A little boy moved into 607 Oronoco Street.

A man named Robert E. Lee marched out to West Point.

There are no ghosts. The realities of lives well spent are present in this gracious house.

SHE WISHED TO RETURN TO THE TOP OF THE HILL

(By Helen Millspaugh Webb)

Mary Ann Randolph Custis Lee spent a carefree young life at Arlington House. Married here, she waited with her children for Robert when she could not be with him on Army assignments. It was beyond belief that she would ever have to leave. Wishing always to return to the top of the hill overlooking Washington, she is said to have remarked, "It looks as if they laid out Washington City just to be seen from up here."

Robert E. Lee married into affluence. He was not considered a proper match by the bride's father, George Washington Parke Custis, grandson of Martha Washington, adopted son of George and heir to extensive plantations. Little did he know that the mansion he built would become world renowned as the Lee Memorial.

Lee, a second lieutenant and almost penniless, asked for the hand of George Washington Parke Custis' only child Mary. A young woman with a mind of her own, she seems to have encouraged Robert's suit and proposal even though her father did not "take kindly" to one of the greatest military geniuses of history. However, he soon learned to admire and respect his son-in-law's multiple capabilities and achievements.

The abrupt change from the luxurious life of a prosperous planter's daughter to the rigors of Army existence in the cramped quarters then provided, took some adjustment for Mary. Her stays at Arlington were frequent during the early years of her marriage. She learned to cope with facilities provided by the military and became known for her competence and graciousness as a hostess during the ensuing years. By the time Robert was made superintendent at West Point, in addition to entertaining officially, she gathered the cadets into her home, along with her own children, each Saturday afternoon for tea or supper.

The Lees were a large and close family group, with seven children. Mary was inclined to be a rather indulgent mother, Robert, as might be expected the disciplinarian, although a loving and fun-loving parent. Pet names were the order of the household. Robert spoke to his children of their mother as, "the Mim". The children in turn were called by such names as Boo, Wig, Precious Life, Rooney, and Bertus.

Robert Jr., dubbed Rob or Bertus, recalls fondly that he and the other children were often permitted to stay up to see their parents off for an evening. His father was invariably ready first and would tease "the Mim" gently about her habitual tardiness.

With the birth of her second child. Mary developed an infection which appeared to be the cause for the arthritis she developed. In spite of her valiant fight against her "rheumatic ailment," she was almost constantly in pain for the rest of her life and spent her last years in a "rolling chair."

From this wheel chair she continued her supervision of her household and gardens and carried on a busy correspondence with relatives and friends. During the war, she sat and knit countless pair of socks for the Confederate soldiers and insisted that all around her do the same. Later, while Robert was president of Washington College (now Washington and Lee University) she used her talent for painting to color photographs made from the Washington portraits which had finally found their way to Lexington. These she sold for the benefit of her church.

At her father's death, it was found that the financial situation, as well as the general maintenance at Arlington, had badly deteriorated. Robert took leave from military duty to put the estate in order. Thus he saved the property, only to see it go to Union forces within four years.

Like her husband, Mary was not proslavery. The Custis slaves were freed according to the terms of her father's will. She was, however, too much the Virginian lady to go against her native state and familiar way of life she would have supported the Old Dominion under either the Union or the Confederacy. At the time, she wrote a friend, "as a man of honor and a Virginian, my husband must follow the Destiny of his State."

Despite Robert's urgent requests that she leave Arlington for safety, Mary remained where she was until May 1861, when she was warned that the approach of the Federal Army was imminent. She was able to slip away only the family silver and the Washington portraits which so long hung in the entrance hall. She and her daughters departed with just their clothes.

As she rode down the drive, Mary was still unaware that she was never again to live in Arlington House. She would make only one brief visit when she was unable and even unwilling to leave her carriage and observe what had been done to her house in the long years of her absence from "home."

A recent visitor to Alexandria, former resident and owner of Robert E. Lee's boyhood home at 607 Oronoco Street, Mrs. R. C. Goodale, recalled a greeting between the two Lee houses on New Year eves. At midnight, the Goodales and John L. Lewis, labor leader and owner of the Lee-Fendall House, simultaneously threw open their front doors to "let the little New Year in".

The two houses could greet each other in this fashion because during the occupancy of the Louis A. Cazenoves (she was a Lee) excessive alterations were made in the interior of the house. These included moving the stairway to the opposite side of the entrance hall, and installing the front door to open on Oronoco instead of North Washington Street.

Lee Corner, as this area was known, reflected the close-knit kinship of the Lee families. Robert E. Lee's uncles Charles and Edmund Jennings Lee owned and lived in 428 North Washington, across the street with their families. Edmund's son, Cassius, was a favorite companion of Robert E. Lee. He and his family later moved to Lee-Fendall House, just across from Robert's family at 607.

The parents of Robert E. Lee (Henry Lee, Light Horse Harry of Revolutionary War fame, and his second wife, Ann Carter Lee) moved in 1810 to Alexandria from Stratford, Westmoreland to be near relatives and provide suitable education for their four children. Their last child was born in their new home, 611 Cameron Street. Subsequently, Ann moved her family to 407 North Washington Street. Years later it became the Rectory of Christ Church.

The General successfully saw the publication of his Memoirs of the Revolutionary War in 1812, but tragedy soon struck. Light Horse Harry was badly beaten in a mob riot in Baltimore where he had gone to aid his publisher friend, Alexander C. Hanson. Badly disfigured and crippled, he sailed in the summer of 1813 to Barbados to try to regain his health. On his return, in 1818, he died at Cumberland Island, Georgia, the island home of the late General Nathaniel Greene, whom he has admired and fought with in the Revolutionary War.

Today the Lee-Fendall House, purchased by the Virginia Trust for Historic Preservation in 1974, is a house museum and memorial to General Henry Lee, who was a frequent visitor as well as a close relative. His first wife, Matilda, was the step-daughter of Philip Richard Fendall owner-builder. His sister, Mary, became Fendall's third wife and a good friend of Ann Carter Lee.

In this house he dined often with his good friend and former Commander in Chief, George Washington, as Lee traveled back and forth during his governorship of Virginia (1791–1794). Here Henry Lee wrote Alexandria's Farewell when Washington became the nation's first president.

Ten years later "Light Horse Harry" was requested and delivered the funeral oration to Washington before both houses of Congress. His tribute included the familiar words: "First in war, first in peace and first in the hearts of his countrymen." He also said, "He was second to none in the humble and enduring scenes of private life."

LEE'S ARLINGTON

(by Lolete Falck Barlow)

Above the river wide and still,
A half-moon rests on darkened hill;
Majestic, stately lunar queen,
A noble house, fond Custis dream.
Those windows lit so long ago
By candles casting mellow glow
Now stand emblazoned, bathed with light,
In stark relief against the night.
Would he who loved it best of all,
Yet left to answer duty's call,
Not view with pride the lonely flame
That burns for all who did the same?
On hallowed lawns the nation keeps
A vigil while her heroes sleep.

A NEW TEST DETECTS CHRONIC ALCOHOLISM

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. BINGHAM. Mr. Speaker, the discovery of a new and promising type of test which may help in the fight against chronic alcoholism has been reported since Congress adjourned last October and I am happy to report that Dr. Charles Lieber of the Bronx Veterans' Administration Hospital was one of those responsible for this discovery.

Earlier last year the prestigious Albert Lasker Award for Basic Medical Investigation was awarded to another member

of the Bronx VA Research Service, Dr. Rosalyn Yalow.

These developments attest to the importance of the research work being carried on at the Bronx Veterans' Administration Hospital.

I insert herewith the New York Times account of the discovery with respect to alcoholism:

[From the New York Times, Nov. 28, 1976]

A NEW TEST DETECTS CHRONIC ALCOHOLISM; RESEARCHERS SAY DISCOVERY OFFERS POTENTIAL FOR BETTER THERAPY FOR MILLIONS OF AMERICANS

(By Lawrence K. Altman)

The first specific blood test to detect chronic alcoholism has been developed by a team of researchers here as an unexpected dividend from their alcohol experiments on baboons. The test offers the potential of more precise and improved therapy for the millions of Americans who suffer from alcoholism, a major public health problem, the researchers reported in a scientific journal published yesterday.

Because the substances measured in the test persist in abnormal amounts after alcohol disappears from the blood, the researchers from the Bronx Veterans Administration Hospital and the Mount Sinai School of Medicine, City University of New York, found that the new test could detect alcoholism even after heavy drinkers stopped drinking.

The test involves taking a blood sample from a patient and then calculating the ratio of two amino acids called alpha amino-n-butyric acid and leucine in the plasma fraction of the blood. Amino acids are the building blocks of proteins.

TWICE AS HIGH IN ALCOHOLICS

For unknown reasons, this plasma fraction was found to be more than twice as high in alcoholics as against nonalcoholics. The studies were done on hospitalized and ambulatory alcoholic patients and healthy nonalcoholic volunteers. The abnormality was unrelated to the patients' nutritional status, because it was found in both well and poorly nourished alcoholics, the researchers, Dr. Spencer Shaw, Dr. Barry Stimmel and Dr. Charles Lieber, reported in the current issue of Science.

The test can be done in any laboratory that has spent up to $50,000 for an amino acid analyzer, and the researchers are using the test to evaluate various treatments in industrial and rehabilitation clinics for alcoholism. But Dr. Lieber said in an interview that he considered the test experimental and not available for routine use until independent teams of researchers had verified the results according to the custom in scientific research.

Dr. Frank B. Seixas, the medical director of the National Council on Alcoholism, said in a separate interview that he considered the new test "a brilliant discovery" and "of tremendous significance" in the field of alcoholism research.

Although there is no universally accepted practical definition of alcoholism, the results of the test were reported to correlate closely with the criteria of alcoholism as defined by the National Council on Alcoholism. "It's the only available biochemical test that can meet these criteria," Dr. Lieber, the research team head, said.

AN IMPORTANT STEP

Development of a blood test for alcoholism is considered an important step toward the eventual scientific unraveling of the mysteries of why many heavy drinkers die of cirrohsis of the liver and brain damage while others seemingly tolerate the effects of chronic drinking without apparent damage.

Doctors now use a variety of blood tests to measure the extent of damage to the liver and other organs resulting from alcoholism. But these tests are nonspecific; that is, the damage found need not have been produced by alcoholism.

Abnormalities found in liver function tests, such as the SGOT enzyme test, reflect damage to the liver from a wide variety of causes, among them alcoholism. The physician correlates the laboratory findings with the information he elicits in an interview with the patient. If the doctor suspects that the abnormalities found in the tests are due to long term drinking, he diagnoses alcoholism.

Doctors can also measure the amount of alcohol in the blood. But there are limits to the usefulness of the test because its presence does not necessarily means chronic alcolholism. Further, because alcohol rapidly disappears from the blood, the alcohol tests may be normal in a chronic alcoholic patient, depending on when the blood sample was taken.

THE PRIMARY CHALLENGE

"The presence of alcohol in the blood is not required for the positivity of this test," the researchers reported.

Dr. Lieber said that the primary challenge to his research team now was to determine the mechanism by which alcohol produced the biochemical changes that were measured by the test.

The researchers have determined that the test results reflect prolonged rather than short-term intake of alcohol; that the test remains positive more than a week after the long-term drinking period ends, and that it tends to become negative as the alcoholic begins abstinence.

"At this point, we know what the test means—it is associated with heavy drinking—but we do not know how the abnormality comes about," Dr. Lieber said.

Dr. Lieber is a specialist in internal medicine whose interest in liver disease has led him over the last 20 years to investigate alcoholism in man and animals. Three years ago, his team upset medical dogma by producing cirrhosis of the liver in baboons that ate a nutritious diet and also drank alcohol each day. It was in the course of the baboon experiment that Dr. Lieber's team made the surprising observation that amino-n-butyric acid was about seven times as high in the blood of alcoholic animals as in nonalcoholic animals.

When Dr. Lieber's team tested for the same substance in humans, similar results were found. Then, aided by the Veterans Administration and the National Institutes of Health, the scientists began the study now reported.

Among the questions that Dr. Lieber's team hopes to answer eventually are the following:

Who is at risk of becoming an alcoholic?

Can heavy drinkers in the community be identified?

Having identified heavy drinkers, can those particularly at risk of developing such severe complications as cirrhosis be singled out before damage results?

"At this time, the test is not a predictor of who will become a heavy drinker but a determinant of who is a heavy drinker," Dr. Lieber concluded.

BILL MANNING RECEIVES SILVER STAR

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, January 17, 1977

Mr. JONES of Tennessee. Mr. Speaker, I want to take this opportunity to pay tribute and honor to one of my constituents who has just been honored with the third highest military decoration of this country—the Silver Star. Bill Manning is now serving as the register of deeds of Gibson County, Tenn., but it was not so long ago that his very life was at stake as he served with our Armed Forces locked in combat in the jungles of Southeast Asia.

On November 10, 1969, Bill Manning was known as Sergeant First Class Manning of Company E, 1st Battalion, 5th Cavalry. The fire base he and his men were helping defend had just withstood a heavy night attack by the North Vietnamese when he was given the mission of conducting a reconnaissance patrol for the purpose of determining if the enemy had actually withdrawn, and if possible to determine what their withdrawal route had been.

What ensued was a nightmare for SFC Manning. According to the citation that accompanied Bill Manning's Silver Star, the patrol had reached a point about 100 yards inside the woods outside the fire base when he heard a noise to the front. He directed his men to take cover while he investigated. Suddenly, he was fired upon by a North Vietnamese ambush. A rocket struck nearby spraying him with shell fragments, severing his left arm from his shoulder, and shattering his right hand.

Although severely wounded, SFC Manning remained calm and crawled back to where he could direct the actions of his patrol. He refused to be evacuated until the ensuing action had been completed. His presence and his actions, although he was gravely wounded, inspired the patrol to overrun the enemy ambush and drive them from the field of battle.

During this same time, I was a newly elected Member of Congress, but I soon came to know Bill Manning when his wife requested my assistance in helping her get to Japan where her husband was hospitalized, close to death after the amputation of both arms. With help from the Department of the Army and a little luck, she was able to get to his bedside to provide him with inspiration and hope.

Since that time, I have kept up with Bill and have grown to admire him more and more in the 7 years that have lapsed since he was wounded in the service of his country. With the determination and dedication that is so uniquely his, Bill Manning has overcome what many others might consider a disabling handicap.

Since his return to civilian life, Bill Manning has adjusted to the artificial limbs that replaced his arms. He has become active in civic work, is active in the work of his church, and has sought and won elected office in his home county.

Moreover, he has won the admiration and affection of those who have known him and who have come to know him. Bill stands as a model of dedication, determination, and courage to the thousands of handicapped citizens in this country as well as those of us who have been blessed with good health all our lives.

The Silver Star that was awarded to Bill Manning for his heroic and unselfish service to his country is a tribute to him and a lasting memorial to a man who epitomizes the true meaning of the words "duty, honor, and courage."
